Two Decades of Advances in Electronic Theses and Dissertations

Daniel Gelaw Alemneh University of North Texas Libraries

Digital Curation Unit

Outline

Background

- Landscape of Academic Libraries and Scholarly communications
- Emerging Trends

About ETDs

- ETD Stakeholders
- Tools and Projects

• ETDs at Academic Institutions

• UNT's Experiences

Background

Background

- The Open Access movement is transforming scholarly communication
 - Open Access (provision of unrestricted online access to results/outputs of research & development)

Numerous emerging trends fundamentally change the directions of scholarship:

- The development and availability of interoperable Open Access content
- Global and explosive growth of social networking,
- Big data and inter-institutional data sharing,
- Cross discipline collaborations, etc.

Emerging Trends

• Expressions of scholarship are increasingly becoming more diverse

- Rate of creation of new data and data sets
- Storage format evolution and obsolescence

Maintaining accessibility to data through links and search results

- Different community inclined to share items at different level of normalization
- Comparability of semantic and ontological definitions of data sets

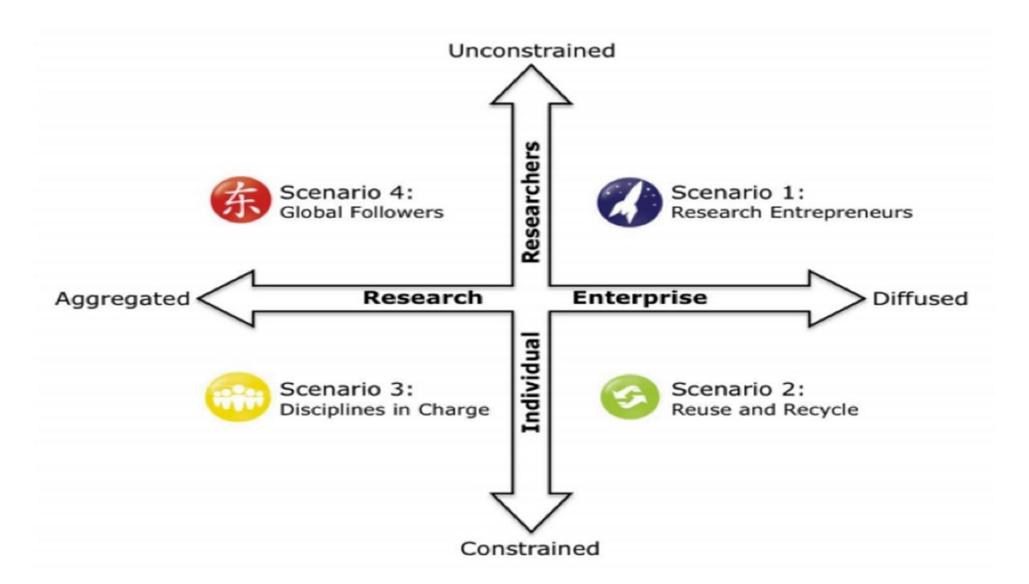

• Access from anywhere, anytime, via whatever (mobile) devices

- Embracing true user-centric in any context
- Giving users what they need with freedom and flexibility

• Altmetrics for measuring impact in this diverse scholarly ecosystem

- Traditional metrics vs. usage metrics vs. divorcing a metric from the scholarly work
- Rethinking vs. revolutionizing the analysis of the value and impact of scholarly work

Emerging Roles of Academic Libraries

Source: (Pinfield et al., 2014: http://eprints.whiterose.ac.uk/76839/15/wrro_76839.pdf)

Emerging Roles of Academic Libraries

• Scenario 1: Research Entrepreneurs

• "individual researchers are the stars of the story". Academic institutions and disciplinary silos are no longer relevant for entrepreneurial researchers who chase short-to-long term contract work from private and public sources.

• Scenario 2: Reuse and Recycle

• Outlines a world defined by an "ongoing scarcity of economic resources" which forces the reuse and recycling of research activities, with virtually no public support for research.

