Bulletin Home

This Bulletin includes a description of undergraduate and graduate policies and programs at the University of Missouri-St. Louis for 2018-2019. All statements in this publication concerning regulations, fees, curricula, or other matters are subject to change without notice. They are not to be regarded as offers to contract.

The University of Missouri-St. Louis is accredited by the Higher Learning Commission. This accreditation applies to all baccalaureate, masters, and doctoral levels. Our next scheduled comprehensive evaluation is November 5-6, 2018. A successful review leads to the reaffirmation of our accreditation.

The policies of the University of Missouri-St. Louis comply with the provisions under those laws that forbid discrimination on the basis of race, color, sex, national origin, religion, age, handicap, or veteran status in any program or activity of the University (CRR 600.010-600.020 (https://www.umsystem.edu/ums/rules/collected_rules/equal_employment_educational_opportunity/ch600)).

Bulletins for the past ten years are posted in the archives section of this site. Older versions are available in campus advising offices and Academic Affairs. Program requirements are also available to students through Degree Audit Reports (DARS) (<http://www.umsi.edu/services/dars>), which are available online or from an academic adviser, who will assist in the interpretation of the audit.

The University of Missouri-St. Louis is one of four campuses that constitute the University of Missouri. Established in Columbia in 1839 on the ideals of Thomas Jefferson, the University of Missouri became a land-grant institution upon passage of the Morrill Act by Congress in 1862.

When the University of Missouri System was organized in 1963, the St. Louis campus was the only one that started as an entirely new university. The University of Missouri-St. Louis began as a consequence of the national movement to create public universities in metropolitan centers. UMSL was designed to educate the area's professionals through research, coursework, and hands-on experiences in the region's businesses, schools, hospitals, agencies, and arts organizations.

According to the campus's history, *The Emerging University: The University of Missouri-St. Louis, 1963-1983*, faculty were hired from prestigious universities with a vision of creating a university where graduates would be able to confront urban issues through research, critical thinking, and creativity. More than traditional workforce development, these leaders' vision for UMSL was to educate students for lifelong learning, which would produce good citizens and effective leaders in the region's organizations. That legacy continues because those early leaders created a culture of faculty excellence that persists today.

Since the doors of the old Administration Building opened on a golf course more than 50 years ago, UMSL has grown to encompass 470 acres in St. Louis County and has a mix of modern and historic academic buildings. The campus is now St. Louis's largest university in the number of students and is the third largest in the state.

The campus takes pride in the success of its students, faculty, and staff and highlights of these successes are posted regularly on the UMSL home page. Detailed information about the university is also available on the About UMSL (<http://www.umsi.edu/proud>) site and the Student Consumer Information (<http://www.umsi.edu/%7eregistration/students/>

[studentconsumer.html](#)) site. Student achievement data can be found on the College Portrait (<http://www.voluntarysystem.org>).

The University of Missouri St. Louis is the metropolitan, land-grant, research institution serving the most diverse and economically important region in Missouri.

Mission

We transform lives.

Vision

The University of Missouri St. Louis will be a beacon of hope, a force for good, and a leader in the pursuit of excellence in education, impactful research and community service. We boldly assert that education is for everyone who is willing and able to seek it out. We honor the duties inherent in our land-grant beginnings by positioning ourselves as partners in the search for knowledge, progress and positive change for ourselves, our communities, our world.

Faculty Senate and University Assembly

The Faculty Senate (<http://www.umsi.edu/committees/senate>) has primary responsibility for making educational policy decisions to create a rigorous, innovative, student-oriented environment for learning, research, and community service. The Senate and University Assembly together and through their committees advise the chancellor and other senior administrators on matters related to students, faculty and staff.

The Faculty Senate includes a faculty member from each department and approximately 10 at-large faculty members, as well as three administrators who are non-voting members. The University Assembly consists of the elected members of the Senate, five administrators, student representatives, and staff members. Non-voting members consist of vice chancellors and vice provosts not already included, deans of all colleges, the dean of libraries, and the president of the Student Government Association. The Faculty Senate meets monthly between September and May and the Assembly meets in alternate months during the year. Information about the Faculty Senate and University Assembly are available on the Senate's web site.

Staff Association

The University of Missouri—St. Louis Staff Association (<http://www.umsi.edu/services/sassoc>) is a body formed to consider, to recommend, and to take such other actions as are properly related to the common concerns and best interest of those personnel at the University of Missouri-St. Louis. The Staff Association fosters a spirit of unity and cooperation among all employees of the University of Missouri-St. Louis, to consider methods and means by which employment conditions may be improved and the operating efficiency of the University of Missouri-St. Louis increased; to receive and consider matters concerning working conditions of membership; to make such recommendations that it deems appropriate, and to provide a means of communicating problems of mutual concern between the Staff Association and the University of Missouri-St. Louis administration. Representatives of the Staff Association serve as voting members of University Assembly committees.

Student Government Association

The Student Government Association (<http://www.umsi.edu/studentlife/sga>) (SGA) of the University of Missouri St. Louis, housed in 366 Millennium Student Center, 314-516-5105, is the student governance body at UMSL. SGA is comprised of elected student representatives and

a general assembly which includes representatives from all recognized student organizations. The purpose of the SGA is to represent student concerns at every level of governance within the university. This is done by ensuring adequate and capable student representation within the University Assembly, the policymaking and governance body of the university.

2018-2019 Calendar

Fall Semester 2018

16 Week Session

Date	Weekday	Event
August 20	Monday	Classes Begin 8:00 a.m.
August 26	Sunday	Last day a student may enroll
August 26	Sunday	Last day Registrar's Office will automatically move students from the wait list to open sections
September 3	Monday	Labor Day Holiday
September 4	Tuesday	Classes Resume, 8:00 a.m.
September 17	Monday	Last day to drop a course or withdraw from school without receiving a grade
September 17	Monday	Last day any student may place a course on Satisfactory/Unsatisfactory basis
October 15	Monday	Mid Semester
October 15	Monday	Last day to drop a course or withdraw from school without instructor approval. EX grade will be assigned.
November 12	Monday	Last day a student may drop a course. Instructor's approval is required. A grade of EX or EX-F will be assigned.
November 12	Monday	Last day a student may withdraw from school. Instructors' and Dean's approvals are required. Grades of EX or EX-F will be assigned for each course.
November 17	Saturday	Fall Break (Thanksgiving holiday) Begins 5:00 p.m.
November 26	Monday	Classes Resume, 8:00 a.m.
December 8	Saturday	Classes End, 5:00 p.m.
December 10	Monday	Final Examinations Begin
December 15	Saturday	Fall Semester Closes, end of day
December 15	Saturday	Fall Commencement

Fall Semester 2018

8 Week-1 Session

Date	Weekday	Event
August 20	Monday	Classes Begin 8:00 a.m.
August 23	Thursday	Last day a student may enroll
August 23	Thursday	Last day Registrar's Office will automatically move students from the wait list to open sections
September 3	Monday	Labor Day Holiday
September 4	Tuesday	Classes Resume, 8:00 am
September 4	Tuesday	Last day to drop a course or withdraw from school without receiving a grade

September 4 Tuesday Last day any student may place a course on Satisfactory/Unsatisfactory basis

September 17 Monday Last day to drop a course or withdraw from the Eight week 1 session without Instructor approval. EX grade will be assigned.

October 1 Monday Last day a student may drop a course. Instructor's approval is required. A grade of EX or EX-F will be assigned.

October 1 Monday Last day a student may withdraw from the session. Instructors' and Dean's approvals are required. Grades of EX or EX-F will be assigned for each course.

October 13 Saturday Fall Semester 8 Week 1 Closes, end of day

Final Exams are held during the last class meeting of the Session

Fall Semester 2018

8 Week-2 Session

Date	Weekday	Event
October 15	Monday	Classes Begin 8:00 a.m.
October 18	Thursday	Last day a student may enroll
October 18	Thursday	Last day Registrar's Office will automatically move students from the wait list to open sections
October 29	Monday	Last day to drop a course or withdraw from school without receiving a grade
October 29	Monday	Last day to place an Eight week 2 course on Satisfactory/Unsatisfactory basis.
November 12	Monday	Last day to drop a course or withdraw from the Eight week 2 session without Instructor approval. EX grade will be assigned.
November 17	Saturday	Fall Break (Thanksgiving holiday) Begins 5:00 p.m.
November 26	Monday	Classes Resume, 8:00 a.m.
December 3	Monday	Last day to drop an Eight week 2 course. Instructor approval is required. A grade of EX or EX-F will be assigned.
December 3	Monday	Last day to withdraw from the Eight week 2 session. Instructors' and Dean's approval are required. Grades of EX or EX-F will be assigned for each Eight week 2 course.
December 15	Saturday	Fall Semester 8 Week 2 Closes, end of day

Final Exams are held during the last class meeting of the Session

Winter Intersession - 2019

Date	Weekday	Event
January 7	Monday	Classes Begin, 8:00 a.m.
January 7	Monday	Last day to add a Winter Intersession course
January 9	Wednesday	Last day to drop a Winter Intersession course without receiving a grade
January 9	Wednesday	Last day to place a Winter Intersession course on Satisfactory/Unsatisfactory basis

January 12	Saturday	Last day to drop a course from the Winter Intersession without instructor approval. EX grade will be assigned.
January 16	Wednesday	Last day to drop a Winter Intersession course. Instructor's approval is required. Grade of EX or EX-F will be assigned.
January 19	Saturday	Classes End, 5:00 p.m.

Spring Semester - 2019

Date	Weekday	Event
January 21	Monday	Martin Luther King Holiday
January 22	Tuesday	Classes Begin, 8:00 a.m.
January 28	Monday	Last day any student may enroll (enter a course for credit)
January 28	Monday	Last day Registrar's Office will automatically move students from the wait list to open sections
February 18	Monday	Last day to drop a course or withdraw from school without receiving a grade
February 18	Monday	Last day any student may place a course on Satisfactory/Unsatisfactory basis
March 18	Monday	Mid Semester
March 18	Monday	Last day to drop a course or withdraw from school without instructor approval. EX grade will be assigned.
March 23	Saturday	Spring Recess Begins, 5:00 p.m.
April 1	Monday	Classes Resume, 8:00 a.m.
April 22	Monday	Last day student may drop a course. Instructor's approval is required. A grade of EX or EX-F will be assigned.
April 22	Monday	Last day a student may withdraw from school. Instructors' and Deans' approvals are required. Grades of EX or EX-F will be assigned for each course.
May 11	Saturday	Classes End, 5:00 p.m.
May 13	Monday	Final Examinations Begin
May 18	Saturday	Spring Semester Closes, end of day
May 18	Saturday	Spring Commencement
May 19	Sunday	Spring Commencement

Spring Semester 2019

8 Week-1 Session

Date	Weekday	Event
January 21	Monday	Martin Luther King Holiday
January 22	Tuesday	Classes Begin, 8:00 a.m.
January 25	Friday	Last day any student may enroll (enter a course for credit)
January 25	Friday	Last day Registrar's office will automatically move students from the wait list into open sections.
February 4	Monday	Last day to drop a course or withdraw from school without receiving a grade
February 4	Monday	Last day any student may place a course on Satisfactory/Unsatisfactory basis

February 18	Monday	Last day to drop a course or withdraw from school without instructor approval. EX grade will be assigned.
-------------	--------	---

March 2	Monday	Last day student may drop a course. Instructor's approval is required. A grade of EX or EX-F will be assigned.
---------	--------	--

March 2	Monday	Last day a student may withdraw from the session. Instructors' and Deans' approvals are required. Grades of EX or EX-F will be assigned for each course.
---------	--------	--

March 16	Saturday	Spring Semester 8 Week 1 Closes, end of day
----------	----------	---

Final Exams are held during the last class meeting of the Session

Spring Semester 2019

8 Week-2 Session

Date	Weekday	Event
March 18	Monday	Classes Begin, 8:00 a.m.
March 21	Thursday	Last day any student may enroll (enter a course for credit)
March 21	Thursday	Last day Registrar's office will automatically move students from the wait list into open sections.
March 23	Saturday	Spring Recess Begins, 5:00 p.m.
April 1	Monday	Classes Resume, 8:00 a.m.
April 6	Saturday	Last day to drop a course without receiving a grade
April 6	Saturday	Last day any student may place a course on Satisfactory/Unsatisfactory basis
April 22	Monday	Last day to drop a course or withdraw from the session without instructor approval. EX grade will be assigned.
May 6	Monday	Last day a student may withdraw from the session. Instructors' and Dean's approvals are required. Grades of EX or EX-F will be assigned for each course.
May 6	Monday	Last day a student may withdraw from the session. Instructors' and Dean's approvals are required. Grades of EX or EX-F will be assigned for each course.
May 18	Saturday	Spring Semester 8 Week 2 Closes, end of day

Final Exams are held during the last class meeting of the Session

Summer Sessions - 2019

Summer Session I (4 Weeks)

Date	Weekday	Event
May 20	Monday	Classes Begin, 8:00 a.m.
May 22	Wednesday	Last day any student may enroll (enter a course for credit) for Session I

May 22	Wednesday	Last day Registrar's Office will move students automatically from the wait list to open sections
May 27	Monday	Memorial Day Holiday
May 28	Tuesday	Classes Resume, 8:00 a.m.
May 28	Tuesday	Last day to drop a Session I course without receiving a grade.
May 28	Tuesday	Last day to place a Session I course on satisfactory/unsatisfactory basis.
June 4	Tuesday	Last day to drop a Session I course without instructor approval. EX grade will be issued.
June 10	Monday	Last day a student may drop or withdraw from a Session I course. Instructor's approval is required. EX or EX-F grade will be issued.
June 15	Saturday	Session Closes, end of day

Summer Session II (4 Weeks)

Date	Weekday	Event
June 17	Monday	Classes begin 8:00 a.m.
June 19	Wednesday	Last day any student may enroll (enter a course for credit) for Session II
June 19	Wednesday	Last day Registrar's Office will move students automatically from the wait list to open sections
June 24	Monday	Last day to drop a Session II course without receiving a grade
June 24	Monday	Last day a student may place a Session II course on Satisfactory/Unsatisfactory basis
July 1	Monday	Last day to drop a Session II course without instructor approval. EX grade will be issued.
July 4	Thursday	Independence Day Holiday
July 5	Friday	Classes Resume
July 8	Monday	Last day a student may drop or withdraw from a Session II course. Instructor's approval is required. A grade of EX or EX-F will be issued.
July 13	Saturday	Session Closes, end of day

Summer Session III (4 Weeks)

Date	Weekday	Event
July 15	Monday	Classes Begin, 8:00 a.m.
July 17	Wednesday	Last day any student may enroll (enter a course for credit) for Session III
July 17	Wednesday	Last day Registrar's Office will move students automatically from the wait list to open sections
July 22	Monday	Last day to drop a Session III course without receiving a grade
July 22	Monday	Last day a student may place a Session III course on Satisfactory/Unsatisfactory basis
July 29	Monday	Last day a student may drop or withdraw from a Session III course without instructor approval. EX grade will be issued.

August 5	Monday	Last day to drop or withdraw from a Session III course. Instructor's approval is required. EX or EX-F grade will be issued.
August 10	Saturday	Session Closes, end of day

Final examinations are held during the last class meeting of Summer Sessions I, II, and III.

Summer Session IV (8 Weeks)

Date	Weekday	Event
May 20	Monday	Classes Begin, 8:00 a.m.
May 23	Thursday	Last day any student may enroll (enter a course for credit) for Session IV
May 23	Thursday	Last day Registrar's Office will move students automatically from the wait list to open sections
May 27	Monday	Memorial Day Holiday
May 28	Tuesday	Classes Resume, 8:00 a.m.
June 4	Tuesday	Last day to drop a Session IV course without receiving a grade
June 4	Tuesday	Last day a student may place a Session IV course on Satisfactory/Unsatisfactory basis
June 17	Monday	Last day a student may drop or withdraw from a Session IV course without instructor approval. EX grade will be issued.
July 1	Monday	Last day to drop or withdraw from a Session IV course. Instructor's approval is required. EX or EX-F grade will be issued.
July 4	Thursday	Independence Day Holiday
July 5	Friday	Classes Resume, 8:00 a.m.
July 9	Tuesday	Final Examinations Begin
July 13	Saturday	Session Closes, end of day

Summer Session V (8 Weeks)

Date	Weekday	Event
June 17	Monday	Classes Begin, 8:00 a.m.
June 20	Thursday	Last day any student may enroll (enter a course for credit) for Session V
June 20	Thursday	Last day Registrar's Office will move students automatically from the wait list to open sections
July 1	Monday	Last day to drop a Session V course without receiving a grade
July 1	Monday	Last day a student may place a Session V course on Satisfactory/Unsatisfactory basis
July 4	Thursday	Independence Day Holiday
July 5	Friday	Classes Resume, 8:00 a.m.
July 15	Monday	Last day to drop a Session V course without instructor approval. EX grade will be issued.
July 29	Monday	Last day a student may drop or withdraw from a Session V course. Instructor's approval is required. EX or EX-F will be issued.

August 7	Wednesday	Final Examinations Begin
August 10	Saturday	Session Closes, end of day

Summer Session VI (12 Weeks)

Date	Weekday	Event
May 20	Monday	Classes Begin, 8:00 a.m.
May 24	Friday	Last day any student may enroll (enter a course for credit) for Session VI
May 24	Friday	Last day Registrar's Office will move students automatically from the wait list to open sections
May 27	Monday	Memorial Day Holiday
May 28	Tuesday	Classes Resume, 8:00 a.m.
June 10	Monday	Last day to drop a Session VI course without receiving a grade
June 10	Monday	Last day a student may place a Session VI course on Satisfactory/Unsatisfactory basis
July 1	Monday	Last day to drop a Session VI course without instructor approval. EX grade will be issued.
July 4	Thursday	Independence Day Holiday
July 5	Friday	Classes Resume, 8:00 a.m.
July 22	Monday	Last day a student may drop or withdraw from a Session VI course. Instructor's approval is required. EX or EX-F will be issued.
August 7	Wednesday	Final Examinations Begin
August 10	Saturday	Session Closes, end of day

Actuarial Science	BS (p. 50)	
Anthropology	BA (p. 54)	
Art History	BA (p. 308)	
Biochemistry and Biotechnology	BS (p. 64)	
Biology	BA (p. 73), BS (p. 73)	Cellular and Molecular Biology; Ecology, Evolution and Systematics
Business Administration	BSBA (p. 356)	Finance; International Business; Marketing; Supply Chain Management
Chemistry	BA (p. 94), BS (p. 94)	
Civil Engineering	BSCE (p. 629)	Construction Engineering; Environmental Engineering Science
Communication	BA (p. 106)	
Computer Science	BS (p. 203)	
Criminology and Criminal Justice	BS (p. 128)	
Early Childhood Education	BSED (p. 462)	
Economics	BA (p. 135), BS (p. 135)	
Educational Studies	BES (p. 437)	Early Childhood Education; Exercise Science and Wellness; Youth and Adult Development; Park and Museum Programs
Electrical Engineering	BSEE (p. 629)	
Elementary Education	BSED (p. 463)	Middle School Education; Special Education; Special Education and Teaching English to Speakers of Other Languages; Teaching English to Speakers of Other Languages
English	BA (p. 144)	
History	BA (p. 157)	
Information Systems	BS (p. 358)	
Interdisciplinary Studies	BIS (p. 171)	
International Relations	BA (p. 251)	
Liberal Studies	BLS (p. 171)	

Mathematics	BA (p. 203), BS (p. 203)	Fiscal Mathematics (BS only)
Mechanical Engineering	BSME (p. 629)	
Media Studies	BS (p. 106)	
Modern Language	BA (p. 185)	French, German, Japanese, Spanish, Dual Language Professional
Music	BA (p. 324)	Elective Studies in Bus (BM only); Performance (BM only); Music Education (BM only); Composition (BM only); Theory (BM only)
Nursing	BSN (p. 554)	
Philosophy	BA (p. 230)	Pre-Law, Science Studies, Psychology and Neuroscience, Ethics and Society, Health Sciences, History
Physical education	BSED (p. 467)	PK-9; PK-12
Physics	BA (p. 242), BS (p. 242)	Astrophysics (BS only); Engineering Physics (BS only); General Physics (BS only); Biophysics (BS only)
Political Science	BA (p. 251)	
Psychology	BA (p. 271), BS (p. 271)	
Public Policy and Administration	BSPPA (p. 251)	
Secondary Education	BSED (p. 466)	English; Mathematics; Modern Foreign Language-French; Modern Foreign Language-Spanish; Music; Science-Biology; Science-Chemistry; Science-Physics; Social Studies-Economics; Social Studies-History; Social Studies-Poli Science; Social Studies-Psychology; Social Studies-Sociology
Social Work	BSW (p. 618)	
Sociology	BA (p. 287), BS (p. 287)	
Studio Art	BFA (p. 308)	Drawing; General Fine Arts; Graphic Design; Photography; Painting; Printmaking; Art Education
Theatre Arts	BA (p. 344)	Acting/Directing; Design; Playwriting/Screenwriting; Cinema

Undergraduate Minors

Not all minors are appropriate to all degrees, however; please check with your advisor before selecting a minor or certificate.

- Accounting (p. 359)
- African/African American Studies (p. 639)

- American Politics (p. 251)
- American Studies (p. 171)
- Anthropology (p. 54)
- Art History (p. 308)
- Athletic Coaching (p. 469)
- Biology (p. 73)
- Business Administration (p. 359)
- Chemistry (p. 94)
- Child Advocacy Studies (p. 171)
- Civil Engineering (p. 629)
- Classical Studies (p. 184)
- Communication (p. 106)
- Comparative Politics
- Computer Science (p. 203)
- Criminology and Criminal Justice (p. 128)
- Economics (p. 135)
- Education (p. 469)
- Electrical Engineering (p. 629)
- English (p. 144)
- Environmental Studies (p. 171)
- Exercise Science
- Finance (p. 359)
- French (p. 184)
- Gender Studies (p. 301)
- General Business (p. 359)
- German (p. 184)
- Gerontology (p. 295)
- Global Health and Social Medicine (p. 54)
- History (p. 157)
- History of Science and Technology (p. 157)
- Information Systems (p. 359)
- International Business (p. 359)
- International Relations (p. 251)
- Japanese (p. 184)
- Jazz Studies (p. 324)
- Latina/Latino Studies (p. 171)
- Law and Philosophy (p. 230)
- Legal Studies (p. 171)
- Management (p. 359)
- Marketing (p. 359)
- Mathematics (p. 203)
- Mechanical Engineering (p. 629)
- Media Studies (p. 106)
- Modern Language (p. 185)
- Music (p. 329)
- Nonprofit Administration (p. 251)
- Philosophy (p. 230)
- Philosophy of Science and Technology (p. 230)
- Physics (p. 242)
- Political Science (p. 251)
- Political Theory (p. 251)
- Psychology (p. 271)

- Public Administration (p. 251)
- Public Affairs Journalism (p. 171)
- Public Law (p. 251)
- Public Policy (p. 251)
- Social Work (p. 618)
- Sociology (p. 287)
- Spanish (p. 184)
- Statistics (p. 203)
- Studio Art (p. 308)
- Supply Chain Management (p. 359)
- Teaching English to Speakers of Other Languages K-12 (p. 469)
- Theatre Arts (p. 344)
- Transportation Studies (p. 359)
- Urban Politics (p. 251)
- Urban Studies (p. 171)
- Veterans Studies (p. 224)
- Women and Politics (p. 251)

Undergraduate Certificates

- Post-Baccalaureate Certificate in Accounting (p. 355)
- Actuarial Studies (p. 203)
- Advertising (p. 106)
- Applied Econometrics and Data Analysis (p. 135)
- Archaeology (p. 54)
- Biochemistry (p. 94)
- Biotechnology (p. 73)
- Conservation Biology (p. 73)
- Child Advocacy Studies (p. 171)
- Creative Writing (p. 144)
- Criminology and Criminal Justice (p. 128)
- Cybersecurity (p. 171)
- Data Science (p. 171)
- East Asian Studies (p. 639)
- Entrepreneurship (p. 354)
- Ethnicity, Migration and Human Diversity (p. 54)
- Evolutionary Studies (p. 171)
- Film Studies (p. 344)
- Gender and Military (p. 301)
- Gender Studies (p. 301)
- Gerontological Studies (p. 295)
- Greek Studies (p. 639)
- Health Communication (p. 106)
- History and Philosophy of Science and Technology (p. 171)
- Honors College (p. 612)
- International Business (p. 639)
- Internet and Web (p. 203)
- Labor Studies (p. 171)
- Latin American Studies (p. 639)
- Media Production (p. 106)
- Modern European Studies (p. 639)
- Mobile and Ubiquitous Computing (p. 203)
- Neuroscience (p. 171)

- Photographic Studies (p. 308)
- Professional Writing (p. 144)
- Public Relations (p. 106)
- Studies in Religions (p. 171)
- Technical Writing (p. 144)
- Trauma Studies (p. 171)
- Women, Political Leadership and Public Policy (p. 251)
- Women's Leadership (p. 301)
- Workplace and Organizational Science (p. 271)

Other Instructional Areas

In addition to the degrees, minors, certificates and emphasis areas above, many departments offer specializations in several subject areas, including the following:

- Arabic (p. 184)
- Archaeology (p. 53)
- Astronomy (p. 242)
- Atmospheric Science (p. 242)
- Chinese (p. 184)
- Ensemble Performance (p. 324)
- Geology (p. 242)
- Literature (p. 144)
- Medical Physics (p. 242)
- Pre-Engineering (p. 629)
- Pre-Health Sciences (p. 269)
- Pre-Law (p. 269)
- Pre-Veterinary Science (p. 269)
- Public Relations (p. 106)
- Reserve Officer Training Corps (<http://www.umsl.edu/~umslrotc>)

Graduate Degrees

Programs	Degree(s)	Emphasis Area(s)
Accounting	MACC (p. 391)	
Adult and Higher Education	MED (p. 438)	Adult Education; Higher Education
Applied Mathematics	PHD (p. 207)	Computer Science; Mathematics
Biochemistry and Biotechnology	MS (p. 66)	Professional Science
Biology	MS (p. 79), PHD (p. 79)	Cellular and Molecular Biology; Ecology, Evolution and Systematics; Professional Science (master's only)
Business Administration	DBA (p. 396)	
Business Administration	MBA (p. 392)	Accounting; Finance; Information Systems; International Business; Logistics and Supply Chain Management; Management; Marketing; Operations Management;

Business Administration	PHD (p. 397)	Logistics and Supply Chain Management
Chemistry	MS (p. 97), PHD (p. 97)	Biochemistry; Inorganic; Organic; Physical; Professional Science (master's only)
Communication	MA (p. 109)	
Computer Science	MS (p. 207)	
Counseling	MED (p. 439)	Clinical Mental Health Counseling; Elementary; Secondary
Creative Writing	MFA (p. 147)	
Criminology and Criminal Justice	MA (p. 130), PHD (p. 130)	
Economics	MA (p. 138)	Business Economics; General Economics
Education	PHD (p. 428)	Adult & Higher Education; Counselor Education; Educational Administration; Teaching-Learning Processes
Education	EDD (p. 428),	Educational Practice
Educational Administration	EDS (p. 520), MED (p. 520)	Community Education; Elementary Administration; Secondary Administration; School Administration
Educational Psychology	MED (p. 443)	Character Education and Citizenship Education; Educational Research and Program Evaluation
Elementary Education	MED (p. 508)	General; Early Childhood Teacher Certification; Elementary Teacher Certification; Elementary and Special Education Certification; Early Childhood; Reading
English	MA (p. 147)	Literature; Writing Studies
Gerontology	MS (p. 296)	
History	MA (p. 159)	
Information Systems	MS (p. 395)	
Mathematics	MA (p. 207)	
Museums, Heritage and Public History	MA (p. 159)	
Music Education	MME (p. 329)	

Nursing	MSN (p.)	Acute Care Pediatric Nurse Practitioner; Adult-Gerontology Nurse Practitioner; Family Nurse Practitioner; Nurse Educator; Pediatric Nurse Practitioner; Psychiatric-Mental Health Nurse Practitioner; Women's Health Nurse Practitioner
Nursing	PhD (p. 575)	
Nursing	DNP (p. 572)	Acute Care Pediatric Nurse Practitioner; Family Nurse Practitioner; Adult-Gerontology Nurse Practitioner; Women's Health Nurse Practitioner; Psychiatric Mental Health Nurse Practitioner; Pediatric Nurse Practitioner; Leadership in Population Health and Healthcare Systems
Philosophy	MA (p. 234)	
Physics	MS (p. 245), PhD (p. 245)	Applied Physics; Astrophysics
Political Science	MA (p. 258), PHD (p. 258)	American Politics; Comparative Politics; International Politics; Political Process and Behavior; Public Admin and Public Policy; Urban and Regional Politics
Psychology	MA (p. 274), PHD (p. 274)	Behavioral Neuroscience; Clinical-Community Psychology (PhD only); Industrial and Organizational Psychology
Public Policy and Administration	MPPA (p. 604)	Health Policy; Local Government Mgmt; Managing Human Resources and Organization; Nonprofit Organization Mgmt; Policy Research and Analysis
School Psychology	EDS (p. 446)	
Secondary Education	MED (p. 508)	General; Curriculum and Instruction; Middle Level Education; Reading; Teacher Certification; Teaching English to Speakers of Other Languages
Social Work	MSW (p. 619)	
Special Education	MED (p. 519)	Early Childhood Special Education; Autism and Developmental Disabilities; Cross Categorical Disabilities

Professional Degree

Optometry OD (p. 590)

Graduate Certificates

- ACP Instructional Communication (p. 109)
- Applied Behavior Analysis (p. 522)
- Autism Studies (p. 522)
- Biotechnology (p. 79)
- Business Administration (p. 398)
- Business Intelligence (p. 398)
- Character and Citizenship Education (p. 433)
- Community College Leadership (p. 447)
- Cybersecurity (p. 611)
- Digital and Social Media Marketing (p. 398)
- Early Childhood Teaching (p. 522)
- Elementary School Teaching (p. 522)
- Elementary and Special Education Teaching (p. 522)
- Gender Studies (p. 302)
- Gerontology (p. 296)
- History Education (p. 159)
- Human Resource Management (p. 390)
- Institutional Research (p. 447)
- International Studies (p. 643)
- Local Government Management (p. 604)
- Logistics and Supply Chain Management (p. 390)
- Marketing Management (p. 390)
- Museums, Heritage, and Public History (p. 159)
- Non Profit Organization Management and Leadership (p. 604)
- Policy and Program Evaluation (p. 604)
- Post-Graduate Acute Care Pediatric Nurse Practitioner (p. 576)
- Post-Graduate Adult-Geriatric Nurse Practitioner (p. 576)
- Post-Graduate Advanced Nursing Practice with Educator Functional Role (p. 576)
- Post-Graduate Family Nurse Practitioner (p. 576)
- Post-Graduate Pediatric Nurse Practitioner (p. 576)
- Post-Graduate Psychiatric-Mental Health Nurse Practitioner (p. 576)
- Post-Graduate Women's Health Nurse Practitioner (p. 576)
- Program Evaluation and Assessment (p. 447)
- Psychology - Clinical Re-specialization (p. 274)
- Secondary School Teaching (p. 522)
- Social Justice in Education (p. 447)
- Student Affairs Administration and Leadership (p. 447)
- Teaching English to Speakers of Other Languages (p. 522)
- Teaching of Writing (p. 522)
- Trauma Studies (p. 274)
- Tropical Biology and Conservation (p. 79)

Undergraduate Study

Undergraduate Study

This section describes academic policies and requirements for students enrolled as an undergraduate and University requirements for undergraduate academic programs.

Campus Testing Centers

The Testing Center is administratively housed in the Center for Teaching and Learning. The Testing Center manages exams for students and faculty that are paper-based, online, and those requiring a variety of accommodations. Appointments are required for all exams. Institutional exams (e.g., Major Field Test, Math Placement, ACT Residual) are administered through the Testing Center, as well as various standardized exams. The Testing Center main office is located in JC Penney Room 93, with additional computer-based stations in JC Penney Room 94.

Assessment

The University of Missouri has been directed by the Board of Curators to assess the outcomes of your university education. To this end, two types of assessment are required: A test of general educational development given to a sample of incoming freshmen and graduating seniors who represent the university; and a test or project, specified by the major department, given to graduating seniors.

For its continuous quality improvements, the University also conducts periodic surveys of student engagement. As alumni, graduates are encouraged to participate in assessment by completing questionnaires sent to them by the University or major department/college.

Credit Hours

All candidates for baccalaureate degrees must complete a minimum of 120 semester hours. At least 45 of these hours must be courses numbered 2000 or above (or comparable courses transferred). Students must maintain a minimum 2.0 grade point average overall, as well as in their area of specialization. Students seeking two degrees must meet all degree and residency requirements of each degree.

Math and English Proficiency Requirement

Students who have not satisfied the Math and English proficiency requirement by the end of their first semester at UMSL will receive an advising hold and must meet with an Academic Advisor to register in these gateway courses in order for the hold to be removed.

Junior-Level Writing

A Junior-Level writing course with a grade of C- or above is required for all undergraduate degrees. The following courses will meet the requirement:

ENGL 3090	Turning the Kaleidoscope: How We Look at Texts	3
ENGL 3100	Junior-Level Writing	3
ENGL 3110	Junior-Level Writing for International Students	3
ENGL 3120	Business Writing	3
ENGL 3130	Technical Writing	3
ENGL 3160	Writing in the Sciences	3

HONORS 3100

Honors Advanced Composition:
Writing The City

3

HONORS 3120

Honors Business Writing

Academic Residence

Students must be in residence for at least 24 of the last 30 hours of graded credit (exclusive of courses graded on a satisfactory/unsatisfactory basis), except under unusual circumstances, to be decided by the dean.

General Education

Students must successfully complete the General Education requirements of the University, the school or college in which they are enrolled, and the specific requirements of their area of specialization. For more information about the University's requirements go to the General Education Program (p. 41) section of the bulletin.

Graduation

To better assist students and confirm graduation eligibility, it is required that students notify their academic unit of their intended graduation date by officially applying to graduate through the self-service student center in MyView. Step by step instructions can be found here:

<http://www.ums1.edu/~registration/students/online-application-for-graduation.pdf>

This will allow the advisors to begin the degree check process and approve the student for graduation.

- The application for graduation process initiates the degree-check process.
- It is recommended that students complete the application for graduation one year in advance to ensure all requirements will be met. (Note: certain colleges may **require** the one year prior completion date – check with your advisor to be sure). The application for graduation process should be completed based on college specific deadlines.
- In order to graduate in any given semester, students must apply prior to the deadline for that semester:
 - Fall term: October 1
 - Spring term: March 1
 - Summer term June 1
- The process to apply will be cut off at that time and if the student has not yet completed the steps to apply for graduation, the diploma will then be awarded the following semester. (In extreme circumstances, a student may appeal their case to the dean's office if the deadlines have passed).

Changes to anticipated graduation date

- Students who need to alter their graduation plans must notify their academic unit and re-submit the application for graduation process through self-service on MyView (<http://myview.ums1.edu>).
- The semester and other information listed when re-submitting the new application for graduation process will be used to replace the information previously submitted.
- All deadlines for the new semester of graduation apply to applicants who are altering their semester of graduation.

Final Grades

To assure graduating at the end of a specific semester, all work for that semester and any delayed grades from previous semesters must be

completed with the grades sent to the Office of the Registrar no later than the official date for submission of final semester grades.

Graduation, commencement, diplomas and honors

- **Graduation** refers to the process of completing a degree and takes place three times per year at UMSL: at the end of each Spring, Summer, and Fall semester.
- **Commencement** refers to the ceremony celebrating graduation and occurs twice per year at the end of the Fall and Spring semesters. (Students graduating in summer may participate in either the following Fall ceremony or the prior Spring ceremony). Commencement is optional and participating in commencement does not mean that a student has graduated
- **Diplomas** are a ceremonial document indicating the degree a student earned. The transcript is the official academic record.

Cultural Diversity Requirement.

To expand cultural awareness, students in some academic units may be required to complete a course that emphasizes Asian, African, Middle Eastern, Latin American, Pacific aboriginal, Native American, or a comparable culture. Courses that satisfy this requirement involve substantial material independent of the cultures' interactions with European cultures. If a course focuses on one facet of a culture, it must treat the topic within the context of the culture as a whole. This requirement may be met by one of the following courses:

ANTHRO 1011	Introduction To Cultural Anthropology (MOTR ANTH 201)	3
ANTHRO 1019	Introduction to Archaeology	3
ANTHRO 1021	The Body in Culture	3
ANTHRO 1025	World Cultures	3
ANTHRO 1033	World Archaeology	3
ANTHRO 1041	Sex and Gender Across Cultures	3
ANTHRO 1052	The Olympic Games: Ideals and Reality	3
ANTHRO 1091	Introductory Topics in Anthropology	3
ANTHRO 2100	Languages and World View	3
ANTHRO 2101	Girl Cultures	3
ANTHRO 2104	Medicine in Culture and History	3
ANTHRO 2111	Cultures of East Asia	3
ANTHRO 2120	Native Peoples of North America	3
ANTHRO 2121	Native American Spirituality	3
ANTHRO 2123	Cultures of Oceania	3
ANTHRO 2124	Introduction to Contemporary African Cultures	3
ANTHRO 2131	Archaeology of Missouri	3
ANTHRO 2132	Archaeology of North America	3
ANTHRO 2134	Archaeology of The Inca, Aztec, And Maya	3
ANTHRO 2139	Shamans, Serpents, and Spirits: Archaeology of the Borderlands	3
ANTHRO 2191	Special Topics in Non-Western Culture	3
ANTHRO 3235	Women in Subsaharan Africa: A Contemporary Perspective	3

ANTHRO 3237	Contemporary Japanese Culture	3
ANTHRO 4000	Ethnographic Field Research Methods	3
ART HS 1104	Indigenous Arts of North America	3
ART HS 1105	Introduction to the Arts of Africa	3
ART HS 1108	Introduction to the Arts of Asia	3
ART HS 4408	Topics in the Arts of Asia	3
CHINESE 2150	Chinese Literature in Translation	3
EDUC 4000	International Education Field Experience	2-4
ENGL 3530	Contemporary World Literature	3
FGN LANG 2100	Languages and World View	3
GEOG 2001	Cultural Geography	3
HIST 1041	East Asian Civilization	3
HIST 1042	East Asian Civilization	3
HIST 1051	Latin American Civilization	3
HIST 1061	African Civilization: from the Beginning of Humanity to the End of the Slave Trade	3
HIST 1062	African Civilization II: From Colonies to Nations	3
HIST 2012	The Indian in American History	3
HIST 2063	African Diaspora to Abolition of the Slave Trade	3
HIST 2064	African Diaspora in the Age of Migration	3
HIST 2067	African History through Fiction and Film	3
HIST 3032	Modern China: From the Decline of the Qing Empire to the Global Age	3
HIST 3065	From Ivory to Oil: Mining and Extraction in African History	3
HONORS 1310	Non-Western Traditions Series Humanities	3
HONORS 1330	Non-Western Traditions Series-Social Sciences	3
HONORS 2310	Cultural Diversity in the Humanities	3
HONORS 2330	Cultural Diversity in the Social Sciences	3
JAPAN 1011	Anime Nation: Popular Culture in Japan	3
JAPAN 2191	Special Topics in Japanese Culture	3
JAPAN 3210	Japanese Culture and Society	3
JAPAN 3211	Topics in Japanese Culture	3
M H L T 1090	Non-Western Music I	3
M H L T 1150	Drumming Cultures of the World (MOTR MUSC 102)	3
M H L T 1160	Musical Journey through Latin America	3
M H L T 1170	Musical Journey through the Far East	3
M H L T 1180	Musical Journey Through Africa	3
M H L T 1190	Musical Journey of the Native North American	3

MVS 2200	Examining Cultural Experiences of Veterans	3
NURSE 1000	Cultural Diversity in Healthcare	3
PHIL 1120	Asian Philosophy	3
PHIL 1125	Islamic Philosophy	3
POL SCI 1500	Introduction to Comparative Politics (MOTR POSC 202)	3
POL SCI 2530	Political Systems of South America	3
POL SCI 2540	Political Systems of Mexico, Central America and the Caribbean	3
POL SCI 2580	African Politics	3
POL SCI 2850	Gender, Power and International Politics	3
POL SCI 3500	The Politics of the Middle East: International and National Dynamics	3
POL SCI 3800	Media, Film, and International Politics	3
POL SCI 4520	Mega-Cities and Diasporas: Understanding Global Migration	3
SOC 3237	Contemporary Japanese Culture	3
THEATR 1850	Introduction to Non-Western Theatre	3

Declaring a Major

A student's first major, or undeclared major status, is determined by his or her application for admission. Students who have not declared a major at 60 credit hours (junior status) will receive an advising hold and must declare a major with an academic unit before this hold is removed. Transfer students arriving at UMSL with 60 or more credit hours will receive an advising hold preventing them from registering for their second semester until they have declared a major. They can declare a major by following the procedures for a change of major outlined below.

Change of Major

While applying, students are typically not certain about the requirements for a major at UMSL. Students are encouraged to explore majors through professors, advisors, the Career Center, and co-curricular activities during their first semester at UMSL. If they want to change their major, they are encouraged to do so before their second semester at UMSL.

To change academic majors, students should consult the advising office of the new major to determine their eligibility and which courses they have already completed apply toward the new major. Students must then submit the appropriate forms at the office of the college or school of their new major.

Course Schedules

The Schedule of Courses contains the specific courses offered each semester with their meeting times and locations. This schedule is available online.

Course schedules are generally published by mid-March for the fall semester, mid-October for the spring semester, and mid-December for the summer semester.

The university reserves the right to cancel without notice any course listed in the Bulletin or the Schedule of Courses for any semester or to withdraw any course that does not have adequate enrollment.

Registration

Newly admitted/re-admitted students are eligible to register after the close of the pre-registration period for Fall and Spring semesters. All students enrolling in Summer semesters register during the same registration period. Enrollment dates, Semester Calendars, and courses offerings can be found online at the Registration website.

Registering for Classes: Currently Enrolled Students

Currently enrolled students are given the opportunity to preregister, by appointment, before new or returning students during Fall and Spring semesters. Pre-registration appointment times are sent to students' university email and can also be found by logging into MyView.

Registering for Classes: Former Students

Former UMSL students who have not been enrolled for a year must submit a reenrollment application.

Priority Registration

Student athletes and military-connected students are eligible for priority registration and may enroll on the first day that registration begins. Military-connected students include veterans, those currently serving in the military, Reserves, or National Guard, and other students that are using a VA or DoD program to fund their education. Student athletes are members of any NCAA intercollegiate sport team at UMSL.

Registration Cancellation

Students who have enrolled but do not wish to attend the university may cancel their registration any time before the first day of the semester. Students must complete a withdrawal survey online. Cancellations may be processed at the Office of the Registrar.

Students may withdraw from school beginning the first day of classes. The refund schedule for withdrawals after class work begins can be found on the Cashier's Office website. Students who are withdrawing must complete a withdrawal survey. Withdrawals may be processed at the Office of the Registrar.

Prerequisites for a Course

Students are expected to review all courses when registering for them to assure that they meet all prerequisites. When the prerequisites include courses, a minimum grade of C- is required to meet the prerequisite. Only the department offering the course with the prerequisite can make an exception to this requirement. A course with an "academic standing" prerequisite--for example, "senior standing"-- requires that students have the class standing stated, in the example, only seniors can take that class.

Adding Courses

Students may add courses during the first week of a sixteen-week semester. Students with specific academic holds may be required to obtain approval from their advisor to change their schedule. Students may not add courses without instructor approval after the first week of class of a sixteen-week semester, the first four days of class of an eight-week session, or the first three days of class of a four-week session. Students are responsible for any content or assignments missed if they add a course after it has already met.

Dropping Courses

Courses may be dropped in MyView, without faculty approval and without receiving a grade, through the fourth week of classes of a sixteen-week semester, the second week of classes of an eight-week session and the first week of classes of a four-week session. Students with specific academic holds may be required to obtain approval from their advisor to change their schedule. Semester and session calendars posted on the registrar's website include specific deadline dates for dropping courses. Students who officially drop any of their classes may have fees reassessed and/or refunded based on the current fee reassessment schedule posted on the cashier's website. Courses dropped during this period will not appear on transcripts.

From the 5th week to the end of the 8th week of a sixteen-week semester, students may continue to drop courses in MyView without instructor approval. A grade of "EX" (excused) will be issued on the transcript. Refer to the calendar posted on the registrar's website for summer or winter session withdrawal deadlines. From the 9th week to the end of the 12th week dropping courses will require instructor approval. Students receiving approval to drop during this period will be issued either an EX, or "EX-F" (excused but failing) if the student was failing at the time of dropping. The EX and EX-F grades will be posted to transcripts, but neither one will be used in calculating the GPA. Students who wish to withdraw after the end of the 12th week must provide documentation of exigent circumstance and receive both the instructor's permission and approval of the dean.

Dropping or withdrawing from a course may adversely impact scholarships, financial aid, and progress toward graduation. Students are strongly urged to discuss these possibilities with the financial aid office and their academic advisors before dropping or withdrawing.

Students registered in a course in which they fail to meet a minimal level of participation as deemed by the instructor will be issued a grade of "FN" (Failure, Non-participation). The FN grade indicates that the student is not regularly attending class or is making little or no attempts on assignments or activities and may be violating the terms of financial assistance. This grade is equivalent to an F for GPA calculations.

Section Changing

Section changing is normally completed during the first week of a regular semester, the first four days of an eight-week session and the first three days of a four-week session. Approvals may not be necessary during this time. However, after the first week of a regular semester, the first four days of an eight-week session, and the first three days of a four-week session, a section change form must be obtained from the department or dean's office. The signature of both instructors is required. The form is to be submitted to the Registration Office, 269 Millennium Student Center.

Withdrawing from the University after Classes Begin

Students are required to complete the necessary procedures to officially withdraw from the University including completing the withdrawal survey (https://apps.umsi.edu/webapps/ITS/withdrawal_survey/login.cfm) and the drop process for all classes in which they are enrolled. Students may withdraw without receiving grades, through the fourth week of classes of a sixteen-week semester, the second week of classes of an eight-week session and the first week of classes of a four-week session. Students who officially drop any of their classes may have fees reassessed and/or refunded based on the current fee reassessment schedule posted on the

cashier's website. Courses of students that withdraw during this period will not appear on transcripts.

From the 5th week to the end of the 8th week of a sixteen-week semester, students that withdraw from the university will be issued a grade of "EX" (excused) for each of their courses on the transcript. From the 9th week to the end of the 12th week withdrawal will require instructor approval for each course. Students receiving approval to withdraw during this period will be issued either an EX, or "EX-F" (excused but failing) if the student was failing at the time of dropping. The EX and EX-F grades will be posted to transcripts, but neither one will be used in calculating the GPA. Students who wish to withdraw after the end of the 12th week must provide documentation of exigent circumstance and receive both the instructor's permission and approval of the dean.

Withdrawing from a course may adversely impact scholarships, financial aid, and progress toward graduation. Students are strongly urged to discuss these possibilities with the financial aid office and their academic advisors before withdrawing.

No partial credit is granted to students who withdraw from school during any semester or otherwise fail to complete the work required for full course credit. Students who stop attending classes without officially withdrawing from the university are issued an F or an FN grade. Both F and FN grades are counted in computing grade point averages. Fall, spring, and summer session calendars list specific withdrawal dates.

Repeating Courses.

Students may not repeat for grade point average or credit hour purposes courses in which grades of A, A--, B+, B, B--, C+, or C have been earned. Subsequent grades in such a course that is repeated will not be included in the GPA calculations. The course hours will be counted only once in calculating hours toward a degree.

Grade Modification

When the grade received in an initial attempt in a course at UMSL is a C-, D+, D, D--, F, or FN, the grade may be replaced in the calculation of the GPA by the grade received in a second or subsequent attempt of the same course at UMSL. All grades received in second and subsequent attempts will be included in GPA calculations. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that states that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated and grade modified.

Note: Grade modification is not automatic. After completing the second or subsequent attempt of the course to be modified, students must process the necessary paperwork with an academic adviser in the academic unit in which the student is currently enrolled.

Academic Probation and Suspension

Students whose campus cumulative grade point average falls below 2.0 will be placed on University Academic Probation. Notification of probationary status will be sent to students each fall and spring term from the Office of Academic Affairs. Students placed on academic probation are restricted to a maximum of 12 credits for the following semester and required to meet with an academic advisor. Students placed on academic probation may also be required to participate in programs designed to help them return to good academic standing. Students whose campus cumulative GPA falls under 2.0 after serving two semesters on probation (not necessarily consecutive) will be suspended from the university.

Students should consult with their respective dean's office for additional information.

Students who earn a grade point average of 0.0 in their first semester at UMSL will be suspended.

Students suspended from one school or college within the university shall not be admitted to any other school or college until they are eligible for readmission to the university. In order for suspended students to be considered for readmission to the university they must successfully complete at least one semester at an accredited post-secondary institution.

Attendance

Students are expected to attend class regularly, and, in accordance with the UMSL Bylaws, faculty may establish penalties for excessive absences. Students absent for more than three successive classes may be reported to the dean. Students should tell their dean's office of an extended absence. An absence known in advance should be reported to the instructors of courses that will be missed. Makeup of examinations or work missed is allowed at the instructor's discretion. Students excused from class for valid reasons by their deans shall be permitted, if possible, to make up work missed; the dean must have notified the instructor in writing.

Auditor

Students may enroll as auditors in any course with the prior consent of the instructor and dean of the college in which the auditors desire to be registered. They may be dropped from the course when, in the judgment of the instructor and dean, their record justifies such action. Auditors are charged full fees and receive no academic credit.

Course Numbering

Each course bears a distinguishing number that identifies it within the department or academic unit and indicates, broadly, the expected level of students taking the course. To understand the course level, refer to the following guidelines:

Course Numbers

Explanation

1-999

Courses that do not count toward the minimum requirements for any degree.

Lower Division:

1000-1999

Courses open to undergraduate students, primarily focused toward freshmen; courses count toward the minimum for given degrees.

2000-2999

Courses open to undergraduate students, primarily focused toward sophomores; courses count toward the minimum for given degrees

Upper Division:

3000-3999

Courses open to undergraduate students, primarily focused toward junior; courses count toward the minimum for given degrees.

4000-4999

Courses open to undergraduate and graduate students, primarily focused toward seniors; courses count toward the minimum for given undergraduate degrees; depending on the specific program, courses may count for a given graduate degree.

Graduate:

5000-5999

Graduate courses; also open to post-baccalaureate educator certification candidates and undergraduate seniors with permission from the Dean of the Graduate School. Courses count toward the minimum for given graduate degrees.

6000-6999

Graduate courses open to master's degree and doctoral students. Courses count toward the minimum for given graduate degrees.

7000-7999

Graduate courses open to doctoral students and master's degree students with special permission. Courses count toward the minimum for specific graduate degrees.

Optometry:

8000-8999

Courses open to optometry degree seeking students.

Credit Hours

The university credit unit is the semester hour, which represents a subject pursued one period weekly for one semester of approximately 16 weeks or for a total of approximately 16 periods for one term. Generally, a course valued at three semester hours meets for three periods weekly for one semester, a twocredit course two periods a week for a semester, and so on. Normally, the lecture or recitation period is 50 minutes long and the laboratory period one hour and 50 minutes.

The number of credit hours is listed as units in the online Schedule of Courses. If the credit is variable (to be determined in consultation with the instructor) it is shown by minimum and maximum units, such as Research 1 – 3 units. In the Bulletin, credit hours are included in parentheses after each course title e.g., Research (2-8).

Examinations

Examinations may be given only at regular class meeting times or as designated by the Senate Committee on Curriculum and Instruction.

Final Examinations.

The period designated for final examinations is an important component of the academic term. It provides faculty with a final opportunity to evaluate student learning and attainment of course objectives. Faculty members are encouraged to meet with students during the final examination period.

A faculty member who gives an in-class final examination may give this examination only on the day and at the time designated in the official final examination schedule. A majority vote of the students to the contrary does not change this policy.

A student may submit a written request for a change in the scheduled time of the final examination for a limited number of documented hardship

reasons. These reasons include, but are not limited to, being scheduled to take more than two examinations on the same day, illness, military obligations, and religious practices. Except for emergencies, this request should be presented directly to the instructor at least two weeks before classes conclude. If the request is denied, the student may request additional consideration from the chairperson/area coordinator/program director and, if denied, to the dean of the college sponsoring the course.

Repeating Courses.

Students may not repeat for grade point average or credit hour purposes courses in which grades of A, A-, B+, B, B-, C+, or C have been earned. Subsequent grades in such a course that is repeated will not be included in the GPA calculations. The course hours will be counted only once in calculating hours toward a degree.

Grading System

The grading system available to all faculty at UMSL consists of:

Letter Grade	Ranking
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D+	1.3
D	1.0
D-	0.7
F	0
FN	0
EX	Excused
EX-F	Excused but failing
DL	Delayed
FN	Failure/Non Participation

Faculty have full discretion in using full-letter grades, plus/minus grades, or any combination of full-letter and plus/minus grades. The student's grade point average is computed by dividing the total quality points (number of credit hours for a course, multiplied by the grade value received) by the number of hours taken (excluding grade modified hours). Students at UMSL may have three separate Grade Point Averages. The first is the Campus GPA, which is computed by dividing the quality points earned from the grades of each course taken through UMSL by the total course hours attempted at UMSL. Students who have attended any of the other three universities within the University of Missouri System will also have a System GPA, which is computed by dividing the quality points earned from every course taken from a campus within the UM System. In addition, transfer students from outside the UM System will also have a transfer GPA, which is computed from all courses the student has taken outside the UMSL campus or the UM System. It is calculated by dividing the quality points of all courses by the hours attempted.

Unless a specific request is made through the Registrar's Office, the University of Missouri System does not distribute grade reports to students via postal mail. Final course grades can be obtained electronically by any of the following methods:

To access grades through the My Gateway system, students must know Single Sign On (SSO) ID and password, available through MyGateway.

Students may also view their grades on MyView, by following this path: Self Service > Student Center > Grade Tab under Academic History; select semester.

Students may request a printed copy of the grade report at no charge. Once requested, the grade report will be mailed to the official address of record. Requests may be made by mail, a University e-mail account, fax, or in person; contact information is available at the Registration website.

Delayed Grade

A student whose work is incomplete at the end of any semester and who has, in the instructor's judgment, sufficient reasons for failing to complete the work, may, with the approval of the instructor, be assigned a delayed grade. If an instructor does not report a grade to the registrar within one semester the grade automatically becomes F. The dean may, in unusual circumstances, extend this time limitation (summer session is not counted as a semester).

Failure/Non participation

When students do not complete any graded assignments but do not officially withdraw from the course or the university, instructors may assign an FN. The F for Non-Participation cannot be changed to a grade and will be treated in GPA calculations as an F.

Satisfactory/Unsatisfactory Option

Undergraduate students may take up to 18 credit hours on a satisfactory/unsatisfactory (S/U) grading basis. This includes courses taken as electives or those that satisfy general education requirements. Most courses required for a specific degree may not be taken on a satisfactory/unsatisfactory basis. Academic departments may designate other courses within their jurisdiction that may not be taken under the option.

A satisfactory grade "S" is recorded when an instructor assigns the grade of A, A-, B+, B, B-, C+, C or C-, and has no numerical value in computing students' cumulative grade point average; however, it does satisfy credit-hour-for graduation requirements. An unsatisfactory grade "U" is recorded when an instructor assigns the grades of D+, D, D-, or F. A course assigned a "U" grade will not satisfy credit hours for graduation. Grades will be recorded on transcripts as S or U

Students register for courses in the normal manner and may exercise the satisfactory/unsatisfactory option before the end of the first four weeks of a regular semester (or the first two weeks of a summer session). Requests for this option are made through the appropriate dean's office. Instructors are not informed of students taking courses on a satisfactory/unsatisfactory basis until submitting course grades.

Audit

Audit has no numerical value in computing students' cumulative grade point average, nor does it satisfy any credit-hour graduation requirements.

Grade Modification

When the grade received in an initial attempt in a course at UMSL is a C-, D+, D, D-, F, or FN, the grade may be replaced in the calculation of the GPA by the grade received in a second or subsequent attempt of the same course at UMSL. All grades received in second and subsequent attempts will be included in GPA calculations. All attempts of a given course will appear on the official transcript with the grade(s) earned. The

transcript will have an explanation that states that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated and grade modified.

Note: Grade modification is not automatic. After completing the second or subsequent attempt of the course to be modified, students must process the necessary paperwork with an academic adviser in the academic unit in which the student is currently enrolled.

Academic Renewal

Academic Renewal allows all courses, credits, and grades during specific term(s) to be excluded from the GPA calculation. The courses will remain on the permanent academic record but the record will be annotated so that it is readily evident that no credits earned during those excluded terms, even if satisfactory, will apply towards units for graduation. Students seeking their first degree who return to UMSL after an absence of at least 12 months may apply for Academic Renewal for semesters completed prior to their absence after re-admission and successful completion of 12 credit hours at a 2.0 GPA or better. Recipients of Academic Renewals are not eligible for Latin Honors or academic awards. Applications for Academic Renewal must be completed with an academic advisor and will require evidence of likelihood of future academic success to receive dean's approval. A student may be granted Academic Renewal only once in their academic career at UMSL.

The implementation of this policy will follow the general procedures listed below. Students must apply for the renewal and demonstrate academic success in twelve credit hours before the renewal is granted.

Non-enrolled students:

1. Students not enrolled will have to discuss Academic Renewal with an academic advisor and may apply for Academic Renewal in the dean's office of the college of students' major or College of Arts & Science for those undeclared.
2. Students should follow normal procedures for re-admission. Students denied re-admission, but eligible for academic renewal, should discuss their case with an enrollment advisor.
3. Students may be accepted for re-admission on probationary status.
4. After earning 12 credit hours in their major or in required classes with at least a 2.0 GPA, students complete the Academic Renewal process by requesting approval of the dean or designee.

Enrolled students:

1. Continuing students may initiate the Academic Renewal process by conferring with their advisor about the impact of the process on their graduation plans.
2. Implications of Academic Renewal on financial aid should also be discussed with Financial Aid office staff.
3. Should continuing students wish to pursue the Academic Renewal process, they may apply in the dean's office of the college of students' major or College of Arts & Science for those undeclared.

Dean's List

At the end of each semester the College of Arts and Sciences, College of Business Administration, College of Education, College of Fine Arts and Communication, and College of Nursing send letters of commendation to undergraduates completing at least nine hours of graded courses with grade point averages of 3.2 or above for the semester. In addition, each college and school, on an annual basis, sends letters of commendation to parttime undergraduate students who have earned a 3.2 grade point

average or above in at least nine but not more than 17 graded hours during the fall and spring semesters combined.

Degree with Distinction in Research, Scholarship or Creativity in the Arts

Guidelines:

A degree with distinction in research, scholarship or creativity in the arts is an honor that recognizes a student for outstanding accomplishments in research and/or other creative endeavors. Students majoring in any undergraduate degree program that have obtained a minimum of 75 credits, have begun research, scholarship or creative endeavors of exceptional quality, have a minimum GPA of 3.5, and have a faculty mentor may apply for candidacy during their final year before graduation. Candidates must produce a novel body of work that includes publication-quality research data from which to generate a senior thesis or a body of artistic accomplishments that can be displayed and/or presented (exhibitions, recitals, software demonstrations, etc.) as part of an exhibition or performance. Candidates may use research or accomplishments obtained through Independent Research or Study courses, fellowships, internships, and voluntary work toward the degree with distinction. Candidates must present and successfully defend their body of original work, project, or senior thesis to a faculty review committee.

The faculty review committee will consist of the faculty mentor and at least two faculty members who work within a relevant field of study and are qualified to examine the candidate's body of work. Mentors will identify at least two faculty members who are an appropriate fit and are willing to serve on the committee. These recommendations should be included on the application for candidacy. Interested students must submit an application for candidacy to their departmental chairperson or program director at least one semester before graduation, and the candidates must successfully defend or present their work no later than six weeks before the end of the semester in which they graduate. The specific criteria for achieving this distinction will be provided by each department or program.

Students awarded the Distinction designation will have such an acknowledgment placed on their transcript and their degree and will be so recognized at graduation.

Sequence for completion:

1. Find an UMSL faculty mentor willing to guide or accommodate you through your specific creative works. For some disciplines, potential mentors may require students to enroll in independent research or independent studies courses.
2. Begin or continue your research or creative works.
3. Apply for candidacy once you have earned 75 credit hours.
4. Fulfill the requirements for your discipline's senior thesis (if required by your discipline).
5. Maintain a GPA of 3.5 or higher.
6. Defend your thesis or body of work and submit the Preliminary Approval for the Degree with Distinction form to your College Dean no later than 6 weeks prior to commencement.
7. Graduate with a Degree With Distinction.

Latin Honors

To graduate with Latin honors, students must have attended UMSL for at least 56 graded hours and must meet the following qualifications based on the college in which a student's major is housed: a GPA in the top 3% for summa cum laude; a GPA in the next top 5% for magna cum laude; a

GPA in the next top 12% for cum laude. Ranking of GPAs is based on a five-year rolling average of all GPAs for the College in which the student's major is housed. Qualifying GPAs are determined each academic year based on a five-year rolling average of all GPAs for graduates of the college in which the student's major is housed. Specific Latin honors GPA cutoffs for each college are posted under "General Information" or "Undergraduate Study" in the Bulletin listing for that college. If a student has the necessary GPA at UMSL to qualify for Latin honors but has fewer than 56 graded hours at UMSL, all credit hours and the associated grades earned within the UM System will be included when the total credit hours earned in the UM System are at least 80 graded hours. In determining one's eligibility for Latin honors, all UM System graded hours will be considered, including the original grade in each grade-modified course. No Latin honor higher than that which is consistent with the UMSL grade point average will be awarded. All honors must be recommended by the student's major department. Students who have been found to have committed an act or acts of academic dishonesty as verified by Academic Affairs are not eligible for a Latin Honor.

Each College may add additional qualifications on the awarding of Latin Honors such as community service, capstone course completion (including approved relevant thesis), original research or scholarship, etc. Each College will submit their plans for the qualifications for Latin Honors to the appropriate shared governance body for approval before their plan becomes active.

Office of National Scholarship Information

The mission of the Office of National Scholarship Information (ONSI) at the University of Missouri-St Louis is to provide campus wide access to merit-based scholarship information and opportunities. The most well-known of these merit-based scholarships include the Rhodes, British Marshall, Goldwater, Udall, Truman, and Fulbright, although numerous other prestigious, and often unique, opportunities exist for outstanding students. For further information, contact the Honors College at (314) 516-5243.

Admission

Admission policies and procedures vary according to each applicant's educational goals and prior educational experiences. This section contains information for First-Time Freshmen, Transfer Students, Returning UMSL Students, Visiting Students, Non-Degree Students, and UMSL Express for senior citizens. The Office of Admissions website contains links to applications for all categories of applicants.

Admission for First-Time Freshmen

The University of Missouri System has a uniform policy for admission of freshman students to its four campuses. The procedure for regular admission from high school is based on high school class rank, performance on a standardized college aptitude test, and required high school units.

Application Procedures

Students applying as first-time freshmen (i.e., students applying directly from high school) need to submit the following:

1. A completed Undergraduate Application
 - Application information available from the Office of Admissions website, by phone 314-516-5451, email admissions@umsl.edu, or in person (351 Millennium Student Center). Students may also

apply using the Common Application (<http://www.commonapp.org/explore-colleges>). Search for "University of Missouri-St Louis".

2. Application Fee of \$35.00 (\$40.00 for international students) may be paid by:
 - A check or money order made payable to UMSL
 - A credit card during the online application procedure
 - Cash, check, or credit card by appearing in person at the Office of Admissions in 351 Millennium Student Center.
3. High School Transcript and Class Rank.
 - A transcript must be sent directly from your high school to the UMSL Office of Admissions. The transcript should indicate class rank (for schools that rank), all coursework, and, when available, date of graduation. College aptitude test scores are required and may be submitted via this transcript or directly from the testing agency
 - Students from Non-Ranking High Schools: Students applying for Undergraduate Admission who attend high schools that do not rank will be evaluated on a combination of high school grade point average in the required core courses and standardized test scores.
4. College Aptitude Test
 - Freshman admission requires that a test score be submitted from one of the following:
 - American College Testing Program (ACT): The ACT is administered at many locations across the country. Information is available from <http://www.actstudent.org/>, or your high school counselor. The ACT School Code for UMSL is 2383.
 - Scholastic Aptitude Test (SAT): The SAT is administered at many locations across the country. Testing information is available on the Collegeboard website. The SAT School Code for UMSL is **6889**.

When to Apply

Qualified applicants are admitted and notified by letter of their admission in the order that completed applications are received. Applications for the upcoming Fall semester are processed beginning September 1 on the basis of six or more high school semesters.

Admission Requirements

Any high school graduate may be admitted with evidence indicating he or she meets the following requirements:

At least 17 units of credit (One unit=one year in class) as follows:

- English: Four units. Two units emphasizing composition or writing skills. One of the remaining two units may be in speech or debate
- Mathematics: Four units (Algebra 1 and higher)
- Science: Three units not including general science, one of the three units must be a laboratory course
- Social Studies: Three units
- Fine Arts: One unit
- Foreign Language: Two units of a single foreign language
- Math and foreign language units may be accepted from middle/junior high school.

In addition to the 17-unit requirement, each applicant will be evaluated on high school rank and test score (ACT or SAT). Applicants with an ACT composite score of 24 or higher, SAT Total (CR+M) of 1090 or higher, or

redesigned SAT of 1160 or higher, will be admitted without regard to class rank.

If the ACT Composite score is between 17 to 23, SAT Total (Critical Reading and Math scores) is between 820 to 1080, or the redesigned SAT Total is between 900 to 1150, the applicant must meet the following high school class rank requirement or core GPA to qualify for admission.

ACT	Combined SAT Reading & Math (Pre-March 2016)	Redesigned SAT (Post-March 2016)	High School Class Percentile Rank	Core GPA
23	1050-1080	1130-1150	48	2.8
22	1020-1040	1100-1120	54	2.90
21	980-1010	1060-1090	62	3.05
20	940-970	1020-1050	69	3.20
19	900-930	980-1010	78	3.35
18	860-890	940-970	86	3.50
17	820-850	900-930	94	3.65

Automatic Admission

Applicants who:

1. Rank in the top 10% of the graduating class of a Missouri high school; and
2. Complete the college preparatory curriculum, which includes at least 17 units of credit (four units each of English and math, three units of social studies, two units of a single foreign language, and one unit of fine art); and
3. Submit an ACT/SAT score.

WILL be eligible for automatic admission to any campus of the University of Missouri. **Students with an ACT composite score under 18, a SAT total (CR+M) less than 860, or a redesigned SAT below 940, may be required to participate in the Learning Enrichment for Academic Performance (LEAP) program.*

Admission Appeals

Applicants who do not meet the minimum admissions criteria may still be admitted, depending on evidence of likely success and campus enrollment objectives.

Additional factors considered for admission may include:

- Completion of a rigorous college preparatory curriculum
- Evidence of hardship or unusual circumstances that hindered academic performance
- Significant work experience and/or family responsibilities
- Improvement over time in high school academic record.

Students who fall short of the admission criteria have the option to submit a letter of appeal to address one or more of the factors above. The appeal letter should be addressed to the Admissions Appeals Committee, and additional letters of support are encouraged from teachers, counselors, or principals.

For additional information regarding admission requirements, contact the Office of Admissions at 314-516-5451 or by e-mail at admissions@umsl.edu.

Acceptance

Upon graduation, applicants must submit a final high school transcript indicating their class rank (if available) and graduation date (sent directly from the high school). First-time freshmen are required to take the ALEKS placement assessment in mathematics.

Advanced Standing for Entering Freshmen

UMSL grants credit hours to entering freshmen who, through their performance on College Board Advanced Placement Tests and faculty-administered tests, demonstrate proficiency in certain college-level courses such as biology, chemistry, English, foreign languages, history, mathematics, political science, and physics. For further information and applications, contact College Board Placement AP Services by phone (888) 225-5427 or email apexams@info.collegeboard.org. The score-reporting institution code number for the University of Missouri-St. Louis is 6889. College Board will send the scores directly to the Director of Admissions.

Dual Credit

Accredited programs such as the Advanced Credit Program at the University of Missouri-St. Louis enable qualified high school juniors and seniors the opportunity to earn college credits while completing high school. Further information about the Advanced Credit Program may be obtained online or by calling 314-516-7005.

Dual High School/University Enrollment

Superior high school students may be admitted in a special student category to take one or more university courses on campus during their junior or senior years of high school or during the summers. Students must submit a dual enrollment application and a recommendation from the counselor or principal. Students are admitted on the evidence of academic excellence. Admission is limited and governed by available space, and students must meet the prerequisites for the course or courses selected. After reviewing the Dual Enrollment website, students or counselors may contact the College of Arts and Sciences at 314-516-5501 for more information.

College Level Examination Program

Applicants may earn advanced credit through the College Level Examination Program (CLEP). CLEP offers subject examinations for credit in specific areas. These examinations can be taken any time, provided the student has not taken a college credit course in the test area. Consultation with an UMSL advisor is highly recommended before taking an exam. CLEP tests are given in the Campus Testing Center by appointment only. Contact the Campus Testing Center at 314-516-6396, in person in 93 JCP, or through their website.

Credit for Military Service

Credit may be allowed for service training programs conducted by the various Armed Forces branches. The American Council of Education's recommendations in A Guide to the Evaluation of Educational Experiences in the Armed Services generally serve as a basis for granting such credit. To count toward a degree, the credit granted must be appropriate to the student's curriculum.

For more information, please visit <http://www.umsl.edu/veterans/admissions-checklist/Military-Academic-Credit.html>.

Probationary Admission

It may be possible for applicants who do not meet the regular admission standards to be admitted on a trial basis. Applicants who do not meet minimum admission requirements can submit a letter of appeal to request probationary admission. The Admission Appeals Committee reviews each letter of appeal and makes decisions on a case-by-case basis.

High School Equivalency Applicants

Individuals may seek admission on the basis of passing the High School Equivalency (HiSET) test, formerly the General Education Development (GED) test, with a minimum HiSET score of 75 and a minimum of 15 in each of the five subsets; Language Arts-Reading, Language Arts-Writing, Mathematics, Science, and Social Studies or a GED score of 170 or higher if taken after January 1, 2014 (minimum 2500 for tests taken between January 1, 2002 and January 1, 2014; minimum score of 250 required for tests taken prior to January 1, 2002).

In addition, the following must be submitted:

- A completed Undergraduate Application
- A \$35 non-refundable Application Fee (\$40 for international students)
- ACT composite score of at least 24 or SAT Composite of at least 1090
- A high school transcript if ACT/SAT scores are included on the transcript.

Home-Schooled Students

UMSL welcomes home-schooled students. To be admitted for undergraduate admission, home-schooled applicants must present the following:

- A completed Undergraduate Application (available online)
- A \$35 non-refundable Application Fee (\$40 for international students)
- ACT Composite score of 17-23 or SAT Composite of 820-1090 or redesigned SAT of 900-1150
- A copy of course of study or transcript reflecting all coursework and grades earned, as well as a statement and date of graduation or completion.

If the home-schooled applicant has not completed all units required for graduation (completion), a test-score report of the High School Equivalency (HiSET) test, formerly the General Education Development (GED) test, with a minimum HiSET score of 75 and a minimum of 15 in each of the five subsets; Language Arts-Reading, Language Arts-Writing, Mathematics, Science, and Social Studies or a GED score of 2500 (for tests taken after January 1, 2002; minimum score of 250 required for tests taken prior to January 1, 2002).

Admission Information for Prospective Students With Prior College Credit

UMSL values transfer students, defined as a student transferring from another college or university with at least 24 earned semester hours of college-level work.

A transferring student who has completed fewer than 24 hours must apply under the procedures for admission to the freshman class with the additional requirement that they submit official transcripts from all college-level courses attempted at previous institutions that document at least a 2.3 GPA.

Students transferring from other colleges and universities with at least 24 hours must submit the following information:

- A completed online Undergraduate Application
- A \$35 non-refundable Application Fee (\$40 for international students)
- Official transcripts from all colleges/universities attended. Hand-carried credentials are not accepted.

