MEMORANDUM

TO: University Faculty Senate

FROM: Beverly Kopper
Coordinator, Liberal Arts Core

SUBJECT: Annual Report from the Liberal Arts Core Committee
2004-2005 Academic Year

DATE: October 5, 2005 (Approved November 11, 2005)

Part of the mission of the University of Northern Iowa is to provide a personalized learning environment that is founded on a strong liberal arts curriculum. Objective 1.3 in the 2004-2009 Strategic Plan is to increase understanding of and commitment to the role and value of a liberal arts education as the foundation of a university education. Objective 2.3 is to support and strengthen collaboration among Arts and Sciences, Business, and Education faculty as it pertains to the Liberal Arts Core, Teaching Preparation and other university-wide programs. The Liberal Arts Core (LAC) Committee worked diligently during the 2004-2005 academic year to meet these objectives by focusing on the following areas: (1) program management; (2) category reviews; (3) new Capstone Experience courses and evaluation of the new model; and (4) student outcomes assessment. The activities undertaken and completed related to these areas are discussed below. Continuing concerns and future directions of the Committee are also discussed. The final paragraphs list the Committee members for the 2004-2005 academic year.

Program Management

The overall principles that guide the LAC Committee's work include a commitment to enhancing the LAC and ensuring quality and academic excellence within the Core. These principles are based upon the belief that the LAC forms the foundation for the University's undergraduate programs and that the success of the LAC is ultimately reflected in the extent to which UNI graduates go on to lead lives that are thoughtful, productive, personally meaningful, and socially responsible. The seriousness of these principles is evident in the nature of the work of the Committee members as they put aside their disciplinary allegiances and address issues that are of university wide importance.

This year the LAC Committee addressed these principles by focusing on program management. A central focus of the Committee's deliberations regarding LAC program management included: (1) consistency and quality across multiple sections of courses; (2) feedback mechanisms; (3) number of courses taught by tenured and tenure-track faculty; (4) registration difficulties faced by students; (5) grading practices and standards; and (6) quality teaching. The LAC Committee is also cognizant of the need to increase the understanding and support of the LAC among students, faculty, staff,

parents and administrators. The LAC Committee discussed these issues and its recommendations with the University Faculty Senate during the Senate retreat at the beginning of the fall 2005 semester (see Appendix A). The LAC Committee is working on a proposal related to the LAC categories and the formation of category coordinating committees to address some of the program management issues.

The LAC Coordinator continued to focus on activities designed to increase understanding of and commitment to the role and value of a liberal arts education as the foundation of a university education at UNI. In presentations to parents of new first year and transfer students during winter, spring, summer and fall orientation sessions, the Coordinator discusses the importance of the LAC. The importance of the LAC is also discussed with all first-year students, during these orientation sessions. The Coordinator also discusses the LAC with the summer orientation faculty advisors and student staff.

The Coordinator continued to meet with the Academic Advising Advisory Council to discuss the activities of the LAC Committee, receive feedback from the advisors, and discuss ways of improving the LAC. These types of meetings are seen as an important means of enhancing the overall effectiveness of the Core by opening up communication lines and facilitating collaboration among those involved in the various aspects of the Core. The Coordinator, in conjunction with the Associate Provost, also maintains contact with the Registrar, Associate Registrar and Director of Academic Advising during the registration process to monitor the LAC course enrollment patterns and course needs. The Coordinator also is participating in a post-mortem committee on summer registration held with representatives from Academic Affairs and Education & Student Services during the summer and continuing this fall to facilitate the registration process, especially as it relates to LAC courses.

Category Reviews

A central responsibility of the LAC Committee is to oversee the category review process. During the 2004-2005 Academic year, the Committee dealt with the Communication Essentials and Personal Wellness Category Reviews. The results of these Reviews and the Committee's recommendations are shared with the University Faculty Senate and appropriate University administrators in order to enhance and support the review areas and the entire LAC.

Communication Essentials

The Communication Essentials Review was conducted during the 2003-2004 academic year. The Final Report was received on February 4, 2005 and discussed with the Review Team on February 25, 2005. The LAC Committee voted to accept the Report on April 8, 2005. The LAC Committee Category Review Summary was approved on April 29, 2005 and reported to the University Faculty Senate on September 26, 2005.

Personal Wellness

The Personal Wellness Category Review was completed during the 2004-2005 academic year. The completed Report was received on June 30, 2005 and will be discussed with the Review Team and the University Faculty Senate during the fall 2005 semester.

Category 2 (Civilizations & Cultures)

Category 2 is scheduled for review during the 2005-2006 academic year. To facilitate this process, representatives from the LAC Committee met with the Review Team on April 4, 2005 to discuss the review process and student outcomes assessment, distribute necessary materials and answer any questions Review Team members might have. Michael Shott, CSBS Representative will be serving as the LAC Committee liaison for this review.

Data Collection

The LAC Committee met with Registrar Phil Patton and representatives from the Office of Information Management & Analysis, Thulasi Kumar and Kristin Mosher on March 25, 2005 to discuss ways to facilitate the data collection process for category reviews. The Registrar suggested that he, Dr. Kumar, Ms. Moser and Associate Registrar Patti Rust, could meet to further discuss this issue. The Committee looks forward to their recommendations.

New Capstone Experience Model

New Capstone Experience Courses

The LAC Committee reviewed several new Capstone Experience courses. As part of the review process, the Committee invited the faculty member to an LAC Committee meeting to discuss their proposal. Of the 21 courses that were reviewed, 19 were approved (see outline below).

Capstone Evaluation

As requested by the University Faculty Senate, the LAC Committee conducted an evaluation of the Capstone Experience model. The Committee developed and piloted a Capstone Student Survey and Faculty Capstone Survey during the fall 2004 semester. Based upon the pilot study, the survey instruments were refined. During the spring 2005 semester the instructors of all Capstone Experience classes (24 Environment, Technology & Society; 14 new Capstone Experience courses) were asked to complete a Faculty Capstone Survey and to allow a member of the Liberal Arts Core Committee to attend one of their classes to administer the Capstone Student Survey. Eighteen Environment, Technology & Society classes were surveyed including 458 students and 10 instructors. Twelve new Capstone Experience classes were surveyed including 248 students and nine instructors. The results of the evaluation (9/16/05 Report) have been forwarded to the University Faculty Senate.

Student Outcomes Assessment

The Progress Report on the General Education program and its assessment was submitted on October 1, 2004 to our accrediting body, the North Central Association (NCA) of Colleges and Schools. As noted in previous annual reports, the LAC Committee, particularly the LACC Student Outcomes Assessment (SOA) Subcommittee has been working on developing a comprehensive student outcomes assessment program to evaluate the learning outcomes of the LAC and to address the concerns of the NCA accreditation team that, "There is a need to better integrate the assessment of

student academic achievement, through outcomes assessment, across an integrated General Education curriculum (Final Report, 2/2001, p.57).

As part of the SOA Plan, the Academic Profile (a standardized assessment instrument) was administered by the LAC SOA Subcommittee to a sample of first-year students during the fall 2004 semester and junior and senior students during the spring 2005 semester. The College Student Experience Questionnaire (CSEQ) was administered to a sample of first-year, junior and senior students by the Educational & Student Services Division (with financial support from the Academic Affairs Division) during the spring 2005 semester. The Graduating Senior Survey was administered by the Office of Information Management and Analysis during the 2004-05 academic year. The LAC Committee will be discussing the learning outcomes and the SOA Plan for the Core during the 2005-06 academic year.

Summary

The activities noted above have been undertaken to help reach Objective 1.3 in the 2004-2009 Strategic Plan to increase understanding of and commitment to the role and value of a liberal arts education as the foundation of a university education and Objective 2.3 to support and strengthen collaboration among Arts and Sciences, Business, and Education faculty as it pertains to the Liberal Arts Core, Teaching Preparation and other university-wide programs.

These efforts also reflect the Committee's deep commitment to providing our students with a liberal arts education that develops students' integrative understanding of the knowledge and proficiencies needed for realizing one's potential, instilling a life-long desire to learn, and contributing to societal well-being. Likewise, the Committee hopes these activities also support faculty's efforts to provide our students with the knowledge and intellectual proficiencies that are characteristic of a liberal arts education and a well-educated person.

Continuing Concerns and Future Directions of the Committee

1. Improving program management and ensuring consistency and quality of LAC courses.
2. Encouraging the allocation of appropriate resources to offer LAC courses.
3. Continuing to develop a student outcomes assessment plan that will enhance the quality of the LAC.
4. Evaluating and improving the category review process.
5. Improving grading practices and standards.
6. Reducing the registration difficulties faced by students regarding LAC courses.
7. Increasing the number of LAC sections taught by tenured or tenure-track faculty.
8. Increasing the understanding and support of the LAC among students, faculty, staff, administrators and parents.
9. Integrating the purpose and goals of each Category into the individual courses taught in that category.

- 10. Maintaining appropriate class sizes, particularly in writing intensive and highly interactive courses.
- 11. Encouraging the development and evaluation of Capstone Experience courses.

Liberal Arts Core Program Management: WORKING DRAFT September 2, 2005 (Discussed with the University Faculty Senate on 9/10/05)

The overall principles that guide the Liberal Arts Core (LAC) Committee's work include a commitment to enhancing the LAC and ensuring quality and academic excellence within the Core. These principles are based upon the belief that the LAC forms the foundation for the University's undergraduate programs as reflected in the University's mission statement to provide a personalized learning environment that is founded on a strong liberal arts curriculum. In honoring this commitment, the LAC Committee has an on-going dialogue regarding critical issues facing the LAC and what can be done to improve the quality of the Core. The LAC Committee has discussed many issues related to the overall management of the Core and is seeking the University Faculty Senate's involvement in this dialogue. Thus, the Committee formulated this working draft as a means of facilitating our discussion.

Introduction

The term "program management" refers to management activities and structures intended to insure that a program performs effectively in pursuit of its goals. The Liberal Arts Core (LAC) is currently managed through two mechanisms:

The Liberal Arts Core Committee (LACC) serves as the means by which the UNI faculty discharges its management responsibilities, primarily with regard to the curriculum. In addition to reviewing proposed curricular and other changes on an ongoing basis, the LACC conducts periodic "category reviews," these being the primary means by which the adequacy of the program's curriculum is assessed.

On the administrative side, the Liberal Arts Core is managed by the LAC Coordinator, acting on behalf of the provost, and by college deans and department heads. Among other things, these people schedule LAC courses, make teaching assignments, and monitor instructional performance.

There are reasons to believe that the existing management structures and efforts are insufficient. Most strikingly, recent experience with the Capstone course disclosed substantial faculty and student dissatisfaction with a course that should have been one of the program's highlights. Though this dissatisfaction was acknowledged during the relevant category review process, it should have been highlighted and addressed much earlier. In addition, faculty and students, in informal discussions about other LAC courses, often cite instances of poor teaching, inconsistent course content across sections, and undisciplined grading practices. The severity and extent of these problems are not known, but they suggest the need for a reassessment of existing program management practices.

