HIGHWAY EXTENSION AND RESEARCH AT PURDUE UNIVERSITY

This publication on Population Trends for Indiana Counties — Cities — Towns, 1970-1980, is compiled and distributed as a highway extension activity of the HERPICC project at Purdue University. The Highway Extension and Research Project for Indiana Counties and Cities (HERPICC) was organized at Purdue in 1981 as a cooperative effort between the Indiana Department of Highways, Purdue University, the Indiana Association of County Commissioners and the Indiana Association of Cities and Towns.

This cooperative effort was developed to implement 1981 legislation by the Indiana General Assembly, requiring the Indiana Department of Highways to provide research and extension programs for the local highway systems (counties — cities — towns) throughout the State.

The financial support for those programs of extension and research is derived from a portion of the 47% share of the regular MVHA distribution to local units from gas taxes and license fees collected by the State of Indiana. The cooperative efforts between the Indiana Department of Highways and Purdue University designates Purdue's Engineering Experiment Station and School of Civil Engineering to develop and coordinate these programs.

The HERPICC program of extension and research provides for the preparation of manuals and bulletins setting forth recommended procedures and for regional workshop conferences with local road and street officials throughout the state to review typical road and street problems for their area. The goal of all these activities is to assist and guide local road and street officials in their problems of management, planning, design and operation of the local road and street systems (counties — cities — towns).

The HERPICC program of extension and research is guided and approved by a fourteen-member Advisory Board, consisting of six (6) County Commissioners, three (3) City Mayors, four (4) members from the staff of Purdue's School of Civil Engineering, and one (1) member from the Indiana Department of Highways. The current membership of the HERPICC Advisory Board is listed herewith.

Highway Extension and Research Project for Indiana Counties and Cities (HERPICC) Purdue University — School of Civil Engineering West Lafayette, Indiana 47907

HERPIC ADVISORY BOARD MEMBERS — 1979-1981

Paul Anders, Whitley County Commissioner
Gene Beck, Putnam County Commissioner
William H. Goetz, Professor — Purdue University
Merrill A. Groves, Bartholomew County Commissioner
Martin J. Gutzwiller, Professor — Purdue University
Joseph L. Haskins, Daviess County Commissioner
Mark H. Houck, Professor — Purdue University
Harold L. Michael, Professor — Purdue University
Charles F. Scholer, Professor — Purdue University
Walter A. Schulenburg, Tipton County Commissioner
N. Atterson Spann, Lake County Commissioner
Eldon J. Yoder, Professor — Purdue University

HERPICC ADVISORY BOARD MEMBERS — 1981-1983

Paul Anders, Whitley County Commissioner
Virgil Bell, Indiana Department of Highways
Max Branch, Mayor of Alexandria
Hal Doriot, Elkhart County Commissioner
Arnold Dougherty, Wayne County Commissioner
William H. Goetz, Professor — Purdue University
Martin J. Gutzwiller, Professor — Purdue University
Charles Hillenburg, Lawrence County Commissioner
Harold L. Michael, Professor — Purdue University
Charles F. Scholer, Professor — Purdue University
Walter A. Schulenburg, Tipton County Commissioner
N. Atterson Spann, Lake County Commissioner
John Williams, Mayor of Bedford
Alan Wilson, Mayor of Muncie

| Summary of Population Trends Indiana — 1970-1980 | 33 |
| Population of U.S. — 1980 | 35 |

Indiana's population increased from 5,195,392 to 5,490,179 during the 10-year period ending April 1, 1980, according to the final counts of the 1980 Census of Population. This increase of 294,787 represents a percentage increase of 5.7% for the 10-year period, which compares with 11.4% increase for the total U.S. population for the previous 10-year period. It should also be noted that Indiana ranks 12th in the Nation for total population count.

The 1980 population census presents a new base or dimension for estimating future needs and growth. Business and industry are always alert to new census figures, since they can be translated into market demands and other economic factors. Census figures also serve as a basic planning yardstick for estimating the needs for local government services. With the new 1980 census available, it is appropriate and timely for county and city officials to consider these population figures and trends in relation to needs and requests for local government services, such as roads and streets, schools, sanitation, utilities, etc.

To assist Indiana county, city and town officials in making a more comprehensive interpretation of the 1980 census figures, this report presents tabulations and rankings that permit a direct comparison of population growth and population totals for city, town and county units. The basic data for these tabulations are taken from official 1980 census reports.

