The Must-Have Reference Guide for Analytical, Industrial, and Research Labs is Now Available Online

The ACS Committee on Analytical Reagents sets purity specifications for almost 500 reagent chemicals and over 500 standard-grade reference materials. These specifications have become the de facto standards for chemicals used in many high-purity applications, with agencies like the US EPA and ASTM mandating use of these specifications and methods. In addition to detailing these specifications, ACS Reagent Chemicals provides general physical properties and analytical uses for all reagent chemicals as well as guidelines for standard analytical methods.

We've built a brand new online resource from the ground up. With this new online edition, we've created a streamlined, mobile-friendly user interface that's built on the same familiar platform as ACS journals. Other benefits include:

- > The same authoritative source you trust delivers the only complete source for analytical tests and specifications.
- > DOIs for each chapter streamline citing each monograph.
- > Methods and monographs are hotlinked, helping the reader to quickly find all the information they need.
- > HTML and printable PDF formats help readers use the content in the format that is most convenient for them.
- > Usage, denials, and abstract data at the chapter level help librarians track utilization.

Coming in late 2017

- > Regular online additions and updates to existing content.
- > Each monograph will show a summary of historic changes moving forward, giving the reader full awareness of changes.

The Missing Piece of the Puzzle

Turmoil in the book vendor industry has significantly impacted library acquisitions, and you've probably experienced some of the challenges when dealing with today's major booksellers. Unfilled or "canceled" orders that force you to search elsewhere. Customer service issues that cost you time and money. And, of course, no ILS interface with online vendors.

As a complement to your existing vendor, Midwest Library Service can provide the missing pieces.

- FREE ILS interface via our InterACQ system (simple to learn & easy to use)
- A primary focus on order fulfillment
- Automatic out-of-print search
- UK sourcing, if necessary
- A report of "Not Available" means not available (from publisher or out-of-print market)
- Designated library service representative for direct communication
- Flexible processing available
- Customizable invoices & packing slips
- Backorder service for books not yet published or out of stock
- ...& much more!

Save time, effort, and aggravation with Midwest Library Service as your supplemental vendor.