All credentials submitted for admission become the property of the University.

Suspended and Dismissed Transfer Students

It is the practice of the Office of Admissions at the University of Missouri-St. Louis to uphold any suspension or dismissal decision offered to a student from another institution. Students suspended will be required to sit out for one year from the date of suspension before enrolling in UMSL. In addition, students must still meet the minimum admission requirements of a 2.3 GPA. A student may need to attend another institution in order to increase his/her GPA. Students who have been dismissed from another institution may not enroll at the University.

Students who have been dismissed from a specific college or school within another institution will need to show proof that they are eligible to enroll and/or are back in good standing at the previous institution in order to enroll with UMSL.

Additionally, students who are suspended/dismissed from another UM institution shall not be admissible until after one year from the date of the suspension/dismissal. Even though a student is removed from suspension, the student must still meet the minimum admission requirements of a 2.3 GPA.

Missouri State Transfer Agreement.

Although transfer students should be aware that requirements for degrees vary from institution to institution, some transferred credits may not apply to UMSL programs, UMSL has attempted to minimize the loss of credits by adhering to the Missouri Coordinating Board of Higher Education (CBHE) Articulation Agreement. The agreement outlines statewide undergraduate general education requirements that satisfy the general requirements for students transferring into UMSL and students transferring out of UMSL to other public universities in the state.

UMSL requires mathematics and writing proficiency beyond the general requirements in the CBHE Statement. Please refer to the General Education requirements for details.

Transfer Credit

The articulation agreement among public institutions within the state of Missouri governs transfer of credit to UMSL from colleges and universities within the state of Missouri. These guidelines also apply to students transferring to UMSL from schools located outside Missouri. Advanced standing in the form of credit hours may be allowed for work satisfactorily completed in another public or private college or university of recognized standing located in the state of Missouri, as long as the work satisfies the requirements of the student's major.

The transcript at each institution includes all courses attempted. Grades of D or better earned in college-level work at an accredited or approved institution of higher education should receive full credit when transferred to UMSL. The University, however, will treat all grades on courses attempted on the same basis as that of a UMSL student. For example, if a program requires a UMSL student to repeat a specified course having earned a D

grade, a transfer student will also be required to repeat the same course if it carries a D grade.

To maximize transfer credits from community colleges, UMSL has transfer guides and articulation agreements with area colleges. Should community college students have any question about the transferability of courses not in the articulation agreement, they should contact the appropriate Transfer Coordinator, preferably prior to taking a course.

Advanced Standing

Advanced standing includes credit by examination, examination that may or may not appear on a transfer student's transcripts, including College Board Advanced Placement (AP), the College-Level Examination Program (CLEP), International Baccalaureate (IB), and Defense Activity for Non-Traditional Education Support (DANTES). It also includes credit by portfolio review (Bachelor of Fine Arts only). These lower-division credits may not apply at the senior level. For examination credit, students should submit appropriate verification documents to the Office of Admissions before their first semester at UMSL. Students interested in the portfolio review should contact the Art Department. Early attention to these matters is essential to avoid unnecessary course work or repeats that can lead to loss of credit. If examinations are completed at a later date, verification documents should be submitted as soon as they are available.

Shortly after all official transcripts and other verifications are on file, students' previous academic records are evaluated to determine which courses are applicable, and students receive a written report of the results. Degree checks determining whether courses meet a specific degree requirement and whether courses are accepted as a part of the student's academic major are made in the office of the appropriate dean or advisor. Should there be any question concerning applicability of any courses, students should discuss this with that advisor.

Associate Degree Transfers from Community Colleges

A student admitted to the university and holding an associate degree (2.0 GPA or higher) applicable toward the baccalaureate degree will be accepted in junior standing. Students fulfilling the general education requirements outlined by the Missouri Coordinating Board of Higher Education and certified by the sending institution will have met the lower division general education requirements at UMSL. Students with AA degrees from Missouri institutions that include a CBHE approved general education core may transfer more than 64 credit hours for lower division courses. Any additional lower division course credits above 64 credit hours must be applicable to the baccalaureate degree or must be a prerequisite for an upper division course in the major. However, this does not exempt the student from meeting specialized lower-division degree requirements of specific departments. Courses completed in the associate degree program are evaluated for application to specific degree requirements by the same criteria used for transfer students from other colleges and universities.

Transfers Within the University of Missouri System.

Students must be in good standing at another campus of the University of Missouri to be eligible for admission. Students not in good standing will not be admissible until after one year from the date of the suspension/dismissal. Students must meet the minimum admission requirements of a 2.3 GPA.

Any course that leads to an undergraduate degree on any campus of the University of Missouri shall be accepted in transfer toward the same degree on any campus of the university offering that degree. Grades, including D and F grades, and honor points earned in such courses will also transfer and will be included in the cumulative grade point averages. Unresolved problems related to transferability of credit may be appealed to the office of the appropriate dean.

Students within the last 30 hours of graduation may take a limited number of courses at another campus in the UM system, provided the last 15 hours are taken at UMSL and the work is approved by their respective dean and department.

Metropolitan Rate

Starting in 2017-18, all undergraduate domestic students who live in the state of Illinois will pay the equivalent to the in-state rate. Undergraduate applications from students who live in Illinois are reviewed for eligibility automatically. No additional application is required.

Graduate applicants from the following Illinois counties will pay the equivalent to the in-state rate: Adams, Bond, Calhoun, Christian, Clinton, Greene, Jackson, Jefferson, Jersey, Macoupin, Madison, Marion, Monroe, Montgomery, Morgan, Pike, Randolph, Sangamon, Scott, St. Clair, Washington, and Williamson. Graduate applications from students who live in these select Illinois counties are reviewed for eligibility automatically. No additional application is required.

For more information visit <http://www.umsi.edu/admissions/costs/metro.html>.

Midwest Student Exchange

The Midwest Student Exchange Program is an initiative designed by the Midwestern Higher Education Commission to increase interstate educational opportunities for students in its member states. The program enables residents of Illinois, Indiana, Kansas, Michigan, Minnesota, Missouri, Ohio, Nebraska, North Dakota, and Wisconsin to enroll in the institutions and specified programs located outside their home state at reduced tuition levels. Contact Admissions for more information.

Students from Other Countries

Prospective students living outside the United States and its possessions should contact the Office of International Student and Scholar Services (below) at least one year before the date of desired admission for information about application to the university. Applicants will be expected to supply official original secondary and college/university transcripts from all schools attended as well as other official original documents. International students must also pay a \$40 application fee. All students should make arrangements to take the Test of English as a Foreign Language (TOEFL) well in advance of their admission date.

Since 1998, all students in F-1 and J-1 status have been required to purchase an inexpensive insurance policy with coverage for illness and accidents, billed to the student's UMSL account. For details contact:

Office of International Student and Scholar Services

261 Student Millennium Center
One University Boulevard
St. Louis, MO 63121-4400
Phone: 314-516-5229
Email: iss@umsi.edu

Or visit the Office of International Students website.

*The residency rules will be changing as of July 30, 2017. If you will be attending after this date, please be sure to review the new rules as the changes may allow your status to be changed to Missouri resident.

Returning UMSL Students

Students wishing to return to the University will be required to complete a returning student application and provide official transcripts from other colleges and universities attended since last enrolled as a UMSL student. Students returning must have a minimum 2.0 cumulative GPA. Students who have below a 2.0 GPA from UMSL will be required to work with the Office of Student Retention Services.

The returning student application is available on-line, in person at 351 Millennium Student Center, or by calling the Office of Admissions at 314-516-5451.

Admission for Students Not Seeking an UMSL Degree

Visiting Students

A visiting student is one who has completed at least one semester at another institution and plans to return to that college or university after attending UMSL. To qualify as a visiting student, applicants must be an actively enrolled student at another college or university. Visiting student applications are available on-line. No application fee required. Transcripts are not required for visiting students. At the end of the session, students must request that their grades be reported by transcript to their respective schools. Financial aid is not available for visiting students.

Non-Degree-Seeking Students

A non-degree-seeking student is someone interested in taking classes but not wanting a degree from UMSL. Often these are students who have degrees but want to take additional undergraduate classes for personal or professional development. To become a non-degree-seeking student, applicants complete the application for admission and mark "non-degree-seeking." No application fee is required.

Students wishing to become degree-seeking must meet the minimum transfer student requirements of 24 transferable, college-credit hours at a 2.3 GPA. Students may not switch from non-degree to degree-seeking after the first four weeks of the semester.

The non-degree application is available on-line, in person at 351 Millennium Student Center, or by calling 314-516-5451. Financial aid is not available for non-degree seeking students.

UMSL Express

UMSL Express provides Missouri's senior citizens (65 and older) easy access to undergraduate courses without limit on an audit (not for credit) space-available basis. Graduate courses are not available through this program. Students are subject to: non-refundable \$25 registration fee, a parking fee, and course-related fees. Former UMSL Express students who reapply for the program must again pay the registration fee. UMSL Express applicants may obtain a registration form on-line, in person at 269 Millennium Student Center, or by calling 314-516-5545. Students should complete and return the form with proof of age to the Office of the Registrar on the day before classes are scheduled to begin.

4 Year Plan of Study

By graduating in four years, students can reduce tuition costs and accelerate entry into the job market or advanced education compared to students who take longer to graduate.

To assist students in creating their own personal four-year academic plan, templates are provided for all BA, BFA, BM, BS, BSN, and BSW programs on the tabs above.

Through careful planning with an academic advisor, students can complement their undergraduate degree with minors or certificates and experiences such as study abroad, internships, and service learning.

Sample Four Year Plans

Actuarial Science (p. 51)

- Bachelor of Science (p. 51)

Anthropology (p. 56)

- Bachelor of Arts (p. 56)

Biochemistry & Biotechnology (p. 67)

- Bachelor of Science (p. 67)

Biology (p. 84)

Sample Four Year Plan

Bachelor of Social Work (p. 620)

Graduate Study

The Graduate Faculty sets Graduate School policies in the Bulletin. Students should be aware that their programs might have rules and policies that are above these minimum university-wide requirements.

Course Schedules

The Schedule of Courses contains the specific courses offered each semester with their meeting times and locations. This schedule is available online

Course schedules are generally published in mid-March for the fall semester, mid-October for the spring semester, and mid-January for the summer semester.

The university reserves the right to cancel without notice any course listed in the Bulletin or the Schedule of Courses for any semester or to withdraw any course that that does not have adequate enrollment.

Registration

Newly admitted/re-admitted students are eligible to register after the close of the pre-registration period. Enrollment dates, Semester Calendars, and courses offerings can be found online at the Registration website.

Registering for Classes: Currently Enrolled Students

Currently enrolled students are given the opportunity to preregister, by appointment, before new or returning students. Pre-registration appointment times are sent to students' university email and can also be found by logging into MyView.

Registering for Classes: Former Students

Former UMSL students who have not been enrolled for a year must submit a reenrollment application.

Registration Cancellation

Students who have enrolled but do not wish to attend the university may cancel their registration any time before the first day of the semester. Students must complete a withdrawal survey online. Cancellations may be processed at the Office of the Registrar.

Students may withdraw from school beginning the first day of classes. The refund schedule for withdrawals after class work begins can be found on the Cashier's Office website. Students who are withdrawing must complete a withdrawal survey. Withdrawals may be processed at the Office of the Registrar.

Prerequisites for a Course

Students are expected to review all courses when registering for them to assure that they meet all prerequisites. When the prerequisites include courses, a minimum grade of B- is required to meet the prerequisite. Only the department offering the course with the prerequisite can make an exception to this requirement. A course with an "academic standing" prerequisite--for example, "senior standing"-- requires that students have the class standing stated, in the example, only seniors can take that class.

Section Changing

Section changing is normally completed during the first week of a regular semester, the first four days of an eight-week session and the first three days of a four-week session. Approvals may not be necessary during this time. However, after the first week of a regular semester, the first four days of an eight-week session, and the first three days of a four-week session, a section change form must be obtained from the department or dean's office. The signature of both instructors is required. The form is to be submitted to the Registration Office, 269 Millennium Student Center

Attendance

Students are expected to attend class regularly, and, in accordance with the UMSL Bylaws, faculty may establish penalties for excessive absences. Students absent for more than three successive classes may be reported to the dean. Students should tell their dean's office of an extended absence. An absence known in advance should be reported to the instructors of courses that will be missed. Makeup of examinations or work missed is allowed at the instructor's discretion. Students excused from class for valid reasons by their deans shall be permitted, if possible, to make up work missed; the dean must have notified the instructor in writing.

Auditor

Students may enroll as auditors in any course with the prior consent of the instructor and dean of the college in which the auditors desire to be registered. They may be dropped from the course when, in the judgment of the instructor and dean, their record justifies such action. Auditors are charged full fees and receive no academic credit.

Admissions

The University of Missouri-St. Louis admits qualified individuals to study for graduate degrees and certificates. Students with a bachelor's degree or the equivalent from an accredited college or university may apply for admission to the Graduate School. Applicants may be denied admission if:

1. they do not meet admission standards,
2. there are no available openings, or
3. applications are incomplete at the time of the decision.

Application procedures are described on the Graduate School's Web site.

To receive graduate credit at the University of Missouri-St. Louis, students must have been admitted to the Graduate School as a Degree-seeking, Graduate Certificate, or Non-Degree seeking (or Lifelong Learner) student before registering for classes.

Degree-Seeking or Graduate Certificate Students

Applicants for a degree or graduate certificate program at the University of Missouri-St. Louis submit an application, official transcript documenting the baccalaureate degree and all other prior coursework, scores from examinations required by the program, and other evidence of academic and professional preparation required by the program. Such evidence may include standardized test results, letters of recommendation, transcripts of all academic work attempted, and writing samples.

When there are openings for new students, applicants are normally admitted given official evidence of:

1. a baccalaureate or advanced degree from an accredited institution of higher education,
2. an undergraduate grade point average (GPA) and major field GPA of at least 2.75,
3. an acceptable score on each requisite examination, and
4. satisfactory additional materials required by the particular program.

The dean of the Graduate School makes the final decision on applications, based on recommendations from the program.

Non-Degree-Seeking Student

Applicants may seek status as Non-Degree-seeking graduate students if they are visiting students, they do not intend to pursue a degree, or they want to participate in graduate workshops or institutes. Applicants must provide an official transcript showing completion of a baccalaureate or higher degree, with a GPA of at least 2.5.

The dean of the Graduate School admits Non-Degree-seeking students only upon recommendation of the program.

A Non-Degree student must maintain a GPA of at least 3.00.

Course work completed by Non-Degree students is not regarded as work toward a degree program. Therefore, Non-Degree students are not eligible for federal financial aid. Should a Non-Degree student apply for Degree-Seeking status and be admitted to the program the maximum hours of Non-Degree status work that can be applied to a degree program is nine semester hours. A Non-Degree student wishing to take more than nine hours may be allowed to do so contingent upon departmental recommendation. No credits taken as Non-Degree status may count as part of the residence requirement for a degree.

Non-Degree Education Certification students are exempt from the nine-hour limitation on non-degree courses because they take courses for State Department of Education certification. However, all other conditions regarding admission and registration that apply to Non-Degree students apply to Education Certification students.

Students wishing to change from Non-Degree to Degree-seeking must submit a new graduate application for review and approval by the program and the dean of the Graduate School.

Graduate Study for Lifelong Learning

Lifelong learners often want to take graduate courses without enrolling in a specific program. They may want to prepare for admission to a graduate degree program at UMSL or elsewhere, explore a new discipline, take courses, workshops, or institutes for career advancement, or simply undertake personal enrichment experiences. Status as a Non-Degree Graduate Lifelong Learner, or graduate post-baccalaureate, allows students such flexibility. A Non-Degree Graduate Lifelong Learner has access not only to some graduate and undergraduate classes but also UMSL's libraries, laboratories, recreational facilities, etc.

Since graduate programs may limit the availability of their courses to students without full admission to their program, prospective Non-Degree Graduate Lifelong Learner should check the Bulletin for course prerequisites. The graduate program director in which they wish to take courses can give prospective students more information. Programs and directors are listed online.

The Non-Degree Graduate Lifelong Learner program is administered by the Graduate School, which normally seeks approval from the unit before admitting students.

If a Non-Degree Graduate Lifelong Learner is later accepted to a graduate program, up to 12 hours of credit taken as a non-degree graduate student may be applied to a graduate degree or certificate program upon approval of faculty in that program. Again, communication with the program director is critical.

Applicants who submit a transcript documenting a baccalaureate degree or its equivalent from a U.S. university or a university in which instruction is in the English language may be admitted to UMSL as Non-Degree Graduate Lifelong Learner.

International students residing in the United States who do not satisfy the above requirement and are seeking admission as a Non-Degree Graduate Lifelong Learner must provide the transcript and the same evidence of proficiency in English as required for international graduate admissions.

Non-Degree Graduate Lifelong Learners pay graduate educational tuition and fees regardless of whether they take graduate or undergraduate courses.

Non-degree graduate students are not eligible to receive veteran's benefits or to hold campus-sponsored assistantships. Federal financial aid may be available to some non-degree students for preparatory coursework such as teacher certification; information is available in the financial aid office.

Like all graduate students, Non-Degree Graduate Lifelong Learner must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student's cumulative GPA does not reach 3.0, the student may be granted a second probationary semester only upon approval of the Dean of the Graduate School. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student.

If at any time a student's term or cumulative GPA falls below 2.0, the Non-Degree Graduate Lifelong Learner will be ineligible to enroll as a non-degree or degree-seeking graduate student.

Inter-University Graduate Exchange Students

Inter-University Graduate Exchange students are Washington University and St. Louis University students who enroll on their home campus for UMSL courses not offered on their own campus.

Degree-seeking graduate students at UMSL may also participate in these programs if their advisors and the Graduate School approve their requests. Certain restrictions apply.

Unclassified Students

Students who are not qualified for admission to the Graduate School may be considered for undergraduate admission to UMSL as Unclassified Students by applying as an undergraduate non-degree student. Unclassified Students are considered Post-baccalaureate undergraduates, are not admitted to the Graduate School, may not take graduate-level courses, and do not receive graduate credit. Credits earned by an Unclassified Student may not later be considered as graduate credits should the student subsequently be admitted to the Graduate School.

Enrollment in Off-Campus and Continuing Education Courses

Students who have been admitted to the Graduate School may enroll in off-campus graduate courses without further application.

Students with a baccalaureate degree who have not been admitted to the Graduate School must be approved for admission as a Non-Degree graduate student to take Continuing Education courses for graduate credit.

Admission of International Students

International students must meet all requirements for admission to the Graduate School. In addition, international students whose native language is not English and who have spent less than two of the last three years in an English-speaking country are required to submit scores from an internationally accepted standardized examination before a decision is made on admission. International Admissions information is available from the Office of International Student and Scholar Services. Phone 314-516-5229; Fax 314-516-5636; e-mail: iss@umsl.edu.

Teaching assistantships will be awarded only to students with demonstrated oral English proficiency. Normally international teaching assistants may not teach during their first semester on campus.

When it is not possible for a student to take the required examination for reasons beyond personal convenience, the program to which the student has applied may develop alternate ways for that particular student to demonstrate English language competence prior to admission. The graduate dean must approve such alternative metrics.

Some programs may require applicants from other countries shall to provide a course by course report from a professional evaluation organizations in the United States. All students shall provide a statement of their financial situation and of the anticipated form of support for the period of graduate study.

Enrollment

Students who have been admitted to the Graduate School may enroll in classes in any term within one calendar year after admission. New students are strongly urged to seek advising before registering. If an advisor is not assigned, then the graduate director in the program should be the student's first contact in the department. A current list of graduate program directors is found on the Programs page of the Graduate School website.

To remain in good standing, most students must enroll for at least one term each calendar year. Students not meeting this enrollment requirement will become inactive and be required to reapply. Information on re-enrollment requirements is on the Graduate School Website. If students reapply and are readmitted, then they will be subject to all regulations in effect at the time of readmission.

Doctoral study is an exception to the normal enrollment requirement. After they achieve candidacy, doctoral students must enroll each fall and spring semester until the degree is completed.

International students on student visas must enroll fulltime for each fall and spring semester.

Final Semester Graduate Exam Fee

Graduate students must enroll in the semester in which they graduate. If they have completed required course work, thesis, or dissertation credits, then they must enroll in "Graduate Exam".

Fulltime Study

The minimal fulltime course load is nine credit hours for a regular semester and/or the eight-week summer session.

Graduate Equivalent Hours

In calculating credit hours for full-time enrollment, students may seek approval for the following semester hour equivalents:

1. Three equivalency hours for holding a 0.5 FTE Graduate Teaching Assistantship or Graduate Research Assistantship; up to two equivalency hours for appointments between 0.25 and 0.49 FTE.
2. Three equivalency hours in the semester the student is preparing for comprehensive examinations. This semester hour equivalency is allowed for a maximum of two semesters.
3. Up to eight equivalency hours for thesis master's students in their final term if (a) all required coursework is either completed or in progress and (b) they are enrolled in at least one hour of thesis research. Should the student fail to graduate, they may receive equivalency credits for one additional term with the approval of their thesis advisor, the Graduate Program Director, and the Dean. No master's student may receive thesis equivalency credits for more than two terms, including summer.
4. Eight equivalency hours after achieving candidacy. This semester-hour equivalency is allowed until the eight-year time limit has expired.
5. Participation in approved required out-of-class experiences in specific programs. Please see Procedures for a current list.

Overloads

During the regular semester, students may not enroll in more than 12 hours. Normally no more than three credit hours may be taken in any four-week period.

Heavier than normal loads may be permitted by the graduate dean, upon recommendation by the program director, for a) students whose cumulative UMSL GPA is substantially above the program average; and b) students in good academic standing for whom an overload of one course will permit them to graduate during the term in which the overload is taken. Students are normally not allowed to take an overload in their first semester in Graduate School.

Degree Program Plans

It is expected that graduate students will consult regularly with their advisors to plan a course of study that ensures timely completion of the requirements.

At least one-half of the credits for master's, educational specialist, and doctoral degree plans must be from 5000-level courses and above.

Within the major department, students normally may not take a 3000-level course for graduate credit. However, outside the department, a 3000-level course may be taken for graduate credit with the approval of students' advisors. Advisors must seek approval from the instructor, who may assign additional work commensurate with graduate status.

Courses numbered from 0 to 2999 may not be taken for graduate credit. No course applied to an undergraduate degree may be allowed in that student's graduate degree.

Credit for Courses Taken Prior to Enrolling in a Graduate Program at UMSL

Transfer credit shall be granted only for approved graduate courses for which a grade of at least B-, or equivalent, was achieved from an accredited institution.

Degree credit may be allowed for up to three credit hours for institutes, workshops, clinics, and Continuing Education courses only if offered by an appropriately accredited institution of higher education. Only such courses that award a letter grade may be applied to a graduate degree.

Students may transfer up to 18 hours of work on a Graduate Certificate Program Plan to a Master's or Doctoral Program Plan, if the program offering the degree approves the transfer.

Credit for Courses Taken at Other Universities After Enrolling in a Graduate Program at UMSL

Graduate students admitted to UMSL must petition in advance to take courses at another institution and apply the credit toward a graduate degree at UMSL.

With prior approval, regularly admitted graduate students are permitted to take a course not offered by UMSL at Washington University, St. Louis University, or Southern Illinois University-Edwardsville.

Time Limitation

The maximum time allowed for completion of a master's or educational specialist degree is six years after the first course enrollment. Graduate work completed outside these time periods may not be included in the degree program except under extraordinary circumstances and then only after recommendation from the graduate program for approval by the dean of the Graduate School. An exception to the time limitation may be approved in advance with an authorized leave of absence.

Leave of Absence

Graduate students who are forced to interrupt their studies for a period of one or more years should request a leave of absence from the university. In consultation with their advisors, students shall define the program modifications that the leave of absence requires. Requests must indicate the reason for leaving and the expected date of return to the university. Approval of the dean of the Graduate School is required.

The leave of absence is designed to suspend the requirement for continuous enrollment. It does not affect the maximum time limitation set for a degree program unless a specific exception is approved.

Undergraduate Enrollment in 5000-Level Courses

Under special circumstances undergraduate students in good standing at UMSL may enroll in 5000-level courses for undergraduate credit. Approvals from the advisor, department chairperson, academic dean, and dean of the Graduate School are required. In rare cases, students subsequently admitted to the Graduate School may petition for

graduate credit for 5000-level courses that they took as undergraduates, as long as those courses were not applied to their undergraduate degrees.

Dual Enrollment for Senior Undergraduates

With the approval of the divisional and graduate deans, seniors who have a 3.0 cumulative g.p.a. and are within 15 hours of completing graduation requirements for the first bachelor's degree may dually enroll as an undergraduate and a non-degree graduate student and earn up to six semester hours of graduate credit. For students in education, the 15 hours to complete graduation requirements do not include the hours required to complete undergraduate student teaching.

Courses taken while dually enrolled may not be counted for both undergraduate and graduate degree requirements. Consult with divisional deans for additional requirements. 2+3 students are not eligible for dual enrollment.

Dual enrollment forms must be completed and approved by the Graduate School prior to registering for the graduate level courses. Dually enrolled students are required to register for the graduate level courses using the graduate career in MyView.

Class Attendance

Only students who have previously paid fees may attend a class. Instructors are not authorized to allow students to attend classes if fees have not been paid. Students may not register and pay fees after the prescribed dates.

Preregistration

Enrolled students may preregister for the next term during regular preregistration periods. Registration is not complete until all university fees are paid.

Petitioning Into or Out of a Course

Students must receive the approval of their adviser and the course instructor to enroll in or withdraw from a course after registration.

Entering a Course in Progress

Students wishing to enter a course in progress must have the approval of the instructor and their adviser. Only under exceptional circumstances may students enter courses after the first week of the semester.

Dropping a Course

Courses may be dropped in MyView, without faculty approval and without receiving a grade, through the fourth week of classes of a sixteen-week semester, the second week of classes of an eight-week session and the first week of classes of a four-week session. Students with specific academic holds may be required to obtain approval from their advisor to change their schedule. Semester and session calendars posted on the registrar's website include specific deadline dates for dropping courses. Students who officially drop any of their classes may have fees reassessed and/or refunded based on the current fee reassessment schedule posted on the cashier's website. Courses dropped during this period will not appear on transcripts.

From the 5th week to the end of the 8th week of a sixteen-week semester, students may continue to drop courses in MyView without instructor approval. A grade of "EX" (excused) will be issued on the transcript. Refer to the calendar posted on the registrar's website for summer or winter session withdrawal deadlines. From the 9th week to the end of the 12th

week dropping courses will require instructor approval. Students receiving approval to drop during this period will be issued either an EX, or “EX-F” (excused but failing) if the student was failing at the time of dropping. The EX and EX-F grades will be posted to transcripts, but neither one will be used in calculating the GPA. Students who wish to withdraw after the end of the 12th week must provide documentation of exigent circumstance and receive both the instructor’s permission and approval of the dean.

Dropping or withdrawing from a course may adversely impact scholarships, financial aid, and progress toward graduation. Students are strongly urged to discuss these possibilities with the financial aid office and their academic advisors before dropping or withdrawing.

Students registered in a course in which they fail to meet a minimal level of participation as deemed by the instructor will be issued a grade of “FN” (Failure, Non-participation). The FN grade indicates that the student is not regularly attending class or is making little or no attempts on assignments or activities and may be violating the terms of financial assistance. This grade is equivalent to an F for GPA calculations.

Transcripts

The registrar will furnish transcripts of credits to a student upon written request. Transcripts are furnished to students’ parents or guardians or other parties or institutions only if students have filed written consent with the registrar. There is a charge per transcript. UMSL students or alumni transferring to another University of Missouri campus may ask the UMSL Director of Admissions to furnish a transcript to the appropriate Office of Graduate Admissions.

Requests for transcripts by organizations either financially supporting a student or with fee compensation programs are not honored unless the student has filed a consent form with the registrar, authorizing the release of such records.

Transcripts are not issued to or for students who have financial obligations to the university until those obligations are paid in full.

Probation

Failure to make adequate progress jeopardizes students’ potential to complete the degree as well as their financial aid. To provide students notice of inadequate progress at the end of each semester, graduate students with a cumulative GPA below 3.0 will be placed on probation. A program may also place a student on probation if faculty regard the student’s progress as unsatisfactory. The Graduate School will inform students of their probation, with copies sent to the graduate director of the program, the Graduate Admissions Office, and the Financial Aid Office.

If at the end of the probationary semester the cumulative GPA is at least 3.0 and the student is making adequate progress toward the degree, then the probationary status is removed. A probationary student who fails to raise the cumulative GPA to 3.0 may, on the recommendation of the program, be allowed a second probationary semester.

Dismissal

Upon recommendation of the program director, the Graduate School may dismiss any graduate student who does not make adequate progress. A student who is on probation for more than two semesters during his/her program of study will be dismissed, unless the dean of the Graduate School approves an exception request for continuation from the program director. The Graduate School is responsible for notifying students,

with copies sent to the graduate director of the program, the Graduate Admissions office, and the Financial Aid Office.

Course Policies

Course Numbering

Each course bears a distinguishing number that identifies it within the department or academic unit and indicates, broadly, the expected level of students taking the course. To understand the course level, refer to the following guidelines:

Course Numbers

Explanation

1-999

Courses that do not count toward the minimum requirements for any degree.

Lower Division:

1000-1999

Courses open to undergraduate students, primarily focused toward freshmen; courses count toward the minimum for given degrees.

2000-2999

Courses open to undergraduate students, primarily focused toward sophomores; courses count toward the minimum for given degrees

Upper Division:

3000-3999

Courses open to undergraduate students, primarily focused toward junior; courses count toward the minimum for given degrees.

4000-4999

Courses open to undergraduate and graduate students, primarily focused toward seniors; courses count toward the minimum for given undergraduate degrees; depending on the specific program, courses may count for a given graduate degree.

Graduate:

5000-5999

Graduate courses; also open to post-baccalaureate educator certification candidates and undergraduate seniors with permission from the Dean of the Graduate School. Courses count toward the minimum for given graduate degrees.

6000-6999

Graduate courses open to master’s degree and doctoral students. Courses count toward the minimum for given graduate degrees.

7000-7999

Graduate courses open to doctoral students and master’s degree students with special permission. Courses count toward the minimum for specific graduate degrees.

Optometry:

8000-8999

Courses open to optometry degree seeking students.

Credit Hours

The university credit unit is the semester hour, which represents a subject pursued one period weekly for one semester of approximately 16 weeks or for a total of approximately 16 periods for one term. Generally, a course valued at three semester hours meets for three periods weekly for one semester, a twocredit course two periods a week for a semester, and so on. Normally, the lecture or recitation period is 50 minutes long and the laboratory period one hour and 50 minutes.

The number of credit hours is listed as units in the online Schedule of Courses. If the credit is variable (to be determined in consultation with the instructor) it is shown by minimum and maximum units, such as Research 1 – 3 units. In the Bulletin, credit hours are included in parentheses after each course title e.g., Research (2-8).

Examinations

Examinations may be given only at regular class meeting times or as designated by the Senate Committee on Curriculum and Instruction.

Final Examinations.

The period designated for final examinations is an important component of the academic term. It provides faculty with a final opportunity to evaluate student learning and attainment of course objectives. Faculty members are encouraged to meet with students during the final examination period.

A faculty member who gives an in-class final examination may give this examination only on the day and at the time designated in the official final examination schedule. A majority vote of the students to the contrary does not change this policy.

A student may submit a written request for a change in the scheduled time of the final examination for a limited number of documented hardship reasons. These reasons include, but are not limited to, being scheduled to take more than two examinations on the same day, illness, military obligations, and religious practices. Except for emergencies, this request should be presented directly to the instructor at least two weeks before classes conclude. If the request is denied, the student may request additional consideration from the chairperson/area coordinator/program director and, if denied, to the dean of the college sponsoring the course.

Repeating Courses.

Students may not repeat for grade point average or credit hour purposes courses in which grades of A, A-, B+, B, B-, C+, or C have been earned. Subsequent grades in such a course that is repeated will not be included in the GPA calculations. The course hours will be counted only once in calculating hours toward a degree.

Academic Policies

Grades

Faculty teaching graduate courses have complete discretion in assigning grades.

Point assignments for grades are as follows;

- A = 4.0
- A- = 3.7
- B+ = 3.3
- B = 3.0
- B- = 2.7
- C+ = 2.3
- C = 2.0
- C- = 1.7
- F = 0
- FN = 0
- EX = Excused
- F-EX = Excused but failing
- DL = Delayed
- S/U = A or B equivalent

The satisfactory/unsatisfactory (S/U) option is not normally available in courses for graduate credit. S/U grades may be given only for internship, practica, project, and research courses as requested by a school or college, with prior approval from the Graduate Council. Courses on the S/U grading system will carry no points toward calculation of the grade point average. A Satisfactory grade is defined as a grade of at least B-.

Students who stop attending classes without officially dropping courses receive grades of F or FN, depending on the amount of work completed.

Students may enter courses as auditors but may not change from audit to credit or credit to audit after the first week of class. Auditors are charged full fees and receive no academic credit.

Delayed Grades

Delayed grades may be given when a student's work is of passing quality but is incomplete because of circumstances beyond the student's control. Delayed grades must be removed within two regular semesters (excluding summer) after the time recorded or they automatically become F grades. In such cases, course instructors may subsequently change F grades to other grades when all work has been completed. A student may not graduate with any delayed grades on their transcript except in research courses required for a subsequent degree.

Failure/Non participation

When students do not complete any graded assignments but do not officially withdraw from the course or the university, instructors may assign an FN. The F for Non-Participation cannot be changed to a grade and will be treated in GPA calculations as an F.

Graduate Grade Appeals

In case of disputes regarding grades, graduate students shall follow the university Grade Appeal Process by first contacting the Department Chair. The policy is available on the Academic Affairs' Website.

Grade Point Average (GPA)

UMSL calculates three types of GPA. At the end of each semester, the Term GPA is calculated on the courses attempted that semester. The Cumulative GPA on the transcript comprises all courses taken at UMSL for graduate credit, including courses that may not be a part of the degree program or certificate. The degree program or certificate GPA includes only the grades of those used to meet degree/certificate requirements for

that program. The cumulative and degree or certificate program GPA must be at least 3.0 for a student to receive a graduate degree or certificate.

Any course work transferred from other universities, including other UM campuses, will not be included in any GPA calculation.

Course Replacement

A student who fails to earn a cumulative GPA of 3.0 may request a recalculation of the cumulative GPA by substituting additional appropriate course work for courses in which a 3.0 was not earned. A maximum of two courses may be replaced during the entire graduate career at the University of Missouri-St. Louis, and all courses and grades remain on the student's record. The dean may approve the substitution if recommended by the graduate director of the student's program.

Once a student has completed a master's degree or certificate of advanced study, a final average for that degree or certificate is computed and cannot be modified. For that reason, courses for any graduate degree or certificate awarded may not be repeated, and no final GPA is affected by any subsequent coursework completed at UMSL.

Repeating courses may affect financial aid; applicants for Course Replacement are advised to contact the Financial Aid Office prior to applying for the replacement.

Course Replacement is not available for admission considerations or during a probationary or restricted admission period.

Master's Degree Requirements

Admission

Faculty in each master's degree program determine any eligibility standards beyond the minimum for admission to the Graduate School.

Enrollment

All master's degree students shall be enrolled for credit for access to university resources, including advisement, data gathering, or examinations.

Full-time status for all graduate students is defined as at least nine credit hours of course work. Individual programs may require higher enrollments.

Credit Requirements

A minimum of 30 semester hours of graduate credit is required for all master's degree programs. Specific programs may require a greater number of hours.

Residence Requirement

The final two-thirds of the courses in a master's degree program must be completed at UMSL.

Time Limitation

All courses included in a master's degree program, whether taken at UMSL or at another institution, shall have been completed within six years after enrollment in the first course.

Credit From a Certificate Program

Students who have completed course credits in certificate programs may transfer those credits into a master's degree program with the program's consent, as long as the credits fall within the time limitation set for master's degrees. If the master's degree is in a different program from

that awarding the certificate, then no more than one-third of the credits from the certificate program may apply to the master's degree. Multi-disciplinary programs may seek programmatic exceptions to this limit when the program undergoes the approval process.

2+3 Programs

Students who are granted Formal Admission to a recognized 2+3 program at UMSL are admitted to the Graduate School prior to the completion of their UMSL undergraduate program. These students must complete all the normal requirements for their Master's degree. All the coursework used to satisfy the requirements for the Master's degree must be taken while in graduate status.

Provisional 2+3 students who are still undergraduates can petition to take up to 6 hrs of 4000/5000/6000 level courses for graduate credit, and these credits may be used to satisfy Master's degree requirements. The petition must be filed at the beginning of the term. Students may not petition retroactively to use courses already completed as an undergraduate to meet the requirements of the Master's degree.

The number of graduate credit hours that may be applied to the undergraduate degree of a 2+3 student shall be determined by the undergraduate department.

The bachelors and master's degrees must be awarded simultaneously at the end of the 2+3 program. Graduate students who formally withdraw from the 2+3 program may apply for their Bachelor's degree. However, the advantage of dual credit is forfeited. No course applied to the Bachelor's degree may be included in any future graduate degree program.

Dual Master's Degrees

With approval of the program and the Graduate School, students who have completed one master's degree may transfer appropriate credits to a second master's degree program. The number of transferable credits may not exceed one-third of the credit hours required by the second program. Subsequent transfers of the same courses to a third degree are not permitted.

With approval of the programs involved and the Graduate School, students may simultaneously pursue two master's degrees under the following conditions:

1. No more than one-third of the credit hours required by either program may be applied to both programs;
2. Students must obtain approval of both programs before completing 12 hours in either program.

Multi-disciplinary programs may seek programmatic exceptions to the one-third limit when the program undergoes the approval process by addressing specific allowable transfers between those two degree programs.

Master's Degree for Doctoral Students

Doctoral students may receive a master's degree in their program for work they have completed toward a doctoral degree. The program establishes the requirements for such a master's degree. However, the requirements should, in principle, be similar to those for master's degrees offered by the program.

Doctoral and educational specialist students may also receive a master's degree for work they have completed toward to a doctoral or Ed.S. degree in another program provided:

1. they apply no more than two-thirds of the master's degree courses to their doctoral degree program;
2. they have been admitted to the master's degree program; and
3. they have obtained the approval of the advisors from both programs and from the Graduate School.

Credit from the master's degree must constitute less than half the total credits required for the doctorate.

Multi-disciplinary programs may seek programmatic exceptions to these limits when the program undergoes the approval process.

The Master's Degree Program

Master's degree students must meet with an advisor within the first semester of the program to design a program plan that meets program requirements and the students' interests.

To receive the master's degree, students who have met all degree requirements shall apply for graduation by filing an M-4 Graduation Application, which will include the student's Degree Program, no later than the graduation deadline in the semester in which they plan to graduate.

Comprehensive Examination, Scholarly Paper, or Exit Project

Each unit requiring a comprehensive examination for the master's degree informs the Graduate School of (a) the number of times the unit will allow its students to take a comprehensive examination, and (b) the period of time that the unit will allow between the first and final attempt to pass the examination.

Units recommend Graduate Faculty members to serve on committees for capstone projects. The Graduate Dean shall review and may appoint the committee.

Graduate Program Directors recommend at least two Graduate Faculty members to serve on committees for capstone projects and examinations. The Graduate Dean shall review and appoint the committee.

Programs that offer alternatives or requirements for capstone projects or examinations are expected to post procedures that have been approved by the department. Graduate program directors shall inform the Graduate School when the department initiates or changes their procedures.

The chairperson of the capstone committee is responsible for verifying that the final project or examination is acceptable to the committee and the Graduate Dean by submitting current Graduate School forms for documenting those approvals. It is the responsibility of the committee chair to grade the project/examination.

Master's Thesis

The Master's Thesis Committee shall consist of at least three members of the Graduate Faculty who can contribute their expertise to the thesis study. The committee chair and at least one other member shall be faculty in the department offering the degree. The Graduate Dean shall review and approve the committee membership and any changes in membership.

The thesis must be written on a subject approved by the candidate's thesis committee and must be the candidate's own work. The reuse of text from

previous papers authored or co-authored by the student shall be evaluated by the committee prior to the thesis defense. In the thesis, the student must clearly and explicitly identify all reused text and the original source(s) of that text. If the source documents involve co-authors other than the student and the faculty advisor, the thesis must include a description of the individual contributions of each co-author of the original study. A copy of the source documents must be provided to thesis committee members and the Graduate School. Departments may choose to adopt a uniform policy on the acceptability of reused text for a specific degree program.

Regardless of the extent of any reuse of text, the thesis must maintain a uniform and consistent formatting style throughout. In matters of style and documentation, the custom of the discipline shall be followed. The student must document permission to reuse any copyrighted material.

The final defense of the thesis is normally open to the public unless the thesis chair requests that the dean of the Graduate School permit a closed meeting on the basis of an embargoed study. Deliberations among committee members may be closed at the discretion of the chair. After deliberating on the defense of the thesis, the Master's Thesis Committee shall vote on whether the defense was successful. The defense shall be deemed unsuccessful if there are two negative votes, even if outnumbered by positive votes. An abstention will be considered a negative vote. A student failing the defense shall have the opportunity for one additional presentation before the same committee. The Master's Thesis Committee shall determine the timing and format of the subsequent defense. The Master's Thesis Committee makes the final decision on the defense, whether pass or fail, and reports the results to the Graduate Program Director, who informs the Graduate School no later than two days after the defense.

Master's degree students shall disseminate the thesis according to current Graduate School procedures. The final copy of the thesis must be typed according to current Graduate School requirements. To be accepted by the Graduate School, the copy must be legible, neat, and paginated correctly. An abstract is required. Students must submit to the dean of the Graduate School one copy of the thesis by the posted university deadline, normally six weeks before the end of the term in which graduation is sought. The chairperson of the thesis committee is responsible for verifying that the final draft of the thesis is acceptable to the thesis committee and the Graduate Dean by following current Graduate School procedures for documenting those approvals. The chair of the thesis committee shall determine the grade for the thesis.

Educational Specialist Degree Requirements

Admission

Each educational specialist degree program shall determine any eligibility standards beyond the minimum for admission to Graduate School.

Enrollment

All educational specialist degree students shall be enrolled for credit for access to university resources, including advisement, data gathering, or examinations.

Full-time status for all graduate students is defined as at least nine credit hours of course work. Individual units may require higher enrollments.

Credit Requirements

A minimum of 60 semester hours of graduate credit is required for all educational specialist degree programs. Individual programs may require a greater number of hours.

Residence Requirement

Normally, at least one half of the courses in an educational specialist degree program must be completed at UMSL.

Time Limitation

All courses included in an educational specialist degree program, whether taken at UMSL or at another institution, shall have been completed within six years after enrollment in the first course.

When educational specialist students have earned a master's degree at any institution, appropriate credits may be applied toward meeting the requirement for the specialist degree, subject to program approval. Such credits shall constitute less than half of the total credits required for the educational specialist degree. Credit for courses taken for a master's degree is exempt from the six-year time limitation.

Filing the Degree Program Plan

An educational specialist degree student enrolled shall file an approved program plan with the Graduate School. The S-4 must be filed by the posted deadline of the final semester in the program. Students may petition the dean of the Graduate School to change the degree program after it has been filed.

Comprehensive Examination, Scholarly Paper, or Exit Project

Each program requiring a comprehensive examination for the specialist degree informs the Graduate School of:

1. the number of times the program will allow its students to take a comprehensive examination, and
2. the period of time that the program will allow between the first and final attempt to pass the examination.

Programs recommend Graduate Faculty members to serve on committees for capstone projects. The graduate dean shall review and may appoint the committee.

Thesis

Programs recommend Graduate Faculty members to serve on committees for capstone projects. The graduate dean shall review and may appoint the committee.

Educational Specialist degree students who write a thesis must submit to the dean of the Graduate School one copy of the thesis by the posted university deadline, normally six weeks before the end of the term in which graduation is sought. The chairperson of the thesis committee is responsible for verifying that the final draft of the thesis is acceptable to the graduate dean and the thesis committee. Students shall disseminate the thesis according to current Graduate School procedure.

Doctoral Degree Requirements

Admission

Each doctoral degree program may determine eligibility standards beyond the minimum for admission to the Graduate School.

Credit Requirements

A minimum of 60 semester hours of graduate credit is required in every doctoral degree program. Programs may require a greater number of hours for their programs, and individual students may be required to take additional hours.

Enrollment

Full-time status is defined as nine credit hours per semester. Programs may require higher enrollments than this. After students achieve candidacy and complete the residence requirement, they must remain enrolled during fall and spring semesters until they complete the degree. Failure to register in any regular semester will result in termination from the Graduate School. If students so terminated decide to reapply and if they are readmitted, then they will be subject to all regulations in effect at the time of readmission, and will be required to enroll for at least one credit hour for each semester since their last enrollment.

When doctoral students are enrolled for research credit, the credit amount may vary, but the student must register for all work required, and the credit total may exceed the minimum requirements.

Classification of Doctoral Students

There are two stages in doctoral degree work:

- A pre-candidate is a student who has requirements to fulfill in addition to the dissertation, including course work, and/or comprehensive examinations.
- A candidate is a student who has met all degree requirements except the completion of the dissertation.

Time Limitation

The maximum amount of time allowed for completion of a doctoral degree is eight years after the first course enrollment.

The maximum of 12 hours of graduate credit completed as a post-master's degree student prior to admission to a doctoral program may apply toward a doctoral degree. Inclusion of such course work is subject to program approval and must have been completed within eight years of the time the doctoral degree is awarded. Exceptions to this regulation must be justified on academically defensible grounds and approved by the graduate dean prior to filing the program plan.

When doctoral students have earned a master's degree at any institution, appropriate credits may be applied toward meeting the requirement for the doctoral degree, subject to program approval. Such credits shall constitute less than half of the total credits required for the doctorate. For example, for a doctoral degree requiring 90 hours of work beyond the bachelor's degree, no more than 44 credits from a master's degree may apply to the doctoral degree. Credit for courses taken for a master's degree is exempt from the doctoral program's eight-year time limitation.

Residence Requirement

The majority of credits used to satisfy requirements for a doctoral degree must be completed at UMSL. The residence requirement may be satisfied

with dissertation credit hours, graduate institutes, and credit courses taken through Continuing Education, as well as regular courses.

Students who enter the Ed.D. or Ph.D. in Education degree programs with an Education Specialist (Ed.S.) degree from an accredited university, or with an Advanced Certificate approved by the Missouri Department of Elementary and Secondary Education, may satisfy the residence requirement by completing one-third of the required credits at UMSL.

Residency normally requires that doctoral students successfully complete a minimum of 15 hours over two consecutive terms, which may include summer. The dean of the Graduate School may grant exceptions upon recommendation by the program.

Comprehensive Examinations

Each program will determine the number of times a comprehensive examination may be taken by a student. The department or college must file with the Graduate School a statement specifying:

1. the number of times the program will allow its students to take a comprehensive examination, and
2. the maximum and/or minimum period of time the program will allow between the first and final attempt to pass the comprehensive examination.

The Comprehensive Examination Committee consists of no fewer than three members of the UMSL graduate faculty appointed by the graduate dean upon recommendation of the program.

An oral examination may not substitute for the standard written portion.

Advisors

Upon entering the program, each doctoral student will have an assigned program advisor who is a member of the Graduate Faculty. As early as possible in a doctoral student's program, but no later than when the student achieves candidacy, the program will recommend, in consultation with the student, a doctoral dissertation advisor.

Application for Candidacy

Doctoral students may apply for candidacy after passing all required comprehensive and language examinations, written or oral, and successfully completing all course work. The program director approves the application and forwards it to the dean of the Graduate School for final approval.

Doctoral Dissertation Committee

The Doctoral Dissertation Committee shall consist of at least four members of the Graduate Faculty who can contribute their expertise to the dissertation study. The committee chair and at least one other member of the committee must be faculty in the Department offering the degree. A recognized scholar from outside the university may serve as a member upon the recommendation of the unit and approval of the Graduate Dean, but the external scholar may not chair the committee. The Graduate Dean shall approve the committee membership and changes in the committee membership.

Doctoral Dissertation

All doctoral degrees require a dissertation as a final component of the program. The dissertation must be written on a subject approved by the

candidate's doctoral dissertation committee, must embody the results of original and significant research and must be the candidate's own work.

Dissertation Proposal

Before a student may conduct substantial research for the dissertation the committee must approve a proposal after a formal defense. The student submits the approved proposal for review and approval by the dean of the Graduate School. An approved dissertation proposal in no way implies a contract between the university and the student. Depending on the outcome of the research, the dissertation may require substantially more work than anticipated when the proposal was approved. The termination of a line of research and the adoption of a substantially new dissertation project requires the preparation, formal defense, and acceptance by the Graduate School of a new dissertation proposal.

Preliminary Approval

One copy of the dissertation, certified as complete and provisionally acceptable to the committee, shall be submitted to the graduate dean at least six weeks prior to commencement. The Dean of the Graduate School may seek advice and make suggestions to the committee about content and style before approving the dissertation.

Defense of Dissertation

Normally the approved Doctoral Dissertation Committee serves as the Oral Defense of Dissertation Committee. The graduate dean may appoint one additional qualified voting member to the Defense of Dissertation Committee from the Graduate Faculty within the University of Missouri System.

After deliberating on the oral defense of the dissertation, the Defense of Dissertation Committee votes on whether the defense was successful. The defense shall be deemed unsuccessful if there are two negative votes, even if outnumbered by positive votes. An abstention will be considered a negative vote. A student failing an oral defense shall have the opportunity for one additional defense before the same committee. The Defense of Dissertation Committee shall determine the timing and format of the subsequent defense.

Final examinations are open to the public.

The decision of the Defense of Dissertation Committee is final. The report of the final examination is due to the Graduate School no later than two days after the examination.

Dissertation Abstracts

Two different abstracts are required. The publishing company requires an abstract of a maximum of 350 words that is published with the announcement of the dissertation defense. The abstract forming the second page of the dissertation should be no more than 600 words.

Dissertation Format

Only high quality copies are acceptable with the following margins throughout: left margin 1" inches; top, bottom, and right margins, 1 inch. Final copies may be submitted electronically following current procedures on the Graduate School Electronic Thesis and Dissertation homepage or in person in Room 421 Woods Hall on paper. Original hard copies of the dissertation must be typed on good quality paper, and they must be legible and neat in order to be accepted by the Graduate School.

In matter of style and documentation, the custom of the discipline shall be followed.

The chairperson of the dissertation committee is responsible for verifying that all the changes suggested by the graduate dean and the dissertation committee have been incorporated in the final draft of the dissertation or have been discussed further with the graduate dean or the committee.

Students disseminate the dissertation according to current Graduate School procedures.

Professional Doctorates

At the University of Missouri-St. Louis, professional doctoral degrees are rigorous and practice oriented. Professional doctorate students' academic work focuses on scholarly responses to societal needs within professional contexts. Faculty advisors in professional doctorate programs may be scholar-practitioners who are approved as Professional/Special Appointment Graduate Faculty as well as regular UMSL Graduate Faculty.

Both types of graduate faculty may assume all graduate faculty roles throughout the professional doctoral program.

Admission to the Professional Doctorate

Each professional doctoral degree program may determine eligibility standards beyond the minimum for admission to the Graduate School with the exception that professional doctoral programs may admit exceptional undergraduate students before their baccalaureate is awarded.

Professional Doctorate Credit Requirements

Each professional doctoral degree program may determine the minimum hours of graduate credit required for the degree program based on professional and/or accreditation/licensing standards.

Professional Doctorate Enrollment

Full-time status is defined as nine credit hours per semester. Units may require higher enrollments than this.

After students achieve candidacy and complete the residence requirement, they must remain enrolled during fall and spring semesters until the degree is completed. Failure to register in any regular semester will normally result in termination from the Graduate School. If students so terminated decide to reapply, and if they are readmitted, they will be subject to all regulations in effect at the time of readmission and will be required to enroll for at least one credit hour in each semester since their last enrollment.

When professional doctoral students are enrolled for capstone credit, the credit amount may vary, but the student must register for all work required, and the credit total may exceed the minimum requirements.

Classification of Doctoral Students

There are two stages in a student's doctoral degree work:

(1) A pre-candidate is a student who has requirements to fulfill in addition to the capstone project, including course work, clinical experiences, and/or threshold examinations.

(2) A candidate is a student who has met all degree requirements except the completion of the capstone project and any clinical or fieldwork required as a part of the capstone project.

Professional Doctorate Time Limitation

The maximum amount of time allowed to complete a doctoral degree is eight years after enrollment in the first course. Professional doctoral students who enter with any previous graduate degree or certificate may apply appropriate credits toward the professional doctoral degree, subject to program approval. Credit for courses taken for an advanced degree or post-master's graduate certificate is exempt from the eight-year time limit.

Professional Doctorate Residency Requirement

Residency normally requires that doctoral students successfully complete a minimum of 15 hours at UMSL over three consecutive terms, which may include summer. The Dean of the Graduate School may grant exceptions upon recommendation by the program.

Students who enter the EdD degree program with an Education Specialist (Ed.S.) degree from an accredited university, or with an Advanced Certificate approved by the Missouri Department of Elementary and Secondary Education, may satisfy the residence requirement by completing one-third of the required credits at UMSL.

Professional Doctorate Threshold Examinations

Each program will determine the type of comprehensive, qualifying, or other threshold examination that is appropriate for the discipline. Units also specify the number of times a student may take a threshold examination and the maximum and/or minimum period of time allowed between the first and final attempt to pass the examination. The program must file information about the requirements with the Graduate School. An oral examination may not substitute for the standard written portion.

The Examination Committee will consist of no fewer than three members of the Graduate Faculty, including Professional/Special Appointment Graduate Faculty appointed by the Graduate Dean upon recommendation by the unit.

Advisors for the Professional Doctorate

Upon entering the program, each doctoral student shall have an assigned advisor who is a member of the Graduate Faculty, including Professional/Special Appointment Graduate Faculty. As early as possible in a doctoral student's program, but no later than when the student achieves candidacy, the unit shall recommend, in consultation with the student, an advisor for the capstone project.

Application for Candidacy

Doctoral students may apply for candidacy after passing all threshold requirements and successfully completing all course work.

Committee for the Capstone Project

The Committee for the Capstone Project shall consist of at least three members of the Graduate Faculty, including Professional/Special Appointment Graduate Faculty, who can contribute their expertise to the study. A recognized practitioner from outside the university may serve as one of those members upon the recommendation of the unit and approval of the Graduate Dean, but the external member may not chair the committee. The Graduate Dean shall approve the committee membership and changes in committee membership upon recommendation from the program. Duties of Members. All members of the Committee for the Capstone Project are involved intimately and participate actively in the

activities of the doctoral student at all the stages of the student's career at UMSL, except, perhaps, the threshold examination. This committee normally also serves as the Oral Defense Committee.

Capstone Project

At the University of Missouri-St. Louis, all professional doctoral degrees require a capstone project. The project must address a subject approved by the candidate's committee; have a significant grounding in clinical, translational, or engaged scholarship; and be the candidate's own work.

Programs may permit collaborative capstone projects, but students must be able to document their original contributions to collaborative projects.

Programs must submit to the Graduate School and make available for students information about the capstone project (e.g., scholarly paper, dissertation-in-practice, etc.) and all requirements expected for the project to be judged successful.

Text Reuse: The reuse of text will be evaluated by the members of the faculty committee that approves the document. Each committee member, as part of the decision to approve or disapprove the document, will decide whether the reuse presented in the document is acceptable. Departments may choose to adopt a uniform policy on the acceptability of reused text for a specific degree program. In the document, the student must clearly and explicitly identify all reused text and the original source(s) of that text. A copy of the source documents must be provided to the committee members and the Graduate School. Reuse is strictly limited to text from papers authored or co-authored by the student. The student must document permission to reuse any copyrighted material. If the source documents involve co-authors other than the student and the faculty advisor, the document must include a description of the individual contributions of each coauthor of the original study. Regardless of the extent of any reuse of text, the dissertation must maintain a uniform and consistent formatting style throughout.

Professional Doctorate Capstone Project Proposal

Before students may begin substantial work on the capstone project, the committee must have approved a proposal after a formal defense. To schedule the defense, students must have approval from appropriate compliance committees (e.g., Human Subjects, etc.). Students submit the approved proposal to the Graduate School for review and approval by the Dean of the Graduate School.

An approved proposal does not imply a contract between the university and the student. For example, the project may require substantially more work than anticipated when the proposal was approved. The termination of a line of inquiry and the adoption of a substantially new capstone project requires the preparation, formal defense, and acceptance by the Graduate School of a new proposal.

Preliminary Approval of the Capstone Project

One copy of the final capstone project, certified as complete and provisionally acceptable to the committee, shall be submitted to the Graduate Dean at least six weeks prior to commencement. The Dean of the Graduate School may seek advice and make suggestions to the committee about content and style before approving the project.

Oral Defense of the Capstone Project

After deliberating on the oral defense of the project, the Committee for the Capstone Project votes on whether the defense was successful. The defense shall be deemed unsuccessful if there are two negative votes, even if outnumbered by positive votes. An abstention will be considered a

negative vote. A student failing an oral defense shall have the opportunity for one additional defense before the same committee. The committee shall determine the timing and format of a subsequent defense.

Capstone examinations are open to the public, although committee deliberations normally take place privately. The decision of the Committee for the Capstone Project is final. The report of the final examination is due to the Graduate School no later than two days after the examination.

Capstone Project Abstracts

Capstone Projects are normally disseminated as PhD dissertations and require two different abstracts. The abstract forming the second page of the Capstone Project report should be no more than 600 words.

UMSL's partner for publishing scholarly projects (currently Proquest) requires an abstract of a maximum of 350 words, which is included with the campus announcement of the defense of the Capstone Project.

Upon recommendation by the program, the Graduate Dean may approve exceptions to this method of dissemination.

Format of the Capstone Project

In matters of style and documentation, the custom of the discipline shall be followed. The final copy of the Capstone Project must be legible and appropriate for publication when submitted to the Graduate School. Only high quality electronic submissions are acceptable with the following margins throughout: left margin, 1 1/2 inches; top, bottom, and right margins, 1 inch. Upon recommendation by the unit, the Graduate Dean may approve exceptions to this method of dissemination.

Official Copies of the Capstone Project

The chair of the Committee for the Capstone Project is responsible for verifying that all the changes suggested by the committee and the Graduate Dean have either been incorporated in the final draft of the project or have been discussed further with the Graduate Dean or the committee.

Students shall disseminate the Capstone Project according to current Graduate School procedures for theses and dissertations unless an exception is approved.

Graduate Certificate Program Requirements

Admission

Each graduate certificate program may determine eligibility standards beyond the minimum for admission to and enrollment in the Graduate School.

Credit Requirements

A minimum of 18 hours of graduate course work is required for a graduate certificate. At least 12 of these hours must consist of courses drawn from the list of core courses for the particular certificate program. At least 12 hours must be completed as a graduate student at UMSL. At least nine hours must be at the 5000 level or above. No more than six hours may be independent study.

Filing the Program Plan

A graduate student enrolled in a certificate program is required to file a certificate program plan with the Graduate School before completing the first two-thirds of the number of hours required in the program. Changes

made in a certificate program plan after it has been filed must be submitted to the Graduate School.

General Education Requirements

At the University of Missouri-St. Louis, General Education affords both freshmen and transfer students the opportunity to develop and apply intellectual tools and to acquire a breadth of knowledge necessary to succeed in a rapidly changing, technology-driven, and diverse world. The UMSL Core and Explore curriculum challenges students to investigate various disciplines as potential majors and prepares them for success in major fields of study. It provides foundational knowledge in the basic competencies of Valuing, Managing Information, Communicating, and Higher-Order Thinking.

UMSL CORE & EXPLORE

- Native students (those with less than 11 hours of college credit from another institution, excluding any dual enrollment credit earned in HS)
- Students who plan to complete their degree at UMSL
- Transfer students in professional degree programs:
 - BS, Actuarial Science
 - BS, Accounting
 - BS, Education
 - BS, Nursing
 - BS, Engineering
 - BSW, Social Work
- General transfer students may opt in to this program

MISSOURI CORE 42

The core transfer curriculum, known as CORE 42, is a state-wide framework for general education that was implemented in the 2018-2019 academic year by all public two- and four-year institutions of higher education in the State of Missouri. CORE 42 provides a common framework that allows transfer students to fulfill general education requirements at any participating institution by completing courses with MOTR designations. Except for transfer students pursuing professional degrees, those who complete all CORE 42 requirements will have satisfied the general education requirements of UMSL. Students who partially completed CORE 42 at another institution may finish the remaining requirements to satisfy the general education requirements of UMSL.

- Transfer students (those with 11+ hours of college credit from another institution, excluding any dual enrollment credit earned in HS)
 - Students who plan to transfer and complete their studies at an institution other than UMSL
 - Students with transcripted MOTR courses not seeking a professional degree
 - Native students may not opt in to this program

UMSL Core and Explore

General Education Program

Students must successfully complete the requirements of the University, the school or college in which they are enrolled, and the specific

requirements of their area of specialization. Described below are the General Education requirements for all degrees. Students may consult the University Bulletin or their degree audit (DARS) report for recommended general education courses in their major.

At the University of Missouri-St. Louis, General Education affords both freshmen and transfer students the opportunity to develop and apply intellectual tools and to acquire a breadth of knowledge necessary in our challenging, technological, and diverse world. This curriculum also challenges students to investigate various disciplines as potential majors, and it prepares them for success in major fields of study. The program complies fully with the Missouri Coordinating Board of Higher Education Guidelines on Transfer and Articulation (June 2000).

Application of Policy to Freshmen

All students in Missouri public universities must complete the requirements of a General Education Plan totaling 42 credit hours in order to earn a baccalaureate degree.

Application of Policy to Transfer Students

Transfer policies describe which courses may apply to UMSL's General Education requirements. In general, students who transfer to UMSL with an Associate of Arts (AA) degree from an accredited Missouri institution and other approved institutions are considered to have completed all General Education requirements.

Students transferring with fewer than 42 hours or from a non-participating institution and not participating in the Missouri Transfer CORE 42 program will have their transcripts evaluated on a course-by-course basis. All students must earn a C- or higher in their First Year Writing and Math Proficiency coursework to be eligible to graduate from UMSL. Additionally, UMSL has a Junior-Level Writing requirement beyond the General Education requirement and the school or college in which they are enrolled may also have a Cultural Diversity requirement.

Transfer courses that meet the requirements of the Core courses or courses that are designated as General Education courses in the Humanities and Fine Arts, the Social Sciences, and the Math and Life/ Natural Sciences areas at peer institutions and institutions with whom UMSL has an articulation agreement are considered transferable to UMSL's General Education requirements.

Credit associated with developmental/remedial coursework are not considered transferable to UMSL's General Education requirements.

Application of Policy to Students Who Started Prior to Fall 2015

Students who earned 24 or more semester hours of credit* at any accredited post-secondary institutions(s) before the start of the fall 2015 semester may meet the General Education requirements stipulated in the UMSL 2014-2015 Bulletin or elect to complete the current General Education Plan described below. Students who earned 24 or more semester hours of credit* at any accredited post-secondary institutions(s) before the start of the fall 2002 semester may also meet the General Education requirements stipulated in the UMSL 2001-2002 Bulletin.

*Only credit that is transferable to UMSL is applicable

General Education Requirements

General Education at UMSL is comprised of 1000-2000 level courses that provide foundational knowledge in a broad range of subjects critical to the future success of our students. It is divided into two categories: General Education Core courses, which are applicable in all disciplines, and General Education Explore courses, which emphasize breadth of study. The following definitions clarify what is required for a course to be considered for listing as either a core or explore option in the General Education curriculum.

Core Areas:

First Year Writing
Math Proficiency
Communication Proficiency
Information Literacy
American History or Government

Explore Areas:

Humanities and Fine Arts
Social Sciences
Math and Life/Natural Sciences

Core Area Descriptions

First Year Writing (3 hours): Students will develop college-level rhetorical knowledge and critical thinking, reading, and writing skills, including process skills and knowledge of conventions.

First-Year Writing courses are defined as those which develop students' ability to:

- analyze contexts and audiences and then act on that analysis in comprehending and creating texts
- analyze, synthesize, interpret, and evaluate ideas, information, situations, and texts
- use multiple strategies, or composing processes, to conceptualize, develop, and finalize projects
- involve multiple assessments of writing in multiple formats
- understand, analyze, and negotiate conventions (usage, spelling, citation as well as organizational frameworks, content, document design, and style) for purpose, audience, and genre, understanding that genres evolve in response to changes in material conditions and composing technologies and attending carefully to emergent conventions

The First Year Writing requirement must be satisfied before the student completes 24 hours of course work. Students should be able to write with thoughtfulness, clarity, coherence, and persuasiveness (CBHE General Education, June 2000). Proficiency can be met through earning a C- or higher in one of the following courses:

ENGL 1100	First-Year Writing (MOTR ENGL 200)	3
ENGL 1110	First-Year Writing for International Students	3
HIST 1111	Reacting to the Past	4

FGN LANG 1111	Reacting to the Past: Language, Immigration, and Social Change	4
HONORS 1100	Honors Freshman Composition	3

Mathematics (3 hours): Students will gain critical thinking and quantitative reasoning skills, and the use of symbolic systems to understand the properties and relationships of relevant quantifiable concepts.

Pathways mathematics courses are defined as those which:

- Involve sets and logic which is essential to critical thinking and process learning
- Treat aspects of financial mathematics as it is both exemplary of mathematical thinking and immediately relevant to students
- Discuss concepts of probability and statistics which involves important interpretive critical reasoning skills
- Consider geometric concepts which involve abstract reasoning and spatial skills
- Proficiency in the basic mathematical skills

Proficiency in the basic mathematical skills area must be satisfied before the student completes 24 hours of course work. Proficiency can be obtained by completing, with a grade of C- or higher, a college degree credit mathematics course, or by earning a score of at least 51% on the ALEKS Exam **in a proctored environment**. Students who fulfill their math proficiency requirement in this manner must take an additional General Education course in order to have a total of 42 credit hours of General Education courses.

Mathematics courses that the University offers that satisfy mathematics proficiency are courses at the 1000 level or above. Proficiency can be met through earning a C- or better in one of the following (or higher level) courses:

MATH 1020	Contemporary Mathematics (MOTR MATH 120)	3
MATH 1021	Choice and Chance	3
MATH 1025	Geometry in the Real World	3
MATH 1030	College Algebra (MOTR MATH 130)	3
MATH 1045	PreCalculus (MOTR MATH 150)	5

Math courses at the 1000 level below MATH 1030 are designed as terminal mathematics courses for students who do not plan to take calculus.

MATH 1030 or MATH 1045 is required for all students who want to go on to calculus. (Note: MATH 1035 is also required for students that take MATH 1030 and want to take MATH 1800.)

ALEKS math placement scores used to satisfy prerequisites are valid for approximately 11 months. For exact dates, go to <http://www.umsil.edu/~campustesting/mathplacement.html>. Also, ALEKS math placement scores that are used to satisfy prerequisites for courses below MATH 1800 do not need to be obtained in a proctored environment.

Information about the ALEKS math placement test is available on the University's homepage at <http://www.umsil.edu/~campustesting/mathplacement.html>.

Communication (3 hours): Students will become proficient in verbal communication, enhance their ability to analyze and use communication effectively, and engage with others constructively across contexts.

Communication courses are defined as those which:

- are based in the English language and assume conversational fluency
- emphasize verbal communication over other forms
- involve analytical and practical skill-building in oral communication
- require multiple assessments or evaluations of oral communication skills

The Communication Proficiency requirement may be met through one of the following courses:

COMM 1030	Interpersonal Communication I	3
COMM 1040	Introduction To Public Speaking	3
COMM 2230	Small Group Communication	3
COMM 2240	Persuasive Communication	3
EDUC 2222	Interpretation: Connecting Audiences and Meaning	3
HONORS 2010	Inquiries In The Humanities (Public Speaking or Storytelling: The Oral Tradition only)	3
NURSE 2105	Communication In The Nursing Profession	3
THEATR 1210	Fundamentals Of Acting	3
THEATR 2241	Argumentation and Debate	3

Additional courses that may meet this requirement:

1. A Course designated as a Verbal Communication course in transfer
2. Future courses, or specific sections of future topics courses, as approved by the General Education Committee

Information Literacy (3 hours): Students will become literate in accessing and analyzing information to further learning inside and outside the classroom and to become fully aware participants in the inter-connected global community.

Information Literacy courses are defined as those which:

- focus on the analysis and evaluation of information for objective accuracy, valid use, or appropriate construction
- use contemporary technologies to research, retrieve, synthesize, construct, or present information as needed for academic disciplines
- provide foundational skills that can be applied to any major or discipline
- require multiple assessments and evaluations of information sources for objectivity, accuracy, validity, etc.

The Information Literacy requirement may be met through one of the following courses:

CMP SCI 1012	Learning to Program Using Virtual Worlds	3
CMP SCI 1250	Introduction To Computing	3
CHEM 2223	Quantitative Analysis	3
CRIMIN 2210	Research Methods In Criminology And Criminal Justice	3

CRIMIN 2220	Statistical Analysis In Criminology And Criminal Justice	4
ED TECH 2230	Information Literacy	3
ENGL 2110	Information Literacy	3
HIST 2999	Introduction to Historical Inquiry	4
HONORS 1130	Western Traditions: Social And Behavioral Sciences (Science Vs Pseudo-science in Archaeology only)	3
HONORS 2010	Inquiries In The Humanities (Media Literacy only)	3
HONORS 2030	Inquiries In The Social And Behavioral Sciences (Evaluating the Media: A Theoretical Approach only)	3
INFSYS 1800	Computers And Information Systems ¹	3
INFSYS 2800	Information Systems Concepts And Applications	3
MATH 1105	Basic Probability And Statistics	3
MATH 1310	Elementary Statistical Methods	3
MATH 1320	Introduction to Probability and Statistics	3
MEDIA ST 1065	Internet Media	3
PHIL 2280	Minds, Brains, And Machines	3
POL SCI 2000	Political Analysis	3
PSYCH 2201	Psychological Statistics	4
PSYCH 2219	Research Methods	3
SOC 2280	Technology And Society	3

- ¹ Proficiency may be earned through placement test. Students who fulfill their information literacy through a placement test must take an additional General Education course in order to have a total of 42 credit hours of General Education courses.

Additional courses that may meet this requirement:

1. A course designated as an Information Literacy course in Transfer
2. Future courses, or specific sections of future topics courses, as approved by the General Education Committee

American History and Government (3 hours): Students will understand important facets of American history and its governmental structures from colonization to present day.

American History and Government courses are defined as those which:

- explore significant events in the history of American civilization from colonization to present day
- delineate major social movements in American history (e.g., suffrage, prohibition, civil rights)
- emphasize the structures of American government such as criminal, economic, legal, political, social, and military policies
- require multiple assessments and evaluations to demonstrate knowledge of specific events or policies and their consequences potential implications

Students must satisfactorily complete a course or courses in American history or government taken at UMSL or at other colleges or universities in Missouri. Transfer students should check with the Dean's Office of their division to determine if they have fulfilled this requirement.

The American History and Government Requirement may be met through one of the following courses:

CRIMIN 1100	Introduction To Criminology And Criminal Justice	3
ECON 2800	History Of American Economic Development	3
GS 2020	History of Women and Social Movements	3
HIST 1001	American Civilization To 1865	3
HIST 1002	American Civilization 1865 To Present	3
HIST 1003	African-American History	3
HIST 1004	The History Of Women In The United States	3
HIST 2001	Creating Early America: European Empires, Colonial Cultures, and Native Nations, 1565-1776	3
HIST 2004	United States History: The Civil War Era, 1860-1900	3
HIST 2005	The Modernization Of The United States	3
HIST 2006	Recent United States History	3
HIST 2007	History Of Missouri	3
HIST 2010	From Sea to Shining Sea: The American Frontier 1763 - 1890	3
HIST 2020	History of Women and Social Movements	3
HIST 2023	US Foreign Relations and Military History To 1900	3
HIST 2024	US Foreign Relations and Military History Since 1900	3
HIST 2800	History Of American Economic Development	3
HONORS 1230	American Traditions: Social And Behavioral Sciences	3
POL SCI 1100	Introduction To American Politics	3
POL SCI 2260	Law, Politics and Society	3
POL SCI 2280	Judicial Politics	3
POL SCI 2290	Gender And The Law	3
POL SCI 2300	State Politics	3
POL SCI 2320	African Americans And The Political System	3

Explore Area Descriptions

Courses used to fulfill core area requirements may not be applied to the explore area requirements.