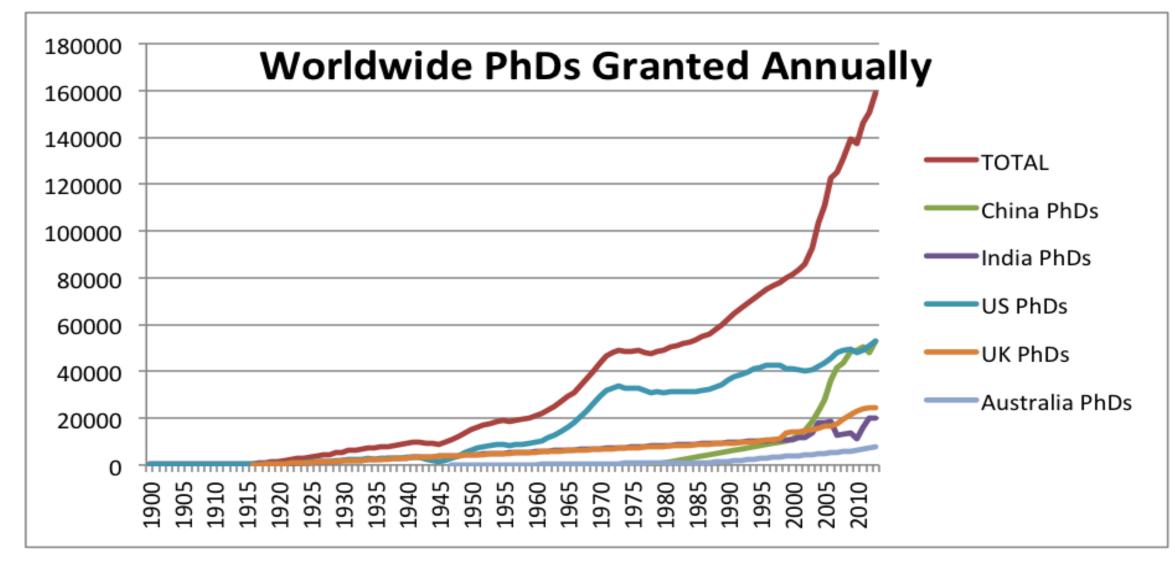

• Scenario 3: Disciplines in Charge

 Utilizing advances in information technology "computational approaches to data analysis dominates the research enterprise", fostering massive research projects aligned around "datastores".

• Scenario 4: Global Followers

• As funding agencies become more international, scholars continue to do their research but with new cultural influences from Middle Eastern and Asian funding agencies.

Science Still Increasing Exponentially

ETD

- ETD is simply an **electronic** version **thesis** or **dissertation**
 - Open Access ETD makes research immediately accessible globally
- Increasingly students are producing and submitting intellectual works beyond the PDF
 - Accompanying research datasets
 - Music recitals
 - Lab videos
 - Other complex digital contents

Stakeholders: ETD Organizations

International

- NDLTD: Networked Digital Library of Theses and Dissertations
- National
 - USETDA
- Statewide
 - California ETD (CAETD)
 - Florida ETD Association (FLETDA)
 - Ohio ETD Association (OETDA)
 - <u>Texas ETD Association (TxETDA)</u>
- Internal
 - Graduate Schools, Libraries, IT Offices, etc.

ETD Conferences

International Conferences

- NDLTD's ETD annual Conference
- National Conference
 - USETDA Annual Conferences (2011 to Present)
- Regional Conferences
 - <u>TxETDA</u>

ETD Awards

NDLTD Awards

- Innovative ETD Awards
- NDLTD Leadership Awards

Professional Societies' Awards

- ASIS&T's ProQuest Doctoral Dissertation Award
- ALISE's Eugene Garfield Doctoral Dissertation Award
- iSchools **Doctoral Dissertation Award**

Institutional Awards

- UNT's Innovative ETD Award (2013 to present)
- Many more ...

