Helminth Parasites of Some Iowa Fishes

**M. CHRISTOPHER BARNHART¹, GREGG W. CALDERWOOD²,
and EDWIN C. POWELL³**

BARNHART, M. CHRISTOPHER, GREGG W. CALDERWOOD, and EDWIN C. POWELL (Zoology Department, Iowa State University, Ames, Iowa 50011). *Helminth Parasites of Some Iowa Fishes*. Proc. Iowa Acad. Sci. 83(2): 64-66, 1976. Individuals of 16 species of fishes representing the Centrarchidae, Ictaluridae, Catostomidae, Cyprinidae, Percidae, and Serranidae were collected at 8 localities in central and north-central Iowa,

Literature concerning the occurrence and geographic distribution of parasites of Iowa fishes is limited. Meyer (1958) surveyed the helminths of fishes in Trumbull Lake, Clay County, Iowa; and Schwink (1950) surveyed the trematode parasites of *Lepomis macrochirus* in McFarland's Pond, Story County, Iowa. A number of studies (Williams and Ulmer, 1970; Calantine and Ulmer, 1961; Mackiewicz, 1969; Frederickson and Ulmer, 1965; Calantine and Frederickson, 1965; Calantine, 1962; Calantine and Mackiewicz, 1966; Mackiewicz and McCrae, 1965) have been made on the Caryophyllaeid cestodes of fishes in Iowa. Several host and locality records have been reported for the digenetic genus *Phyllodistomum* from Iowa catfishes (Waffle, 1967). Nearly all other records (e.g. Van Cleave, 1921; Linton, 1940; Remley, 1942; Magath, 1917; Manter, 1926; Hunter, 1930) originated at the U.S. Bureau of Fisheries Biological Station on the Mississippi River at Fairport, Iowa. The purpose of this investigation was to extend present knowledge of the helminth parasite fauna of fishes from various localities in Iowa.

MATERIALS AND METHODS

Fish were collected primarily by electrofishing, fike net, or bag seine. Hoop nets, and hook and line were used occasionally. Specimens were transported at low temperature in styrofoam boxes to Iowa State University and kept alive in a Living Stream® unit (Frigid Units, Inc.) at approximately 5°C until examined.

Fish were necropsied individually, usually within a few days after capture. Superficial examination was made with a binocular dissecting microscope. Gills and fins were detached and agitated in a solution of formalin consisting of 1 ml of 40% formaldehyde/liter H₂O for collection of monogenetic trematodes. Organs were placed in separate dishes of saline and dissected. The digestive tract was slit and examined, then cut into sections and scraped. Flesh was examined for encysted metacercariae.

Monogenetic trematodes and small digenetics were pipetted directly into formalin-acetic acid-alcohol (FAA) for fixation. Larger digenetics and cestodes were fixed with FAA under slight cover-glass pressure. Acanthocephalans were refrigerated in distilled H₂O to protract the proboscis and then fixed in FAA. Trematodes, cestodes, and acanthocephalans were stained with Semichon's acetocarmine, cleared in turpentine and mounted in Permount® (Fisher Scientific). A fast green counterstain was used occasionally to accent surface features. Nematodes were fixed in hot 70% EtOH and mounted in CMC-10® (Turtox) or glycerin jelly.

This study was supported by a grant (URP GY11135) from the National Science Foundation.

^{1,2,3}Department of Zoology, Iowa State University, Ames, Iowa 50011

and examined for helminth parasites. Thirty-nine parasite species were recovered: 20 Monogenea, 8 Digenea, 3 Cestoda, 4 Acanthocephala, and 4 Nematoda. A new host record is reported for *Gyrodactylus macrochirii* from *Lepomis humilis*.

INDEX DESCRIPTORS: Helminths; Parasites; Trematoda; Nematoda; Cestoda; Acanthocephala from Iowa fishes.

TABLE I. Localities and Dates of Collections

Locality	Date
1. Clear Lake, Cerro Gordo County, Iowa.	10 July, 1974
2. Des Moines River at Jester County Park, S33 T81N R25W Polk County, Iowa.	25 July, 1974
3. Lake Cornelia, Wright County, Iowa.	28 June, 1974
4. McFarland's Lake, Story County, Iowa.	3 June, 1974
5. Skunk River N. of Ames, S23 T84N R24W Story County, Iowa.	18 July, 1974
6. Springbrook Lake, Guthrie County, Iowa	12 June, 1974
7. Squaw Creek at Ames, S29 T84N R24W Story County, Iowa.	30 July, 1974
8. Waterworks Park ponds, Des Moines, Polk County, Iowa.	13 July, 1974

RESULTS

The localities and dates of collections are listed in Table 1. The parasites are listed by families. Following each species of parasite the host(s) and organ from which parasites were found are noted and the localities are indicated by numbers corresponding to those in Table 1.