The need for such a reassessment is also supported by the following considerations: First, category reviews, being conducted on a six-year cycle, are not frequent enough or sufficiently "close to the ground" to effectively monitor classroom delivery of the program. Second, college deans, department heads, and faculty are understandably more likely to focus on their own programs at the expense of the LAC. It is not unreasonable to expect that some faculty and administrators, perhaps many, are not giving this program the attention it deserves.

Accordingly, it is argued, there is a need to review and possibly revise the LAC's existing program management structures and practices. In doing so, it is important to recognize that needed changes may or may not create new responsibilities for the LACC. Nonetheless, the LACC can and should take the initiative in promoting change.

LACC Program Management Initiatives

Some program management activities clearly fall within the purview of the LACC's existing authority. The following initiatives seem to be the most promising of this kind.

Facilitation of Category Reviews. Periodic category reviews will continue to be part of the LAC's program management structure. The value of this component can be increased if related data collection tasks are made less burdensome for category review teams, so they can devote more of their efforts to analyzing and evaluating category/course objectives and performance. Thus, the LACC should establish routine data collection mechanisms that accumulate information needed for category reviews on an ongoing basis, making this data available to review teams as they are formed. The LACC should also develop a set of frequently used, user-friendly tools—for instance, procedures for doing on-line surveys—that review teams can access and employ, thereby easing the learning curve team members must currently go through.

Faculty Coordinating Committees. One mechanism used in the past to insure the consistency of content and quality of teaching in LAC courses is the faculty coordinating committee. Established for particular categories and/or courses, some of these committees are active and effective; others are not. The LACC should develop means of maintaining these committees, establishing new ones where needed, and making them an integral part of our program management efforts. During the spring of 2005, the LACC approved a proposal serving this end. Implementation will begin in the fall of 2005.

Student Outcomes Assessment (SOA). Outcomes assessment is a relatively recent addition to the LACC's responsibilities. Though undertaken, in part, in response to accreditor and other outside demands, SOA can be used for program management purposes. It is expected that, working with category review teams and faculty coordinating committees, the LACC will continue to implement and refine a comprehensive outcomes assessment program for the Liberal Arts Core. Over time, we will learn the ways in which SOA data can and cannot be used to manage this program.

Course Selection. Some of the LAC's program and category objectives can be achieved through a variety of course offerings; the new Capstone requirement is the obvious example. The LACC has encouraged faculty to propose and teach innovative courses that meet program needs. As the level of this activity increases, the LACC may find that it has an opportunity to improve program quality by making greater use of courses and instructors that are effective and well-received by students, while reducing course offerings that are not as effective.

Other Program Management Issues

In addition to the foregoing, the following are significant issues that might be addressed as part of an LAC program management initiative. However, owing to their content and

potential for controversy, before the LACC pursues any of these, it should seek the advice and support of the UNI Faculty Senate.

Student Feedback Mechanisms. To know if there are problems with LAC courses, we must create means by which students can provide feedback on their experiences. Lacking access to the results of student evaluations, we should develop other means of identifying their concerns about LAC courses. At a minimum, we should provide a convenient and secure channel by which students who are unhappy with a course—say, an instructor routinely cancels classes—can communicate their dissatisfaction. It should go without saying that any information received by such means cannot be assumed to be valid.

Grading Practices and Standards. At one time in the past, the LACC routinely received information on student grades for each section of each LAC course. The LACC should consider reinstating this practice, using the information to monitor both the levels and within-section variances of grades. The LACC could also develop recommended standards regarding mean GPAs and grade distributions for classes. Publication of such might have a considerable effect on faculty who grade too leniently or who don't adequately discriminate between high and low performers.

Content Consistency Across Sections. Though some LAC courses benefit from cross-section diversity of content, in most cases, consistency of content is needed so students in different sections get, roughly, the same course. Inconsistency has been a serious problem in some courses, notably "Environment, Technology, and Society." A major objection students raised against our previous Capstone requirement was that the "same" course was so different when taught by different instructors. Other LAC courses—notably the Humanities sequence—teach "core knowledge," what we want all UNI graduates to know. Faculty in such courses may collectively devise lists of required topics and acceptable readings, to insure that students in all sections are exposed to the designated core knowledge. Here the need to maintain content consistency is even greater. We should insure that there is an appropriate level of content consistency across sections of LAC courses, through the efforts of faculty coordinating committees or by establishing new mechanisms, if necessary.

Quality of Teaching. The Liberal Arts Core can have a state-of-the-art curriculum, be taught with small class sizes in modern facilities, be taught to motivated, intelligent students, and yet fail on account of poor teaching. Thus, program management structures must insure that all instructors in LAC courses give their best efforts—that, for instance, faculty don't "blow off" LAC teaching assignments. Steps should also be taken to insure that only qualified instructors—good teachers who are knowledgeable in the relevant field—are hired for adjunct and term teaching roles.

Instructor Review Procedure. Realistically, efforts to improve grading practices, to raise the quality of teaching, and to increase consistency of content across sections will have a limited effect unless they are backed up by sanctions. Instructors who persist in undesirable practices must face the threat of negative consequences. We should develop a procedure for reviewing the performance of instructors who have been found to consistently fall short of reasonable standards. Such a procedure would rely heavily on existing administrative structures (e.g., faculty performance reviews and consultations by deans and department heads), and would be designed in light of pertinent union contract provisions. Plausible procedures might culminate in non-complying instructors

being disqualified from LAC teaching assignments. Presumably this mechanism would only be employed in the most extreme cases. However, its mere existence might motivate some instructors to improve their performance.

Staffing. There is considerable evidence that LAC courses have not always received appropriate staffing consideration from deans and department heads. (See, for instance, Item #2 on the Category Review Summary for Communication Essentials that will soon be submitted by the LACC to the Faculty Senate.) Too often, full-time faculty are assigned to teach departmental courses, while term and adjunct instructors are used to teach LAC sections. This has happened even with faculty hires/lines that were specifically intended to provide coverage of LAC courses. The LACC and Faculty Senate, acting on behalf of the UNI faculty, should reaffirm the importance of this program by negotiating with administrators and monitoring teaching assignments to insure that an appropriate percentage of LAC sections are taught by full-time tenured and tenure-track faculty.

LAC Teaching Awards. With every stick there should be a carrot. UNI has awards that recognize various efforts and accomplishments, including the Outstanding Graduate Faculty Teaching Award for teaching in its graduate programs. Colleges and departments do the same. The university should establish an award for high-quality teaching in the Liberal Arts Core. Mechanisms for identifying candidates and selecting recipients can be devised. Such an award would motivate LAC faculty and provide recognition for the many outstanding efforts that faculty routinely make in these courses.

Whichever of these program management initiatives are pursued, assuredly their implementation will be a gradual process, extending over several years. Thus, we anticipate that program management, as a whole, will continue to be a primary concern of the LACC for the foreseeable future.

86 ECONOMICS MAJOR (restatement of major)

--Revise to read:

Required:

Economics: 920:053; 920:054; 920:103; 920:104;
 920:169*; 920:181 18 hours
 Emphasis requirements (students choose one area
 of emphasis) 18-39 hours
 36-57 hours

Emphases:

1. General Economics (18 hours)
 Electives: 100-level economics courses . . . 18 hours
2. Quantitative Techniques (36 hours)
 Required:
 Economics: 920:168 3 hours
 Mathematics: 800:060; 800:061; 800:062;
 800:076, 800:140 18 hours
 Electives: 100-level economics courses
 (except 920:177) 15 hours
 36 hours
3. Business Analysis (39 hours)
 Students who select this emphasis must satisfy the College of Business Administration (CBA) admission requirements before they can officially declare their major. A copy of the Admission, Retention, and Graduation Policy may be obtained from the Advising and Student Services Office in the College of Business Administration. Prior to completion of the admission requirements, students may sign an intent to major in Economics/Business Analysis and be classified as a prospective (pre)major. Pre-Economics/Business Analysis majors may enroll in lower division (below 100) business courses only. Enrollment in upper division (100-level) business courses requires satisfactory completion of the CBA admission requirements and any course prerequisites.

Economics/Business Analysis majors may declare a double

major, and/or major and minor within the College of Business Administration, subject to the regulations of those CBA departments affected. Economics/Business Analysis majors minoring within the CBA must select minors designated for business majors. To graduate with an Economics/Business Analysis major from the College of Business Administration, a student must earn at least 50% of the business credit hours required for the major at UNI. Students must take at least 50% of the course work required for the degree outside the College of Business Administration. Up to nine hours of economics (excluding 920:020), and six hours of statistics may be counted as outside the College of Business Administration. A student must also complete 920:053, 920:054, 920:103, and 920:104 with at least a C- in each course whether taken at UNI or an institution from which transfer credit for these courses is accepted; must earn a 2.20 cumulative grade point average at UNI; must earn an overall 2.20 grade point average in 120:xxx, 130:xxx, 150:xxx, 160:xxx, and 920:xxx courses taken at UNI; and earn a 2.50 or better, in all 920:xxx courses taken at UNI excluding 920:020, 920:024, 920:070, 920:177, and 920:179. Students given permission to graduate out-of-residence must earn a 2.20 or better in all courses approved and accepted for out-of-residence credit.

Required business core:

Note: Students majoring in Finance and/or Real Estate must satisfy the College of Business Administration (CBA) admission requirements before they can officially declare their major. A copy of the Admission, Retention, and Graduation Policy may be obtained from the Advising and Student Services Office in the College of Business Administration. Prior to completion of the admission requirements, students may sign an intent to major in Finance or Real Estate and be classified as a prospective (pre) major. Pre-Finance and Pre-Real Estate majors may enroll in lower division (below 100) business courses only. Enrollment in upper division (100-level) business courses requires satisfactory completion of the CBA admission requirements and any course prerequisites.

Finance and Real Estate majors may declare a double major, and/or major and minor within the College of Business Administration, subject to the approval of the other CBA departments involved. Finance and Real Estate majors minoring within the CBA must select minors designated for business majors. Finance majors cannot minor in **Finance**, and Real Estate majors cannot minor in Real Estate. However, Finance majors may double major or minor in Real Estate, and Real Estate majors may double major in Finance or minor in **Finance**.

To graduate with a major in Finance or Real Estate from the College of Business Administration, a student must earn at least 50% of the business credit hours required for the major at UNI. Students must take at least 50% of the course work required for the degree outside the College of Business Administration. Up to nine hours of economics (excluding 920:020), and six hours of statistics may be counted as outside the College of Business Administration. A student must also earn a 2.20 cumulative grade point average at UNI; and must earn an overall 2.20 grade point average in 120:xxx, 130:xxx, 150:xxx, 160:xxx, and 920:xxx courses taken at UNI. Students given permission to graduate out-of-residence must earn a 2.20 or better in all courses approved and accepted for out-of-residence credit.

