**Lee Miller,**  
alumni director

### Estate planning

A Florida telephone call was received last week from a motivated friend of the University seeking information on the proper way to establish a bequest for the benefit of UNI.

We had a good conversation in which it was pointed out that the procedure for designating UNI in a will is very simple, but it is very important the recipient's name be correctly listed. (In this case: The University of Northern Iowa Foundation.) We also talked about the donor's wishes and suggested a simple statement in the document that the Foundation's board of directors be charged with carrying out the dictates of the will for the greatest benefit to the University.

We discussed briefly whether the donor wished to make a specific bequest, or whether she wanted to name the Foundation to receive the remainder after other bequests were listed. She was also interested in learning more about the annuity program, and current gifts which could be a living recognition.

This naturally led to a promise of immediate correspondence and the sending of material regarding gifts of securities, insurance and other property, and how such gifts could be handled tax-wise to produce greatest benefits.

The incident is mentioned here because it is

probable that others would also like to learn more about estate planning, and to let you know that a member of our staff, William V. Anthony, has made an extensive study of estate planning and tax implications. He has assisted in numerous bequests to UNI and he will be happy to work with you at any time.

### UNI-Dome progress

You will read in another article in this issue about the recent progress of our centennial fund drive. Obviously the support we have received from industrialist Roy Carver means a great deal to UNI, but remember it is a loan and we still must raise the \$750,000.

If you haven't given, please do so to the best of your ability so that we can meet our obligation and get organized and started on phase two and three.

THE ALUMNUS is issued four times a year in February, May, September and December by the University of Northern Iowa, 1222 W. 27th St., Cedar Falls, Iowa 50613. Second class postage paid at Cedar Falls, Iowa 50613.

# UNI-Dome construction to begin

The UNI-Dome will begin to rise on the UNI campus this summer.

Construction has been made possible through a \$750,000 extension of credit by Muscatine industrialist Roy J. Carver which has, in effect, put the \$1.5 million fund raising campaign over the top.

Although not a gift, the three-quarters of a million dollars Carver is making available provides funds to start construction, avoiding rapidly rising building costs. The arrangement was announced by centennial fund drive chairman T. Wayne Davis March 12.

It is now hoped construction will begin late this summer after final architectural plans are approved. With favorable weather and no problems, the UNI-Dome is expected to be

## Summer mini-semester set

In addition to traditional eight-week courses, UNI will offer two four-week mini-semester in the 1974 summer session.

The four-week sessions will make available courses which are more readily adaptable to concentrated work. Some of the classes may be taken concurrently with the eight week session.

Dr. James G. Martin, vice president for academic affairs, said this is the first summer that a two-term session has been formalized on campus. A few courses of varying lengths have been offered previously.

The principle of the four-week term is the same expressed in a Carnegie Institute report on education entitled "Less Time and More Options," Martin said.

"The report stated that one purpose of higher education is to diversify and to give more options to the student," Martin said, "and the four-week sessions will hopefully do both these things besides allowing the student to complete his courses much quicker."

The summer session begins June 6 and runs through August 2. The four-week terms run June 6 to July 3 and July 8 to Aug. 2. Registration is June 5.

ready for use by the fall semester of 1975.

"The University is proud of all those involved in the fund raising who have made it possible for us to now look ahead to actual construction of the UNI-Dome," according to UNI President John Kamerick. "The structure will be a tremendous addition to the campus and an important influence on the development of the local community and all of Iowa."

The UNI Foundation, which launched the fund raising project in 1972, intends to present the UNI-Dome to the University in time for its 100th anniversary celebration. UNI will be 100 years old in 1976.

Officials stress, however, that the \$750,000 credit does not mean fund-raising for the UNI-Dome will cease. Pledges will still be needed to repay the Carver loan and to continue phase two and three, a fine arts auditorium and other academic resources for the University.

The full campaign goal is \$10-million over a 10-year period.

At the time of the announcement, the Foundation was roughly 82 percent finished with the UNI-Dome drive. Student fees available for bonding and pledges already totaled nearly \$3.7 million.

Although internal features will depend on the bids received for construction, the dome will be 440 feet in diameter, or large enough to enclose a football field. It will originally seat 11,000 spectators with the capacity for seating up to 20,000 people.