Humanities and Fine Arts (9 hours): Students will have a deeper knowledge of the human experience and creative expression through visual and performing arts.

Humanities and Fine Arts Explore courses are defined as those which:

- focus on helping students understand, analyze, and explore human thought/actions and creation.
- provide critical/foundational discipline-specific skills that contribute to personal growth and well-being
- encourage a sense of connection to our shared and diverse pasts and to our contemporaries
- promote living in and contributing to various communities

These criteria must be evident in syllabus, assignments, and/or grading rubrics if the department/discipline is not identified as a Fine Art or as Humanities/Humanistic Studies in the NCES Classification of Instructional Programs (CIP).

This requirement is satisfied by completing 9 hours of coursework at the 1000 or 2000 level selected from at least two of the following areas: Art, Art History, English, Dance, History, Music, Philosophy, Theater, Foreign Language (FGN LANG) 2100, language courses at the 2000 level above 2101, Interdisciplinary and Honors courses with the Humanities or Fine Arts designation, and transfer courses designated as Humanities and Fine Arts general education courses at peer institutions and institutions with whom UMSL has an articulation agreement.

Social Sciences (9 hours): Students will understand and have the ability to view individual and social behavior/society from a variety of perspectives utilizing scientific methods.

Social Sciences Explore courses are defined as those which:

- the principle focus is on human society, including individual behavior and social relationships
- based on scientific principles
- reflect foundational, discipline specific knowledge that informs the human condition
- use multiple assessments of content knowledge within the social science framework

These criteria must be evident in syllabus, assignments, and/or grading rubrics if the department/discipline is not identified as a Social Science in the NCES Classification of Instructional Programs (CIP).

This requirement is satisfied by completing 9 hours of coursework at the 1000 or 2000 level selected from at least two of the following areas: Anthropology, Business Administration, Communication, Criminology and Criminal Justice, Economics, ED PSY 2212, Finance, Geography, Media Studies, Political Science, Psychology, Sociology, Interdisciplinary and Honors courses with the Social Sciences designation, and transfer courses designated as Social Sciences general education courses at peer institutions and institutions with whom UMSL has an articulation agreement.

Mathematics and Life/Natural Sciences (9 hours): Students will expand mathematical abilities and have an understanding of the branches of science that deal with living things and the physical world.

Mathematics and Life/Natural Sciences Explore courses are defined as those which:

- emphasize mathematical concepts and/or use scientific methods to understand the physical world

- use multiple assessments of computational and/or content knowledge within the mathematical and life/natural sciences framework

These criteria must be evident in syllabus, assignments, and/or grading rubrics if the department/discipline is not identified as a Mathematics and Statistics, Biological and Biomedical Sciences, or Physical Sciences in the NCES Classification of Instructional Programs (CIP).

This requirement is satisfied by completing 9 hours of coursework at the 1000 or 2000 level selected from at least two of the following areas: Astronomy, Atmospheric Science, Biology, Chemistry, Computer Science, Geology, Mathematics, Physics, Interdisciplinary and Honors courses with the Mathematics and Life/Natural Sciences designation, and transfer courses designated as Math and Life/Natural Sciences general education courses at peer institutions and institutions with whom UMSL has an articulation agreement.

Note: Gender Studies and Military and Veterans Studies courses that are cross-listed with disciplinary designations at the 1000 and 2000 levels may also be used to fulfill the explore area requirements.

Missouri Core 42

CORE 42 Transfer Curriculum

The CORE 42 Transfer Curriculum is a block of at least 42 credit hours that will transfer as equivalent credit at all Missouri public colleges and universities.

Students who complete the CORE 42 curriculum will meet the general education requirements for most liberal arts and sciences degrees at all public higher education institutions in the state. General education requirements for some degrees – including education, engineering and nursing – differ due to professional licensing and other requirements.

To complete the curriculum, students must earn a minimum number of credit hours in five knowledge areas:

- Mathematical sciences – three credit hours
- Natural sciences – seven credit hours, including a course with a lab
- Humanities and fine arts – nine credit hours from at least two disciplines
- Social and behavioral sciences – nine credit hours, including a civics course
- Written and oral communications – nine credit hours (six in written communications and three in oral communications)

Credits earned beyond the minimum in each knowledge area count toward the 42-hour minimum.

MOTR Course Equivalencies

Courses designated with a Missouri Transfer (MOTR) course number, guarantees the one-to-one transfer of these courses among all Missouri public institutions of higher education. UMSL courses can be found on the knowledge area tabs above.

For more information about CORE 42 and MOTR Course Equivalencies, visit <https://dhe.mo.gov/core42.php>.

College of Arts & Sciences

General Information

The College offers a wide range of accredited baccalaureate, master's and doctoral degrees and multi-disciplinary certificates through 18 departments.

- Actuarial Science (B.S.)
- Anthropology (B.A.)
- Biochemistry & Biotechnology (B.S., M.S.)
- Biology (B.A., B.S., M.S., Ph.D.)
- Chemistry and Biochemistry (B.A., B.S., M.S., Ph.D.)
- Communication (B.A.)
- Criminology and Criminal Justice (B.S., M.A., Ph.D.)
- Economics (B.A., B.S., M.A.)
- English (B.A., M.A., M.F.A.)
- Gender Studies (Certificate)
- Gerontology (Certificate)
- International Relations (B.A.)
- Media Studies (B.S.)
- Modern Languages (B.A. with concentrations in French, Japanese, Spanish and Dual Language Professional)
- History (B.A., M.A.)
- Interdisciplinary Studies (B.I.S.)
- Liberal Studies (B.L.S.)
- Mathematics and Computer Science (B.A., B.S., M.A., M.S., Ph.D.)
- Music (B.A., B.M.)
- Philosophy (B.A., M.A.)
- Physics and Astronomy (B.A., B.S., M.A., Ph.D.)
- Political Science (B.A., B.S.P.A., M.A., Ph.D.)
- Public Policy and Administration (M.P.P.A.)
- Psychology (B.A., B.S., M.A., Ph.D.)
- Sociology (B.A., B.S.)
- Studio Art (B.F.A.)

The College of Arts and Sciences consists of some 260 full-time faculty members in the following departments, each offering work in specific undergraduate degree programs: Anthropology, Art and Design, Biology, Chemistry, Communication and Media, Criminology and Criminal Justice, Economics, English, Languages and Cultural Studies, History, Mathematics and Computer Science, Philosophy, Physics and Astronomy, Political Science, Psychological Sciences, Sociology, and Theatre and Cinema Arts.

In addition the College offers a Bachelors Degree in Biochemistry and Biotechnology, a Bachelor of Liberal Studies and a Bachelor of Interdisciplinary Studies.

Graduate study degree programs, administered through the Graduate School, are also offered in the following departments of the College of Arts and Sciences: Biochemistry and Biotechnology, Biology, Chemistry, Criminology and Criminal Justice, Economics, English, History, Mathematics and Computer Science, Physics and Astronomy, Philosophy, Political Science, and Psychological Sciences. An interdisciplinary

master's degree in Public Policy Administration is offered in cooperation with the College of Business Administration. Specific degree requirements for both undergraduate and graduate degree programs are described in the departmental sections which follow this general information on the College.

Coursework in the evening or through on-line instruction is made available by all departments of the College. The following degree programs can be completed in the evening, or through a combination of evening and online courses:

- Bachelor of Arts in Biology, Chemistry, History, Mathematics, Psychology and Sociology
- Bachelor of Science in Biology, Chemistry, Computer Science, Criminology and Criminal Justice, Mathematics and Sociology
- Bachelor of Liberal Studies

Consult the website of the department in which you plan to major for details on degree requirements and a three year schedule of planned course offerings.

Requirements for Undergraduate Study

All majors in the College of Arts and Sciences, including Bachelor of Liberal Studies, must meet the following requirements:

- Requirements of their chosen baccalaureate degree (i.e., B.A., B.S., etc.) in accordance with the policies of the College of Arts and Sciences, explained below.
- Requirements of the department for their selected major or interdisciplinary program.
- Requirements for the University's general education (p. 41) & university requirements.
- Completion of INTDSC 1003 University Studies for all students admitted to UMSL with fewer than 24 academic credit hours.

Detailed information concerning all degree requirements can be found by visiting the Marcus Allen Advising Center (<http://www.ums.edu/divisions/artscience/student-resources>).

Academic Policies

Grade Requirements

To graduate, all majors in the college must satisfy one of the following grade point options:

- Have a minimum UMSL campus grade point average of 2.0 and have met all other grade point restrictions for the degree or program.

Cultural Diversity Requirement

To expand cultural awareness, students in some academic units may be required to complete a course that emphasizes Asian, African, Middle Eastern, Latin American, Pacific aboriginal, Native American, or a comparable culture. Courses that satisfy this requirement involve substantial material independent of the cultures' interactions with European cultures. If a course focuses on one facet of a culture, it must treat the topic within the context of the culture as a whole. A list of courses which satisfy this requirement can be found in the Undergraduate Study Graduation Requirements (p. 14) section of this Bulletin.

Residency Requirements

Transfer students must complete at least 30 of the last 36 hours of their degree program in residence at the University of Missouri-St. Louis.

Unless otherwise specified, a transfer student must complete 12 hours of graded work at UMSL at the 2000 level or above within the minimum number of hours required for each major.

Unless otherwise specified, a transfer student must complete at least six hours of graded work at UMSL at the 2000 level or above within the minimum number of hours required for each minor. Students should consult the minor department for specific residency and grade requirements.

Specific Baccalaureate Degree Requirements

Course Requirements

After fulfilling the general education and specific major degree requirements, students are to take the remaining hours required to complete the bachelor's degree from courses (which the appropriate department has evaluated as being of university-level quality) from one or more of the following areas or their university-quality equivalents at other institutions: Anthropology/Archaeology, Art (appreciation, history, studio), Astronomy, Biology, Chemistry, Communication, Criminology and Criminal Justice, Economics, English, Geology, History, Mathematics/Computer Science, Media Studies, Modern Languages (French, Japanese, Spanish), Music (appreciation, history, performance), Philosophy, Physics, Political Science, Psychology, Social Work, Sociology, Theatre, Business, Education, Engineering, or Interdisciplinary. Other areas or courses not listed require approval by the chair of the student's department.

Bachelor of Arts (B.A.)

All B.A. degree candidates must successfully complete a curriculum which includes a departmental major or an approved interdisciplinary field. A major must include at least 30 credit hours but no more than 45 hours. The College offers the B.A. degree in anthropology, biology, chemistry, economics, English, history, mathematics, modern languages, philosophy, physics, political science, psychology, and sociology.

Foreign Language Requirement

Candidates for the B.A. degree are required to complete 13 credit hours or the equivalent in proficiency in one foreign language. Foreign language guidelines are as follows:

1. Students entering with no high school language units must enroll in Language 1 or may enroll in the 2115 series (see section 4).
2. Students with the degree of proficiency equivalent to 13 hours of college-level work in French, German or Spanish may obtain exemption by passing the department's placement exam. The specific dates for the exam are posted on-line or may be obtained from Languages and Cultures at 314-516-6240.
3. Native speakers of language other than English may meet the foreign language requirement by presenting a transcript from a university or secondary school of their native country. The department will certify native speakers of those languages which are taught at the university. Those who are proficient in other languages must submit certification of competence to the college.
4. Language 2115 A, B, C (Intensive) will satisfy the foreign language requirement. Aptitude testing is required prior to enrollment. For

more information, call the Department of Languages and Cultures at 314-516-6240

5. Students may not repeat, for either credit or quality points, an elementary course if they have already completed a higher-level course for which the elementary course, or its equivalent, is a prerequisite.

Applied Music and Studio Art

Students not majoring in music may count no more than eight hours in music ensemble performance (EN PER 1400, EN PER 1410, EN PER 1500, EN PER 1520, etc). Students in the college not majoring in studio art may count any number of studio art hours toward a degree in the college. This includes transfer credit.

Bachelor of Science (B.S.)

The College offers the B.S. degree in mathematics, biochemistry and biotechnology, biology, chemistry, biochemistry, computer science, criminology and criminal justice, economics, physics (with emphasis in applied physics, astrophysics, engineering physics, or optical biophysics), and sociology. The requirements are generally the same as for the B.A. degree with the following exceptions:

1. More credit hours in the major discipline may be counted toward satisfying the 120 hours needed for graduation. See departmental degree requirements for information.
2. Not all departments require foreign language proficiency. See departmental degree requirements for information.

Bachelor of Liberal Studies (BLS)

(See Interdisciplinary Programs (p. 171) for complete description)

Bachelor of Interdisciplinary Studies (BIS)

(See Interdisciplinary Programs (p. 171) for complete description)

Bachelor of Science in Public Policy and Administration (B.S.P.A.)

The B.S.P.A. degree program is administered through the Political Science Department and offers two emphasis areas. Public Administration emphasizes management in the public and nonprofit sectors. Public Policy allows focus on a particular policy area with attention to analytic training and research skills.

Bachelor of Fine Arts (B.F.A.)

The College offers the B.F.A. degree in studio art. A foreign language is not required. Students choosing an emphasis in drawing, graphic design, painting, photography, printmaking or general fine arts must take at least 75 credit hours in studio art (including 30 hours in the foundation art program). Students seeking K-12 art teacher certification take a minimum of 50 credit hours in studio art (including 30 hours in the foundation art program) and must fulfill the General Education Requirements in both the College of Education and the College of Arts and Sciences.

Bachelor of Music (B.M.)

The College offers the B.M. degree in music education, performance and with elective studies in business. The requirements are the same as for the B.A. degree with the addition of music education courses for music majors seeking state teacher certification. Although foreign language

proficiency is not required, foreign language study is required for applied voice students.

Minors

A number of minors is available at UMSL. Some are offered by individual departments, while others, such as Classical Studies are interdisciplinary in nature and involve several departments. The requirements for the various minors are listed in either the departmental or interdisciplinary sections of this Bulletin.

Special Programs

Certificate Programs

Graduate and undergraduate certificate programs are offered in archaeology biochemistry, biotechnology, forensic economics, labor studies, gerontology, studies in religions, trauma studies, tropical and conservation biology, nonprofit organization management and leadership, psychology-clinical re-specialization, gender studies, and writing.

International Studies Certificate

In cooperation with International Studies and Programs and other Colleges, the College offers certificate programs in African, East Asian, European, Greek, International, and Latin American studies. The College also cooperates in offering the International Business Certificate.

Departmental Honors

Majors in the following departments may pursue departmental honors: biology, chemistry, economics, English, history, modern languages, and political science. Majors in criminology and criminal justice may pursue placement on the chair's list.

Cooperative Education and Internship Programs

Cooperative education and internship programs are available for students seeking career-related employment while enrolled in school. These programs afford Arts and Sciences students an opportunity to gain practical experience and earn a substantial income. Co-ops and internships are administered through Career Services, 278 Millennium Student Center.

College of Arts and Sciences Extension

Credit courses are offered at off-campus locations through the continuing education branch of the College of Arts and Sciences. These courses are open to UMSL students and qualify for regular academic credit toward degrees in the college. In addition, noncredit courses are offered in a range of disciplines within the college.

Latin Honors Requirements

In accordance with the University's Latin Honors policy (p. 20), candidates graduating from the College of Arts and Sciences in the 2018-2019 Academic Year must meet the following GPA qualifications:

Summa Cum Laude	3.938
Magna Cum Laude	3.826
Cum Laude	3.597

Actuarial Science

Campus Address: 408 Social Sciences and Business Building (SSB)

Main Number: 314-516-5353

Fax Number: 314-516-5352

Bachelor of Science (B.S.) in Actuarial Science

The B.S. in Actuarial Science provides students with the quantitative skills used by actuaries. Students are required to complete courses offered by the Department of Mathematics and Computer Science, the Department of Economics and the College of Business Administration. Students take coursework in calculus, financial mathematics, statistics, economics, econometrics, and finance. The program is designed to provide students with a solid preparation to take exams and to complete validation by educational experience requirements needed to begin a career as an actuary.

Certificate in Actuarial Studies

The Certificate in Actuarial Studies is designed to provide the education needed for entry level employment in the actuarial profession.

Career Outlook in Actuarial Science

Graduates with this skill set are hired by insurance firms, consulting firms, and financial institutions. Actuarial training is also transferable to broader jobs in data science and analytics. Job prospects for those with actuarial degrees are expected to remain strong over the next decade.

For more information on careers in actuarial science, visit the website of the Society of Actuaries (<https://www.soa.org/Member/>).

Bachelor of Science in Actuarial Science General Education Requirements

Students must satisfy the university general education requirements (p. 41). Many of the courses for the degree may be used to fulfill math proficiency, information literacy, social science, and math and life/natural sciences requirements. There is no foreign language requirement for the degree.

Satisfactory/Unsatisfactory Option

Courses required for the major may not be taken on a satisfactory/unsatisfactory basis.

Required Courses

Candidates for the B.S. in Actuarial Science degree must complete a program of 62 credit hours of required courses. Each required course must be completed with a grade of C- or better and students must maintain a GPA of 2.0 for courses required for the degree.

ACCTNG 2400	Fundamentals of Financial Accounting	3
CMP SCI 1250	Introduction to Computing	3
ECON 1001	Principles of Microeconomics	3
ECON 1002	Principles of Macroeconomics	3
ECON 4100	Introduction to Econometrics	4
ECON 4120	Time Series Econometrics for Economics and Finance	4

or ECON 4130	Business and Economic Forecasting	
FINANCE 3500	Financial Management	3
FINANCE 3521	Financial Engineering: Applying Derivatives	3
FINANCE 3561	Principles of Insurance	3
INFSYS 2800	Information Systems Concepts and Applications	3
MATH 1800	Analytic Geometry And Calculus I	5
MATH 1900	Analytic Geometry And Calculus II	5
MATH 2000	Analytic Geometry And Calculus III	5
MATH 1320	Introduction to Probability and Statistics	3
or ECON 3100	Economic Statistics	
MATH 3010	Financial Mathematics I	3
MATH 3020	Financial Mathematics II	3
MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3
Total Hours		62

Recommended Courses

Students are strongly encouraged to take as many of the following courses as possible.

CMP SCI 2250	Programming and Data Structures	3
ECON 3001	Intermediate Microeconomics	3
ECON 3002	Intermediate Macroeconomics	3
ECON 4110	Applied Econometrics	4
ECON 4995	Internship in Actuarial Science	1-3
or MATH 4995		
MATH 2450	Elementary Linear Algebra	3
MATH 4260	Introduction to Stochastic Processes	3

Certificate in Actuarial Studies

Actuaries use the tools of economics, finance, and mathematics to evaluate and price risk. They are employed by insurance companies, pension funds, consulting firms, and a variety of other financial institutions. The actuarial profession has consistently been ranked as one of the most desirable professions in which to be employed. To become an actuary one must satisfy certain educational requirements, pass exams offered by the Society of Actuaries, and complete professional courses.

The Certificate in Actuarial Studies is designed to provide the education needed for entry level employment in the actuarial profession. Those who complete the certificate will satisfy some of the Validation by Educational Experience requirement of the Society of Actuaries and be prepared to take the first two actuarial examinations (P and FM).

Completion of the certificate requires the following courses. Please note that many of these courses have prerequisites so anyone pursuing the certificate should work carefully with an academic advisor.

Required Courses

FINANCE 3500	Financial Management	3
FINANCE 3521	Financial Engineering: Applying Derivatives	3
MATH 3010	Financial Mathematics I	3
MATH 3020	Financial Mathematics II	3

MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3
Total Hours		18

Residency Requirement: Of the above required six courses at least five must be taken at the University of Missouri-St. Louis.

	16		16
Total Hours: 120			

Accounting

ACCTNG 2400 Fundamentals of Financial Accounting: 3 semester hours

Prerequisites: MATH 1030 and completion of 27 credit hours. MATH 1030 may be taken concurrently. This is a one semester course in financial accounting theory and practice. The primary emphasis is on the corporate financial statements of income, financial position and cash flow-their content and interpretation; and the impact of financial transactions upon them.

Computer Science

CMP SCI 1250 Introduction to Computing: 3 semester hours

Prerequisites: MATH 1030 or MATH 1045 with B- or better, or MATH 1100, or MATH 1800, or a 70% on the proctored UMSL ALEKS Math Placement obtained at most one year prior to enrollment in this course. This course provides an introduction to the concepts of computation, problem solving, and computer systems. It covers fundamental programming constructs, basic data types, and modularization using a modern high level language. Problem solving skills are developed through a progression of programming projects.

CMP SCI 2250 Programming and Data Structures: 3 semester hours

Prerequisite: CMP SCI 1250. Continuation of CMP SCI 1250. Discusses properties and implementation of abstract data types such as lists, trees, stacks and queues. Introduces procedural and class abstraction, basic program architecture, use of interfaces, modular programming, and file processing.

Economics

ECON 1001 Principles of Microeconomics (MOTR ECON 102): 3 semester hours

Prerequisite: MATH 1030. Introduction to the determinants of household demand, production and cost, and market prices. Applies the principles of individual decision-making behavior to understanding goods, services and resource markets.

ECON 1002 Principles of Macroeconomics (MOTR ECON 101): 3 semester hours

Prerequisite: MATH 1030 and ECON 1001. Introduction to the determination of levels of and changes in aggregate income, output, employment and prices. Applies economic principles of choice to the formulation and achievement of public policies that affect national employment, income distribution, and economic growth.

ECON 3001 Intermediate Microeconomics: 3 semester hours

Prerequisite: MATH 1030 and ECON 1001. Analysis of prices in terms of equilibrium of the business firm and consumer demand in markets of varying degrees of competition.

ECON 3002 Intermediate Macroeconomics: 3 semester hours

Prerequisite: MATH 1030, ECON 1001 and ECON 1002; ECON 3200 is recommended. Study of national income, expenditure and the forces determining the level of economic activity. Special emphasis on the theory of income determination and its application to public policy.

ECON 4100 Introduction to Econometrics: 4 semester hours

Prerequisites: ECON 1001 and ECON 1002; ECON 3100 or MATH 1320 or SCMA 3300; MATH 1800 or MATH 1100. An introduction to quantitative analysis of economic behavior. The ordinary least squares technique and the assumptions underlying it are developed. Methods designed to detect and correct for the violations of these assumptions are examined. Special emphasis is given to the practical application of the procedures discussed through the use of computer exercises.

ECON 4120 Time Series Econometrics for Economics and Finance: 4 semester hours

Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Introduction to application of econometric methods to timeseries data. Emphasis on model specification as it appears to macroeconomic or financial data. Topics include: Stationary and non-stationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

ECON 4130 Business and Economic Forecasting: 4 semester hours

Prerequisites: ECON 4100 or equivalent. Alternative forecasting methodologies for economic time series will be analyzed and discussed. The focus of the course will be: (1) the development of time-series (ARIMA) models and their application to forecasting; (2) the use of standard econometric models for forecasting; and (3) evaluation and comparison of these methods and the conditions under which each is the appropriate methodology. This course includes laboratory work in quantitative economic analysis.

ECON 4995 Internship in Actuarial Science: 1-3 semester hours

Same as MATH 4995. Prerequisites: Junior standing and consent of program director. Supervised off-campus training in a private or public sector position in which the student applies the knowledge and skills learned in their actuarial science coursework. The internship is monitored by a faculty member and the student must provide a written report at the end of the project. This course may be repeated for a maximum of 6 credit hours.

Finance

FINANCE 3500 Financial Management: 3 semester hours

Prerequisites: ECON 1002, MATH 1105, ACCTNG 2400, INFSYS 2800, and a minimum overall GPA of 2.0. The study of a firm's need for funds; the institutions, instruments and markets concerned with raising funds; and the techniques of analysis used to determine how effectively these funds, once raised, are invested within the firm.

FINANCE 3521 Financial Engineering: Applying Derivatives: 3 semester hours

Prerequisites: FINANCE 3500. Students engage in a comprehensive investigation of advanced risk management techniques. Futures, forwards, options and synthetic securities are explored to determine their effectiveness in generating the desired risk exposure. A comprehensive study of speculative market conditions and characteristics are assessed in conjunction with a variety of financial innovations. Valuation techniques and hedging theories are combined with mathematical models to determine their effectiveness in practical situations. Special topics are introduced as market conditions dictate. It is recommended that students take Investments (FINANCE 3520) prior to enrolling in FINANCE 3521.

FINANCE 3561 Principles of Insurance: 3 semester hours

Prerequisites: FINANCE 3500 and a 2.0 campus GPA. This is a survey course intended to introduce students to the basic concepts of insurance. Topics include the nature of risks, types of insurance carriers and markets, insurance contracts and policies, property and casualty coverages, life and health insurance, and government regulations. The functions of underwriting, setting premiums, risk analysis, loss prevention, and financial administration of carriers are emphasized.

Information Systems

INFSYS 2800 Information Systems Concepts and Applications: 3 semester hours

Prerequisites: INFSYS 1800 or satisfactory performance on proficiency exam. This course provides an overview of the field of information systems including concepts of systems analysis and design, ethics in information systems usage, electronic business, database management, enterprise systems, information security, and JavaScript programming concepts. Business cases will be utilized to illustrate how information systems improve decision-making. Students will also gain valuable strategies for career development and networking.

Mathematics

MATH 1800 Analytic Geometry and Calculus I: 5 semester hours

Prerequisites: MATH 1030 and MATH 1035, or MATH 1040 and MATH 1035, or MATH 1045, or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. This course provides an introduction to differential and integral calculus. Topics include limits, derivatives, related rates, Newton's method, the Mean-Value Theorem, Max-Min problems, the integral, the Fundamental Theorem of Integral Calculus, areas, volumes, and average values.

MATH 1900 Analytic Geometry and Calculus II: 5 semester hours

Prerequisite: MATH 1800. Topics include conic sections, rotation of axes, polar coordinates, exponential and logarithmic functions, inverse (trigonometric) functions, integration techniques, applications of the integral (including mass, moments, arc length, and hydrostatic pressure), parametric equations, infinite series, power and Taylor series.

MATH 2000 Analytic Geometry and Calculus III: 5 semester hours

Prerequisite: MATH 1900. Topics include vectors, cylindrical and spherical coordinates, vector-valued functions, arc length and curvature, functions of several variables, partial and directional derivatives, gradients, extrema, Lagrange multipliers, multiple integrals, change of variables, surface area, vector fields, Stokes' Theorem.

MATH 1320 Introduction to Probability and Statistics: 3 semester hours

Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or consent of the department. The course will cover basic concepts and methods in probability and statistics. Topics include descriptive statistics, probabilities of events, random variables and their distributions, sampling distributions, estimation of population parameters, confidence intervals and hypothesis testing for population means and population proportions, chi-square tests. A student may not receive credit for more than one of MATH 1310, MATH 1320 and MATH 1105.

MATH 2450 Elementary Linear Algebra: 3 semester hours

Prerequisite: MATH 1100 or MATH 1900. An introduction to linear algebra. Topics will include complex numbers, geometric vectors in two and three dimensions and their linear transformations, the algebra of matrices, determinants, solutions of systems of equations, eigenvalues and eigenvectors.

MATH 3020 Financial Mathematics II: 3 semester hours

Prerequisites: MATH 3010. This course introduces the premium-discount formula for bonds, bond amortization, term structure of interest rates and pricing theory for options.

MATH 4200 Mathematical Statistics I: 3 semester hours

Prerequisites: MATH 1320 and MATH 2000. Introduction to the theory of probability and statistics using concepts and methods of calculus.

MATH 4210 Mathematical Statistics II: 3 semester hours

Prerequisites: MATH 4200. Continuation of MATH 4200. Sampling distributions, estimation theory, properties of estimators, hypothesis testing, Neyman-Pearson Theorem, likelihood ratio tests, introduction of analysis of variance and linear models. Basics of some nonparametric procedures.

MATH 4260 Introduction to Stochastic Processes: 3 semester hours

Prerequisites: MATH 4200. Basic theory and applications of stochastic processes. Markov chains, recurrent and transient states, stationary distributions, ergodic theorem, renewal processes, discrete martingales and stationary processes.

MATH 4995 Internship in Actuarial Science: 1-3 semester hours

Same as ECON 4995. Prerequisites: Junior standing and consent of program director. Supervised off-campus training in a private or public sector position in which the student applies the knowledge and skills learned in their actuarial science coursework. The internship is monitored by a faculty member and the student must provide a written report at the end of the project. This course may be repeated for a maximum of 6 credit hours.

Anthropology and Archaeology

General Information

Anthropologists take a broad approach to understanding the diversity of human biology, culture, and language in the past and present. We teach students how to see their culture and the cultures of others more clearly, and how to work with the underlying humanity that unifies us all.

Anthropologists draw and build up knowledge from the social, biological, and physical sciences as well as the humanities. They are typically trained in one of four subfields: archaeology, biological/physical anthropology, linguistic anthropology, and sociocultural anthropology. Anthropologists consider the past to see how human groups lived hundreds or thousands of years ago. They research what makes up our biological bodies, genetics, diet and health. They want to know what people think is important, try to understand how people interact in social relationships, and look at the many ways people dress, organize their settlements, get their food, and communicate in different cultures.

Anthropologists teach how cultures evolve and the role of individuals and groups in the invention and perpetuation of cultural beliefs, behaviors, symbols, and systems. They have accumulated in-depth knowledge of hundreds of cultures and use this knowledge to understand better our own cultural beliefs, actions, and institutions, as well as those of people from other cultures. As the science of cultures, anthropology brings a powerful perspective to the understanding of the emerging global order and offers solutions to current human problems. Cross-cultural and evolutionary insights and knowledge help us envision how we can incorporate vast human diversity into a unified world order of peace, prosperity, justice, and opportunity.

Degrees and Areas of Concentration

A Bachelor of Arts in Anthropology focuses on applied, methodological, and theoretical skills. Faculty members are involved in regional and global research that encompasses studies in gender and sexuality, body culture and sports, food and diet, health care, human variation, culture diversity principles, the origins of democracy, war, mythology and more.

Students may join faculty in excavations of local archaeological sites or a Bronze Age Mycenaean palace in Greece. The program maintains an archaeology lab and library with one of the largest collections of artifacts from eastern Missouri. Students can study Forensic Anthropology and work with the program's collection of 19th century skeletal remains.

Opportunities exist for students to pursue diverse research experiences on a vast range of topics on human actions, beliefs and organization and intern with local organizations.

Student Experience

Students may work closely with faculty in designing their personal course of study and carrying out their own research projects in any of the above fields of study. Students have presented research results at professional meetings, in published papers, and at government and community agencies for use in planning and development. Students are encouraged to participate in the program's network of internships, providing an opportunity to practice newly acquired skills. As a capstone experience, all students, under faculty supervision, complete a significant independent research project, culminating in written and oral reports to the department students and faculty. The program encourages study abroad

and has scholarship funds to assist. There is an active Association of Student Anthropologists that sponsors speakers and social activities.

Paid undergraduate positions are available on a competitive basis to anthropology majors as teaching assistants and faculty research assistants.

Minor in Anthropology

The minor in anthropology is designed to offer students a flexible introduction to the fundamentals of the discipline to complement their major field of study. A minor is advisable for anyone planning a career with intercultural or international dimensions, where knowledge of cultural systems, environments, values, and symbols is useful.

Minor in Global Health and Social Medicine

This interdisciplinary minor is ideal for students seeking to make a difference in improving health and wellbeing, locally and globally. It is a path to better understand the cultural and social contexts in which they will practice medicine and make them more well-round health care providers.

Certificate in Archaeology

The certificate in archaeology provides applied training in both laboratory and field methods to students who could be hired in the field of cultural resource management and historic preservation. Internships can be arranged with the UMSL archaeology lab or with a local institution.

Certificate in Ethnicity, Migration, and Human Diversity

This interdisciplinary certificate provides students with opportunities to explore the impact of human diversity and movement around the world and on the multi-cultural city of St. Louis. It fosters sensitivity, provides intercultural competence sought by employers, and prepares students for long-term engagement in community affairs.

Career Outlook

The world needs anthropologists. The B.A. in Anthropology equips the student for employment in almost any area in which a bachelor's degree is sufficient and a sensitivity to cultural values and diversity is important. Graduates have found employment as university professors and lawyers and in archaeology research programs, urban development, planning programs, health care delivery, human services, business, government service, teaching, computer systems design, and university administration. Anthropology is excellent preparation for graduate and professional training in administration, the helping professions, development work, law, environmental studies, international and human resource areas of business, and in many other areas, depending upon individual interests. Many UMSL anthropology graduates have gone on to advanced training in master's, doctoral, and professional programs in respected universities around the country. For more career information, contact the program at 314-516-6020 for an appointment to talk with an appropriate faculty member or to request an information packet.

Undergraduate Studies

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 41). Any foreign language may be used to meet the language requirement for the B.A. degrees.

Bachelor of Arts in Anthropology

All required courses for the major must be completed with a grade of C- or better. The following courses are required:

ANTHRO 1005	Introduction To Biological Anthropology	4
ANTHRO 1011	Introduction To Cultural Anthropology	3
ANTHRO 1019	Introduction To Archaeology	3
ANTHRO 4315	Anthropology Past, Present, and Future	3
Select nine additional credit hours in Anthropology numbered 1000-2999 ¹		9
Select two of the following methods courses:		6
ANTHRO 3209	Forensic Anthropology	
ANTHRO 3211	Linguistic Anthropology	
ANTHRO 3220	Social Statistics	
ANTHRO 4000	Ethnographic Field Research Methods	
ANTHRO 4100	Field Methods in Archaeology	
ANTHRO 4200	Field Methods in Biological Anthropology	
ANTHRO 4310	Laboratory Methods In Archaeology	
Select nine additional credit hours in Anthropology numbered 3000-4999		9
Total Hours		37

¹ The three courses must come from two different subfields: Cultural Anthropology, Archaeology, or Biological Anthropology.

The total number of hours required for the major is 37. Students may elect to take up to, but not to exceed, 15 additional hours in anthropology courses of their choice.

At the end of the program, students should have these competencies:

- Discipline-Specific (Content) Knowledge
Graduates will be able to discuss the importance of cultural diversity, thus preparing them to function in multicultural or international settings. Graduates will understand the common evolutionary origins that unify all cultural differences, as well as human biological variation within our shared humanity. Graduates will develop in-depth knowledge of the culture of a particular region of the world.
- Communication Skills
Graduates will develop social science writing skills, including writing of a research proposal for a grant agency and a substantial research report. Graduates will develop oral presentation skills, including presenting a formal research report.
- Information Management/Quantitative Skills
Graduates will master research methods in one of the subfields of anthropology (cultural anthropology, biological anthropology,

archaeology). Graduates will learn to design and conduct an original research project, working in close cooperation with faculty.

- **Valuing/Ethics/Integrity**
Graduates will be able to discuss and articulate the professional ethics and codes of conduct of the discipline.
- **Critical Thinking Skills**
Graduates will develop the ability to apply anthropological concepts in performing critical analysis of broad historical trends and complex social issues. Graduates will be able to value cultural diversity, thus preparing them to function in multicultural or international settings.
- **Application/Internship Skills**
Graduates will gain hands-on experience in the application of anthropological concepts to real life and will be able to apply anthropological theory to real-life experience.

Residency Requirement

Undergraduate majors must complete a minimum of 17 hours of upper-level (3000-5000) Anthropology courses in residence, including:

ANTHRO 4315	Anthropology Past, Present, and Future	3
And at least one of the following:		3
ANTHRO 3211	Linguistic Anthropology	
ANTHRO 4000	Ethnographic Field Research Methods	
ANTHRO 4100	Field Methods in Archaeology	
ANTHRO 4200	Field Methods in Biological Anthropology	
		6

Anthropology Minor

There are three possible emphases in the minor: Cultural Anthropology, Archaeology, and Biological/Forensic Anthropology.

Select one of the following		3-4
ANTHRO 1011	Introduction To Cultural Anthropology	
ANTHRO 1019	Introduction To Archaeology	
ANTHRO 1005	Introduction To Biological Anthropology	
Anthropology numbered 1000-2999		3
Select on of the following methods courses		3
ANTHRO 3211	Linguistic Anthropology	
ANTHRO 4000	Ethnographic Field Research Methods	
ANTHRO 4100	Field Methods in Archaeology	
ANTHRO 4200	Field Methods in Biological Anthropology	
In addition to the above methods course, select 6 hours of Anthropology numbered 3000-4999		6
Total Hours		15-16

All required courses for the minor must be completed with a grade of C- or better.

Global Health and Social Medicine Minor

Select one of the following 1000-level courses:		3-4
ANTHRO 1005	Introduction To Biological Anthropology	
ANTHRO 1021	The Body In Culture	
BIOL 1131	Human Physiology And Anatomy I	
Select one of the following 2000 level courses:		3
ANTHRO 2104	Medicine in Culture and History	
ANTHRO 2105	Human Variation	
SOC 2180	Alcohol, Drugs And Society	
SOC 2338	Health & Society	
Select two of the following 3000-4000 level courses:		6
ANTHRO 3209	Forensic Anthropology	
ANTHRO/GERON 3212	Medical Anthropology	
ANTHRO 3217	Anthropology of Pregnancy and Birth	
ANTHRO 3215	Aging Across Cultures	
ANTHRO 3245	Evolutionary Medicine	
SOC 3250	Sociology Of Victimization	
SOC 4361	Social Gerontology	
GERON 4445	Aging, Chronic Illness & Disability	
GERON 4500	Physiology & Pharmacology of Aging	
Select one of the following courses:		3
ANTHRO 4000	Ethnographic Field Research Methods	
ANTHRO 4307	Community Based Research in Anthropology	
SOC 4307	Community-Based Research in Sociology	

Total Hours 15-16

All required courses for the minor must be completed with a grade of C- or better.

Archaeology Certificate

ANTHRO 1019	Introduction To Archaeology	3
ANTHRO numbered 2100-2199 with an archaeological emphasis.		3
ANTHRO numbered 3200-3299 with an archaeological emphasis.		3
ANTHRO 4100	Field Methods in Archaeology	3
ANTHRO 4310	Laboratory Methods In Archaeology	3
ANTHRO 4326	Internship In Archaeology	3
Total Hours		18

Certificate in Ethnicity, Migration and Human Diversity

An interdisciplinary certificate in which students explore the impact of human diversity and movement around the world and on the multi-cultural city of St. Louis. It fosters sensitivity, provides intercultural competence sought by employers, and prepares students for long-term engagement in community affairs. Students can concentrate on specific regions and diaspora groups. Courses examine cross-cutting relationships, group identities and questions of social justice resulting from ethnic, religious,

geo-historical, gendered and racialized differences, including the ways in which these elements are viewed by other cultures and nations.

Core Course

ANTHRO 2105	Human Variation	3
-------------	-----------------	---

Diversity and Social Justice Options 3

Choose one of the following:

POL SCI 3460	The Politics Of Poverty And Welfare (also available online)	
SOC/GS 4360	Sociology Of Minority Groups	
SOC WK/GS 3700	Diversity And Social Justice	
CRIMIN 4340	Race, Crime, And Justice	

Group or Region Specific Courses 9

9 hours required, choose at least TWO disciplines

Asia/Pacific

ANTHRO 2111	Cultures Of East Asia	
ANTHRO 3237	Contemporary Japanese Culture	
POL SCI 2550	East Asian Politics	
SOC WK 2330	Asians In Migration	

Africa

ANTHRO 2124	Introduction to Contemporary African Cultures	
HIST 1062	African Civilization II: From Colonies to Nations	
POL SCI 2580	African Politics	
POL SCI 3880	Diaspora Politics, Transnational Remittances, and Global Citizenship	

Gender

ANTHRO 1041	Sex And Gender Across Cultures	
ANTHRO 3235	Women In Sub-Saharan Africa: A Contemporary Perspective	
ANTHRO 3236	Sex Trafficking in Cross-Cultural Perspective	
ANTHRO 4391/ POL SCI 3570	Current Issues In Anthropology (If topic appropriate.)	
POL SCI 1850	Global Ecology	
CRIMIN 4325	Gender, Crime, And Justice	

Mideast

ANTHRO 2114	Cultures Of The Near And Middle East	
POL SCI 3500	The Politics of the Middle East: International and National Dynamics	

Central/South America

HIST 2053	Modern Mexico	
HIST 3051	Latin America: From Conquest to Independence	
POL SCI 2530	Political Systems Of South America	
POL SCI 2540	Political Systems Of Mexico, Central America And The Caribbean	

Indigenous Populations

ANTHRO 2120	Native Peoples Of North America (also available online)	
HIST 2012	The Indian In American History	
ANTHRO 2123	Cultures Of Oceania	

ANTHRO 2134	Archaeology Of The Inca, Aztec, And Maya	
ANTHRO 3244	Religion, Magic And Science	
Urban Diversity		
SOC 3344	Problems Of Urban Community	
ANTHRO/SOC 4307	Community Based Research in Anthropology	
CRIMIN 3305	Comparative Criminology and Criminal Justice	
POL SCI 4520	Mega-Cities and Diasporas: Understanding Global Migration	
SOC WK 4670	Cross Cultural Perspectives On Social Policy	
SOC WK 4900	Special Study	
TCH ED 3212	Sociolinguistics and Communication in the Classroom	
Special Topics (with consent, depending on the content)		
ANTHRO/PHIL 1163	Disagreement, Difference, Diversity	
ANTHRO 2191	Special Topics In Non-Western Culture	
POL SCI 4900	Topics In Political Science	

Capstone Experience (one required) 3

Independent Study (choose field: Anthropology, Political Science, Social Work, Sociology, Criminology and Criminal Justice)

Senior Seminar (Topic subject to approval of coordinator)

Internship:

ANTHRO 4325	Internship In Cultural Anthropology	
ANTHRO 4328	Internship In Museum Studies	
POL SCI 3490	Studies In Public Administration	
INTL BUS 4280	International Business Experience	
Social Work Internship or Field Experience		

Study Abroad Semester

Total Hours 18

Total Hours: 121		

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Courses

ANTHRO 1005 Introduction to Biological Anthropology: 4 semester hours

Topics include evolutionary theory and its development, the evolution/creationist debate, Mendelian & population genetics, the evolutionary place of humans within the animal kingdom, anatomical and behavioral characteristics of primates, fossilization, primate evolution, the human evolutionary fossil record, biological variability in modern humans, race as a biological concept, and applied biological anthropology. In addition to 3 hours of lecture, 1 hour per week is spent in lab classifying ancient human fossils, observing monkeys and apes at the zoo, and doing other projects. Satisfies the Natural Science and Mathematics (SM) breadth of study requirement.

ANTHRO 1007 Human Origins and Diversity: 3 semester hours

An exploration of humans from our origins in deep time to the present. Topics include modern human biological diversity, biocultural adaptations, the hominid fossil record, an overview of the living non-human primates and what makes us unique as a species. We will examine the humans from a biological and cultural perspective to gain an understanding of where we fit into the natural world.

ANTHRO 1011 Introduction To Cultural Anthropology (MOTR ANTH 201): 3 semester hours

Cultural anthropology is the study of human beings as creatures and creators of society. This course is an introduction to that study which aims to demonstrate how the basic concepts and techniques developed by cultural anthropologists help us to understand societies of various degrees of complexity, including our own. We will consider topics such as language, kinship, gender, ethnicity, economics, politics, religion, and social change in a broad comparative framework. Major goals are an increased awareness of the social and cultural dimensions of human experience, the diversity and flexibility of human cultures, and processes of intercultural communication and conflict. This course satisfies the Cultural Diversity Requirement.

ANTHRO 1019 Introduction to Archaeology: 3 semester hours

Archaeology is a subfield of anthropology that studies past human societies from their material remains. Explores the development of archaeology as a scientific discipline. Archaeological methods and theories will be explained using case studies from the continents of Africa, Asia, Australia, Europe and the Americas. Satisfies the Cultural Diversity requirement.

ANTHRO 1021 The Body in Culture: 3 semester hours

This course will compare uses of the body as a social signifier in Western and non-Western cultures. It will explore how culture shapes the images, uses and meanings of the human body. It concentrates on different historical and beliefs in five areas: how the body works; sex and gender; eating manners and food; pain and punishment; beauty and bodily mutilation. This course satisfies the Cultural Diversity requirement.

ANTHRO 1025 World Cultures: 3 semester hours

An ethnographic survey of the major culture areas of the world (Africa, North and South America, Europe and Oceania). Satisfies the Cultural Diversity requirement.

ANTHRO 1030 Democracy and War: 3 semester hours

Using the world's first democracy in ancient Greece as a case study, this course will address questions about the origins of democracy, the key elements of a successful democratic government, the mechanisms by which democratic and non-democratic states go to war, the manner in which they cope with war and the psychological effects of war on warriors and civilian populations that will help us learn how our own democracy works and affects our lives.

ANTHRO 1033 World Archaeology: 3 semester hours

Discusses some of the greatest discoveries in archaeology from prehistoric cultures to ancient civilizations of Africa, Asia, Australia, Europe and the Americas. Archaeological examples may include early human origins at Olduvai Gorge in Tanzania, the pyramids of ancient Egypt, the Maya and Aztec of Mexico, the rise of civilization in Mesopotamia, England's Stonehenge, the Roman city of Pompeii, upper Paleolithic cave paintings in France and Spain, and American Indian pueblos of the Southwest. This introductory course is designed for non-anthropology majors, or for those who are considering the major. Satisfies the Cultural Diversity requirement.

ANTHRO 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours

Same as HIST 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization's enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

ANTHRO 1038 Byzantine History and Culture: 3 semester hours

Same as HIST 1038. This course introduces the history of the Byzantine Empire from the fourth through the fifteen centuries. Covering more than a millennium of history, this course focuses on selected aspects of the empire's history, while adhering to a basic chronological frame. We will examine religious developments (monasticism, theological controversy, the Catholic-Orthodox Schism); military and cultural interactions with neighbors (Crusaders, Islam); and Byzantine culture, particularly art, literature, and architecture.

ANTHRO 1041 Sex and Gender Across Cultures: 3 semester hours

This course considers womanhood, manhood, third genders, and sexuality in a broad cross-cultural perspective. The focus of the course is on the diverse cultural logics that separate females, males, and sometimes third genders into different groups in different societies, with the male group usually being the more prestigious one. Focusing on the indigenous nonWestern cultures, this course examines gender roles and sexuality within the broader cultural contexts of ritual and symbolism, family, marriage and kinship, economy, politics, and public life. This course will help students understand what it is like to be male or female in non-Western cultures. This course fulfills the Cultural Diversity Requirement.

ANTHRO 1051 Sport, Culture, and Society: 3 semester hours

Same as SOC 1051. What is the relationship between sport, culture, and society? This course takes a critical and analytical approach to the relationship between sport and socio-cultural issues and institutions: values, education, socialization, deviance, violence, inequality, the mass media, and economics. Students will investigate the functions of sport in various cultures and societies, analyze the relationship between sport and social problems, and develop policy recommendations that address these issues.

ANTHRO 1052 The Olympic Games: Ideals and Reality: 3 semester hours

What would the ancient Greeks think of the modern Olympic Games? In this course, we examine whether the Olympic Games are living up to their ancient Greek ideals. We begin studying the history and philosophy of the ancient Olympic festival in an effort to understand the personal, educational, and political nature of the Olympic ideal. Next we examine the historical and contemporary reality of the modern Games from the perspective of athletes, spectators, and society at large. Based on these accounts, we critically evaluate the Games' success and failure with respect to their ideals. Finally, we develop constructive solutions to the problems we identify, suggesting practical ways to revise the Olympic ideals and/or improve Olympic reality.

ANTHRO 1091 Introductory Topics in Anthropology: 3 semester hours

This course features special and current topics at the introductory level in the areas of social, cultural and physical anthropology and archaeology. The course examines the basic concepts and provides an understanding of the development of new trends and areas of study in the field of Anthropology. Topics will focus on the comparative study of non-Western cultures such as ecological practices in tribal societies; religious practices in prehistoric cultures; the roles of women across cultures; etc. Topics may vary and the course may be repeated provided topic is different. This course satisfies the Cultural Diversity requirement.

ANTHRO 1095 Brief Overview of the Four Fields of Anthropology: 1 semester hour

Through the use of videos, readings, and the online course management system, this course provides a brief overview of the four traditional fields of anthropology: biological, archaeological, cultural, and linguistic anthropology. This course is designed for video instruction and offers minimal direct interaction with the instructor.

ANTHRO 1163 Disagreement, Difference, Diversity: 6 semester hours

Same as PHIL 1163. This interdisciplinary course will combine material from philosophy, anthropology, and sociology to examine the ways we encounter and accommodate disagreement in our daily lives. The unifying thread is our ability to deal with various sorts of opposition: differences of opinion, differences in practice, and differences in how we construct and address both biological and cultural variation. The course will combine units on informal logic and applied ethics from philosophy together with units on the social construction of difference and the understanding of human diversity from anthropology and sociology.

ANTHRO 1710 Native American Literature: 3 semester hours

The course surveys the literature of American Indians from its oral tradition of myth, legend, song, and oratory through its modern forms. The course satisfies the ethnic literature requirement for Missouri State Certification in Secondary Education and the College of Arts and Sciences Cultural Diversity requirement.

ANTHRO 2003 Careers in Health and Medicine: 1 semester hour

Same as INTDSC 2003, GERON 2003, SOC 2003. In this course, students will learn about occupations in such fields as medicine, the allied health professions, health non-profit organizations, and global healthcare delivery. Students will understand the education and skills necessary for various careers and for application to medical, professional, and graduate schools, and will become familiar with majors, certificates and minors that are available at UMSL. They will learn about employment opportunities in the healthcare industry in the St. Louis metropolitan area, and will be introduced to members of the local community who give guest lectures. Students will gain practical experience by shadowing a healthcare professional in their job.

ANTHRO 2035 Ancient Greek Civilization and Culture: 3 semester hours

A survey of the history, language, literature, art, science, and philosophy of the ancient Greeks from prehistory to the Roman conquest. It covers the glamorous Minoan-Mycenaean civilization, the rise of classical Greek civilization and the golden age, the history of the city states such as Athens and Sparta, and the Hellenistic period under Alexander the Great and his descendants. Examines the nature of the ancient Greek language, surveys literary classics such as the Iliad and the Odyssey, and describes the archaeology of Greek myths based on the ongoing UM-St. Louis archaeological project in Greece. Discusses the rise of humanism, the ancient Olympic Games, and the legacy of ancient Greece in Western civilization.

ANTHRO 2100 Languages and World View: 3 semester hours

Same as FGN LANG 2100 and SOC 2200. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

ANTHRO 2101 Girl Cultures: 3 semester hours

Drawing on anthropology and girl studies, this course will explore the themes of identity construction, sexuality, media representation, and cultural production found in a spectrum of international and US girl cultures. It will cover the ways in which teens and young women construct their own forms of femininity through girl cultures such as Geek Girl Cosplayers, Mexican American Cholas, Punk Girls, Japanese Gyarū, and Muslim Lolitas. Through music, language, fashion, and diverse activities they express local subcultural dreams and values, as well as shared global currents. Satisfies the Cultural Diversity Requirement.

ANTHRO 2104 Medicine in Culture and History: 3 semester hours

Students will explore the diverse beliefs and practices related to anatomy, disease, sexual reproduction, gender, sport, and food. Western biomedicine will be compared with traditional Chinese medicine and other non-Western traditions such as shamanic, Native American, Tibetan, and Ayurvedic systems. The clash between traditional and modern medical systems will also be examined.

ANTHRO 2105 Human Variation: 3 semester hours

This course will look at the variation that exists within our own species, both between and within populations. It will investigate the evolutionary and genetic basis of human variation, as well as its diversity, adaptive significance, and distribution. Topics covered will include: body shape and physiology, blood groups, susceptibility to disease, and skin color. It will survey historical attempts to classify humans into different "races"; assess definitions of race as a solely cultural construct; and critique attempts to link race, intelligence and performance.

ANTHRO 2109 Archaeological Field School: 3-6 semester hours

Prerequisites: Consent of instructor. Introduction to field methods in archaeology and to the techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in a field research project including excavation and survey projects. Emphasis is placed upon research design and implementation and upon the use of archaeological data in describing and explaining human behavior.

ANTHRO 2111 Cultures of East Asia: 3 semester hours

An ethnographic and historical survey of the various people of East Asia including Japan, China, North and South Korea, Hong Kong and Macau. Includes an examination of the varying cultural and social developments within and through the historical, geographical, and cultural environments. This course satisfies the Cultural Diversity requirement.

ANTHRO 2117 Greek History and Culture: 3 semester hours

Same as HIST 2117. Greek civilization has had a deep impact on contemporary society in art; social; political; and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek history, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

ANTHRO 2118 Modern Greek History and Culture: 3 semester hours

Same as HIST 2118. A history of Modern Greece, from the fall of Constantinople (1453) to the present, with an emphasis on social, cultural, and political developments. The course will provide a chronological framework of events and it will utilize art, literature, and folklore, along with traditional historical sources, to gain a better understanding of the richness of modern Greek history and culture.

ANTHRO 2120 Native Peoples of North America: 3 semester hours

A survey of Native Peoples of North America including the prehistory, ethnographic and linguistic groupings, social organization, and cultural systems of these cultures.

ANTHRO 2121 Native American Spirituality: 3 semester hours

This class will look at the important role of spirituality in American Indian ways of life. This course covers indigenous peoples of the United States and Canada, from prehistoric times to the present. It will look at traditional worldviews and their preservation in contemporary times, including the use of symbols to define tribal identities; religious rituals and practices; and the relationship between humans, animals, and nature. Satisfies Cultural Diversity requirement.

ANTHRO 2123 Cultures of Oceania: 3 semester hours

An introduction to the original cultures and peoples of the South and Western Pacific: New Guinea, Australia, New Zealand, Samoa, Hawaii, Easter Island, etc. Focus is on art, religion, language, relationships to the environment, economics, politics social groupings, and how these intertwine to form distinctly adaptive cultures in one of the least understood regions of the world. This course satisfies the Cultural Diversity requirement.

ANTHRO 2124 Introduction to Contemporary African Cultures: 3 semester hours

This introductory course focuses on multiple representations within contemporary African cultures and societies. Students have an opportunity to study and learn about African cultural expressions in belief systems, gender constructions, nationality and ethnicity, socioeconomic class systems, politics, environmental challenges, and cultural adaptations and change. Satisfies the Cultural Diversity requirement.

ANTHRO 2131 Archaeology of Missouri: 3 semester hours

An introduction to the prehistoric American Indian cultures of Missouri and adjacent areas from 20,000 years ago to the coming of the Europeans. Examines the development of prehistoric cultures in Missouri from small bands of hunters and gatherers to moundbuilding, agricultural societies and discusses the decline of indigenous cultures as they came into contact with European civilization. Satisfies the Cultural Diversity requirement.

ANTHRO 2132 Archaeology of North America: 3 semester hours

Examines the archaeological record of human developments throughout prehistoric North America. Topics of discussion include the origins of human culture in America, the processes of prehistoric cultural development in the different regions of the continent, and archaeological approaches to explaining the behavior of North America's prehistoric inhabitants. Satisfies the Cultural Diversity requirement.

ANTHRO 2134 Archaeology of The Inca, Aztec, And Maya: 3 semester hours

Provides an overview of human social and cultural developments in Mesoamerica and Andean South America from the first settlements over 20,000 years ago to the Spanish conquest. Focuses on events leading to and including the establishment of Classic Mayan and Aztec societies, and discusses changes that led to what was perhaps the largest nation on earth for its time, the Inca. Satisfies the Cultural Diversity requirement.

ANTHRO 2139 Shamans, Serpents, and Spirits: Archaeology of the Borderlands: 3 semester hours

This course will explore the archaeology of the American Southwest and Northern Mexico. Students will study unique cultures developed at places such as Pueblo Bonito, Mesa Verde, and Casas Grandes. Living in such a harsh environment necessitated novel cultural developments in housing, settlement patterns, religion, and agriculture. These innovations allowed the development of great and influential cultures interacting with cultures far and wide. Emphasis will be placed on religion, social hierarchy, architecture, cosmology, shamanism, and trade. Satisfies the Cultural Diversity requirement.

ANTHRO 2150 *Zombies, Vampires, and Monsters: The Supernatural in Popular Culture*: 3 semester hours

Beliefs in the unseen world are universal. Zombies, vampires, and monsters are all elements of the supernatural in popular culture that we can analyze to discover deeper meanings about what it means to be human. This course will also cover magic, witchcraft, ghosts, possession, exorcism, and other beliefs and practices that reveal the views that humans have about their place in the world. This course will use anthropological concepts to make the familiar strange, and the strange familiar.

ANTHRO 2191 *Special Topics in Non-Western Culture*: 3 semester hours

This course focuses on a specific non-western culture, or geographically related groups of cultures. Ethnographic and/or archaeological cultures are chosen and their ecological economic, social, religious, cosmological, political, ethnic, linguistic and other cultural domains are examined. Students are exposed to basic concepts and knowledge for understanding diverse cultures in their historical and/or contemporary contexts of development and relationship. Topics will vary. Satisfies Cultural Diversity Requirement.

ANTHRO 2192 *Anthropological Perspectives on Western Culture*: 3 semester hours

This course focuses on a specific Western culture or geographically-related group of cultures utilizing ethnographic and/or archaeological sources. Ecological, economic, social, political, ethnic, religious, linguistic and cultural domains will be examined. Students are exposed to basic anthropological concepts for understanding diverse cultures in their historical and/or contemporary contexts. Topics will vary.

ANTHRO 2232 *Analysis of Archaeological Artifacts*: 3 semester hours

Prerequisites: ANTHRO 1019 or ANTHRO 2109 or consent of instructor. This course teaches the methods and techniques for analyzing the artifacts from an archaeological dig. Students learn to process, analyze, and interpret ceramics, stone tools, plant and animal debris according to form, design, use wear, and associations. This analysis will form the basis of interpretations about human behaviors and cultural and temporal affiliations. The student will prepare a report of the examined collection.

ANTHRO 3202 *History and Theory of Anthropology*: 3 semester hours

Prerequisites: ANTHRO 1005, ANTHRO 1006, ANTHRO 1011, or ANTHRO 1019. An overview of the history and theory of anthropology from the Victorian era to today with an emphasis on putting theory into practice. The purpose of the course is to help students understand where anthropology has come from and where it may be going, and to teach students how to apply theory to specific questions and problems.

ANTHRO 3209 *Forensic Anthropology*: 4 semester hours

Same as CRIMIN 3209. Prerequisites: ANTHRO 1005, or BIOL 1102, or junior standing, or consent of instructor. Students learn basic dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to determine age and sex of skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to analyze skeletal remains.

ANTHRO 3211 *Linguistic Anthropology*: 3 semester hours

Same as SOC 3211. Prerequisites: Junior standing. Variable topics in the subfield of linguistic anthropology will be explored. The focus of the course may include study of communication as part of our evolutionary heritage, the use of language as an index of social and cultural change, language and gender, or other topics.

ANTHRO 3212 *Medical Anthropology*: 3 semester hours

Same as GERON 3212 and SOC 3212. Prerequisites: ANTHRO 1011 or GERON 2170 or PSYCH 1003 or SOC 1010 or consent of instructor or program director. An examination of the growing interaction between anthropology and medicine, and the increasing use of anthropologists in medical and health-care settings. In addition to teaching current theory in medical anthropology, the course focuses on anthropologically-based skills essential to those working in health-related fields.

ANTHRO 3214 *Writing Systems of the World*: 3 semester hours

Prerequisite: ANTHRO 1011 or consent of instructor. This course is an introduction to the comparative study of writing systems from around the world. It explores the origin and development of Sumerian cuneiform, Mayan glyphs, Egyptian hieroglyphs, Chinese characters, alphabets and syllabaries. It encompasses time periods from the decipherment of ancient languages to the intersections of writing and culture found in the contemporary world.

ANTHRO 3215 *Aging Across Cultures*: 3 semester hours

Same as GERON 3215. Prerequisites: ANTHRO 1011 or PSYCH 1003 or SOC 1010, or consent of instructor. This course examines the wide ranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

ANTHRO 3216 *Cognition Across Cultures*: 3 semester hours

Prerequisites: ANTHRO 1011 or introductory course in another social science, or consent of instructor. This course explores cognition - perception, knowledge and thought - as a set of social and cultural processes. An introduction to methods for understanding the human mind in context. It will cover key debates, including: cross-cultural variation in thought processes (cognitive relativity vs. psychic unity), the relation between physiology and consciousness, ethnoscience, the social and cultural construction of reality, the different ways that social contexts affect the way people think, the implications of the way knowledge is distributed across society, the social and cultural basis of logic.

ANTHRO 3217 *Anthropology of Pregnancy and Birth*: 3 semester hours

Prerequisites: Junior standing or consent of instructor. Birth and pregnancy play important roles in shaping human anatomy and culture. Human biological anatomy is shaped by the physical requirements of childbirth and pregnancy, and cultural adaptations have developed to address the issues associated with them. This course employs a biocultural approach that explores evolutionary perspectives on anatomy and physiology, biocultural perspectives on modern birth, and cross-cultural analyses of birthing practices worldwide.

ANTHRO 3220 *Social Statistics*: 3 semester hours

Same as SOC 3220. Prerequisites: SOC 1010 or ANTHRO 1011 and MATH 1020 or MATH 1030. Issues and techniques of statistical analyses relevant to quantitative social science research, e.g. elementary probability, measures of central tendency and dispersion, measures of relationships including linear regression and correlation, inferential and nonparametric statistics. The course includes an introduction to computer-based statistical analysis.

ANTHRO 3225 Ritual, Death and Sports: Archaeology of Greek Mythology: 3 semester hours

Prerequisites: ANTHRO 1019 or ANTHRO 1011 or consent of instructor. Since the beginning of our existence, humans have pondered the mysteries of life and death and have strived to find meaning in a constantly changing world. In Western civilization, Greek mythology and religion represent humanity's earliest attempts to deal with the greater forces that affect our lives, which found expression in the great religious and athletic festivals, such as the Olympic Games. We will study the myths, rituals, religious beliefs of the ancient Greeks and how these were expressed in sports and art, in order to get a glimpse of the supernatural. The sources of our exploration are two: the fascinating archaeological discoveries of ancient Greek sites and relevant readings from the ancient Greek literature.

ANTHRO 3228 People and Plants: 3 semester hours

Prerequisites: ANTHRO 1011 or ANTHRO 1019 or consent of instructor. This course is designed to introduce students to complex relationships between people and plants. We will focus on how plants are perceived, managed, and used across human societies. Topics span the ages and include collection of wild plants and "Stone Age" diets; the origins of agriculture in Ancient Egypt, Mesopotamia, China, and the Americas; the development of crops and GMOs; industrial agriculture; organic gardening; and the wilderness-to-table movement. While emphasis will be on food plants, we will also discuss the use of plants as medicines, cosmetics, dyes, and construction materials.

ANTHRO 3229 Economic Archaeology And Anthropology: 3 semester hours

Prerequisites: ANTHRO 1011 or ANTHRO 1019 or consent of instructor. Course examines economic organization and behavior in a crosscultural context. It looks at the various ways anthropologists have approached the study of economy, and explores how cultural factors such as relations of power, gender, kinship, and ideology affect economic organization in ancient and modern societies. Most of the course will focus on pre-industrial societies (including hunter-gather, tribal, and complex societies), and will address issues of subsistence strategies, craft production and specialization, trade and exchange, money, and markets. It will also briefly explore how modern communities around the globe are responding to contemporary processes like capitalism and globalization.

ANTHRO 3232 Environmental Archaeology: 3 semester hours

Prerequisites: Junior standing or consent of instructor. Environmental archeology is the science of reconstructing the relationships between past peoples and the natural environment in which they lived. This course will explore theory, methods, data, and advances for this area of study within archaeology. Case studies will be drawn from cultures throughout the world. Students will learn how to design an environmental archaeology project, be familiar with the literature and research conducted to date, and master knowledge about past cultures.

ANTHRO 3235 Women in Subsaharan Africa: A Contemporary Perspective: 3 semester hours

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Examines important traditional concerns of anthropologists such as the nature of kinship obligation and privilege; gender as a basis for the division of labor; social organization for formal and informal networks; and ritual and ceremony. In addition we look closely at the changing role of African women, as related by African women testing the very limits of what is "socially and culturally acceptable." The roles women continue to play in politics, comprehensive development (i.e. cultural and economic), and evolving social structures are reviewed to gain an understanding of the historical and contemporary mandates for their social action. This course fulfills the Cultural Diversity requirement.

ANTHRO 3236 Sex Trafficking in Cross-Cultural Perspective: 3 semester hours

Prerequisites: ANTHRO 1041, GS 2150 or GS 2102 or consent of instructor. This course introduces the history of and current issues in the international sex industry, including human trafficking, slavery, and prostitution in Europe, Asia, Africa, South America, and North America. It will evaluate the power structures (political, economic, and military institutions) and the process, organization and structure of the industry within the context of nationality, ethnicity, and class, with particular emphasis on voluntary (immigration) and forced (displacement) population migration. Finally, it will look at current legislation and methods to control this growing problem, especially in the United States.

ANTHRO 3237 Contemporary Japanese Culture: 3 semester hours

Same as SOC 3237. Prerequisites: Junior standing. Through ethnographies, biographies, fiction, films, anime, manga, television, music, magazines, and other media, the course investigates a range of topics related to Japanese history, social diversity, subcultural identity, gender, demographic change, and media. The study of Japanese culture is ideal for understanding theoretical issues such as the construction of gender and sexuality, identity formation, nationalism, emerging youth cultures, and the processes of globalization and localization. Satisfies University cultural diversity requirements.

ANTHRO 3241 Myths and Monuments: 3 semester hours

This course will provide an overview of Greek myths and legends, as well as their reception in architecture, the visual arts, and literature. Particular emphasis will be given to: 1) the theology and the creation myths of the Greeks and how these relate to the Bible; 2) heroic myths from the Trojan War to Atlantis, and their historicity; 3) famous monuments, works of art, and texts from Greek and world literature, that advance our understanding of Greek myths and the culture that created them.

ANTHRO 3244 Religion, Magic and Science: 3 semester hours

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. A consideration of the roles of religion, magic, and science in culture and social organization.

ANTHRO 3245 Evolutionary Medicine: 3 semester hours

Prerequisites: ANTHRO 1005, or ANTHRO 2105, or 1000 level Biology course or equivalent, or permission of instructor. This course will explore the way in which human individual and population-level health is a product of our evolutionary history and adaptation to environments that may differ from those we live in today. Topics explore growth, reproduction, and aging, activity and exercise, chronic and infectious disease, and diet, and include examples from many societies with implications for our own. The course prepares students to analyze critically modern concepts of 'disease,' 'health,' and 'treatment medicine' through the lens of human-environmental interaction and adaptation.

ANTHRO 3270 Human Ecology, Cultural Collapse, and Sustainable Developments: 3 semester hours

Prerequisites: ANTHRO 1019 or consent of the instructor. Human interactions with the natural environment will be explored by reviewing approaches, concepts, and tools from ecological anthropology and archaeology. Case studies based on archaeological, ethnographic, and ethnological data will be analyzed and discussions expanded to include information about past and present, sustainable human-environmental interactions, policies, and contributing institutions.

ANTHRO 3290 Advanced Topics in Archaeology: 3 semester hours

Prerequisites: ANTHRO 1019, or consent of instructor. Selected topics in archeology with a strong theoretical and methodological approach. Requires substantial reading and writing. May be repeated with consent of department.

ANTHRO 3291 Current Issues in Anthropology: 3 semester hours

Prerequisites: ANTHRO 1011, or introductory course in another social science, or consent of instructor. Selected topics in social, cultural and physical anthropology, with emphasis on current issues and trends in the field of anthropology. May be repeated provided topic is different.

ANTHRO 4000 Ethnographic Field Research Methods: 3 semester hours

Prerequisites: ANTHRO 1011, SOC 1010, or consent of instructor. Ethnographic field research is the basis of cultural anthropological inquiry. This course emphasizes hands-on training in the collection and analysis of ethnographic data, including participant observation, taking and managing field notes, key informant interviewing, content analysis and the preparation of ethnographic field reports.

ANTHRO 4005 Special Research Methods in Cultural Anthropology: 1-3 semester hours

Prerequisites: ANTHRO 1011 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in cultural anthropology and/or linguistic anthropology. May be repeated provided the topic is different.

ANTHRO 4100 Field Methods in Archaeology: 3 semester hours

Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in archaeological field methods including techniques of recording, storing, analyzing, and reporting archaeological findings. Experience is gained through participation in excavations and/or surveys. Emphasis is placed upon research design and implementation and the use of archaeological data in describing and explaining human behavior.

ANTHRO 4105 Special Research Methods in Archaeology: 1-3 semester hours

Prerequisites: ANTHRO 1019 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in archaeology. May be repeated provided the topic is different.

ANTHRO 4160 Geographical Information Systems in Anthropology and Sociology: 4 semester hours

Same as SOC 4160. Prerequisites: ANTHRO 1005, or ANTHRO 1011, or ANTHRO 1019, or SOC 1010, or consent of instructor. Instruction in use of GIS software to record and analyze findings in archaeology, biological anthropology, cultural anthropology, and sociology. Emphasis is placed upon research design, development of data collection methodologies, and the use of GIS in describing and explaining human behavior and its relationship to the physical environment.

ANTHRO 4200 Field Methods in Biological Anthropology: 3 semester hours

Prerequisites: ANTHRO 1005 or consent of instructor. Course material is based on human skeletal biology and bioarchaeology. The course focuses on 1) training a biological anthropologist; 2) bibliographic research; 3) research methods including skeletal pathology, geographic morphological variants, and developmental changes; 4) giving academic presentations and writing research reports. Students are required to conduct self-directed research on human skeletal remains.

ANTHRO 4205 Special Research Methods in Biological Anthropology: 1-3 semester hours

Prerequisites: ANTHRO 1005 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in biological anthropology. May be repeated provided the topic is different.

ANTHRO 4206 Primate Behavioral Research at the Saint Louis Zoo: 3 semester hours

Prerequisites: Junior standing or consent of instructor. This course will provide students with a comprehensive overview of research techniques as they relate to the study of primate behavior. Students will be guided through the process of developing an independent primate behavioral research project. Then they will have the opportunity to collect, analyze, and interpret data as it relates to their research questions. Data collection will occur at the St. Louis Zoo.

ANTHRO 4305 Special Research Methods in Anthropology: 1-3 semester hours

Prerequisites: ANTHRO 1005 or ANTHRO 1011 or ANTHRO 1019 or consent of instructor. Advanced instruction in specialized technical and analytical skills and methods used to conduct research in anthropology and may combine skills from cultural anthropology, linguistic anthropology, archaeology, and/or biological anthropology. May be repeated provided the topic is different.

ANTHRO 4307 Community Based Research in Anthropology: 3 semester hours

Prerequisites: Junior standing, ANTHRO 1011, ANTHRO 3202, and completion of junior-level writing requirement. An advanced course in qualitative/ethnographic modes of inquiry, building on research and analytical skills learned in previous courses. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying anthropological knowledge to practical issues faced by communities and institutions in the St. Louis area. May be repeated provided the topic is repeated.

ANTHRO 4309 Archaeological Field School: 3-6 semester hours

Prerequisites: Consent of instructor. Advanced methods in field archaeology and laboratory analysis. Emphasis is placed on sampling, the use of theory in guiding field and laboratory work, advanced field techniques, and speciality analysis. Opportunities are provided for the development of field and laboratory leadership skills. Independent research is encouraged.

ANTHRO 4310 Laboratory Methods in Archaeology: 3 semester hours

Prerequisites: ANTHRO 1019, SOC 3220 or equivalent, or consent of instructor. An advanced laboratory analysis and curation methods class. The emphases are 1) mastery of general lab methods and procedures, and 2) development of independent analysis skills in one or more specialty areas such as lithics, ceramics, computer graphics, statistical methods, paleoethnobotany, experimental analysis, and soils.

