Anticipatory Set/Introduction [Inquiry Question is required] (Req.): How do life experiences affect a				

Instructional Sequence/Procedure (Req.):

person's perception of a place based on mental maps.

- 1. Have students draw a mental map of the world from memory and label as many countries, features, and cities on it as possible.
- 2. Have students pair with a neighbor and analyze by discussing why they have included what they did on their map.
- 3. Initiate the discussion by writing the following questions on your blackboard and ask them to discuss with a partner. What region/continent of the world is focused at the center of the map? (Likely the US) Why do you think that is the case? Are the continents realistic in their size? If not why do you think that you drew your map as you did? (Research shows that students tend to be egocentric and draw the world from the perspective of their own country.)
- 4. Next ask students to now draw a mental map of Africa labeling as many countries, features, and cities on it as possible. (This can serve as a location pre-test of knowledge about Africa and be repeated as a post-test after students have practiced the activity.)
- 5. Students should generate a list of life experiences that will help them analyze why they included things on their maps and explain in an essay an analysis of their map with their life experiences list.
- 6. Have students hand in these mental maps.
- 7. Students should begin practicing the skill of drawing mental maps of Africa by giving them the student instructions included.

Creating Mental Maps: Student Instructions

- 1. Go to the window and trace the map of Africa, placing countries on it, several times, in block style.
- 2. When you have mastered this activity do the same thing from memory at your desk.
- 3. When you are able to do this from memory begin adding detail to your map. You will likely need to use an atlas so that your map looks more natural. Detail should include the list that follows: countries, Nile R., Lake Victoria, Congo R., Mt. Kilimanjaro, Cape of Good Hope, Atlas Mountains, Sahara Desert, Niger R., Jos Plateau, Kalahari Desert. (You may wish to generate your own list based on what you will be doing in the future.) You will need to practice this many times.
- 4. Practice the above activity from memory so that you will be able to complete this task on an exam.