The site planned for the UNI-Dome is 100-200 feet south of the Physical Education Complex along Hudson Road.

The UNI-Dome will be constructed with a unique roof of teflon-coated fiberglass over a steel cable frame. Inside air pressure will arch the flexible roof slightly outward.

It will be available for athletic events, including football, physical recreation, concerts, shows, community and state attractions and many other uses.

SUCCESS TEAM — Instrumental in the fund raising for the UNI-Dome have been centennial committee members (left to right, starting at upper left): national chairman T. Wayne Davis, Marv Klepfer, Stan Sheriff, Dr. Daryl Pendergraft, Lee Miller, Wayne Schutte, Bob Keller, Walter Brown, Frank Standish, and past Student Association presidents Jim Stewart and Jim Maas.

# The graduate guide

## a survey of graduate opportunities at UNI

This year has witnessed a sharp rise in the number of graduate students at UNI, affirming the belief many hold that the future of the University will involve an expanding graduate program. To keep alumni informed of graduate study opportunities, the Graduate Guide is featured.

### COURSES OF STUDY

Four types of degrees are awarded: Master of Arts, Master of Arts in Education, Specialist and Specialist in Education.

Generally, it takes 30 semester hours of credit, or one year of full-time study including the summer, to earn a Master's degree.

Thirty additional hours are required for a Specialist degree, which is designed for those who want further training in a field without the research emphasis of a Ph.D.

### GRADES

There is no minimum undergraduate grade point average necessary, however a low average might result in being admitted on "probation," which is cleared upon earning eight credits of B or better graduate work.

In all graduate work attempted, a 3.0 grade point average is required.

### TUITION

Full time graduate attendance

during the regular school year is \$315 per semester for state residents and \$640 for non-residents at the present. The cost of attending the eight week summer program is \$185 for residents and \$340 for non-residents.

### ASSISTANTSHIPS

Graduate assistantships are usually awarded for \$1,800 for the school year, although they may range as high as \$2,700. Students working toward their Specialist degrees may receive from \$2,200 to \$2,700.

Teaching assistantships are also available to those who already hold M.A. degrees and are working

for their Specialist. Amounts vary up to \$3,500.

Because of the large number of applicants seeking assistantships, potential graduate students should apply early in the year in which they plan to begin study.

### TRANSFERRING CREDITS

Up to 10 credits of graduate work at another accredited college or

university may be transferred to UNI.

### CANDIDACY

Admission to graduate study by the University does not automatically mean a student will later be approved as a candidate for a degree. After beginning graduate work, a candidacy exam is usually offered by the department in which the degree is being sought. This tests knowledge in a subject

HAPPY DAYS — A  
lab school scene  
from the 1950's.

## Lab school celebration

A 90th birthday party at the Malcolm Price laboratory school will be held Friday, May 17. Festivities get underway in the afternoon with an open house at the school, with guided tours through its facilities.

Alumni are invited to attend the festivities, particularly those alumni who completed their student teaching in the laboratory school. Many graduates of the lab school are also likely to attend.

Student and faculty-created displays will be seen throughout the school, illustrating its past, present and future. Included will be depictions of school athletics since 1916, as well as audio-visual equipment, teaching devices and other materials from the past.

Photographs of nursery schools during the early years of the lab school and at present will be on display. Displays of past, present and future schoolroom settings will include clothing, food, games, newspapers and products.

In the classroom during the afternoon, mathematics will be taught as it was in the early days of the lab school. Language classes will discuss the history of the school in French.

A program in the Malcolm Price laboratory school fieldhouse at 3 p.m. will present a short history of the first 90 years with a look at the future of the school. The high school orchestra will perform and Dr. Malcolm Price, former president of UNI from 1940-1950, will cut the birthday cake.

Centerpieces in the fieldhouse will be models of past and present buildings in which the lab school has been housed.

By Margaret Mastalerz

# 90 years of lab school history

*A place to “learn by doing”*

**T**he University of Northern Iowa's laboratory school, which first opened its doors in September, 1883, with no pupils and no teacher, is celebrating its 90th birthday during this school year, secure in the knowledge that it has become an innovative and integral part of UNI and the state.