The Finance Department may impose additional admission requirements for students wishing to declare a minor or a second CBA major. Eligibility to declare a minor or a second CBA major is based on competitive GPA and space availability. Students may obtain a copy of these requirements from the Advising and Student Services Office (CBB 321B) in the College of Business Administration.

176 SPECIALIST IN EDUCATION DEGREE (restatement of Specialist in Education Degree)

--Revise to read:

Specialist in Education Degree

The major in School Psychology at the University of Northern Iowa leading to the Specialist in Education Degree involves breadth of preparation as well as depth in a particular field of specialization.

Course work requirements for the Specialist in Education Degree are defined in terms of a three-year graduate program, including internship and work taken on the master's degree. A minimum of 69 semester hours beyond the bachelor's degree is required for completing the program.

The School Psychology major is open to students who hold a master's degree from an accredited graduate school, and who meet the requirements set forth below.

Detailed information on the School Psychology major may be obtained from the Department of Educational Psychology and Foundations.

Department of Educational Psychology and Foundations

Major in School Psychology

Admission to the Ed.S. program in School Psychology requires an earned, accredited master's degree and a prior graduate preparation equivalent to UNI's MAE: General Educational Psychology degree program with an emphasis in Context and Techniques of Assessment.

The Graduate Record Examination (General Test) is required for admission to the program.

Students with deficiencies will be notified prior to admission. Any deficiencies in the student's background will be added to the student's Ed.S. program requirements.

This major is available on the thesis option. A student who did not complete a thesis at the Master's degree level must select the thesis option to complete the EdS degree.

This major is also available on the non-thesis option. Students who completed a thesis as part of a Master's degree program may request to have the EdS thesis requirement waived. At the the time of admission, the student requesting a waiver will submit a copy of the Master's thesis to the School Psychology Committee. The thesis will be reviewed by the School Psychology Committee to determine if the work meets EdS program thesis standards. This determination will be based on 1) the relevance of the topic to the practice of school psychology, 2) whether the thesis is empirically based, 3) whether the thesis is of such quality that it would be accepted as an EdS thesis in the program. Notice of approval or nonapproval of the waiver of the EdS thesis will be sent by the program coordinator to the student, the graduate college, and the office of the registrar.

A student who qualifies for the non-thesis option will complete a research paper on a topic related to school psychology. Depending on the extent of the research paper, the student may earn 1-3 semester hours of research credit.

For the thesis and non-thesis options, a minimum of 36 semester hours is required. A minimum of fifteen (15) hours of 200-level course work is required. Successful completion of a final oral examination is required.

Required:

online LEISURE, YOUTH AND HUMAN SERVICES MAJOR (restatement of major)

--Revise to read:

Division of Leisure, Youth and Human Services
Academic Policies
Major Requirements

Students should indicate their interest in majoring in Leisure, Youth and Human Services by completing an application to the division. Leisure, Youth and Human Services application materials may be obtained in the division office (WRC 203). The following criteria shall be used to determine acceptance as a fully declared major in the program:

1. 2.00 or above cumulative UNI GPA.
2. 2.50 or above cumulative GPA in a minimum of 9 hours of

- coursework in the division (must include 430:010, 430:020, and any other 430:xxx course for which the student is eligible).
3. A grade of C (2.00) or higher in all courses applied to the major. If the student earns less than a C in a major course, s(he) must retake the course within two semesters in order to apply it to the major.
 4. Upon satisfaction of the acceptance requirements (a-c above), the student shall be converted to major status by the division.
 5. Within one semester after full admission to the major, students must demonstrate computer competency through passing the HPELS computer competency exam or successfully completing 440:120.

Within one semester after full admission to the major, students must file an approved undergraduate Program of Study, including all electives to be taken for the major.

In order to remain in good academic standing, students must maintain a cumulative major GPA of 2.50 or above. Students whose GPAs fall below 2.50 will have one semester in which to raise grades to the required level. If they are unable to do so, they must retake the course or courses that caused the GPA to fall below 2.50, and they will be administratively dropped from any other major courses for which they have registered.

In order to be eligible for internship and graduation, students must:

1. Meet the academic criteria above.
2. Complete a minimum of 500 Professional Experience hours in Leisure, Youth and Human Service settings.
3. Hold or obtain current certification.

Minor Requirements

Admission to the Leisure, Youth and Human Services and Youth Services Administration minors requires students to have a cumulative UNI GPA of 2.00. To graduate with a minor in Leisure, Youth and Human Services or Youth Services Administration, students must have a minor GPA of 2.50, with a grade of C (2.00) or higher in all courses applied to the minor. Students must officially declare the minor and file an undergraduate minor Program of Study within one semester of declaration to be eligible to register for classes.

MAJOR IN PHYSICAL EDUCATION (restatement of MA degree)

--Revise to read:

This major is available on the thesis and non-thesis options. A minimum of 30 semester hours is required for both options. Additional hours may be required if, upon entering the graduate program, the student needs prerequisites. Total hours for the thesis option includes 6 hours of

Research 420:299. Total hours for the non-thesis option includes 2 hours of 420:299 for a research paper. A thesis/research paper defense is required.

The Graduate Record Examination (General Test) is not required for admission to the program.

This major offers two emphases:

I. Teaching/Coaching Emphasis:

This emphasis is designed for those students who plan to teach and/or coach in an educational setting at a variety of levels, and is available on the thesis and non-thesis options. A minimum of 15 hours must be at the 200-level for both the thesis and non-thesis options.

If the undergraduate degree in Physical Education does not include a theory class in either Elementary or Secondary Methods in Physical Education, the student will be required to make up the deficiency with one 3 hour undergraduate methods course. This would extend the Teaching/Coaching emphasis to a 33-hour minimum.

Additionally, if the undergraduate degree was not in Physical Education or the student does not have at least 12 hours of undergraduate theory classes (exclusive of activity classes and advanced skill and coaching classes) on the transcript, the student must take 12 hours of either undergraduate or graduate physical education coursework to make up the deficiency; 3 hours of the additional 12 hours must be an undergraduate Elementary or Secondary Methods in Physical Education course. This would extend the Teaching/Coaching emphasis to a 42-hour minimum.

Required:

147 MAJOR IN ART (restatement of MA program)

--Revise to read:

This major has a written or creative thesis option. Each student, regardless of emphasis, must complete a minimum of 30 semester hours. A minimum of 15 semester hours of 200-level course work is required for the thesis options.

The Graduate Record Examination (GRE) is not required for admission to the program.

Individualized programs of study are carefully planned and approved in consultation with a graduate advisor. All degree candidates are required to pass a formal Comprehensive Review in partial fulfillment of the Master of Arts degree requirements.

Two emphases are offered: Art Education and Studio

Qualified applicants are admitted by the Graduate Faculty Admission Committee following selective review of all prior academic and creative achievement. A review of the applicant's undergraduate course work and portfolio is the basis for admission to the graduate program. The Chair of Graduate Studies in the Department of Art should be contacted for specific information regarding the preparation of the applicant's portfolio.

As a general rule, students who have received an undergraduate degree in art will be admitted to the program without additional course requirements. Additional course work may be required of those applicants who meet all other admission criteria but did not complete an undergraduate degree in art. Credit for additional work may not apply toward the degree program.

ART EDUCATION EMPHASIS

Students whose emphasis is Art Education may elect the written or creative thesis option in their individualized area of exploration. Students will complete a written or creative thesis in their individualized area of exploration. The thesis may have theoretical and/or applied emphasis and will result in, for example, a written, visual and/or audio presentation or exhibition. Formal documentation of the thesis will be submitted to the Dean of the Graduate College.

All degree candidates are required to pass a formal Comprehensive Review in partial fulfillment of the Master of Arts degree requirements.

159 Minimum grade/gradepoint policy

--Revise to read:

This major is available on the thesis and non-thesis options. A minimum of 40 semester hours is required for the thesis option, and a minimum of 39 hours is required for the non-thesis option. A minimum of 6 hours of 51C:299 is required for the thesis option. A minimum of 32 hours 200-level course work is required.

The Graduate Record Examination (General Test) is required for admission to the program.

Successful completion of a final oral and/or written comprehensive examination is required for both thesis and non-thesis options.

Requirements for this major include both graduate and undergraduate courses considered essential to certification and the master's degree. Asterisked (*) courses will normally have been completed at the undergraduate level; if not, the student and departmental graduate academic advisor will determine how such incomplete requirements will be met. Students must complete 25 clock hours of supervised clinical observation prior to beginning clinical practice.

Students are expected to receive grades of B- or better in each of the three required credits of 51S:250 Clinical Assessment and each of the four required credits of 51S:255 Advanced Clinical Practice. Students who do not receive a B- grade will be required to meet with the clinic director and department head for review and consultation. Students who demonstrate significant difficulties in the clinical courses, such as failing to meet the B- requirement, may be asked to take an additional semester of either 51S:250 or 51S:255.

Communicative Disorders: 51C:106*; 51C:107*; 51C:111*; 51C:114*;
51C:125*; 51C:127*; 51C:129*; 51C:151*; 51C:152*; 51C:155*;
51C:162*; 51C:166*; 51C:168*; 51C:175*; 51C:177*; 51C:180*.

Required:

Communicative Disorders: 51C:200; 51C:282 3 hrs.
Speech-Language Pathology core: 51S:222; 51S:226;
51S:228; 51S:229; 51S:230; 51S:232; 51S:250 (3 hrs.);
51S:255 22 hrs.
Research: 51C:299 1-6 hrs.
Thesis option (6 hrs.)
Non-thesis option (1-3 hrs.)
Internship: 51C:257 and/or 280:250 4-16 hrs.
Electives 5-9 hrs.
A minimum of 2 hours of 51S:289 is required and other
courses as approved by the graduate advisor.
Thesis option (5 hrs.)
Non-thesis option (9 hrs.)

TOTAL 39-51 hrs.

Students may select a thesis or non-thesis option upon consultation with their graduate advisor. In the Department of Communicative Disorders, all students must have the signature of their advisor for registration for classes, including all adds and drops. Students who are suspended by the Graduate College may not enroll for major courses within this department.

All students must abide by the policies and procedures found in the Graduate Student Handbook, which is published by and available in the department.

The student, in consultation with the advisor, must choose courses designed to meet the standards of the Council on Academic Accreditation of the American Speech-Language-Hearing Association academic requirements for the Certificate of Clinical Competence. Recommendation for clinical certification will be given only upon successful completion of all academic and clinical requirements.

The student must complete a total of 400 clock hours of which 25 are observation and 375 are in direct patient contact in the supervised clinical practicum; at least 325 of the 400 clock hours must be at the graduate level. Certificates in specialty areas will be awarded to students who complete the core and a minimum of 6 additional hours in one or two areas of emphasis. Students should consult with their advisor concerning the specialty certificates.