PLATYHELMINTHES: TREMATODA: MONOGENEA

GYRODACTYLIDAE

Gyrodactylus fairporti Van Cleave, 1921.

Cyprinus carpio L., body surface, 6.

Gyrodactylus macrochirii Hoffman and Putz, 1964.

Lepomis cyanellus Rafinesque, body surface, 6.

Lepomis humilis (Girard), body surface, 3, 8. This species has not previously been reported from *Lepomis humilis*. It is known to occur on *Lepomis cyanellus*, *L. macrochirus* and *L. punctatus* (Mizelle and Kritsky, 1967). Heavy infestations were found on *L. humilis* from locality 8.

DACTYLOGYRIDAE

Actinocleidus fergusoni Mizelle, 1938.

Lepomis macrochirus Rafinesque, gills, 1, 4, 6.

Actinocleidus fusiformis (Mueller, 1934) Mueller, 1937. Synonyms: *Ancyrocephalus cruciatus* Wedl, 1858; *Cleidodiscus fusiformis* Mueller, 1934; *Syncleithrium fusiformis* Price, 1967.

Micropterus salmoides (Lacépède), gills, 1, 2, 4, 6.

Actinocleidus longus Mizelle, 1938.

Lepomis cyanellus Rafinesque, gills, 6.

Lepomis macrochirus Rafinesque, gills, 6.

Anonchohaptor muelleri Kritsky, et al., 1972.

Carpioidea carpio (Rafinesque) gills, 2, 8.

Clavunculus bursatus (Mueller, 1936) Mizelle and Stokely, 1956.

Synonyms: *Ancyrocephalus bursatus* Mueller, 1936; *Actinocleidus bursatus* (Mueller, 1936) Mueller, 1937.

Micropterus salmoides (Lacépède), gills, 4.

Cleidodiscus aculeatus (Van Cleave and Mueller, 1932) Mizelle and Regensberger, 1945. Synonyms: *Ancyrocephalus aculeatus* Van Cleave and Mueller, 1932; *Urocleidus aculeatus* (Van Cleave and Mueller, 1932) Mueller, 1934.

Stizostedion vitreum (Mitchill), gills, 1.

Cleidodiscus capax Mizelle, 1936.

Pomoxis nigromaculatus (LeSueur), gills, 1.

Cleidodiscus floridanus Mueller, 1936. Synonym: *Cleidodiscus mirabilis* Mueller, 1937, in part.

Ictalurus punctatus (Rafinesque), gills, 2, 7.

Cleidodiscus longus Mizelle, 1936.

Pomoxis annularis Rafinesque, gills, 8.

Cleidodiscus pricei Mueller, 1936.

Ictalurus melas (Rafinesque), gills, 1.

Ictalurus punctatus (Rafinesque), gills, 2, 7.

Cleidodiscus vancleavi Mizelle, 1936. Synonyms: *Onchocoleidus formosus* Mueller, 1936; *Cleidodiscus formosus* (Mueller, 1936) Price, 1937.

Pomoxis annularis Rafinesque, gills, 6.

Pomoxis nigromaculatus (LeSueur), gills, 1, 3.

Icelanonchohaptor microcotyle Kritsky et al., 1972.

Carpoides carpio (Rafinesque), fins, 8. This species was described by Kristsky et al. (1972) from the Missouri River in North and South Dakota, where 34 specimens were taken from the gills of river carpsucker. Both specimens collected in the present study were attached to the pectoral fins of their hosts, rather than the gills.

Urocleidus cyanellus (Mizelle, 1938) Mizelle and Hughes, 1938. Synonym: *Onchocoleidus cyanellus* Mizelle, 1938.

Lepomis cyanellus Rafinesque, gills, 6.

Urocleidus dispar (Mueller, 1936) Mizelle and Hughes, 1938. Synonyms: *Onchocoleidus dispar* Mueller, 1936; *Haplocleidus dispar* (Mueller, 1936) Mueller, 1937.

Lepomis macrochirus Rafinesque, gills, 4.

Lepomis humilis (Girard), gills, 1.

Urocleidus ferox Mueller, 1934. Synonyms: *Onchocoleidus ferox* (Mueller, 1934) Mueller, 1936; *Onchocoleidus mucronatus* Mizelle, 1936; *Urocleidus mucronatus* (Mizelle, 1936) Mizelle and Hughes, 1938.

Lepomis macrochirus Rafinesque, gills, 1, 4, 6.