The first model school was housed in newly-built Gilchrist Hall in 1883 on the UNI, then called Iowa State Normal School, campus. Allotted for the model school was “a large and beautiful room.” It was the intention of the administration to open the school in the fall of 1883.

The Normal School at this time was a small group of buildings on a hilltop, surrounded by fields and meadows, with few families nearby. A salary of \$750 per year for the model school teacher did not seem to attract anyone. Principal Gilchrist wanted to hire for the position.

The situation was remedied by the board of directors of the Rural Independent School District No. 5 of Cedar Falls Township, whose one-room building stood across from the southeast corner of the Normal School. In October of 1883, they offered to transfer their pupils and

some funds to the model school so that a teacher could be secured, and for the first time pupils filled the model school room. During the first year there were 52 pupils enrolled.

Teacher tenure at the early model school was brief and teachers were not considered part of the Normal School faculty. Lillian Bartlett, the third teacher in as many years, resigned before the end of the 1885-86 school year saying the “large and beautiful room” was completely inadequate and unequipped.

Students returned to the District No. 5 schoolhouse and from 1886 until 1892 there was no model school. In 1892, the Normal School opened a training school and students from the same area they come from today returned to the campus school. Enrollment grew. By 1894, 110 students were enrolled in the training school. By 1928, there were 395 students.

In 1892, teachers in the training school were considered members of the faculty of the Normal School for the first time. The number grew from one in 1892 to 41 in 1928.

In 1896, Wilbur H. Bender was named supervisor of the grammar

Lab school classroom, about 1930.

grades in the training school. In 1909, he was made head of the new department of teaching when the Normal School's name was changed to the Iowa State Teachers College. Under his leadership, the training school was expanded to include a standard four-year secondary school. It was largely due to him that the college finally granted credit for student teaching.

The training school was housed at various times in Gilchrist and Central Halls, and in the basement of the Auditorium building until 1912, when a training school building was erected on campus. It is now called Sabin Hall.

Dr. Eva May Luse became head of the department of teaching in 1918, followed by acting head Dr. M. J. Nelson from 1940-41. During this time the training school facilities proved inadequate for all the necessities of school life. Physical training classes, the nursery school and the library were in different buildings. By the close of World War II, many of the secondary school classrooms were housed in temporary buildings.

In 1944, while Dr. Guy Wagner was head of the department of teaching, the name of the building housing most of the school's facilities was changed from training school to "campus school," and in 1949 the name "campus laboratory school" was used. In 1957 the Malcolm Price laboratory school was completed, named for the man who was a leader in establishing this laboratory school on campus.

In 1945, Dr. Dwight Curtis became the head of the department of teaching. Dr. Wagner returned as acting head in 1960 until 1962 when the present head of the department, Dr. Ross Nielsen, was appointed.

The different names the lab school has had during its 90-year history reflect the philosophy of the administration and faculty. The early model school was very formal in its teaching methods. The prospective teacher was expected to learn the "art of teaching" through observation of an "expert teacher" and through practicing theories learned in class.

In the training school, teachers were trained by "critic teachers." Stress was laid upon the preparation of daily written lesson plans, in which parallel columns set down "the teacher's aim," "the pupil's aim," and all

the details of procedure to these ends, and to which the strictest adherence in the classroom was required.

The term laboratory involves the concept of an experimental approach to the solution of a problem, and its slogan is "learn by doing." It is an experimental school in spirit and practice. The validity and feasibility of educational procedures are selected in terms of their value to the pupil and student teachers are tested in actual classroom situations.

Today at the Malcolm Price laboratory school there are 712 students. The one-room schoolhouse has been replaced by a three-unit, multi-million dollar structure housing a nursery, elementary and secondary classrooms, and recreational and physical recreation facilities on 21.5 acres of land.

The faculty is carefully selected so the functions of the school can be fulfilled at a high level. About one-third have doctorates and another third have at least one year of graduate study beyond the Master's degree.

There are specific features and characteristics of the Malcolm Price laboratory school enabling its staff to experiment and research teaching methods. Pupil instruction is divided into elementary and secondary divisions, but the entire school is organized by subject-area departments. This enables a broad range of faculty experience, knowledge and specialization to be brought together so problems such as curriculum sequence, subject matter structure and grade-to-grade program articulation can be dealt with.