ANTHRO 4312 *Who Owns the Past: Cultural Heritage and Preservation*: 3 semester hours

Prerequisites: Consent of instructor. As a physical representation of the past, objects take on different roles within a society, from a tool for learning, to a unifying symbol of identity. Those objects often become the focus of debates concerning who actually owns the past. This course examines the role of cultural patrimony within society and the ways in which attempts to control, manage, and interpret it have played out within the public sphere. The role of museums within modern society and their attempts to follow educational missions while also respecting the rights of indigenous peoples will be examined.

ANTHRO 4314 *The Archaeology of Death*: 3 semester hours

Prerequisites: ANTHRO 1005 or consent of the instructor. This course will survey some of the different ways people have buried their dead over time. Using archaeology as their foundation, students will explore what burials can tell us about culture and society. During field trips to local cemeteries, they will study current perceptions of death and future archaeological records. Students will conduct demographic analysis of both local and global cemeteries to help them understand the relationships between death, burial, and aging.

ANTHRO 4315 *Anthropology Past, Present, and Future*: 3 semester hours

Prerequisites: Senior standing, one of the following method courses: ANTHRO 4000, ANTHRO 4100, ANTHRO 4200, and consent of the instructor. The capstone course for anthropology majors, ideally to be taken in the final semester of the senior year. In this course, students will 1) explore where anthropology has come from and where it may be going; 2) discuss a series of topics that can be addressed from the perspectives of different subfields by examining different theoretical positions, methods, and types of data; 3) learn to apply the knowledge and skills gained in previous courses to their future, professional careers. Final senior exit projects will be presented orally to Anthropology faculty members.

ANTHRO 4316 *Senior Research Project*: 3 semester hours

Prerequisites: Senior standing and consent of the instructor. For undergraduates who have excelled in their coursework and wish to conduct original research. Students will work with a faculty member with expertise relevant to the research topic. This course offers students the opportunity to build upon strong research, analytic and writing skills. Completion of this course will result in the writing of a thesis, publication of an article, presentation at a professional meeting, or other work that exemplifies high achievement.

ANTHRO 4325 *Internship in Cultural Anthropology*: 1-3 semester hours

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Cultural Anthropology internships are aimed at providing students with opportunities to learn to apply their knowledge of social and cultural process and diversity to practical situations in the market place of ideas, goods, and services. Specific placements will be selected to match student's interests and career goals.

ANTHRO 4326 *Internship in Archaeology*: 1-6 semester hours

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate public or private institution, business, or government office. Archaeology internships are aimed at providing students with opportunities to work with professional archaeologists in public and private research environments including laboratories and curation centers. Specific placements will be selected to match student's interests and career goals.

ANTHRO 4328 *Internship in Museum Studies*: 1-3 semester hours

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate museum or other exhibition oriented institution. Museum internships are aimed at providing students with opportunities to work with professional museologists to learn skills relating to areas such as exhibition, curation, public programming, research, and publication. Specific placements will be selected to match student's interests and career goals.

ANTHRO 4329 *Internship in Physical Anthropology*: 1-3 semester hours

Prerequisite: Recommendation of major advisor. Students will be assigned an internship on recommendation of their advisor. Internships will consist of a period of study, observation, and training in an appropriate institution, lab, or research setting related to forensics, primate behavior and biology, human genetics, population, environmental policy, and other domains related to physical anthropology.

ANTHRO 4350 *Special Study*: 1-3 semester hours

Prerequisite: Consent of instructor. Independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Special Study.

ANTHRO 4391 *Current Issues in Anthropology*: 1-4 semester hours

Prerequisite: ANTHRO 1011 or consent of instructor. Selected topics in social, cultural, and physical anthropology, with emphasis on current issues and trends in the field of anthropology. May be repeated. Non-majors may register for ANTHRO 2191.

ANTHRO 5440 *Sociocultural Aspects of Aging*: 3 semester hours

Same as GERON 5440. Prerequisites: Graduate status or consent of the instructor or program director. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

ANTHRO 5592 *The History of the Visual Arts in American Museums*: 3 semester hours

Same as HIST 5592 and ART HS 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

ANTHRO 6136 Foundations of Museology II: 3 semester hours

Same as ART HS 6036 and HIST 6136. Prerequisites: Consent of Director of Museum Studies Program. Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

ANTHRO 6138 Museum Studies Master's Project: 5 semester hours

Same as ART HS 6038 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

ANTHRO 6139 Practicum In Exhibit & Program Development: 3 semester hours

Prerequisites: Consent of Director of Museum Studies Program. Development of exhibits and related education programs. Students work as teams with museum professionals to develop and implement an exhibit concept that integrates design, education, and marketing from the onset. Methods in planning, flow charting, budgeting, team dynamics and related skills.

Biochemistry and Biotechnology

General Information

Degrees

The Biochemistry and Biotechnology Program provides academic programs leading to the undergraduate B.S. degree or the graduate M.S. degree in Biochemistry and Biotechnology. These degrees are offered in cooperation with the Department of Biology and the Department of Chemistry and Biochemistry. Faculty members in this program are engaged in teaching and research in areas such as biochemistry, genetics, molecular biology, cell biology and developmental biology. Majors have the opportunity through coursework, laboratories, seminars and research experience to develop the knowledge and skills necessary to enter the workforce or to go on with further graduate education.

Career Outlook

The emerging Biotechnology sector is increasing the regional and national demand for workers with significant training in molecular biology, biochemistry, and genetics. The St. Louis metropolitan area has long been a major center for biochemistry and biotechnology, and in the past decade it has become a national hub for life sciences research and development activity. A degree in Biochemistry and Biotechnology provides students with the training they need to become part of the broad biotechnology and life sciences industries.

Undergraduate Studies

Degree Requirements

Bachelor of Science in Biochemistry and Biotechnology

General Education Requirements

Students must satisfy the university and college general education requirements (p. 41). Some math or science courses required for the major may be used to meet the science and mathematics requirement of the university. There is no foreign language requirement for the degree.

All Biochemistry & Biotechnology majors are required to take a capstone seminar (either CHEM 4797 or BIOL 4797) during the semester in which

they plan to graduate (the winter semester for students graduating in the summer). Students may not receive credit for both CHEM 4797 and BIOL 4797).

Satisfactory/Unsatisfactory Option

Up to 18 credit hours may be taken on a satisfactory /unsatisfactory (s/u). Excluded from this option are required courses in biology, chemistry, physics, and mathematics.

Non-major Biology or Chemistry courses

Courses in Biology with a number less than 1800 and courses in Chemistry with a number less than 1100 do not count toward the credit hours required for a major in biochemistry and biotechnology.

Research for Credit

A maximum of 3 credit hours from any combination of BIOL 4905 and CHEM 3905 may be applied toward the Biochemistry & Biotechnology program.

Transfer of Credit from Saint Louis Community Colleges

Students transferring BIO 219 and BIO 220 from Saint Louis Community Colleges will not have to complete BIOL 4614. However, they will have to take an additional 3 credit hours of Biochemistry and Biotechnology Elective coursework.

Biology Core Courses

BIOL 1831	Introductory Biology: From Molecules To Organisms	5
BIOL 2012	Genetics	3
BIOL 2013	Genetics Laboratory	2
BIOL 2482	Microbiology	3
BIOL 2483	Microbiology Laboratory	2
BIOL 3622	Cell Biology	3

Chemistry Core Courses

CHEM 1111	Introductory Chemistry I	5
CHEM 1121	Introductory Chemistry II	5
CHEM 2223	Quantitative Analysis	3
CHEM 2612	Organic Chemistry I	3
CHEM 2622	Organic Chemistry II	3
CHEM 2633	Organic Chemistry Laboratory	2
CHEM 3302	Physical Chemistry For The Life Sciences	3

Math and Physics Core Courses

MATH 1030	College Algebra	3
MATH 1035	Trigonometry	2
MATH 1100	Basic Calculus	3
or MATH 1800	Analytic Geometry And Calculus I	
PHYSICS 1011	Basic Physics I	4
PHYSICS 1012	Basic Physics II	4

Biochemistry and Biotechnology Core Courses

BIOL 4602	Molecular Biology (if both courses are taken, one can be used as an elective)	3
or BIOL 4612	Molecular Genetics Of Bacteria	

BIOL 4614	Biotechnology Laboratory I (if both courses are taken, one can be used as an elective)	4
or BIOL 4615	Biotechnology Laboratory II	
BIOL/CHEM 4712	Biochemistry	3
CHEM 4733	Biochemistry Laboratory	2
CHEM 4722	Advanced Biochemistry	3
BIOL 4797	Biochemistry and Biotechnology Seminar (Students may not receive credit for both BIOL 4797 and CHEM 4797)	1
or CHEM 4797	Biochemistry and Biotechnology Seminar	

Biochemistry and Biotechnology Elective Courses

Select two of the following:		6
BIOL 4550	Bacterial Pathogenesis	
BIOL 4602	Molecular Biology	
BIOL 4612	Molecular Genetics Of Bacteria	
BIOL 4614	Biotechnology Laboratory I	
BIOL 4615	Biotechnology Laboratory II	
BIOL 4622	Cellular Basis of Disease	
BIOL 4632	Nucleic Acid Structure And Function	
BIOL 4642	Plant Molecular Biology and Genetic Engineering	
BIOL 4652	Virology	
BIOL 4842	Immunobiology	
BIOL 4905	Research (up to 3 credit hours)	
BIOL 4920	Selected Topics in Biology (when relevant)	
CHEM 3643	Advanced Organic Chemistry Laboratory	
CHEM 3905	Chemical Research	
CHEM 4772	Physical Biochemistry	

Total Hours 80

Electives

Recommendations include basic statistics (MATH 1310 or MATH 1320), computer science, public speaking (COMM 1040), foreign language, ethics, and undergraduate research.

B.S./M.S. Dual Degree Program in Biochemistry and Biotechnology

The BS/MS ("2+3") BCBT program is an accelerated program that allows students of appropriate academic ability and maturity to complete both a B.S. and a M.S. in Biochemistry and Biotechnology in five years of full time study. The program allows students to apply 12 of the 30 M.S. credit hours towards the B.S. (per the approval of the College of Arts and Sciences), reducing the overall required hours for the two. Students will pay graduate credit hour tuition for all courses applied to the graduate degree. All other requirements for the B.S. and M.S. degrees remain in effect.

Admission Requirements

Students interested in this program must go through a two-step admission process. First, applicants for Provisional Status must have completed all courses in the biology, chemistry, math and physics cores of the B.S. BCBT program. CHEM 4712/ BIOL 4712 Biochemistry must be in progress or completed prior to applying for Provisional Graduate status. Applicants

should have completed all of the general education requirements. Applicants must also have a minimum G.P.A. of 3.0 (both overall and in science courses) and must submit at least two letters of recommendation (one instructor and one academic advisor is recommended).

The second step of the admission process is the transition from Provisional status to formal graduate status. Admission requirements for formal graduate status are the same as for the traditional MS program.

Awarding of Degrees

Both degrees (the B.S. and M.S.) will be awarded when all requirements for the entire program have been completed. In other words, the B.S. and M.S. degrees will be simultaneously awarded at the completion of study.

Students who officially withdraw from the BS/MS Dual BCBT Degree Program and who have successfully completed all of the requirements for the B.S. degree will be awarded the B.S. degree.

Research Opportunity

Students may use up to 3 credit hours of undergraduate research as elective hours in the B.S. degree. This provides an opportunity to gain research experience under the supervision of a faculty member. The project will normally include a review of the literature, laboratory experience and a final research report.

Minor in Biology

Students who complete the B.S. degree in Biochemistry and Biotechnology may also obtain a minor in biology by completing BIOL 1821, Introductory Biology : Organisms and the Environment. The minor must be approved by the chair of the Department of Biology. At least 9 hours of the biology course credits must be taken in residence at UMSL. Candidates must have a cumulative grade point average of 2.0 or better in the minor, and none of the courses may be taken on a satisfactory/unsatisfactory (S/U) basis.

Minor in Chemistry

Students who complete the B.S. degree in Biochemistry and Biotechnology will also fulfill the course requirements for a minor in Chemistry. A GPA of at least 2.0 is required for the courses presented for the minor. At least three courses toward the Chemistry minor must be completed at UMSL.

Learning Outcomes

Students often think of the physical and life sciences as areas in which one masters a collection of "scientific facts". However, an education in Biochemistry & Biotechnology involves much more than memorizing facts. Students in this program will develop a well-rounded set of competencies in several critical areas. These include:

- **Discipline-Specific Knowledge.** Graduates from this program will have a solid foundation in the content areas of chemistry, biology, and biochemistry. A certain emphasis on specific, descriptive data is necessary. But the larger emphasis is on a clear understanding of the overriding principles and theorems of these areas that allow students to evaluate specific data within a larger context.
- **Laboratory Skills.** Scientists not only learn the results of others, they work in the lab to generate new knowledge. Graduates will learn the basic skills associated with performing laboratory experiments in chemistry, biology, and biochemistry, and they will learn how to

critically evaluate their data. This includes an appreciation of the potential sources of error associated with laboratory measurements.

- **Problem Solving Skills.** Graduates will develop the ability to solve problems in their discipline. In part, this expands on laboratory skills, as students learn how to interpret and evaluate their data. These skills also include learning how to take general principles from various areas of chemistry, biochemistry, and biology and apply them to the solution of specific problems.
- **Communication Skills.** Graduates must not only be able to solve problems, they must also be able to communicate those solutions to others. Graduates will learn how to write scientific reports and papers and will be able to make effective oral presentations of their results and ideas.
- **Scientific Literacy.** Scientists must be able to build on the previous work of others and to put their new results into the larger context of the field. This requires the ability to work effectively with the scientific literature. Graduates will be able to use the specialized search engines associated with the vast literature in chemistry, biology, and biochemistry to find and retrieve information. Graduates will also have the knowledge background necessary to read papers from the literature with good comprehension.
- **Professional Ethics.** Graduates will understand and respect the accepted standards of conduct associated with the scientific profession. This will include honestly and objectively evaluating and reporting data and demonstrating the proper respect for the published work of others.

Graduate Studies

Degree Requirements

Master of Science in Biochemistry and Biotechnology

The Biochemistry and Biotechnology Program offers three types of Master of Science degrees.

- One is a non-thesis option suitable for those with laboratory research experience or for others, such as educators, who do not require research experience.
- The second is a 32 credit hour Professional Science emphasis area that includes a strong business component for students who are interested in learning more about the business aspects of companies. This track may not be appropriate for students who are interested in pursuing a PhD or working primarily as laboratory scientists.
- The third option includes laboratory-based research under the supervision of one of the program faculty members, leading to a written thesis. All students admitted to the graduate program are considered to be in the non-thesis program. They may transfer into the thesis program after they have been accepted as a thesis student by one of the faculty.

M.S. Admission Requirements

Applicants to the M.S. program must submit a completed application and personal data forms, two letters of recommendation from faculty at previously-attended colleges or universities, and transcripts of all previous postsecondary academic work. Applicants whose undergraduate degree is from a university outside of the United States must submit GRE scores (verbal, quantitative, and analytical). For students with a degree from a U.S. university, submission of Graduate Record Examination scores, although not required, is highly recommended. Admission as a regular graduate student requires graduation from an accredited college with a

minimum grade point overall and in biology and chemistry courses of 3.0 (where A=4.0). Students will generally be expected to have completed a major in biology, chemistry, biochemistry or biotechnology. In addition to the Graduate School admission requirements, applicants should have completed an undergraduate course in biochemistry (equivalent to BIOL 4712 / CHEM 4712). Successful applicants will typically have completed courses in organic chemistry, cell biology, and genetics. Applicants may be asked to make up any deficiencies in these areas as a condition of enrollment.

All international applicants, except those from countries where English is the primary language, must take the TOEFL. Ordinarily, a score of 213 on the computer-based exam (550 on the paper-based exam or 80 on the internet-based exam) or better is required.

Requirements

Both the thesis and non-thesis options require a total of 30 graduate credit hours, of which at least half must be at the 5000-level or above. A maximum of 12 or 5 credit hours of Graduate Research (BIOL 6905 or CHEM 6905) may be applied toward the 30 credit hour total for the thesis or non-thesis options, respectively. Students must have a 3.0 GPA in non-research courses.

Required Courses

CHEM 4722	Advanced Biochemistry	3
CHEM 5774	Bioinformatics	3
BIOL 6615	Advanced Biotechnology Laboratory II	4
BIOL 6602	Advanced Molecular Biology	3
BIOL 6889	Graduate Seminar	2

Elective Courses

CHEM 4733	Biochemistry Laboratory	2
CHEM 4772	Physical Biochemistry	3
CHEM 5694	Special Topics In Organic Chemistry	3
CHEM 5794	Special Topics In Biochemistry	3
CHEM 6787	Problem Seminar In Biochemistry	1
CHEM 6905	Graduate Research In Chemistry	1-10
BIOL 4842	Immunobiology	3
BIOL 5069	Topics In Cellular And Molecular Biology	1
BIOL 6442	Advanced Developmental Biology	3
BIOL 6550	Advanced Bacterial Pathogenesis	3
BIOL 6602	Advanced Molecular Biology	3
BIOL 6612	Advanced Molecular Genetics Of Bacteria	3
BIOL 6622	Advanced Cellular Basis of Disease	3
BIOL 6632	Advanced Nucleic Acid Structure And Function	3
BIOL 6642	Advanced Plant Biology And Biotechnology	3
BIOL 6652	Advanced Virology	3
BIOL 6699	Graduate Internship In Biotechnology	1-4
BIOL 6889	Graduate Seminar	2
BIOL 6905	Graduate Research In Biology	1-10
BIOL 6920	Topics In Biology (when relevant)	2-5

Professional Science Master's Emphasis

This track requires a total of 32 graduate credit hours, of which at least half must be at the 5000-level or above. Students take 21 credit hours of science courses (Biology and Chemistry) and 9 hours in business courses. In addition, each student is required to take 2 credit hours of either an on-campus practicum course or an off-campus internship.

Required Courses in Biology and Chemistry

CHEM 4722	Advanced Biochemistry	3
CHEM 5774	Bioinformatics	3
or BIOL 5436	Applied Bioinformatics	
BIOL 6615	Advanced Biotechnology Laboratory II	4
BIOL 6602	Advanced Molecular Biology	3
or BIOL 6612	Advanced Molecular Genetics Of Bacteria	
BIOL 6889	Graduate Seminar	2

Required Internship or Practicum

Choose one of the following:

CHEM/BIOL 5798	Practicum in Science in Business	
CHEM/BIOL 5799	Internship in Science in Business	

Professional Science Business Electives

MGMT 3623	Industrial And Organizational Psychology	9
BUS AD 5000	Economics For Managers	
BUS AD 5100	Managerial Communication	
MGMT 5600	Managing People in Organizations	
MKTG 5700	Contemporary Marketing Concepts	
BUS AD 5900	Law, Ethics And Business	

Elective Courses in Biology and Chemistry

CHEM 4733	Biochemistry Laboratory	6
CHEM 4764	Interdisciplinary Topics In Biochemistry	
CHEM 4772	Physical Biochemistry	
CHEM 5694	Special Topics In Organic Chemistry	
CHEM 5794	Special Topics In Biochemistry	
CHEM 6787	Problem Seminar In Biochemistry ¹	
CHEM 6905	Graduate Research In Chemistry ²	
or BIOL 6905	Graduate Research In Biology	
BIOL 4842	Immunobiology	
BIOL 6602	Advanced Molecular Biology	
BIOL 6612	Advanced Molecular Genetics Of Bacteria	
BIOL 6622	Advanced Cellular Basis of Disease	
BIOL 6632	Advanced Nucleic Acid Structure And Function	
BIOL 6642	Advanced Plant Biology And Biotechnology	
BIOL 6652	Advanced Virology	
BIOL 6920	Topics In Biology	

Total Hours 32

¹ Can be repeated for up to 2 credit hours.

² Can be taken for up to 2 credit hours in either CHEM 6905 or BIOL 6905. Students must have a 3.0 GPA in non-research courses.

Sample Four Year Plan

First Year

Total Hours: 120

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

² The general education courses listed assumes the U.S. History/ Government requirement is fulfilled with a Social/Behavioral Science or Humanities general education course.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change

BIOL 1831 Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L): 5 semester hours

Prerequisites: A minimum of high school chemistry and MATH 1030; ENGL 1100 or equivalent (may be taken concurrently). Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the molecular/ cellular through organ system levels of organization. Topics include: cell structure, metabolism, reproduction, heredity and major physiological processes regulated by organ systems. Three hours of lecture, three and one half hours of lab, and one hour of discussion per week.

BIOL 2012 Genetics: 3 semester hours

Prerequisites: BIOL 1831 (majors must also take BIOL 1821) MATH 1030, and CHEM 1111 or (CHEM 1081 plus CHEM 1091). Fundamental principles of inheritance, including classical genetic theory as well as recent advances in the molecular basis of heredity. Three hours of lecture per week. Fulfills Science/Math requirement.

BIOL 2013 Genetics Laboratory: 2 semester hours

Prerequisites: Concurrent registration in BIOL 2012, or consent of instructor. Laboratory to accompany BIOL 2012. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some exercises.

BIOL 2482 Microbiology: 3 semester hours

Prerequisites: BIOL 1831 (majors must also take BIOL 1821), MATH 1030, and CHEM 1111. Study of microorganisms, their metabolism, genetics, and their interaction with other forms of life. Three hours of lecture per week.

BIOL 2483 Microbiology Laboratory: 2 semester hours

Prerequisite: BIOL 2482 (may be taken concurrently). Experimental studies and procedures of microbiological techniques. Three and one-half hours of organized laboratory time per week. Students will need to return to the laboratory at unscheduled times to complete some exercises.

BIOL 3622 Cell Biology: 3 semester hours

Prerequisites: BIOL 1831, BIOL 2012, CHEM 2612, and MATH 1030. Examination of the organization and basic processes of cells including tissues, organelles, glycolysis, respiration, photosynthesis, trafficking, cytoskeleton, signal transduction, and cell division.

BIOL 3699 Undergraduate Internship in Biotechnology: 1-4 semester hours

Prerequisites: BIOL 1821, BIOL 1831, and CHEM 1111 and CHEM 1121 and consent of instructor. Concurrent enrollment in CHEM 2612 or higher is strongly encouraged. A 2.5 GPA and enrollment in the undergraduate Biotechnology Certificate Program is required. Internship will consist of a period of observation, experimentation and on-the-job training in a biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours a student works each week and in consultation between the intern's supervisor and instructor. Internship assignments will be commensurate with the education and experience of the student. Two credits may be used to fulfill the lab requirement.

BIOL 4442 Developmental Biology: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

BIOL 4550 Bacterial Pathogenesis: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host/parasite interactions. Three hours of lecture per week. Students may not receive credit for both BIOL 4550 and BIOL 6550.

BIOL 4602 Molecular Biology: 3 semester hours

Prerequisites: BIOL 2012 and CHEM 2612. A study of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells. Three hours of lecture per week. Students may not receive credit for BIOL 4602 and either BIOL 6602, or any course previously called Gene Expression in Eukaryotes or Advanced Gene Expression in Eukaryotes.

BIOL 4608 Synthetic Biology: 3 semester hours

Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for BIOL 4608 and BIOL 6608.

BIOL 4612 Molecular Genetics of Bacteria: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 2482. A study of the molecular biology of gene replication, transfer, and expression in bacterial cells. Topics include DNA replication, transcription and translation, mutagenesis, DNA repair and recombination, gene transfer, and the regulation of genes and global expression systems. Three hours of lecture per week. Student may not receive credit for BIOL 4612 and either BIOL 6612 or any course previously called Gene Expression in Prokaryotes or Advanced Gene Expression in Prokaryotes.

BIOL 4614 Biotechnology Laboratory I: 4 semester hours

Prerequisites: BIOL 2012 or consent of instructor. An introduction to the fundamental concepts that underlie the field of biotechnology. Both the basic principles of molecular biology and hand-on experience with the techniques of the field will be addressed through lectures, discussions, and a series of laboratory exercises. Two hours of lecture and four hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4614 and a comparable biotechnology course from another institution.

BIOL 4615 Biotechnology Laboratory II: 4 semester hours

Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4615 and BIOL 6615.

BIOL 4622 Cellular Basis of Disease: 3 semester hours

Prerequisites: BIOL 3622. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 4622 and BIOL 6622.

BIOL 4632 Nucleic Acid Structure and Function: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions and biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 4642 Plant Molecular Biology and Genetic Engineering: 3 semester hours

Prerequisites: BIOL 2012, BIOL 3622. This course covers topics such as molecular and cellular aspects of plant growth, development, and responses to environmental stress and pathogen attack, using the experimental approaches of genetics, molecular biology, and biochemistry. Plant growth manipulation and genetic engineering, including techniques required for DNA transfer and plant regeneration, as well as current and potential future applications, such as engineered resistance to stress, developmental engineering, and metabolic engineering, also will be covered. Students may not receive credit for both BIOL 4642 and BIOL 6642.

BIOL 4652 Virology: 3 semester hours

Prerequisite: BIOL 2012 and BIOL 3622. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 4662 Human Pathology: 3 semester hours

Prerequisites: BIOL 3622 or consent of the instructor. A study of disease processes as they affect the human body. The course will examine both the proximate causes and underlying mechanisms of disease. Specific conditions will be used to illustrate application of clinical approaches in determining the origin, development, and effects of a disease.

BIOL 4712 Biochemistry: 3 semester hours

Same as: CHEM 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

BIOL 4797 Biochemistry and Biotechnology Seminar: 1 semester hour

Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

BIOL 4822 Introduction to Neuroscience: 3 semester hours

Prerequisite: BIOL 3802 or consent of instructor. The study of nervous systems, featuring the cellular bases of initiation and conduction to the impulse, synaptic transmission, and the network integrative function of invertebrate and vertebrate nervous systems. This course emphasizes the multidisciplinary nature of the neurosciences, including anatomical, physiological and molecular approaches to understanding neural function. Three hours of lecture per week.

BIOL 4842 Immunobiology: 3 semester hours

Prerequisite: BIOL 3622 and CHEM 2612. The fundamental principles and concepts of immunology and immunochemistry. Emphasis on the relation of immunological phenomena to biological phenomena and biological problems. Three hours lecture per week.

BIOL 4905 Research: 1-3 semester hours

Prerequisites: Consent of faculty research advisor. Research in an area selected by the student in consultation with and under the direct supervision of an UMSL biology faculty research adviser. Research opportunities are subject to availability and must be approved in advance of beginning research. The project may include the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester at the discretion of the instructor. Credit arranged. Course may be repeated for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS. May not be taken for graduate credit.

BIOL 4920 Selected Topics in Biology: 3 semester hours

Prerequisites: Junior standing and consent of instructor. The topic for this course will vary each semester. Topics offered for the following semester will be posted in the departmental office. This course may be repeated once if the topic is different.

BIOL 5069 Topics In Cellular And Molecular Biology: 1 semester hour

Prerequisite: Graduate standing or consent of instructor. Presentation and discussion of student and faculty research projects and/or current research articles in molecular, cellular and developmental biology. May be repeated. Course graded on a satisfactory/unsatisfactory basis.

BIOL 5436 Applied Bioinformatics: 3 semester hours

Prerequisites: BIOL 4712 or BIOL 4602 or consent of instructor. This course provides a survey of the various computational approaches that can be used to solve biological problems. Specific attention will be focused on biological databases and methods for using and interpreting database information, sequence alignments, functional genomics, structure prediction, high-throughput analyses, and proteomics. Three hours of lecture per week.

BIOL 5798 Practicum in Science in Business: 1-2 semester hours

Same As CHEM 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

BIOL 5799 Internship in Sciences in Business: 1-2 semester hours

Same As CHEM 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of a period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

BIOL 6550 Advanced Bacterial Pathogenesis: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host/parasite interactions. Students may not receive credit for both BIOL 6550 and BIOL 4550. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Three hours of lecture per week.

BIOL 6602 Advanced Molecular Biology: 3 semester hours

Prerequisites: BIOL 2012 and CHEM 2612, or consent of instructor. A study of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells. Three hours of lecture per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6602 and BIOL 4602, or any course previously called Gene Expression in Eukaryotes or Advanced Gene Expression in Eukaryotes.

BIOL 6608 Advanced Synthetic Biology: 3 semester hours

Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for both BIOL 4608 and BIOL 6608.

BIOL 6612 Advanced Molecular Genetics of Bacteria: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 2482. A study of the molecular biology of gene replication, transfer, and expression in bacterial cells. Topics include DNA replication, transcription and translation, mutagenesis, DNA repair and recombination, gene transfer, and the regulation of genes and global expression systems. Three hours of lecture per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Student may not receive credit for both BIOL 6612 and BIOL 4612 or any course previously called Gene Expression in Prokaryotes or Advanced Gene Expression in Prokaryotes.

BIOL 6615 Advanced Biotechnology Laboratory II: 4 semester hours

Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at the theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6615 and BIOL 4615 or any course previously called Techniques in Molecular Biology or Advanced Techniques in Molecular Biology.

BIOL 6622 Advanced Cellular Basis of Disease: 3 semester hours

Prerequisites: BIOL 3622, or consent of instructor. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 6622 and BIOL 4622.

BIOL 6632 Advanced Nucleic Acid Structure and Function: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions & biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 6642 Advanced Plant Biology and Biotechnology: 3 semester hours

Prerequisites: Graduate standing. Topics may include molecular and cellular aspects of plant growth, development, and responses to environmental stress and pathogen attack, using the experimental approaches of genetics, molecular biology, and biochemistry. Plant growth manipulation and genetic engineering, including the techniques required for DNA transfer and plant regeneration, as well as current and potential future applications, such as engineered resistance to stress, developmental engineering, and metabolic engineering, also will be covered. Student may not receive credit for both BIOL 4642 and BIOL 6642.

BIOL 6652 Advanced Virology: 3 semester hours

Prerequisites: BIOL 2012, BIOL 3622, and graduate standing. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture, one hour of discussion or seminar per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 6699 Graduate Internship in Biotechnology: 1-4 semester hours

Prerequisites: Graduate standing and enrollment in graduate Biotechnology Certificate Program. 6 credit hours maximum (maximum of 8 combined credit hours of BIOL 6905 and internship) Internship will consist of period of observation, experimentation and on-the-job training in biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the instructor. Internship assignments will be commensurate with the education and experience of the student.

BIOL 6889 Graduate Seminar: 2 semester hours

Presentation and discussion of various research problems in biology. Graduate student exposure to the seminar process.

BIOL 6905 Graduate Research in Biology: 1-10 semester hours

Research in area selected by student in consultation with faculty members.

BIOL 6915 Graduate Research Practicum: 1-2 semester hours

Prerequisite: Consent of instructor. This course is designed for graduate students wishing to pursue research experience in an area outside their dissertation topic. The project can be techniques-oriented or focused on a specific research question. The credit hours will depend on the time commitment to the project as decided by the supervisory faculty member.

CHEM 1111 Introductory Chemistry I (MOTR CHEM 150L): 5 semester hours

Prerequisite: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Missouri Math Placement Test) and MATH 1035 (MATH 1035 may be taken concurrently). Presents an introduction to the fundamental laws and theories of chemistry. Laboratory experiments are designed to demonstrate some aspects of qualitative and quantitative analysis and to develop skills in laboratory procedures. Chemistry majors may not include both CHEM 1011 and CHEM 1111 in the 120 hours required for graduation. Three hours of lecture, one and one-half hours of workshop, and three hours of laboratory per week.

CHEM 1121 Introductory Chemistry II: 5 semester hours

Prerequisite: CHEM 1111 or advanced placement. Lecture and laboratory are a continuation of CHEM 1111. Three hours of lecture, one and one-half hours of workshop and three hours laboratory per week.

CHEM 2223 Quantitative Analysis: 3 semester hours

Prerequisites: CHEM 1121. Principles and practice of elementary quantitative chemistry. The lecture treats descriptive statistics with emphasis on small samples; various types of competing equilibria pertaining to acid-base, complexometric, and potentiometric titrations; and an introduction to spectrophotometric processes. The laboratory provides exercises in titrimetric gravimetric, and spectrophotometric techniques. Both portions of the course deal with the analytical chemistry of environmentally-significant problems. Two hours of lecture and four and one-half hours of laboratory weekly.

CHEM 2612 Organic Chemistry I: 3 semester hours

Prerequisite: CHEM 1121 (may be taken concurrently). An introduction to the structure, properties, synthesis, and reactions of aliphatic and aromatic carbon compounds. Three hours of lecture per week.

CHEM 2622 Organic Chemistry II: 3 semester hours

Prerequisite: CHEM 2612. A systematic study of organic reactions and their mechanisms; organic synthetic methods. Three hours of lecture per week.

CHEM 2633 Organic Chemistry Laboratory: 2 semester hours

Prerequisite: CHEM 2612. An introduction to laboratory techniques and procedures of synthetic organic chemistry including analysis of organic compounds. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 3643 Advanced Organic Chemistry Laboratory: 2 semester hours

Prerequisites: CHEM 3022. Identification of organic compounds by classical and spectroscopic methods; advanced techniques in synthesis and separation of organic compounds. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

CHEM 3905 Chemical Research: 1-10 semester hours

Prerequisite: Consent of instructor. Independent laboratory and library study, in conjunction with faculty member, of fundamental problems in chemistry. A written report describing the research is required.

CHEM 4302 Survey of Physical Chemistry with Applications to the Life Sciences: 3 semester hours

Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. This course covers the principles of physical chemistry with applications to the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course will be taught simultaneously with CHEM 3302, but students in CHEM 4302 will have additional assignments or projects. No student may receive credit for both CHEM 3302 and CHEM 4302. No student may receive credit for both 4302 and 5302.

CHEM 4712 Biochemistry: 3 semester hours

Same as BIOL 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

CHEM 4722 Advanced Biochemistry: 3 semester hours

Prerequisite: CHEM 4712. This course covers selected advanced topics in the chemistry of life processes. Students may not receive credit for both CHEM 4722 and CHEM 5722.

CHEM 4733 Biochemistry Laboratory: 2 semester hours

Prerequisites: CHEM 4712 (may be taken concurrently), and CHEM 2223. Laboratory study of biochemical processes in cellular and subcellular systems with emphasis on the isolation and purification of proteins (enzymes) and the characterization of catalytic properties. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 4772 Physical Biochemistry: 3 semester hours

Prerequisites: CHEM 3312 or CHEM 4712 or BIOL 4712. This course is designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, and biological spectroscopy. Students may not receive credit for both CHEM 4772 and CHEM 5772.

CHEM 4797 Biochemistry and Biotechnology Seminar: 1 semester hour

Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

CHEM 4814 Special Topics in Chemistry: 1-10 semester hours

A reading and seminar course in selected advanced topics.

CHEM 4897 Seminar: 2 semester hours

Prerequisites: CHEM 3022 and senior standing. This course will provide students with the opportunity to listen to talks presented by students, faculty, and invited speakers. Students must complete a comprehensive examination before the end of the course. Chemistry majors should enroll during the semester in which they intend to graduate. One hour seminar and one hour discussion per week.

CHEM 5394 Special Topics in Physical Chemistry: 1-3 semester hours

Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5396 Directed Readings in Physical Chemistry: 1-3 semester hours

Prerequisites: Consent of Physical Chemistry Faculty. A series of readings of monographs, review papers, and/or research publications for a particular student directed at providing that student with appropriate background preparation for experimental or theoretical Ph.D.-level research in an area of physical chemistry. The particular readings will be selected by the physical chemistry staff. Potential topics include but are not limited to advances in Electrochemistry, Surface Chemistry, Thermodynamics, Molecular Spectroscopy, Quantitative Absorption Spectroscopy using new Methodologies, Applications of Group Theory in Spectroscopy, and Computational Chemistry. Assessment may be in various forms including by assignments and seminars. Students may take this course more than once for credit through the particular topic must be different in each case.

CHEM 5494 Special Topics in Inorganic Chemistry: 1-3 semester hours

Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5694 Special Topics in Organic Chemistry: 1-3 semester hours

Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5774 Bioinformatics: 3 semester hours

Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics to be covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, molecular modeling and simulation, and computational genomics. Additional independent study work is required. Students may not receive credit for both CHEM 4774 and CHEM 5774.

CHEM 5794 Special Topics in Biochemistry: 1-3 semester hours

Prerequisites: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5798 Practicum in Science in Business: 1-2 semester hours

Same As BIOL 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

CHEM 5799 Internship in Science in Business: 1-2 semester hours

Same As BIOL 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

CHEM 6787 Problem Seminar in Biochemistry: 1 semester hour

Prerequisite: Consent of the biochemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

CHEM 6897 Chemistry Colloquium: 1 semester hour

Presentation of papers by students, faculty and invited speakers. One hour per week.

CHEM 6905 Graduate Research In Chemistry: 1-10 semester hours

.

Biology

General Information

Degrees and Areas of Concentration

The Department of Biology provides academic programs leading to the B.A. or B.S. in Biology. In cooperation with the College of Education, the department offers the B.S. Ed. in Secondary Education with Emphasis in Biology and the B.A. or B.S. in Biology with Master's Level Coursework for Secondary Teacher Certification. It also offers graduate work leading to the Master of Science and the Doctor of Philosophy degrees in Biology. Biology faculty members are engaged in teaching and research in areas ranging from cell and molecular biology to population and community studies.

Minor in Biology

Students majoring in another discipline may earn a minor in biology by completing a prescribed course of study. Unique programs can be developed to coordinate with special career objectives.

Departmental Honors

The Department of Biology offers an Honors Program to train students in conducting research in areas of biological research currently under study in the Department.

Graduate Studies

The Department of Biology offers graduate work leading to the M.S. and Ph.D. degrees in biology. Graduate students will normally work toward an M.S. or Ph.D. degree in two broad areas of biology: a) cellular, molecular, and developmental biology, or b) ecology, evolution, and systematics. Students in the M.S. and Ph.D. programs also have the opportunity to do their graduate work in collaboration with scientists at the Missouri Botanical Garden, the Donald Danforth Plant Science Center, or the Saint Louis Zoo through cooperative graduate programs.

Facilities

Department facilities include research and teaching laboratories, environmental chambers, greenhouses, and a large array of supporting modern research instrumentation. Graduate research can be pursued using facilities of the Missouri Botanical Garden, the Donald Danforth Plant Science Center, or the Saint Louis Zoo. Several sites within an hour of campus are suitable for regional field studies, including state parks, wildlife conservation areas, the Shaw Nature Reserve, and Washington University's Tyson Research Center. UMSL is a member of the St. Louis University Research Station Consortium that operates Lay and Reis Field Stations in Missouri and is also a member of the Organization for Tropical Studies, which operates three field stations in Costa Rica. CEIBA Biological Centre in Guyana has hosted several UMSL courses and student researchers. Student researchers work independently at research stations throughout the tropics.

Cooperative Programs

The department participates in a cooperative consortium program in biology with Washington University, Saint Louis University, Southern Illinois University-Edwardsville, and the Missouri Botanical Garden.

Program Objectives and Career Prospects

The degree program at the baccalaureate level is designed to prepare the student for further professional training in areas such as medicine, dentistry, veterinary medicine, optometry, plant science, conservation, and related areas or for further graduate training in research in biology.

The Undergraduate Certificates in Biotechnology and Conservation Biology are for majors interested in careers in biotechnology and associated areas and in conservation, respectively.

The Master of Science program is an extension of the undergraduate program and provides the research-oriented training and education necessary for students to enter doctoral programs in biology and develops professional biologists qualified to function in responsible technical positions. It also trains students to become effective secondary school and junior college biology teachers.

The Graduate Certificates in Biotechnology and in Tropical Biology and Conservation provides professional training in the areas of biotechnology and conservation.

The Ph.D. program prepares students to be research biologists in academics or other professional fields in ecology, evolution and systematic and cellular and molecular biology. Employment opportunities are available in college or university research and teaching, in government and public institutions such as museums, botanical gardens and conservation organizations, and in industry.

Undergraduate Studies

General Education Requirements

Students must satisfy the university and college general education requirements (p. 41). Some Biology courses may be used to meet the science and mathematics requirement of the university.

Candidates for the B.A. degree must fulfill the foreign language requirement of the College of Arts and Sciences. There is no foreign language requirement for the B.S. degree.

Satisfactory/Unsatisfactory Option

Up to 18 credit hours may be taken on a satisfactory/ unsatisfactory (s/u) basis. Excluded from this option are required courses in biology, chemistry, physics, and mathematics.

Non-major biology courses

The following 1000 level biology courses do not count toward the biology credit hours required for a major in biology. Moreover, if biology majors take these courses, they are treated as biology courses when computing the 70 credit hours outside of biology needed to be included in the 120 total credit hours required for graduation.

BIOL 1012	General Biology	3
BIOL 1013	General Biology Laboratory	2
BIOL 1102	Human Biology	3
BIOL 1131	Human Physiology And Anatomy I	4
BIOL 1141	Human Physiology And Anatomy II	4
BIOL 1162	General Microbiology	3
BIOL 1999	Evolution for Everyone	3
BIOL 1202	Environmental Biology	3

Declaring the Biology Major

Students seeking to major in biology are first designated as pre-biology majors until they have successfully completed Genetics, BIOL 2012, in residence with a grade of C or better. Students who have completed a Genetics course elsewhere will have to either pass a proficiency examination in Genetics or complete BIOL 2012 in residence with a grade of C or better. Students may then declare biology as their major. BIOL 2012 must be completed successfully within two attempts, including excused withdrawals.

Degree Requirements

Bachelor of Arts in Biology

The B.A. degree provides maximum flexibility for biology majors to pursue an undergraduate liberal arts course of study that can lead to professional careers in medicine, allied health, public and environmental health, law, and graduate studies in the life sciences. Candidates must have a cumulative grade point average of 2.0 or better in biology courses. Effective fall semester 2009, candidates must also earn a minimum grade of C- in all core courses.

All B.A. degree majors must take at least 39 credit hours, but not more than 50 hours, in appropriate biology course work. A minimum of 18 hours at or above the 2000 level (including one laboratory) must be taken in residence in the UMSL Department of Biology in order to receive a B.A. degree from the College of Arts and Sciences with a major in biology.

Lecture and Seminar Course Requirements

Core Courses

The following biology courses or their equivalents are required:

BIOL 1821	Introductory Biology: Organisms And The Environment	5
BIOL 1831	Introductory Biology: From Molecules To Organisms	5
BIOL 2012	Genetics	3
BIOL 3302	Introduction To Evolution	3

BIOL 3622	Cell Biology	3
Select one of the following diversity courses:		3-5
BIOL 2102	General Ecology	
BIOL 2402	Vertebrate Anatomy	
BIOL 2482	Microbiology	
BIOL 2501	Biology Of Plants	
BIOL 4402	Ornithology	
BIOL 4422	Entomology	
BIOL 4501	Flowering Plant Families: Phylogeny And Diversification	
Select one of the following:		
SEC ED 4985 & BIOL 4986	Curriculum And Methods Of Teaching Life Sciences and Laboratory In Teaching Life Sciences	
BIOL 4889	Senior Seminar	

Elective Courses

Three additional biology lecture courses, at the 2000 level or higher are required. They may be selected from any of the lecture or lecture-laboratory courses offered. Selection of these courses should reflect the career interest of the student. Biology courses taken to fulfill basic skill requirements (e.g., statistics requirement or biochemistry option) can be used to satisfy this requirement).

At least two biology lecture courses taken as part of the core or as electives must be at the 4000 level or higher. No more than one of these higher level courses can be used to fulfill other requirements (e.g., diversity or statistics requirements, or biochemistry option). Biochemistry CHEM 4722 can also be used toward satisfying this requirement. BIOL 4905 or BIOL 4915 can be applied to the electives requirement but two 4000 level lecture courses are still required.

Laboratory Course Requirements

Three biology laboratory courses at the 2000 level or higher are required. They may be taken from any of the lecture-laboratory or laboratory courses offered. Two credit hours of BIOL 3699, BIOL 4299, BIOL 4905, or BIOL 4915 (no combination of these courses allowed) can be used to fulfill one laboratory requirement. Students may take CHEM 4733 to satisfy one of these laboratory course requirements, but students may not use both BIOL 4713 and CHEM 4733 to fulfill this requirement.

Basic Skills Requirement

A well-rounded biologist needs certain skills outside the biology subject matter. The basic skills requirement is designed to provide the student with a background in communication skills and knowledge in associated science areas.

Communication Skills. Courses in foreign languages and in writing are required for development of the basic communication skills needed to transmit scientific information. The following satisfy this requirement:

Foreign Language

The foreign language requirement of the College of Arts & Sciences fulfills the departmental requirement.	3
---	---

Writing

ENGL 3160	Writing In The Sciences (strongly preferred)	3
-----------	--	---

or ENGL 3100	Junior-Level Writing	
Total Hours		6

Associated Science Area. The following courses or their equivalents must be successfully completed in science areas related to biology:

PHYSICS 1011	Basic Physics I	4
PHYSICS 1012	Basic Physics II	4
CHEM 1111	Introductory Chemistry I	5
CHEM 1121	Introductory Chemistry II	5
CHEM 2612	Organic Chemistry I	3
Select one of the following:		2-3
CHEM 2223	Quantitative Analysis	
CHEM 2622	Organic Chemistry II	
CHEM 2633	Organic Chemistry Laboratory	
BIOL/CHEM 4712	Biochemistry	
MATH 1310	Elementary Statistical Methods	3
MATH 1035	Trigonometry	2
MATH 1100	Basic Calculus	3
or MATH 1800	Analytic Geometry And Calculus I	
Select one of the following:		3-4
BIOL 4122	Biometry	
MATH 1310	Elementary Statistical Methods	
MATH 1320	Introduction to Probability and Statistics	
Total Hours		34-36

Bachelor of Science in Biology

The B.S. degree in biology is designed to prepare students for basic technical positions and graduate studies in the life sciences. Candidates for the degree have the same core courses and general education requirements as those seeking the Bachelor of Arts degree, as well as additional requirements in depth of study, laboratory experience, communication skills, and background in associated science areas. Candidates must have a cumulative grade point average of 2.0 or better in biology courses. Effective Fall semester 2009, candidates must earn a minimum grade of C- in all core courses.

There is no foreign language requirement for the B.S. degree. However, students should realize that the literature for biological studies is in many different languages and the ability to extract information from this literature is an important skill.

To fulfill the requirements for the B.S. degree a minimum of 44 hours, but not more than 50 hours, must be completed in appropriate biology course work. A minimum of 22 hours at or above the 2000 level (including two laboratory courses) must be taken in residence in the UMSL Department of Biology in order to receive a B.S. degree from the College of Arts and Sciences with a major in biology.

Lecture and Seminar Course Requirements

Core Courses

The following biology courses or their equivalents are required:

BIOL 1821	Introductory Biology: Organisms And The Environment	5
BIOL 1831	Introductory Biology: From Molecules To Organisms	5

BIOL 2012	Genetics	3
BIOL 3302	Introduction To Evolution	3
BIOL 3622	Cell Biology	3
Select one of the following:		2-6
BIOL 4889	Senior Seminar	
SEC ED 4985 & BIOL 4986	Curriculum And Methods Of Teaching Life Sciences and Laboratory In Teaching Life Sciences (for those seeking teacher certification)	
Select one of the following diversity courses:		3-5
BIOL 2102	General Ecology	
BIOL 2402	Vertebrate Anatomy	
BIOL 2482	Microbiology	
BIOL 2501	Biology Of Plants	
BIOL 4402	Ornithology	
BIOL 4422	Entomology	
BIOL 4501	Flowering Plant Families: Phylogeny And Diversification	
Total Hours		24-30

Elective Courses

Four additional biology lecture courses at the 2000 level or higher are required. They may be selected from any of the lecture or lecture-laboratory courses offered. Selection of these courses should reflect the career interest of the student and may be selected from optional academic tracks (see below). Biology courses taken to fulfill basic skill requirements (e.g., statistics requirement or biochemistry option can be used to satisfy this requirement.

At least two biology lecture courses taken as electives must be at the 4000 level or higher. No more than one of these higher level courses can be used to fulfill other requirements (e.g., statistics requirement or biochemistry option). Biochemistry CHEM 4722 can also be used toward satisfying this requirement. BIOL 4905 or BIOL 4915 can be applied to the electives requirement but two 4000 level lecture courses are still required.

Laboratory Course Requirements

Four biology laboratory courses at the 2000 level or higher are required. They may be selected from any of the lecture-laboratory or laboratory courses offered. Two credit hours of BIOL 3699, BIOL 4905, or BIOL 4915 (no combination of these courses allowed) can be used to fulfill one laboratory requirement. Students may take CHEM 4733 to satisfy one of these laboratory course requirements, but students may not use both BIOL 4713 and CHEM 4733 to fulfill this requirement.

Basic Skills Requirement

A well-rounded biologist needs certain skills outside the biology subject matter. The basic skills requirement is designed to provide the student with a background in communication skills and knowledge in associated science areas.

Communication Skills

Courses in both formal speaking and writing are required for development of the basic communication skills needed to transmit scientific information.

Formal Speaking

COMM 1040	Introduction To Public Speaking	3
-----------	---------------------------------	---

Writing

ENGL 3160	Writing In The Sciences (strongly preferred)	3
or ENGL 3110	Junior Level Writing For International Students	
Total Hours		6

Associated Science Area

The following courses or their equivalents must be successfully completed:

PHYSICS 1011	Basic Physics I	4
PHYSICS 1012	Basic Physics II	4
CHEM 1111	Introductory Chemistry I	5
CHEM 1121	Introductory Chemistry II	5
CHEM 2612	Organic Chemistry I	3
CHEM 2622	Organic Chemistry II	3
CHEM 2223	Quantitative Analysis	3
MATH 1030	College Algebra	3
MATH 1035	Trigonometry	2
MATH 1100	Basic Calculus	3
or MATH 1800	Analytic Geometry And Calculus I	

Select one of the following: 3-4

BIOL 4122	Biometry	
MATH 1310	Elementary Statistical Methods	
MATH 1320	Introduction to Probability and Statistics	
PHIL 2256	Bioethics	3
or PHIL 3380	Philosophy Of Science	
Total Hours		41-42

Research Opportunity

Students in the B.S. Biology degree program who are interested in gaining research experience are encouraged to take a minimum 2 credit hours of undergraduate research, BIOL 4905. The privilege of doing undergraduate research provides students with a first-hand opportunity to experience the research process under the supervision of a faculty member or off-campus scientist. The project normally includes a library search of pertinent literature, laboratory or field experience, and a summary paper and a presentation, all based on an average 8 hr. per week per credit hour for a 15 week semester.

Thesis in Biology Research and the Degree with Distinction

The Department of Biology offers high-achieving students the opportunity to present primary research in the form of a written thesis and to graduate with a Degree with Distinction in Biology. The first step in conducting an undergraduate thesis is to identify a faculty research mentor with whom you can conduct novel research. The mentor, along with two UMSL faculty members, will be readers of the thesis. Students need a minimum of two semesters, usually more, to conduct research. After students have identified a research mentor and have completed 75 credit hours, they may apply for a Degree with Distinction in Biology. The final thesis will be written in the form of a scientific manuscript and presented orally in an advertised public forum at least 6 weeks prior to commencement. The readers of the thesis will decide if the thesis merits a Degree with Distinction, and will report their recommendation to the Dean of Arts and Sciences. In addition to fulfilling the coursework required for a B.S. or B.A. in Biology and the thesis itself, students must also fulfill all the

requirements for UMSL's Degree with Distinction (<http://bulletin.umsi.edu/undergraduatestudy/#academicrecognitiontext>).

Academic Tracks within the Major of Biology

Biology majors may choose to focus their elective hours in a particular sub-discipline of biology, or academic track. These tracks are groups of departmental courses that fit within sub-disciplines of biology and are recommendations for students wanting to pursue careers in specific sub-disciplines. Academic tracks are NOT majors and are only intended to serve as guides for courses within a particular area of biology and are represented by current faculty expertise. Selecting an academic track does not prevent a student from taking courses in another track. Students should not expect to take all recommended courses for each academic track. Students may choose not to select an academic track. Currently, the Biology Department offers three academic tracks: Cell and Molecular Biology; Ecology, Evolution and Conservation Biology; and Pre-professional/Health Sciences.

Cell and Molecular Biology Track

BIOL 2482	Microbiology	3
BIOL 2483	Microbiology Laboratory	2
BIOL 4442	Developmental Biology	3
BIOL 4550	Bacterial Pathogenesis	3
BIOL 4602	Molecular Biology	3
BIOL 4612	Molecular Genetics of Bacteria	3
BIOL 4614	Biotechnology Laboratory I	4
BIOL 4615	Biotechnology Laboratory II	4
BIOL 4622	Cellular Basis of Disease	3
BIOL 4632	Nucleic Acid Structure and Function	3
BIOL 4642	Plant Molecular Biology and Genetic Engineering	3
BIOL 4652	Virology	3
BIOL 4712	Biochemistry	3
BIOL 4713	Techniques in Biochemistry	2
BIOL 4842	Immunobiology	3

Ecology, Evolution and Conservation Biology Track

BIOL 2102	General Ecology	3
BIOL 2103	General Ecology Laboratory	2
BIOL 2402	Vertebrate Anatomy	3
BIOL 2403	Vertebrate Anatomy Laboratory	2
BIOL 2482	Microbiology	3
BIOL 2483	Microbiology Laboratory	2
BIOL 2501	Biology of Plants	5
BIOL 3102	Animal Behavior	3
BIOL 3103	Animal Behavior Laboratory	2
BIOL 3202	Conservation Biology	3
BIOL 3203	Conservation Biology Laboratory	2
BIOL 3802	Vertebrate Physiology	3
BIOL 3803	Vertebrate Physiology Lab	2
BIOL 4102	Behavioral Ecology	3
BIOL 4122	Biometry	3
BIOL 4182	Population Biology	3
BIOL 4192	Applications of Geographic Information Systems	5
BIOL 4222	Tropical Ecology and Conservation	3

BIOL 4245	Field Biology	3
BIOL 4299	Practicum in Conservation	2
BIOL 4402	Ornithology	3
BIOL 4403	Ornithology Laboratory	2
BIOL 4422	Entomology	3
BIOL 4423	Entomology Laboratory	2
BIOL 4501	Flowering Plant Families: Phylogeny and Diversification	5

Pre-professional/Health Sciences Track

BIOL 2402	Vertebrate Anatomy	3
BIOL 2403	Vertebrate Anatomy Laboratory	2
BIOL 2482	Microbiology	3
BIOL 2483	Microbiology Laboratory	2
BIOL 3802	Vertebrate Physiology	3
BIOL 3803	Vertebrate Physiology Lab	2
BIOL 4442	Developmental Biology	3
BIOL 4550	Bacterial Pathogenesis	3
BIOL 4602	Molecular Biology	3
BIOL 4622	Cellular Basis of Disease	3
BIOL 4652	Virology	3
BIOL 4712	Biochemistry	3
BIOL 4822	Introduction to Neuroscience	3
BIOL 4842	Immunobiology	3

B.S. Ed. in Secondary Education with Emphasis in Biology

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

B.A. or B.S. in Biology with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

Minor in Biology

Students may minor in biology by completing a minimum of 19 credit hours in biology, of which at least 9 hours of the biology course credits must be taken in residence at UMSL.

Requirements are:

BIOL 1821	Introductory Biology: Organisms And The Environment	5
BIOL 1831	Introductory Biology: From Molecules To Organisms	5
BIOL 2012	Genetics	3
Two additional courses totaling no less than 6 credit hours. At least one course should be at the 3000 level or above.		6
Total Hours		19

All students must plan an appropriate course of study in consultation with an advisor, and the program must be given prior approval by the Chairperson of the Department of Biology. Under certain circumstances, a student may deviate from the prescribed course of study and substitute a group of courses that exhibit a coherent area of specialization to coordinate with a career objective.

Candidates must have a cumulative grade point average of 2.0 or better in the minor, courses may be taken on a satisfactory/ unsatisfactory (s/u) basis.

Minor in Environmental Studies

This is an interdisciplinary program that integrates the natural and physical sciences with the social sciences and humanities to study current environmental problems resulting from human population growth, global climate change, overuse of natural resources, pollution and biodiversity loss. A minimum 18 hours are required, 9 of which must be in the natural and physical sciences, including the listed Honors College courses, and 9 must be from the social sciences and humanities. Both BIOL 1202 (Environmental Biology) and POL SCI 3480 Environmental Politics must be completed as part of the total 18 hours. A total of 12 hours must be taken at or above the 2000 level, with one additional course at or above the 3000 level besides POL SCI 3480. At least 9 hours must be taken while in residence at UMSL. A minimum GPA of 2.0 is required.

POL SCI 3850	International Organizations And Global Problem-Solving	3
POL SCI 3900	Special Readings	1-10

Undergraduate Certificate in Biochemistry

The university offers a certificate program for science majors who are interested in careers in biochemistry. The Biochemistry Certificate is an interdisciplinary specialization that may be earned within either a biology or chemistry major. To earn the certificate, biology majors must enroll in the Biochemistry Certificate Program upon the completion of 60 credit hours, fulfill all the science (biology, chemistry, math, and physics) course requirements for the B.S. degree in biology, and successfully complete the following courses:

CHEM 2622	Organic Chemistry II	3
BIOL/CHEM 4712	Biochemistry	3
CHEM 2223	Quantitative Analysis	3
CHEM 2633	Organic Chemistry Laboratory	2
BIOL 4713	Techniques In Biochemistry	2
CHEM 4722	Advanced Biochemistry	3
Select three of the following:		8-10
BIOL 2482	Microbiology	
BIOL 2483	Microbiology Laboratory	
BIOL 4442	Developmental Biology	
BIOL 4602	Molecular Biology	
BIOL 4612	Molecular Genetics Of Bacteria	
BIOL 4614	Biotechnology Laboratory I	
BIOL 4622	Cellular Basis of Disease	

BIOL 4632	Nucleic Acid Structure And Function
BIOL 4842	Immunobiology
Total Hours	24-26

Undergraduate Certificate in Biotechnology

The university offers an undergraduate certificate program for biology majors who are interested in careers in biotechnology including biochemistry, microbiology, molecular biology, cell biology, and developmental biology. To earn the certificate, biology majors must enroll in the Biotechnology Certificate Program upon the completion of 60 credit hours, fulfill all the science (biology, chemistry math, and physics) course requirements for the B.S. degree in biology, and successfully complete the following courses:

BIOL 2013	Genetics Laboratory	2
BIOL 2482	Microbiology	3
BIOL 2483	Microbiology Laboratory	2
CHEM 2622	Organic Chemistry II	3
BIOL 4614	Biotechnology Laboratory I	4
BIOL/CHEM 4712	Biochemistry	3
BIOL 4602	Molecular Biology	3
or BIOL 4612	Molecular Genetics Of Bacteria	
BIOL 4713	Techniques In Biochemistry	2
or CHEM 4733	Biochemistry Laboratory	
Select one of the following:		3-4
BIOL 4615	Biotechnology Laboratory II	
BIOL 4622	Cellular Basis of Disease	
BIOL 4632	Nucleic Acid Structure And Function	
BIOL 4652	Virology	
BIOL 4842	Immunobiology	
CHEM 4722	Advanced Biochemistry	
Total Hours		25-26

Undergraduate Certificate in Conservation Biology

The Certificate in Conservation Biology is a multidisciplinary program of study integrating theoretical and applied topics associated with conservation biology. The certificate is intended for undergraduate students with majors in biology or in any other field who wish to develop a specialization in conservation. The certificate is offered by the Department of Biology in cooperation with the departments of Anthropology, Economics, History, Philosophy, and Political Science. Building on a core curriculum, students can elect courses from these departments to complete their requirements. Regularly enrolled undergraduates at UMSL or individuals with baccalaureate degrees who wish to receive a Certificate in Conservation Biology are eligible to participate in the conservation certificate program. To participate, students should design their program in consultation with their regular academic advisor and the Biology faculty professor of record for the certificate program. Guidelines for admission to the certificate program are also available. Individuals with baccalaureate degrees who are interested in this certificate must apply to the university as unclassified undergraduates. The certificate requires completion of 21 credit hours, outlined below. Students should consult the Bulletin with regard to prerequisites for any of the courses listed here.

Core Courses

Biology		
BIOL 2102	General Ecology	3
BIOL 3202	Conservation Biology	3
BIOL 3203	Conservation Biology Laboratory	2
BIOL 4299	Practicum In Conservation	2

Electives

The remaining 11 credits must be selected from courses listed below. Five credits must be taken from within biology and 6 credits outside biology, from at least two departments.

Anthropology

ANTHRO 2120	Native Peoples Of North America
ANTHRO 2126	Archaeology Of Greater St Louis
ANTHRO 2131	Archaeology Of Missouri
ANTHRO 2132	Archaeology Of North America
ANTHRO 3228	People and Plants
ANTHRO 3232	Environmental Archaeology
ANTHRO 3270	Human Ecology, Cultural Collapse, and Sustainable Developments

Biology

BIOL 4102	Behavioral Ecology
BIOL 4182	Population Biology
BIOL 4192	Applications of Geographic Information Systems
BIOL 4245	Field Biology
BIOL 4402	Ornithology
BIOL 4403	Ornithology Laboratory
BIOL 4422	Entomology
BIOL 4423	Entomology Laboratory
BIOL 4501	Flowering Plant Families: Phylogeny And Diversification

Economics

ECON 4550	Natural Resource Economics
ECON 3500	The Economics of Government Spending and Taxation
ECON 4160	Geospatial Analysis In The Social Sciences
ECON 4170	Fundamentals Of Cost-Benefit Analysis

History

HIST 3000	Selected Topics In History
-----------	----------------------------

Political Science

POL SCI 3480	Environmental Policy
POL SCI 3590	Women and Leadership World-Wide: Breaking the Glass Ceiling
POL SCI 3850	International Organizations And Global Problem-Solving

Total Hours 21

Pre-professional Graduation

The Department of Biology sponsors a 3+4 Program for the UMSL College of Optometry.

In this program students may be admitted to the College of Optometry after completing three years (90 semester hours) of study in the Department of Biology. The undergraduate degree is granted when students satisfactorily complete the first year of optometry school. One or more of the following conditions must be met in order to qualify for the undergraduate degree. All general education requirements and all requirements for the major, except electives, must be completed. Any deficiency in required courses must be remedied with courses taken at UMSL within three years after entering the College of Optometry. Up to 6 hours from the College of Optometry may be substituted for undergraduate degree requirements, with approval of the Department of Biology.

UMSL – Logan College (3+3 program)

The Department of Biology has developed a 3+3 articulation agreement with Logan College of Chiropractic (LCC). This program enables qualified students the opportunity to complete a Bachelor of Science degree in Biology for the University of Missouri – St. Louis as well as a Doctor of Chiropractic for Logan College of Chiropractic in six years.

The program is only open to students who enter UMSL as first-time freshmen.

Participants must complete their first 90 hours of college work (3 years) at UMSL following a prescribed curriculum.

Participants who have achieved at least 3.25 GPA at UMSL will automatically be granted admission by Logan College of Chiropractic.

After successfully completing an additional 30 credit hours (4th year) at Logan, a student will receive a BS in Biology degree from UMSL.

After completing two additional years at Logan, the student will receive a doctorate in chiropractic

The acceptance of transfer credits or testing toward completion of degree requirements shall be governed by current policies of UMSL. However, no more than 20 credits of required courses, and NONE of the science credits required for admission to LCC may be earned via examination or transfer from another school

LCC shall accept, for the entrance date of their choice, all students who successfully complete the Pre-Chiropractic Program with a cumulative GPA of 3.25 or higher and meet all other criteria for admission

Students who earn less than a 3.25 GPA, but at least a 2.50 GPA, will be eligible for admission to LCC, and will receive appropriate consideration in the admission process for having completed the UMSL Pre-Chiropractic Program, but will not receive the assurance of a seat reserved for students earning a 3.25 or higher GPA

Students will make application to LCC one year in advance of their desired entrance date and will complete all required application procedures thereafter in a timely manner, including submission of recommendation and a satisfactory interview.

This program offers benefits to students (six years instead of seven from high school to doctorate). The University of Missouri courses are listed below:

General Education Requirements

Humanities:	9
Select from General Education List	
Social Sciences (One course must be a Psychology):	9

Select from General Education List of courses meeting Social Science Gen. Ed requirements.

American History & Government	3

or MATH 1800	Analytic Geometry and Calculus I	

Total Hours	88-90
-------------	-------

The remaining 30 hours to be taken at Logan include:

- Transfer Credits (34):
- Anatomy I / Lab (6)
- Spinal Anatomy / Lab (5)
- Biochemistry I / Lab (4)
- Histology / Cell Biology / Lab (5)
- Anatomy II / Lab (6)
- Neuroanatomy / Lab (5)
- Biochemistry II (4)
- Physiology I (4)
- Microbiology / Lab (4)

Graduate Studies

The graduate program offers both Masters and Ph.D. degrees, as well as Graduate Certificates in Biotechnology and Tropical Biology and Conservation.

Advisors

All graduate students will have a faculty advisor. In the event that a student's interest changes or the faculty advisor feels the student's direction no longer falls with his/her area of expertise, the student and advisor should discuss whether a change of advisor is warranted. The graduate director must be notified in writing of any change in advisors. If a student or advisor is uncomfortable discussing the issue directly with the other, he/she is encouraged to meet with the director of the graduate program.

Graduate Assistantships

Stipends for teaching and research assistantships are awarded on a competitive basis to qualified graduate students in masters or PhD. Programs. Tuition fees are waived for graduate assistants. Applications for assistantships must be sent to the Director of Graduate Studies in the Department of Biology and received by December 15.

Master of Science in Biology

The Department of Biology offers three ways of achieving the Master of Science degree. The first is a 30 credit hour non-thesis option suitable for those who may already have extensive research experience, for educators who seek to upgrade their academic skills but do not require research experience, or for those who need to broaden their biological background. The second is a 32 credit hour Professional Science track that includes a strong business component for students who are interested in learning more about the business aspects of companies. This track may not be appropriate for students who are interested in pursuing a PhD or working primarily as laboratory scientists. The third is a 30 credit hour traditional apprenticeship in research leading to a written thesis. All students admitted to the graduate program are considered to be in the non-thesis program unless they have been accepted into an individual faculty lab. Starting with a common core, both the thesis and non-thesis option may be developed into a final degree program in either of two broad areas in biology:

1. Cell and Molecular Biology or
2. Ecology, Evolution, and Systematics.

Non-thesis students may also elect to take courses in both areas. Only the non-thesis option is available in the Professional Science emphasis.

M.S. Admission Requirements

Applicants to the M.S. program must submit completed application and personal data forms, three letters of recommendation from undergraduate faculty or work supervisors, and transcripts of all previous work. Submission of Graduate Record Examination scores, although not required, is highly recommended and will be helpful for positive consideration of admittance. Admission as a regular graduate student requires graduation from an accredited college with a minimum grade point average overall and in biology courses of 3.0 (where A = 4.0).

All foreign applicants, except those from countries where English is the primary language, must take the TOEFL. Ordinarily, a score of 213 on

the computer-based exam (550 on the paper-based exam) or better is required.

In addition to the Graduate School admission requirements, applicants should have completed advanced undergraduate biology courses including genetics, biochemistry, and evolution. Courses in organic chemistry, college physics, and calculus are also expected, and a course in statistics is highly recommended.

Students admitted to the degree program who have not met some of the prerequisites may be asked to pass appropriate courses before graduating. These courses will be agreed upon by the student's advisor and the student during the first semester of enrollment. In particular, undergraduate deficiencies in genetics and either biochemistry or evolution shall be made up by taking the appropriate course(s). Three credits of BIOL 4920 Selected Topics can be given to graduate students for BIOL 2012 (Genetics) or BIOL 3302 (Evolution), if they receive a grade of B or better for all undergraduate course work and complete a graduate level paper assigned by the instructor. Instructor consent is required.

General Requirements

All students are required to take at least 4 but not more than 8 hours of BIOL 6889, Graduate Seminar. However, Professional Science masters students must take only 4 credit hours total of BIOL 6889. Thesis students are required to take BIOL 5179, Ethical Issues in Biology. Students are expected to maintain a GPA of 3.0 or better. Students may choose to specialize in either Cellular and Molecular Biology (CMB) emphasis area or the Ecology, Evolution and Systematics (EES) emphasis area, and appropriate courses in each area will be recommended by the student's advisor. The Professional Science emphasis area in CMB has specific course requirements that are described below.

Non-thesis Option

Including the general requirement, students must take at least 30 graduate credit hours, of which at least half must be at the 5000 or 6000 level. No more than 5 hours of BIOL 6905, Graduate Research, may be counted toward the degree.

Thesis Option

The student and adviser work together to develop a research plan. The thesis proposal must be approved by the student's adviser and advisory committee before the student enrolls in more than 4 credit hours of BIOL 6905, Graduate Research, and before the student has completed 15 credit hours in the master's program. No more than 13 hours of BIOL 6905, Graduate Research, may be counted toward 30 hours of the degree. A thesis embodying results of original research shall be submitted to and approved by the Department of Biology and the Graduate School. This approval requires both a written thesis and oral presentation and defense.

Professional Science in Cellular and Molecular Biology Emphasis

This track requires a total of 32 credit hours, of which at least half must be at the 5000-level or above. Students will take 21 credit hours in Biology, 9 hours in business courses, and 2 credit hours of internship/practicum.

Professional Science students: 1) must take 2 seminars (4 credit hours total) of **BIOL 6889**, 2) are limited to a maximum of 2 credit hours of Topics in Cellular and Molecular Biology (**BIOL 5069**) and 3) cannot count any hours of Graduate Research (BIOL 6905) as part of the 32 credit hour total.

Required Courses

BIOL 6889	Graduate Seminar (must be taken twice)	4
-----------	--	---

Choose three of the following: 9-10

BIOL 6602	Advanced Molecular Biology
BIOL 6612	Advanced Molecular Genetics Of Bacteria
BIOL 6615	Advanced Biotechnology Laboratory II
BIOL 6622	Advanced Cellular Basis of Disease
BIOL 6632	Advanced Nucleic Acid Structure And Function
BIOL 6642	Advanced Plant Biology And Biotechnology

Elective Courses in Biology 7-8

BIOL 4713	Techniques In Biochemistry
BIOL 4842	Immunobiology
BIOL 5069	Topics In Cellular And Molecular Biology ¹
BIOL 6442	Advanced Developmental Biology
BIOL 6550	Advanced Bacterial Pathogenesis
BIOL 6602	Advanced Molecular Biology
BIOL 6612	Advanced Molecular Genetics Of Bacteria
BIOL 6622	Advanced Cellular Basis of Disease
BIOL 6632	Advanced Nucleic Acid Structure And Function
BIOL 6642	Advanced Plant Biology And Biotechnology
BIOL 6652	Advanced Virology
BIOL 6920	Topics In Biology (when relevant)

Required Internship or Practicum 2

BIOL 5798 or BIOL 5799	Practicum in Science in Business Internship in Sciences in Business
---------------------------	--

Professional Science Business Electives 9

MGMT 3623	Industrial And Organizational Psychology

MGMT 5600	Managing People in Organizations
MKTG 5700	Contemporary Marketing Concepts
BUS AD 5900	Law, Ethics And Business

¹ Maximum of 2 credit hours.

Doctor of Philosophy in Biology

The doctoral program emphasizes empirical and theoretical approaches to biological research. Students are required to integrate basic skills in biology with focal studies in an emphasis area. The program is designed to provide research experience and training appropriate for advanced positions in academic research and teaching, government and public agencies, and industry.

Ph.D. Admission Requirements

Applicants to the Ph.D. program must submit a formal application to the Graduate Admissions Office. In addition, the applicant should arrange to have sent: three letters of recommendation from faculty members at previously attended colleges or universities, GRE scores (Verbal, Quantitative, and Analytical), and transcripts of all postsecondary academic work. Admission to the Ph.D. program normally requires a minimum grade point average overall and in biology courses of 3.0 (where A=4.0). Applicants from countries where English is not a primary language are required to take the TOEFL examination. Scores must be submitted before admission can be decided. Ordinarily, a score of 550 or better is required.

Applicants should have a bachelor's or M.S. degree from an accredited United States college or university or evidence of equivalent training at an accredited institution outside the United States. They should have the appropriate background for graduate work in biology, including courses in genetics, biochemistry, and evolution. Courses in organic chemistry, college physics, and calculus are expected. A course in statistics is recommended. Students admitted to the Ph.D. program who have not met all the prerequisites may be required to make up deficiencies before admission to candidacy. The deficiencies will be decided during orientation meetings prior to the start of the second semester. Three credits of BIOL 4920 Selected Topics can be given to graduate students for BIOL 2012 or BIOL 3302 if they receive a grade of B or better for all undergraduate course work and complete a graduate-level paper assigned by the instructor. Instructor consent is required.