Lepomis gibbosus (L.), gills, 1.

Lepomis humilis (Girard), gills, 8.

Lepomis cyanellus Rafinesque, gills, 6.

Urocleidus furcatus (Mueller, 1937) Mizelle and Hughes, 1938. Synonym: *Haplocleidus furcatus* Mueller, 1937.

Micropterus salmoides (Lacépède), gills, 2, 6.

Urocleidus interruptus (Mueller, 1936) Mizelle and Hughes, 1938. Synonym: *Onchocoleidus interruptus* Mizelle, 1936.

Roccus interruptus (Gill), gills, 1.

Urocleidus variabilis Mizelle and Cronin, 1943.

Lepomis microlophus (Günther), gills, 6.

PLATYHELMINTHES: TREMATODA: DIGENEA (ADULT FORMS)

BUCEPHALIDAE

Bucephalopsis pusilla (Stafford, 1904) Eckmann, 1932. Synonym: *Bucephaloïdes pusillus* (see Yamaguti, 1971 for taxonomic discussion).

Micropterus salmoides (Lacépède), gut, 2.

LISSORCHIDAE

Lissorchis sp. Magath, 1917.

Carpoides carpio (Rafinesque), gut, 2, 8. Numerous specimens of

Lissorchis sp. (to be described elsewhere) were taken from river carpsucker. Kristsky, et al. (1972) also reported *Lissorchis* sp. from this host.

GORGODERIDAE

Phyllodistomum lacustri (Loewen, 1929).

Ictalurus punctatus (Rafinesque), urinary bladder, 7.

MACRODEROIDIDAE

Alloglossidium corti (Lamont, 1921) Van Cleave and Mueller, 1934. Synonyms: *Plagiorchis corti* Lamont, 1921; *Plagiorchis amieurensis* McCoy, 1928; *Alloglossidium kenti* Simer, 1929.

Ictalurus melas (Rafinesque), gut, 1, 3.

ALLOCREADIIDAE

Crepidostomum cooperi Hopkins, 1931. Synonyms: *C. ambloplitis* Hopkins, 1931; *C. fausti* Hunninen and Hunter, 1933; *C. solidum* Van Cleave and Mueller, 1932.

Lepomis cyanellus Rafinesque, gut, 6.

PLATYHELMINTHES: TREMATODA: DIGENEA (METACARIAE)

DIPLOSTOMATIDAE

Posthodiplostomum sp. Dubois, 1936, metacercaria.

Lepomis macrochirus Rafinesque, encysted in viscera, 1, 3, 4, 6.

Lepomis microlophus (Günther) in liver, 6.

Lepomis humilis (Girard) in viscera, 3, 8.

Lepomis cyanellus Rafinesque, in viscera, 6.

Lepomis gibbosus (Linnaeus) in viscera, 1, 3.

Micropterus salmoides (Lacépède) in viscera, 1, 2, 4, 6.

Pomoxis annularis Rafinesque, in viscera, 6, 8.

Pomoxis nigromaculatus LeSueur, in viscera, 6.

Metacercariae from *Micropterus salmoides* taken from Springbrook Lake (6) were fed to hatchling chicks and adult trematodes recovered from the intestine of the chicks were identified as *Posthodiplostomum minimum*.

Uvulifer sp. Yamaguti (1934) metacercaria

Lepomis cyanellus Rafinesque encysted in skin and muscles, 6.

Lepomis macrochirus Rafinesque encysted in skin and muscles, 1, 4, 6.

Lepomis microlophus (Gunther) encysted in skin and muscles, 6.

Micropterus salmoides (Lacépède) encysted in skin and muscles, 4, 6.

Pomoxis nigromaculatus LeSueur encysted in skin and muscles, 6.

Stizostedion vitreum (Mitchell) encysted in skin and muscles, 1.

CLINOSTOMATIDAE

Clinostomum marginatum (Rudolphi, 1819) metacercaria

Micropterus salmoides (Lacépède), fins, operculum, eye socket, pharynx, 6.

Lepomis macrochirus Rafinesque, fins, 6.

Lepomis cyanellus Rafinesque, fins, 6.

Ictalurus melas (Rafinesque), oral cavity, 3.

PLATYHELMINTHES: CESTODA

BOTHRIOCEPHALIDAE

Bothriocephalus cuspidatus Cooper, 1917.

Stizostedion vitreum (Mitchill), caeca, 1, 3.

Bothriocephalus sp. Rudolphi, 1808. (immature)

Lepomis macrochirus Rafinesque, gut, 4.

Lepomis cyanellus Rafinesque, gut, 6.