Based on satisfactory completion of an undergraduate degree in Communicative Disorders or the equivalent, course work, clinical assignments, and the internship experience will ordinarily take four semesters and one summer.

Students seeking endorsement #237 by the Iowa Department of Education must enroll in Human Relations (280:170g). In addition, students are required to complete a minimum of 10 semester hours of course work in professional education, to be selected under guidance of the major academic advisor, and 10 semester hours of practicum in a public school internship.

The professional program in speech-language pathology is a program of both undergraduate and graduate courses leading to a Master of Arts degree. The program is designed to prepare students for careers as speech-language pathologists providing remedial services to the speech, language, and hearing disabled in a wide variety of settings including schools, hospitals, clinics, and care centers for the elderly.

Majors

Students may indicate their interest in majoring in theatre any time after their admission to UNI. Formal indication of interest will be made via the Declaration of Curriculum form at which time the student will be considered a "pre-major" and will be assigned a "pre-major advisor." (For freshmen, this will be a freshman advisor.) A student's freshman year will be devoted primarily to course work in the Liberal Arts Core and **Creativity and Performance (with lab) and Stagecraft:Scenery/Lights or Stagecraft: Costumes**. Major course work will be limited to courses as recommended by her/his freshman advisor and program policy. The following criteria will be used for determination of admission: a) 2.50 cumulative GPA in at least 24 hours of course work (to include 48C:001, 490:010, 490:011, and 620:005 or 620:015 or 620:034). b) 2.50 average GPA in the major. c) Upon satisfaction of the admission requirements (a and b above), a student will be converted to major status after the student files a Declaration of Curriculum which will then be processed and the student assigned a major advisor. The student will be notified of her/his admission. d) Students admitted to a major will be able to continue course work toward their major. e) Students unable to satisfy the admission requirements and consequently denied admission will be notified in writing. f) Students denied admission to a major will not be allowed to pursue major course work except in cases where vacancies exist after all majors have registered. These students may use waiting lists as a means to gain access to courses. Students will be assigned interim advisors until admission requirements are met. g) Students must maintain a minimum cumulative GPA of 2.50 in order to be eligible to participate in productions or enroll in practicum coursework.

Transfer students entering UNI with an Associate Arts (A.A.) degree will be admitted to a major status if their cumulative GPA is 2.50 or better and upon the condition that the requirements of 48C:001 (Oral Communication), 620:005/620:015/620:034, and 490:010 (Creativity and Performance) were satisfied at their junior/community colleges. **Transfer students will take 490:010 (Creativity and Performance) and 490:011 (Creativity and Performance Lab) during their first semester at UNI as part of the transfer orientation process.** Transfer students entering UNI without an A.A. degree will be subject to the admissions standards requirements of students beginning their higher education studies at UNI, i.e. #3.

Minors

1. Admission to a Theatre minor requires a 2.50 cumulative GPA in at least 24 hours of course work (to include

48C:001, 490:010, 490:011 and 620:005 or 620:015 or 620:034).

Theatre Major

Required:

Theatre Core (25 hours):

Theatre: 490:010; 490:011; 490:015; 490:016;

490:024; 490:034; 490:050 (3 required-one may

be in performance); 490:060; 490:061. 25 hours

9 hours from any of the focus areas listed below. 9 hours

34 hours

Students may choose to complete the Level One Reading List Comprehensive Exam to be eligible to declare an Area Emphasis (Performance, Design and Production, Drama and Theatre for Youth). Students who do not successfully complete the test or who opt not to take it are limited to completing the General Theatre degree only.

General (9 hours):

9 hours from preliminary Area Emphasis coursework which could include 3 hours of 490:040, 490:101, 490:127, 490:129, 490:151, 490:155, 490:157, 490:168.

Substitutions only by departmental consent.

Area Emphases: Students who declare an area emphasis must complete the Level Two Reading List Comprehensive Exam by the end of their senior year in order to fulfill the requirements of the Area Emphasis. Failure to successfully complete the exam will cause the student to revert to the General Theatre degree.

Area Emphasis Core (6 hours):

Six hours of Area Emphasis Core electives selected from the following list: 490:056; 490:160; 490:161; 490:168; Study abroad programs/internship; 490:170.

Performance Emphasis (15 hours):

490:121; 490:122; 490:127 (2 required); 490:126.

Design and Production Emphasis (15 hours):

490:040; 490:140 (2 required); 490:141; 490:142; 490:143; 490:151 (1 hr.)

Drama and Theatre for Youth Emphasis (15 hours):

490:101; 490:104; 490:106; 490:109;

3 hours of elective outside the department chosen in consultation with advisor.

Total number of hours decreases from 39 to 34 hours.

BIOLOGY

- 840:105g New Course. Wildlife Ecology and Management -- 4 hrs.
Ecologically based principles of managing populations of game and nongame wildlife. Includes scientific theory and sociopolitical perspectives of management. Discussion, 3 periods; lab, 3 periods. Prerequisites: 840:140; 840:168; junior standing.
- 840:119 New Course. Introduction to Biotechnology -- 3 hrs.
The course will highlight applications of biotechnology to improve human life and the environment. Applications in gene therapy, vaccine development, and environmental clean up will be discussed. Legal, ethical, and moral debates surrounding biotechnology and biotechnology regulations will also be addressed. Discussion, 3 periods. Prerequisites: 840:051; 840:052; 860:044 and 860:048, or 860:070.
- 840:121g New Course. Plant Biotechnology -- 3 hrs.
The course will highlight the theory and applications of plant tissue cultures, genetic engineering (including use of plants for production of antibodies and vaccines), marker-assisted selection, and genomics. The lab component will give students practical experience with the biotechnology applications discussed in lecture. Discussion, 2 periods; lab, 2 periods. Prerequisites: 840:140; junior standing.
- 840:127g New Course. Bioinformatics Applications for Biology -- 3 hrs.
An introduction to computer based analyses and management applications for molecular biological data. Topics will include bioinformatics history, instrumentation, PC applications, resources, data bases and discussions of genomics and proteomics applications. Discussion, 3 periods. Prerequisites: 840:130; 840:140; junior standing.
- 840:129g New Course. Genomics and Proteomics -- 3 hrs.
The course will highlight advances in genome and protein sequencing, sequencing strategies, interpretation of sequence data, database mining, sequence information for drug development, analysing gene and protein expressions using DNA and protein chips, and bioethical issues surrounding genomics. Discussion, 2 periods; lab, 2 periods. Prerequisites: 840:128; 860:063 or 860:120; 840:130 or 860:154; junior standing.
- 840:280 New Course. Advanced Analytical Techniques -- 3 hrs.
Discusses advanced modern methods of biological data collection and analysis, including the use of computer algorithms to help understand experimental results obtained from laboratory or field. Lecture/Discussion, 3 periods. Prerequisite: Consent of instructor.
- 265 840:012 Change description (Life: The Natural World).
Description: Examines living organisms with an emphasis on how the natural world functions as a system and how plants and

animals, including humans, interact. Declared Biology majors cannot receive either university or elective credit for this course.

- 265 840:013 Change description (Life: The Natural World - Lab). Description: Activities illustrating the importance, origins, and maintenance of biodiversity with a focus on the interactions among organisms and between organisms and the environment. Declared Biology majors cannot receive either university or elective credit for this course.
- 265 840:014 Change description (Life: Continuity and Change). Description: Introduction to contemporary topics in biology. Emphasis on study of gene structure and function and applications of biology to human concerns. Declared Biology majors cannot receive either University or elective credit for this course.
- 265 840:015 Change description (Life: Continuity and Change - Lab). Description: Process of science and application of biology to human concerns stressed through student activities involving basic life science concepts encompassing cell structure and function, human genetics, and disease transmission. Emphasis on assisting student in understanding role of biology in our present society. Lab, 2 periods. Declared Biology majors cannot receive either university or elective credit for this course.
- 266 840:103 Change prerequisites (Applied Ecology and Conservation). Prerequisites: 840:051; 840:052; 860:044 and 860:048, or 860:070.
- 266 840:106 Change prerequisites (Vertebrate Anatomy). Prerequisites: 840:051; 840:052; 860:044 and 860:048, or 860:070.
- 266 840:120 Change hours and description (Plant Diversity and Evolution). Hours from 3 to 4. Description: Form and function in vegetative and reproductive organs in all plant divisions, from algae to flowering plants, and their importance in evolutionary thought and plant classification. Lecture, 3 periods; lab, 2 periods.
- 266 840:130 Change title. Title from (Molecular Biology of the Cell) to "Molecular Biology."
- 268 840:180g Change title, hours, description, and prerequisites. Title from (Restoration and Management of Natural Lands) to "Restoration Ecology." Hours from 3 to 4. Description: Ecological principles applied to restoration of degraded terrestrial and freshwater ecosystems. Topics include fire, soils, hydrology, biological invasion. Discussion, 3 periods; lab, 3 periods; arranged field trips. Prerequisites: 840:140; 840:168; junior standing.

PROFESSIONAL SCIENCE MASTER IN BIOTECHNOLOGY (new PSM program)

This degree prepares students for career opportunities in biotechnology-

related businesses and industries. Emphasis is placed on blending molecular and genetic engineering skills with an understanding of business and includes an internship experience. Admission is restricted to students with a G.P.A. of 3.0 or higher and a B.A. or B.S. in Biotechnology, Biology, Biochemistry or a related discipline. To be admitted students must also have taken the following courses or their equivalents: Molecular Biology of the Cell (840:130) or Microbial Molecular Genetics (840:152); and Genetics (840:140). The above courses have prerequisites of General Biology: Organismal Diversity (840:051) and General Biology: Cell Structure and Function (840:052).

Required:

PROFESSIONAL SCIENCE MASTER IN ECOSYSTEM MANAGEMENT (new PSM program)

This degree prepares students for career opportunities in conservation and restoration-related businesses, industries and government agencies. Emphasis is placed on blending ecosystem analysis, management and restoration skills with an understanding of business and other organizational environments, and includes an internship experience. Admission is restricted to students with a G.P.A. of 3.0 or higher and a B.A. or B.S. in Biology, Ecology, or related field. Majors in Agriculture, Geography and other related applied disciplines must take the General Biology sequence (840:051 Organismal Diversity, 840:052 Cell

Structure and Function, and 840:140 Genetics) or equivalents to be considered. To be admitted students must also have had Plant Systematics (840:166g) and either Ecology (840:168) plus Ecology Lab (840:169) or Applied Ecology and Conservation (840:103), or equivalent.

Required:

69 **BIOLOGY MAJOR: BIOMEDICAL EMPHASIS (restatement of emphasis)**

--Revise to read:

This major offers basic preparation to student for allopathic, osteopathic, chiropractic, physical therapy, dental, veterinary, optometric, podiatric and other health-related programs. In addition, it prepares students for graduate study in biomedical sciences, e.g., pharmacology, toxicology, pathology, physiology, cellular biology and related areas. Students should seek advice and information early in their programs so that individual goals and specific additional requirements of some graduate and professional programs can be considered in curricular planning.