Ph.D. Degree Requirements

In addition to the general requirements of the Graduate School, the basic requirements for the Ph.D. degree in Biology include 60 graduate credit hours. At least 30 of the 60 hours must be taken at the 5000 or 6000 level. With the explicit consent of the advisory committee, students may take for graduate credit up to 3 credit hours of 3000 level courses in allied departments. All students are required to take BIOL 5178, Introduction to Graduate Research in Biology, and BIOL 5179, Ethical Issues in Biology. Courses in biology at the 3000 level and below are not available for graduate credit. At least 31 of the 60 hours must be taken while in residence at the University of Missouri-St. Louis. Graduate credit for course work transferred from another program is subject to approval by the graduate committee and by the Graduate School. Graduate courses taken elsewhere will be considered for transfer credit during orientation meetings conducted prior to the start of the second semester of enrollment.

The requirements for all Ph.D. students include:

- 30 hours of course work, including:
 - At least 6 credits of BIOL 6889, Graduate Seminar
 - One credit each of BIOL 5178, Introduction to Graduate Research in Biology, and BIOL 5179, Ethics in Biology (to be taken the first year)

The maximum number of credit hours that may be applied toward the 60-hour requirement is limited as stated below:

- BIOL 6889, Graduate Seminar: 10 hours
- BIOL 6905, Graduate Research: 30 hours

A combination of 6 total credit hours of the following:

- BIOL 5059, Topics in Ecology, Evolution, and Systematics
- BIOL 5069, Topics in Cellular and Molecular Biology
- BIOL 5079, Topics in Floristic Taxonomy
- BIOL 5089 Topics in Animal Behavior
- BIOL 5099, Biology Colloquium

Emphasis area requirements

Each Ph.D. student is associated either with the Cellular and Molecular Biology (CMB) emphasis area, or the Ecology, Evolution and Systematics (EES) emphasis area. Each of these areas has its own course requirements in addition to the University-wide and department-wide requirements listed above.

Ecology, Evolution and Systematics ¹

BIOL 4122	Biometry	3
Select three of the following:		9
BIOL 5302	Advanced Evolution	
BIOL 5312	Theory Of Systematics	
BIOL 6182	Advanced Population Biology	
BIOL 5192	Community Ecology	

Cellular and Molecular Biology

BIOL 5436	Applied Bioinformatics	3
-----------	------------------------	---

¹ An equivalent graduate level course at another university may be substituted for one of the required courses, if approved by the Graduate Director

Maintenance of Status

All students are expected to maintain a GPA of 3.0 or better. Students will normally meet formally with their thesis committee, or if that has not been formed, with their advisor each year to maintain their status in the program.

First-Year Experience

Ph.D. students in the Cellular and Molecular Biology emphasis area typically rotate through three different labs during their first semester before choosing/being accepted by a particular dissertation advisor. Ph.D. students in the Ecology Evolution and Systematics emphasis area typically are accepted by a particular dissertation advisor as part of the Ph.D. program application/acceptance process. All students are expected to become involved in research by the spring semester of their first year.

Qualifying Examination

All students must pass a qualifying examination consisting of a written and oral component. Students beginning studies in the fall semester will normally take the qualifying examination at the end of their fourth semester of full-time study. Doctoral students who have earned an M.S. degree previously are encouraged to take the examination in their first year.

The examination for Ecology, Evolution and Systematics students evaluates knowledge of fundamental principles presented in formal courses and in papers of special importance in the field. The written exam will be given in December at the end of the third semester, and the oral portion immediately afterwards.

The Qualifying Examination for Cellular and Molecular students is composed of a written portion in which the student prepares a formal research proposal on a topic different from that of her/his doctoral dissertation research, and an oral portion during which the student

defends the research proposal as well as his/her knowledge of the fundamental concepts of molecular biology, cell biology, and biochemistry.

Admission to Candidacy

To be admitted to candidacy, students must satisfy the requirements of the Graduate School, which includes passing all qualifying examinations and completing all required course work.

Dissertation Proposal

All students must defend orally a written dissertation proposal to their dissertation committee. The approved proposal must be submitted to the director of graduate studies in biology. Doctoral students may not enroll in more than 4 credits of graduate research (BIOL 6905) before they have received approval for their dissertation proposal. The proposal is to be successfully defended by the end of the sixth semester.

Dissertation

A dissertation embodying the results of original research shall be submitted to and approved by the Department of Biology and the Graduate School. The general regulations of the Graduate School concerning the preparation of the dissertation must be met. These rules include a public oral defense of the written dissertation. Dissertations are to be presented in a style appropriate for one or more publications in scientific journals.

Teaching

At least one semester of supervised teaching is required of all doctoral students.

Graduate Certificate in Biotechnology

The Graduate Certificate in Biotechnology is offered for students with a bachelor's degree who wish to obtain advanced level training in those fields of biology that pertain to biotechnology without necessarily earning a master's degree. Students who enter this program may have a variety of interests, including biochemistry, microbiology, molecular biology, cell biology, developmental biology, or molecular evolution.

For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website: <http://umsl.edu/go/Bom>.

Admission

Students who wish to earn a Graduate Certificate in Biotechnology must apply to the Biotechnology Certificate Program for admission to the program. Students must be enrolled in the graduate program at the University of Missouri-St. Louis either as non-degree students or as master's students.

Students who wish to obtain a Master's degree with a Biotechnology Certificate must be accepted into the Master's degree program in Biology as well as into the Biotechnology Certificate Program. Students who apply to the certificate program as non-degree students will earn only the certificate.

Students must have at least a 3.0 GPA for undergraduate course work to be accepted into the program. The minimum course prerequisites for admission to the program are undergraduate courses in genetics, cell biology, and biochemistry.

Requirements

Students must maintain a minimum GPA of 3.0 to remain in the certificate program. The certificate is awarded after completion of the courses listed below. Students enrolled in the Master's program may simultaneously earn a graduate degree and count the appropriate courses from the list below toward the Biotechnology Certificate.

The biotechnology certificate requires 18 credit hours of course work:

BIOL 6615	Advanced Biotechnology Laboratory II	4
BIOL 6602	Advanced Molecular Biology (If both Group II courses are taken, one may be used as elective credit)	3
or BIOL 6612	Advanced Molecular Genetics Of Bacteria	

Electives

Select 11 credits from the following: 11

Biology

BIOL 4712	Biochemistry
BIOL 4842	Immunobiology
BIOL 5069	Topics In Cellular And Molecular Biology
BIOL 6550	Advanced Bacterial Pathogenesis
BIOL 6612	Advanced Molecular Genetics Of Bacteria
BIOL 6622	Advanced Cellular Basis of Disease
BIOL 6632	Advanced Nucleic Acid Structure And Function
BIOL 6642	Advanced Plant Biology And Biotechnology
BIOL 6652	Advanced Virology
BIOL 6699	Graduate Internship In Biotechnology
BIOL 6889	Graduate Seminar
BIOL 6915	Graduate Research Practicum
BIOL 6920	Topics In Biology

Chemistry

CHEM 4722	Advanced Biochemistry
CHEM 4733	Biochemistry Laboratory
CHEM 4772	Physical Biochemistry

Total Hours 18

Graduate Certificate in Tropical Biology and Conservation

The Graduate Certificate in Tropical Biology and Conservation is intended for students who wish to pursue a career in conservation biology or ecology from either a research or practical standpoint. Cooperating institutions include the Missouri Botanical Garden, St. Louis Zoo, Center for International Studies at UMSL, and the Departments of Economics, History, Political Science, and Social Work.

For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website: <http://umsl.edu/go/Brs>.

Admission

Student enrolled in UMSL who intend to receive a Graduate Certificate in Tropical Biology and Conservation must complete an application form available from the Graduate School. Student not enrolled in a course of graduate studies at UMSL must apply simultaneously to the University's Graduate Admissions office. Students who have a baccalaureate degree or are enrolled in graduate work elsewhere may apply for admission to the certificate program without regular admission to the graduate program. Due to limited space, admission will be on a competitive basis based on student motivation and academic qualifications. The minimum admissions requirements include: (1) at least a 3.0 GPA for undergraduate course work or a 3.2 GPA for 12 credit hours of graduate course work; and (2) current enrollment in the graduate program in biology at UMSL having satisfied the prerequisites of the certificate; or completion of a baccalaureate degree and having satisfied the prerequisites of the certificate program. The minimum prerequisites are undergraduate courses in ecology, evolution and genetics.

Requirements

The certificate is awarded after completion of 18 credit hours of core courses and electives with a minimum of 12 credits at the 5000 or 6000 level. Up to 3 credits may be taken at the 2000 - 3000 level upon permission of the Graduate Committee. Electives must include a minimum of 3 credits outside biology with a maximum of 7 outside biology. A maximum of 3 credits may be taken at institutions other than UMSL. Students may simultaneously earn a graduate degree and count credits earned in their degree program toward the certificate when appropriate.

Required Core Courses

BIOL 6250	Public Policy Of Conservation And Sustainable Development	3
or POL SCI 6452	Public Policy Of Conservation And Sustainable Development	
BIOL 6299	Internship In Conservation Biology ¹	1-4
BIOL 6222	Advanced Tropical Ecology And Conservation	3
or BIOL 6270	Advanced Global Climate Change	

Electives

Biology		
BIOL 4182	Population Biology	
BIOL 4402	Ornithology	
BIOL 4422	Entomology	
BIOL 4501	Flowering Plant Families: Phylogeny And Diversification	
BIOL 5123	Advanced Tropical Resource Ecology Field Studies	
BIOL 5192	Community Ecology	
BIOL 6102	Advanced Topics In Behavioral Ecology	
BIOL 6112	Advanced Evolution Of Animal Sociality	
BIOL 6182	Advanced Population Biology	
BIOL 6192	Applications Of Geographic Information Systems	
BIOL 6222	Advanced Tropical Ecology And Conservation	
BIOL 6270	Advanced Global Climate Change	
BIOL 6889	Graduate Seminar	

Economics	
ECON 3300	International Economic Analysis
ECON 4550	Natural Resource Economics
History	
HIST 3000	Selected Topics In History
HIST 6114	
HIST 6115	Historical Thinking in Theory and Practice I
Political Science	
POL SCI 3480	Environmental Politics
POL SCI 3595	Studies In Comparative Politics
POL SCI 3830	International Political Economy
POL SCI 3850	International Organizations And Global Problem-Solving
POL SCI 3890	Studies In International Relations
POL SCI 4510	Comparative Public Policy And Administration
POL SCI 4850	International Law
POL SCI 6448	Political Economy And Public Policy
POL SCI 6480	Proseminar In International Relations
Social Work	
SOC WK 4950	

¹ May be replaced with a biology elective for individuals with applied conservation or environmental agency experience upon consent of the Graduate Committee.

Sample Four Year Plans

Biology BA (p. 84) Biology BS (p. 84)

Biology BA

First Year

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Courses

BIOL 1010 Introduction to Student Research: 1-3 semester hours

Prerequisites: Minimum of four semesters of high school science and math courses and consent of the instructor. This course provides high school students an opportunity to develop individual research projects under faculty mentorship. It includes interdisciplinary lectures, demonstrations, seminars, and project guidance. Evaluation will be based on written and oral presentation of the research project and student portfolio.

BIOL 1012 General Biology (MOTR BIOL 100): 3 semester hours

Emphasis on fundamental principles of biology. BIOL 1012 can be applied toward fulfillment of the general education requirement in science. BIOL 1012 does not satisfy the prerequisite requirements in other courses in biology at the 2000 level or above. Students who plan to pursue a career in medicine or one of the medical-oriented professions should enroll in BIOL 1831 rather than BIOL 1012.

BIOL 1013 General Biology Laboratory: 1 semester hour

Prerequisite: BIOL 1012 (may be taken concurrently). This Laboratory course accompanies BIOL 1012. BIOL 1013 can be used to fulfill the general education requirements in a laboratory science. BIOL 1013 does not meet the prerequisite requirements for other courses in biology. Two and one-half hours of laboratory per week.

BIOL 1102 Human Biology (MOTR LIFS 150): 3 semester hours

Lectures and readings concerned with the reproduction, development, genetics, functional anatomy, behavior, ecology, and evolution of the human species. Three hours lecture per week. Fulfills Science/Math requirement.

BIOL 1131 Human Physiology and Anatomy I: 4 semester hours

Prerequisites: BIOL 1012 or equivalent or consent of instructor. This course covers the basic aspects of the structure of the healthy human body and how it functions. Special emphasis is on how the human body adapts itself to its environment and how changes affect physiological activities. Three hours lecture and two hours laboratory per week.

BIOL 1141 Human Physiology and Anatomy II: 4 semester hours

Prerequisite: BIOL 1131. A continuation of BIOL 1131. A study of the basic aspects of human physiology and anatomy. Three hours lecture and two hours laboratory per week.

BIOL 1162 General Microbiology: 3 semester hours

Prerequisite: BIOL 1012 or its equivalent. A survey of microbiology structure, genetics, and physiology. Special emphasis will be placed on the transmission and control of such organisms as it relates to the maintenance of human health. Three hours of lecture per week.

BIOL 1202 Environmental Biology: 3 semester hours

An examination of the biological basis of current environmental problems, with emphasis upon resources, energy, pollution and conservation. Three hours lecture per week. Fulfills Science/Math requirement.

BIOL 1212 Applied Environmental Sciences: 4 semester hours

In a combined lecture/laboratory setting, students will get hands-on experience collecting and testing environmental samples for abiotic factors such as contaminants, and experimentally assessing the impact of those contaminants on the biological communities contained within the samples. Important approaches include global positioning and information technologies, microscopy, microbiological techniques, genomics, and quantitative analytical measures for assessing the physical, biological and chemical properties of collected samples.

BIOL 1821 Introductory Biology: Organisms and the Environment (MOTR BIOL 150L): 5 semester hours

Prerequisites: A minimum of high school chemistry, ENGL 1100 or equivalent (may be taken concurrently), and placement into college algebra or higher. Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the organism and supraorganism levels of biology. Topics to be covered include: ecology, evolution, diversity, and population biology. Three hours of lecture and one hour of discussion per week.

BIOL 1831 Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L): 5 semester hours

Prerequisites: A minimum of high school chemistry and MATH 1030; ENGL 1100 or equivalent (may be taken concurrently). Required for students intending to major in biology or take specified biology courses at the 2000 level or above. This course presents an introduction to some of the principles of biology and scientific methodology applied to the molecular/ cellular through organ system levels of organization. Topics include: cell structure, metabolism, reproduction, heredity and major physiological processes regulated by organ systems. Three hours of lecture, three and one half hours of lab, and one hour of discussion per week.

BIOL 1920 Introductory Topics in Biology: 1-5 semester hours

The topics will vary each semester. See online course schedule for topics. Credit arranged. May be taken more than once for credit if topics are different. The applicability toward a Biology degree is dependent on the topic.

BIOL 1999 Evolution for Everyone: 3 semester hours

Evolution for Everyone explores the development of our current understanding by examining modern and ancient controversies, and by studying major processes by which change occurs. Lectures will present overviews and many examples on topics in history, mechanisms, and outcome of evolutionary change, and students will participate in classroom and online discussions based on readings, computer exercises, and data collection and analysis. Course may not be applied towards major in Biology. Not eligible for credit with BIOL 3302 (Introduction to Evolution) required for Biology majors.

BIOL 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour

Same as CHEM 2010, PHYSICS 2010, MATH 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

BIOL 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour

Same as CHEM 2011, PHYSICS 2011, MATH 2011, and SEC ED 2011. Prerequisites: BIOL 2010, CHEM 2010, PHYSICS 2010, MATH 2010, or SEC ED 2010. Students explore teaching careers, become familiar with STEM school setting through observing and discussing the school environment and by developing and teaching inquiry-based lessons.

BIOL 2012 Genetics: 3 semester hours

Prerequisites: BIOL 1831 (majors must also take BIOL 1821) MATH 1030, and CHEM 1111 or (CHEM 1081 plus CHEM 1091). Fundamental principles of inheritance, including classical genetic theory as well as recent advances in the molecular basis of heredity. Three hours of lecture per week. Fulfills Science/Math requirement.

BIOL 2013 Genetics Laboratory: 2 semester hours

Prerequisites: Concurrent registration in BIOL 2012, or consent of instructor. Laboratory to accompany BIOL 2012. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some exercises.

BIOL 2102 General Ecology: 3 semester hours

Prerequisites: BIOL 1821 and BIOL 1831. An examination of the relationships between living organisms and their environment. Three hours lecture per week. Fulfills Science/Math requirement.

BIOL 2103 General Ecology Laboratory: 2 semester hours

Prerequisites: BIOL 2102 required (may be taken concurrently); a general statistics course strongly recommended. An analysis of environmental factors influencing the abundance and distribution of living organisms. Some classes will be held at field sites in and around St. Louis. Three and one-half hours of laboratory or field work per week.

BIOL 2402 Vertebrate Anatomy: 3 semester hours

Prerequisites: BIOL 1821 and BIOL 1831. Development, structure, function, interrelationships, and zoogeography of vertebrate animals with particular attention to phylogenetic aspects. Three hours of lecture per week. Fulfills Science/Math requirement.

BIOL 2403 Vertebrate Anatomy Laboratory: 2 semester hours

Prerequisite: BIOL 2402 (may be taken concurrently). Laboratory to accompany BIOL 2402. Morphological analysis and systematic survey of major vertebrate groups. Overview of the vertebrate life forms and their adaptations to habitats and resources. Three and one-half hours of laboratory per week.

BIOL 2482 Microbiology: 3 semester hours

Prerequisites: BIOL 1831 (majors must also take BIOL 1821), MATH 1030, and CHEM 1111. Study of microorganisms, their metabolism, genetics, and their interaction with other forms of life. Three hours of lecture per week.

BIOL 2483 Microbiology Laboratory: 2 semester hours

Prerequisite: BIOL 2482 (may be taken concurrently). Experimental studies and procedures of microbiological techniques. Three and one-half hours of organized laboratory time per week. Students will need to return to the laboratory at unscheduled times to complete some exercises.

BIOL 2501 Biology of Plants: 5 semester hours

Prerequisites: BIOL 1821 and BIOL 1831. A general discussion of the plant groups from algae through angiosperms. Plant morphology, physiology, reproduction and ecology will be discussed in lecture (three hours per week). The laboratory (three and one half hours per week) involves examination of representatives of the plant kingdom and experimentation in plant physiology and genetics. Fulfills both a lecture and laboratory requirement.

BIOL 2920 Contemporary Topics in Biology: 1-5 semester hours

Prerequisites: Consent of instructor. The topics will vary each semester. See course schedule online for topics. Credit arranged. May be taken more than once for credit if topics are different.

BIOL 3001 Experiential Practicum in Biosciences: 1 semester hour

Prerequisites: Consent of Biology Curriculum Committee. Credit for off-campus bioscience projects providing extraordinary student experience and service to a community in need.

BIOL 3102 Animal Behavior: 3 semester hours

Prerequisites: BIOL 1821 and BIOL 1831. The study of invertebrate and vertebrate behavior, including neurophysiological, hormonal, developmental, genetic, ecological and evolutionary aspects of behavior; behavior interactions within and between populations. Three hours of lecture per week.

BIOL 3103 Animal Behavior Laboratory: 2 semester hours

Prerequisites: BIOL 3102 (may be taken concurrently). Observational and experimental studies of animal behavior in the field and laboratory. Three and one-half hours of formal laboratory time per week, but additional time may be required for independent projects. Some activities involve field trips or trips to the St. Louis Zoo.

BIOL 3202 Conservation Biology: 3 semester hours

Prerequisites: BIOL 1821 and BIOL 1831. Introduction to the principles and theories of conservation biology. Course topics include biodiversity, extinctions, population modeling, habitat fragmentation, conservation area management, restoration ecology, and social science elements of conservation strategies. Class sessions will include lectures, discussions, and simulation exercises. Three hours of lecture per week.

BIOL 3203 Conservation Biology Laboratory: 2 semester hours

Prerequisite: BIOL 3202 (recommended to be taken concurrently). Laboratory to accompany BIOL 3202. Laboratory will include computer simulations of conservation problems using existing software, 2-3 field trips to local conservation projects, and field interviews with governmental and nongovernmental agencies. Three and one-half hours of laboratory per week.

BIOL 3302 Introduction to Evolution: 3 semester hours

Prerequisites: BIOL 1821 and BIOL 1831, and MATH 1030; BIOL 2012 strongly recommended. Introduction to the theory, events, and processes of organic evolution.

BIOL 3622 Cell Biology: 3 semester hours

Prerequisites: BIOL 1831, BIOL 2012, CHEM 2612, and MATH 1030. Examination of the organization and basic processes of cells including tissues, organelles, glycolysis, respiration, photosynthesis, trafficking, cytoskeleton, signal transduction, and cell division.

BIOL 3631 Histology and Microtechniques: 5 semester hours

Prerequisites: BIOL 1831 (majors must also take BIOL 1821), BIOL 3622 recommended. The basic principles of histology. A survey of basic tissues and organ systems. Techniques associated with preparation of animal tissues for light microscopic studies. Three hours of lecture and 3 1/2 hours of laboratory per week. (Additional lab hours arranged). Fulfills both a lecture and a laboratory requirement.

BIOL 3699 Undergraduate Internship in Biotechnology: 1-4 semester hours

Prerequisites: BIOL 1821, BIOL 1831, and CHEM 1111 and CHEM 1121 and consent of instructor. Concurrent enrollment in CHEM 2612 or higher is strongly encouraged. A 2.5 GPA and enrollment in the undergraduate Biotechnology Certificate Program is required. Internship will consist of a period of observation, experimentation and on-the-job training in a biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours a student works each week and in consultation between the intern's supervisor and instructor. Internship assignments will be commensurate with the education and experience of the student. Two credits may be used to fulfill the lab requirement.

BIOL 3802 Vertebrate Physiology: 3 semester hours

Prerequisites: BIOL 1821 and BIOL 1831 and CHEM 1111 or CHEM 1081 plus CHEM 1091. Basic functional aspects of organ systems in relation to the physiochemical properties of protoplasm. Three hours lecture per week. Fulfills Science/Math requirement.

BIOL 3803 Vertebrate Physiology Lab: 2 semester hours

Prerequisite: BIOL 3802 (may be taken concurrently). Instrumental and experimental studies in physiology. Three and one-half hours laboratory per week.

BIOL 3920 Special Topics in Biology: 1-5 semester hours

Prerequisites: Consent of instructor. The topics will vary each semester. See course schedule online for topics. Credit arranged. May be taken more than once for credit if topics are different.

BIOL 4102 Behavioral Ecology: 3 semester hours

Prerequisite: BIOL 3102 (BIOL 3302 recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, signal use and communication. Three hours of lecture per week. Students may not receive credit for both BIOL 4102 and BIOL 6102.

BIOL 4122 Biometry: 3 semester hours

Prerequisites: MATH 1030 and a minimum of 15 hours in biology. Reviews descriptive, analytical, and experimental methods useful for the statistical study of biological phenomena. Students will develop the skills needed to better appreciate and evaluate the published literature, as well as the ability to design their own research programs. Topics include: the collection and summarization of biological observations; development, design, and testing of hypothesis; analysis and presentation of data. Three hours of lecture per week. Fulfills the statistics requirement for the B.A. or B.S. degree in biology.

BIOL 4182 Population Biology: 3 semester hours

Prerequisite: BIOL 2102 and BIOL 2012 (BIOL 3302 recommended). Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of populations, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. Three hours of lecture per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

BIOL 4192 Applications of Geographic Information Systems: 5 semester hours

Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week. Fulfills both a lecture and a laboratory requirement. Students may not receive credit for both BIOL 4192 and BIOL 6192.

BIOL 4222 Tropical Ecology and Conservation: 3 semester hours

Prerequisite: BIOL 2102, BIOL 4182, BIOL 5192, or equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. Three hours of lecture per week. Students may not receive credit for both BIOL 4222 and BIOL 6222.

BIOL 4245 Field Biology: 3 semester hours

Prerequisite: Three biology courses and consent of instructor. Intensive study of the flora and fauna of selected natural areas of North America, including an extended field trip. Details of the field trip and course schedule will be posted in the Biology department preceding registration for the term in which the course will be offered. Students will be required to pay costs of travel and of the field trip. This is a laboratory course appropriate for advanced undergraduates and non-thesis Master of Science students.

BIOL 4270 Global Climate Change: 3 semester hours

Prerequisites: BIOL 3302 or consent of instructor. Topics included are fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. In addition, basic environmental economics and politics of climate change at local and global levels will be included. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

BIOL 4299 Practicum in Conservation: 2-3 semester hours

Prerequisites: Consent of instructor and BIOL 3202. This course is generally restricted to students officially enrolled in the Certificate Program in Conservation Biology. The course provides practical experience with conservation or environmental agencies. Specific placement will be selected according to student's interests and career goals as well as availability of agency openings. Course requirements include practical experience and final report on practicum experience.

BIOL 4402 Ornithology: 3 semester hours

Prerequisites: BIOL 2102 and junior standing. Introduction to avian biology and ecology. Material to be covered will include basic adaptations of anatomy, physiology, and behavior of birds. There will be a strong emphasis on avian ecology and conservation. Specific topics will include flight, reproductive behavior, migration, foraging behavior, community structure, and current conservation concerns. The diversity of birds will be emphasized through comparisons between temperate and tropical regions. Three hours of lecture per week.

BIOL 4403 Ornithology Laboratory: 2 semester hours

Prerequisites: BIOL 4402 (may be taken concurrently), or consent of instructor. This course will introduce students to methods of identifying and studying birds. Labs will almost entirely be comprised of field trips to local areas and will emphasize diversity of birds, adaptations shown by different groups, and means of identification, particularly of birds found in Missouri. Field projects will focus on techniques for censusing birds, sampling foraging behavior, and studying habitat selection. Indoor periods will cover internal and external anatomy of birds. Slides and field trips to the St Louis Zoo will be used to survey the diversity of birds worldwide. Three and one-half hours of laboratory per week. Longer (e.g., Saturday) field trips will be made when appropriate.

BIOL 4422 Entomology: 3 semester hours

Prerequisites: BIOL 1821 and BIOL 1831. 9 additional hours of biology and upper-division standing. Development, structure, function, behavior and ecology of insects, including a systematic survey of the orders of Insecta. Three hours of lecture per week.

BIOL 4423 Entomology Laboratory: 2 semester hours

Prerequisites: BIOL 4422 (may be taken concurrently). Laboratory to accompany BIOL 4422. Studies of the morphology, physiology, and behavior of insects to give a sampling of biological studies of the class Insecta. Formation of a collection of insects, comprising a systematic survey of orders and principal families, will be an integral part of the course and will require additional time beyond the official lab hours. Three and one-half hours of lab per week.

BIOL 4442 Developmental Biology: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

BIOL 4501 Flowering Plant Families: Phylogeny and Diversification: 5 semester hours

Prerequisites: BIOL 1821, BIOL 1831 and junior standing or consent of instructor. Focusing on the flowering plant families of North America, the aim of the course is to give an understanding of their phylogeny and diversification. Student will also gain an understanding of plant morphology and anatomy, a basis for further developing their knowledge of plants. Three hours of lecture and three to four hours of laboratory per week. Students may need to return to the laboratory at unscheduled times.

BIOL 4502 Evolution of Cognition: 3 semester hours

Prerequisites: BIOL 3102 or consent of instructor; BIOL 3302 and PSYCH 2211 are strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week.

BIOL 4550 Bacterial Pathogenesis: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Three hours of lecture per week. Students may not receive credit for both BIOL 4550 and BIOL 6550.

BIOL 4602 Molecular Biology: 3 semester hours

Prerequisites: BIOL 2012 and CHEM 2612. A study of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells. Three hours of lecture per week. Students may not receive credit for BIOL 4602 and either BIOL 6602, or any course previously called Gene Expression in Eukaryotes or Advanced Gene Expression in Eukaryotes.

BIOL 4608 Synthetic Biology: 3 semester hours

Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for BIOL 4608 and BIOL 6608.

BIOL 4612 Molecular Genetics of Bacteria: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 2482. A study of the molecular biology of gene replication, transfer, and expression in bacterial cells. Topics include DNA replication, transcription and translation, mutagenesis, DNA repair and recombination, gene transfer, and the regulation of genes and global expression systems. Three hours of lecture per week. Student may not receive credit for BIOL 4612 and either BIOL 6612 or any course previously called Gene Expression in Prokaryotes or Advanced Gene Expression in Prokaryotes.

BIOL 4614 Biotechnology Laboratory I: 4 semester hours

Prerequisites: BIOL 2012 or consent of instructor. An introduction to the fundamental concepts that underlie the field of biotechnology. Both the basic principles of molecular biology and hand-on experience with the techniques of the field will be addressed through lectures, discussions, and a series of laboratory exercises. Two hours of lecture and four hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4614 and a comparable biotechnology course from another institution.

BIOL 4615 Biotechnology Laboratory II: 4 semester hours

Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Fulfills a laboratory requirement only; may not be used to fulfill the higher level (4000-5000) lecture course requirement for the B.A. or B.S. degree in biology. Students may not receive credit for BIOL 4615 and BIOL 6615.

BIOL 4622 Cellular Basis of Disease: 3 semester hours

Prerequisites: BIOL 3622. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 4622 and BIOL 6622.

BIOL 4632 Nucleic Acid Structure and Function: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions and biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 4642 Plant Molecular Biology and Genetic Engineering: 3 semester hours

Prerequisites: BIOL 2012, BIOL 3622. This course covers topics such as molecular and cellular aspects of plant growth, development, and responses to environmental stress and pathogen attack, using the experimental approaches of genetics, molecular biology, and biochemistry. Plant growth manipulation and genetic engineering, including techniques required for DNA transfer and plant regeneration, as well as current and potential future applications, such as engineered resistance to stress, developmental engineering, and metabolic engineering, also will be covered. Students may not receive credit for both BIOL 4642 and BIOL 6642.

BIOL 4652 Virology: 3 semester hours

Prerequisite: BIOL 2012 and BIOL 3622. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 4662 Human Pathology: 3 semester hours

Prerequisites: BIOL 3622 or consent of the instructor. A study of disease processes as they affect the human body. The course will examine both the proximate causes and underlying mechanisms of disease. Specific conditions will be used to illustrate application of clinical approaches in determining the origin, development, and effects of a disease.

BIOL 4712 Biochemistry: 3 semester hours

Same as: CHEM 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

BIOL 4713 Techniques in Biochemistry: 2 semester hours

Prerequisites: BIOL 4712 or CHEM 4712 (may be taken concurrently). Laboratory activities introducing fundamental qualitative and quantitative biochemical techniques. Student evaluation will be based on laboratory participation, student laboratory reports, and written examinations. Three and one-half hours of organized laboratory time per week. Students may need to return to the laboratory at unscheduled times to complete some experiments.

BIOL 4797 Biochemistry and Biotechnology Seminar: 1 semester hour

Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

BIOL 4822 Introduction to Neuroscience: 3 semester hours

Prerequisite: BIOL 3802 or consent of instructor. The study of nervous systems, featuring the cellular bases of initiation and conduction of the impulse, synaptic transmission, and the network integrative function of invertebrate and vertebrate nervous systems. This course emphasizes the multidisciplinary nature of the neurosciences, including anatomical, physiological and molecular approaches to understanding neural function. Three hours of lecture per week.

BIOL 4842 Immunobiology: 3 semester hours

Prerequisite: BIOL 3622 and CHEM 2612. The fundamental principles and concepts of immunology and immunochemistry. Emphasis on the relation of immunological phenomena to biological phenomena and biological problems. Three hours lecture per week.

BIOL 4889 Senior Seminar: 2 semester hours

Prerequisites: BIOL 1821, BIOL 1831, BIOL 2012, and BIOL 3302, with a total of at least 30 credits in Biology and the consent of your assigned Biology Advisor. Oral and written presentation by students of selected scientific papers or articles. Students are expected to participate in discussions of oral presentations by other students. May not be taken for graduate credit.

BIOL 4905 Research: 1-3 semester hours

Prerequisites: Consent of faculty research advisor. Research in an area selected by the student in consultation with and under the direct supervision of an UMSL biology faculty research adviser. Research opportunities are subject to availability and must be approved in advance of beginning research. The project may include the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester at the discretion of the instructor. Credit arranged. Course may be repeated for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS. May not be taken for graduate credit.

BIOL 4915 Biology Internship: 1-3 semester hours

Prerequisites: Consent of faculty research advisor; generally restricted to junior and senior standing. Research in an area selected by the student to be conducted off-campus in a lab of a professional researcher or faculty person (the internship mentor) other than those in UMSL Biology. Research opportunities are subject to availability and must be approved in advance of beginning research by an UMSL biology faculty liaison and the internship mentor. The project normally includes the reading of pertinent literature, laboratory or field experience, including keeping of a logbook, and a summary paper and a presentation, all based on an average 8 hours per week per credit during a 15 week semester. Credit arranged. This course and BIOL 4905 may be repeated in any combination for a total of up to 5 credit hours. A maximum of one lab requirement may be satisfied using any two BIOL 4905 and/or BIOL 4915 credits. Additional credits may be applied toward the total biology hours required for the biology BA or BS.

BIOL 4920 Selected Topics in Biology: 3 semester hours

Prerequisites: Junior standing and consent of instructor. The topic for this course will vary each semester. Topics offered for the following semester will be posted in the departmental office. This course may be repeated once if the topic is different.

BIOL 5059 Topics In Ecology, Evolution, And Systematics: 1 semester hour

Prerequisites: Graduate Standing. Presentation and discussion of faculty and student current research projects in behavior, ecology, evolution, and systematics. May be repeated.

BIOL 5069 Topics In Cellular And Molecular Biology: 1 semester hour

Prerequisite: Graduate standing or consent of instructor. Presentation and discussion of student and faculty research projects and/or current research articles in molecular, cellular and developmental biology. May be repeated. Course graded on a satisfactory/unsatisfactory basis.

BIOL 5079 Topics In Floristic Taxonomy: 1 semester hour

Prerequisite: BIOL 2501 or equivalent, and graduate standing. Seminar course In systematics of higher plants, arranged In the Cronquist sequence of families, covering morphology, anatomy, palynology, biogeography, chemosystematics, cytology, and other aspects of plant classification and phylogenetics. Given at the Missouri Botanical Garden. One hour per week.

BIOL 5089 Topics In Animal Behavior: 1 semester hour

Prerequisites: Graduate standing. Presentation and discussion of current research articles and/or student and faculty research projects in animal behavior, including ecology, evolution, genetics, and mechanisms of behavior. May be repeated.

BIOL 5099 Biology Colloquium: 1 semester hour

Prerequisites: Graduate standing. Attendance is required for the Biology weekly seminar series, consisting of research presentations by department faculty and invited speakers. Class sessions will include discussion of scientific research and presentation practices.

BIOL 5123 Advanced Tropical Resource Ecology Field Studies: 2 semester hours

Prerequisites: BIOL 5122 (may be taken concurrently). The field component to the lecture and seminar course. Examines the patterns of use and exploitation of resources in the tropics by humans in the context of the theories of behavioral ecology. Two weeks of intensive field research and lectures in Guyana, South America during the second and third weeks of Summer Session I (trip costs to be borne by the student). Students may not receive credit for both BIOL 3123 and BIOL 5123. Offered in odd numbered years.

BIOL 5177 Graduate Research Writing Workshop in Biology: 1 semester hour

Prerequisites: Graduate standing. This hands-on course is designed to give Biology graduate students practical assistance and advice on writing, including grant proposal content and organization, writing succinctly but clearly, and editing. The course format will include both informational lectures with discussions and working sessions focused on writing and critiquing drafts. Students are recommended to begin the class ready to write at least one aim of a grant or thesis proposal. Course is graded on a satisfactory/unsatisfactory basis.

BIOL 5178 Introduction to Graduate Research in Biology: 1 semester hour

Prerequisites: Graduate standing or consent of instructor. A discussion-based class to introduce new PhD and thesis MS students to the Biology department, graduate school, and best research practices.

BIOL 5179 Ethical Issues in Biology: 1 semester hour

Prerequisites: Graduate Standing. Using readings and discussions, students will explore ethical issues in Biology in both professional and social realms. Professional topics include authorship, grants accounting, and academic misconduct; social topics include ethical foundations of basic and applied science, government regulation of science, environmental and individual protection, and current issues. Course graded on a satisfactory/unsatisfactory basis.

BIOL 5192 Community Ecology: 3 semester hours

Prerequisites: Graduate standing and either BIOL 2102 and BIOL 4182 or an equivalent course. Studies of structure and organization of natural communities stressing the abundance and distribution of species, the regulation of species diversity, and the evolution of demographic parameters in populations.

BIOL 5302 Advanced Evolution: 3 semester hours

Prerequisites: BIOL 3302 or graduate standing. Explores advanced topics in the study of adaptation and the origin of species. Covers phenomena both within populations (e.g. natural selection, sexual selection, and molecular evolution) and between populations (e.g. speciation, coevolution, competition, gene flow, biogeography, and comparative phylogenetics), with a particular focus on recent primary literature.

BIOL 5312 Theory of Systematics: 3 semester hours

Prerequisites: BIOL 1821, BIOL 1831 and at least one course beyond the introductory level dealing with animal, plant, or microbial diversity (such as BIOL 2482, BIOL 2501, BIOL 2402, BIOL 4482, BIOL 4501, BIOL 4402, BIOL 4422) or consent of instructor. Course investigates the theory of classification, phylogenetic analysis, systematic biology, and their relation to systematic practice. Will cover goals and schools of systematics, characters and homology, analysis of molecular and morphological data and underlying assumptions, species concepts, classification, naming, and the connections between evolutionary biology and systematics. The course is appropriate for upper level undergraduates & graduate students in all disciplines, animal, plant, and microbial, as an introduction to systematic methods. Three hours of lecture per week.

BIOL 5436 Applied Bioinformatics: 3 semester hours

Prerequisites: BIOL 4712 or BIOL 4602 or consent of instructor. This course provides a survey of the various computational approaches that can be used to solve biological problems. Specific attention will be focused on biological databases and methods for using and interpreting database information, sequence alignments, functional genomics, structure prediction, high-throughput analyses, and proteomics. Three hours of lecture per week.

BIOL 5798 Practicum in Science in Business: 1-2 semester hours

Same As CHEM 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

BIOL 5799 Internship in Sciences in Business: 1-2 semester hours

Same As CHEM 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of a period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

BIOL 6102 Advanced Topics In Behavioral Ecology: 3 semester hours

Prerequisite: BIOL 3102 (BIOL 3302 is recommended). The evolution and ecology of animal behavior. Topics include the theoretical framework for making predictions, foraging, decision making, sensory ecology, sexual selection, mating systems, sociality and groups, cooperation, and signal use and communication. Three hours of lecture per week. Assignments will include a heavy emphasis on theory and modelling approaches to behavioral ecology. Students may not receive credit for both BIOL 4102 and BIOL 6102.

BIOL 6182 Advanced Population Biology: 3 semester hours

Prerequisites: BIOL 2012 (BIOL 3302 recommended). Introduces concepts and mathematical models of population ecology and population genetics. By integrating the ecology and genetics of population, the course goal is to understand the processes that contribute to microevolution of populations. Topics include: demography, metapopulation biology, natural selection, migration, gene flow, and genetic drift. A discussion section will focus on mathematical elements of population biology models. Three hours of discussion per week. Students may not receive credit for both BIOL 4182 and BIOL 6182.

BIOL 6192 Applications of Geographic Information Systems: 5 semester hours

Prerequisites: BIOL 2102, BIOL 4122 or equivalent, and consent of instructor. Geographic Information Systems (GIS) are sophisticated computer-based systems for analysis, capture, presentation, and maintenance of geographically referenced data. This course provides a foundation in using GIS for spatial analysis. Although biological examples are primarily used, examples from a range of disciplines are employed to emphasize the use of GIS as a tool to support analysis and decision-making. Students will have hands-on use of GIS software using Windows 2000/NT based workstations during each session. An independent research project applying the spatial analysis tools learned in GIS to biological research will be required. Five hours of combined lecture and computer operations, plus 2-3 hours of open lab per week.

BIOL 6222 Advanced Tropical Ecology and Conservation: 3 semester hours

Prerequisite: BIOL 2102, BIOL 4182, or BIOL 5192, or their equivalent. This course will cover research areas in tropical population, community and ecosystem ecology, with emphasis on inter-species and environment-organism interactions, population control factors, and genetic structure of populations. Topics include the current status and causes of tropical habitat destruction, ongoing attempts to manage those habitats, and development of strategies leading to sustained use of non-renewable resources. A research proposal designed to investigate a current topic in tropical ecology will be required. Students may not receive credit for BIOL 4222 and BIOL 6222. Three hours of lecture per week.

BIOL 6250 Public Policy of Conservation and Sustainable Development: 3 semester hours

Same as POL SCI 6452. Prerequisite: Graduate standing in Biology or Political Science and consent of instructor. Prior course in ecology recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

BIOL 6270 Advanced Global Climate Change: 3 semester hours

Prerequisites: Graduate Standing or permission of the instructor. We will cover the fundamental physical, meteorological, and biological circumstances of global climate change, as well as predictions of its future effects on biological diversity, including humans, and how those estimates are made. We will also cover basic environmental economics and politics of climate change at local and global levels. The course will be taught as a series of lectures and discussions led by guest experts in each of the subdisciplines covered. Students may not receive credit for both BIOL 4270 and BIOL 6270.

BIOL 6299 Internship in Conservation Biology: 1-4 semester hours

Prerequisite: BIOL 6250 or BIOL 6212 and consent of the director of graduate studies in biology. Internships will consist of a period of study, observation and on-the-job training at a conservation or environmental agency. Specific placements will be selected according to student's interests and career goals. Internships may vary from 2 weeks to 4 months in duration.

BIOL 6442 Advanced Developmental Biology: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 3622. A study of the basic principles that shape the embryonic and post-embryonic development of animals with an emphasis on the underlying cellular and molecular mechanisms. Specific topics include fertilization, determination of cell fate and differentiation, cell migration, establishment of the body plan, formation of selected organs and organ systems, stem cells, and limb regeneration. Environmental influences on development and the impact of developmental biology on modern medicine are also discussed. Three hours of lecture/discussion per week. Students may not receive credit for both BIOL 4442 and BIOL 6442.

BIOL 6502 Advanced Evolution of Cognition: 3 semester hours

Prerequisites: BIOL 3102 and BIOL 3302, or consent of instructor; PSYCH 2211 strongly recommended. The evolutionary ecology of animal cognitive abilities. Topics include learning, memory, perception, navigation, and communication from an evolutionary perspective. The focus is on cognitive abilities as adaptations, which have evolved to solve specific environmental problems. Topics include empirical methods for assessing cognitive ability, experimental design, theoretical approaches for generating predictions, and the parsimonious interpretation of data. Two hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4502 and BIOL 6502.

BIOL 6550 Advanced Bacterial Pathogenesis: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 2482. Examination of the strategies bacterial pathogens use to infect animals. Topics include host immune responses to infection, bacterial virulence factors, regulation of bacterial virulence, and the cellular and molecular approaches used to study host-parasite interactions. Students may not receive credit for both BIOL 6550 and BIOL 4550. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Three hours of lecture per week.

BIOL 6602 Advanced Molecular Biology: 3 semester hours

Prerequisites: BIOL 2012 and CHEM 2612, or consent of instructor. A study of the principles of molecular biology, with emphasis on understanding the genetic regulation of DNA, RNA, and protein synthesis and function in eukaryotic cells. Three hours of lecture per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6602 and BIOL 4602, or any course previously called Gene Expression in Eukaryotes or Advanced Gene Expression in Eukaryotes.

BIOL 6608 Advanced Synthetic Biology: 3 semester hours

Prerequisites: BIOL 2012, BIOL 2482. A study of the molecular biology of microbial cells, in the context of synthetic biological systems. Topics include DNA replication, transcription, translation, gene regulation and protein structure as well as aspects of genetic engineering as they apply to the construction of novel biological systems. Following an introduction to the design of biological parts used in synthetic biology, students read, discuss and present recent journal articles in order to learn about current advances and applications of synthetic biology. Three hours of lecture per week. Students may not receive credit for both BIOL 4608 and BIOL 6608.

BIOL 6612 Advanced Molecular Genetics of Bacteria: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 2482. A study of the molecular biology of gene replication, transfer, and expression in bacterial cells. Topics include DNA replication, transcription and translation, mutagenesis, DNA repair and recombination, gene transfer, and the regulation of genes and global expression systems. Three hours of lecture per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Student may not receive credit for both BIOL 6612 and BIOL 4612 or any course previously called Gene Expression in Prokaryotes or Advanced Gene Expression in Prokaryotes.

BIOL 6615 Advanced Biotechnology Laboratory II: 4 semester hours

Prerequisites: BIOL 4614 and either BIOL 4602 or BIOL 4612, or consent of instructor. An in-depth look at the theory and practice of biotechnology. Lectures and discussion will examine the underlying principles, and laboratory exercises will present hands-on experience with current techniques. One hour of lecture and six hours of laboratory per week. Students will be required to give an oral presentation and/or write an extra paper on a topic relevant to the course. Students may not receive credit for both BIOL 6615 and BIOL 4615 or any course previously called Techniques in Molecular Biology or Advanced Techniques in Molecular Biology.

BIOL 6618 Practical Next-Generation Sequencing: 3 semester hours

Prerequisites: Consent of instructor. This is a laboratory course in practical next-generation sequencing. Roughly one-half of the course will focus on bench-top methods for generating sequencing libraries from total RNA as well as the use of next-generation sequencing instruments. The second half of the course will focus on computational methods for analyzing sequencing data, including data visualization and coding.

BIOL 6622 Advanced Cellular Basis of Disease: 3 semester hours

Prerequisites: BIOL 3622, or consent of instructor. A study of the structural organization and processes of eukaryotic cells, focusing on how defects in cellular function lead to genetic diseases and cancer. Topics of discussion may include membrane dynamics, intracellular trafficking, signal transduction, and the cell cycle. Three hours of lecture per week. Students may not receive credit for both BIOL 6622 and BIOL 4622.

BIOL 6632 Advanced Nucleic Acid Structure and Function: 3 semester hours

Prerequisites: BIOL 2012 and BIOL 4712 or equivalent, or consent of instructor. A comprehensive view of the structural properties of DNA and RNA that promote molecular interactions & biological function. Topics will include the physical properties of nucleic acids, the formation and biological importance of higher order structures, RNA enzymatic activities, nucleic acid-protein interactions, and RNA metabolism. Three hours of lecture and one hour of discussion per week. Students may not receive credit for both BIOL 4632 and BIOL 6632.

BIOL 6642 Advanced Plant Biology and Biotechnology: 3 semester hours

Prerequisites: Graduate standing. Topics may include molecular and cellular aspects of plant growth, development, and responses to environmental stress and pathogen attack, using the experimental approaches of genetics, molecular biology, and biochemistry. Plant growth manipulation and genetic engineering, including the techniques required for DNA transfer and plant regeneration, as well as current and potential future applications, such as engineered resistance to stress, developmental engineering, and metabolic engineering, also will be covered. Student may not receive credit for both BIOL 4642 and BIOL 6642.

BIOL 6652 Advanced Virology: 3 semester hours

Prerequisites: BIOL 2012, BIOL 3622, and graduate standing. This first half of the course entails a comparative study of the structure, replication, and molecular biology of viruses. The second half of the course focuses on the pathogenesis, control, and evolution of animal viruses. Three hours of lecture, one hour of discussion or seminar per week. Students may not receive credit for both BIOL 4652 and BIOL 6652.

BIOL 6699 Graduate Internship in Biotechnology: 1-4 semester hours

Prerequisites: Graduate standing and enrollment in graduate Biotechnology Certificate Program. 6 credit hours maximum (maximum of 8 combined credit hours of BIOL 6905 and internship) Internship will consist of period of observation, experimentation and on-the-job training in biotechnology laboratory. The laboratory may be industrial or academic. Credit will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the instructor. Internship assignments will be commensurate with the education and experience of the student.

BIOL 6889 Graduate Seminar: 2 semester hours

Presentation and discussion of various research problems in biology. Graduate student exposure to the seminar process.

BIOL 6905 Graduate Research in Biology: 1-10 semester hours

Research in area selected by student in consultation with faculty members.

BIOL 6915 Graduate Research Practicum: 1-2 semester hours

Prerequisite: Consent of instructor. This course is designed for graduate students wishing to pursue research experience in an area outside their dissertation topic. The project can be techniques-oriented or focused on a specific research question. The credit hours will depend on the time commitment to the project as decided by the supervisory faculty member.

BIOL 6920 Advanced Topics in Biology: 1-5 semester hours

Prerequisites: Graduate standing. In-depth studies of selected topics in contemporary biology. May be repeated.

Chemistry and Biochemistry

General Information

Degrees and Areas of Concentration

The Department of Chemistry and Biochemistry offers courses leading to the following baccalaureate degrees:

- B.A. in Chemistry
- B.A. in Chemistry with a Biochemistry Certificate
- B.S. in Chemistry (with a Chemistry or Biochemistry Option)
- B.S. Ed. in Secondary Education with Emphasis in Chemistry (in cooperation with the College of Education)
- B.A. or B.S. in Chemistry with Master's Level Coursework for Secondary Teacher Certification (in cooperation with the College of Education)

The department is accredited by the American Chemical Society. Students completing the B.S. degree (chemistry or biochemistry option) are certified by the American Chemical Society. The B.S. degree is the professional degree in chemistry, and students who earn the B.S. degree are well prepared for a career in the chemical industry or for graduate work in chemistry. The department provides opportunities for undergraduates to become involved in ongoing research projects.

The department also offers graduate work leading to the M.S. or Ph.D. degree in chemistry with most graduate courses being scheduled in the evening. A student may earn a M.S. degree with or without a thesis. The non-thesis option provides a convenient way for students who are employed full-time to earn an advanced degree. The department also offers a non-thesis M.S. with a professional science emphasis. This option includes 9 credit hours of business courses and an internship practicum.

Research leading to a M.S. thesis or Ph.D. dissertation may be conducted in one of four emphasis areas, namely, inorganic chemistry, organic chemistry, physical chemistry, or biochemistry. The nature of the graduate program allows each student to receive individualized attention from his/her research mentor, and to develop hands-on experience with major instrumentation in the department.

Fellowships, Scholarships and Awards

The following scholarships, fellowships and awards are available to chemistry majors:

- The John J. Taylor Scholarship is given to a full-time student with high financial need, pursuing a chemistry degree and currently enrolled either of junior or senior status.
- The Friends and Alumni Scholarship is given to a full-time student with high financial need and pursuing a chemistry degree.
- The Monsanto Scholarship in Biochemistry and Biotechnology is open to full-time Sophomore, Junior or Senior students at the University pursuing a Bachelor of Science degree in Biochemistry and Biotechnology.
- William and Erma Cooke Chemistry Scholarships are given annually to outstanding full-time chemistry majors who are at least sophomores and have financial need.
- The Lawrence Barton Scholarship is awarded to a junior, preferably a first generation college student.
- The Barbara Willis Brown Scholarship for Women in Chemistry is given annually to a female chemistry major who is at least 25 years of age. The student is encouraged to enroll in undergraduate research (CHEM 3905), however research is not requirement for this award. Student financial need is a consideration.
- The Eric G. Brunngraber Memorial Scholarship is given to a chemistry major based on GPA, statement of research interests, and performance in completed course work.
- Aid to Education Scholarships are given to junior or senior chemistry majors annually. Faculty select awardees on the basis of merit.
- The M. Thomas Jones Fellowship is given each semester to the graduate student who is deemed by his/her peers to have presented the best research seminar.
- The Graduate Research Accomplishment Prize is given annually. The recipient is chosen based on his/her publications, presentations at professional meetings, and seminars given at UMSL.
- Alumni Graduate Research Fellowships are available for summer study for selected chemistry graduate students.
- Charles W. Armbruster Scholarship: These scholarships are awarded to outstanding transfer students. The recipients are selected on the basis of need and merit and they must be enrolled in at least 9 credit hours.
- Hal and Mary Harris Endowed Scholarship in Chemistry: Recipients must be juniors seeking a degree in chemistry with a minimum GPA of 3.0 and enrolled in a minimum of 12 credit hours.
- Stephen S. Lawrence Endowed Scholarship in Chemistry: Recipients will be junior or senior chemistry majors who demonstrate financial

need, are enrolled in a minimum of 9 credit hours and maintain a cumulative GPA of at least 2.8. Awardees will have demonstrated a good record of departmental citizenship which may include tutoring, teaching, activity in the chemistry club, or other departmental volunteer activities.

- The Rath Family Scholarship: The scholarship shall be awarded to a full-time, undergraduate student who is interested in pursuing a degree in the STEM disciplines at UMSL. Preference may be given to a student who is majoring in Chemistry/Biochemistry who demonstrates financial need and in addition to students from first generation populations from the Indian Subcontinent/South Asia where possible. A GPA of 3.0 or better and a minimum ACT score of 24 (ACT is only applicable for US students) is required. Award recipients will be encouraged to participate in peer-mentoring, tutoring, or similar programs in the STEM disciplines.

Several undergraduate awards are given each year to outstanding students. The Chemical Rubber Company Introductory Chemistry Award is given to the outstanding student in introductory chemistry. The Outstanding Sophomore Chemistry Major award is made to the top sophomore chemistry student. The American Chemical Society Division of Analytical Chemistry Award is given to the outstanding student in analytical chemistry. Similar awards are given to the top students in Inorganic, Organic and Physical Chemistry. The American Chemical Society-St. Louis Section, Outstanding Junior Chemistry Major Award is given to the outstanding junior chemistry major, and the outstanding senior receives the Alan F. Berndt Outstanding Senior Award.

Departmental Honors

The Department of Chemistry and Biochemistry will award departmental honors to those B.A. and B.S. degree candidates in chemistry with an overall grade point average of 3.2. They must also successfully complete CHEM 3905, Chemical Research, and must present an acceptable thesis.

Career Outlook

The St. Louis metropolitan area has long been a major center for industrial chemistry, and in the past decade it has become a focus for the establishment of life sciences research and development. A bachelor's degree in chemistry provides a student with the professional training needed to play a part in this ever-changing industry.

A major in chemistry provides excellent preprofessional training in the health sciences, and a double major in chemistry and biology is often chosen by premedical and pre dental students and those interested in graduate work in biochemistry and biology. A minor in chemistry provides the minimum qualification and training for a position as a laboratory technician in industry, hospital laboratories, etc.

A Master's degree in chemistry is often required for further advancement in the chemical industry, whereas a doctoral degree opens the door to many opportunities, including careers in the academic world, industrial research and development, and in government laboratories.

Undergraduate Studies

General Education Requirements

Students must satisfy the university and college general education requirements (p. 41). Courses in chemistry may be used to meet the university's science and mathematics area requirement. The college's foreign language requirement fulfills the departmental requirements for B.A. candidates. B.S. degree candidates are not required to take a foreign

language; however, the American Chemical Society (ACS) states that the study of a foreign language is recommended, especially for students planning to pursue graduate studies in chemistry.

Satisfactory/Unsatisfactory Restrictions

Chemistry majors may not take required chemistry, mathematics, or physics courses on a satisfactory/unsatisfactory basis.

Declaring the Chemistry Major

Students seeking to major in chemistry are first designated as 'pre-chemistry majors' until they have completed both CHEM 1111 and CHEM 1121 or equivalent courses. Upon successful completion of CHEM 1111 and CHEM 1121 with grades of C or better, students will be allowed to declare chemistry as their major. Each of these courses must be completed successfully within two attempts.

Degree Requirements

Bachelor of Arts in Chemistry

This degree is intended primarily for preprofessional students in health science and related areas, as well as prelaw students interested in patent law. Candidates must complete the following chemistry courses:

CHEM 1111	Introductory Chemistry I	5
CHEM 1121	Introductory Chemistry II	5
CHEM 2223	Quantitative Analysis	3
CHEM 2612	Organic Chemistry I	3
CHEM 2622	Organic Chemistry II	3
CHEM 2633	Organic Chemistry Laboratory	2
CHEM 3022	Introduction To Chemical Literature	1
CHEM 3312	Physical Chemistry I	3
CHEM 3322	Physical Chemistry II	3
CHEM 3333	Physical Chemistry Laboratory I	2
CHEM 3412	Basic Inorganic Chemistry	2
CHEM 4897	Seminar	1

Select one of the following:

CHEM 3643	Advanced Organic Chemistry Laboratory
CHEM 4233	Laboratory In Instrumental Analysis
CHEM 4343	Physical Chemistry Laboratory II
CHEM 4433	Inorganic Chemistry Laboratory
CHEM 4733	Biochemistry Laboratory

Total Hours 33

No more than 45 hours in chemistry may be applied toward the degree. Each chemistry major must present a seminar and pass a comprehensive examination during the senior year. At least 12 credits at the 3000 level or higher must be completed at UMSL. The Department of Chemistry and Biochemistry may require students to pass a tracking test in order to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Bachelor of Arts in Chemistry with a Biochemistry Certificate

The university offers a certificate program for science majors who are interested in careers in biochemistry. This is an interdisciplinary program that involves additional courses in biochemistry and biology. In addition to

the usual requirements for the B.A. degree in chemistry, the student must take the following courses:

Chemistry

CHEM 4712	Biochemistry	3
CHEM 4722	Advanced Biochemistry	3
CHEM 4733	Biochemistry Laboratory	2
CHEM 4772	Physical Biochemistry	3
Biology		
BIOL 1831	Introductory Biology: From Molecules To Organisms	5
BIOL 2012	Genetics	3
BIOL 3622	Cell Biology	3
BIOL 4602	Molecular Biology	3
Total Hours		25

At least 12 hours at the 3000 level or above must be completed at UMSL.

Students may obtain a minor in biology by adding BIOL 1821 to the curriculum described above. The Biology department also offers a certificate in biochemistry.

Bachelor of Science in Chemistry

This is the first professional degree in chemistry. It may be taken as a terminal degree by students intending to become professional chemists or for preparation for graduate work in chemistry or biochemistry. Students may choose to specialize in chemistry or biochemistry.

Chemistry Option

Candidates must complete the requirements for the B.A. degree in chemistry. In addition, the following chemistry courses are required:

CHEM 3643	Advanced Organic Chemistry Laboratory	2
CHEM 4212	Instrumental Analysis	2
CHEM 4233	Laboratory In Instrumental Analysis	2
CHEM 4343	Physical Chemistry Laboratory II	2
CHEM 4412	Advanced Inorganic Chemistry	3
CHEM 4433	Inorganic Chemistry Laboratory	2
CHEM 4712	Biochemistry	3
Total Hours		16

Students must also take two elective hours of advanced work in chemistry at the 3000 level or above. Students are encouraged to take CHEM 3905, Chemical Research, to fulfill the advanced elective requirement.

Biochemistry Option

Candidates must complete the requirements for the B. A. degree in chemistry. In addition, the following chemistry and biology courses are required:

Chemistry

CHEM 3643	Advanced Organic Chemistry Laboratory	2
CHEM 4212	Instrumental Analysis	2
CHEM 4233	Laboratory In Instrumental Analysis	2
CHEM 4712	Biochemistry	3
CHEM 4722	Advanced Biochemistry	3

CHEM 4733	Biochemistry Laboratory	2
Select one of the following:		3
CHEM 4772	Physical Biochemistry	
CHEM 3905	Chemical Research (3 credits)	
BIOL 4905	Research (3 credits)	
Biology		
BIOL 1831	Introductory Biology: From Molecules To Organisms	5
BIOL 2012	Genetics	3
BIOL 3622	Cell Biology	3
Total Hours		28

If either research option is chosen, the project must be in biochemistry and must include a written final report submitted to the Department of Chemistry and Biochemistry.

Fifty-one hours of chemistry courses may be applied toward the degree. At least 24 hours of chemistry at the 3xxx level or higher must be completed at UMSL. Each chemistry major candidate must present a seminar and pass a comprehensive examination during the senior year.

Related Area Requirements

Bachelor of Arts and Bachelor of Science in Chemistry

Candidates for both degrees must also complete:

MATH 1800	Analytic Geometry And Calculus I	5
MATH 1900	Analytic Geometry And Calculus II	5
MATH 2000	Analytic Geometry And Calculus III	5
PHYSICS 2111	Physics: Mechanics And Heat	5
PHYSICS 2112	Physics: Electricity, Magnetism, And Optics	5
Total Hours		25

B.S. Ed. in Secondary Education with Emphasis in Chemistry

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

B.A. or B.S. in Chemistry with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework.

Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Minor in Chemistry

Requirements for the Minor

Students may earn a minor in chemistry by completing the following program. The following five courses are required:

CHEM 1111	Introductory Chemistry I	5
CHEM 1121	Introductory Chemistry II	5
CHEM 2223	Quantitative Analysis	3
CHEM 2612	Organic Chemistry I	3
CHEM 2633	Organic Chemistry Laboratory	2
Select one of the following:		2-3
CHEM 2622	Organic Chemistry II	
CHEM 3312	Physical Chemistry I	
CHEM 3412	Basic Inorganic Chemistry	
CHEM/BIOI 4712	Biochemistry	
Total Hours		20-21

Courses, which are prerequisites to subsequent courses in the minor, may not be taken on a satisfactory/ unsatisfactory basis. A GPA of at least 2.0 is required for the courses presented for the minor. At least three courses toward the minor must be completed at UMSL.

Bachelor of Science in Biochemistry and Biotechnology

The Department of Chemistry and Biochemistry, in cooperation with the Department of Biology, offers a Bachelor of Science degree in Biochemistry and Biotechnology (p. 64). Information about this degree program may be found at the Biochemistry & Biotechnology Programs Home Page (<http://www.umsi.edu/~biotech>).

3+4 Chemistry – Optometry Program

This is a new program option for a Chemistry degree that would enable students to earn a BA in Chemistry in 3 years (likely requiring that some courses be taken over the summer semesters) and an Optometry degree in 4 years.

1st Semester (15)

CHEM 1111	Introductory Chemistry I	5
BIOI 1821	Introductory Biology: Organisms And The Environment	5
MATH 1800	Analytic Geometry And Calculus I	5
Total Hours		15

2nd Semester (18)

CHEM 1121	Introductory Chemistry II	5
BIOI 1831	Introductory Biology: From Molecules To Organisms	5
MATH 1900	Analytic Geometry And Calculus II	5

PSYCH 1003	General Psychology ¹	3

Summer Option**Summer Semester**General Education Courses ¹

Total Hours	0
-------------	---

The basis for this 3+4 program is that students are required to do the courses (and the prerequisites) for the Chemistry Bachelor of Arts degree with the exception that students can substitute Optometry's Physical Optics and Photometry course (OPTOM 8140) for the advanced laboratory which is required for the B.A. in chemistry degree; additionally CHEM 3322 (Physical Chemistry II and CHEM 4897 (Seminar) can be completed in the first year of enrollment in the Optometry program though this is NOT recommended because students in the Optometry program take more than 20 credit hours each semester. In order to complete the chemistry program in 3 years, it is likely that some courses would need to be taken over the summer sessions (between semester 2 and 3 and between semester 4 and 5). Three chemistry classes that also are offered over the summer are suggested as options in the above schedule. These are quite compacted classes so it is not generally advised as the best option. If that summer option is chosen for those chemistry classes, however, some of the required General Education courses can be taken during the regular (3rd and 4th) semesters in place of the chemistry classes (CHEM 2612, CHEM 2622, CHEM 2633) that also are scheduled for the 3rd and 4th semester. Alternatively, General Education courses can be taken in the summer.

¹ The College of Optometry requires two courses in English [e.g., Freshman Composition (ENGL 1100), junior English courses (e.g., ENGL 3160, ENGL 3100)] which is also a General Education requirement, two courses in Psychology, two Liberal Arts courses, a Statistics course, and a course in Microbiology with Lab. If Psychological Statistics (PSYCH 2201, 4 credits) is taken as the second Psychology course, that also satisfies the Statistics course requirement. One of the courses suggested in psychology (General Psychology, PSYCH 1003) also satisfies one of the three-course requirement in Social and Behavioral Sciences Knowledge (see not below on General Education courses).

² General Education courses [(1) Communicating Skills (two 3 credit courses), (2) Managing Information Skills (one 3-credit course), (3) Valuing Skill (one 3-credit course), (4) Social and Behavioral Science Knowledge (three 3-credit courses) (5) Humanities and Fine Arts Knowledge (three 3-credit courses), and (6) Mathematics and Life/Natural Sciences Knowledge (four 3-credit courses)] and Foreign Language courses (required for the Chemistry B.A. degree) are not listed specifically here. The requirements for Skill Goal 2 and Knowledge Goal 6 would be fulfilled by completing courses in the program listed above.

³ CHEM 2612, CHEM 2622, and CHEM 2633 are courses offered during the summer; currently, CHEM 2223 is not.

⁴ The College of Optometry strongly recommends a course in Anatomy or Physiology and a course in Biochemistry. BIOL 1102 satisfies the Anatomy or Physiology requirement but this course is not included in the schedule listed above. Another course recommended by the College of Optometry is Cell Biology (BIOL 3622, Cell Biology, 3 credits)- this is not listed above either.

Gaining admission to Missouri's College of Optometry is a competitive process. Students selecting this 3+4 option should seek an initial interview with the Manager, Student and Special Services (and the Pre-Optometry Advisor) in the UMSL College of Optometry to insure that all prerequisites for the College of Optometry will be completed. In August following the completion of their second year of this 3+4 program, students may apply formally to the UMSL College of Optometry and arrange to take the Optometry Admissions Test (OAT) early in the fall of their third year. The OAT is offered through computer sites and may be scheduled almost at any time. After receipt of a completed application in the Fall Semester of the candidate's third year and depending on the OAT outcome, the applicant may be invited for a formal interview in the College of Optometry. Following the formal interview, candidates with a 3.0 or better grade point average in the science prerequisites for optometry and a score of 310 or better in the OAT exam may be accepted into the UMSL College of Optometry.

Competencies/Expectations/Outcomes that all students must demonstrate to complete the program successfully:

1. Knowledge and comprehension in areas of chemistry - Graduates should have a foundation of knowledge in chemistry as outlined by the American Chemical Society Committee on Professional Training in their guide to Undergraduate Professional Education in Chemistry. In order to achieve the goals of any one of our chemistry degrees, knowledge is required from the related areas of introductory physics and calculus.
2. Scientific problem-solving skills - Graduates should understand valid scientific approaches to problem-solving and be able to design experiments to test a hypothesis.
3. Data analysis/quantitative skills - Graduates should be able to draw valid conclusions from experimental data and observations. Graduates should be able to carry out statistical and linear regression analysis of data. Graduates should be able to evaluate the main possible sources of error in laboratory measurements.
4. Laboratory skills - Graduates should be able to carry out the basic techniques of preparative and analytical chemistry. An appreciation of the basic aspects of chemical spectroscopy should be achieved. B.S. degree graduates should have developed an appreciation of the application of advanced/specialized instrumentation to solving chemical problems. Graduates should be able to keep accurate records of experiments. Graduates should be able to work effectively in the laboratory individually or as a part of a small team. Graduates should have an awareness of the basic aspects of safe laboratory practices.
5. Communication skills - Graduates should be able to communicate scientific ideas clearly both orally and in written form. This includes the effective presentation of quantitative data and of scientific concepts or procedures using diagrams and/or figures.
6. Library/Information skills - Graduates should be able to search for and retrieve information from scientific journals, databases, and handbooks, especially those widely used by professional chemists.
7. Computer/software skills - Graduates should be proficient in the use of software widely used by practicing scientists, including word processors, scientific plotting and analysis software, spreadsheets, data acquisition software interfaced to commercial instruments, and simulation software.

Graduate Studies

Admission Requirements

Individuals with at least the equivalent of the B.A. degree in the natural sciences may be admitted to the Graduate School as candidates for the M.S. degree or as precandidates for the Ph.D. degree in chemistry. A student in the M.S. program may request to transfer to the Ph.D. program by petition to the department.

The department admissions committee considers applicants' grade point averages and normally requires above-average performance in all areas of chemistry as well as physics and mathematics, or other evidence of high aptitude for graduate work in chemistry. Applicants' GRE scores, letters of recommendation, and academic programs are also considered. In some cases the committee may require successful completion of undergraduate course work as a condition of enrollment as a regular student.

Students with bachelor's degrees in fields other than chemistry may be admitted to pursue graduate studies in chemistry, but they must make up background deficiencies, usually by taking undergraduate course work.

Financial Support

Teaching assistantships are available to qualified applicants. Research assistantships and fellowships are available for advanced students. Departmental support is not normally available beyond the fifth year in the program. For further information, contact the Department of Chemistry & Biochemistry Graduate Admissions.

Preliminary Advisement

Students who have been admitted for graduate work in chemistry will be contacted by the Director of Graduate Studies in order to develop a tentative plan of study which takes into consideration the student's background and interests. Entering students are required to demonstrate proficiency at the undergraduate level in four areas of chemistry (biochemistry, organic, inorganic, physical, and analytical).

Proficiency may be demonstrated in one of the following ways:

- Outstanding performance in recent undergraduate course work.
- Satisfactory performance in standardized placement examinations. These examinations are given twice a year, approximately one week before the beginning of the fall and winter semesters.
- Successful completion of assigned course work.

The ultimate choice of whether students may enroll in the M.S. or Ph.D. degree programs resides with the chemistry faculty.

Master's Degree Requirements

Master of Science in Chemistry

Within two years of initial enrollment, candidates for the M.S. degree in chemistry must demonstrate proficiency at the undergraduate level in four of the following five areas: biochemistry, organic, inorganic, physical, and analytical chemistry.

A minimum of 30 hours is required, normally including 3 hours in CHEM 6897 Chemistry Colloquium. No more than 3 hours in CHEM 6897 may be applied toward the 30 credit hours.

Distribution Requirement

Students may choose to focus their coursework efforts in one of four broadly defined subdiscipline areas (biochemistry, inorganic, organic, or physical chemistry). At least 6 hours of chemistry coursework in one (or more) sub-disciplines(s) outside of their major emphasis area must be completed. The following courses do not fulfill the distribution requirement:

CHEM 4212	Instrumental Analysis	3
CHEM 4233	Laboratory In Instrumental Analysis	2
CHEM 4302	Survey Of Physical Chemistry With Applications To The Life Sciences	3
CHEM 4343	Physical Chemistry Laboratory II	2
CHEM 4412	Advanced Inorganic Chemistry	3
CHEM 4433	Inorganic Chemistry Laboratory	2
CHEM 4712	Biochemistry	3
CHEM 4733	Biochemistry Laboratory	2

Master of Science in Chemistry with Thesis

Students selecting this option must be enrolled full-time for at least two consecutive semesters. During this time, students are expected to enroll in CHEM 6905, Graduate Research in Chemistry, and conduct their thesis research. A maximum of 12 hours of may be applied toward the required 30 hours. At least 9 hours must be at the 5000 level, excluding CHEM 6905. A maximum of 9 hours in 3000 level or above courses outside the department may be accepted if students receive prior approval of their advisers and the Director of Graduate Studies. Students are expected to follow all other general requirements of the Graduate School regarding master's degree and thesis requirements.

Master of Science without Thesis

Unlike the thesis option, students need not be enrolled full-time. Of the required 30 hours, 15 credits must be at the 5000 level. A maximum of 6 credits of CHEM 6905, Graduate Research in Chemistry, may be included in place of 4000 level courses; a maximum of 12 hours taken in 3000 level or above courses outside the department may be accepted with prior approval of the Director of Graduate Studies.

Master of Science Degrees for Doctoral Students

Doctoral students may receive a Master's degree in their program for work completed towards the doctoral degree. To receive a Master's degree, doctoral students must complete 30 credit hours of courses, with at least 15 of these credit hours in courses numbered at or above the 5000 level. No more than 3 hours in CHEM 6897, 3 hours from a combination of CHEM 6487, CHEM 6687, CHEM 6787, CHEM 6812, CHEM 6822 and CHEM 6832, and 6 hours of CHEM 6905 may be applied.

There are no distribution requirements for the Master's degree for Doctoral students.