Specimens represented by these two records were extensively strobilate but bore no eggs; otherwise, they resemble *B. cuspidatus*.

PROTEOCEPHALIDAE

Corallobothrium sp. Fritsch, 1886. (immature)

Ictalurus punctatus (Rafinesque), gut, 2.

Proteocephalus ambloplitis (Leidy, 1887) Benedict, 1900. Synonym: *P. micropteri* Leidy, 1887.

HELMINTH PARASITES

- Micropterus salmoides* (Lacépède), gut, 1, 6.
Proteocephalus sp. Weinland, 1858. (plerocercoid larvae)
Micropterus salmoides (Lacépède), gonads, liver, kidneys, spleen, gut, 1, 2, 6.
Lepomis macrochirus Rafinesque, gonads, liver, gut, 1, 6.
Lepomis cyanellus Rafinesque, gonads, liver, gut, 6.
Lepomis gibbosus (L.), liver, 1, 3.

ACANTHOCEPHALA

NEOECHINORHYNCHIDAE

- Neoechinorhynchus cylindratus* (Van Cleave, 1913) Van Cleave 1919.
 Synonym: *Neorhynchus cylindratus* Van Cleave, 1913.

- Micropterus salmoides* (Lacépède), gut, 1, 6.
Lepomis cyanellus Rafinesque, gut, encysted in liver, 6.
Lepomis gibbosus (L.), encysted in liver, 1.
Lepomis macrochirus Rafinesque, gut, 1.
Stizostedion vitreum (Mitchill), gut, 1, 3.
Perca flavescens (Mitchill), gut, 3.
Neoechinorhynchus prolixus Van Cleave and Timmons, 1952.
Carpioles carpio (Rafinesque), gut, 2.

ECHINORHYNCHIDAE

- Leptorhynchoides thecatum* (Linton, 1891) Kostylew, 1924.
 Synonyms: *Echinorhynchus thecatum* Linton, 1891; *Echinorhynchus oricola* Linstow, 1901.

- Micropterus salmoides* (Lacépède), upper gut, caeca, 1.
Lepomis gibbosus (L.), cloaca, 1.

POMP�ORHYNCHIDAE

- Pomphorhynchus bulbocollis* (Linkins, 1919) Van Cleave, 1919.
Cyprinus carpio L., gut, 1.

NEMATHELMINTHES: NEMATODA

HETEROCHEILIDAE

- Contraecum brachyurum* (Ward and Magath, 1917) Van Cleave and Mueller, 1934. Synonym: *Hysterothylacium brachyurum* Ward and Magath, 1917.

- Lepomis macrochirus* Rafinesque, gut near caeca, 1.
Lepomis gibbosus (L.), gut near caeca, 1.

CAMALLANIDAE

- Camallanus oxycephalus* Ward and Magath, 1916.
Pomoxis nigromaculatus (LeSueur), lower gut, anus, 3.
Stizostedion vitreum (Mitchill), lower gut, anus, 3.
Camallanus sp. Railliet and Henry, 1915.

Occasional juvenile *Camallanus* were found in the gut lumens of *Lepomis gibbosus*, *L. macrochirus* and *Ictalurus melas* from 1.

RHABDOCHONIDAE

- Spininctetus carolinus* Holl, 1928.

- Lepomis cyanellus* Rafinesque, gut, 6.
Lepomis macrochirus Rafinesque, gut, 1, 3, 4, 6.
Lepomis microlophus (Gunther), gut, 6.
Micropterus salmoides (Lacépède), gut, 2, 4.
Perca flavescens (Mitchill), gut, 3.
Spininctetus gracilis Ward and Magath, 1916.
Pomoxis nigromaculatus (LeSueur), stomach, 3, 6.
Pomoxis annularis Rafinesque, stomach, 6.
Micropterus salmoides (Lacépède), gut, 6.

DISCUSSION

The paucity of published records concerning helminths of fishes in Iowa is illustrated by the fact that only 12 of the 39 species recorded herein have been previously reported in Iowa. The Monogenea are particularly poorly known in the state, with only 3 species previously reported (Van Cleave, 1921; Linton, 1940; Remley, 1942). This lack of published records in no way indicates a depauperate fauna, however.

At least 30 helminth species not found in the present survey have been reported by other workers previously cited. The small overlap between this report and previous records indicates that the list is far from complete.

ACKNOWLEDGEMENTS

We would like to thank Mr. Tom Putnam, Mr. Dave Moeller and other members of the Iowa State Conservation Commission who gave us generous assistance in collecting. We are grateful to Dr. R. J. Muncy of Iowa State University for the loan of equipment.