69 BIOLOGY MAJOR: ECOLOGY AND SYSTEMATICS EMPHASIS (restatement of emphasis)

--Revise to read:

This emphasis provides training to students interested in organismal and/or ecological biology. With the guidance of a faculty advisor, students who wish to specialize further may follow one of four separate tracks: Ecology, Applied Ecology, Botany, or Zoology. This emphasis is appropriate for students interested in a career with private and governmental organizations conducting endangered species recovery, ecological restoration, biological surveys, toxicity evaluations, environmental impact analyses, field research, museum or herbarium curation, or who wish to work in zoos, nature centers, museums, or botanical gardens. This emphasis also provides suitable background for students wishing to pursue graduate degrees in ecology, animal behavior, systematics, conservation biology, environmental toxicology, population biology, and evolutionary biology. Students who want information about these careers may take 840:060. A program of field courses offered during the summer is available through Iowa Lakeside Laboratory.

Required:*

BIOLOGY MAJOR: PLANT BIOSCIENCE EMPHASIS (restatement of emphasis)

--Revise to read:

This emphasis provides training to students interested in plant bioscience. Students will be trained in the principles and techniques of traditional and molecular biology, tissue culture, and propagation methods. This emphasis is appropriate for students interested in crop improvement, nutritional enhancement, pharmaceutical production, genetic engineering, and plant-based biotechnology which contributes to a wide array of industrial and research applications. Employment opportunities are in agricultural research, food production, and in the pharmaceutical and manufacturing sectors. This emphasis also provides a strong background for students wishing to pursue graduate degrees in the plant biosciences, plant physiology, plant biotechnology, plant genetics, plant pathology and protection, plant developmental biology and others. Students who want information about these careers may take 840:060.

MASTER OF ARTS DEGREE: MAJOR IN BIOLOGY (restatement of MA degree)

--Revise to read:

Students interested in enrolling in the program must complete an application and be admitted to the program. Applications should include three recommendations, and transcripts of undergraduate and graduate credits.

Successful completion of a final written comprehensive examination is required.

This major is available on the non-thesis option only. A minimum of 36 semester hours is required, including a 3-credit-hour research paper. A minimum of 15 semester hours of 200-level course work is required. This program is flexible and designed to allow students, working with their advisory committee, to tailor a program to fit student interests and aspirations in biology.

Required courses:

200-level courses	9 hours
1 course in at least 3 of the 4 content areas (prerequisites vary)	
Biology: 840:202	4 hours
Biology: 840:292	1 hour
Research: 840:299	3 hours
Electives: (100g or above)	<u>19</u> hours
	36 hours

Content areas:

- I. 840:240 Advanced Cellular and Molecular Biology
- II. 840:250 Advanced Physiology and Development
- III. 840:260 Advanced Ecology
- IV. 840:270 Advanced Systematics and Evolutionary Biology

Total number of hours remains the same.

172 MASTER OF SCIENCE DEGREE: MAJOR IN BIOLOGY (restatement of MS degree)

--Revise to read:

This major is available for students seeking an extensive research experience. Students interested in enrolling in the program must complete an application and be admitted to the program. Applications should include three recommendations, and transcripts of undergraduate and graduate credits.

This major is available on the thesis option only. A minimum of 32 semester hours is required, including a minimum of 21 hours of course work and a minimum of 9 hours of thesis research. A minimum of 18 hours of 200-level course work is required for the thesis option.

Students are required to pass an oral comprehensive examination in defense of their final thesis.

This program is flexible and designed to allow students, working with their advisory committee, to tailor a program to fit student interests and aspirations in biology.

Required:

200-level courses (take one course in at least two of

the content areas listed below - prerequisites vary)	6 hours
Biology: 840:202	4 hours
Biology: 840:292	1 hour
Research: 840:299	9 hours
Electives: 100g or above (excluding 840:299)	<u>12</u> hours
	32 hours

Content areas:

- I. 840:240 Advanced Cellular and Molecular Biology
- II. 840:250 Advanced Physiology and Development
- III. 840:260 Advanced Ecology
- IV. 840:270 Advanced Systematics and Evolutionary Biology

Total number of hours remains the same.

71 NATURAL HISTORY INTERPRETATION MINOR (restatement of minor)

--Revise to read:

The Natural History Interpretation minor provides students with interpretive techniques and opportunities to gain practical experience with interpretation and environmental education program development. This minor, taken with the Biology Major: Ecology and Systematics Emphasis or the Earth Science Major: Interpretive Naturalist Emphasis, comprises the Natural History Interpretation program. This program prepares students for employment as interpreters with park systems, nature centers, zoos, museums, planetariums, and other areas requiring natural history communication skills.

Required:

Leisure, Youth and Human Services: 430:050 or 430:146	
or 43T:170	3 hours
Biology: 840:084; 840:184; 840:196	8 hours
Biology: 840:195 OR Earth Science: 870:195	4-6 hours
Biology: 840:180* OR Anthropology: 990:125	<u>3-4</u> hours
	18-20 hours

*If 840:180 is taken to satisfy a requirement of the Natural History Interpretation Minor, it cannot also be used for credit on the Biology Major: Ecology and Systematics Emphasis.

Total number of hours remains the same.

CHEMISTRY

- 860:254 New Course. Advanced Biochemistry -- 3 hrs.
 Amino acid and nucleotide biosynthesis and degradation, signal transduction, or other advanced topics in biochemistry. May be repeated on different topics with consent of instructor. Discussion, 3 periods. Prerequisites: 860:154; 860:155. (Offered odd Falls).

PROFESSIONAL SCIENCE MASTER IN APPLIED CHEMISTRY AND BIOCHEMISTRY

This non-thesis degree, which prepares students for career opportunities in businesses utilizing chemical and/or biochemical processes and instrumentation, is open to students who have earned a bachelor's degree in chemistry or biochemistry. It combines chemistry coursework featuring advanced topics and hands-on use of modern instrumentation with business coursework focused on problem-solving and decision-making. Students interested in the program must submit to the Chemistry Department a complete application, three letters of recommendation, and transcripts of undergraduate and graduate work. The Graduate Record Examination (General Test) is not required for admission to the program.

Required:

- 200-Level Chemistry Courses (choice of two courses from this group) 6 hours
 860:210 Advanced Inorganic Chemistry (3 hours)
 860:220 Advanced Organic Chemistry (3 hours)
 860:241 Advanced Physical Chemistry (3 hours)
 860:242 Advanced Analytical Chemistry (3 hours)
 860:254 Advanced Biochemistry (3 hours)
 Science Courses 12 hours
 820:209 Business and Management for Science Professionals (3 hours)
 820:215 Corporate/Industrial Problem Solving (3 hours)
 820:289 Seminar (1 hour, taken twice)
 820:295 PSM Internship
 Electives 12 hours
 840:129g Genomics and Proteomics (3 hours)
 840:280 Advanced Analytical Techniques (3 hours)
 860:136g Applied Instrumental Analysis (4 hours)
 860:137g Instrumental Analysis (4 hours)
 860:143g Physical Chemistry Laboratory (2 hours)
 860:145g Inorganic Chemistry (3 hours)
 860:149g Advanced Laboratory Techniques in Chemistry (2 hours)
 860:154g Biochemistry I (4 hours)
 860:155g Biochemistry II (2 hours)
 860:156g Biochemistry Laboratory (2 hours)
 860:161g Organic Structure Analysis (3 hours)
 880:144g Nanoscience and Nanotechnology I (3 hours)
 880:148g Nanoscience and Nanotechnology II (3 hours)

 30 hours
Notes:

1. Required science courses will be taken by PSM students in

a 100-level biology course 5 hours
70-73 hours

Total number of hours changes from 73 to 70-73 hours.

COMPUTER SCIENCE

- 261 810:034 Change description (COBOL). Description: Examination of the COBOL language; emphasis on data processing techniques and structured programming methods. Sequential and indexed files, file maintenance, sorting, report design and multi-file processing. Concepts illustrated by business-like examples.

- 262 810:112 Change prerequisites (User Interface Design). Prerequisites: 810:114, 810:115, 810:153, 810:154, 810:172 or consent of instructor for non-majors; junior standing. (Variable).

- 262 810:141g Change description and prerequisites (System Security). Description: Topics include the need for security services, data integrity, network intrusion and monitoring, configuration of secure services, root kits, and buffer overflow techniques and remedies. Additional topics include enterprise-wide monitoring, honeypots, and recognizing trends in a networked environment. Prerequisites: 810:147; junior standing.

- Online 810:161g Change description (Artificial Intelligence). Description: Models of intelligent behavior and problem solving; knowledge representation and search methods; learning; topics such as knowledge-based systems, language understanding, and vision; optional 1-hour lab to include exploration of one or more additional AI programming techniques such as robotics; symbolic programming; heuristic programming; etc.

- Online 810:188g Change prerequisites (Topics in Computer Science). Prerequisites: 810:063 or 810:065; junior standing.

- 78 COMPUTER INFORMATION SYSTEMS MAJOR (restatement of major)

--Revise to read:

The Computer Information Systems major requires a minimum of 120 hours to graduate.

Required:

- Computer Science: 810:041; 810:061; 810:062;
- 810:063; 810:080 18 hours
- Business core:

EARTH SCIENCE

- 870:117 New Course. Earthquakes -- 2 hrs.
Study of the causes, measurements, prediction, and preparation for earthquakes and the effects of earthquakes on civilization.
- 870:124g New Course. Air Dispersion Modeling -- 4 hrs.
Fundamentals of numerical weather prediction; data assimilation; parameterization techniques; estimating emissions; puff and trajectory models; dispersion of dense gases; statistical models; atmospheric chemical transport models; urban and regional regulatory models. Discussion, 3 periods; lab, 2 periods. Prerequisites: 800:061; 800:072; 810:035 or 810:036; 870:123; junior standing. (Offered even Falls).
- 870:177g New Course. Measurement and Analysis of Air Quality -- 4 hrs.
Fundamentals of air sampling and monitoring; estimating errors; collection and analysis of gases and particulates; olfactometry; remote sensing with satellites and lidar; indoor air quality. Discussion, 3 periods; lab, 2 periods. Prerequisites: 800:060; 860:132; 870:123; junior standing. (Offered odd Springs).
- Online 870:115g Change description (Volcanology). Description: Origin, classification, eruptive mechanisms, and hazards of volcanoes and related phenomena. Discussion, 2 periods; lab, 2 periods.
- Online 870:130 Change description (Crystallography). Description: Morphologic, structural, and x-ray crystallography. Laboratory exercises emphasize identification of unknown compounds, determination of space lattices, space groups, and cell parameters by x-ray diffraction. Discussion, 2 periods; lab 6 periods (half-semester course).
- Online 870:131 Change description (Systematic Mineralogy). Description: Crystal chemistry, determinative methods, and systematic description of naturally-occurring compounds with emphasis on rock-forming minerals. Laboratory exercises emphasize determinative techniques. Discussion, 2 periods; lab, 6 periods (half-semester course).
- Online 870:135 Change description (Optical Mineralogy-Petrography). Description: Optical properties of minerals and use of the petrographic microscope with emphasis on identification of minerals in thin section. Introduction to the description and classification of igneous, metamorphic, and sedimentary rocks. Discussion, 2 periods; lab, 6 periods.
- Online 870:142g Change description and prerequisites (Igneous Petrology). Description: Description, classification, and genesis of igneous rocks. Discussion, 2 periods; lab, 6 periods. Field trip. Prerequisites: 870:135; junior standing.