The laboratory school tries to maintain a representative body of students in its school from the Cedar Falls-Waterloo area. The school has access to the resource materials of UNI to assist in such areas as research design and program development. The school receives a broad base of support from all departments of the University.

During the school's 90-year history, many changes and improvements have been made. The one-room school of 1883 is gone, but the spirit of Principal Gilchrist's words in 1879 have taken a greater meaning: "We are conscious of the great advantages that would arise from a good model school which would be a school of observation and detailed processes would be exemplified."

J. W. Maucker

Stanley Redeker

## Honor Maucker, Redeker

The UNI Union has been renamed in honor of former President J. W. Maucker, who guided the University from 1950-70.

The name was approved by the State Board of Regents meeting on campus in March. At the same time, the dining center of the Regents residence hall complex was named in honor of Boone businessman Stanley F. Redeker, who served on the board from 1961-73, including eight years as president.

The J. W. Maucker University Union was completed in 1969 in the closing years of Maucker's term. It was one of the many buildings erected on campus during his tenure, when the name of the University shifted from Iowa State Teachers College to State College of Iowa and to its present name, the University of Northern Iowa.

In a letter to the Regents, current UNI President John Kamerick said the imprint left by Maucker is evident throughout the campus and, "It is perhaps characteristic of him that the most innovative building on the campus is more closely linked with his name than any other."

The Union is built almost entirely underground in the center of the campus with a plaza on the surface. It has been studied by architects and described in professional journals.

In reply to Kamerick, Maucker said, "I remember clearly the sense of awe, exhilaration and excitement which ran through the whole campus — and which I personally experienced in a very tangible way — when we first opened that building."

Maucker is now vice president for academic affairs at Kansas State Teachers College in Emporia, Kan.

In proposing that the dining center be named after Redeker, it was noted that during his long service with the Regents he was instrumental in initiating and enacting policies which have had a deep effect on UNI. Redeker was a member of the board when the Regents residence hall complex was completed in stages between 1961-67, and was board president from 1965-73.

The complex consists of four large residence halls clustered around the dining facility.

In a letter to Kamerick, Redeker said ". . . it is great to be remembered after all the battles are over."

# Milo Reno and the Farmers Holiday Association

An excerpt from  
"A History of Iowa" by  
UNI emeritus professor  
Dr. Leland Sage

Used by permission from "A History of Iowa" by Leland Sage,  
copyright 1974 by the Iowa State University Press, Ames, Ia.

*Those who can remember the Depression attest that it was hard on Iowans. It was particularly felt on the farms, where hardship struck even before it was felt in the nation's cities. By 1932 the situation was bleak, setting off a chain of events which prompted farmers to take action.*

With corn at 13 cents per bushel, pork at 3 cents per pound, and beef at 5 cents per pound, no one should be surprised that producing farmers had been driven to the breaking point and were ready to take things into their own hands. Direct action may not be a complete remedy for troubles but it serves as an outlet for pent-up feelings and acts as a release for frustrations which have been building up for years. Under the prevailing economic conditions all that was needed was a leader to act as the spokesman and organizer of the masses who were demanding action.

It was not necessary to go far in searching for such a leader. Since 1921, as president of the Iowa Farmers Union, Milo Reno had been in training for just such a moment as this. Born in southern Iowa and reared in a Populist environment, his mind had fed on a diet of Populist literature and William Jennings Bryan's oratory, with a seasoning of Campbellite theology which qualified him for status as a local preacher. Over the years he had developed the ideas, the vocabulary, the wit to supplement the native genius needed for "hell-raising" among the distressed farmers of Iowa, Nebraska, Minnesota and the Dakotas; whatever he lacked could be readily supplied by the staff writers in the *Iowa Union Farmer*, most of whom possessed great skill in the use of Populist rhetoric. From such a background it was a natural move for Reno to step into the presidency and field leadership of the National Farmers Holiday Association.