The non-dissertation courses presented for the M.S. degree may not include any of the following courses:

CHEM 4212	Instrumental Analysis	3
CHEM 4233	Laboratory In Instrumental Analysis	2
CHEM 4302	Survey Of Physical Chemistry With Applications To The Life Sciences	3
CHEM 4343	Physical Chemistry Laboratory II	2

CHEM 4412	Advanced Inorganic Chemistry	3
CHEM 4433	Inorganic Chemistry Laboratory	2
CHEM 4712	Biochemistry	3
CHEM 4733	Biochemistry Laboratory	2
CHEM 6196	Advanced Reading In Chemistry	1

Master of Science in Chemistry (Professional Science Emphasis)

This option requires a minimum of 32 hours, of which 16 credit hours must be at or above the 5000 level. Students must take 21 credit hours of chemistry, 9 hours in business, and 2 credits hours of internship or practicum. A maximum of 3 credits of CHEM 6897 may be applied toward the required minimum of number of chemistry credits (21 hours).

The courses presented for the Master's degree (professional science emphasis) may not include any of the following:

CHEM 4212	Instrumental Analysis	2
CHEM 4233	Laboratory In Instrumental Analysis	2
CHEM 4302	Survey Of Physical Chemistry With Applications To The Life Scienc	3
CHEM 4343	Physical Chemistry Laboratory II	2
CHEM 4412	Advanced Inorganic Chemistry	3
CHEM 4433	Inorganic Chemistry Laboratory	2
CHEM 4712	Biochemistry	3
CHEM 4733	Biochemistry Laboratory	2
CHEM 6196	Advanced Reading In Chemistry	1
CHEM 6487	Problem Seminar In Inorganic Chemistry	1
CHEM 6687	Problem Seminar In Organic Chemistry	1-3
CHEM 6787	Problem Seminar In Biochemistry	1
CHEM 6812	Introduction To Graduate Study In Chemistry	1
CHEM 6822	Introduction To Graduate Research In Chemistry	1
CHEM 6905	Graduate Research In Chemistry	1-10

Emphasis Area Requirements

Elective Courses in Business (9 credit hours required)

MGMT 3623	Industrial And Organizational Psychology	3
BUS AD 5000	Economics For Managers	3
BUS AD 5100	Managerial Communication	3
MGMT 5600	Managing People in Organizations	3
MKTG 5700	Contemporary Marketing Concepts	3
BUS AD 5900	Law, Ethics And Business	3

Required Internship or Practicum (2 credit hours required)

CHEM 5798 or CHEM 5799	Practicum in Science in Business Internship in Science in Business	2
---------------------------	---	---

There are no distribution requirements for the Masters in Chemistry (Professional Science Emphasis).

Doctoral Degree Requirements

Within one year of initial enrollment, incoming doctoral students must demonstrate proficiency in four of the following five areas: biochemistry, organic, inorganic, physical, and analytical chemistry. A minimum of 60 credit hours is required, including research hours.

Comprehensive Exam Committee

Before the end of the second regular semester of study, the doctoral student and his/her research advisor will select a comprehensive exam committee. The student should prepare Graduate School form D-1, which should be signed by the research advisor and the Director of Graduate Studies, and filed with the graduate school.

In the Department of Chemistry & Biochemistry, the comprehensive exam committee also serves as a mentoring committee for the student. The committee will meet with the student at the end of each spring semester to review progress in coursework and research. A written report summarizing their assessment and recommendations will be provided to the student and the Director of Graduate Studies.

Comprehensive Examinations

Each student seeking the Ph.D. degree must successfully complete a comprehensive examination prior to advancement to candidacy. The comprehensive exam is typically taken when formal coursework has been completed, but it must be completed before the start of the fifth regular semester.

The comprehensive exam consists of writing an original research proposal and an oral defense that will be evaluated by the student's committee. The student will select a topic that is not directly related to the expected research area. The research advisor must approve the topic. The specific format for the proposal is described in the Department of Chemistry & Biochemistry Handbook of Graduate Studies.

Dissertation Proposal

Doctoral students must prepare and defend a Dissertation Proposal before the student has completed the equivalent of 6 regular semesters of full-time study. The proposal should be defended within six months following successful completion of the Comprehensive Examination.

The Dissertation Proposal includes both a written and oral component. Both components will be evaluated by the student's Comprehensive Examination committee. The written proposal will be submitted to the Comprehensive Examination committee and will be presented as a seminar to the Department. After the seminar, the student will defend the proposal before the Comprehensive Examination committee.

Advancement to Candidacy

In addition to general Graduate School requirements for advancement to candidacy, students must complete the following:

1. 18 hours of non-dissertation work.

This may not include:

CHEM 4212	Instrumental Analysis	2
CHEM 4233	Laboratory In Instrumental Analysis	2
CHEM 4302	Survey Of Physical Chemistry With Applications To The Life Scienc	3
CHEM 4343	Physical Chemistry Laboratory II	2

CHEM 4412	Advanced Inorganic Chemistry	3
CHEM 4433	Inorganic Chemistry Laboratory	2
CHEM 4712	Biochemistry	3
CHEM 4733	Biochemistry Laboratory	2
CHEM 6196	Advanced Reading In Chemistry	1
CHEM 6487	Problem Seminar In Inorganic Chemistry	1
CHEM 6687	Problem Seminar In Organic Chemistry	1-3
CHEM 6787	Problem Seminar In Biochemistry	1
CHEM 6812	Introduction To Graduate Study In Chemistry	1
CHEM 6822	Introduction To Graduate Research In Chemistry	1
CHEM 6897	Chemistry Colloquium	1

At least 9 of the 18 credits of non-dissertation coursework must be at the 5000 level. Courses in areas other than chemistry may be included with prior departmental approval.

2. Successfully pass a Comprehensive Examination.
3. Successfully present and defend a dissertation proposal.
4. Submit the proposal for approval to the Graduate School.
5. Be in good standing.

Seminar Requirement

Students must enroll in CHEM 6897, Chemistry Colloquium, each semester they are in residence. In their final semester in the program, each student will present an "exit seminar" to the Department describing the results of their dissertation research.

Dissertation

One copy of the dissertation must be submitted upon completion of the graduate research problem.

Probation and Dismissal

Students are dismissed from the Ph.D. program if they fail to pass their Comprehensive Examination or otherwise fail to meet the academic and professional standards set forth by the Graduate School and the Department of Chemistry and Biochemistry.

Master of Science in Biochemistry and Biotechnology

The Department of Chemistry and Biochemistry, in cooperation with the Department of Biology, offers a Master of Science degree in Biochemistry and Biotechnology (p. 66). Information about this degree program may be found at the Biochemistry & Biotechnology Programs Home Page. (<http://www.umsl.edu/~biotech>)

Courses

CHEM 1011 Chemistry in the Environment: 3 semester hours

This course examines the role of chemistry in the environment and the application of chemistry to our understanding of society. The focus of the course will be the relationship between chemistry and the world around us including topics such as the chemistry of air, global climate change, water and energy. The course is designed for non-science, non-engineering and non-allied health majors and can be used to fulfill a general education requirement for undergraduate degrees. The course consists of two hours of lecture per week and, on alternate weeks, one hour of discussion or two hours of laboratory.

CHEM 1021 Beer Brewing: Chemical and Biochemical Principles: 3 semester hours

This course examines the process of beer brewing as it relates to general topics of chemistry, biochemistry and biology. Each aspect of the brewing process will be examined in detail and the underlying scientific principles identified and discussed. The course is designed for non-science, non-engineering and non-allied health majors and can be used to fulfill a general education requirement for undergraduate degrees. The course consists of two hours of lecture and three hours of lab per week.

CHEM 1022 Principles of Fermentation Science: 3 semester hours

Prerequisites: CHEM 1021 or a 3 credit-hour 1000 level science course or consent of instructor. This course is designed primarily for students that want to gain insight into the fermentation process from the initial ingredients to the final product. Students will be engaged in analysis of ingredients, impact on the process and evaluation of various styles of beer. Laboratory evaluation will include analysis of water, hops, carbohydrates, alcohol content and sensory science. The course consists of two hours of lecture and three hours of lab per week.

CHEM 1052 Chemistry for the Health Professions (MOTR CHEM 100): 4 semester hours

An introduction to general, nuclear, structural organic, organic reactions and biochemistry. This course is designed primarily for students in nursing and related health professions, and should not be taken by students majoring in the physical or biological sciences. Chemistry majors may include neither CHEM 1052 or CHEM 1062 in the 120 hours required for graduation. Four hours of lecture per week.

CHEM 1062 Organic & Biochem for The Health Professions: 2 semester hours

Prerequisites: Any college Chemistry course. An introduction to organic reactions and biochemistry. CHEM 1062 is offered during the second half of the semester. Four hours of lecture per week.

CHEM 1081 Introductory Chemistry I-A (MOTR CHEM 100): 3 semester hours

Prerequisites: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Math Placement Test). This course is designed for students who want to have an in depth understanding of introductory concepts in Chemistry. CHEM 1081 covers the topics taught in the first half of CHEM 1111 but at a slower pace, thus allowing students time to fully integrate the concepts and thereby build a stronger foundation for their subsequent Chemistry courses. CHEM 1081 consists of the first half of CHEM 1111 (excluding laboratory experiments), whereas CHEM 1091 covers all the laboratory experiments and second half of lecture part of CHEM 1111. Three hours of lecture or workshop per week.

CHEM 1091 Introductory Chemistry I-B (MOTR CHEM 150L): 3 semester hours

Prerequisites: CHEM 1081. CHEM 1091 is the completion of CHEM 1111 for students who have completed CHEM 1081. The laboratory portion of this course will start at the beginning of the semester. The lecture part of the course starts in mid-semester and students join an ongoing CHEM 1111 class. Students who completed CHEM 1081 must complete CHEM 1091 to be considered as having completed the equivalent of CHEM 1111. Three hours of lecture and one and one half hours of workshop during the second half of the semester, and three hours of laboratory per week during the entire semester.

CHEM 1111 Introductory Chemistry I (MOTR CHEM 150L): 5 semester hours

Prerequisite: MATH 1030 (or a score of 26 or higher on either the Math ACT or the Missouri Math Placement Test) and MATH 1035 (MATH 1035 may be taken concurrently). Presents an introduction to the fundamental laws and theories of chemistry. Laboratory experiments are designed to demonstrate some aspects of qualitative and quantitative analysis and to develop skills in laboratory procedures. Chemistry majors may not include both CHEM 1011 and CHEM 1111 in the 120 hours required for graduation. Three hours of lecture, one and one-half hours of workshop, and three hours of laboratory per week.

CHEM 1111A CHEM 1111A-Introductory Chemistry 1 - Modular Format: 1 semester hour

Prerequisites: MATH 1030 (or a score equivalent to completion of MATH 1030 on the UMSL mathematics placement assessment). These courses (1111A-1111L) are identical in content to CHEM 1111 but are offered in a modular format. Each credit hour deals with the lecture or laboratory material covered in CHEM 1111. Completion of all five modules with a grade in each of C- or above is equivalent to completion of CHEM 1111. CHEM 1111A covers the first quarter of lecture material covered in CHEM 1111.

CHEM 1111B CHEM 1111B-Introductory Chemistry 1 - Modular Format: 1 semester hour

Prerequisites: CHEM 1111A. Concurrent registration with CHEM 1111A is permitted. CHEM 1111B covers the second quarter of lecture material covered in CHEM 1111.

CHEM 1111C CHEM 1111C-Introductory Chemistry 1 - Modular Format: 1 semester hour

Prerequisites: CHEM 1111B. Concurrent registration with CHEM 1111B is permitted. CHEM 1111C covers the third quarter of lecture material covered in CHEM 1111.

CHEM 1111D CHEM 1111D-Introductory Chemistry 1 - Modular Format: 1 semester hour

Prerequisites: CHEM 1111C. Concurrent registration with CHEM 1111C is permitted. CHEM 1111D covers the final quarter of lecture material covered in CHEM 1111.

CHEM 1111L CHEM 1111L-Introductory Chemistry 1 - Modular Format: 1 semester hour

Prerequisites: CHEM 1111D. Concurrent registration with CHEM 1111D is permitted. CHEM 1111L covers laboratory portion of CHEM 1111.

CHEM 1121 Introductory Chemistry II: 5 semester hours

Prerequisite: CHEM 1111 or advanced placement. Lecture and laboratory are a continuation of CHEM 1111. Three hours of lecture, one and one-half hours of workshop and three hours laboratory per week.

CHEM 1134 Special Topics in Introductory Chemistry: 1-5 semester hours

Prerequisite: Consent of instructor. A lecture and/or laboratory course to assist transfer students to complete the equivalent of CHEM 1111 and CHEM 1121. Students enrolling in this course should contact the instructor prior to the first day of class for guidelines on course requirements, to choose a lab or workshop section, and to request enrollment in the course website.

CHEM 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour

Same as BIOL 2010, PHYSICS 2010, MATH 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

CHEM 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour

Same as BIOL 2011, PHYSICS 2011, MATH 2011, and SEC ED 2011. Prerequisites: BIOL 2010, CHEM 2010, PHYSICS 2010, MATH 2010, or SEC ED 2010. Students explore teaching careers, become familiar with STEM school setting through observing and discussing the school environment and by developing and teaching inquiry-based lessons.

CHEM 2223 Quantitative Analysis: 3 semester hours

Prerequisites: CHEM 1121. Principles and practice of elementary quantitative chemistry. The lecture treats descriptive statistics with emphasis on small samples; various types of competing equilibria pertaining to acid-base, complexometric, and potentiometric titrations; and an introduction to spectrophotometric processes. The laboratory provides exercises in titrimetric gravimetric, and spectrophotometric techniques. Both portions of the course deal with the analytical chemistry of environmentally-significant problems. Two hours of lecture and four and one-half hours of laboratory weekly.

CHEM 2612 Organic Chemistry I: 3 semester hours

Prerequisite: CHEM 1121 (may be taken concurrently). An introduction to the structure, properties, synthesis, and reactions of aliphatic and aromatic carbon compounds. Three hours of lecture per week.

CHEM 2622 Organic Chemistry II: 3 semester hours

Prerequisite: CHEM 2612. A systematic study of organic reactions and their mechanisms; organic synthetic methods. Three hours of lecture per week.

CHEM 2633 Organic Chemistry Laboratory: 2 semester hours

Prerequisite: CHEM 2612. An introduction to laboratory techniques and procedures of synthetic organic chemistry including analysis of organic compounds. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 3022 Introduction to Chemical Literature: 1 semester hour

Prerequisites: CHEM 2622 (CHEM 2622 may be taken concurrently). This course will familiarize the student with the literature of chemistry and its use. One hour of lecture per week.

CHEM 3302 Physical Chemistry for The Life Sciences: 3 semester hours

Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. Principles and applications of physical chemistry appropriate to students pursuing degree programs in the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course is intended for undergraduates seeking the B.S. degree in Biochemistry and Biotechnology and does not fulfill the physical chemistry required for other Chemistry B.A. and B.S. degree programs.

CHEM 3312 Physical Chemistry I: 3 semester hours

Prerequisites: CHEM 1121 and MATH 2000 (MATH 2000 may be taken concurrently), and PHYSICS 2111. Principles of physical chemistry, including thermodynamics, theory of gases, phase equilibria, kinetics, crystal structure, spectroscopy, and quantum mechanics. Three hours per week.

CHEM 3322 Physical Chemistry II: 3 semester hours

Prerequisite: CHEM 3312 and MATH 2000. Continuation of CHEM 3312. Three hours lecture per week.

CHEM 3333 Physical Chemistry Laboratory I: 2 semester hours

Prerequisites: CHEM 2223 and CHEM 3312. Experiments designed to illustrate principles introduced in CHEM 3312. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 3412 Basic Inorganic Chemistry: 2 semester hours

Prerequisite: CHEM 1121. This course reviews the principles of atomic structure and studies covalent and ionic bonding. Topics include properties of the elements and synthesis, reactions and bonding aspects of important main group and transition metal compounds. Two hours lecture per week.

CHEM 3643 Advanced Organic Chemistry Laboratory: 2 semester hours

Prerequisites: CHEM 3022. Identification of organic compounds by classical and spectroscopic methods; advanced techniques in synthesis and separation of organic compounds. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

CHEM 3905 Chemical Research: 1-10 semester hours

Prerequisite: Consent of instructor. Independent laboratory and library study, in conjunction with faculty member, of fundamental problems in chemistry. A written report describing the research is required.

CHEM 4212 Instrumental Analysis: 3 semester hours

Prerequisites: CHEM 3322. This course studies principles and applications of modern methods of instrumental analysis for analytical chemistry measurements. Topics will be selected from the areas of electrochemistry, absorption and emission spectroscopy, chromatography, mass spectrometry, surface analysis, and nuclear magnetic resonance.

CHEM 4233 Laboratory in Instrumental Analysis: 2 semester hours

Prerequisites: CHEM 4212, CHEM 3333. Experiments designed to illustrate the principles and practices of instrumental analysis, involving the use of modern instrumentation in analytical chemistry applications. One hour of discussion and four and one-half hours of laboratory per week.

CHEM 4302 Survey of Physical Chemistry with Applications to the Life Sciences: 3 semester hours

Prerequisites: CHEM 2612 and MATH 1800 or MATH 1100, and PHYSICS 1012. This course covers the principles of physical chemistry with applications to the life sciences. Topics will include thermodynamics, equilibria, kinetics, and spectroscopy. This course will be taught simultaneously with CHEM 3302, but students in CHEM 4302 will have additional assignments or projects. No student may receive credit for both CHEM 3302 and CHEM 4302. No student may receive credit for both 4302 and 5302.

CHEM 4343 Physical Chemistry Laboratory II: 2 semester hours

Prerequisites: CHEM 3322 (may be taken concurrently) and CHEM 3333. Experiments designed to illustrate principles introduced in CHEM 3322. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

CHEM 4412 Advanced Inorganic Chemistry: 3 semester hours

Prerequisites: CHEM 3322 (may be taken concurrently), CHEM 3412, and CHEM 2622. This course introduces the chemistry of the elements, including atomic and molecular structure, acids and bases, the chemistry of the solid state, and main group and transition metal chemistry. Three hours of lecture per week. Students may not receive credit for both CHEM 4412 and CHEM 5412.

CHEM 4433 Inorganic Chemistry Laboratory: 2 semester hours

Prerequisites: CHEM 3333, CHEM 3643, and CHEM 4412 (CHEM 3643 may be taken concurrently). The more sophisticated techniques of physical and analytical chemistry will be used to study inorganic compounds and their reactions. One hour of lecture and four and one-half hours of laboratory per week. Not for graduate credit.

CHEM 4712 Biochemistry: 3 semester hours

Same as BIOL 4712. Prerequisites: CHEM 2612 and either BIOL 1831 or CHEM 2622. Examines the chemistry and function of cell constituents, and the interaction and conversions of intracellular substances. Students may not receive credit for both BIOL 4712 and CHEM 4712.

CHEM 4722 Advanced Biochemistry: 3 semester hours

Prerequisite: CHEM 4712. This course covers selected advanced topics in the chemistry of life processes. Students may not receive credit for both CHEM 4722 and CHEM 5722.

CHEM 4733 Biochemistry Laboratory: 2 semester hours

Prerequisites: CHEM 4712 (may be taken concurrently), and CHEM 2223. Laboratory study of biochemical processes in cellular and subcellular systems with emphasis on the isolation and purification of proteins (enzymes) and the characterization of catalytic properties. One hour of lecture and four and one-half hours of laboratory per week.

CHEM 4772 Physical Biochemistry: 3 semester hours

Prerequisites: CHEM 3312 or CHEM 4712 or BIOL 4712. This course is designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, and biological spectroscopy. Students may not receive credit for both CHEM 4772 and CHEM 5772.

CHEM 4774 Introduction to Bioinformatics: 3 semester hours

Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, molecular modeling and simulation, and computational genomics. Students may not receive credit for both CHEM 4774 and CHEM 5774.

CHEM 4797 Biochemistry and Biotechnology Seminar: 1 semester hour

Same as CHEM 4797. Prerequisites: Senior standing in the Biochemistry and Biotechnology program and consent of faculty advisor. This course will focus on selected publications related to biochemistry and biotechnology from both refereed journals and news sources. Students are expected to participate in discussions and to prepare oral and written presentations. Completion of the Major Field Achievement Test in Biochemistry & Biotechnology is a course requirement. May not be taken for graduate credit.

CHEM 4814 Special Topics in Chemistry: 1-10 semester hours

A reading and seminar course in selected advanced topics.

CHEM 4897 Seminar: 2 semester hours

Prerequisites: CHEM 3022 and senior standing. This course will provide students with the opportunity to listen to talks presented by students, faculty, and invited speakers. Students must complete a comprehensive examination before the end of the course. Chemistry majors should enroll during the semester in which they intend to graduate. One hour seminar and one hour discussion per week.

CHEM 5302 Foundations of Physical Chemistry: 3 semester hours

Prerequisites: Consent of Instructor. A survey of fundamental and advanced topics in physical chemistry including thermodynamics, kinetics, quantum chemistry, and spectroscopy. Three hours of lecture per week. Additional independent study work is required. Students may not receive credit for both CHEM 4302 and CHEM 5302.

CHEM 5394 Special Topics in Physical Chemistry: 1-3 semester hours

Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5396 Directed Readings in Physical Chemistry: 1-3 semester hours

Prerequisites: Consent of Physical Chemistry Faculty. A series of readings of monographs, review papers, and/or research publications for a particular student directed at providing that student with appropriate background preparation for experimental or theoretical Ph.D.-level research in an area of physical chemistry. The particular readings will be selected by the physical chemistry staff. Potential topics include but are not limited to advances in Electrochemistry, Surface Chemistry, Thermodynamics, Molecular Spectroscopy, Quantitative Absorption Spectroscopy using new Methodologies, Applications of Group Theory in Spectroscopy, and Computational Chemistry. Assessment may be in various forms including by assignments and seminars. Students may take this course more than once for credit through the particular topic must be different in each case.

CHEM 5412 Advanced Graduate Inorganic Chemistry: 3 semester hours

Prerequisites: Graduate standing and consent of instructor. An introduction to the chemistry of the elements, including atomic and molecular structure, acids and bases, the chemistry of the solid state, and main group and transition metal chemistry. Additional independent study work is required. Three hours of lecture per week. Students may not receive credit for both CHEM 4412 and CHEM 5412.

CHEM 5422 Coordination Chemistry: 3 semester hours

Prerequisite: CHEM 4412 or an equivalent course. Chemistry of the coordination compounds of the transition metals including such topics as kinetics and mechanisms of reaction, stereochemistry, ligand field theory, stability and electronic spectra. Three hours of lecture per week.

CHEM 5462 Organometallic Chemistry of the Transition Elements: 3 semester hours

Prerequisites: CHEM 4412 or an equivalent course. A study of transition metal compounds containing metal-carbon bonds and related metal-element bonds, including their synthesis, structure and bonding, and reactions. Applications in organic synthesis and catalysis will also be presented. Three hours of lecture per week.

CHEM 5494 Special Topics in Inorganic Chemistry: 1-3 semester hours

Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5602 Advanced Organic Chemistry I - Physical Organic: 3 semester hours

Prerequisites: CHEM 2622 and CHEM 3322. Mechanism and theory of organic chemistry. Topics to include kinetics, transition state theory, reaction intermediates, and stereochemical analysis. Three hours of lecture per week.

CHEM 5612 Advanced Organic Chemistry II - Reactions And Synthesis: 3 semester hours

Prerequisite: CHEM 2622. This course will examine a variety of organic transformations typically utilized in organic synthesis. Topics will include carbon-carbon bond formation, pericyclic reactions, oxidation, reduction, and functional group interconversions. Mechanism and stereochemistry will be emphasized. Three hours of lecture per week.

CHEM 5652 Spectroscopic Identification of Organic Compounds: 3 semester hours

Prerequisites: Graduate standing or CHEM 3643. An applied approach to the use of spectroscopic techniques in organic chemistry. Topics to include integrated applications of infrared and Raman spectroscopy, ^{13}C and ^1H nuclear magnetic resonance spectroscopy and mass spectroscopy for the purpose of elucidating the structure and dynamics of organic compounds. Three hours of lecture per week.

CHEM 5694 Special Topics in Organic Chemistry: 1-3 semester hours

Prerequisite: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5722 Advanced Graduate Biochemistry: 3 semester hours

Prerequisites: CHEM 4712 or BIOL 4712. Selected advanced topics in the chemistry of life processes. Three hours of lecture per week. Students may not receive credit for both CHEM 4722 and CHEM 5722.

CHEM 5772 Advanced Physical Biochemistry: 3 semester hours

Prerequisites: CHEM 3312 or CHEM 4712 or BIOL 4712. Designed to acquaint students with concepts and methods in biophysical chemistry. Topics that will be discussed include protein and DNA structures, forces involved in protein folding and conformational stability, protein-DNA interactions, methods for characterization and separation of macromolecules, and biological spectroscopy. Three hours of lecture per week. Students may not receive credit for both CHEM 4772 and CHEM 5772.

CHEM 5774 Bioinformatics: 3 semester hours

Prerequisites: CHEM 4712 or equivalent. This course introduces modern approaches in bioinformatics and computational biochemistry. Topics to be covered include a survey of biological databases, predictions from protein and DNA sequences, sequence alignment and sequence database searches, building phylogenetic trees, three-dimensional protein structure prediction, molecular modeling and simulation, and computational genomics. Additional independent study work is required. Students may not receive credit for both CHEM 4774 and CHEM 5774.

CHEM 5794 Special Topics in Biochemistry: 1-3 semester hours

Prerequisites: Consent of instructor. The topic for this course may change from semester to semester, and more than one course or topic can be offered in a given semester. The course may be taken more than once for credit provided that the topic is different in each case. The course can have more than one instructor.

CHEM 5798 Practicum in Science in Business: 1-2 semester hours

Same As BIOL 5798. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis in Chemistry, Biochemistry & Biotechnology, or Biology. Students will integrate and apply their scientific expertise to a practical, business-related problem. The course will emphasize interdisciplinary team-work as well as both written and oral communication skills.

CHEM 5799 Internship in Science in Business: 1-2 semester hours

Same As BIOL 5799. Prerequisites: Graduate standing and enrollment in a Professional Science emphasis area in Chemistry, Biochemistry & Biotechnology, or Biology. The internship will consist of period of on-the-job training at a local company. Credit hours will be determined by the number of hours the student works each week and in consultation between the intern's supervisor and the course instructor. Internship assignments will be commensurate with the education and experience of the student, with an emphasis on work at the interface between the scientific and business components of the company. A written report describing the internship project is required.

CHEM 6487 Problem Seminar in Inorganic Chemistry: 1 semester hour

Prerequisite: Consent of the inorganic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

CHEM 6687 Problem Seminar in Organic Chemistry: 1-3 semester hours

Prerequisite: Consent of the organic chemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. Students may take more than once for credit. Up to three credits may be applied to the M.S. degree programs.

CHEM 6787 Problem Seminar in Biochemistry: 1 semester hour

Prerequisite: Consent of the biochemistry staff. Problems from the current literature, presentations and discussions by faculty, students and visiting scientists. Ph.D. students may take more than once for credit. Up to three credits may be applied to the M.S. degree program.

CHEM 6812 Introduction to Graduate Study in Chemistry: 1 semester hour

Prerequisite: Consent of Graduate Advisor. Topics to be covered include: techniques of teaching of chemistry in colleges and universities, methods of instruction and evaluation; role and responsibilities of the Graduate Teaching Assistant in laboratory instruction; safety in the undergraduate laboratory, safety practices, emergency procedures; selection of a research project and thesis advisor.

CHEM 6822 Introduction to Graduate Research in Chemistry: 1 semester hour

Prerequisite: Consent of instructor. Topics to include: safety in the research laboratory, safety practices, emergency procedures, hazardous materials, waste disposal, radiation safety; research ethics, chemistry information retrieval, computer assisted information retrieval, types of databases, searching bibliographic data bases.

CHEM 6832 Strategies for Independent Research Proposal Development: 1 semester hour

Prerequisites: CHEM 6822 and Consent of Graduate Advisor. Topics include: strategies for identification of research topics in chemistry and biochemistry, techniques for database literature search, critical analysis of existing research knowledge, introduction to standard grant proposal formats, technical aspects in preparation of a research plan and accompanying sections, use of bibliographical software, and overview and practice of the peer review process.

CHEM 6887 Graduate Student Seminar in Chemistry: 1 semester hour

Prerequisites: Graduate standing. Scientific presentations by students. One hour per week.

CHEM 6897 Chemistry Colloquium: 1 semester hour

Presentation of papers by students, faculty and invited speakers. One hour per week.

CHEM 6905 Graduate Research In Chemistry: 1-10 semester hours

.

Communication and Media

General Information

The Department of Communication and Media reflects an area of study informed by art and science. Under the rubric of Communication, students explore the construction, delivery, and perception of purposeful messages and their consequences. Whether the intent is to inform, influence, or entertain, students use research and theory to improve effectiveness and achieve outcomes in interpersonal and mass-mediated messaging. In addition, students will find a creative outlet in Media, which focuses on the production of content and its critical and cultural significance. It encompasses the aesthetics of audio and visual media in all its forms. Students learn contemporary and historical concepts in a global context. Importantly, students can hone practical skills ranging from conceptual development to camerawork and post-production editing.

Whether students want to work on a public health campaign to reduce risky behaviors or a documentary designed to educate, Communication and Media offers excellent preparation for rapidly changing world.

The Bachelor of Arts in Communication

The B.A. in Communication is a flexible degree program that allows the student to tailor their curriculum to meet specific interests and needs while simultaneously providing a strong foundation in the major specializations of the discipline. The department encourages all students to meet early and often with their faculty advisers to select a meaningful group of courses for a coherent, career-oriented academic program.

Students who seek this degree will, upon completion, understand how to communicate competently and effectively in a variety of contexts and mediums. In addition, students will develop a strong foundation in the theory and research underlying effective communication. Finally, students will demonstrate their competence through the internship and practicum requirements.

The Bachelor of Science in Media Studies

Media Studies is a discipline that examines, in a critical fashion, a vast range of media technologies as well as the necessary skills to produce media messages in a variety of platforms and genres. This will be accomplished through courses which focus on the role of media technologies and their historical, cultural, social, international, legal, ethical, or economic implications. There is a balance between theory and practice. Media Studies majors have an opportunity to gain professional experience through course work and internships. The aim of the degree is to prepare students for a wide variety of media careers in fields such as radio, television, film, broadcasting, multimedia, advertising, or further studies at the graduate level. Media Studies seeks to prepare students to be thoughtful contributors in an increasingly mediated world.

Minors in Communication and Media Studies

The Department of Communication and Media offers two minors: A Minor in Communication and a Minor in Media Studies. Both minors provide a solid foundation of knowledge and skills that can supplement other programs of study and make students more competitive in almost any industry. Students who complete the Minor in Communication are able to understand and apply theories of effective communication in interpersonal, organizational, and mass communication contexts, while those who complete the Minor in Media Studies develop a critical understanding of content designed for distribution and consumption in a variety of media platforms and channels. For a list of requirements for the Minor in Communication and the Minor in Media Studies, please review the Undergraduate Studies section).

Certificate in Advertising

The Certificate in Advertising provides students with a grounded approach to the theory and practice of professional advertising. Using classic and modern techniques, students explore and implement strategies designed to influence and persuade target audiences. With an emphasis on media-rich environments, students will develop a repertoire of skills needed to be successful in the industry.

Certificate in Health Communication

The Certificate in Health Communication will assist students looking to specialize in a growing field, learn valuable skills for the job market, and get hands-on experience in health organizations that will translate into jobs.

Certificate in Media Production

The Certificate in Media Production provides a sequence of courses designed to develop multi-channel and multimedia skillsets that can be used by students to record, edit, and produce media for artistic, personal, or commercial applications. Students will develop a portfolio of work that will reflect both independent and client-centered content. Students who complete the Certificate in Media Production will develop the knowledge and skills needed to be competitive in a rapidly changing media environment.

Certificate in Public Relations

The Department of Communication and Media offers a sequence of courses that can prepare students for a successful career in public relations. This writing-intensive certificate program includes a selection of required and elective courses that integrate practical knowledge of the PR industry with the communication theory and research that undergird it. The certificate will be valuable both to those already in the workplace, and to undergraduates pursuing a public relations career.

Other Certificate Programs

In addition to these offerings, the department supports a number of other interdisciplinary certificate programs. For more information, see Certificate Programs and Interdisciplinary Studies (p. 171).

Master of Arts in Communication

The Master of Arts degree program provides the opportunity for an advanced degree program in Communication with a strong theory and research emphasis. Students can select courses that emphasize broad categories of communication such as organizational communication and/or mass communication. The program will help students develop a strong background in communication theory and research which would allow for the pursuit of a doctorate in Communication, opportunities for professional positions, and the potential for a vertical or lateral move within an organization. Students who complete the M.A. in Communication will have a detailed understanding of the academic discipline. They will have developed critical skills for evaluating communication-related theories and research, and the ability to apply that knowledge in their own research or professional settings.

Undergraduate Studies

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 41). The college's foreign language requirement may be taken in any language. Communication courses may not be taken on a satisfactory/unsatisfactory basis.

Degree Requirements

Bachelor of Arts in Communication

Students majoring in Communication must complete a minimum of 36 semester hours in Communication courses. At least 18 of these must be taken at UMSL. Furthermore, at least 12 semester hours of the Communication courses completed must be numbered 3000-4999. All students must complete the required courses and earn a C or better in all courses applied to the degree.

Required courses for the major

COMM 1030	Interpersonal Communication I	3
COMM 1050	Introduction to Mass Communication	3
COMM 2231	Communication in the Organization	3
COMM 3330	Research Methods in Communication I	3
COMM 3332	Intercultural Communication	3
COMM 4920	Practicum in Applied Communication	3

or COMM 4950	Internship in Applied Communication	
Total Hours		18

Students may apply up to three of the approved media studies courses listed below toward the major as Communication electives.

MEDIA ST 1100	Introduction to Advertising	3
MEDIA ST 1110	Introduction to Broadcasting and Digital Media	3
MEDIA ST 2080	Advertising Copywriting	3
MEDIA ST 2180	Introduction to News Writing	3
MEDIA ST 2235	Media Theory	3
MEDIA ST 3025	Current Issues in Strategic Communication	3
MEDIA ST 3317	Audio Media Industries	3
MEDIA ST 3350	Mass Media History	3
MEDIA ST 3355	Media Law and Regulation	3

Bachelor of Science in Media Studies

General Education Requirements

All Media Studies majors must satisfy the University and the College of Arts and Sciences' 42-hour General Education core requirements, which include ENGL 1100 and the Math proficiency requirement.

A Junior-level writing class is required.

The Cultural Diversity requirements may be satisfied by General Education courses or other lower- or upper level courses in various departments.

State Government/History graduation requirements may be satisfied by General Education courses or by other lower-or-upper level courses in various departments.

There is no foreign language requirement, but foreign language proficiency is recommended.

Degree Requirements

Media Studies majors must complete 36 hours as part of the degree. At least 24 hours must be taken at UMSL. A core of 21 hours is required.

Required Core Courses for all media studies majors:

Required Core Courses for all media studies majors:

COMM 1050	Introduction To Mass Communication	3
-----------	------------------------------------	---

MEDIA ST 2235	Media Theory	3
---------------	--------------	---

Select at least two of the following introductory courses: 6

COMM 1150	Introduction To Public Relations	
MEDIA ST 1070	Introduction To Cinema	
MEDIA ST 1100	Introduction To Advertising	
MEDIA ST 1110	Introduction To Broadcasting and Digital Media	

Select at least two of the following applied writing courses: 6

COMM 3358	Communication In Public Relations	
MEDIA ST 2180	Introduction to News Writing	
MEDIA ST 2080	Advertising Copywriting	
MEDIA ST 2212	Broadcast Writing And Reporting	

Capstone 3

MEDIA ST 1198	Practicum In Media Studies	
or MEDIA ST 3398	Internship In Media Studies	
or MEDIA ST 4400	Senior Project	
Total Hours		21

Students must also complete 15 credit hours of electives. Of these, at least six credit hours must be 2000 or higher and another six must be 3000 and higher. Practicum and Internship courses may be repeated for credit and a combined total of six credit hours in Practicum/Internship can be applied to the major. A limit of 20 hours of Practicum/Internship courses will be accepted towards the 120 hour degree. Students may apply up to three of the approved communication courses listed below toward the major as media studies electives.

COMM 3150	Crisis, Disaster, and Risk Communication	3
COMM 3330	Research Methods In Communication I	3
COMM 3352	Mass Media in Society	3
COMM 3355	Dangerous Messages	3
COMM 3360	Media & Health Communication	3
COMM 3370	Social Media in Public Relations	3
COMM 4100	Communication Campaigns	3
COMM 4199	Applied Strategic Communication	3

Minor in Communication

Coursework for a minor in Communication consists of 15 semester hours of the core requirements for the major. Credit hours in and/or COMM 3395 may be substituted for credit hours listed below with written consent of the communication department chairperson.

Core Requirements:

COMM 1030	Interpersonal Communication I	3
COMM 1050	Introduction To Mass Communication	3
COMM 2231	Communication In The Organization	3
COMM 3330	Research Methods In Communication I	3
COMM 3332	Intercultural Communication	3
Total Hours		15

At least 9 of the 15 hours required for the minor must be taken at UMSL.

Students must earn at least a C for all communication courses applied to the minor. A minimum GPA of 2.5 is required in the minor.

Minor in Media Studies

A minor in Media Studies consists of 18 credit hours.

Required Courses:

COMM 1050	Introduction To Mass Communication	3
MEDIA ST 2235	Media Theory	3

Select one of the following: 3

MEDIA ST 1100	Introduction To Advertising	
MEDIA ST 1110	Introduction to Broadcasting and Digital Media	

Select one of the following:	3
MEDIA ST 2180 Introduction to News Writing	
MEDIA ST 2080 Advertising Copywriting	
MEDIA ST 2212 Broadcast Writing And Reporting	
Elective courses	6
Total Hours	18

The elective courses may consist of any media studies course or any communication course that counts towards the media studies major as either an elective or a requirement. At least 3 credit hours must be at the 3000 level or above. At least 9 of the 18 hours required for the minor must be taken at UMSL.

Students must earn at least a C for all media studies courses applied to the minor. A minimum GPA of 2.50 is required in the minor.

Certificate in Advertising

The Certificate in Advertising provides students with a grounded approach to the theory and practice of professional advertising. Using classic and modern techniques, students explore and implement strategies designed to influence and persuade target audiences. With an emphasis on media-rich environments, students will develop a repertoire of skills needed to be successful in the industry.

The Certificate in Advertising is comprised of 21 hours of coursework. At least 12 of the hours must be completed at UMSL. Students must earn at least a B in any course applied to certificate. The Certificate Coordinator must approve the internship/practicum site for internship/practicum hours to be applied to the certificate.

Required Courses

MEDIA ST 1100	Introduction To Advertising	3
MEDIA ST 2080	Advertising Copywriting	3
MEDIA ST 3500	Advanced Advertising Seminar	3
or MEDIA ST 3398	Internship In Media Studies	
or MEDIA ST 1198	Practicum In Media Studies	

The remaining hours of the certificate are comprised of electives chosen from an approved list of courses. If a student wishes to apply a course to the certificate that is not currently in the list of approved electives, he or she may request that the Certificate Coordinator evaluate the course for future consideration. If the Certificate Coordinator deems the course an acceptable alternative, it may be substituted for one of the approved electives.

Approved Electives

ST ART 2100	Advertising Art Fundamentals	3
MEDIA ST 2220	Promotion Essentials	3
MEDIA ST 3025	Current Issues in Advertising	3
MEDIA ST 3030	Advertising and Social Media	3
MEDIA ST 3355	Media Law And Regulation	3
MKTG 3700	Basic Marketing	3
MKTG 3721	Introduction to Digital Marketing Strategies	3
MEDIA ST 3334	Advertising Media Planning	3
COMM 3150	Crisis, Disaster, and Risk Communication	3

COMM 3370	Social Media in Public Relations	3
COMM 3355	Dangerous Messages	3

Certificate in Health Communication

The department of Communication offers a certificate program for those students interested in careers in health communication. Our certificate program addresses the dynamics of health communication from varying perspectives. The core classes in the program focus on a breadth of health communication topics, such as the influence of mass media, interpersonal communication, organizational communication, and culture. Our dual track then allows students to further specialize in either an interpersonal/organizational focus or a mass mediated focus, giving them the depth of knowledge needed for a number of health-related careers.

To earn the certificate, students will need to complete 15 hours of core classes and 9 hours of specialization in either an interpersonal/organizational health communication track or mass-mediated health communication track, for a total of 24 hours. All students must earn a C or better in all courses applied to the certificate program.

Core Course List:

COMM 1150	Introduction to Public Relations	3
COMM 3360	Media & Health Communication	3
COMM 3361	Interpersonal Health Communication	3
COMM 3367	Organizational Health Communication	3
COMM 4360	Applied Health Communication	3
Total Hours		15

Tracks (Pick one of two):

Interpersonal/Organizational

Choose three courses, 9 hours, from the following: 9

COMM 2232	Effective Communication in the Organization: Tools for Leadership
COMM 3150	Crisis, Disaster, and Risk Communication
COMM 3369	Special Topics in Health Communication
COMM 4035	Integrated Approaches-Public Relations, Advertising, & Promotion
COMM 4905	Directed Readings in Health Communication
COMM 4915	Supervised Research in Health Communication

Total Hours 9

Mass-Mediated

Choose three courses, 9 hours, from the following: 9

COMM 3352	Mass Media in Society
COMM 3355	Dangerous Messages
COMM 3369	Special Topics in Health Communication
COMM 4035	Integrated Approaches-Public Relations, Advertising, & Promotion
COMM 4100	Communication Campaigns

COMM 4905	Directed Readings in Health Communication	
COMM 4915	Supervised Research in Health Communication	
Total Hours		9

For more information on this certificate, please contact the Department of Communication's Health Communication Certificate Coordinator.

Certificate in Media Production

The Certificate in Media Production provides a sequence of courses designed to develop multi-channel and multi-media skill sets that can be used by students to record, edit, and produce media for artistic, personal, or commercial applications. Students will develop a portfolio of work that will reflect both independent and client-centered content. Students who complete the Certificate in Media Production will develop the knowledge and skills needed in a rapidly changing media environment.

The Certificate in Media Production is comprised of 21 hours of coursework. Students must complete at least 12 hours at UMSL and earn at least a B in any course applied to the certificate.

Required Coursework

MEDIA ST 2113	Media Production I	3
MEDIA ST 2210	Video Production I	3
MEDIA ST 2211	Introduction To Digital Multimedia Production	3
MEDIA ST 4400	Senior Project	3-6
Total Hours		12-15

The remaining hours of the certificate are comprised of electives chosen from an approved list of courses. If a student wishes to apply a course to the certificate that is not currently in the list of approved electives, he or she may request that the Certificate Coordinator evaluate the course for future consideration. If the Certificate Coordinator deems the course an acceptable alternative, it may be substituted for one of the approved electives.

Approved Electives

MEDIA ST 1196	Practicum In Radio	1-3
MEDIA ST 1197	Practicum In Television/Film	1-3
MEDIA ST 2225	Live Events Media	3
MEDIA ST 3113	Media Production II	3
MEDIA ST 3215	Commercial Media Applications	3
MEDIA ST 3310	Video Production II	3
MEDIA ST 3313	Advanced Video Editing	3
MEDIA ST 3380	Feature Film Screenwriting	3

Certificate in Public Relations

The Certificate in Public Relations integrates essential professional skills with contemporary communication theory and research to provide a grounded sequence based on the recommendations of the Public Relations Society of America and the National Communication Association. To earn the certificate, students must complete a minimum of 24 credit hours in the designated courses.

Required Coursework

COMM 1150	Introduction To Public Relations	3
COMM 3358	Communication In Public Relations	3
COMM 3360	Media & Health Communication	3
COMM 3370	Social Media in Public Relations	3
COMM 4100	Communication Campaigns	3
COMM 4199 or COMM 4950	Applied Strategic Communication Internship In Applied Communication	3
Elective Coursework (minimum of 6 credit hours required):		6
COMM 1050	Introduction To Mass Communication	
COMM 1135	Communication Theory	
COMM 2231	Communication In The Organization	
COMM 2232	Effective Communication In The Organization: Tools For Leadership	
COMM 2240	Persuasive Communication	
COMM 3150	Crisis, Disaster, and Risk Communication	
COMM 3330	Research Methods In Communication I	
COMM 3395	Special Topics In Communication	
Total Hours		24

For more information on this certificate, please contact the Department of Communication's Public Relations Sequence Coordinator.

Department Activities and Internships

Co-curricular projects and activities relevant to the personal, professional, and academic goals of each student are sponsored and advised by the department. Along with the traditional academic experience, students can network and develop valuable experiences through their completion of required internship or practicum courses. Students may choose from a wide-range of for-profit, nonprofit, and not-for-profit organizations. Students should visit the Department of Communication for more information regarding existing opportunities, and/or consult with the Internship and Practicum Coordinator to approve a new internship site. By tailoring the internship site to the interests of each student, the internship and practicum augment the academic experience and provide valuable opportunities for majors to apply their communication studies.

Graduate Studies

The department offers a Master of Arts degree in Communication.

Admission Requirements

Applicants must have a baccalaureate in communication or a related discipline by the end of the semester in which they apply. The minimum cumulative GPA required for regular admission to the graduate program in communication is 3.25 on a 4-point scale. In addition, three letters of recommendation, at least two of which address the applicant's potential to succeed in graduate studies in communication, are also required. Finally, international students who are non-native speakers of English must obtain a TOEFL score of 600 on the paper-based test (or the equivalent score on other versions of the test) to be considered for admission. Applicants with GPAs that do not meet the admission criterion may elect to submit other materials, such as scores on the Graduate Record Exam (GRE), to offset

these deficiencies. Contact the Graduate Program Coordinator for more information.

Degree Requirements

The MA in Communication requires either 30 or 36 credit hours of coursework, depending on the exit project. Candidates approved for a thesis or internship will complete at least 30 semester hours of approved study, at least 21 of which must be taken in courses offered by the department. Candidates completing the non-thesis, non-internship option must complete 36 semester hours of approved study, 27 of which must be taken in courses offered by the department. However, students who choose this option may be eligible to waive up to 6 hours if justified by prior coursework or professional experience. Please contact the Graduate Program Coordinator for additional details.

All students complete a 15 credit-hour core. This includes three required courses focusing on the fundamental theories and basic research methods within the field. To complete the core, students will select at least two of three "applications" courses dealing with communication processes within a particular context.

Required Courses:

COMM 6500	Seminar In Communication Theory	3
COMM 6510	Advanced Communication Research Methods I	3
COMM 6515	Advanced Communicatin Research Methods II	3
Choose two of the following three applications courses:		6
COMM 6600	Seminar In Strategic Communication in Organizations	
COMM 6700	Seminar In Mass Communication	
COMM 6800	Seminar In Health Communication	
Total Hours		15

Students who choose the internship or thesis option must identify a prospective committee, including a chairperson and two additional committee members, who will consult in development of an appropriate exit project. The expectation for each internship varies by project and committee, but submission of an essay in which the coursework and internship experiences are integrated is typically required. Internship exit projects and theses must be approved by the student's committee and assigned a grade by the advisor. Students who complete a thesis or internship must complete no less than a 3 hour internship or 6 credit hour thesis.

Graduate Certificate: ACP Instructional Communication

The ACP Instructional Communication Certificate is designed for secondary educators interested in teaching public speaking and related courses to high school students for college credit through programs such as UMSL's Advanced Credit Program. The certificate combines practical application with theory and research to provide teachers with a grounded approach to delivering college appropriate courses with empirical research in communication at the foundation.

Through a combination of online courses and independent studies, students can complete the ACP Communication graduate certificate without visiting campus.

Students who earn the ACP Instructional Communication graduate certificate will be eligible to teach college level courses in public speaking at the secondary level.

For more information about our graduation rates, the median debt of students who completed the Graduate Certificate program, and other important information, please visit our Gainful Employment Disclosure website at <http://umsl.edu/go/Bn8>.

Requirements: Graduate Standing. To earn the ACP Communication certificate, students must complete a minimum of 18 hours. Typically, students will earn the certificate by completing the following courses in sequence¹:

COMM 5000	ACP - Elements of Public Speaking ([R])	3
COMM 5010	ACP: Elements of Debate ([R])	3
COMM 5020	ACP - Persuasion and Influence ([R])	3
COMM 5050	ACP - Special Topics ([E]) ^{2,3}	3-6
COMM 5099	ACP - Observation and Implementation ([R]) ²	3
Total Hours		15-18

¹ Other 5000+ electives may be substituted based on approval and availability. Contact the Graduate Coordinator in the Department of Communication for more information.

² Pre-requisites: Students must have completed or currently be enrolled in each of the following courses: COMM 5000, COMM 5010, COMM 5020

³ May be repeated.

[R] Required for the certificate.

[E] Elective.

Communication Courses

COMM 1000 Effective Communication for College: 3 semester hours

A communication by objective approach is used to introduce students to effective communication in a college environment. Emphasis is placed on preparing and delivering effective messages whether written or spoken, formal or informal, digital or hardcopy.

COMM 1030 Interpersonal Communication I (MOTR COMM 120): 3 semester hours

Introduction to the theories of interpersonal communication. Emphasis on basic principles involved in one-to-one interactions.

COMM 1040 Introduction to Public Speaking (MOTR COMM 110): 3 semester hours

Theories and techniques of organization, argumentation, persuasion and delivery in public speaking.

COMM 1041 Presentational Speaking: 3 semester hours

Theories and techniques of presenting information in various contexts, formats, and settings. Emphasis is placed on strategic coordination for message effectiveness in a team-based environment.

COMM 1050 Introduction to Mass Communication: 3 semester hours

Introduction to oral, print, and electronic media of communication, including emerging digital formats. The course covers the major theories of mass communication effects as well as the social, organizational, economic, political, and technological factors that shape the creation and reception of mass media messages.

COMM 1135 Communication Theory: 3 semester hours

Survey of elements and processes critical to human communication behavior. Comparison of influential communication theories.

COMM 1150 Introduction to Public Relations: 3 semester hours

This course provides an introduction to contemporary persuasive social science principles, processes, and issues involved in the management of communications between an organization and its publics. An emphasis on ethics, law, and professional standards is highlighted.

COMM 1920 Applied Communication: 3 semester hours

Prerequisite: Consent of instructor. An intermediate experience in applied communication on UMSL's campus, such as the school newspaper or radio station. Work must be done on campus, under supervision of a working professional, and in consultation with a faculty member. Repeatable, but no more than six hours of credit may be applied toward the 36-hour minimum required for the degree.

COMM 2180 Public Relations Writing: 3 semester hours

Prerequisites: COMM 1150 or ENGL 1100 or MEDIA ST 2180. An introduction to the process of planning, producing, and evaluating messages in public relations. Examines various forms of contemporary public relations writing, with special emphasis on preparation of messages for different media and audiences, setting long-range and short-term goals and objectives, and identifying appropriate message channels.

COMM 2230 Small Group Communication (MOTR COMM 125): 3 semester hours

Development of communication skills needed in small group decision-making. Application of these skills in contemporary problems.

COMM 2231 Communication in the Organization: 3 semester hours

Course integrates communication theories applicable to the structure and function of organizations. The effect of communication variables on departmental interface, member satisfaction and motivation, leadership and subordinate styles, and perception of the organization by the external environment.

COMM 2232 Effective Communication in the Organization: Tools for Leadership: 3 semester hours

This telecourse is designed to equip students with communication skills applicable to the organizational context. The course will present effective strategies for the articulation of ideas, with particular emphasis on the development of leadership skills.

COMM 2240 Persuasive Communication: 3 semester hours

A study of persuasive communication including theories, techniques, forms, functions, applications, potential and limitations for individual and organizations. Insights from both classical rhetoric and contemporary communication theory.

COMM 3130 Advanced Interpersonal Communication: 3 semester hours

Prerequisite: COMM 1030. Continuation of COMM 1030, focusing on contemporary theories and research regarding interpersonal relationships.

COMM 3150 Crisis, Disaster, and Risk Communication: 3 semester hours

Prerequisites: Junior standing or consent of instructor. Course will focus on three specialized areas within public relations: communication methods and infrastructure in relation to large-scale disaster management; organizational crisis communication; and public communication regarding environmental, chemical and other public risk issues.

COMM 3330 Research Methods in Communication I: 3 semester hours

Introduction to the fundamental tools of quantitative research in communication. Focus of the course is on reading and comprehending communication research reports rather than conducting quantitative research.

COMM 3332 Intercultural Communication: 3 semester hours

Prerequisite: Junior standing or consent of instructor. Study of culture as a variable in both interpersonal and collective communicative situations. Emphasis upon opportunities and problems arising from similarities or differences in communication patterns, processes, and codes among various cultural groups.

COMM 3337 Male/Female Communication: 3 semester hours

Prerequisite: Junior standing or consent of instructor. This course explores the influence of gender upon contemporary American communication behavior. Topics include semantic and syntactic variations in male and female speech, gender-role development as process and product of communication, analysis of communication patterns and barriers within gender groups. Mass, public, interpersonal, and dyadic communication contexts are considered.

COMM 3352 Mass Media in Society: 3 semester hours

Prerequisites: COMM 1050. Examination and evaluation of theories and literature concerning media content and its effect on society. Topics include the evidence relating to the effect of entertainment and information media on audiences' behavior and attitudes, the factors that contribute to individual differences in responses to media content, and the ways the organizational structure of the media industries shape the type of content that is produced.

COMM 3353 Communication and Advocacy: 3 semester hours

This course reviews communication theory and research on the topic of social reform with an emphasis on the effectiveness of organized efforts to influence public opinion. Classic and contemporary case studies provide additional context to effective advocacy.

COMM 3355 Dangerous Messages: 3 semester hours

Prerequisites: Junior standing or consent of instructor. This course examines how communication can be used to promote as well as inhibit societal and individual well-being. Topics include alcohol and tobacco, drugs, sexual behavior, and others pertaining to health and risky behaviors. Stereotyping, diversity in media ownership and content, hate speech, and other topics with implications for the health of citizens individually and as a people may also be covered.

COMM 3358 Communication in Public Relations: 3 semester hours

Prerequisites: COMM 1150. This writing intensive course will cover ghostwriting for executives, brochure copy, feature writing and biographies. Topics include public relations planning and theory, designing strategies and tactics, segmenting publics and designing effective messages, communicating with top management and issue management.

COMM 3360 Media and Health Communication: 3 semester hours

Prerequisites: COMM 1050 or consent of instructor. This course explores the processes of health communication campaign design and evaluation. Course topics include health behavior change theories, influence of and use of media in campaigns, and strategic planning for campaigns.

COMM 3361 Interpersonal Health Communication: 3 semester hours

Prerequisites: COMM 1030 or consent of instructor. The course examines the theories and literature dealing with the role of interpersonal communication in health behavior and health care. It places a special focus on patient-provider communication, social support, and cultural conceptions of illness.

COMM 3367 Organizational Health Communication: 3 semester hours

Prerequisites: COMM 2231 and COMM 3361; or consent of instructor. This course examines the theories and literature dealing with the role of organizational communication in health behavior and health care. A service learning project with 15 hours of service is mandatory for the course.

COMM 3369 Special Topics in Health Communication: 3 semester hours

Prerequisites: COMM 3360 or COMM 3361 depending on the course topic and junior standing. This course provides an in-depth study of topics pertaining to current research in health communication. It may be repeated for credit once if topic is different.

COMM 3370 Social Media in Public Relations: 3 semester hours

Prerequisites: COMM 1150 or MEDIA ST 1100 or consent of instructor. The course presents an overview of how to use social media and blogging in contemporary public relations. Students will also learn how to evaluate and create a social media plan.

COMM 3371 Strategic Communication in the Digital Environment: 3 semester hours

Prerequisites: COMM 1050 or COMM 1150 or MEDIA ST 1100. This course considers how principles of persuasion apply to communication in digital and social media. It focuses on developing students' understanding of persuasion by exposing them to theories and research, so that they develop the skills to craft effective and ethical persuasive strategies when using digital technologies and platforms.

COMM 3395 Special Topics in Communication: 3 semester hours

In-depth study of topics pertaining to current research in the department. May be repeated up to six credit hours if topic is different.

COMM 3400 Language and Behavior: 3 semester hours

Prerequisites: COMM 1030, junior standing or consent of instructor. Examination of language and behavior which includes etiological considerations, functions, meanings, perceptions, and process-interaction rules.

COMM 3410 Nonverbal Communication: 3 semester hours

Prerequisites: COMM 1030, junior standing or consent of instructor. An examination of the paralinguistic cues that accompany normal communication such as facial expression, eye behavior, gestures and body movements, accents and dialects, and the impact of touch, among others. The implications for message construction, delivery, and perception are discussed.

COMM 3500 Dysfunctional Communication: 3 semester hours

Prerequisites: COMM 1030, junior standing or consent of instructor. An examination of some of the factors that impede effective communication. Emphasis is placed both on individual attributes such as verbal aggression and communication apprehension, as well as context-based factors found in family and romantic relationships, among others.

COMM 3510 Communication and Conflict: 3 semester hours

Prerequisites: COMM 1030, junior standing or consent of instructor. An examination of the features that contribute to effective and ineffective communication during conflicts. The course integrates communication research and theory with practical applications in negotiation and conflict resolution.

COMM 3520 Communication Barriers I: 3 semester hours

Prerequisites: COMM 1030, junior standing or consent of instructor. A review of communication research on physical and developmental barriers that impair or impede effective communication with children. A limited number of site visits and/or off-campus experiences are required.

COMM 3521 Communication Barriers II: 3 semester hours

Prerequisites: COMM 3520. An extension of COMM 3520, this course focuses on effective and empathic communication with children and adults encumbered by communication barriers. A strong emphasis on high impact educational experiences is a major component of this course. Site visits and/or off-campus experiences are required.

COMM 3600 Communication and Families: 3 semester hours

Prerequisites: COMM 1030, junior standing or consent of instructor. An analysis of research and theory involving communicative attributes and phenomena unique to the family context. Communication between parent-child, siblings, and extended family members, as well as more complex family structures are addressed. Functional and effective communication techniques are also discussed.

COMM 3610 Communication and Relationships: 3 semester hours

Prerequisites: COMM 1030, junior standing or consent of instructor. An examination of the contributions of communication researchers to the study of developing and maintaining human relationships with particular focus on communication in friendships and romantic relationships.

COMM 3700 Computer-Mediated Communication: 3 semester hours

Prerequisites: COMM 1030, COMM 1050, junior standing or consent of instructor. A comparison of the similarities and differences between face-to-face communication and computer-mediated communication. Synchronous and asynchronous methods of interaction are examined, as well as other characteristics unique to the digital environment.

COMM 4035 Integrated Approaches-Public Relations, Advertising, & Promotion: 3 semester hours

Prerequisites: COMM 3358 or consent of instructor. Overview of how publicity, advertising and other promotional activities can be integrated into a single cohesive communication initiative or program.

COMM 4050 Narrative Experiences in Aging and Health Care: 3 semester hours

Same as SOC 4050, GERON 4050, and GS 4050. Prerequisites: Junior, senior or graduate student status, or consent of instructor. This course examines the experiences of older adults and their families in the navigation and receipt of primary and specialized health care services. Challenges associated with bias, ageism, ethical dilemmas, miscommunication, patient-provider dynamics, and family systems are addressed. Patient experiences are highlighted across the continuum of care with emphasis on improving current systems.

COMM 4100 Communication Campaigns: 3 semester hours

Prerequisite: COMM 1030, COMM 1050, COMM 1150 and junior standing or consent of instructor. This course focuses on the design, analysis, and implementation of mass communication-based information campaigns by integrating research and theory from interpersonal, mass communication, and public relations. It provides an advanced study of an organization's public relations needs. It includes researching the situation, analyzing audiences, and preparing strategic plans for approved clients.

COMM 4199 Applied Strategic Communication: 3 semester hours

Prerequisites: Consent of instructor. This independent study course provides students with an applied experience in strategic communication. The course may require on-site visits to advertising and public relations firms and/or the development of multi-year strategic plans. This course may not be repeated for credit.

COMM 4360 Applied Health Communication: 3 semester hours

Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; enrollment limited to health communication certificate students. Advanced practical work experience emphasizing communication skills within a health organization. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development, all with a health communication focus. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member.

COMM 4900 Directed Readings: 3 semester hours

Prerequisite: Consent of instructor. Supervised independent study focused on discipline-relevant content that expands on concepts and theories presented in communication courses. May be repeated for credit.

COMM 4905 Directed Readings in Health Communication: 3 semester hours

Prerequisites: Consent of instructor. Supervised independent study focused on discipline-relevant content in health communication that expands on concepts and theories presented in health communication courses. May be repeated once for credit.

COMM 4910 Supervised Research: 1-3 semester hours

Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience that includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated with consent of department.

COMM 4915 Supervised Research in Health Communication: 1-3 semester hours

Prerequisites: Consent of instructor. Supervised field, laboratory, or survey research experience in the area of health communication. Includes activities such as data collection, literature searches, qualitative or quantitative data analysis, survey or experiment administration, and other research related activities. May be repeated for up to 6 credit hours total with consent of department.

COMM 4920 Practicum in Applied Communication: 1-3 semester hours

Prerequisite: Junior standing, at least 12 hours of course work in Communication, and consent of instructor; open to Communication majors/minors. Practicum work experience with any discipline-relevant unit at UMSL including, but not limited to: the offices of students affairs, public relations, and research administration; the school newspaper or radio station; and intra-departmental activities. Work must be done on campus, under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but no more than six hours total credit may be earned in practicum courses toward the 36-hour minimum required for the degree.

COMM 4950 Internship in Applied Communication: 3-6 semester hours

Prerequisites: Senior standing with at least 12 hours of course work in Communication, consent of instructor; open to communication majors only. Advanced practical work experience emphasizing communication skills with any discipline-relevant entity. Experiences may include organizational and promotional activities, mass communication, public relations, research and writing, strategic communication, or training and development. Internships are off-campus and proposed sites must be approved by the department. Work must be done under supervision of a working professional in the field, and in consultation with a faculty member. Repeatable, but no more than six hours total credit may be earned in internship courses toward the 35-hour minimum required for the degree.

COMM 5000 ACP - Elements of Public Speaking: 3 semester hours

Prerequisites: Graduate standing, special consent. This course focuses on the delivery of theory and research based public speaking content for teachers seeking certification to teach communication courses for the Advanced Credit Program.

COMM 5010 ACP: Elements of Debate: 3 semester hours

Prerequisites: Graduate standing, special consent. This course focuses on developing a comprehensive understanding of the theory and research typically taught in college level forensics and debate courses. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Program.

COMM 5020 ACP - Persuasion and Influence: 3 semester hours

Prerequisites: Graduate standing, special consent. This course focuses on developing a strong background in the research and theory that underlies attempts to persuade and influence others through the use of effective communication. Designed for teachers seeking certification to teach communication courses for the Advanced Credit Programs.

COMM 5050 ACP - Special Topics: 3-6 semester hours

Prerequisites: COMM 5000, COMM 5010, and COMM 5020, Special Consent. This rotating topic course focuses on developing knowledge of communication theory and research applicable to the context of teaching public speaking and debate. Topics may include such issues as nonverbal communication, conflict communication, and argumentation, among others. Designed for teachers seeking certification to teach in the Advanced Credit Program. May be repeated for a maximum of 6 credit hours.

COMM 5099 ACP - Observation and Implementation: 3 semester hours

Prerequisites: COMM 5000, COMM 5010, COMM 5020 and COMM 5050, special consent. Provides a capstone experience for teachers seeking to teach communication courses in the advanced credit program. While enrolled, participants will implement an ACP course in their school under the supervision of the Communication Department's advanced Credit Program Liaison.

COMM 6500 Seminar in Communication Theory: 3 semester hours

Prerequisite: Graduate standing. Examination of the theoretical, methodological, and philosophy of science issues in the discipline of communication. Examines general, micro, contextual, and interdisciplinary (symbiotic) communication theories. Required of all graduate communication students.

COMM 6510 Advanced Communication Research Methods I: 3 semester hours

Prerequisites: Graduate standing. Concerns the logic and forms of communication inquiry including an examination of various communication research and evaluation methods and their theoretical frameworks. Topics include communication research strategy and methodology, scientific process, derivation and test of hypotheses, methods of research design. Provides and orientation to graduate research including proposal development for thesis, internship and paper requirements, and includes a theory-based research project of the student's choice. Required of all graduate communication students.

COMM 6515 Advanced Communication Research Methods II: 3 semester hours

Prerequisite: COMM 6510 or consent of instructor. Overview of the most commonly utilized methods in quantitative data analysis statistical methods in communication with an emphasis on understanding how the statistic is reported in scholarly articles and when to use that method, rather than in the mathematical computation of the method. Topics include: descriptive statistics, single and multi-factor analysis of variance, simple and multiple linear regression, basics of nonlinear regression, analysis of categorical data, meta-analysis, and non-parametric statistical methods. Required of all graduate communication students.

COMM 6600 Seminar in Strategic Communication in Organizations: 3 semester hours

Prerequisite: Graduate standing. Examines the function of communication in the workplace. Students will study various frameworks for understanding organizational communication, implications of major organizational theories, and strategic communication processes in organizations. Interpersonal sensitivity, communication skills, and ethical values within organizations are also examined.

COMM 6700 Seminar in Mass Communication: 3 semester hours

Prerequisites: Graduate Standing. Examines the theories and research pertaining to media industries, content, and users. Topics include the impact of technology on media content and usage patterns, media effects on society and on individuals, media representation patterns, and the reasons users select particular types of content.

COMM 6750 Media Reception Processes: 3 semester hours

Prerequisites: COMM 6510 or consent of instructor. Examines how audiences select, interpret, and respond to media messages. Students, typically in a group, are involved in developing and carrying out a research study investigating the topic.

COMM 6800 Seminar in Health Communication: 3 semester hours

Prerequisites: Graduate Standing. Examines the theories that researchers use to investigate health communication phenomena, as well as the application of those theories to understanding and enhancing health. Course topics include health campaigns and interventions, patient-provider communication, and cultural perceptions of health.

COMM 6815 Persuasion and Influence in Communication: 3 semester hours

Prerequisite: Graduate Standing. Broad-based examination of the major theories of social influence and persuasion and their practical applications.

COMM 6830 Seminar in Special Topics in Communication: 3 semester hours

Prerequisite: Graduate Standing. Selected topics in the study of communication. Review of the communication theory and methods appropriate to the topic. The course includes a research project. May be repeated if the topic is different.

COMM 6900 Directed Readings in Communication: 1-6 semester hours

Prerequisite: Graduate Standing and consent of instructor. Independent study of published research and reports relating to a specific topic in communication. May be repeated for credit with permission of advisor.

COMM 6910 Supervised Research in Communication: 1-3 semester hours

Prerequisites: Graduate Standing and consent of instructor. Primary research on specific topics in communication. May involve collaborative research with a faculty member on a topic of mutual interest or data collection/analysis for a project developed by the student under the guidance of a faculty member. May be repeated for credit with permission of advisor.

COMM 6920 Practicum in Computer-Mediated Communication: 1-3 semester hours

Prerequisites: Graduate standing and consent of program director. Applied practice or research in collaboration with a faculty member.

COMM 6950 Graduate Internship: 3-6 semester hours

Prerequisites: Graduate standing and approval of graduate coordinator. Individual on-site internship in organizational or mass communication. May be repeated.

COMM 6960 Thesis Research and Preparation: 1-10 semester hours

Prerequisites: Graduate Standing and consent of instructor. Individual research for and preparation of the graduate thesis.

Media Studies Courses

MEDIA ST 1055 Introduction to Social Media: 3 semester hours

Introduction to the creation and rise of social media/networks. Course will cover the impact and influence of dominant sites along with individual, group, political, and commercial behavior changes. The course will examine how social media platforms can be integrated with other current tools. Issues such as privacy, censorship, cyber-bullying, and the use of social media for anti-social/terrorist activities will be explored.

MEDIA ST 1065 Internet Media: 3 semester hours

This studio course will cover the principles of media design as they apply to the interactive world of the web. Sensitivity to the visual elements of online interfaces will be developed through analysis of the changing nature of communication technologies. Students will conceive and create their own web-based media projects.

MEDIA ST 1070 Introduction to Cinema: 3 semester hours

Same as THEATR 1070. This course provides an overview of American cinema from the early beginnings of D.W. Griffith and his contemporaries to the present day. The course will discuss both the Hollywood studio system and today's independent movement. Genre, film theory, criticism, and aesthetics are also covered.

MEDIA ST 1100 Introduction to Advertising: 3 semester hours

An introduction to the history, rhetoric, and aesthetics of Advertising. A basic understanding of industry issues and key areas such as account management, research, strategy, creative, media, and production.

MEDIA ST 1110 Introduction to Broadcasting and Digital Media: 3 semester hours

This course provides an introduction to the broadcasting and digital media industries. It also addresses topics including history, government regulations, technological changes, and social implications.

MEDIA ST 1198 Practicum in Media Studies: 1-6 semester hours

Prerequisites: Consent of instructor. Open to Media Studies majors or minors only; not open to students who have delayed grades outstanding. Practical work in a field related to media studies supervised by a faculty member. This course may be repeated for up to 20 credit hours.

MEDIA ST 1500 Entertainment Economics: The Movie Industry: 3 semester hours

Same as ECON 1500. This survey course examines the interrelationships between economics and the movie industry. It explores the impact of economic factors on the production, distribution and exhibition of movies, focusing on the rise and fall of the studio system, role of technological change in the evolution of cinematography and the movie marketplace, financing and market segmentation, globalization and changing industrial structure within which films are produced. To the extent that movies reflect and contribute to popular economic perspectives, this course also evaluates the soundness of the movie industry's depiction of a variety of economic doctrines. Classes will consist of lecture, discussion, and brief film screenings.

MEDIA ST 2080 Advertising Copywriting: 3 semester hours

Same as ENGL 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

MEDIA ST 2090 Creative Advertising: 3 semester hours

Prerequisites: MEDIA ST 1100 or consent of instructor. Explores the fundamentals of the creative process by discussing selling messages, marketplace diversity, research, strategy, layouts, and the creative brief. Emphasis on creative campaigns for radio, television, direct marketing, and the Internet.

MEDIA ST 2113 Media Production I: 3 semester hours

Study of the basic skills needed to create media packages. The class will provide students with practical experience in camera operation, directing, producing, switching, audio mixing, and lighting, as well as basic non-linear editing. Lab arranged.

MEDIA ST 2114 Radio Production I: 3 semester hours

Prerequisites: MEDIA ST 1110. Theory and practice in the creation of radio programs. Laboratory experience included.

MEDIA ST 2180 Introduction to News Writing: 3 semester hours

This course focuses on developing stories and news writing; staff of The Current and other student publications are encouraged to enroll.

MEDIA ST 2210 Video Production I: 3 semester hours

Prerequisites: MEDIA ST 2113 or consent of instructor. Study of the basic theories of remote video production. The areas of producing and directing in the field will be examined and practiced. The course will focus on technical and aesthetic aspects of cinematic production. Lab arranged.

MEDIA ST 2211 Introduction to Digital Multimedia Production: 3 semester hours

Students will explore different state-of-the-art digital multimedia applications, including audio, video, and computer generated graphics, that are presently used in television, radio, CD, DVD, and online presentation. Current media related software such as QuickTime, Window Media, and Flash multimedia creation will be demonstrated and utilized to develop skill sets in those areas.

MEDIA ST 2212 Broadcast Writing and Reporting: 3 semester hours

Prerequisites: MEDIA ST 1110 or consent of instructor. Elementary principles and practice of writing for radio and television in varied program formats, emphasis on preparation of written materials for news and public affairs presentation. Lecture and lab.

MEDIA ST 2222 Convergence and Digital Media: 3 semester hours

The development of new media technologies results in convergence, in which the lines between or among formerly separate media are blurred. Convergence and Digital Media focuses on the emerging media forms which result, including such new options as mobile apps for audio and video, blogs, and social media, as well as new tools for media creation for personal, social, business, and organizational expression. The course will examine emerging media technical options, effective message strategies in the context of emerging media, and basic principles associated with the practical use of tools for the creation of emerging media content. Both a lecture/discussion format and a hands-on project approach will be utilized.