The tabulations in this booklet show rural population for the county unit as the difference between the total population for the county and the total population for all incorporated cities and towns in the county. This interpretation of rural population is at variance with that used in the official census reports and should be noted in the comparison of rural and urban population figures from the official census reports.

For those Indiana county officials who are directly responsible for planning and estimating their county's future needs for local government services, the following official census publication is

recommended as a detailed office reference. This publication contains more detailed population data and classifications than included in this booklet.

U.S. Bureau of the Census, 1980 Census of Population and Housing, Advance Reports, 1980 Census of Population and Housing, Indiana, PHC80-V-16, Final Population and Housing Unit Counts, U.S. Government Printing Office, Washington, D.C. 1981, \$0.70.

EARLY COUNTS IN INDIANA

Indiana was organized as a Territory in 1800 and was admitted to the Union as the 19th State in December, 1816. The 1800 census figures show about 2500 persons located in what is now the State of Indiana. The decennial census figures for Indiana 1810-1980 are as follows:

| | | | | | |
|------|-----------|------|-----------|------|-----------|
| 1810 | 24,520 | 1870 | 1,680,637 | 1930 | 3,238,503 |
| 1820 | 147,178 | 1880 | 1,978,301 | 1940 | 3,427,796 |
| 1830 | 343,031 | 1890 | 2,192,404 | 1950 | 3,934,224 |
| 1840 | 685,866 | 1900 | 2,516,462 | 1960 | 4,662,498 |
| 1850 | 988,416 | 1910 | 2,700,876 | 1970 | 5,193,669 |
| 1860 | 1,350,428 | 1920 | 2,930,390 | 1980 | 5,490,179 |

The 1840 census seems to be the first Indiana census to be compiled by counties. In that census (also 1850), Wayne County was the most populous county in the State, probably because it served as a "gate-way" into Indiana via the National Road, now US 40.

Indiana's present-day population centers were well-established and growing communities shortly after the turn of the century. In fact, the most of today's population centers were among the leaders in the early census figures for the State.

COUNTY COUNTS — 1980

The final count figures for the 1980 Census indicate that Indiana's population has increased from 5,195,392 in 1970 to 5,490,179 for 1980 — an increase of 294,787 (or about 5.7%) during the last decade.

A tabulation of the final count figures by counties (see Table 1) shows that the increase in state-wide population is distributed among 81 counties, with minor losses occurring in the remaining 11 counties. Counties having an increase of 10,000 or more include:

| | | |
|----------|-----------|------------|
| Allen | Hendricks | Porter |
| Clark | Johnson | Tippecanoe |
| Elkhart | Kosciusko | Warrick |
| Hamilton | Monroe | |

Of these, Porter County's increase of some 32,000 is the greatest increase in numbers, Percentage-wise however, Hamilton County's 51.1% increase tops the list.

Besides the new population counts and increases by counties, the state maps of county population figures (see pages 14 and 15) enhances their comparison by geographic area. This also makes it convenient to review the population trends of the so-called "bed-room" communities adjacent to our major metropolitan centers.

POPULATION OF RURAL AREAS

The population figures for rural areas (see Table 4) are determined for each county as the difference between the total population for the county and the total population for all incorporated cities and towns in the county. Therefore, the population figures for Rural Areas represent all unincorporated areas for each respective county.

In all cases, the County Total represents the final population count within the respective County-Line Boundaries. Therefore, in counties with county-line Towns, the tabular values for Rural Areas are:

- (a) increased slightly if the smallest portion of the town lies within the county, and
- (b) decreased slightly if the largest portion of the town lies within the county.

COUNTY LINE TOWNS

In 1970, Indiana had 16 county-line towns lying in two adjacent counties. In such cases, the total town population (see Table 4) is reported only in the County having the largest share of the Town population. The following is a list of the county-line towns, their total population and a break-down of population counts in each adjacent county.

| Town County | 1980 Popul. | Town County | 1980 Popul. |
|----------------|----------------|----------------|----------------|
| ALBANY | 2,625 | GLENWOOD | 370 |

DISTRIBUTION OF STATE-COLLECTED TAXES TO LOCAL UNITS IN MARION COUNTY

The "Uni-Gov" law (Acts 1969, Chapter 173) creates a "Fire Special Service District", with boundaries initially coterminus with Indianapolis corporation boundaries prior to "Uni-Gov". The act further provides for the Motor Vehicle Highway Account Fund to be allocated to the Consolidated City using the population inside the Fire Special District and to the County using the miles of county roads outside the Fire Special Service District. This creates the need for a separate census count inside the Fire Special Service District (generally coextensive with the Old Indianapolis corporation boundary); likewise the need for a separate road mileage inventory outside the Fire Special Service District.