As far back as 1927, Milo Reno had announced his thinking to his colleagues on the Corn Belt Committee: "If we cannot obtain justice by legislation, the time will have arrived when no other course remains than organized refusal to deliver the products of the farm at less than production costs." This was, of course, too drastic for 1927. But in 1931, two years after the Wall Street collapse, John Bosch, a county Farmers Union president in Minnesota, advocated a farm strike in a speech at the annual convention of the Iowa Farmers Union; later, Reno and Bosch joined in asking the National Farmers

## ABOUT THE AUTHOR:

Dr. Leland Sage, emeritus professor of history, is the author of **A History of Iowa**, published by Iowa State University Press. An acknowledged scholar on Iowa history, Dr. Sage has written numerous articles on Iowa and its people. He is also the biographer of William Boyd Allison, prominent Iowa Congressman and Senator from 1863-1908.

Dr. Sage earned the State Historical Society Award for the "best article of 1973"

for an article on Joliet and Marquette which appeared in the May-June issue of **The Palimpsest**.

Born in Arkansas in 1899, Dr. Sage earned his A.B. degree from Vanderbilt University in 1922. Upon receiving his doctorate from the University of Illinois in 1932, he joined the UNI faculty and remained in the history department for 35 years until retiring in 1967.

Farmers surround the county jail in Council Bluffs on Aug. 26, 1932, after 34 picketers were arrested by authorities attempting to break up the farm strike. Later the arrested strikers were released on bond after being charged with unlawful assembly.

Courtesy of the Des Moines Register.

Union convention to resolve to begin a strike on January 1, 1932.

This date did not prove to be feasible but the idea remained alive. The straw that broke the camel's back of opposition to the farm strike technique was the disillusionment of the Iowa Farmers Union delegation which visited Washington and suffered an exposure to the callous disregard, as they deemed it, of the farmers' welfare. As soon as the delegates returned to Iowa, Reno and his fellow workers began to drum up more sentiment for a farm strike, preaching the word that all other methods of getting higher prices had failed. The organizational meeting for a Farmers Holiday Association was held on the State Fair grounds in Des Moines on May 3, 1932. Milo Reno was the almost unanimous choice for president; John Bosch, his Minnesota counterpart, was chosen as vice-president. A few simple resolutions sufficed for a "platform" or program of action—and the Farmers Holiday Association was in business. The key decision summing up all their planning, and their emotions as well, was one which set July 4 as the beginning date for a withholding action, to run for thirty days or until "cost of production" was achieved.

Definition of "cost of production" was never made clear, or exactly what methods were to be used to force somebody to grant it to them. It was one of those delightfully vague expressions that made it easy for an orator of the Milo Reno type to appeal to an audience of discontented farmers. If the term meant anything at all, it meant a price which would cover the "rent" of the land, the cost of seed, fertilizer and labor, and an allowance for a reasonable profit.

. . . (But) nothing was done after May 3 to get the strike program under way on July 4, the date set in the organizing resolutions. There had been much talk about "cost of production" as the farmers' goal but it seems nearer the truth to say that the rank and file members of the association wanted two things, for which no abstract formula was needed: an immediate increase in prices up to a point which would give them a decent living, and a chance to vent their feelings of hatred of the politicians and their agents whom they blamed for their troubles.

Direct action in an effort to boycott the markets was begun at Sioux City on August 11. The rather simple and vague plans of Milo Reno for an orderly, peaceful withholding of farm products were not realized; instead came almost instant violence, marked by picketing of the highways, dumping of milk trucks, and bodily harm to

those who would not follow the association members' "advice" to join in the strike. The Sioux City blockade, as well as dumping operations in scattered places, such as Council Bluffs, Des Moines and the Benson Creamery near Cedar Falls, was designed to prevent delivery of milk and cream to the processors. Hog marketing was another intended victim of the pickets. Although much milk was dumped on the highways and into ditches and although many bruises were sustained, few real gains were made by the strikers.

As John L. Shover, the foremost student of the Holiday Movement, concludes, the strike failed because of a lack of discipline among the striking forces on the picket lines and inadequate economic preparations for a prolonged strike. As to the former point, the authorities in the cities and the governors of the states were firm though not brutal in breaking up the nonpeaceful picketing. Wholesale arrests and jail sentences did much to cool the ardor of the pickets, most of whom were hard-working, law-abiding citizens, temporarily driven to desperate actions. Vast reserves of strike funds would have been necessary to make the holiday successful, and these were not available. Most of the farmers were compelled by hard necessity to market their produce when it was ready, regardless of the price—they needed whatever hard cash it would bring, and furthermore, meat and dairy products must be marketed when a certain point has been reached in their preparation for the market.