Online 870:143g Change description (Geochemistry). Description: Distribution of elements in the Earth and the chemical processes governing these distributions. Discussion, 2 periods; lab, 6 periods.

AIR QUALITY (new B.S. major)

Bachelor of Science Degree Program

-- 126 semester hours

Air Quality Major

Required:

Chemistry: 860:132 4 hrs
Earth Science: 870:021; 870:121; 870:122;
870:123; 870:124 [Air Dispersion Modeling];
870:137 or 870:195; 870:177 [Meas. and Anal.
of Air Quality]; 870:180 27 hrs.
Geography: 970:173 3 hrs.
Environmental Science: 830:166 3 hrs
37 hrs

Required cognate areas: 27-33 hrs.

Chemistry: 860:044 and 860:048, or 860:070
Computer Science: 810:035 or 810:036
Mathematics: 800:060; 800:061; 800:072
Physics: 880:054 and 880:056 and one 100-
level cognate* elective, or 880:130 and
880:131

64-70 hours

*A 100-level course in a cognate area is required unless met by taking 880:131. Cognate areas for the B.S. degree program in air quality are understood to include chemistry, computer science, geography, mathematics, and physics. Specific cognate courses must be approved by the advisor and department head.

85 GEOLOGY MAJOR WITH ENVIRONMENTAL SCIENCE EMPHASIS (restatement of major)

--Revise to read:

Required:

Mathematics: one of the following courses: 800:046;
800:060; 800:072; 800:092; or 800:172 3-4 hours
Chemistry: 860:044 and 860:048, or 860:070 5-8 hours
Earth Science: 870:031 ; 870:035; 870:129;
870:130; 870:131; 870:135; 870:136 24 hours
Physics: 880:054 and 880:056, or 880:130 and
880:131 8 hours
Economics: 920:024 3 hours

Required environmental science core:

Biology: 840:051 ; 840:052 8 hours
Earth Science: 870:171 3 hours

Two additional environmental courses as appropriate to the student's program and approved by the advisor and the department. 6-8 hours

Summer field course* 6 hours
66-72 hours

*Summer field course requirements to be met by credit earned at field camp approved by the department.

Total number of hours decreases from 69-75 hours to 66-72 hours.

INDUSTRIAL TECHNOLOGY

- 330:127 New Course. Transport Phenomena for Technologists -- 3 hrs. Application of fluid flow, heat transfer, and diffusion mass transport concepts to material processing including conduction, convection, radiation, Bernoulli's principles, turbulent flow, and Fick's first and second law of diffusion are presented. Prerequisites: 330:040; 860:044; 800:046 or 800:060.
- Online 330:019 Change title and description. Title from (Introduction to Technology Education) to "Introduction to Technology Education and Training." Description: Evolution and contemporary approaches in technology education and training. Examination of career opportunities.
- 208 330:024 Change hours and description (Technical Drawing and Design). Hours from 3-4 to 4. Description: Fundamentals of the engineering design process including descriptive geometry, geometric construction, multiview projection, fits and tolerances, and applications. Discussion and applications, 4 periods, design lab 2 periods.
- 208 330:055 Drop prerequisites (Graphic Arts Technology).
- 208 330:060 Change prerequisites (Fundamentals of Automated Manufacturing). Prerequisites: 330:008 or 330:009.
- Online 330:065 Change title and description. Title from (The World of Technology) to "Technology in Society and Organizations." Description: Study of technology in society and the workplace, including selection, utilization, management, impact, and optimization. Focused experiences will facilitate technological literacy. Lecture/Discussion, 3 periods; Lab, 2 periods. May be taken without lab for 3 credit hours.
- 209 330:113g Change prerequisites (Manufacturing Tooling). Prerequisites: 330:008; 330:009; 330:017; 330:024; 330:132; 330:170; junior standing.
- 209 330:122g Change prerequisites (Advanced CAD and Modeling). Prerequisites: 330:017; 330:024; junior standing.
- 98 330:125 Change prerequisites (Commercial and Heavy/Highway Construction). Prerequisite: 120:030.
- 209 330:129g Add "g". Change prerequisites (Linear Control Systems). Prerequisites: 330:039; 800:060; corequisites: 330:152; 880:054 or 800:130; junior standing. (Offered Fall)

208 course offerings

--Revise to read:

330:070 Desktop Composition - 3 hrs.
Design and layout of publications by computer; including typography,
graphics, color, system configurations and industrial applications.
(Offered Fall).

MATHEMATICS

- 800:122g New Course. Statistical Computing -- 3 hrs.
Use of statistical software such as SAS, SPSS, S-Plus, Minitab. Data management, graphical techniques and data analysis, computer-intensive statistical methods. Prerequisites: 800:072.
- 800:123g New Course. Design and Analysis of Experiments -- 3 hrs.
Planning and organizing experiments, one-factor experiments, randomized blocks, Latin squares and related designs, factorial designs and fractional factorial designs, response surface methodology, nested and split-plot designs. Prerequisite: 800:121 or consent of instructor.
- 800:124g New Course. Modeling for Industrial Mathematics -- 3 hrs.
Mathematical models arising in industrial applications and some of the techniques used to analyze them, taken from areas such as statistics, transform theory, differential equations and numerical analysis. Writing and presentation skills are emphasized. Prerequisites: Junior standing.
- 800:125g New Course. Geometric Modeling for CAD -- 3 hrs.
B-spline curves and surfaces, Bezier curves and surfaces, NURBS, curve and surface design, multi-resolution methods, subdivision/refinement methods, scattered data fitting, mesh generation, solid representation, solid modeling. Prerequisites: 800:062, 800:076.
- 800:126g New Course. Operations Research Models -- 3 hrs.
Overview of optimization models, transportation and assignment problems, network analysis, inventory theory, decision theory, queuing theory, dynamic programming. Prerequisite: 800:152.
- 800:166g New Course. Advanced Euclidean Geometry -- 3 hrs.
Topics of plane geometry beyond a first course: compass and straightedge constructions, the nine-point circle, Ceva's and Menelaus' theorems, triangle centers, conics, and tessellations. Prerequisites: 800:060 or equivalent; junior standing. (Offered alternate semesters with 800:165g.)
- 800:183 New Course. Connections: University Mathematics and the Secondary Curriculum -- 3 hrs.
Make connections between the undergraduate mathematics major and the secondary mathematics curriculum. A consideration of modern algebra, modern geometry, probability and statistics, calculus and number theory in the context of the secondary mathematics curriculum. Prerequisites: Co- or pre-requisite: 800:188; 200:128, 200:017, 200:030, corequisites 200:148 and 250:150, 200:148; 6 hours of 100- level courses in mathematics.
- 800:243 New Course. Topics in Discrete Mathematics -- 3 hrs.
Topics from combinatorics, graph theory, analysis and application of algorithms, recurrence relations, difference equations, linear programming, and mathematical induction.

Applications of these topics in the secondary curriculum.
Prerequisites: 800:160 or 800:143.

- 800:267 New Course. Non-Euclidean Geometry -- 3 hrs.
Historical development of geometry models that do not assume Euclid's fifth postulate. Emphasis is on Poincare's disc and upper half-plane models, distance and area in the hyperbolic plane, and Mobius transformations. Prerequisites: 800:076; 800:160; 800:165 or 800:166.
- 800:271 New Course. Teaching Statistics at the Secondary Level -- 3 hrs.
Teaching probability, and descriptive and inferential statistics to secondary students. The distributions of discrete and continuous random variables, confidence intervals, hypothesis testing, regression and correlation. Prerequisites: 800:173 or 800:152.
- 800:272 New Course. Advanced Statistical Methods -- 3 hrs.
Categorical data analysis, logistic and Poisson regression, forecasting, repeated measures, classification and discriminant analysis, cluster analysis, data mining. Prerequisite: 800:1xx [123 Des. & Anal. of Exper.].
- 800:274 New Course. Project Management for Science Professionals -- 3 hrs.
General systems management, organizational structures, composition and role of project teams, project management processes, related quantitative techniques and methodologies, practical implementations, and project management software.
- 800:275 New Course. Industrial Internship/Project -- 6 hrs.
Mathematical analysis of industrial problems. Features work on a project of interest to a cooperating company. Oral and written reports required on the project. Prerequisites: Approval of graduate coordinator and admittance to the PSM program.
- 800:277 New Course. Applied Numerical Analysis -- 3 hrs.
Estimations of accuracy in numerical calculations, propagation of error and backward error analysis; numerical solutions of differential equations and boundary value problems by Euler, Runge-Kutta, Galerkin, finite difference and finite element methods; spline approximations. Prerequisites: 800:062, 800:076.
- 800:280 New Course. Mathematics at the Secondary Level -- 3 hrs.
The history of secondary mathematics in the US. Overview of the most recent reform movement in mathematics education; its effect on the teaching and learning of high school mathematics. Prerequisites: Graduate standing in mathematics.
- 800:281 New Course. Current Research in School Mathematics -- 3 hrs.
Analysis of research in mathematics education and its implications for instruction in high school programs. Prerequisite: 800:280.