MEDIA ST 2225 Live Events Media: 3 semester hours

Techniques and aesthetics of recording live video events. Course will include practical application training for single- and multi-camera shoots of concerts, lectures, theatre, dance, weddings, and other special events.

MEDIA ST 2230 Introduction to Sound Recording: 3 semester hours

An applied multimedia production course focusing on audio principles, digital recording equipment, sound reproduction, and multimedia production techniques. Course includes theoretical aspects of sound, acoustics, audio signal flow, and the aesthetics of sound mixing.

MEDIA ST 2235 Media Theory: 3 semester hours

Prerequisite: COMM 1050. This courses presents a theory-based explanation of the relationship between mass media and society. The topics covered include agenda-setting, violence and television, and other current issues from a critical perspective.

MEDIA ST 2274 African-American Cinema: 3 semester hours

Prerequisites: THEATR 1070 or MEDIA ST 1070; or equivalent. This course studies the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture. The history of African-American films from Oscar Micheaux in the 1920's through 1970's Blaxploitation to present directors and producers will be examined. African-American experiences and roles in films will also be discussed.

MEDIA ST 2500 Introduction to Comparative International Media Systems: 3 semester hours

This course introduces students to various media systems and theories around the world. It examines similarities and differences in media history, structures, and regulatory processes of developing countries, focusing on the dominant culture(s) of non-western regions. It also provides a framework for understanding and analyzing the cultural differences among global media systems in Africa, the Middle East, and Asia. In addition, the course examines aboriginal and other development media. The course fulfills the cultural diversity requirement.

MEDIA ST 2510 Fundamentals of Mobile Design: 3 semester hours

Building on core web languages and programming standards, this course introduces central concepts, techniques, methodologies, and best practices in the creation and deployment of mobile websites, applications, and user interface.

MEDIA ST 3025 Current Issues in Strategic Communication: 3 semester hours

Prerequisites: MEDIA ST 1100 or COMM 1150, junior standing or consent of instructor. The course covers current trends, topics, and controversies in advertising, public relations, and related fields. Students will analyze, evaluate, and critique current topics in group discussions. Students are expected to help select and research the topics as well as lead discussion with the support from the instructor.

MEDIA ST 3030 Advertising and Social Media: 3 semester hours

Prerequisite: MEDIA ST 2090. Examination of advertising online with such topics as: social communities, friendvertising, virtual worlds, brand building, media democracy, online opinions, gaming, and how companies can leverage their brand using two-way interaction.

MEDIA ST 3113 Media Production II: 3 semester hours

Prerequisite: MEDIA ST 2113. Advanced study of the skills needed to create media packages. The class will provide students with a continuation of practical training in camera operations, directing, producing, switching, audio mixing, and lighting, as well as more advanced post production techniques. Lab arranged.

MEDIA ST 3150 Feature Writing: 3 semester hours

Same as ENGL 3150. Prerequisites: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments - journal entries, interviews, library projects, article critiques, and market reports - lead to production of full-length feature articles. May not be taken on the satisfactory/unsatisfactory option. The course counts toward the English Certificate in Writing.

MEDIA ST 3180 Reporting: 3 semester hours

Same as ENGL 3180. Prerequisites: ENGL 3140 or equivalent. Theory and practice of reporting news for publication in the print media. Includes one classroom session and one field assignment weekly. Stories must be filed within deadline limit. Writing emphasis is on clarity, conciseness, and accuracy. The course counts toward the English certificate in Writing.

MEDIA ST 3201 Narratives from the Forever Wars: 3 semester hours

Same as MVS 3201 and ENGL 3201. This course studies literature and film written by and about those who served in the wars in Iraq and Afghanistan, with particular interest in how veterans as individuals are represented in it.

MEDIA ST 3215 Commercial Media Applications: 3 semester hours

Prerequisites: MEDIA ST 2210, MEDIA ST 2211; or consent of instructor. An integrated application of audio, video, and digital media production techniques for commercial purposes. Emphasizing a client-centered approach, students gain practical experience in developing media applications that conform to client-defined specifications.

MEDIA ST 3310 Video Production II: 3 semester hours

Prerequisite: MEDIA ST 2210. Study of advanced theories of media production. Refinement of production principles learned in MEDIA ST 2210. Exploration of complex program formats, and advanced non-linear editing techniques. Lab arranged.

MEDIA ST 3313 Advanced Video Editing: 3 semester hours

Prerequisites: Six (6) hours of television production. Study of advanced non-linear editing techniques, animation, and advanced graphics development. Exploration of state of the art editing formats. Lab arranged.

MEDIA ST 3317 Audio Media Industries: 3 semester hours

Prerequisite: Junior standing. This course covers the historical development and current status of the audio media industries such as music recording, radio broadcasting, and digital streaming. It addresses the impact of recording, broadcasting, and digital distribution technology on the development of popular music and of other audio media such as talk radio and podcasts.

MEDIA ST 3318 Advanced Independent Video Production: 3 semester hours

Prerequisites: MEDIA ST 2210. This course will enable students to plan, script, shoot and edit advanced independent video productions for exhibition and competitive formats. Emphasis will be placed upon auteur conceptualization, production, and direction. May be repeated for up to a total of 6 credit hours.

MEDIA ST 3334 Advertising Media Planning: 3 semester hours

Prerequisites: MEDIA ST 1100. A hands-on study of how to determine an advertising budget, select media and develop a strategic plan.

MEDIA ST 3338 Advertising Technique: 3 semester hours

Same as MKTG 3738. Prerequisite: MEDIA ST 1100 or MKTG 3700 or consent of instructor. Techniques for creating advertising messages and campaigns to reach target audiences. Focus on the process of persuasion, importance of advertising in modern economics, rationale for company advertisement, evaluation of advertising effectiveness, and assessment of advertising myths and truths. Practical application of messages and campaigns will be stressed.

MEDIA ST 3350 Mass Media History: 3 semester hours

Prerequisites: COMM 1050 or MEDIA ST 1110. This course examines the social, economic, and political factors contributing to the development of American mass media. It emphasizes significant personalities who helped shape media history and involves analyses of select critical works.

MEDIA ST 3355 Media Law and Regulation: 3 semester hours

Prerequisites: COMM 1050 or MEDIA ST 1110. This course addresses laws affecting the mass media. The topics covered include problems and issues in legal regulation of media content, ownership, access, and accountability as well as industry self-regulation and the influence of citizens' organizations.

MEDIA ST 3356 Global Media Systems and Trends: 3 semester hours

This course will survey major theories, global trends, and key stakeholders in the field of mass and digital media. It addresses issues regarding the transnational and transcultural flow of media content and communication technologies. Topics include the historical context and cultural implications of globalization, patterns of international media flow, and the roles of transnational media and communication organizations.

MEDIA ST 3357 Media Convergence: 3 semester hours

This course will provide students with an overview of how computer technologies, telecommunication networks, and digital media are transforming contemporary culture and everyday life. Through hands-on projects on topics of social relevance, students will explore multiple platforms for reaching a variety of audiences. The course will also deal with policy issues such as regulation and competition.

MEDIA ST 3398 Internship in Media Studies: 3-6 semester hours

Prerequisites: Senior standing; consent of instructor; open to Media Studies majors only; not open to students who have any delayed grades. Practical work at an off-campus agency, supervised by a professional in consultation with a faculty member. This course may be repeated for up to 20 credit hours.

MEDIA ST 3400 Developing Brand Strategy: 3 semester hours

Prerequisites: MEDIA ST 1100 and MEDIA ST 2080, or consent of instructor. This course focuses on the account planning skills used to develop an effective and strategic advertising campaign. Working with a real brand, students develop advertising goals, investigate the brand's target audience, and formulate a media plan. This course complements MEDIA ST 3500, which develops a creative message strategy and presentation for the campaign and typically culminates in presenting the complete plan at a national student advertising competition.

MEDIA ST 3500 Advanced Advertising Seminar: 3 semester hours

Prerequisites: MEDIA ST 3400 or consent of instructor. This course focuses on the message design skills used to develop an effective and strategic advertising campaign. Working with a real brand, students develop advertising messages for different media and plan how they will be distributed. This course complements MEDIA ST 3400, which involves formulating the strategic goals and carrying out the market research for a campaign. The course typically culminates in presenting the complete campaign plan at a national student advertising competition.

MEDIA ST 3505 Field Experience in Advertising: 3 semester hours

Prerequisites: Junior standing and completion of 3 courses from the Certificate in Advertising or consent of instructor. Through supervised travel, students will examine current ad campaigns, media placement, and effects on consumer purchasing behaviors. They will develop a broad hands-on understanding of the industry while applying principles and practices learned in the classroom. Topics include creativity with visual images and/or photographs, copywriting, accounting planning, account services, and media planning and buying. For field experience, students will visit advertising agencies, businesses that have in-house advertising departments, vendors (such as printers), museums, and other creative venues in St. Louis and/or other cities.

MEDIA ST 3990 Directed Readings in Media Studies: 3 semester hours

Prerequisites: Consent of instructor; not open to students who have any delayed grades. Supervised independent study involving readings, conferences, papers, in one of the department's disciplines: advertising, radio, television, film, or journalism.

MEDIA ST 4040 Special Topics in Media Studies: 1-6 semester hours

Prerequisites: Junior, senior, or graduate standing and consent of instructor. Special topics with subject matter dealing with current issues, (theoretical or applied), in the discipline of media studies. Since the topics of MEDIA ST 4040 may change from semester to semester, the course may be repeated for up to 12 credit hours.

MEDIA ST 4400 Senior Project: 3-6 semester hours

Prerequisites: Senior status and consent of instructor. The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty. Repeatable up to 6 credit hours.

Computer Science Programs

The Computer Science programs are offered through the Department of Mathematics and Computer Science. To view faculty, degree information including four year plans, please see the department page (p. 201) in the Bulletin.

General Information

Degrees and Areas of Concentration

The Department of Mathematics and Computer Science offers undergraduate and graduate degree programs in Computer Science, a minor, and a number of certificates.

At the undergraduate level, the department offers the B.S. in computer science and the B.S. in computing technology (pending CBHE approval).

The department also offers a minor in computer science, a Certificate in Internet and Web, a Certificate in Mobile Apps and Ubiquitous Computing, a Certificate in Data Science, and in cooperation with the Department of Information Systems, a joint Certificate in Cybersecurity.

At the graduate level, the department offers a Master of Science (M.S.) degree in computer science and a Doctor of Philosophy (Ph.D.) in mathematical and computational sciences – with a computer science option. The department also offers, in cooperation with the Department of Information Systems, a joint Graduate Certificate in Cybersecurity.

Undergraduate Programs Overview

The B.S. in computer science combines traditional computer science studies, with its depth and breadth, with more practical exposure to a wide variety of tools and technologies. Students in this program are exposed to thorough background in mathematics and statistics, and can also develop expertise in a specific area of interest through available certificates and electives, including those based on math or statistics such as AI, data science and analytics, internet-based technologies, and mobile computing.

In additional, students are prepared for working in groups, technical reading and writing, and professional and ethical aspects. Students completing this degree are well prepared for further graduate studies in computer science.

The B.S. in computing technology (pending CBHE approval) is a newer degree program that favors exposure to a wide variety of tools and technologies over traditional depth or thorough computer science background. Students completing this degree are well prepared for many careers and opportunities, determined by the choices of many available elective courses, which can still be packaged into certificates.

The Certificate in Data Science is designed to provide computing and statistical foundations for work with big data and data analytics.

The Certificate in Internet and Web is designed to provide a broad training in technologies related to the Internet and Web, with flexibility allowing a student to satisfy specific interests.

The Certificate in Mobile Apps and Ubiquitous Computing is designed to provide training in technologies and framework for mobile apps and computing.

The Certificate in Cybersecurity is designed to provide basic training in emerging areas of information, data, and network security.

Dual Programs

The Department offers a B.S./M.S. dual degree program in Computer Science for students with strong academic records. The program is designed to provide an opportunity for strong undergraduate majors to start earning graduate work credit before completing their undergraduate degree and to shorten, or accelerate, the time required to earn their graduate degrees.

Graduate Programs Overview

The M.S. degree in computer science program emphasizes practical aspects of the field. Our graduates have good understanding of the software process and its challenges, good understanding of computers systems and its parts, and be exposed to a wide range of technologies. They will also be prepared for team work, independent research, and technical reporting and presentations. In addition, available electives allow the students to focus in specific areas of interest.

The Ph.D. program in mathematical and computational sciences has an option in computer science. Students choosing this option will develop a breadth of abilities in the core areas of computer science at the graduate level. They will gain a depth of ability in contemporary research in their chosen subfield of Computer Science, and will be able to pursue independent research in their area of specialization.

Students may enroll in any of these graduate programs on a part-time basis, and with proper scheduling all can be completed in the evening.

Career Outlook

A degree in computer science prepares well-motivated students for interesting and fulfilling careers. Our graduates find positions in industry, government, and education. The demand for Computer Science graduates is high and it is projected to increase in the future.

Graduates in computer science from UMSL are located throughout the country, and they also have a strong local presence. They have careers in banking, health care, engineering and manufacturing, law, finance, and public service. Many are working in areas such as systems management, information systems and data management, scientific computing, and scientific positions in the armed services. Others have careers in education, especially at secondary and higher levels.

Department Scholarships

The Department of Mathematics and Computer Science offers many merit and need based scholarships available to department majors.

The Alumni Scholarship is a monetary award for outstanding undergraduate students open to all junior and senior department majors.

The Edward Z. Andalaft Memorial Scholarship is a monetary award for outstanding undergraduate department majors at the sophomore level or higher.

The Raymond and Thelma Balbes Scholarship in Mathematics is a monetary award for students at the sophomore level or higher who are pursuing a degree in mathematics, have an overall GPA of at least 3.0

and a GPA of at least 3.2 in mathematics and who have completed three semesters of calculus.

The Joseph M. and Mary A. Vogl Scholarship in Mathematics is a need based monetary award for mathematics majors.

The Computer Science Scholarship is a monetary award for outstanding computer science majors with preference given to freshman and sophomore students. Applicants must have a grade point average of 3.5 or higher in courses taken in the department.

The Boeing Company Scholars Program in Computer Science is a monetary award for full-time (at least 12 hours) upper-level undergraduate students in computer science. Recipients must have a minimum GPA of 3.2 and must maintain a GPA of 3.0. Preference will be given to traditionally underrepresented populations.

Undergraduate Studies

General Education Requirements

All department majors must satisfy the university and appropriate school or college general education requirements (p. 41). All mathematics courses may be used to meet the university's general education breadth of study requirement in natural sciences and mathematics.

Satisfactory/Unsatisfactory Restrictions

No department majors may take mathematical sciences or related area courses on a satisfactory/unsatisfactory basis. Students considering graduate study should consult with their advisers about taking work on a satisfactory/unsatisfactory basis.

Degree Requirements

All courses of the department presented to meet the degree requirements must be completed with a grade of C- or better. At least four courses numbered 3000 or above must be taken in residence. Students must have a 2.0 grade point average in the mathematical sciences courses completed.

Students enrolling in introductory mathematics courses should check the prerequisites to determine if a satisfactory score on the Mathematics Placement Test is necessary. Placement into introductory courses assumes a mastery of two years of high school algebra.

A minimum grade of C- is required to meet the prerequisite requirement for any course except with permission of the department.

Note: Courses that are prerequisites for higher-level courses may not be taken for credit or quality points if the higher-level course has been satisfactorily completed.

Many students are qualified, as a result of having studied calculus in high school, to begin their major with MATH 1900, Analytic Geometry and Calculus II, or MATH 2000, Analytic Geometry and Calculus III. These students are urged to consult with the department before planning their programs. Credit for MATH 1800, Analytic Geometry and Calculus I, will be granted to those students who complete MATH 1900 with a grade of C- or better.

Similarly, students who are ready to begin their computer science studies with CMP SCI 2250, Programming and Data Structures, will be granted credit for CMP SCI 1250, Introduction to Computing, once they complete CMP SCI 2250 with a grade of C- or better.

Declaring the Computer Science Major

Students seeking to major in computer science are first designated as "pre-computer science majors" until they have completed CMP SCI 2750 or equivalent course. Upon successful completion of this course with a grade of C- or better, students will be allowed to declare computer science as their major. This course must be completed successfully within two attempts.

Degree Requirements in Computer Science

Candidates for the B. S. Computer Science degree must complete the following work:

1) Computer Science Core

CMP SCI 1250	Introduction To Computing	3
CMP SCI 2250	Programming And Data Structures	3
CMP SCI 2261	Object-Oriented Programming	3
CMP SCI 2700	Computer Organization and Architecture	3
CMP SCI 2750	System Programming and Tools	3
CMP SCI 3010	Web Programming	3
CMP SCI 3130	Design and Analysis of Algorithms	3
CMP SCI 4250	Programming Languages	3
CMP SCI 4280	Program Translation	3
CMP SCI 4500	Introduction to the Software Profession	3
CMP SCI 4760	Operating Systems	3

2) Computer Science Electives

Select five more elective computer science courses, numbered above 3000.	15
--	----

3) Mathematics and Statistics

MATH 1320	Applied Statistics I	3
MATH 1800	Analytic Geometry And Calculus I	5
MATH 1900	Analytic Geometry And Calculus II	5
MATH 2450	Elementary Linear Algebra	3
MATH 3000	Discrete Structures	3

4) Additional Skills

ENGL 3130	Technical Writing	3
Total Hours		70

There are no related area requirements for majors in Computer Science

BS and MS Dual Degree in Computer Science

The Integrated BS/MS ("2+3") dual degree program involves dual credit for qualified undergraduate Computer Science students. It allows the students to concurrently earn credit for some graduate courses while working on their undergraduate degree, reducing the total hours needed for the subsequent MS degree by up to 12 credit hours.

Entry Requirements

Undergraduate majors can apply for provisional admission to this program if:

1. They have completed at least 60 credit hours of coursework.
2. Their overall GPA is 3.0 or higher.
3. Non-CS majors must at the same time become CS majors.

Upon acceptance to the program in the provisional status, the student continues to work toward his/her undergraduate degree in computer science.

After completion of a minimum of 90 hours and no more than 30 hours away from the undergraduate degree, a provisionally admitted student applies for formal admission to the graduate program. At this point, the student must meet the entry requirements for admission to the M.S. degree in Computer Science.

Degree Requirements

After acceptance into the program, the student continues to complete his/her undergraduate degree. The student is reclassified as a graduate student from the next semester and must pay graduate fees. The student will be assigned a graduate adviser to help optimize the transition to the graduate program. The student continues taking the undergraduate courses but is also allowed to take courses reserved for graduate students. The student completes all the courses to fulfill the requirements to complete his/her M.S. degree in Computer Science – but must also complete the undergraduate requirements. Up to 12 credit hours can be counted towards both the undergraduate and graduate degrees, substantially reducing the hours needed to complete the graduate program by itself.

A student may file for and receive the undergraduate degree at any time when all the requirements are completed, before or in the same semester in which the Master's degree is completed. A student must still complete all the requirements to get a B.S. degree, regardless of whether the student files for the degree or not. A student may choose to finish the studies just with a B.S.

Bachelor of Science in Computing Technology

(pending CBHE approval)

Candidates for the B. S. Computing Technology degree must complete the following courses:

Core

CMP SCI 1250	Introduction To Computing	3
CMP SCI 2250	Programming And Data Structures	3
CMP SCI 2261	Object-Oriented Programming	3
CMP SCI 2700	Computer Organization and Architecture	3
CMP SCI 2750	System Programming and Tools	3
CMP SCI 3010	Web Programming	3
CMP SCI 4010	Advanced Web Development with Java	3
CMP SCI 4500	Introduction to the Software Profession	3
CMP SCI 4610	Database Management Systems	3
INFSYS 3844	Developing Business Applications In .NET	3
INFSYS 3868	Secure Software Development	3

Computer Science Electives

Select five more elective computer science courses, numbered above 3000	15
---	----

Mathematics and Statistics

MATH 1320	Introduction to Probability and Statistics	3
MATH 1800	Analytic Geometry And Calculus I	5
MATH 2300 or MATH 3000	Introduction to Discrete Structures Discrete Structures	3

Additional Skills

ENGL 3130	Technical Writing	3
Total Hours		62

There are no related area requirements for majors in Computing Technology.

Certificate in Data Science

The certificate program provides basic training on skills required for working in growing and popular fields involving data and data analysis. It provides both statistical and computational background while also allowing to focus on specific technologies. A student pursuing this certificate can choose from one of the two tracks, the computational track and the statistical track. Each track consists of three required courses (9 credit hours) plus three additional elective courses (9 credit hours).

Required Courses for the Computational Track:

CMP SCI 4340	Introduction to Machine Learning	3
CMP SCI 4342	Introduction to Data Mining	3
Choose one from the following:		3
MATH 4005	Exploratory Data Analysis with R	
MATH 4200	Mathematical Statistics I	

Required Courses for the Statistical Track:

MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3
Choose one from the following:		3
MATH 4250	Introduction to Statistical Methods in Learning and Modeling	
CMP SCI 4340	Introduction to Machine Learning	

Electives for both tracks:

Select additional three courses from the following:		9
CMP SCI 4030	Introduction to Intelligent Web	
CMP SCI 4300	Introduction to Artificial Intelligence	
CMP SCI 4320	Introduction to Evolutionary Computation	
CMP SCI 4340	Introduction to Machine Learning	
CMP SCI 4342	Introduction to Data Mining	
CMP SCI 4370	Introduction to Biological Data Science	
CMP SCI 4390	Introduction to Deep Learning	
MATH 4005	Exploratory Data Analysis with R	
MATH 4090	Introduction to High-dimensional Data Analysis	
MATH 4200	Mathematical Statistics I	

MATH 4210	Mathematical Statistics II
MATH 4220	Bayesian Statistical Methods
MATH 4225	Introduction to Statistical Computing
MATH 4250	Introduction to Statistical Methods in Learning and Modeling
MATH 4260	Introduction to Stochastic Processes

Residency requirement: of the required six courses at least five must be taken at the University of Missouri – St. Louis. Elective courses may be substituted with the permission of the program director. For more information, contact the department chair or email info@arch.umsml.edu.

Certificate in Internet and Web

The undergraduate Certificate in Internet and Web is a six-course (18 credit hours) program. It is designed to provide a broad training in technologies related to the Internet and Web, with flexibility allowing a student to satisfy specific interests. A minimum GPA of 2.5 is required for admission.

Required:

CMP SCI 3010	Web Programming	3
CMP SCI 4010	Advanced Web Development with Java	3
CMP SCI 4011	Client-Side Technologies	3
CMP SCI 4012	Introduction to Enterprise Web Development	3

Choose two of the following:

CMP SCI 4020	Introduction to Android Apps: Android Fundamentals	3
CMP SCI 4030	Introduction to Intelligent Web	3
CMP SCI 4610	Database Management Systems	3
CMP SCI 4730	Computer Networks and Communications	3
CMP SCI 4750	Introduction to Cloud Computing	3
INFSYS 3846	E-Commerce	3

Total Hours 18

A minimum of four courses must be taken in residence at UMSL. Courses may be substituted with the permission of the department. For more information, students can contact the department chair or email info@arch.umsml.edu.

Certificate in Mobile and Ubiquitous Computing

The undergraduate Certificate in Mobile Apps and Ubiquitous Computing is a six-course (18 credit hours) program. It is designed to provide training in technologies and framework for mobile apps and computing. A minimum GPA of 2.5 is required for admission.

Required Courses:

CMP SCI 4020	Introduction to Android Apps: Android Fundamentals	3
CMP SCI 4220	Introduction to iOS Programming and Apps	3
CMP SCI 4222	iOS Apps	3
CMP SCI 4792	Mobile and Ubiquitous Computing	3
Choose two of the following:		6

CMP SCI 4010	Advanced Web Development with Java	3
CMP SCI 4610	Database Management Systems	3
CMP SCI 4750	Introduction to Cloud Computing	3
Total Hours		18

A minimum of four courses must be taken in residence in the Department of Mathematics and Computer Science at UMSL. Courses may be substituted with the permission of the department. For more information, students can contact the department chair or email info@arch.umsml.edu.

Certificate in Cybersecurity

The Undergraduate Certificate in Cybersecurity is a six-course (18 credit hours) interdisciplinary studies program. It is designed to help students from all backgrounds achieve a foundation in information security. It provides students the flexibility to focus on technical and/or managerial aspects of computer, software, network, and information security. With primary courses offered by Computer Science and Information Systems departments, the program also allows students to choose from a range of electives based on student interests. This certificate serves a broad group of managers, technical specialists, and professionals with or without a bachelor's degree. A prior background in information security is not required to enter this program. A minimum GPA of 2.5 is required for admission.

Requirements

All students must take three required courses and three electives (at least one elective must be in Computer Science)

Required Courses

INFSYS 3848	Introduction to Information Security	3
CMP SCI 4730	Computer Networks and Communications	3
or INFSYS 3842	Data Networks and Security	3
CMP SCI 4782	Information Security	3
or INFSYS 3858	Advanced Security and Information Systems	3

Electives

Choose three of the following (at least one must be a CMP SCI course):		9
CMP SCI 4020	Introduction to Android Apps: Android Fundamentals	3
CMP SCI 4222	iOS Apps	3
CMP SCI 4700	Computer Forensics	3
CMP SCI 4750	Introduction to Cloud Computing	3
CMP SCI 4780	Computer and Network Security	3
INFSYS 3868	Secure Software Development	3
INFSYS 3878	Information Security Risk Management and Business Continuity	3
Total Hours		18

Students may substitute the above courses with other courses upon approval by the program adviser in either the Computer Science or Information Systems department. In all cases, 18 hours are needed to complete the Undergraduate Certificate in Cybersecurity. A minimum of four courses must be taken in residence at UMSL. Students may

not receive both the Undergraduate and the Graduate Certificate in Cybersecurity.

For more information, students can contact the program directors at cybersecurityUMSL@umsl.edu.

Minor Requirements

The department offers minors in computer science, mathematics, and statistics. All courses presented for any of these minors must be completed with a grade of C- or better.

Minor in Computer Science

The requirements for the minor are:

CMP SCI 1250	Introduction To Computing	3
CMP SCI 2250	Programming And Data Structures	3
Select three additional computer science courses numbered 2000 or above.		9
Total Hours		15

A minimum of two computer science courses numbered above 2000 must be taken in residence in the Department of Mathematics and Computer Science at UMSL.

Admission

Applicants must meet the general admission requirements of the Graduate School, described elsewhere in this Bulletin. Additional admission requirements for specific programs are listed below.

Master of Science in Computer Science

Candidates for the M.S. degree in Computer Science must complete 30 hours of course work, subject to the Graduate School regulations. Of these, at least 18 hours must be numbered 5000 or above, with at least one course numbered 6000 or above, chosen with the prior approval of the Graduate Director. All courses numbered below 5000 must be completed with grades of at least B-. Outside computer science, up to 6 hours of related course work is allowed upon permission of the Graduate Director.

Students must satisfy all of the following core requirements:

CMP SCI 4760	Operating Systems	3
CMP SCI 4250	Programming Languages	3
CMP SCI 5700	Computer Systems	3
CMP SCI 5500	Software Engineering	3
CMP SCI 5130	Advanced Data Structures And Algorithms	3
Total Hours		15

Waiving or substituting for a specific requirement can be done on the basis of prior course work or experience at the discretion of the Graduate Director, but it will not reduce the total hours required for the degree.

Additionally, students must attend at least five different seminars or colloquium presentations in the department.

Thesis Option

Students may choose to write an M.S. thesis under the direction of a faculty member in the Department of Mathematics and Computer Science. A thesis is not, however, required for this degree. A

student who wishes to write a thesis should enroll in 6 hours of CMP SCI 6900, Thesis. Students writing an M.S. thesis must defend their thesis in an oral exam administered by a committee of three department members which includes the thesis director.

Courses

CMP SCI 1011 Introduction to the Internet and World Wide Web: 3 semester hours

Intended for any student wishing to utilize the Internet and World Wide Web more effectively. Topics include networking basics, the Internet and World Wide Web, browsers, search engines, Web Services, utilities, tools, online privacy and security. Students will learn to develop a personal web page using skills acquired in the course.

CMP SCI 1012 Learning to Program Using Virtual Worlds: 3 semester hours

Introduces modern programming principles without requiring the knowledge of a traditional programming language. Instead, this course utilizes a novel graphical approach that enables the student to create, populate, and manipulate virtual 3-dimensional worlds which resemble video games. The development of these worlds allows students to gain direct experience and skills in using computers to solve problems. Students will create worlds of varying complexity.

CMP SCI 1250 Introduction to Computing: 3 semester hours

Prerequisites: MATH 1030 or MATH 1045 with B- or better, or MATH 1100, or MATH 1800, or a 70% on the proctored UMSL ALEKS Math Placement obtained at most one year prior to enrollment in this course. This course provides an introduction to the concepts of computation, problem solving, and computer systems. It covers fundamental programming constructs, basic data types, and modularization using a modern high level language. Problem solving skills are developed through a progression of programming projects.

CMP SCI 2250 Programming and Data Structures: 3 semester hours

Prerequisite: CMP SCI 1250. Continuation of CMP SCI 1250. Discusses properties and implementation of abstract data types such as lists, trees, stacks and queues. Introduces procedural and class abstraction, basic program architecture, use of interfaces, modular programming, and file processing.

CMP SCI 2261 Object-Oriented Programming: 3 semester hours

Prerequisite: CMP SCI 2250. Introduces object-oriented concepts, terminology, and notation (UML) using Java. Covers encapsulation, classes, objects, inheritance, and the use of class libraries. Additional topics may include graphical user interfaces, applets, and related tools and technologies.

CMP SCI 2700 Computer Organization and Architecture: 3 semester hours

Prerequisites: CMP SCI 1250 and CMP SCI 2250 (CMP SCI 2250 can be taken concurrently). This course introduces details of computer systems from architectural and organizational points of view. It covers data representation, basic digital logic circuits, memory types and hierarchies, I/O and storage devices, CPU architectures such as RISC, CISC, parallel, and multi-core.

CMP SCI 2750 System Programming and Tools: 3 semester hours

Prerequisites: CMP SCI 2250 and CMP SCI 2700 (CMP SCI 2700 can be taken concurrently). This course covers systems programming, scripting, libraries, utilities, and development tools. Additional programming topics include piping, binary files, exception handling, command-line arguments and symbolic debugging. This course also explores tools available in the Unix/Linux environments.

CMP SCI 3010 Web Programming: 3 semester hours

Prerequisites: CMP SCI 2261 (or concurrent enrollment). This course provides a survey of current Web technologies including markup languages (such as HTML/XHTML, CSS, XML), client side languages (such as JavaScript), server side languages (such as PERL, PHP), and Web protocols. Client-server computing projects are a course requirement.

CMP SCI 3130 Design and Analysis of Algorithms: 3 semester hours

Prerequisites: CMP SCI 2250, MATH 1320, and MATH 3000. This course addresses the design and analysis of fundamental algorithms in computer science. Studies basic sorting algorithms, priority queues, order statistics, search trees, and hash tables. Analysis techniques may involve time and space complexity analysis of both iterative and recursive algorithms, analysis of algorithm correctness, and amortized complexity analysis. Additional topics may include data compression, string manipulation, greedy algorithms, dynamic programming, and graph traversal.

CMP SCI 3200 .NET Framework: 3 semester hours

Prerequisites: CMP SCI 3010. This course introduces the .NET framework and related languages and technologies. Topics will include Visual Studio and C# for OOP and web applications. Additional topics may include ASP.NET with MVC, data access, and windows communication.

CMP SCI 3410 Video Game Design and Development: 3 semester hours

Prerequisites: CMP SCI 2261. This course covers major aspects of the design and development of video games, including world/level design, game UI design, game character design, game engine programming, 2D/3D modeling and rendering, game physics and animation. This is a project-based course in which students learn to apply acquired knowledge and skills to building a video game in a team environment.

CMP SCI 3710 Assembly Language Programming: 3 semester hours

Prerequisite: CMP SCI 2700. Explores machine architecture concepts and principles through a study of assembly language programming. Topics covered include integer and floating point arithmetic, procedures, conditional processing, strings, macros, and interfaces to high level languages. Programming projects using a commercially available assembly language will be required.

CMP SCI 3760 Cyber Threats and Defense: 3 semester hours

Prerequisites: CMP SCI 2250. This course provides students with the basic foundation knowledge in various cyber threats, defense methods and mechanisms. For cyber threats, the course uses an adversary model (resources, capabilities, intent, motivation, access) to cover threats such as password cracking, backdoors, trojans, viruses, wireless attacks, sniffing, spoofing, session hijacking, denial of service, DDoS, BOTs, MAC spoofing, web app attacks, zero-day exploits, and vulnerabilities that enable them. Cyber threat topics include attack timing, social engineering, attack indication, attack trees, insider problem, covert channels, and threat information sources (e.g., CERT). Typical cyber defense mechanisms will also be covered including intrusion detection, honeypot and honeynets, network monitoring and traffic analysis, access control, DMZ and proxies, network hardening.

CMP SCI 3780 Software Security: 3 semester hours

Prerequisites: CMP SCI 2261, CMP SCI 2750, and CMP SCI 3010. This course introduces the basic software security principles and pitfalls, including topics such as buffer, integer and string problems, runtime errors, SQL and command injection. Additional topics may include data protection, secure file access, password and network security.

CMP SCI 3990 Undergraduate Internship in Computer Science: 3 semester hours

Prerequisites: Consent of Advisor. The internship provides for a student to attain field experience in an organization related to Computer Science. A student is engaged off-campus for an assignment of at least 320 hours working on a project as directed by his/her supervisor in the host organization. The project should be approved by the student's academic advisor, or a designated faculty member, who will monitor the student's progress. The course cannot be repeated for credit.

CMP SCI 4010 Advanced Web Development with Java: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 3010; or graduate standing. This course covers more advanced Java topics, along with related concepts and technologies for Web development. Topics may include database connectivity, multi threading, security, networking, MVC pattern, testing and source control for Java applications, and server-side topics such as servlets and web servers.

CMP SCI 4011 Client-Side Technologies: 3 semester hours

Prerequisites: CMP SCI 3010. This course explores in depth the current state-of-the-art front-end, client-side technologies, focusing on JavaScript. Topics may include MongoDB, AngularJS, React, jQuery, Node.js, Express.js, and CSS.

CMP SCI 4012 Introduction to Enterprise Web Development: 3 semester hours

Prerequisites: CMP SCI 4010. This course covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

CMP SCI 4020 Introduction to Android Apps: Android Fundamentals: 3 semester hours

Prerequisites: CMP SCI 4010, or consent of the instructor. This course covers the fundamental programming principles, software architecture and user experience considerations underlying handheld software applications and their development environments. Involves in-depth, hands-on examples, implemented on the Android Platform, and discussion of security. Credit not granted for both CMP SCI 4020 and CMP SCI 5020.

CMP SCI 4030 Introduction to Intelligent Web: 3 semester hours

Prerequisites: CMP SCI 3010 and CMP SCI 3130. This course covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

CMP SCI 4140 Theory of Computation: 3 semester hours

Prerequisites: CMP SCI 3130 or graduate standing. This course provides an introduction to the theory of computation. It describes basic computational models, such as finite state machines, pushdown automata, Turing machines and grammars. It also covers the concept of nondeterministic computation and the relationships between different computational models. Additionally it discusses decidability, reducibility, and classification of problems into complexity classes based on their time and space complexity, such as P, NP, and PSPACE.

CMP SCI 4220 Introduction to iOS Programming and Apps: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 2750; or graduate standing. This course will use Swift for building iOS apps. It also introduces Xcode, Interface Builder, basic design patterns like MVC and delegation, and core libraries for Swift and iOS. Additional topics may include network communication, data persistence, basic animation, and mapping. This is a project-oriented class that will require significant use of a Mac with Xcode installed.

CMP SCI 4222 iOS Apps: 3 semester hours

Prerequisites: CMP SCI 4220 or consent of the instructor. This course focuses on building more sophisticated iOS apps. May include networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

CMP SCI 4250 Programming Languages: 3 semester hours

Prerequisites: CMP SCI 2261 or graduate standing. This course studies the principles, approaches, and trade-offs in modern programming languages, including a comparative study of syntax, semantics, and pragmatics. It also examines major programming paradigms: object-oriented, imperative, functional and logic.

CMP SCI 4280 Program Translation: 3 semester hours

Prerequisites: CMP SCI 2700, CMP SCI 2750, CMP SCI 3130, and CMP SCI 4250, or graduate standing. This course focuses on methods, techniques, and mechanisms used to create the abstraction from high level programming to machine level execution. Using program translation as an example of a complex task, this course also teaches how to manage and develop solutions for complex programming problems using modular incremental development and testing using an individual semester long project.

CMP SCI 4300 Introduction to Artificial Intelligence: 3 semester hours

Prerequisites: CMP SCI 3130. This course provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications. Credit cannot be granted for both CMP SCI 4300 and CMP SCI 5300.

CMP SCI 4320 Introduction to Evolutionary Computation: 3 semester hours

Prerequisites: CMP SCI 2261, CMP SCI 2750 and CMP SCI 3130. This course introduces the concepts of nature-inspired problem solving with artificial evolution using selection, crossover, mutation and inheritance. It discusses applications of evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms, evolutionary programming, evolution strategies, and genetic programming. Credit not granted for both CMP SCI 4320 and CMP SCI 5320.

CMP SCI 4340 Introduction to Machine Learning: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 3130. This course provides an introduction to machine learning in the context of applications such as data mining, natural language processing, and adaptive computer systems. The course reviews several supervised, unsupervised, and reinforcement machine learning techniques such as naive Bayes networks, clustering, and decision trees. Selected concepts in computational learning theory may also be covered. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

CMP SCI 4342 Introduction to Data Mining: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 3130. This course provides an introduction to data mining principles, algorithms and applications. Topics may include data preprocessing, data transformation, similarity and dissimilarity measures, data representation, classification techniques, association analysis, cluster analysis, regression, dimension reduction, and anomaly detection. Credit not granted for both CMP SCI 4342 and CMP SCI 5342.

CMP SCI 4370 Introduction to Biological Data Science: 3 semester hours

Prerequisites: CMP SCI 3130 or consent of instructor. This course provides an introduction into several key areas of biological data science, with a focus upon genetic data. Relevant background topics in genetics, current issues, and a variety of available resources will be explored. Upon successful completion of this course, the student will be able to evaluate algorithms for analyzing genetic data, including assessments of sources of errors and analysis of time and space complexity; address shortcomings in existing approaches; and implement efficient and effective software for exposing information hidden in genetic data. Credit cannot be granted for both CMP SCI 4370 and CMP SCI 5370.

CMP SCI 4390 Introduction to Deep Learning: 3 semester hours

Prerequisites: CMP SCI 3130 or consent of instructor. This course introduces mathematical foundations for deep learning, and follows with practical applications using selected domains such as image classification or protein predictions. It also covers dense neural networks, convolutional neural networks, recurrent neural networks, and other state-of-the-art networks. Credit cannot be granted for both CMP SCI 4390 and CMP SCI 5390.

CMP SCI 4410 Introduction to Computer Graphics: 3 semester hours

Prerequisites: CMP SCI 2250 and MATH 2450. This course covers the theoretical foundation and algorithms for computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects, using standard graphics API. A brief discussion of special graphics hardware, such as GPU, may be included. Credit cannot be granted for both CMP SCI 4410 and CMP SCI 5410.

CMP SCI 4420 Introduction to Digital Image Processing: 3 semester hours

Prerequisites: MATH 1900, MATH 2450, CMP SCI 2750, and CMP SCI 3130. This course focuses on image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

CMP SCI 4500 Introduction to the Software Profession: 3 semester hours

Prerequisites: CMP SCI 2261, CMP SCI 3010, and MATH 3000. This course focuses on software development and on the skills required for success in the software profession. Topics related to software development may include software process, models and views, software architectures, documentation, and testing strategies. Topics related to the profession may include ethics, licensing, copyright, trademarks, and professional conduct. Individual and group projects, research, and presentations may be required in this capstone course.

CMP SCI 4520 Introduction to Object-Oriented Analysis and Design: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 3130. This course covers object-oriented development, using UML and following an agile process. It discusses elements of analysis, requirements, design, implementation and deployment, such as use cases, static and dynamic models, patterns, and frameworks. This course includes a semester long project. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

CMP SCI 4610 Database Management Systems: 3 semester hours

Prerequisites: CMP SCI 3010 and MATH 3000; or graduate standing. This course focuses on database theory and applications, with emphasis on the relational model. Topics include database design, modeling, file systems, indexing, integrity constraints, relational algebra, normalization, transaction processing, and concurrency control. Students are exposed to emerging DBMS technologies and applications. Several programming projects will be required using a popular SQL server.

CMP SCI 4700 Computer Forensics: 3 semester hours

Prerequisites: CMP SCI 2750 and CMP SCI 3010; or graduate standing. This course explores topics and methodologies for examining digital evidence, along with some principles of the investigative process. Includes memory, file system, operating system, network, and mobile device forensics. This course addresses both theory and hands-on aspects for conducting digital forensic examinations.

CMP SCI 4730 Computer Networks and Communications: 3 semester hours

Prerequisites: CMP SCI 2750 and MATH 1320; or graduate standing. This course provides a broad overview of computer networks and communications. Covers the fundamental principles and protocols across the whole layering structure of the Internet protocol stack. A top-down approach covers multiple topics including network application layer, transport layer, network layer, link layer, and physical layer protocols. May also include a range of related technologies such as WWW, HTTP, FTP, DNS, SMTP, TCP, UDP, ICMP, IPv4, IPv6, OSPF, RIP, BGP, IEEE 802.11 (WiFi), cellular networks, LANs, Ethernet, CSMA/CD, CDMA, multimedia networking, network management, and security in Internet.

CMP SCI 4732 Introduction to Cryptography for Computer Security: 3 semester hours

Prerequisites: MATH 3000 or consent of instructor. This course provides an introduction to cryptography as it applies to computer security. It describes cryptographic code-making and code-breaking, and how they are integrated within larger security systems. Topics include symmetric encryption algorithms like AES, asymmetric encryption using prime number factorization and elliptic curves, message authentication codes, key exchange protocols and attacks on all these systems. Additional topics may include onion networks and blockchain technology, as well as possible attacks on those systems. Credit cannot be granted for more than one of CMP SCI 4732, CMP SCI 4780, and CMP SCI 5732.

CMP SCI 4740 Introduction to High Performance Computing: 3 semester hours

Prerequisites: CMP SCI 2750 and CMP SCI 3130. This course introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures. Credit not granted for both CMP SCI 4740 and CMP SCI 5740.

CMP SCI 4750 Introduction to Cloud Computing: 3 semester hours

Prerequisites: CMP SCI 2750. This course provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

CMP SCI 4760 Operating Systems: 3 semester hours

Prerequisites: CMP SCI 2750 and CMP SCI 3130; or graduate standing. This course covers the structure of a generic operating system, considering in detail the algorithms for interprocess communication, process scheduling, resource management, memory management, file systems, and device management. It presents examples from contemporary operating systems and requires practical projects implemented within a modern operating system or simulator environment.

CMP SCI 4780 Computer and Network Security: 3 semester hours

Prerequisites: CMP SCI 4730 or graduate standing. This course provides a broad overview of computer and network security technologies and concerns from multiple perspectives, such as cryptography, Public Key Infrastructures (PKI), hashes and message digests, computer viruses and malware, email security, TCP/IP security, IPSec, Secure Socket Layer (SSL), Transport Layer Security (TLS), Virtual Private Networks (VPN), Firewall, AAA (Authentication, Authorization, Accounting), wireless and mobile systems security, secure identifications (IDs), cloud security, privacy and integrity, network attacks, system monitoring, and Intrusion Detection System (IDS). Management and human factors related to security will also be discussed.

CMP SCI 4782 Information Security: 3 semester hours

Prerequisites: CMP SCI 4730 or CMP SCI 4732 or CMP SCI 4780 or consent of instructor. This course covers topics related to maintaining security in an organizational infrastructure, including risk analysis of the environment, access level and control including multi-factor authentication, and detection capabilities to ensure adequate security monitoring. Additional topics may include network level protections, firewalls, intrusion detection/prevention systems, securing web and mobile applications, securing cloud implementations, and overall architectural considerations for system security. Credit not granted for both CMP SCI 4782 and CMP SCI 5782.

CMP SCI 4792 Mobile and Ubiquitous Computing: 3 semester hours

Prerequisites: CMP SCI 4730 or consent of instructor. This course covers mobile and wireless networking and provides a comprehensive treatment of wireless data and telecommunication networks. Topics include recent trends in mobile and wireless networking, wireless coding and modulation, wireless signal propagation, wireless local area networks, millimeter wave gigabit wireless networks, vehicular wireless networks, white spaces, Bluetooth and Bluetooth Smart, wireless personal area networks, wireless protocols for Internet of Things (IoT), and cellular networks.

CMP SCI 4880 Individual Studies: 1-3 semester hours

Prerequisites: Consent of instructor. This course allows a student to pursue individual studies under the supervision of a faculty member. It may include development of a software project. The course may be repeated for credit.

CMP SCI 4890 Topics in Computer Science: 3 semester hours

Prerequisites: Consent of the Instructor. This course covers a special topic in computer science to be determined by recent developments in the field and the interests of the instructor. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

CMP SCI 5012 Enterprise Web Development: 3 semester hours

Prerequisites: CMP SCI 4010 or consent of instructor. Covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

CMP SCI 5020 Android Apps: Android Fundamentals: 3 semester hours

Prerequisites: CMP SCI 4010 or consent of instructor. Covers the fundamental programming principles, software architecture and user experience considerations underlying handheld software applications and their development environments. Involves in-depth, hands-on examples, implemented on the Android Platform, and discussion of security. Credit not granted for both CMP SCI 4020 and CMP SCI 5020.

CMP SCI 5030 Intelligent Web: 3 semester hours

Prerequisite: Graduate standing. This course covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

CMP SCI 5130 Advanced Data Structures and Algorithms: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course covers analysis of time and space complexity of iterative and recursive algorithms along with performance bounds, design of data structures for efficient performance, sorting algorithms, probabilistic algorithms, divide and conquer strategies, various algorithms on graphs, and np completeness.

CMP SCI 5222 Advanced iOS Apps: 3 semester hours

Prerequisites: CMP SCI 4220 or consent of instructor. Focuses on building sophisticated apps using iOS. Will cover recent developments in networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

CMP SCI 5300 Artificial Intelligence: 3 semester hours

Prerequisites: Graduate standing. This course provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications. Credit cannot be granted for both CMP SCI 4300 and CMP SCI 5300.

CMP SCI 5320 Evolutionary Computation: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course introduces the concepts of nature-inspired problem solving with artificial evolution using selection, crossover, mutation and inheritance. It discusses applications of evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms, evolutionary programming, evolution strategies, and genetic programming. Credit not granted for both CMP SCI 4320 and CMP SCI 5320.

CMP SCI 5340 Machine Learning: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course provides an introduction to machine learning in the context of applications such as data mining, natural language processing, and adaptive computer systems. The course reviews several supervised, unsupervised, and reinforcement machine learning techniques such as naive Bayes networks, clustering, and decision trees. Selected concepts in computational learning theory may also be covered. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

CMP SCI 5342 Data Mining: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course provides an introduction to data mining principles, algorithms and applications. Topics may include data preprocessing, data transformation, similarity and dissimilarity measures, data representation, classification techniques, association analysis, cluster analysis, regression, dimension reduction, and anomaly detection. Credit not granted for both CMP SCI 4342 and CMP SCI 5342.

CMP SCI 5370 Biological Data Science: 3 semester hours

Prerequisites: Graduate standing in Computer Science or consent of instructor. This course provides an introduction into several key areas of biological data science, with a focus upon genetic data. Relevant background topics in genetics, current issues, and a variety of available resources will be explored. Upon successful completion of this course, the student will be able to evaluate algorithms for analyzing genetic data, including assessments of sources of errors and analysis of time and space complexity; address shortcomings in existing approaches; and implement efficient and effective software for exposing information hidden in genetic data. Credit cannot be granted for both CMP SCI 4370 and CMP SCI 5370.

CMP SCI 5390 Deep Learning: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course reviews a typical machine learning recipe, mathematical foundations for deep learning, and provides an introduction to deep learning. Topics include dense neural networks, convolutional neural networks, and recurrent neural networks. The course will cover building, training, and using deep neural networks for solving various machine learning problems like image classification and protein contact prediction. Credit cannot be granted for both CMP SCI 4390 and CMP SCI 5390.

CMP SCI 5410 Computer Graphics: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course covers the theoretical foundation and algorithms of computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects, using standard graphics API. A brief discussion of special graphics hardware, such as GPU, may be included. Credit cannot be granted for both CMP SCI 4410 and CMP SCI 5410.

CMP SCI 5420 Digital Image Processing: 3 semester hours

Prerequisites: Graduate Standing in Computer Science. This course focuses on image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

CMP SCI 5500 Software Engineering: 3 semester hours

Prerequisite: Graduate standing. Introduces software engineering as a discipline, discusses stages of the software life cycle, compares development models such as waterfall, prototyping and incremental/iterative, covers requirements analysis, effort and cost estimation, compares structured and object-oriented analysis and design methods. Discusses verification/validation, quality assurance, software reliability, testing methods, maintenance, documentation, project management and team structure, metrics, and available tools.

CMP SCI 5520 Object Oriented Analysis and Design: 3 semester hours

Prerequisite: Graduate Standing in Computer Science. This course covers object-oriented development, illustrated with a visual modeling language and following an agile process. Discusses elements of analysis, requirements, design, implementation, and deployment such as use cases, static and dynamic diagrams, patterns, and frameworks. This course includes a semester long project starting with requirements and culminating with deployment. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

CMP SCI 5620 Intelligent Information Retrieval: 3 semester hours

Prerequisites: CMP SCI 4300 or CMP SCI 5300. This course studies techniques for analysis of information by statistical, syntactical, and logical methods. Topics related to multimedia information are also discussed.

CMP SCI 5700 Computer Systems: 3 semester hours

Prerequisite: Graduate standing in Computer Science. This course focuses on parallel computing architectures, including RISC, pipelining, vector processing, SIMD, MIMD, and array processing. It introduces different memory and I/O subsystems, hardware description languages, and it demonstrates performance enhancement using different architectures studied.

CMP SCI 5732 Cryptography for Computer Security: 3 semester hours

Prerequisites: Graduate standing. This course provides an introduction to cryptography as it applies to computer security. It describes cryptographic code-making and code-breaking, and how they are integrated within larger security systems. Topics include symmetric encryption algorithms like AES, asymmetric encryption using prime number factorization and elliptic curves, message authentication codes, key exchange protocols and attacks on all these systems. Additional topics may include onion networks and blockchain technology, as well as possible attacks on those systems. Credit cannot be grant for more than one of CMP SCI 4732, CMP SCI 4780, and CMP SCI 5732.

CMP SCI 5740 High Performance Computing: 3 semester hours

Prerequisite: Graduate Standing in Computer Science. This course introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures. Credit not granted for both CMP SCI 4740 and CMP SCI 5740.

CMP SCI 5750 Cloud Computing: 3 semester hours

Prerequisites: Graduate standing. Provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

CMP SCI 5782 Advanced Information Security: 3 semester hours

Prerequisites: CMP SCI 4730 or CMP SCI 4732 or CMP SCI 4780 or CMP SCI 5732 or consent of instructor. The topics covered in this course are risk analysis to understand the security requirements of an environment; access controls to understand the level of controls needed for different practical situations, including multi-factor authentication; detection capabilities, to ensure adequate security monitoring for information systems; network level protections, with firewalls, intrusion detection/prevention systems; securing the web and mobile applications and cloud implementations; and overall security architecture to understand how various controls can provide the security-in-depth that is required in the current environment. Credit not granted for both CMP SCI 4782 and CMP SCI 5782.

CMP SCI 5794 Security of IoT Systems: 3 semester hours

Prerequisites: CMP SCI 4730 or consent of the department. This course covers the cutting-edge techniques on the emerging edge cloud and wireless/mobile Internet of Things (IoT) systems. It covers the IoT reference architecture, integrated IoT security architecture, major threats and vulnerabilities with the IoT devices and edge cloud, and defense mechanisms. It includes hands-on labs on both the vulnerabilities and defense of the systems. Credit cannot be granted for both CMP SCI 4794 and CMP SCI 5794.

CMP SCI 5870 Computer Science Seminar: 1-3 semester hours

Prerequisites: Graduate standing. This is a seminar on various topics. Substantial student reading and participation is expected. It may be taken more than once for credit with the consent of the department.

CMP SCI 5880 Computer Science Independent Project: 1-3 semester hours

Prerequisites: Graduate standing and consent of instructor This course offers the student an opportunity to work on an advisor-supervised project, individually or in a group. A student may repeat the course for up to 6 credit hours total, but at most 6 hours can be accumulated for CMP SCI 5880 and CMP SCI 6900.

CMP SCI 5890 Topics in Computer Science: 1-3 semester hours

Prerequisites: Graduate standing. This course offers various topics not offered on a regular basis. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

CMP SCI 5900 Graduate Internship in Computer Science: 3 semester hours

Prerequisites: Consent of Advisor. The internship provides for a student to attain field experience in an organization related to Computer Science. A student is employed off-campus for an assignment of at least 320 hours working on a project as directed by his/her supervisor in the host organization. The project should be approved by the student's academic advisor, or a designated faculty member, who will monitor the student's progress. The student is responsible for having the project supervisor at the company establish contact with the academic advisor to establish schedule and goals, and a procedure to evaluate the goals. The student will submit a written report to the advisor at the end of internship. The course cannot be repeated for credit. Students completing this course will be allowed only up to three hours of Independent Study (CMP SCI 5880).

CMP SCI 6320 Advances in Evolutionary Computation: 3 semester hours

Prerequisites: CMP SCI 5320. This course focuses on some advanced topics in genetic and evolutionary computation (both theory and applications). Topics may include genetic algorithm variants, intelligent metaheuristics, evolutionary machine learning, differential evolution, swarm intelligence, learning classifier systems, and Markov models. A substantial part of the course will be based on selected topics from recent literature. This is a project-based course, with the project typically involving literature search and conducting and reporting research. Projects may involve developing specific applications or implementing a specific model.

CMP SCI 6340 Genetic Programming: 3 semester hours

Prerequisites: CMP SCI 5320. This course provides an in-depth exploration of Genetic programming, including advanced concepts such as scalability, evolution of modularity and regularity, and constrained evolution with CGP, STGP, or CFG-based GP. It may be reading, research, or application oriented.

CMP SCI 6410 Topics in Computer Graphics: 3 semester hours

Prerequisites: CMP SCI 4410 or CMP SCI 5410. This course covers various aspects of advanced graphics techniques, such as geometric modeling, rendering, shading, texturing, and computer animation. The course provides an in-depth study of recent advanced topics in computer graphics.

CMP SCI 6420 Topics In Image Processing and Multimedia: 3 semester hours

Prerequisites: CMP SCI 5420. This course covers new developments in digital image processing, computer vision, and multimedia. Topics to be covered may include image databases, object tracking, and large-scale data visualization.

CMP SCI 6900 Thesis: 1-6 semester hours

Prerequisites: Completion of at least 12 graduate credits and approval of research topic by thesis advisor. This course is designed for those students intending to present a thesis as part of their M.S. program. At most 6 hours can be accumulated for CMP SCI 5880 and CMP SCI 6900.

Criminology and Criminal Justice

General Information

Degrees and Areas of Concentration

The department offers courses leading to the Bachelor of Science, the Master of Arts, and Ph.D. in criminology and criminal justice.

Cooperative Programs

Faculty members in the criminology and criminal justice department hold appointments as fellows in the Center for International Studies and the Women's and Gender Studies Program. Workshops, projects, credit courses, and other social services are brought to the criminal justice community.

Internships

Majors are strongly encouraged to participate in CRIMIN 3280 Internship in Criminology and Criminal Justice, during their junior or senior year. The internship affords students the opportunity to gain experience in a criminal justice agency under the joint supervision of agency personnel and criminology and criminal justice faculty.

Minor in Criminology and Criminal Justice

The minor gives recognition to those students from other major areas who find that criminology and criminal justice courses fit their academic or professional needs and/or interests.

Certificate in Criminology and Criminal Justice

The certificate in Criminology and Criminal Justice is designed to provide students information about criminal behavior and the criminal justice system to advance current careers, prepare for a new career paths, or earn valuable credit toward a Bachelor's degree. The certificate will offer information to gain a solid foundation about career relevant topics that include: policing, security, victim services, juvenile justice, law, social services, and corrections.

Chair's List

Each year, faculty members nominate undergraduates who have done outstanding work in one or more of their courses to the department's Chair's List. In addition to being nominated by a faculty member, the student must meet a cumulative grade-point average threshold for placement on the Chair's List. The list is featured on the department's website, and the Dean of Arts and Sciences is notified of their accomplishment.

Career Outlook

The orientation of the criminology and criminal justice faculty and of the degree program prepares the graduate to work professionally for local, state, and federal agencies concerned with maintaining public safety by the prevention of crime and apprehension and rehabilitation of offenders. The B.S. in criminology and criminal justice is also advantageous for careers with various social agencies, especially those connected with the juvenile court system, probation and parole, and local police. Many students use the B.S. in criminology and criminal justice as preparation for law school.

The interdisciplinary curricula unify a body of knowledge from criminology, social science, law, public administration, and corrections, and provide the student with an understanding of the assumptions, values, and processes of the system of justice. Many pre-law students choose criminology and criminal justice as an undergraduate major because of the excellent preparation offered for law school. An internship program is offered for college credit. The liaison, supervision, and experience with public agencies that form an integral part of this program help the student arrive at a career decision.

Undergraduate Studies

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 41). Courses used to fulfill the social science or state requirement may not be taken from courses in the major. Foreign language proficiency is not required, although students are encouraged to take foreign language courses. Majors may not take the following courses on a satisfactory/unsatisfactory basis: criminology and criminal justice courses; SOC 3220, Quantitative Techniques in Sociology; or SOC 3230, Research Methods. Additionally, substitutions approved by departmental advisers for these courses may not be taken on a satisfactory/unsatisfactory basis.

Declaring the Criminology and Criminal Justice Major

Students must complete the following courses before declaring the major:

CRIMIN 1100	Introduction to Criminology and Criminal Justice	3
CRIMIN 1110	Theories of Crime	3
CRIMIN 2210	Research Methods in Criminology and Criminal Justice	3
CRIMIN 2220	Statistical Analysis In Criminology And Criminal Justice ¹	4

¹ Students must successfully complete CRIMIN 2220 with a grade of C- or better within three attempts.

Degree Requirements

Courses used to fulfill the social science or state requirements may not be taken from courses in the major. Students may register for 3000-5000 level courses only after completing ENGL 3100 (Advanced Expository Writing).

Students may register for 3000-5000 level courses only after prerequisites have been satisfied or after obtaining a signature from the adviser in criminology and criminal justice or consent of the instructor.

Criminology majors may not take course numbers 1100, 2260, or 3345 offered through UM-Independent Studies to fulfill degree requirements in the major.

Expected Learning Outcomes

- Acquire basic knowledge of the theories, methods and substance of issues in criminology and criminal justice.
- Develop critical thinking skills through the application of criminological theory and social science research methods.
- Develop fundamental understanding of interdisciplinary underpinnings (e.g., from sociology, psychology, political science, economics) of criminology and criminal justice issues and policies.
- Acquire knowledge about the structure and functioning of the fundamental institutions (e.g., legislatures, police, punishment, supervisory) that are part of criminal justice systems.
- Acquire understanding of the role of research and its application for informing policies about criminal justice issues.

Core Curriculum

Bachelor of Science in Criminology and Criminal Justice candidates must complete the core curriculum listed below:

Core Curriculum

The following courses in criminology and criminal justice are required:	22
CRIMIN 1100	Introduction to Criminology and Criminal Justice
CRIMIN 1110	Theories of Crime
CRIMIN 1120	Criminal Law
CRIMIN 2130	Criminal Justice Policy
CRIMIN 2210	Research Methods in Criminology and Criminal Justice

CRIMIN 2220	Statistical Analysis In Criminology And Criminal Justice	
CRIMIN 4390	Seminar in Criminology and Criminal Justice	
Select one of the following:		3
CRIMIN 2240	Policing	
CRIMIN 2250	Courts	
CRIMIN 2260	Corrections	
Select one of the following courses in Criminology and Criminal Justice:		3
CRIMIN 3305	Comparative Criminology and Criminal Justice	
CRIMIN 4325	Gender, Crime, and Justice	
CRIMIN 4330	Violence Against Women	
CRIMIN 4340	Race, Crime, and Justice	
Select three additional CRIMIN courses at the 3000, 4000, or 5000 level:		9
Total Hours		37

Candidates must earn a minimum grade of (C-) in the following courses: CRIMIN 2220 Statistical Analysis in Criminology and Criminal Justice, and CRIMIN 4390 Seminar in Criminology and Criminal Justice.

Candidates must also have a cumulative grade point average of 2.0 or better in the major.

Requirements for the Minor

The minor has been designed to ground students in the basics of criminology and criminal justice.

All minor candidates must take:		3
CRIMIN 1100	Introduction To Criminology And Criminal Justice	
The candidate must then select two of the following:		6
CRIMIN 1110	Theories Of Crime	
CRIMIN 1120	Criminal Law	
CRIMIN 2130	Criminal Justice Policy	
Candidates must then complete 6 hours of criminology and criminal justice course work at the 2000 level or above.		6
Total Hours		15

If used for the minor, candidates must earn a minimum grade of (C-) in the following courses: CRIMIN 2220 Statistical Analysis in Criminology and Criminal Justice, and CRIMIN 4390 Seminar in Criminology and Criminal Justice

Candidates must also have a cumulative grade point average of 2.0 or better in the minor. None of the courses may be taken on a satisfactory/unsatisfactory (s/u) basis.

Certificate in Criminology and Criminal Justice

The certificate in Criminology and Criminal Justice is designed to provide students information about criminal behavior and the criminal justice system to advance current careers, prepare for a new career paths, or earn valuable credit toward a Bachelor's degree. Students will gain a solid

foundation about career relevant topics that include: policing, security, victim services, juvenile justice, law, social services, and corrections.

Required Coursework

The certificate consists of 6 courses for a total of 18 hours met through completing four blocks of study.

Block One

All students must complete the following course:

CRIMIN 1100	Introduction to Criminology and Criminal Justice	3
-------------	--	---

Block Two 3

Select at least one of the following three courses:

CRIMIN 1110	Theories of Crime	
CRIMIN 1120	Criminal Law	
CRIMIN 2130	Criminal Justice Policy	

Block Three 3

Select at least one of the following three courses:

CRIMIN 2240	Policing	
CRIMIN 2250	Courts	
CRIMIN 2260	Corrections	

Block Four 6

Select at least two Criminology and Criminal Justice courses at the 3000 level or higher with the exception of CRIMIN 3280

One additional CRIMIN course	3
------------------------------	---

Total Hours	18
-------------	----

Graduate Studies

Master of Arts in Criminology and Criminal Justice

The department offers a Master of Arts degree in Criminology and Criminal Justice, which provides students with advanced theoretical and methodological training for research and management careers in criminal justice.

Admission Requirements

The minimum GPA for regular admission to graduate study is 3.0 on a 4-point scale and students are expected to begin their course of study in the Fall semester. Admission is competitive.

Degree Requirements

The M.A. in Criminology and Criminal Justice requires the completion of 33 credit hours, at least 21 of which are required to be in courses housed in the Department of Criminology and Criminal Justice. 12 of these hours represent the core of the curriculum. Students may choose between a thesis and nonthesis course of study. Students whose cumulative GPAs fall below 3.0 after 9 or more hours of work will be placed on probation and given one semester to raise their cumulative GPAs to at least the 3.0 threshold.

Expected Learning Outcomes

- Develop a comprehensive understanding of the theories, methods and substance of issues in criminology and criminal justice and demonstrate an ability to synthesize knowledge in these areas.

- Develop a comprehensive understanding of interdisciplinary underpinnings (e.g., from sociology, psychology, political science, economics) of criminology and criminal justice issues and policies.
- Develop critical thinking and communication skills through the application of criminological theory and social science research methods.
- Develop a comprehensive understanding of the structure and functioning of the fundamental institutions (e.g., legislatures, police, punishment, supervisory) that are part of criminal justice systems.
- Develop comprehensive understanding of the role of research and its application for informing policies about criminal justice issues.

Plan of Study

- Required Coursework (12 hours)

CRIMIN 5415	Foundations Of Criminological Theory (core)	3
CRIMIN 6400	Proseminar (core)	3
CRIMIN 6405	Methods (core)	3
CRIMIN 6410	Statistical Applications In Criminology And Criminal Justice (core)	3

- Three additional Criminology and Criminal Justice seminars at the 6000 level (9; non-core)
- Electives (12 hours)
Twelve elective hours of coursework are required; some or all of these credits may be earned in Criminology and Criminal Justice 6000 level seminars not counted toward the 21 hour requirement. Students may take a maximum of two 4000-level courses in partial fulfillment of this requirement but they must have the prior approval of the Graduate Committee. All electives taken outside the College of Arts and Sciences also must receive prior approval of the Graduate Committee.

Transfer Courses

Transfer courses are evaluated for acceptance on a case-by-case basis subject to the rules and regulations of the Graduate School. A maximum of 11 credit hours earned at other institutions can be credited toward the UMSL M.A. degree in Criminology and Criminal Justice.

Ph.D. Program in Criminology and Criminal Justice

Eligibility

Undergraduate applicants must have a baccalaureate degree or expect one by the end of the academic year in which they apply. Applicants must have a grade point average of 3.0 or greater (on a scale of A = 4.0) for the last 60 hours of undergraduate work. Admission is competitive.

Graduate applicants who have or will have a master's degree must have a grade point average of 3.0 or greater (on a scale of A = 4.0) for their graduate course work.

Application

To consider an applicant for admission, the Department of Criminology and Criminal Justice must have transcripts, three letters of recommendations, GRE scores, statement of purpose, and a writing sample. Applicants with master's degrees should include a chapter of their

thesis. International students whose native language is not English are required to submit scores from the TOEFL examination.

Amount of Course Work

Sixty post-baccalaureate hours of graduate work are required for the Ph.D. More than half of these hours must be completed in residence. A minimum of six credit hours of dissertation research (CRIMIN 7499) are required. Students may enroll for dissertation credits (CRIMIN 7499) only when all other degree requirements have been completed.

Required Courses

CRIMIN 5415	Foundations of Criminological Theory	3
CRIMIN 6400	Proseminar	3
CRIMIN 6405	Methods	3
CRIMIN 6410	Statistical Applications in Criminology and Criminal Justice	3
CRIMIN 6420	Contemporary Criminal Theories	3
CRIMIN 6450	Criminal Justice Process and Policy	3
CRIMIN 6465	Qualitative Research Design	3
CRIMIN 6470	Quantitative Research Design	3
CRIMIN 6471	Evaluating Criminal Justice Interventions	3
CRIMIN 6480	Multivariate Statistics in Criminology	3

Area Courses

At least nine hours beyond those required must be taken at the 5000-level or higher within the CCJ Department.

Electives

Three additional courses beyond the above requirements are taken as elective courses.

Qualifying Examination

Graduate students in the Ph.D. program do not become recognized as Ph.D. candidates until they have passed the qualifying examination. The goals of the qualifying examination are to assess the student's familiarity with substantive literature, theory and methods of criminology and criminal justice and to evaluate the student's intellectual imagination and ability to apply knowledge to broad criminological questions.

Further information about the qualifying exam is available from the department.

The Dissertation

The dissertation is required of all Ph.D. candidates and demonstrates the student's scholarly expertise. The dissertation process formally begins when all other requirements of the Ph.D. program have been met. The dissertation committee assists in selecting and developing the research problem and evaluates the student's work on that problem.

Sample Four Year Plan

First Year		
Fall	Hours Spring	Hours
INTDSC 1003 ¹	1 CRIMIN 1110	3

CRIMIN 3000 + level course	3 Elective or minor	11-12
Elective or minor	9	
	15	14-15

Total Hours: 121-122

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Courses

CRIMIN 1100 Introduction to Criminology and Criminal Justice: 3 semester hours

Introduction to the basic concepts and approaches in the study of criminology and criminal justice. The major components of the criminal justice system are examined.

CRIMIN 1101 Crime and Criminal Justice Today: 1-2 semester hours

This course provides students insight into crime and the criminal justice system in contemporary America. All students, whether enrolled for one or two hours, will complete the same core course requirements. Those students enrolled for two hours will complete additional course work as outlined in the course syllabus.

CRIMIN 1110 Theories of Crime: 3 semester hours

Prerequisite: CRIMIN 1100. Introduction to major theoretical approaches to the study of crime and justice.

CRIMIN 1120 Criminal Law: 3 semester hours

Prerequisite: CRIMIN 1100. Analysis of substantive criminal law, evidence and judicial procedure.

CRIMIN 1150 Violence in America: 3 semester hours

Prerequisites: CRIMIN 1100 or consent of instructor. Overview of patterns and correlates of violence in America. Emphasis on the variety of forms of violent crimes, such as murder, assault, robbery, rape, and gang violence. Includes an examination of violence as a response to lawbreaking.

CRIMIN 1200 Foundations of Law: An Introduction to Legal Studies: 3 semester hours

Same as POL SCI 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

CRIMIN 2130 Criminal Justice Policy: 3 semester hours

Prerequisite: CRIMIN 1100. Introduction to criminal justice policy making, planning and implementation.

CRIMIN 2180 Alcohol, Drugs and Society: 3 semester hours

Same as SOC 2180. Prerequisite: SOC 1010 or PSYCH 1003. This course examines the medical, legal and social aspects of alcohol and drug use. Medical aspects considered include treatment approaches and the role of Physicians in controlling such behavior. In the legal realm, past and present alcohol and drug laws are explored. Cultural and social influences on alcohol and drug use are discussed.

CRIMIN 2210 Research Methods in Criminology and Criminal Justice: 3 semester hours

Prerequisite: CRIMIN 1100. Examination of basic methods of research design, measurement and data collection in criminology and criminal justice.

CRIMIN 2220 Statistical Analysis In Criminology And Criminal Justice: 4 semester hours

Prerequisites: CRIMIN 2210 (may be taken concurrently) and the university math proficiency requirement. This course is an introduction to techniques of quantitative data analysis. Both descriptive and inferential statistics are applied to problems in criminology and criminal justice. Includes a one hour lab.

CRIMIN 2240 Policing: 3 semester hours

Prerequisite: CRIMIN 1100. Overview of current and historical perspectives on the function of American policing. Emphasis on the management of police organizations and relationships with the community.

CRIMIN 2250 Courts: 3 semester hours

Prerequisite: CRIMIN 1100. This course provides an overview of current and historical perspectives on the function of the American courts. Emphasis on the dynamics of courthouse justice, with special attention placed on the roles of the prosecutors, judges, defense attorneys, defendants, victims, and jurors regarding the decisions that impact the adjudication process.

CRIMIN 2251 Youth Gangs: 3 semester hours

Prerequisites: CRIMIN 1100 or consent of instructor. This course provides an overview of research and policy concerning youth gangs. Definitional and methodological issues will be examined, along with both qualitative and quantitative research. Topics include: the causes of gangs and gang involvement; and variations by race, gender, time period, and geography.

CRIMIN 2252 Crime and Punishment: 3 semester hours

Same as PHIL 2252. This course will address fundamental conceptual, ethical, and moral issues that arise in the context of the legal system. Topics may include punishment, pre-trial detention, the death penalty, acquittal of persons who are legally guilty, plea bargaining, moral obligation to obey the law, and laws restricting civil liberties.

CRIMIN 2260 Corrections: 3 semester hours

Prerequisite: CRIMIN 1100. Examination of correctional philosophies and practices. Emphasis on the history of corrections, the formal and informal organization of correctional facilities, inmate rights, and correctional alternatives.

CRIMIN 3043 History Of Crime And Justice: 3 semester hours

Same as HIST 3043. Prerequisites: Junior standing or consent of instructor. The analysis development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison and the juvenile court.