The calling of a Governors' Conference for September 9 to consider the problem gave Reno a way out, and on September 1 he called off the strike.

*Only four governors attended the Sioux City meeting but several others sent substitutes or observers; only Governor Charles W. Bryan of Nebraska refused to budge an inch in dealing with the strikers and their leaders. Although the conference settled nothing, it sent resolutions to the two presidential candidates that year, Herbert Hoover and Franklin D. Roosevelt.*

*It was not the last word from the Farmers Holiday Association, however. On March 13, 1933, over 3,000 members staged an orderly march on the state capital. A spokesman visited the General Assembly and presented a series of resolutions and demands, but unfortunately the Assembly had little power to deal effectively with what were national issues. It did, however, serve as a sounding board for the farmers' complaints.*

*On March 5, 1936, Milo Reno died.*

# PROFILE

Leon "Andy" Anderson with his traffic watch helicopter.

## Travelers' friend is UNI grad

**A**lumni driving in the Des Moines area may receive a helping hand from another UNI grad, Leon "Andy" Anderson.

A 1968 graduate, Anderson pilots a helicopter over the city and reports on traffic conditions, giving motorists tips on tieups which may save them time and — as a result — gasoline. The unique public service is an offshoot of another unique chore for the helicopter, insurance adjusting.

Andy's been flying the traffic watch mornings between 7-8 a.m. for WHO radio since October, 1973. During the rest of the day, he pilots insurance adjusters for AID Insurance Service headquartered in Des Moines, a job he has held since September.

"We know of no other insurance company in the nation which uses a helicopter for claims adjusting," according to George Moore, head of public relations for the company. "And by covering traffic conditions, we are providing a public service. By giving immediate reports of accidents or traffic tieups, other drivers can avoid an area, using another route and at the same time saving gas by not sitting somewhere behind a stalled lane of cars with their motors running."

Moore said the helicopter itself uses no more gas than a medium or heavy luxury car.

"Sometimes during the day I'll be flying back from an assignment for the company and I'll spot some trouble below and call it into the radio station," Anderson said. The aircraft is equipped with radio equipment to cut in on the station at anytime for emergency situations.

Andy draws upon nearly 1,000 hours of flying time as a helicopter pilot in the Iowa National Guard. When he's not hovering over the city, he shuttles claims adjusters to the site of accidents to provide on-the-spot assistance for AID customers.

"The helo is generally used for big claims, such as a large fire some distance from Des Moines," he added. "An adjuster who has worked on such claims before is sent along to immediately survey the damage."

The helicopter, an Estrom F-28A, has room for two passengers in addition to the pilot. Anderson is also getting first-hand experience as part of his training to become a claims adjuster for the company.

After earning his degree in business education at UNI, Andy taught at the Training School at Eldora until he was hired by AID last year.

His wife, the former Jane Kosanke of Iowa Falls, also attended UNI between 1965-67.

# Memorial honors Bohnsack

A memorial has been started by the widow of Lou Bohnsack, former UNI football star who died of a heart attack Jan. 27.

Mrs. Eleanor Bohnsack has asked that the fund be used to help finance the UNI-Dome because of her husband's long interest in UNI athletics, according to Lee Miller, director of alumni affairs.

A two-time All-North Central Conference center in 1951 and 1952, Bohnsack was named to the first team Little All-America football squad in 1952 by the Associated Press. He graduated from UNI in 1953.

A native of Manning, he was an all-state football and baseball player in high school. His son, James, is a student at UNI. They also have a daughter.

At the time of his death, he was assistant superintendent of the Estherville school district. He was 42.

Mrs. Bohnsack is the former Eleanor Paton, Elem. '51.

Lou Bohnsack  
B.A. '53

**From the  
same mold?**

Your children can look to the same fine education you received at UNI. Will they follow in your footsteps?

# Justis joins alumni office staff

Bob Justis, B.A. '74

There's a new face in the alumni office, that of Robert Justis.

Justis will be working as an assistant to Lee Miller, director of alumni affairs, aiding in the UNI Foundation's centennial campaign and other projects. He graduated from UNI in January 1974 with a speech major and business minor.