- Online 800:046 Change description (Elementary Analysis). Description: Pre-calculus mathematics; equations and inequalities; logarithms, exponential and circular functions; analytic trigonometry, analytic geometry, mathematical induction; applications. Credit reduced to 1 hour for students with credit in 800:043 or 800:056 and to 2 hours for students with credit in 800:044.
- 258 800:143g Change description (Combinatorics). Description: Various ways to enumerate elements of a set and graph theory. Appropriate for mathematics, mathematics education, computer science, and actuarial science students.
- Online 800:157g Change title. Title from (Statistical Quality Control) to "Statistical Quality Assurance Methods."
- Online 800:165g Change title and description. Title from (Introduction to Modern Geometry) to "Introduction to Modern Geometries." Description: Euclid's postulates serve as a model for studying various axiomatic systems defining incidence geometries. Geometries include finite geometries, plane geometry, neutral geometry, taxicab geometry, spherical geometry, and hyperbolic geometry.
- Online 800:180g Change description (History of Mathematics: To the Calculus). Description: Survey of mathematical activities of humankind in numeration and number systems, algebra, and number theory, from pre-history through the present day. Motives, influences, and methods affecting development of these mathematical topics in Mesopotamian, Egyptian, Greek, Islamic, Indian, Chinese, Native American, and Western civilizations. Ethnomathematics as related to these topics.
- Online 800:185g Change title and description. Title from (History of Mathematics: From the Calculus to the 21st Century) to "History of Mathematics: From the Calculus." Description: Survey of mathematical activities of humankind in calculus, from ancient civilizations to the present day. Post-calculus topics selected from analysis, set theory, geometry and topology, mathematical logic, and other integrative developments in 20th century mathematics. Ethnomathematics as related to these topics.
- Online 800:189g Change description and prerequisites (Geometric Transformations). Description: Isometries of the plane in the context of Klein's definition of a geometry as a group acting on a set of points. Rotations, reflections, and translations are used to study congruence, similarity, and symmetry and to solve problems that would otherwise be difficult using analytic geometry and calculus. Prerequisites: 800:076, 800:165 or 800:166g; junior standing.
- 261 800:265 Drop Course. Geometric Symmetry -- 3 hrs.
- Online 800:266 Change description (Topics in Geometry). Description: Topics

from Euclidean and non-Euclidean geometry: convexity, polyhedra and polytopes, model-making, curves and surfaces, paper-folding, symmetry, history, circle inversion, and other topics at the discretion of the instructor.

CERTIFICATE IN CONTINUOUS QUALITY IMPROVEMENT (new certificate)

The Continuous Quality Improvement Certificate provides academic coursework that covers all of the Body of Knowledge (BOK) on which the American Society for Control (ASQ) Six Sigma Black Belt certification examination is based, as well as the overwhelming majority of the BOK on which the ASQ Quality Engineer certification examination is based. The coursework requirements are a subset of those required in the Continuous Quality Improvement Option of the Professional Science Master's Degree in Industrial Mathematics. The certificate is awarded on successful completion of the following courses:

Required:

800:121g Applied Statistical Methods	3 hrs.
800:157g Statistical Quality Assurance Methods	3 hrs.
800:123g Design and Analysis of Experiments.	3 hrs.
800:126g Operations Research Models	3 hrs.
800:289g Seminar in Lean and Six-Sigma Methods in Industry	2 hrs.
800:272 Advanced Statistical Methods	<u>3</u> hrs.
	17 hrs.

**PROFESSIONAL SCIENCE MASTER'S DEGREE IN INDUSTRIAL MATHEMATICS
(new certificate)**

The Professional Science Master's Degree in Industrial Mathematics is designed to prepare students for a career in industry. The curriculum combines a Business and Experiential Component with two degree options, one in Continuous Quality Improvement and the other in Mathematical Computing and Modeling. The Industrial Mathematics PSM student will complete the Business and Experiential Component and one of the two options. There will be one elective course in each option, with the choice approved by the Graduate Coordinator. Requirements for admission to the program include the completion of a bachelor's degree with a G.P.A of 3.0 or higher and successful completion of the following university-level courses: single and multivariable calculus (800:060, 800:061, 800:062), linear algebra (800:076) an introduction to statistics (800:072), calculus-based probability (800:152) and a course in computer programming (810:030, 810:035, 810:036, 810:061, or an equivalent).

Specific requirements for the options follow.

Continuous Quality Improvement Option

The major in mathematics is available with two emphases: Non-Teaching and Secondary Teaching. The Non-Teaching emphasis is available in both the thesis and non-thesis option, requiring a minimum of 36 hours for the thesis option and 32 hours for the non-thesis option. The major in secondary teaching is offered on a non-thesis option only and requires a minimum of 32 hours.

The Graduate Record Examination (General Test) is not required for admission to the program.

Successful completion of a final written comprehensive examination is required for the non-thesis option.

Courses taken to satisfy B.A. requirements may not be repeated to count toward the graduate program.

Non-Teaching Emphasis

Required:

Mathematics: 800:155 or 800:189; 800:201; 800:203;
 800:240 12 hours
 At least two of the following: 800:202; 800:204;
 800:245; 800:266 6 hours
 Research: 800:299 2 or 6 hours
 Thesis option (6 hrs.)
 Non-thesis option (2 hrs.)
 Electives from the following 12 hours
 Mathematics: Any of the courses listed above that
 were not used for the requirements there, or from
 among the following: 800:141, 800:149, 800:150,
 800:152, 800:154, 800:157, 800:158, 800:161,

810:061 3-4 hours
48-49 hours

For departmental approval to student teach, a student on the program must satisfy the university requirements to student teach and the following specific departmental requirements:

All grades in departmental courses to be applied to this program must be C- or higher unless the student's grade point average is 2.25 or higher in all the departmental courses to be applied to this program.

Total number of hours increases from 45-46 hours to 48-49 hours.

PHYSICS

- 820:209 New Course. Business Management for Science Professionals -- 3 hrs.
A course designed to provide science professionals with a strong foundation of critical business knowledge and skills, including strategic management, accounting, legal issues, personnel management, and communication styles and formats. Prerequisite: 820:289 [Professional Science Master's Seminar].
- 820:215 New Course. Corporate/Industrial Problem Solving -- 3 hrs.
Teams of PSM students work together to solve problems that typify real-world situations or to provide consultative services to companies. Prerequisites: 820:289 [PSM Seminar] and a minimum of 6 hours completed in a PSM degree program.
- 820:289 New Course. Professional Science Masters Seminar -- 1 hr.
A weekly seminar for professional Science Masters students which alternates student presentations with discussions between students and company representatives. Presentations are on select industries or corporations, one presentation every other seminar session. Alternate weeks are devoted to discussions with representatives of the selected companies. May be repeated for credit a maximum of 3 times (3 hours). Prerequisite: Admittance to the PSM graduate program.
- 820:295 New Course. Professional Science Master's Internship -- 4-6 hrs.
Supervised work experience for Professional Science master's students. Students will receive appropriate industrial/corporate training in their specific field of expertise. Prerequisites: Enrolled in PSM program and consent of appropriate department head.
- 880:144g New Course. Introduction to Nanoscience and Nanotechnology -- 3 hrs.
Introduction to nanoscale materials and processes; types of materials; chemical bonding and nanoscale interactions; nanoscale microscopy and spectroscopic methods of investigation. Prerequisites: 880:054 or 880:130, 880:056 or 880:131, 860:044, 880:048.
- 880:148g New Course. Intermediate Nanoscience and Nanotechnology -- 3 hrs.
A study of Nanoscale materials and processes, with emphasis on nanoscale microscopy and other experimental methods of investigation and control on the nanoscale. Prerequisites: 880:144, 880:054 or 880:130, 880:056 or 880:131, 860:044, 880:048.
- 880:155g New Course. Magnetism and Magnetic Materials -- 3 hrs.
Origins of magnetism; paramagnetism; diamagnetism; ferromagnetism; ferrimagnetism; magnetoresistance; application of magnetic materials; design and fabrication of magnetic

materials; finite-element modeling. Includes a laboratory.
Prerequisite: 880:137.

880:160g New Course. Experiment Design -- 3 hrs.
Design and statistical analysis of observational and factorial experiments employing numerical and graphical methods, with examples and case studies from industry and the natural sciences. Prerequisite: 800:121 or equivalent.

880:205 New Course. Modeling and Simulation of Physical Systems -- 3 hrs.
An introduction to current computational modeling methods and their uses in physical and other systems. Prerequisites: 880:150, or 800:176 and a course in computer programming, or the equivalent.

880:220 New Course. Computer Interfacing and Signal Processing -- 3 hrs.
An introduction to computer interfacing, instrument control, and data acquisition. Digital signal processing will be discussed, and industry-standard software platforms will be utilized in laboratory activities. Prerequisites: 880:132, 880:152.

272 880:040 Drop Course. Elementary Holography -- 1 hr.

272 880:120g Drop Course. Elementary Atomic and Nuclear Physics -- 4 hrs.

272 880:134g Drop Course. Environmental Applications of Physics -- 3 hrs.

Online 880:140g Change title. Title from (Modern Optics: Holography and Imaging) to "Holography, Imaging, and Optical Measurement."

273 880:142g Drop Course. Musical Acoustics -- 3 hrs.

PROFESSIONAL SCIENCE MASTER'S IN APPLIED PHYSICS (New Masters Program)

**Professional Science Master
Major in Applied Physics (30 hours)**

This degree prepares students for careers in applied physics or engineering businesses and industries. Emphasis is placed on blending core physics knowledge and applied skills with an understanding of business and an internship experience. Admission is restricted to students with a GPA of 3.00 or higher and a B.A. or B.S. in Physics or a related discipline. To be admitted, students must also have taken the following courses or their equivalents: Physics III (880:132) or equivalent; Modern Physics (880:137g); and Modern Physics Laboratory (880:138g) or a physics laboratory course at an equivalent level.

Required:

156 MASTER OF ARTS, MAJOR IN PHYSICS EDUCATION

--Drop Program.

119 Addition of statement regarding Combined B.A./P.S.

--Revise to read:

Combined B.A./P.S.M. or B.S./P.S.M. Applied Physics

The B.A./P.S.M. or B.S./PSM degree program is a five-year program leading to both the B.A./B.S. in physics or applied physics and the P.S.M. degree in applied physics. This degree program prepares students for careers in applied physics or engineering businesses and industries. Emphasis is placed on blending core physics knowledge and applied skills with an understanding of business and an internship experience. Students interested in this program may declare their intent by end of the junior year, provided they have completed 880:150 and have an overall grade point average (GPA) of 3.00 or above. An Application for Admission to Graduate Study should be completed and the student's interest in the Combined B.A./P.S.M. or B.S./P.S.M. Program in Applied Physics indicated on the application itself. Once admitted to the program, undergraduate students (who are classified as seniors) may register for graduate credit as a senior, with the approval of the department head (see guidelines on pages 61-62). The student presents a signed Student Request form (with appropriate signatures), when registering for graduate credit as a senior. The combined total of course credits, both undergraduate and graduate, may not exceed 15 hours in a

semester, or eight (8) hours in a summer session. Graduate work completed on the early admission basis will be counted as graduate credit only if the student actually earns the bachelor's degree at the end of the semester or summer session in which the course work is taken. Actual admission to graduate study and classification as a graduate student commences the semester after the student has completed the baccalaureate.

SCIENCE

121 ALL SCIENCE TEACHING (Extended Program) (restatement of major)

--Revise to read:

This major is intended for students who wish to teach at the secondary level in all areas of science (biology, chemistry, earth science, and physics). The program will lead to Iowa Department of Education endorsement in biology, chemistry, earth science, physics, physical sciences, and general science. The All Science Teaching major requires a minimum of 144 total hours to graduate. Because of the number of courses required for this major and course sequencing, it cannot be completed in eight semesters of normal work. It will require a longer time or additional work during summers.