The act further provides for the Motor Vehicle Highway Account Funds, the Cigarette Tax Funds and Alcoholic Beverage Taxes to be allocated to each City and Town in Marion County the same as under other applicable law. Since all such allocations are based on population, this means that separate population counts are needed for all cities and towns in Marion County, the same as in the past.

The population figures for Cities and Towns in Marion County listed in Table 4, are the 1980 final census figures with the exception of "old" Indianapolis; in which case, the population listed is an unofficial estimate of 1970 population inside the corporation boundaries prior to Uni-Gov (1-1-70). This figure will be used until an update figure is provided for the 1980 census.

City-Town Units

- Towns of 2000 or more population may change to a city form of municipal government (IC 36-4-1)
- However, the change from a Town to a City will incur additional costs for administration and operation (IC 36-8-8)

Federal-Aid Highway Funds

- Cities and Towns of 5000 or more population are eligible to participate in Federal-Aid Urban (FAU) funds.
- Cities and Towns of less than 5000 population, as well as County Units, are eligible to participate in Federal-Aid Secondary (FAS) funds.

Population Trends: 1970-1980

A shift in population from the cities and towns to the rural, unincorporated areas is the dominate feature of Indiana population trends during the last 10-year period between the decennial census. An analysis of Table 4 — "Population of Indiana Counties by Rural Areas, Cities and Towns" provides the following items on gains and losses of population, 1970-1980.

City & Town Populations:

- 67 counties had a gain in population for the cities & towns (group total) in the county.
- 25 counties had a loss in population for the cities & towns (group total) in the county.
- 347 cities & towns had a gain in population.
- 219 cities & towns had a loss in population. (out of a total of 566 cities & towns — state wide)
- State-wide — cities & towns had a 100,381 gain in population — an increase of 3.13 percent.

Rural Area Populations (unincorporated):

- 82 counties had a gain in population for the rural areas in the county.
- 10 counties had a loss in population for the rural areas in the county.
- 70 counties had population gains that are greater for the rural areas than for the cities & towns (group total) in the county.
- State-wide — rural areas had a 194,406 gain in population — an increase of 9.78 percent.

County Total Populations:

- 80 counties had a gain in total population.
- 12 counties had a loss in total population.
- State-wide — Indiana's 92 counties had a net gain of 294,787 in population — an increase of 5.67 percent.

Counties with Increase in Population of 10,000 or More 1970-1980

| County | Population Increases | Percent Increase |
|------------|----------------------|------------------|
| Porter | + 32,702 | 37.54% |
| Hamilton | + 27,849 | 51.07 |
| Johnson | + 16,102 | 26.34 |
| Hendricks | + 15,830 | 29.33 |
| Allen | + 13,880 | 4.95 |
| Warrick | + 13,502 | 48.27 |
| Monroe | + 13,166 | 15.45 |
| Clark | + 12,962 | 17.08 |
| Tippecanoe | + 12,324 | 11.27 |
| Kosciusko | + 11,428 | 23.75 |
| Elkhart | + 10,801 | 8.54 |

Group Total 180,546
or 61% of state-wide population growth for 10-year period.

Counties with Decreases in Population 1970-1980

| County | Population Decrease | Percent Decrease |
|-------------|---------------------|------------------|
| Marion | - 23,536 | - 3.60% |
| Lake | - 23,288 | - 4.26 |
| St. Joseph | - 3,210 | - 1.31 |
| Wayne | - 3,051 | - 3.86 |
| Grant | - 3,021 | - 3.60 |
| Vigo | - 2,143 | - 1.87 |
| Vanderburgh | - 1,257 | - 0.74 |
| Benton | - 1,044 | - 9.27 |
| Rush | - 748 | - 3.68 |
| Delaware | - 632 | - 0.49 |
| Jay | - 336 | - 1.43 |
| Blackford | - 318 | - 2.00 |