Born in Baltimore, Md., his family moved to Cedar Falls, where Bob began studying at UNI in 1965. He left to serve in the army from 1969-71, returning to the campus in the spring of 1972 to complete his degree.

With his wife Anne, he lives at 1122 Elmridge Dr., Cedar Falls.

# KUNI is on the air at last

After an unexpected delay due to equipment failure, stereo KUNI, UNI's public radio station, signed on the air on March 5.

Located at 90.9 mhz on the FM dial, KUNI replaces UNI's former FM radio station, KHKE, whose programming of light concert music and public affairs has moved to KUNI. KHKE, after going off the air, signed on again April 1 as a concert music and fine arts station serving the Waterloo-Cedar Falls area.

The new stereo station, KUNI, broadcasts throughout eastern Iowa

at 82,000 watts, making the coverage area four times greater than it was with KHKE.

KUNI originally was to go on the air last November with an antenna on the 2,000 foot KCRG tower near Rowley, but was delayed when the tower collapsed Oct. 3. Officials then planned to go on the air Feb. 28, but were delayed by the equipment failure.

The station is broadcasting from a temporary location on the channel 32 tower just south of Waterloo until the KCRG tower is rebuilt.

# Deaths

of former faculty  
and staff members

## ELMER RITTER

Dr. Elmer L. Ritter, 90, emeritus professor of education and former director of the extension service at UNI, died Jan. 17 in Sun City, Ariz., following a long illness.

Born in Walton, Ind., in 1883, Dr. Ritter received his B.A. from Indiana

Elmer  
Ritter  
(1962)

University in 1914 and M.A. and Ph.D. from the University of Iowa in 1917 and 1920.

He joined the UNI faculty in September, 1921, as professor of elementary education with primary responsibility for off-campus work in rural and town schools. He was involved for many years in the administration of UNI branch summer schools throughout the state.

In 1948, Dr. Ritter was named director of extension service. Following his retirement in 1954, he spent several years as a part-time extension

consultant until he assumed emeritus status in June, 1966. He moved from Cedar Falls to Sun City in 1970.

He is survived by his wife Lillian and one brother.

## THELMA SHORT

Thelma Short, former assistant professor of physical education for women, died of cancer Jan. 11 in Waterloo.

Miss Short, 78, taught at UNI from 1929 to 1960, when she retired. Prior to that, she was director of physical education at Chadron State Teachers College in Chadron, Neb. (1928-29); a high school in Topeka, Kan. (1923-25); and a teacher of recreational classes at a YWCA in Detroit, Mich. (1921-23).

In 1916, she received a three year certificate from Emporia State Teachers College in Emporia, Kan. She received a B.A. in 1921 and a M.S. in 1929 from Columbia University in New York.

Miss Short is survived by a nephew, Richard Short, of Malibu, Calif.; nieces Mrs. Manuel Gonzalez, of Malibu, and Mrs. Sally White, of Santa Cruz, Calif.; and a sister-in-law, Mrs. Mac Short, of Malibu.

## RICHARD RACKSTRAW

Richard Rackstraw, an assistant professor of English, died Jan. 7 at his home in Cedar Falls.

Mr. Rackstraw, 37, joined the UNI faculty in 1966 after four years at Northern Illinois University in DeKalb. Born in Bay City, Mich., he received his B.A. at Hillsdale College in Michigan in 1958 and his M.A. at Miami University in Ohio in 1962.

His wife, Lora, is an assistant professor of English at UNI.

## MARGARET BARNES

Margaret C. Barnes, a counselor-advisor in Campbell Hall from 1961-63, died Dec. 16, 1973. She earned a two-year degree in home economics in 1916 and her B.A. in 1933 from UNI.

She also held positions as a counselor in Waterloo and Oak Ridge, Tenn., and was a Girl Reserve secretary for YWCAs in Baltimore, Md., Rochester, Minn., Mason City and Cedar Rapids.

She is survived by a brother and three sisters: Helen Barnes, J.C. '23, 2315 Rochester Ave., #210, Iowa

City; Mrs. Marion Barnes Bier, J.C. '27, of Bella Vista, Ark.; and Nelle Barnes, J.C. '23, 581 Meeting St., Charleston, S.C.