Required:

Science and Science Education: 820:190; 820:193;
 820:196 8 hours
 Biology: 840:051; 840:052; 840:140; 840:193. . . . 15 hours
 Chemistry: 860:044; 860:048* 8 hours
 Earth Science: 870:031; 870:035 8 hours
 Physics: 880:054; 880:056 8 hours

Electives from the following:

Biology: 840:168; 840:169; 840:142 3-4 hours
 Chemistry: (any 100-level) 7-8 hours
 Earth Science: 870:010**; 870:021; 870:022 7-8 hours
 Physics (any 100-level) 7-8 hours
 73 hours

For completion of this major the grade point average in each of the four science disciplines must be a minimum of 2.00, with a 2.50 GPA in the major as a whole.

Elective courses must be ones that count toward the major in the discipline or be approved for this use by the department offering the course.

*Students with excellent preparation in chemistry may substitute 860:070 plus 3 hours of additional credit hours in chemistry electives for 860:044 and 860:048.

**870:010 must be taken for four semester hours of credit.

Notes:

1. Students with sufficient high school preparation may be allowed to omit some introductory courses and substitute other courses from the same department.
2. The mathematics prerequisite for one or more of the above courses is a working knowledge of algebra and trigonometry or 800:046.

Total number of hours remains the same.

175 SPECIALIST DEGREE
MAJOR IN SCIENCE EDUCATION

--Drop Program.

(This is the only major offered under the Specialist Degree. With the Major in Science Education being dropped, the Specialist Degree will no longer be offered.)

122 MIDDLE/JUNIOR HIGH SCHOOL SCIENCE TEACHING (restatement of major)

--Revise to read:

This major is intended for students who wish to teach science at the junior high or middle school level. This major, if taken in conjunction with the Middle School major in the College of Education, will lead to Iowa Department of Education endorsement in All Science I Grades 5-8. As a stand-alone major, it fulfills 7-12 General Science and Physical Science endorsements.

Required:

Educational Psychology: 200:116	2 hours
Elementary, Early Childhood, and Middle Level	
Education: 210:122	3 hours
Science and Science Education: 820:190; 820:196;	
two of the following three courses: 210:150g,	
820:193g, 840:193g	11 hours
Biology: 840:051; 840:052	8 hours
Chemistry: 860:044; 860:048*	8 hours
Earth Science: <u>870:010**</u> ; <u>870:021</u> ; 870:022;	
<u>870:031</u>	12 hours
Physics: 880:054; 880:056	8 hours
Electives in science:	
From biology, chemistry, physics and earth science	
which must include 6 hours at the 100-level or	
above	<u>7</u> hours
	59 hours

For completion of this major the grade point average in each of the four science disciplines must be a minimum of 2.00, with a 2.50 GPA in the major as a whole.

*Students with excellent preparation in chemistry may substitute 860:070 plus 3 hours of additional credit hours in chemistry electives for 860:044 and 860:048.

**870:010 must be taken for four semester hours of credit.

Notes:

1. Students with sufficient high school preparation may be allowed to omit some introductory courses and substitute other courses from the same department.
2. The mathematics prerequisite for one or more of the above

courses is a working knowledge of algebra and trigonometry
or 800:046.

Total number of hours remains the same.

DESIGN, FAMILY AND CONSUMER SCIENCES

- 31F:145g New Course. Violence in Intimate Relationships -- 3 hrs.
This course explores theoretical models of violence in intimate and family relationships and examines the impact of violence on secondary victims. Empirical and programmatic implications for prevention and intervention models are reviewed. Prerequisites: Junior standing.
- 31G:170g New Course. Long Term Care Administration -- 3 hrs.
The study of long term care administration including social services, dietary, legal aspects; nursing; environmental services, activities/community resources; business administration; administrative organization, and human resource management. Prerequisites: 6 hours gerontology core courses (Two of the following four courses: 31F:150; 400:173; 410:125; 980:125); junior standing.
- 205 31F:054 Change description (Decision Making in Family Systems).
Description: Exploration of situational, intrapersonal, and interpersonal dynamics of family interaction and decision-making. Development, maintenance, enrichment, and change in relationships.
- 205 31F:157g Change prerequisites (Family Life and Human Sexuality).
Prerequisites: 31F:057; [3 hours social science research methods]; junior standing.
- 205 31F:178 Drop "g". (Family Life Education).
- 207 31T:011 Add Prerequisites. Change description (Computer Textile and Apparel Design Foundations). Description: Introduction to computer aided design (CAD) software (U4ia, FB Designer (formerly KaratCAD), Adobe Photoshop, Adobe Illustrator, and Adobe Streamline) to investigate the elements and principles of design as applied to textiles and apparel. Prerequisite: 31T:012.
- 207 31T:014 Change title, description, and prerequisites. Title from (Apparel Evaluation) to "Apparel Design and Evaluation." Description: Apparel design, flat pattern, construction, tailoring, and couture skills introduced and developed to create and evaluate original apparel garments. Prerequisite: 31T:012; 31T:013.
- 207 31T:015 Change description (Multicultural Aspects of Apparel Design).
Description: Multicultural aesthetic and technical aspects of apparel design and assembly are explored to create sample books, and apparel garments and accessories.
- 206 31T:100 Change description and prerequisites (Computer Applications for the Textile and Apparel Industry). Description: Apparel industry-based software (U4ia, FB Designer (formerly KaratCAD), Adobe Photoshop, Adobe Illustrator, and Adobe Streamline

applied to the areas of textile and apparel design, and product development. Prerequisite: 31T:011.

- Online 31T:114g Change title. Title from (Socio-Psychological Aspects of Textiles and Apparel) to "Dress and Human Behavior."
- 207 31T:115g Change title and description. Title from (Apparel Buying and Merchandising) to "Apparel Product Development, Merchandising, and Buying." Description: Application of merchandising and buying concepts and procedures for planning, developing, sourcing, and presenting apparel product lines for identified target markets with regard to pricing, assorting, styling, and timing.
- Online 31T:122 Change title and description. Title from (Product Development and Planning) to "Apparel Product Development, Planning and Design." Description: Apparel products designed and created using a product development process, emphasizing the design process, line development, sourcing materials, costing, and garment production (couture and mass production). Advanced apparel production skills (draping and pattern grading) are further developed within apparel design projects.

82 INTERIOR DESIGN MAJOR (restatement of major)

--Revise to read:

Admission to the University of Northern Iowa with an intended Interior Design major does not guarantee placement in the major due to the limited number of spaces available in the studio facilities.

Students majoring in Interior Design must satisfy the admission requirements including GPA, portfolio review, interview and the completion of specified courses before they can officially declare the major. A copy of the Admission Policy may be obtained from the Department of Design, Family and Consumer Sciences office in Latham Hall. Prior to completion of the admission requirements, students may sign an intent to major in Interior Design and be classified as a prospective (pre)major.

If a major class is dropped after the first week of classes, a student will subsequently be allowed to register to retake that course only after all advanced registration is completed and if openings are still available. A major course may be repeated only once.

The Interior Design major requires a minimum of 124 hours to graduate.

156 MASTER OF ARTS, MAJOR IN PSYCHOLOGY (restatement of MA degree)

--Revise to read:

This major is available on the thesis option only and requires a minimum of 41-44 semester hours. A minimum of 15 semester hours of 200-level course work is required for the thesis option. GRE examinations are required for all applicants. Individual programs of study will be jointly developed by each student in consultation with the graduate coordinator.

The M.A. program in psychology consists of three emphases: clinical science, for those who wish to pursue doctoral-level study in clinical or counseling psychology or to become masters' level providers of psychological services operating in clinical settings under appropriate supervision; industrial-organizational emphasis, for students interested in pursuing either doctoral-level studies in industrial-organizational psychology or a career in human resources; and social, for students wishing to pursue doctoral study in social and related areas of psychology or careers as master's level data analysts. The program maintains a strong empirical, research-based orientation and seeks to: a) provide students with opportunities to develop skills in research methodology; b) gain advanced knowledge of major areas of scientific psychology; and c) obtain basic competence in skills relevant to these areas. All students are required to complete a thesis for successful completion of this program. It is expected that students will, except under extraordinary circumstances, have a thesis proposal approved by their advisor by the beginning of their second year of study. The program is set up so it should be completed in two full academic years and two summers. Students are strongly encouraged to finish within this time frame.

In addition to meeting general university admission requirements, applicants are also required to submit the following for consideration: a departmental application form; three letters of recommendation, preferably from undergraduate psychology instructors; and Graduate Record Examination (GRE) scores on the general aptitude tests (advanced psychology test scores required only for those applicants who were not undergraduate psychology majors). All materials should be received by the departmental graduate coordinator no later than February 1 to ensure consideration for financial aid for the following academic year or April 30, for consideration for admission to the program.

Required for all students:

Psychology: 400:239	3 hours
Readings: 400:285	2 hours

163 MAJOR IN WOMEN'S STUDIES (restatement of MA program)

--Revise to read:

Major in Women's and Gender Studies

The M.A. in Women's and Gender Studies is a thesis-only program requiring a minimum of 34 semester hours of study; 15 hours of 200-level course work, including 6 hours of xxx:299, is required. Additional non-program hours may be required, if courses on a student's program of study have prerequisites which instructors choose not to waive.

Successful completion of a final written comprehensive examination is required.

The Graduate Record Examination (General Test) is not required for admission to the program.

The Women's and Gender Studies curriculum is designed to meet the needs of students who strive for analytic clarity and rigor in gender-focused research. Students may employ the skills in reflective and critical analysis as well as the broad base of knowledge that they obtain in the program to 1) prepare for a Ph.D. program with a disciplinary or interdisciplinary focus on gender or, 2) enhance leadership skills for

a career in the public or private sector or, 3) satisfy strong intellectual interests and curiosity while pursuing advanced education in the liberal arts.

Through core courses and selected electives, students enrolled in the Master of Arts in Women's and Gender Studies will accomplish several objectives: examine theories concerning the social and historical constructions of gender; explore how gender defines relationships among women, among men, and between men and women; recognize that women's lives have been under-represented in traditional disciplines and investigate previously neglected materials in order to identify women's as well as men's roles in cultural or social endeavors; study, compare, and evaluate an array of disciplinary perspectives on gender, including, but not limited to, cross-cultural, economic, sociological, historical, and literary perspectives; identify intersections of gender with race, class, age, sexual identity, and ethnicity, both locally and globally, both in the present and in the past; and employ new methodological and critical approaches to materials customarily treated in other ways, revising the content and assumptions of particular disciplines to address gender more effectively. Admission to the program is competitive. Detailed information on admissions requirements and procedures may be obtained from the Director of the Graduate Program in Women's and Gender Studies.