ETD Projects

- ETD Plus (Educopia Institute)
 - ETDplus Toolkit
 - ETDplus Virtual Workshops
- IMLS <u>ETD Lifecycle Management</u> Project
 - The guidance documents
 - The software tools
 - The Educational materials and workshop

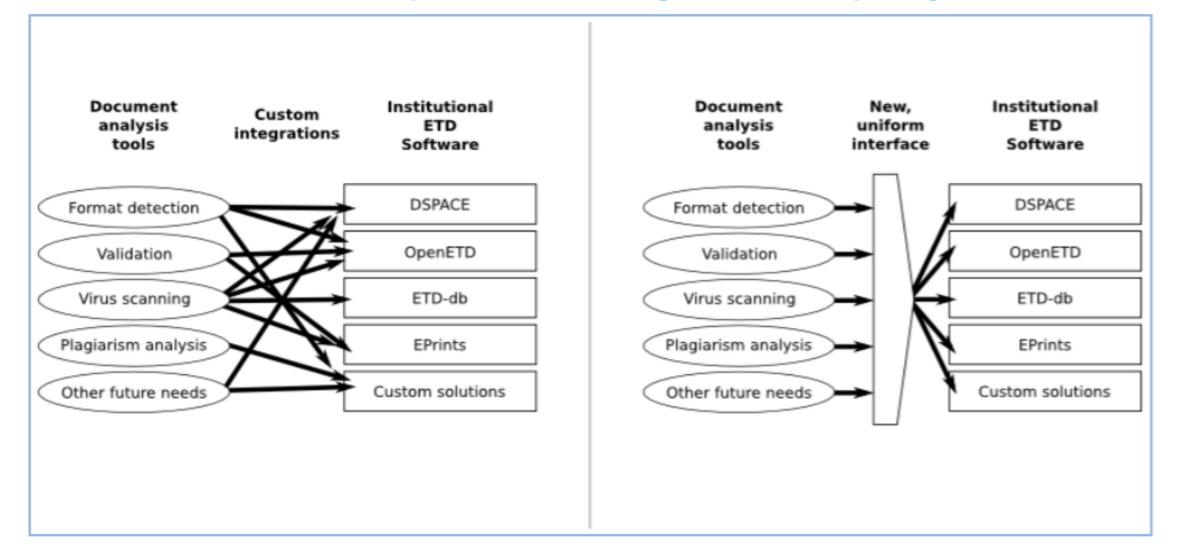

ETD Lifecycle

Understanding, documenting, and addressing the preservation challenges presented by ETDs

Tools development for ETDs: ETDs lifecycle management project

Sources: IMLS ETD Lifecycle Management Project : <u>http://metaarchive.org/imls/index.php/Main_Page</u> The lifecycle management of ETDs Project: Multi stakeholders national partnership. iConference 2013 Proceedings (pp. 869-873). doi:10.9776/13444

Tools development for ETDs: ORCID

- ORCID (Open Researcher and Contributor iD) offer unique virtual identifiers that track users' real-time achievements.
- Any submission embedded with an iD is tracked by ORCID through its online registry, ensuring that users are given proper accreditation.
- DSpace 5 came with an ORCid lookup option for author and editor, which allow to look people up by ORCid

Looking Closely

- UNT is one of the early adopters of ETD in 1999. UNT also digitized all of its theses and dissertations retrospectively.
 - The oldest UNT ETD was from 1936.
 - Provide multiple format access and integrated associated files
- 2,363,147 pages or file sets / 19,291 ETDs
 - 122 average pages per ETD (129 weighted Averages of File sets)
- The page number is ranged from 41 to 1096.
 - The highest frequency is 177 (59 pages), then 176 ETDs have 114 pages.
 - 87 ETDs have more than 500 pages and two ETDs have 1,000+ pages.

Statistics: UNT Theses and Dissertations

Overview

19,327 Total Items 2,363,147 Total Files 11,706,485 Total Uses

- Electronic theses and dissertations (ETDs) comprise one of the most widely used collections in the UNT <u>Digital Library</u>.
 - Our global users come from more than 220 countries.
 - The most used ETD has been accessed <u>52K times</u>.
 - Users via handheld devices are growing continuously.

Thank you! Daniel.Alemneh@unt.edu