## WALTER PETERSEN

Walter Petersen, custodian in the Old Central Building until his retirement in 1957, died Jan. 25 in Cedar Falls. He is also the father of Ruth Petersen, supervisor of the mimeograph office at UNI.

Mr. Petersen was born in 1887 in Denmark, emigrating to the U.S. in 1907 and beginning work at UNI in 1943.

## LORRAINE NOLTE

Mrs. Lorraine Nolte, a housekeeper at Rider Hall, died Feb. 5, following a long illness. Since December 1971, Mrs. Nolte had been on disability leave from her post. She began working at UNI in 1966.

## HANS HJULSAGER

Hans Hjulsager, former physical plant employee, died Feb. 21 in Cedar Falls. He retired from the grounds division in 1968.

## KNUTE MATLAND

Knute Matland, a University employee for 15 years, died Dec. 25, 1973, at his home in Wendell, Ida.

Mr. Matland joined the UNI staff in 1953 and served as building services foreman in the physical plant until he retired in 1968.

## BERNARD ELIASON

Bernard F. Eliason, a painter at UNI from 1946 until his retirement in 1971, died Feb. 20 at Osceola, Wis., of a heart attack.

## ESTHER LAMBERTSON

Mrs. Esther E. Lambertson died at the age of 80 on Jan. 24 in Modesto, Calif. She was the wife of Dr. Floyd W. Lambertson, professor of speech from 1930 until he died in 1945.

She is survived by four children, Keith Lambertson, B.A. '41, 1621 Irene Ave., Modesto, Calif.; Mrs. Ruth Lambertson Sanderson, B.A. '41, 431 Euclid St., Ft. Morgan, Colo.; Mrs. Dorothy Leon, who attended UNI 1945-47, Box 405, Milton-Freewater, Ore.; and Robert Lambertson, who attended UNI 1947-49, 101 Herman Ave., Watsonville, Calif.

## We hear from alumni . . .

The following UNI graduates were awarded degrees at Iowa State University on Nov. 17, 1973: William E. Kienzle, B.A. '65, Ph.D. in physics; Eugene A. Kline, M.A. '69, Ph.D. in chemistry; and Louise Jeffords Whelchel, B.A. '56, M.S. in education - guidance and counseling.

The following UNI graduates were awarded degrees from Iowa State University on Feb. 23: MacBurnie Allinson, M.A. '62, Ph.D. in education; Glenn E. Primmer, Jr., B.A. '49, Ph.D. in educational administration; and Melvin L. Stanard, B.A. '65, M.S. in statistics.

Bruce K. Spates, B.A. '72, of 2425 Greenwood Ave., Cedar Falls,

received his M.A. in business administration from the University of Iowa in December 1973.

Riverside Dr., McHenry, Ill., and Robert C. Bird, B.A. '53, M.A. '73, Box 217, Garwin.

# HOMECOMING

Have you ever thought of attending UNI's Homecoming celebration? It's a special time for alumni, and this year we'd like to turn Homecoming into a truly special occasion. Please complete the following survey so we can plan the type of events which interest you most. Then tear off the entire page, fold so the postage-paid side is outward, seal and mail.

If you haven't attended Homecoming in the past, maybe this is the year we'll convince you it's something worthwhile to consider. By the way, the date this year will be Saturday, Oct. 12, when the Panther football team will face state rival Drake. More information about specific plans and a chance to make reservations will be in the September *Alumnus*.

Yes No

- ..... Have you ever attended Homecoming?
- ..... Would you attend if the right events were included?

If the answer to both questions is no, why not, if for some other reason than distance from the campus?

.....

.....

At a Homecoming celebration, would you enjoy:

- ..... a Homecoming parade?
- ..... a football game with a special section for alumni?
- ..... an alumni luncheon before the game?
- ..... tours of the campus and Cedar Falls?
- ..... an open house with faculty from your former department?
- ..... an open house with your former fraternity or sorority?
- ..... a social hour and dinner after the game?
- ..... a semi-formal dance in the evening?
- ..... a rock dance in the evening?
- ..... an evening orchestra concert?
- ..... a student play in the evening?
- ..... a guest speaker from the UNI faculty in the evening?
- ..... would you like to spend the night in a dormitory area reserved for alumni, with a morning breakfast?
- ..... would you be interested in forming car pools with other alumni?