CRIMIN 3209 Forensic Anthropology: 4 semester hours

Same as ANTHRO 3209. Prerequisites: ANTHRO 1005 or BIOL 1102 or consent of instructor. Students learn basic human dental and skeletal anatomy and the methods used by biological anthropologists and archaeologists to collect and analyze human skeletal remains, including how to age and sex skeletal remains, identify ethnic markers, determine stature and handedness, and identify the presence of trauma and/or pathology. Also covers the role of the forensic anthropologist in crime scene investigations and human rights issues. In the weekly lab section students will have an opportunity for hands-on application of techniques to skeletal remains.

CRIMIN 3230 Crime Prevention: 3 semester hours

Prerequisites: Junior standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Examination of situational, social, and legislative approaches to the prevention of crime and delinquency. Emphasis on theories, implementation, and consequences of these approaches.

CRIMIN 3270 Juvenile Justice and Delinquency: 3 semester hours

Prerequisite: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Examination of formal and informal responses to juvenile delinquency. Emphasis on theories of delinquency and the decision-making processes of police, court and probation officials.

CRIMIN 3280 Internship in Criminology and Criminal Justice: 3 semester hours

Prerequisite: Junior standing. Internship under faculty supervision in criminal justice setting. May be repeated for one credit.

CRIMIN 3290 Special Readings: 1-6 semester hours

Prerequisite: Consent of instructor. Individualized study, under regular faculty supervision, designed to meet particular educational needs of selected students.

CRIMIN 3305 Comparative Criminology and Criminal Justice: 3 semester hours

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Analysis of crime and criminal justice systems in selected cultures. Emphasis on the ways in which these cultures define and respond to criminal behavior. Fulfills CRIMIN diversity requirement.

CRIMIN 3310 Computers in Criminal Justice: 3 semester hours

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100; or consent of instructor. This course will critically examine computer crime, cyber-criminology, and the ways in which technology and the Internet facilitate criminal and deviant behavior. Discussion will focus on the types of crime using computer technology, theories addressing digital criminals, and an overview of the criminal justice response to these issues.

CRIMIN 3320 The Death Penalty: 3 semester hours

Prerequisite: CRIMIN 1100. An examination of the history, application, and attitudes toward the death penalty.

CRIMIN 3345 Rights of the Offender: 3 semester hours

Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. Analysis of the objectives of criminal law regarding the rights of persons suspected or convicted of crime. Emphasis on rights regarding the police, the court, and in correctional settings.

CRIMIN 4300 Communities and Crime: 3 semester hours

Same as SOC 4300. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of the sources, consequences, and control of crime within communities. Emphasis on social and ecological theories of crime, and on population instability, family structure, and the concentration of poverty as causes of crime.

CRIMIN 4320 Forms of Criminal Behavior: 3 semester hours

Same as SOC 4320. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Examination of major types of criminal behavior including violent, property, public order, and organizational offenses. Emphasis on theories of and responses to these crimes.

CRIMIN 4325 Gender, Crime, and Justice: 3 semester hours

Same as SOC 4325 and GS 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220 and ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills CRIMIN diversity requirement.

CRIMIN 4330 Violence Against Women: 3 semester hours

Same as GS 4330. Prerequisites: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. This course examines the nature, extent, causes and consequences of various types of violence against women, including rape, sexual assault, stalking, and intimate partner violence. Criminal justice policy and practice regarding violence against women are also examined.

CRIMIN 4335 Probation and Parole: 3 semester hours

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, CRIMIN 2260, and ENGL 3100, or consent of instructor. Analysis of alternatives to incarceration and postincarceration supervision. emphasis on diversion, restitution, and community reintegration.

CRIMIN 4340 Race, Crime, and Justice: 3 semester hours

Same as SOC 4340. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of the involvement of racial minorities in crime and the criminal justice system. Emphasis on group differences in offending, processing, victimization, and employment in criminal justice agencies. Fulfills CRIMIN diversity requirement.

CRIMIN 4345 War Crimes, Genocide, and Justice in the 20th and 21st Centuries: 3 semester hours

Same as SOC 4345, POL SCI 4345, and MVS 4345. Prerequisite: ENGL 3100. This course provides advanced undergraduate and Master's level students a comprehensive overview of the subject of war crimes, crimes against humanity, genocide and legal responses to these crimes in the modern era. The goal of this course is to engage students in sustained, critical thought about these issues and to foster a deeper understanding of both the causes and consequences—legal, social and human—of these egregious crimes.

CRIMIN 4350 Victimology: 3 semester hours

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. Analysis of major perspectives on victimization. Emphasis on patterns of victimization, the role of victims in the generation of crime, and the experience of the victim in the criminal justice system.

CRIMIN 4360 Sociology of Law: 3 semester hours

Same As SOC 4362. Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. The interaction of legal, political and social forces in the US is explored. Course examines historical developments in law and politics in the US, including law and economics, crime policy, socioeconomic inequality, race relations, and state sanctioned punishment. The course considers how America's federalist structure shapes law, politics and social relations. Examines how legal and political institutions establish and shape power relations between social groups.

CRIMIN 4370 Crime, Justice, and the Media: 3 semester hours

Prerequisites: ENGL 3100. This course provides a fresh take on issues of crime and justice through the exploration of media, such as *The Wire*, and its role in shaping the public's perception of crime and justice. Students will learn to synthesize ideas and perspectives about crime and justice as well as critically assess popular media images of crime.

CRIMIN 4380 Special Topics in Criminology and Criminal Justice: 3 semester hours

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100 or consent of instructor. In-depth study of a selected topic in criminology and criminal justice.

CRIMIN 4390 Seminar in Criminology and Criminal Justice: 3 semester hours

Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. In this capstone course, students demonstrate the ability to work independently, integrating theory and research in criminology and criminal justice in a major paper supervised by the instructor.

CRIMIN 4487 Philosophy of Law: 3 semester hours

Same As PHIL 4487. Prerequisites: CRIMIN 1100 and 3 hours of philosophy and/or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment.

CRIMIN 5415 Foundations of Criminological Theory: 3 semester hours

Prerequisites: Graduate standing and consent of instructor. Examination of the history of criminological thought incorporating the major works of such theorists as Bentham, Beccaria, Marx, Durkheim, Lombroso, Sutherland and Merton.

CRIMIN 5533 Philosophy of Law: 3 semester hours

Same as PHIL 5533. Prerequisite: Graduate standing or consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

CRIMIN 6400 Proseminar: 3 semester hours

Prerequisite: Graduate standing. (Must be taken in the first Semester). A critical examination of theoretical, methodological and policy issues in criminology and criminal justice. Focus is on the nature of crime, policing, pretrial processes, adjudication and corrections.

CRIMIN 6405 Methods: 3 semester hours

Prerequisite: Graduate standing and consent of instructor. Examination of basic methods for research design and data collection. Topics include participant observation and interviewing, survey research, aggregate data analysis, and experimental design.

CRIMIN 6410 Statistical Applications in Criminology and Criminal Justice: 3 semester hours

Prerequisite: CRIMIN 6405. Examination of elementary principles of quantitative analysis and their application to crime and justice problems. Topics include univariate, bivariate and multivariate procedures for discrete and continuous data, and a comprehensive introduction to ordinary least squares regression.

CRIMIN 6420 Contemporary Criminal Theories: 3 semester hours

Prerequisite: CRIMIN 5415. Examination of contemporary explanations of crime and criminal justice. Theories covered include strain, control, cultural, labeling, conflict, as well as more recent attempts at theoretical integration and multidisciplinary integration.

CRIMIN 6422 Law Courts, and Public Policy: 3 semester hours

Same as POL SCI 6422. Prerequisite: Graduate Standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate), that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

CRIMIN 6430 Law And Social Control: 3 semester hours

Prerequisites: Graduate standing and consent of instructor. Examination of the relationship between law and other social institutions, the values and interests that are expressed in law and shaped by legal structures and processes, and law as an instrument of public policy, social control and social change. Same as Sociology 5461.

CRIMIN 6436 Comparative Criminology: 3 semester hours

Prerequisite: Graduate Standing. Examination of crime and criminal justice systems in world perspective.

CRIMIN 6440 Nature of Crime: 3 semester hours

Prerequisite: Graduate standing or consent of instructor. Examination of patterns and correlates of crime at the individual, situational, and aggregate levels. Topics include definitions of crime, offending topologies, and criminal careers.

CRIMIN 6441 Juvenile Delinquency: 3 semester hours

Prerequisite: Graduate standing or consent of instructor. Examination of youth crime and juvenile offenders. Topics include definitions of juvenile crime, and theories of juvenile crime causation in the U.S.

CRIMIN 6442 Communities and Crime: 3 semester hours

Prerequisite: Graduate standing or consent of instructor. Examination of the trends and sources of crime and social disorder across communities. The course emphasizes relationships among crime, neighborhood change, neighborhood responses to crime, and public policies.

CRIMIN 6443 Violent Crime: 3 semester hours

Prerequisite: Graduate standing or consent of instructor. Examination of the sources and patterns of violent offending across time and space. Topics include conceptions and typologies of violent crimes and offenders, victim-offender relationships, and efforts to predict and control violent offending.

CRIMIN 6448 Victimization: 3 semester hours

Prerequisite: Graduate standing or consent of instructor. Examination of the risks and consequences of crime for its victims. Issues considered include victim-offender relationships, characteristics of victims, the nature of the injuries they experience and criminal justice procedures that involve them.

CRIMIN 6450 Criminal Justice Process and Policy: 3 semester hours

Prerequisite: Graduate standing. An analysis of criminal justice as a network of decisions and complex organizations. Topics include sources of criminal justice policy, policy agendas, implementation and evaluation.

CRIMIN 6452 The Police: 3 semester hours

Prerequisite: Graduate standing or consent of instructor. Historical, social and political analysis of policing in America. Examination of federal, state, county and municipal agencies.

CRIMIN 6454 Corrections: 3 semester hours

Prerequisite: Graduate standing or consent of instructor. Examination of the history, forms, and functions of correctional philosophies, institutions, programs and policies. Topics include the structure and functions of prisons and jails, community corrections, intermediate sanctions, and the growth of correctional control in modern society.

CRIMIN 6465 Qualitative Research Design: 3 semester hours

Prerequisites: CRIMIN 6405. Examination of participant observation and informant and respondent interviewing. Topics include gaining access, sampling, data collection and analysis, and legal and ethical concerns.

CRIMIN 6470 Quantitative Research Design: 3 semester hours

Prerequisites: CRIMIN 6405, CRIMIN 6410, and CRIMIN 6480. Examination of experimental, longitudinal, and cross-sectional designs. Sources of data, sampling procedures, operational definitions, and issues of reliability are also discussed.

CRIMIN 6471 Evaluating Criminal Justice Interventions: 3 semester hours

Prerequisites: CRIMIN 6405 and CRIMIN 6410. This course examines a broad range of interventions designed to prevent crime or improve some aspect of the criminal justice system. The validity, reliability, and feasibility of differing intervention designs are addressed. Several major criminal justice evaluations are discussed.

CRIMIN 6480 Multivariate Statistics in Criminology: 3 semester hours

Prerequisites: CRIMIN 6405 and CRIMIN 6410. Introduction to the general linear model with applications to multivariate problems in criminal justice and criminology. Topics include advanced ordinary least squares, causal modeling, time series analysis, simultaneous equations, and analysis of limited dependent variables.

CRIMIN 6485 Directed Readings/Research in Criminology and Criminal Justice: 1-6 semester hours

Prerequisite: Consent of instructor. Directed reading and research, under faculty supervision, designed to meet particular educational needs of selected students.

CRIMIN 6495 Internship in Criminology and Criminal Justice: 3 semester hours

Prerequisite: Graduate standing or consent of instructor. Supervised placements with criminal justice agencies. Designed primarily for students with limited field experience.

CRIMIN 6498 M A Thesis Research: 1-6 semester hours

Prerequisite: Graduate standing and consent of instructor.

CRIMIN 6550 Seminar in Criminology and Criminal Justice: 3 semester hours

Prerequisites: Graduate standing and CRIMIN 5415, CRIMIN 6400, and CRIMIN 6405 or consent of the instructor. Research and policy approaches to the study of criminology and criminal justice. Class may be repeated for credit when the subject matter is different.

CRIMIN 7499 Ph.D. Dissertation Research: 1-6 semester hours

To be arranged.

Economics

Undergraduate Programs Overview

Bachelor of Arts (B.A.) in Economics

The B.A. in Economics is more "liberal arts" in its focus than the B.S. degree. The B.A. degree requires completion of the BA foreign language requirement of the College of Arts and Sciences.

Bachelor of Science (B.S.) in Economics

The B.S. in Economics provides more in-depth development of the analytical and quantitative skills used in economic analysis. Students are required to complete calculus, econometrics, and additional quantitative coursework. The B.S. also offers very strong students the option of pursuing the Dual B.S./M.A. program.

B.S./M.A. Dual Degree Program in Economics

The B.S./M.A. ("2+3") dual degree program in Economics is an accelerated program that allows students to complete a B.S. and a M.A. in Economics in five years. The program is targeted at students who are comfortable with mathematics and have demonstrated success in undergraduate-level quantitative and analytical economics courses.

Bachelor of Science (B.S.) in Actuarial Science

Principles of Microeconomics, Principles of Macroeconomics, as well as a couple of quantitative courses offered by the department are part of the B.S. in Actuarial Science program. In addition, the Principles courses fulfill the VEE requirements in Economics. These courses have received approval of the Society of Actuaries (SOA). For more information see the Actuarial Science undergraduate program (p. 50).

Minor in Economics

The Department offers a minor in Economics to students who want to develop some knowledge in this field but wish to major in another discipline.

Certificate in Applied Econometrics and Data Analysis

This Certificate is designed to prepare students to perform applied econometric analysis in a variety of professional settings: banks, telecomm companies, consulting firms, etc. BS students can further distinguish themselves with this Certificate, which can be combined with the BS, the MA, or completed as a freestanding certificate.

Certificate in Actuarial Studies

Principles of Microeconomics, Principles of Macroeconomics help satisfy the prerequisites for the Certificate in Actuarial Studies and help fulfill the VEE requirements in Economics. These courses have received approval

of the Society of Actuaries (SOA). For more information on the Certificate in Actuarial Studies, see the Actuarial Science undergraduate program (p. 50).

Courses in Geography

The department offers a number of courses in geography, both online and on campus.

Resources

A valuable campus resource available to economics students is the Economic Resources Center (ERC). The ERC serves as a University Computer lab, study, and meeting space. The ERC also provides peer tutors for undergraduate economics courses (especially for Principles of Microeconomics and Principles of Macroeconomics).

Graduate Programs Overview

Master of Arts (M.A.) in Economics

The M.A. in Economics is specifically designed for those seeking to work as professional economists. Students acquire knowledge and a versatile set of skills that are highly valued in the workplace. The M.A. program has an excellent track record in job placement and placement in top Ph.D. programs. A unique feature of the program is the large number of applied econometrics and quantitative courses offered. The program can accommodate prospective full-time students as well as those who wish to study part-time. Classes are small, and student-faculty interaction is encouraged.

About the Faculty

The economics faculty considers research an integral part of good teaching. Research projects in recent years have dealt with energy, public choice, industrial organization, property rights, wage discrimination, urban economic development, health economics, economics of science, economics of gender, poverty and welfare, economics of culture, and government regulations.

Career Outlook in Economics

Nearly every decision that a person, business, or government makes falls under the purview of economic analysis. In economics course work, students learn to think analytically and apply their knowledge to a broad range of topics and problems. These skills are highly valuable in our ever changing economy, as well as in everyday life. For this reason, those with economics degrees are in high demand in a wide number of occupations, whether in business or government. In addition, economics majors are especially sought after by law schools, M.B.A. programs and, of course, graduate programs in economics. Job prospects for those with economics degrees at both the undergraduate and graduate levels are expected to remain strong over the next decade. For additional information on the undergraduate program, contact the Director of Undergraduate Studies at 516-5562 or 516-5306. Regarding the graduate program, contact the Director of Graduate Studies at 516-5553. Additional information is also available at the Department of Economics website.

Undergraduate Studies

General Education Requirements

All undergraduate economics majors must meet the university and college general education requirements (p. 41). Candidates for the B.A. degree may take any foreign language to meet this requirement. Candidates for

the B.S. degree take mathematics and quantitative courses instead of the foreign language requirement. Courses in economics may be used to meet the university social sciences requirement.

Satisfactory/Unsatisfactory Option

Courses outside the major field and ECON 1001, Principles of Microeconomics, and ECON 1002, Principles of Macroeconomics, may be taken on a satisfactory/unsatisfactory basis.

Prerequisites

All prerequisites for economics courses must be completed with a C- or better.

Bachelor of Arts in Economics

Candidates for the B.A. degree must take at least 33, but no more than 45, hours in economics. At least 27 hours must be above the 2000 level. All core courses for the major must be completed with a grade of C- or better.

The following core courses are required:

ECON 1001	Principles Of Microeconomics	3
ECON 1002	Principles Of Macroeconomics	3
ECON 2800	History Of American Economic Development	3
or ECON 3800	History Of Economic Thought	
ECON 3001	Intermediate Microeconomics	3
ECON 3002	Intermediate Economic Theory:Macroeconomics	3
ECON 3100	Economic Statistics	3
ECON 3200	Money, Banking And Monetary Theory	3

Education Majors

Education majors specializing in economics must fulfill the requirements for the B.A. degree. These majors are responsible for obtaining an adviser in the Department of Economics.

Bachelor of Science in Economics

Candidates for the B.S. degree must complete at least 36, but no more than 50, hours in economics. At least 30 hours must be at or above the 2000 level. All core courses for the major must be completed with a grade of C- or better.

The following core courses are required:

ECON 1001	Principles Of Microeconomics	3
ECON 1002	Principles Of Macroeconomics	3
ECON 3001	Intermediate Microeconomics	3
ECON 3002	Intermediate Economic Theory:Macroeconomics	3
ECON 3100	Economic Statistics	3
ECON 3200	Money, Banking And Monetary Theory	3
ECON 4100	Introduction To Econometrics	4
MATH 1800	Analytic Geometry And Calculus I (strongly recommended) ¹	3-5
or MATH 1100	Basic Calculus	

Select two of the following: 6-8

ECON 4030	Managerial Economics
ECON 4040	Analysis Of Business Cycles
ECON 4110	Applied Econometrics
ECON 4120	Time Series Econometrics For Economics And Finance
ECON 4130	Business And Economic Forecasting
ECON 4150	Mathematical Economics
ECON 4160	Geospatial Analysis In The Social Sciences
ECON 4170	Fundamentals Of Cost-Benefit Analysis

Mathematics courses numbered 1900 or above with consent of advisor ¹

¹ Note: mathematics courses used for this requirement do **not** count towards the 36 hours in economics requirement

B.S./M.A. Dual Degree Program in Economics

The B.S./M.A. (also known as the "2+3") program is an accelerated program that allows students to complete a B.S. and a M.A. in economics in five years. The program allows students to apply 12 of the M.A. credit hours towards the B.S., reducing the overall required hours for the two degrees from the standard 150 (120 for the B.S. plus 30 for the M.A.) to 138 hours.

The M.A. in Economics requires 30 credit hours; at least 21 hours must be completed in residence.

The following 3 courses (9 credit hours) are required:

ECON 5001	Microeconomic Analysis	3
ECON 5002	Macroeconomic Analysis	3
ECON 5100	Econometric Theory and Methods	3

In addition, 21 credit hours of electives must be completed. At most, six of these credit hours may be economics courses at the 4000 level (excluding ECON 4100 and ECON 4150 which cannot be utilized as part of the M.A. degree); all other electives must be at the 5000 level or higher.

Of the 30 hours taken in the M.A. program, 12 of these hours (per the approval of the Graduate Director) will also count toward the undergraduate B.S. requirements. All other requirements for the B.S. degree remain in effect.

Admission Requirements

Applicants must have completed between 60 and 108 credit hours. Applicants must have a minimum G.P.A. of 3.0 (both overall and in economics courses) and must be nominated by a full-time regular economics faculty member. Applicants must have completed all of the general education requirements as well as college algebra (or a higher level mathematics course), introductory microeconomics and introductory macroeconomics. Those accepted with fewer than 90 semester credit hours are accepted only on a provisional basis. Once the student has completed 90 semester hours of coursework (typically including ECON 3001, ECON 3002, ECON 3100, ECON 3200, MATH 1800, and preferably ECON 4100) with a satisfactory G.P.A. (minimum G.P.A. of 3.0 overall and in economics courses) the provisional status is dropped.

It is recommended that applicants apply when they have completed 90 credit hours; further, it is recommended that applicants should complete intermediate microeconomics (ECON 3001) and/or introductory econometrics (ECON 4100) before applying.

Awarding of Degree

Both degrees (the B.S. and M.A.) will be awarded when all requirements for the entire program have been completed. In other words, the B.S. and M.A. degrees will be simultaneously awarded at the completion of study.

Students who officially withdraw from the B.S./M.A. Dual Degree Program in Economics and who have successfully completed all of the requirements for the B.S. degree will be awarded the B.S. degree.

Departmental Honors

A student may earn departmental honors with a GPA of 3.6 in economics and the recommendation of the department.

Minor in Economics

Candidates for a minor in economics must take a minimum of 15 hours in economics.

The following courses are required:

ECON 1001	Principles Of Microeconomics	3
ECON 1002	Principles Of Macroeconomics	3

For the remaining 9 hours, 3 hours must be at or above the 2000 level and 6 hours must be at or above the 3000 level. It is recommended that students take ECON 3001, Intermediate Economic Theory: Microeconomics and/or ECON 3002, Intermediate Economic Theory: Macroeconomics. ECON 3100, Economic Statistics, cannot be counted towards the economics minor if the student has also taken LOG OM 3300 or the equivalent.

A GPA of 2.0 or better is required for courses presented for the minor. The satisfactory/ unsatisfactory (s/u) option may be applied to ECON 1001 and only.

Certificate in Applied Econometrics and Data Analysis

The Certificate is designed to prepare students to perform applied econometric analysis in a variety of professional settings: banks, telecommunications companies, consulting firms, etc. Those with economics degrees are in high demand in a large number of occupations, whether in business or government; students with advanced econometrics skills who understand how to apply these techniques in real-world settings are in even higher demand.

The Certificate in Applied Econometrics is designed to provide the education needed for employment in analysis positions in business or government. The Certificate will be attractive to economics majors with a quantitative focus, (applied) math majors, and selected students from other social sciences.

The Certificate consists of 6 courses met through 3 required courses and 3 electives which must be selected from the list below. At least 4 of these courses must be completed in residency at UMSL.

(Note that all of these courses have prerequisites that the student must complete before taking the selected course.)

Required Courses

ECON 4100	Introduction To Econometrics	4
ECON 4110	Applied Econometrics	4
ECON 4120	Time Series Econometrics For Economics And Finance	4
or ECON 4130	Business And Economic Forecasting	

Electives

The remaining 3 electives must come from the following list:		9-10
ECON 4040	Analysis Of Business Cycles	
ECON 4120	Time Series Econometrics For Economics And Finance (if course not used above)	
ECON 4130	Business And Economic Forecasting (if course not used above)	
ECON 4160	Geospatial Analysis In The Social Sciences	
LOG OM 4312	Business Forecasting (may not be used with ECON 4130)	
MATH 4200	Mathematical Statistics I	
MATH 4210	Mathematical Statistics II	
POL SCI 4040	Survey Research Practicum in Political Science	
PSYCH 4365	Psychological Tests And Measurements	
SOC 4040	Survey Research Practicum for Sociology	
SOC 4331	Qualitative Methods In Social Research	

Complementary Areas of Study

The department encourages all majors to develop breadth in related disciplines. Course work and minors are available in a number of areas such as business administration, computer science, statistics, and political science. In addition, courses offered by the department are required for the B.S. in Actuarial Science (p. 50) and help satisfy the prerequisites for courses required for the Certificate in Actuarial Studies (p. 50) and have been approved by the Society of Actuaries (SOA) to satisfy the VEE requirements in Economics. Students should check with their advisers for recommendations concerning courses in these areas. The department suggests the following supplemental course work for students interested in pursuing doctoral-level graduate work in economics or careers in general business. It also encourages all students to obtain work experience by enrolling in the Internship in Applied Economics (ECON 4990).

Graduate School Preparation

It is recommended that students considering doctoral-level graduate work in economics also take:

MATH 1900	Analytic Geometry and Calculus II	5
MATH 2000	Analytic Geometry and Calculus III	5
MATH 2020	Introduction to Differential Equations	3
MATH 2450	Elementary Linear Algebra	3

MATH 4100	Real Analysis I	3
MATH 4200	Mathematical Statistics I	3

General Business Preparation

It is recommended that students interested in pursuing careers in business also take:

ACCTNG 2400	Fundamentals of Financial Accounting	3
ACCTNG 2410	Managerial Accounting	3
BUS AD 2900	Legal Environment of Business	3
FINANCE 3500	Financial Management	3
MKTG 3700	Basic Marketing	3

Learning Outcomes

Students completing the B.A. and B.S. in Economics are expected to have achieved the following learning outcomes:

- Use economic reasoning to interpret and evaluate social, political and economic arguments, and policies.
- Use mathematical methods to interpret and analyze economic models to assess their logical validity and to model economic phenomena.
- Use statistical methods to interpret and analyze economic data and to assess the empirical validity of economic propositions.
- Employ their understanding of key market institutions such as property rights and contracts and economic organizations such as the Federal Reserve System and the International Monetary Fund to analyze economic behavior and evaluate public policy.
- Identify the causes and consequences of poverty and prosperity across and within societies.
- Predict changes in key macroeconomic variables in response to changes in social, political, and economic policy as well as non-economic events such as terrorist attacks, natural disasters, and changes in consumer confidence.
- Write a research paper that employs sound economic reasoning and, where appropriate, uses data and statistical methods to analyze an economic policy.

Master of Arts in Economics

Admission Requirements

An undergraduate major in economics is not required for acceptance into the program. Application for admission may be submitted at any time, although class work formally begins in late August, mid-January, and mid-June. Candidates must meet the general admission requirements of the Graduate School, submit GRE scores (Advanced Economics optional), and submit two letters of recommendation from persons qualified to judge the candidate's potential for success in the program.

The admissions decision is based on the applicant's academic transcript, GRE scores, letters of recommendation, and a personal narrative on the application form.

Degree Requirements

The M.A. in Economics requires 30 credit hours; at least 21 hours must be completed in residence.

Candidates need not have an undergraduate degree in economics. However, students are expected to have taken intermediate micro- and macro-economics, mathematical economics, and introductory econometrics prior to the beginning of the core curriculum. Students that do not have these courses will take these courses first; credits earned in these courses do not count towards the 30 hours required for the MA.

Required Core Courses

The following courses or their equivalents are required for the M.A. in Economics. Students with previous education in economics or business may waive some of these courses.

ECON 5001	Microeconomic Analysis	3
ECON 5002	Macroeconomic Analysis	3
ECON 5100	Econometric Theory And Methods	3

Electives

Candidates must complete at least 21 hours of electives. A maximum of 6 hours of economics electives may be taken at the 4000 level. With the approval of the graduate coordinator, students may take up to 9 hours of graduate courses outside the Department of Economics. In particular, students interested in business economics may take up to three approved graduate business courses for their electives.

Departmental Honors

A student may earn departmental honors with a GPA of 3.75 in all required courses for the M.A. degree and the recommendation of the department.

Complementary Areas of Study

Students with a public policy focus can complete the M.A. in Economics and the Public Policy Administration (PPA) Graduate Certificate in Policy and Program Evaluation (PPE) (<http://bulletin.umsl.edu/graduateschool/publicpolicyadministration/#graduatestext>). It is possible to earn the Certificate without any additional coursework beyond what is required for the M.A. alone.

Learning Outcomes

Students completing the M.A. in Economics are expected to have achieved the following learning outcomes:

- Interpret and analyze economic models and assess their validity.
- Use theoretical and empirical tools to design effective business and government policies.
- Use econometric methods to interpret and analyze economic data, to assess the empirical validity of economic propositions, evaluate business and government policies, and to forecast economic variables.
- Develop at least one topic area of expertise through familiarity with the relevant scholarly and professional literatures, policy issues, institutions, and current data trends.
- Develop at least one methodological area of expertise through the acquisition of the theoretical and empirical tools needed to understand scholarly and professional contributions to the literature to facilitate lifelong professional development and refinement of expertise.
- Write a professional quality research paper.

- Develop sufficient proficiency in the use of theoretical and empirical tools and in understanding of economic institutions to excel in a Ph.D. program.

Sample Four Year Plans

Economics BA (p. 139) Economics BS (p. 139)

Economics BA

First Year			
Fall	Hours	Spring	Hours
INTDSC 1003 ¹	1	ECON 1001	3
ENGL 1100	3	MATH 1100 (or EXPLORE Math & Sciences)	3

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 26 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Economics Courses

ECON 1000 Economics in Everyday Life (MOTR ECON 100): 3 semester hours

This course is an introduction to economic concepts, analysis, and issues for non-majors. ECON 1000 does not substitute for ECON 1001 or ECON 1002. Students who have already completed ECON 1001 or ECON 1002 may not take ECON 1000 for credit.

ECON 1001 Principles of Microeconomics (MOTR ECON 102): 3 semester hours

Prerequisite: MATH 1030. Introduction to the determinants of household demand, production and cost, and market prices. Applies the principles of individual decision-making behavior to understanding goods, services and resource markets.

ECON 1002 Principles of Macroeconomics (MOTR ECON 101): 3 semester hours

Prerequisite: MATH 1030 and ECON 1001. Introduction to the determination of levels of and changes in aggregate income, output, employment and prices. Applies economic principles of choice to the formulation and achievement of public policies that affect national employment, income distribution, and economic growth.

ECON 1005 Family Economics and Household Development: 3 semester hours

Provides social service professionals that work with low income individuals and families with an understanding of the principles of personal financial management. Case studies are used to apply course content and to develop training strategies for clients to improve household financial management. The role of financial institutions and government policies as well as their impact on low income families is also examined. Resources to use with clients will be identified. ECON 1005 does not count toward a major or minor in Economics.

ECON 1052 Microeconomics for the School Curriculum: 3 semester hours

Analysis of market forces, with emphasis on business firms, households, and productive-factor markets, price determination and resource allocation. Special reference to topics included in elementary and secondary school social science curricula. ECON 1052 may not be used by Economics majors to meet degree requirements.

ECON 1500 Entertainment Economics: The Movie Industry: 3 semester hours

Same as MEDIA ST 1500. This survey course examines the interrelationships between economics and the movie industry. It explores the impact of economic factors on the production, distribution and exhibition of movies, focusing on the rise and fall of the studio system, role of technological change in the evolution of cinematography and the movie marketplace, financing and market segmentation, globalization and changing industrial structure within which films are produced. To the extent that movies reflect and contribute to popular economic perspectives, this course also evaluates the soundness of the movie industry's depiction of a variety of economic doctrines. Classes will consist of lecture, discussion, and brief film screenings. This course does not count towards the hours required for an economics major.

ECON 1900 Introductory Topics in Economics: 3 semester hours

This course provides an analysis of an introductory economic topic. May be repeated for credit when topic varies.

ECON 2010 The Business Firm: History, Theory, and Policy: 3 semester hours

Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. This course presents a history of the development of modern business firms and examines the evolution of the economic theory of the firm. Special attention is paid to the role that firms play in fostering social and economic development. The ultimate objective of the course will be to provide students with a deeper understanding of firms so they can make better policy decisions as firm owners, managers, lawmakers, regulators, and voters.

ECON 2410 Work, Families, and Public Policy: 3 semester hours

Same as GS 2410. Prerequisites: ECON 1000 or ECON 1001. This course compares the economic behavior of women and men in both the labor market and the household. Topics include: the family as an economic (production) unit, gender differences in labor force participation, occupations and earnings; the effectiveness of human capital theory and labor market discrimination in explaining the male-female wage gap; remedies for reducing the wage gap; family structure and economic well-being; and alternative policies to alleviate poverty. Students who have completed ECON 3400 may not take ECON 2410 for credit.

ECON 2610 The Economics of Professional Sports: 3 semester hours

Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. This course will survey the economic organization of professional sports team industries and the relationship of sports teams to their employees, fans, and governments. Economic issues relating to salaries and labor disputes, monopoly practices, cartels and pricing, team location decisions, and public subsidies for professional sports teams will be analyzed.

ECON 2800 History of American Economic Development: 3 semester hours

Same as HIST 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter-gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and anti trust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in the postwar economy.

ECON 3001 Intermediate Microeconomics: 3 semester hours

Prerequisite: MATH 1030 and ECON 1001. Analysis of prices in terms of equilibrium of the business firm and consumer demand in markets of varying degrees of competition.

ECON 3002 Intermediate Macroeconomics: 3 semester hours

Prerequisite: MATH 1030, ECON 1001 and ECON 1002; ECON 3200 is recommended. Study of national income, expenditure and the forces determining the level of economic activity. Special emphasis on the theory of income determination and its application to public policy.

ECON 3003 Game Theory and Strategic Decision Making: 3 semester hours

Prerequisites: ECON 1001. When the best course of action depends on the decisions made by others, strategy becomes important. Game theory provides the tools for analyzing such strategic decision making. Strategic behavior is analyzed in the context of business, logistics, biology, war, government, politics, and everyday life. A wide variety of in-class experiments are used to illustrate key concepts.

ECON 3055 Economic Issues for the School Curriculum: 1-3 semester hours

Prerequisites: Junior standing and consent of instructor. An analysis of selected economic issues appropriate to instruction in secondary and elementary schools. May be taken more than once for credit, provided the topic of the course is different each time. May not normally be used by economics majors to meet degree requirements. This course does not fulfill the undergraduate economics requirement for education majors.

ECON 3100 Economic Statistics: 3 semester hours

Prerequisite: MATH 1030, ECON 1001, and ECON 1002. Introduction to economic data sources, data interpretation and statistical inference as used in economic analysis. Emphasizes the testing of economic hypotheses and the development and estimation of economic models. Introduces the use of statistical software used in economics.

ECON 3200 Money, Banking And Monetary Theory: 3 semester hours

Prerequisites: ECON 1001 and ECON 1002. Factors influencing bank reserves and the money supply. Ability of the Federal Reserve System and the Treasury to control these factors. Introduction to monetary theory: integration of monetary phenomena with national income theory. Analysis of current policy issues.

ECON 3300 International Economic Analysis: 3 semester hours

Prerequisite: ECON 1001. Introduction to the theories of international trade and factor movements including determinants of trade, the effects of trade on sectors and on overall economic performance, trade restrictions, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

ECON 3320 Economic Development: 3 semester hours

Prerequisites: ECON 1001 and ECON 1002. Survey of economic growth as applied to developed and underdeveloped countries. Analysis of development policies with Emphasis on case studies. Case studies may include the United States, Western Europe or Latin America.

ECON 3400 Labor Economics: 3 semester hours

Prerequisites: ECON 1001. Examines the labor market in the economy, considers the theories of labor supply, labor demand, and market determination of wages. Other topics include noncompetitive markets, international labor markets, the theory of human capital, compensating wage differentials, labor market discrimination, unions and collective bargaining, unemployment, and poverty and the distribution of income.

ECON 3450 Labor in the Global Political Economy: 3 semester hours

This course will examine current issues, trends, and developments which are shaping labor in today's global economy. Students will analyze the shifting balance of power between labor and capital, the role of government, and evaluate the strategic options for workers and unions operating in a global environment. ECON 3450 may not be used by economics majors to meet degree requirements.

ECON 3500 The Economics of Government Spending and Taxation: 3 semester hours

Prerequisites: MATH 1030 and ECON 1001. Analysis of the role of government expenditures and taxation. Topics include: (1) analysis of public goods and externalities, models of collective choice, elements of benefit-cost analysis the theory of bureaucracy, governments as agents in markets; and (2) analysis of the economic role of governments, subsidies and taxes in the federal system, criteria for tax evaluation, the nature of tax legislation, private decision making under different tax institutions, and government borrowing.

ECON 3600 Market Structure, Strategy, and Pricing: 3 semester hours

Prerequisite: ECON 1001. A theoretical and empirical analysis of the actions of firms under alternative forms of market organization. The role of economies of scale, product differentiation, mergers, and advertising in affecting industry structure and the impact of the resulting industry structure on pricing, output, promotion, and technology decisions of firms.

ECON 3900 Selected Topics in Economics: 3 semester hours

Prerequisites: ECON 1001 and ECON 1002. Analysis of a selected economic topic. The topic selected will vary from semester to semester. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

ECON 4030 Managerial Economics: 3 semester hours

Prerequisites: ECON 3001; MATH 1800 or MATH 1100 recommended. Application of microeconomic theory to decision-making process in the business firm. Topics include pricing and profit strategy, cost analysis, decision making under uncertainty, technology, innovation, and productivity growth, and the structure and organization of firms. Problem-solving and case-study approach used.

ECON 4040 Analysis of Business Cycles: 3 semester hours

Prerequisites: ECON 3002, ECON 3100, and ECON 3200 or equivalent.

This course focuses on the empirical regularities in macroeconomics commonly referred to as the business cycle. It examines the variability and co-movements of aggregate economic variables and explores alternative theoretical explanations of these phenomena.

ECON 4100 Introduction to Econometrics: 4 semester hours

Prerequisites: ECON 1001 and ECON 1002; ECON 3100 or MATH 1320 or SCMA 3300; MATH 1800 or MATH 1100. An introduction to quantitative analysis of economic behavior. The ordinary least squares technique and the assumptions underlying it are developed. Methods designed to detect and correct for the violations of these assumptions are examined. Special emphasis is given to the practical application of the procedures discussed through the use of computer exercises.

ECON 4110 Applied Econometrics: 4 semester hours

Prerequisites: ECON 4100 or equivalent. Concepts, techniques, & advanced applications of econometrics. Emphasis on developing a critical understanding of the appropriateness and limitations of a variety of state-of-the-art techniques used to model economic or political processes. Topics will include joint tests of hypotheses, estimation of lagged effects, models of qualitative choice, simultaneous systems, and outlier diagnostics. This course includes laboratory work in quantitative economic analysis.

ECON 4120 Time Series Econometrics for Economics and Finance: 4 semester hours

Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Introduction to application of econometric methods to timeseries data. Emphasis on model specification as it appears to macroeconomic or financial data. Topics include: Stationary and non-stationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

ECON 4130 Business and Economic Forecasting: 4 semester hours

Prerequisites: ECON 4100 or equivalent. Alternative forecasting methodologies for economic time series will be analyzed and discussed. The focus of the course will be: (1) the development of time-series (ARIMA) models and their application to forecasting; (2) the use of standard econometric models for forecasting; and (3) evaluation and comparison of these methods and the conditions under which each is the appropriate methodology. This course includes laboratory work in quantitative economic analysis.

ECON 4150 Mathematical Economics: 3 semester hours

Prerequisites: MATH 1800 or MATH 1100; ECON 3001 or BUS AD 5000 or BUS AD 5001. This course uses calculus and other mathematical tools to analyze economic phenomena. In addition to exploring techniques used to solve unconstrained and constrained optimization problems, the course also examines how matrix algebra is used in economic modeling. This course allows students to mathematically analyze economic models which receive graphical treatment in lower level courses.

ECON 4160 Geospatial Analysis in the Social Sciences: 3 semester hours

Prerequisites: Junior standing. ECON 1001 or consent of instructor. Analysis of geospatial data relating to a variety of social phenomena using geographic information systems (GIS) software. Students will learn how geospatial analysis can be integrated into research projects and presentations (e.g., creating maps to present and analyze social, political, and economic data). Students will also learn how criminal activity, economic activity, voting patterns and other social behavior are spatially correlated with demographic data. As a culminating project, students will learn how to apply GIS techniques, including but not limited to sophisticated spatial modeling of social behavior.

ECON 4170 Fundamentals of Cost-Benefit Analysis: 3 semester hours

Prerequisites: ECON 3001 or equivalent. The purpose of this course is to provide a systemic and rigorous way of thinking about the measurement of benefits and costs when evaluating public projects, programs or regulations. Cost-benefit analysis has wide application, including: environmental resource use, highway construction projects, safety regulations, taxation of cigarettes, and investment in higher education. Given the prevalence of cost-benefit analysis in government budgetary processes, this course will develop critical appraisal skills to evaluate the appropriateness of these analyses.

ECON 4210 Financial Markets And Institutions: 3 semester hours

Prerequisite: ECON 3200. Demand, supply and flow of funds in the macrofinancial system, including money, capital, futures and foreign exchange markets. Examines types and historical development of domestic and international financial intermediaries operations within these markets, decision-making within individual intermediaries, their regulatory environment, and how their portfolio decisions affect flows of funds in the financial system.

ECON 4510 Public Choice: 3 semester hours

Prerequisites: ECON 3001 or consent of instructor. Public choice is the analysis of government and governmental institutions through the logic of economics. It assumes the same principles that economists use to analyze actions in the marketplace, and applies them to actions made in collective decision-making. Topics include: the efficiency of democracy, voting methods, the incentives of legislators, bureaucrats and lobbyists, political competition, and public institutions and economic growth.

ECON 4550 Natural Resource Economics: 3 semester hours

Prerequisites: ECON 1001 or consent of instructor; junior standing. The relationship between human activity and the world's natural resources requires choices. This course uses an economics perspective to study these choices. This perspective uses the view of the environment as an asset for its starting point. Issues concerning the optimal and sustainable use of natural resources are examined in this context. Special emphasis is given to potential policy responses to environmental problems.

ECON 4900 Advanced Topics in Economic Analysis: 3 semester hours

Prerequisite: ECON 3001 or ECON 3002 or consent of instructor. Study of a specific topic in Economics that may vary from semester to semester. May be taken for credit more than once if the topics are different.

ECON 4980 Special Readings: 1-6 semester hours

Prerequisite: Consent of instructor; grade point of 3.0 or higher in Economics. Unscheduled, independent directed readings on topics mutually acceptable to student and instructor. Maximum credit limited to six hours.

ECON 4990 Internship in Applied Economics: 2-6 semester hours

Prerequisites: ECON 3001, junior standing and consent of instructor. Independent study involving work with an appropriate private firm or public agency. A maximum of six hours may be earned, only three of which may be applied to the Economics major.

ECON 4995 Internship in Actuarial Science: 1-3 semester hours

Same as MATH 4995. Prerequisites: Junior standing and consent of program director. Supervised off-campus training in a private or public sector position in which the student applies the knowledge and skills learned in their actuarial science coursework. The internship is monitored by a faculty member and the student must provide a written report at the end of the project. This course may be repeated for a maximum of 6 credit hours.

ECON 5001 Microeconomic Analysis: 3 semester hours

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150. Survey of Microeconomic comparative statistics. Detailed examination of demand and supply, product and factor markets. Partial equilibrium in competitive, imperfectly competitive and monopolistic markets.

ECON 5002 Macroeconomic Analysis: 3 semester hours

Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. Aggregate economic theory, including analysis of the determinants of income, output, employment, and prices. Employment and price-level effects of consumer and investment demand, the money supply and interest rates, and government policies.

ECON 5010 Microeconomics for Policy Analysis: 3 semester hours

Same as P P ADM 6080. Prerequisite: Graduate Student Standing. This course introduces microeconomic analysis of consumers, firms, and government, with an emphasis on policy applications. It assumes no prior training in economics and is appropriate for graduate students in public policy administration, nonprofit management, political science, gerontology, criminology and criminal justice, and other related fields. This course may not be used by economics students to meet M.A. degree requirements.

ECON 5051 Macroeconomics for the School Curriculum: 1-3 semester hours

Prerequisite: Junior standing. Analysis of forces affecting the national economy, with emphasis on income determination, employment, money and banking, and international trade and finance. Special reference to topics included in elementary and secondary school social science curricula. ECON 5051 may not be used by Economics majors to meet degree requirements.

ECON 5052 Microeconomics for the School Curriculum: 1-3 semester hours

Prerequisites: Bachelor's degree from an accredited institution or consent of instructor. Analysis of market forces, with emphasis on business firms, households, productive factor markets, price determination and resource allocation. Special reference to topics included in the elementary and secondary school social science curricula.

ECON 5055 Economic Issues for School Curriculum: 1-3 semester hours

Prerequisite: Junior standing and consent of instructor. An analysis of selected economic issues appropriate to instruction in secondary and elementary schools. May be taken more than once for credit provided the topic of the course is different each time. May not normally be used by economics majors to meet degree requirements.

ECON 5100 Econometric Theory and Methods: 3 semester hours

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4100; ECON 4150 or equivalent. A rigorous review of statistical models and methods relevant to the estimation and testing of economic relationships. Emphasis on the theoretical underpinnings of techniques commonly used for multivariate regression analysis and hypothesis testing. Topics include ordinary least squares, generalized least squares, and instrumental variables estimation.

ECON 5110 Topics in Applied Econometrics: 3 semester hours

Prerequisites: ECON 4100, or ECON 5100 or SCMA 5300. Concepts and application of advanced econometric techniques. Students will develop a thorough understanding of the appropriateness and application of a variety of state-of-the-art techniques. Topics will include specification tests, polynomial distributed lags, discrete choice, pooled time-series cross-section, simultaneous equations and outlier detection.

ECON 5120 Advanced Topics in Time Series Econometrics: 3 semester hours

Prerequisites: ECON 4100 or equivalent and a solid foundation in statistics. Application of econometric methods to time-series data. Emphasis on model specification as it applies to macroeconomic or financial data. Advanced topics include: Stationary and nonstationary time-series, seasonality, random walks, unit roots, Dickey-Fuller tests, cointegration, ARCH/GARCH models, and general to specific modeling (ADLs). Specific applications to macro-economics, international economics and/or financial markets.

ECON 5130 Advanced Topics in Business and Economic Forecasting: 3 semester hours

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; ECON 4150; ECON 4100 or SCMA 5300. This course develops the alternative techniques which are used to forecast economic time series. Each forecasting technique will be evaluated in terms of its theoretical soundness and predictive track record. Students will also learn to use these techniques to differentiate among competing economic models.

ECON 5200 Monetary Theory and Policy: 3 semester hours

Prerequisites: ECON 3200; ECON 3001 or BUS AD 5001; ECON 3002 or BUS AD 5002; and ECON 4150. An examination of how monetary policy has affected the economy in the past and how it can improve economic performance in the future. Topics include: the origins of money, money supply, money demand, the determinants of real and nominal interest rates, the term structure of interest rates, the impact of discretionary monetary policy on the domestic economy and foreign exchange markets, and the domestic economy and foreign exchange markets, and the relationship between monetary policy and federal government deficits.

ECON 5210 Financial Markets: 3 semester hours

Prerequisites: ECON 3001 or BUS AD 5001; ECON 3002, and ECON 3200. Demand, supply, and flow of funds in allocating credit and distributing risk in the macrofinancial system. The saving investment process, the rationale for financial markets, and the role of financial intermediaries are studied within the framework of the flow of funds accounts. Special attention is given to the operation of money, capital, futures, and foreign financial markets and the impact of public policy on the structure and performance of financial markets.

ECON 5300 International Trade: 3 semester hours

Prerequisites: ECON 3001 or BUS AD 5001. Survey of the modern theories of international trade and their applications including factor endowments and other, trade restrictions, foreign investment, trade and economic development, and balance of payments and exchange rates. Discussion of current institutions and economic developments in the global economy.

ECON 5301 International Monetary Analysis: 3 semester hours

Prerequisites: ECON 3200 and ECON 3002 or BUS AD 5002. Application of macroeconomic theory to the international monetary system. Topics include the balance of payments, exchange rates, international linkages, world inflation, capital flows, and the gold standard.

ECON 5400 Labor Economics: Theory and Public Policy: 3 semester hours

Prerequisites: ECON 3001 or BUS AD 5001. This course examines labor supply, labor demand, and market determination of wages. Topics covered include the effect of technological change on employment, trends in labor force participation, the impact of government taxes and transfers on labor supply, poverty, and its economic consequences, the human capital model and its implications for investment in education and on-the-job training, and theories of economic discrimination and empirical measurement issues. Throughout the course, current public policy debates are examined using the theoretical models developed.

ECON 5500 Public Sector Microeconomics: 3 semester hours

Same as P P ADM 6210. Prerequisites: ECON 3001 or BUS AD 5001 and P P ADM 6080. Application of tools of intermediate microeconomics to address public sector issues. Special emphasis is placed on critically analyzing current public policy debates using the models developed. Topics covered include: cases in which competitive market fails to allocate resources efficiently (e.g. externalities and public goods), importance of property rights, incentive effects of the tax and transfer system, and the fundamentals of cost-benefit analysis.

ECON 5510 Public Choice: 3 semester hours

Prerequisites: ECON 3001 or consent of instructor. Public choice is the analysis of government and governmental institutions through the logic of economics. It assumes the same principles that economists use to analyze actions in the marketplace, and applies them to actions made in collective decision-making. Topics covered include: the efficiency of democracy, voting methods, the incentives of legislators, bureaucrats and lobbyists, political competition, and public institutions and economic growth.

ECON 5630 Economics of Telecommunications: 3 semester hours

Prerequisites: ECON 3001, BUS AD 5000 or BUS AD 5001; and ECON 4150. Application of economic theory and techniques to the telecommunications industry. Topics include demand theory for telephone access and use, consumer surplus models for subscription choice, nonlinear pricing strategies including pure and mixed bundling and multi-part tariffs, the incentives of the firm under various regulatory regimes, a comparison of rate-of-return regulation and incentive (price cap) regulation, and the impact of carrier-of-last-resort responsibilities.

ECON 5900 Advanced Topics in Economic Analysis: 3 semester hours

Prerequisite: Consent of the instructor. Study of a specific economics topic, which may vary from semester to semester. May be taken more than once if the topic is different.

ECON 5980 Directed Readings: 1-6 semester hours

Prerequisite: Consent of the instructor. Independent study through readings, reports, research projects, and conferences.

Geography Courses

GEOG 1001 Introduction to Geography (MOTR GEOG 101): 3 semester hours

An introduction to geography as a social science. The identification and explanation of order in the human landscape. A survey of the social, political, economic, and psychological factors which influence geographic patterns.

GEOG 1002 World Regions (MOTR GEOG 101): 3 semester hours

Survey of the major regions of the world. Designed to give the student an awareness of the character of each of these major regions through the interrelationships of the various attributes of place. Each semester the geographic perspective will be applied in greater depth to one significant country such as Afghanistan, Iraq, or North Korea.

GEOG 2001 Cultural Geography: 3 semester hours

This course examines the effect of geography on culture and cultural groups. Essential to the geographic perspective is identifying the effect on cultures of the current trend toward increasing globalization. Topics include language, religion, attitudes, and the effect of technology.

The major goals are to increase awareness of the diversity of human cultures and to prepare students for a world of increasing intercultural communication and conflict. Satisfies cultural diversity.

GEOG 4900 Advanced Readings in Geography: 3 semester hours

Prerequisite: Consent of instructor. This course will provide a more in-depth analysis of the various factors which influence geographic patterns employing methods appropriate to graduate level instruction. The topic selected will vary from semester to semester. This course may be taken for credit more than once as long as the topic discussed in each semester is different.

English

General Information

Degrees and Areas of Concentration

The English department offers or participates in offering the B.A. in English, the B.A. in English with certification for secondary teaching, and the B.S. in secondary education with an emphasis area in English. The department also offers a minor in English. Additionally, students with any major in the university may earn a Certificate in Writing so that they may demonstrate evidence of training in creative, journalistic, or technical writing.

The department has a graduate program leading to the Master of Arts degree. Students may pursue a literature track where they acquire a broad coverage in British and American writers or a writing track where half of the course work deals with composition and writing theory. The department also offers the Master of Fine Arts in creative writing, in which half of the courses are writing workshops and independent writing projects. In addition, the department of English participates in a Graduate Certificate in the Teaching of Writing.

Learning Outcomes

Recipients of the undergraduate degree will demonstrate the following outcomes:

- Demonstrate advanced skills in reading and analyzing texts and a knowledge of literary and rhetorical terms and concepts.
- Demonstrate mastery of content in at least three specific fields in language, literature, and written literacy.
- Demonstrate knowledge of historical and critical context for these fields and the relevance to them of a variety of critical approaches.
- Understand the role played by gender, race, class, and ethnicity (where appropriate) in language, literature, and literacy.

- Demonstrate the ability to write clear analytical essays incorporating both primary textual evidence and secondary scholarly and critical sources.

Departmental Honors

Candidates for departmental honors in English must achieve a 3.2 average in English at graduation and complete an undergraduate or graduate seminar in English, the final paper for which must be acceptable to the instructor as an honors thesis.

Career Outlook

In addition to traditional employment as teachers at the primary, secondary, and community-college levels, recent UMSL graduates in English are working in journalism, editing, advertising, public relations, and other fields that place a premium upon creation and interpretation of the written word. Numerous recent English majors have successfully entered law school.

Undergraduate Studies

General Education Requirements

All undergraduate english majors must meet the university and college general education requirements (p. 41).

English courses may be used to meet the university's humanities requirement, except for the following:

ENGL 1100	First-Year Writing (MOTR ENGL 200)	3
ENGL 1110	First-Year Writing for International Students	3
ENGL 2120	Topics in Writing	3
ENGL 2810	Traditional Grammar	3
ENGL 3090	Turning the Kaleidoscope: How We Look at Texts	3
ENGL 3100	Junior-Level Writing	3
ENGL 3110	Junior-Level Writing for International Students	3
ENGL 3120	Business Writing	3
ENGL 3130	Technical Writing	3
ENGL 3150	Feature Writing	3
ENGL 3160	Writing in the Sciences	3
ENGL 3180	Reporting	3
ENGL 4860	Editing and the Production Process	3
ENGL 4880	Writing for Teachers	3
ENGL 4890	Writing Internship	3
Total Hours		45

The college's foreign language requirement may be met in any language.

Satisfactory/Unsatisfactory Option

Majors may take no more than 6 satisfactory/unsatisfactory hours in the department. Any English course may be taken on a satisfactory/unsatisfactory basis **except** the following:

ENGL 1100	First-Year Writing	3
ENGL 1110	First-Year Writing for International Students	3

ENGL 3090	Writing about Literature	3
ENGL 3100	Junior-Level Writing	3
ENGL 3110	Junior-Level Writing for International Students	3
ENGL 3120	Business Writing	3
ENGL 3130	Technical Writing	3
ENGL 3160	Writing in the Sciences	3

Degree Requirements

Bachelor of Arts in English

English majors must complete at least 39, but no more than 48, hours in English exclusive of:

ENGL 1100	First-Year Writing	3
ENGL 1110	First-Year Writing for International Students	3
Junior-Level Writing Requirement		3

Students majoring in English must take one three-hour 2000-level course in each of the following areas: Literature in English, Language and Language Studies, and Creative Writing. Collectively, the three 2000-level courses introduce all majors to the intellectual work people in English Studies do, and to explore the range of skills, processes, areas of knowledge, and practices we work with and the texts we produce.

Literature in English		3
ENGL 2330	Introduction to Poetry	
ENGL 2350	Introduction to Fiction	
ENGL 2360	Hey, Have You Read _____?	
ENGL 2370	Drama: The Greatest Hits	
Language and Writing		3
ENGL 2400	Rhetorical Ways with Words	
ENGL 2410	Literate Lives	
ENGL 2830	Introduction to English Language Variety	
Creative Writing		3
ENGL 2020	Introduction to Creative Writing	
ENGL 2030	Beginning Poetry Writing Workshop	
ENGL 2040	Beginning Fiction Writing	
Total Hours		9

Junior-Level Writing Requirement

Students choose one three-hour course from the following list to meet the junior-level writing requirement:

ENGL 3090	Writing about Literature ¹	3
ENGL 3100	Junior-Level Writing	3
ENGL 3110	Junior-Level Writing for International Students	3
ENGL 3120	Business Writing	3
ENGL 3130	Technical Writing	3
ENGL 3160	Writing in the Sciences	3
HONORS 3100	Honors Advanced Composition: Writing The City	3

¹ This course is strongly advised for literature majors and students anticipating graduate study in English.

3000 Level Major Courses: required total of 9 hours, at least six of which are literature.

Courses at this level feature a more narrow range of content, deepening the skills and habits of mind learned at the 2000 level.

One 3000-level British Literature Course	3
One 3000-level American Literature Course	3
An additional 3000-level English Course	3
Total Hours	9

4000 Level Courses: required total of 12 hours. Pre-requisite: students must pass all three 2000-level core curriculum courses before enrolling in 4000-level courses.

Senior level courses are more specialized in content and more challenging in the kinds of work students produce. A wide range of these is available, in literature in English, writing and language, and creative writing. A student can focus on one of those three areas or may remain a generalist.

Electives: 9 hours of English courses at any level, exclusive of courses used to satisfy the first-year and junior-level writing requirements.

B.S. Ed. in Secondary Education with Emphasis in English

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

B.A. or in English with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

Minor in English

A student may minor in English by taking at least 18 hours of English courses exclusive of Basic Writing, ENGL 1100, First Year Writing, and ENGL 1110, First Year Writing for International Students. ENGL 3090 is required, and 12 of the 18 hours must be in literature courses, 9 of

which must be in courses at the 3000 or 4000 level. Every student taking a minor in English must consult with an adviser in the English department to ensure a coherent program of studies. The GPA in courses for the minor must be 2.0 or better. Nine of the 18 hours must be taken in residence at UMSL. No more than 3 hours taken on a satisfactory/unsatisfactory basis may be counted toward the 18-hour minimum.

Professional Writing Certificate

Students earn the Professional Writing Certificate by completing 18 hours in selected writing courses with a grade point average of 3.0 or better. Twelve of the 18 hours must be taken at the University of Missouri-St. Louis. Courses may not be taken on a satisfactory/unsatisfactory basis.

Students who wish to pursue a technical writing emphasis should contact the Coordinator for information about appropriate courses and internships.

Professional Writing Courses

MEDIA ST 2212	Broadcast Writing And Reporting	3
ENGL/MEDIA ST 2080	Advertising Copywriting	3
ENGL 3140/MEDIA ST 3214	News Writing	3
ENGL/MEDIA ST 3150	Feature Writing	3
ENGL 3180	Reporting	3
ENGL 3280/MEDIA ST 2228	Public Relations Writing	3
ENGL 4160	Special Topics In Writing	3
ENGL 4810	English Grammar	3
ENGL 4850	Topics In The Teaching Of Writing	1-3
ENGL 4860	Editing	3
ENGL 4870	Advanced Business And Technical Writing	3
ENGL 4880	Writing For Teachers	3

Academic Writing Courses

ENGL 2120	Topics In Writing	3
ENGL 2810	Traditional Grammar	3
ENGL 3090	Writing about Literature	3
ENGL 3100	Junior-Level Writing	3
HONORS 3100	Honors Advanced Composition: Writing The City	3
ENGL 3110	Junior Level Writing For International Students	3
ENGL 3120	Business Writing	3
ENGL 3130	Technical Writing	3
ENGL 3160	Writing In The Sciences	3

Creative Writing Courses

Students may take up to 2 creative writing courses.

ENGL 2040	Beginning Fiction Writing	3
ENGL 3030	Poetry Writing Workshop	3
ENGL 3040	Fiction Writing Workshop: Narrative Techniques	3
ENGL 4130	Advanced Poetry Writing Workshop	3
ENGL 4140	Advanced Fiction Writing Workshop	3
ENGL 4895	Editing "Litmag"	3

Capstone Course

ENGL 4890	Writing Internship (Required. Usually taken as the last course in the program. Must include an extensive final project.)	3
ENGL 4892	Independent Writing Project	3

When the student has completed requirements for the certificate, the coordinator will notify the university registrar and the college from which the student will graduate. Upon the student's graduation, completion of the Professional Writing Certificate will be noted on the official transcript and a certificate will be mailed to the student's residence. Students who have graduated before completing the Professional Writing Certificate will receive the certificate in the mail and will have the certificate entered on their official transcripts.

Creative Writing Certificate

Students earn the Certificate in Writing by completing 18 hours in selected writing courses with a grade point average of 3.0 or better. Twelve of the 18 hours must be taken at the University of Missouri-St. Louis. Courses may not be taken on a satisfactory/unsatisfactory basis.

Students in the creative writing emphasis produce original fiction or poetry. Courses in creative nonfiction, editing, feature writing and copywriting may also be taken for this emphasis.

Students should choose courses for the certificate with the guidance of the Writing Certificate Coordinator. Students electing English 4890 as part of the certificate should meet with the coordinator to arrange the internship.

To receive this certificate, the student must take 18 hours chosen from the courses listed below.

Select at least two of the following courses (at least one must be a 4000-level course):

ENGL 3030	Poetry Writing Workshop
ENGL 3040	Fiction Writing Workshop: Narrative Techniques
ENGL 4130	Advanced Poetry Writing Workshop
ENGL 4140	Advanced Fiction Writing Workshop
ENGL 4895	Editing "Litmag"

2000-level Courses

Students may take no more than two 2000-level courses.

ENGL 2040	Beginning Fiction Writing	3
ENGL 2330	Introduction To Poetry	3
ENGL 2340	Introduction To Drama	3

Creative Writing Courses

ENGL 3030	Poetry Writing Workshop	3
ENGL 3040	Fiction Writing Workshop: Narrative Techniques	3
ENGL 3090	Writing about Literature	3
ENGL 3100	Junior-Level Writing	3
ENGL 4130	Advanced Poetry Writing Workshop	3
ENGL 4140	Advanced Fiction Writing Workshop	3
ENGL 4160	Special Topics In Writing	3
ENGL 4890	Writing Internship	3
ENGL 4892	Independent Writing Project	3
ENGL 4895	Editing "Litmag"	3

Professional Writing Courses

Students are encouraged to take at least one professional writing course, but no more than two.

ENGL/MEDIA ST 2080	Advertising Copywriting	3
ENGL/MEDIA ST 3150	Feature Writing	3
ENGL 4860	Editing	3

Students may use ENGL 4895, ENGL 4890, ENGL 4140, or ENGL 4130 as their capstone course. If ENGL 4890 is used, it will be an internship in literary publishing, feature writing, or advertising copywriting. To use ENGL 4130 or ENGL 4140, the student must obtain the teacher's permission and do extra work in the course. The Editing Litmag course, ENGL 4895, may also be used as the final course for this certificate.

When the student has completed requirements for the certificate, the coordinator will notify the university registrar and the college from which the student will graduate. Upon the student's graduation, completion of the Creative Writing Certificate will be noted on the official transcript and a certificate will be mailed to the student's residence. Students who have graduated before completing the Creative Writing Certificate will receive the certificate in the mail and will have the certificate entered on their official transcripts.

Online Certificate in Technical Writing

Students earn the Online Certificate in Technical Writing by completing 18 hours in selected online writing courses with a grade point average of 3.0 or better, including a capstone course. Twelve of the 18 hours must be taken at the University of Missouri-St. Louis. Courses may not be taken on a satisfactory/unsatisfactory basis.

UMSL Courses

ENGL 3120	Business Writing	3
ENGL 3130	Technical Writing	3
ENGL 3160	Writing In The Sciences	3
ENGL 4870	Advanced Business And Technical Writing	3
ENGL 4871	Publishing: Writers, Editors, and Readers ¹	3
ENGL 4872	Technical Presentations ¹	3
ENGL 4890	Writing Internship	3
ENGL 4892	Independent Writing Project	3

Missouri S&T Courses

ENGLISH 3560	Technical Writing	3
TCH COM 2560	Technical Marketing Communication	3
TCH COM 3440	Theory of Visual Technical Communication	3
TCH COM 4085	Internship in Technical Communication (individual enrollment)	3
TCH COM 4450	International Dimensions of Technical Communication	3
TCH COM 4530	Help Authoring	3
TCH COM 4450	Proposal Writing	3
TCH ED 5510	Technical Editing	3
TCH COM 5530	Usability Studies	3
TCH ED 5560	Web-Based Communication	3

TCH COM 5610	History of Technical Communication	3
TCH COM 5620	Research Methods in Technical Communication	3

¹ Pending Faculty Senate approval.

Students may use ENGL 4890, ENGL 4892, ENGL 4870, ENGL 4871, and ENGL 4872 as their capstone course.

When the student has completed requirements for the certificate, the coordinator will notify the university registrar and the college from which the student will graduate. Upon the student's graduation, completion of the Online Technical Writing Certificate will be noted on the official transcript and a certificate will be mailed to the student's residence. Students who have graduated before completing the Online Technical Writing Certificate will receive the certificate in the mail and will have the certificate entered on their official transcripts.

Graduate Studies

Admission Requirements

To enter the graduate program in English a candidate must satisfy the requirements both of the Graduate School and the Department of English. A candidate should have a bachelor's degree, with at least 18 hours in English above the freshmen level, 12 of which must be in literature. Normally, only students with a grade point average of 3.0 in undergraduate English courses and an overall undergraduate average of 2.75 will be considered. Though the English department welcomes scores from the Graduate Record Aptitude Exam and letters of recommendation, it does not require either of these. (Students applying for Teaching Assistantships, please see "Financial Aid and Teaching Assistantships.")

The graduate coordinator of the English Department with the advice of the graduate committee will use the undergraduate record and, and if available, the scores of the GRE general test as the basis for a decision. We welcome letters of recommendation from the applicant's former English instructors and a sample of expository prose. Applications to the MA in English are considered at all times. However, because spaces in graduate courses are limited, it is strongly advised that prospective students submit their applications well before the semester begins in order to gain admission into their appropriate classes.

Teaching Assistantships

A number of teaching assistantships are available for qualified applicants. In addition to the undergraduate record and the scores on the GRE general test, applications should include two letters of recommendation from former English instructors. Applications should be submitted to the graduate coordinator of the English department no later than March 15 preceding the academic year for which the appointment is desired.

Degree Requirements

Master of Arts in English

In addition to the Graduate School requirements, students must complete at least 36 hours, 24 hours of which must be in 5000-level courses. Twelve hours may be taken in 4000-level courses approved by the department and Graduate School.

Required of both concentrations, literature and writing studies:

- ENGL 5000: Introduction to Graduate Study in English. Focuses upon bibliography, research methods, and literary criticism. Should be taken at the outset of the program, for graduate (not undergraduate) credit.

Students who choose a literature track must also take at least one course in each of the following six areas:

- Area 1, British literature before 1660
- Area 2, British literature between 1660 and 1900
- Area 3, Twentieth-century literature (British, American, post-colonial, or in translation)
- Area 4, American literature
- Area 5, Theories of writing, criticism, language, and/or culture
- Area 6, Literature in translation study of a particular literary genre, or a course in another relevant discipline

Students who choose the writing studies track must take:

- 18 hours in literature courses providing broad coverage rather than a narrow focus on a particular genre or historical period (ENGL 5000 constitutes three of these required literature credits)
- 18 hours in writing studies courses (including ENGL 5840)

If students choose the thesis option (6 hours) they will take 15 hours in literature and 15 hours in writing studies.

Thesis Options

Students may elect the thesis option, which requires a total of 6 hours of thesis credit. The thesis will engage the student in sustained and self-motivated study through the processes of research, conferring with advisors, drafting and revising text. The thesis must be approved and assigned a grade by a thesis committee. The student will select a major professor who, after consulting with the chair and the graduate coordinator, will select two other members of the committee.

Literature Emphasis: The thesis should demonstrate original thought and substantial research and may be a critical study of literary works or a theoretical exploration of issues related to literature.

Writing Studies Emphasis: The final document will demonstrate significant familiarity with scholarship in Writing Studies through the critical analysis and clear synthesis of published research, observational data (where appropriate) and the student's thoughts/views/reflections/positions. The thesis may be a critical study, theoretical exploration or descriptive assessment of fieldwork drawing on writing, language, rhetorical, socio-cultural or reading theories; literacy; and the history of writing instruction; composition pedagogies; technologies.

Master of Fine Arts in Creative Writing

The application process is identical to that for the master of arts degree, with these exceptions: there is one annual deadline for all applications, Feb. 15; a writing sample is required (15-20 poems or 20-40 pages of fiction); the GRE test is required only if the applicant seeks financial aid or a teaching assistantship.

In addition to the Graduate School requirements, students must complete at least 39 hours, 30 of which must be in 5000-level courses. Nine hours may be taken in 4000-level courses approved by the department and Graduate School. Students will specialize in one genre, poetry or fiction. They must complete the following course work: 15 hours of workshops, three hours of literary journal editing (ENGL 5190), 3 hours of either ENGL 5170 or ENGL 5180 depending on specialization (fiction

writers take ENGL 5170 and poets take ENGL 5180), 3 hours thesis (ENGL 6010). Total designated hours, 24. Any of the following can make up the remaining 15 hours, but we especially recommend the first three:

1. ENGL 5180 for fiction writers and ENGL 5170 for poets, the opposite of the students' specialization.
2. A contemporary literature class offered by the MFA program or the MA program
3. A composition theory course, recommended mainly for those who want to teach later
4. another workshop
5. ENGL 5190, literary journal editing, a second time
6. Any other graduate level class in literature, linguistics, or composition offered by the Department of English
7. 5200-MFA readings course, or an independent study-IF you can find someone to work with you.
8. Up to 3 (9 hours) of 4000 level undergrad lit or linguistics classes offered by the Department of English, recommended especially for those without an English background.
9. One three hour class outside the Department of English, at least a 4000 level, and with all needed permissions from both departments that will enhance the student's writing.

Complete information may be found in The Master of Fine Arts in Creative Writing, available from the English department.

Graduate Certificate in the Teaching of Writing, Gateway Writing Project.

Jointly housed in the Division of Teaching and Learning and the Department of English, this Graduate Certificate prepares teachers at all levels (K-12, college, adult) to improve their students' performance in writing. The program also emphasizes using writing as a means to promote learning in all content areas. All courses provide opportunities for teachers to write, revise, share feedback, and reflect on their own writing development. Based on the National Writing Project's core belief that teachers of writing must themselves be writers, the Graduate Certificate in the Teaching of Writing brings together sound pedagogy, composition theory, and writing practice.

The Certificate is an 18-hour program through the Gateway Writing Project (GWP); it may also be coordinated with other graduate programs. Certificate courses may be applicable to the M.A. in English with emphasis in composition or to various M.Ed. programs. The GWP Certificate is especially appropriate for post-master's candidates who wish to pursue a specialization in teaching writing. The Graduate Certificate in the Teaching of Writing requires a 12 semester-hour core of courses developed by the Gateway Writing Project: The GWP invitational institute (6 hrs), a designated "topics" course (3 hrs.), and an exit course (3 hrs.). The Certificate requires a minimum of 12 semester hours at the 5000 or 6000 level or above. Electives (6 hrs.) may be chosen from approved offerings in English or Education.

Admission

Applicants must be admitted to Graduate School and be selected by the faculty admissions committee for the Gateway Writing Project's Certificate in the Teaching of Writing. The committee will review candidates on the basis of an interview, an application essay, and supporting documentation. Criteria include experience teaching writing at any level and academic record, especially in writing and the teaching of writing.

Prerequisites

ENGL/SEC ED 4880	Writing For Teachers (or an equivalent course in teaching writing)	3
------------------	---	---

Coursework or competency in basic computer application.

Required Core Courses

ENGL 4850/TCH ED 5850	Topics In The Teaching Of Writing (designated topics)	3
ENGL 6880	Gateway Writing Project	6
TCH ED 6890	Seminar In Professional Writing For Teachers (exit course)	3

Total Hours 12

Electives

Electives may be chosen from other Gateway Writing Project offerings or from courses offered by the appropriate academic department with advisor's approval. These electives must include at least one more 5000-6000 level course.

Electives 6

Suggested electives applicable to an MA in English with writing emphasis:

ENGL 5800	Modern Linguistics
ENGL 5840	Theories Of Writing
ENGL 5860	Writing/Reading Theory
ENGL 5870	Composition Research
ENGL 5890	Teaching College Writing

Suggested electives applicable to an M.Ed. in Elementary or Secondary Education ELE:

ELE ED 6387	Literacy Acquisition And Learning For Diverse Students
ELE ED 6482	Problems And Research In Teaching Elementary School
ED REM 6714	Action Research In Education

Total Hours 6

Courses in adult and higher education may also be appropriate. For complete information, see The GatewayWriting Project's Graduate Certificate in Teaching Writing, available from the English Department, the Division of Teaching and Learning, and the GWP Director.

Total Hours: 120

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Courses

ENGL 1100 First-Year Writing (MOTR ENGL 200): 3 semester hours

Integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. Fulfills 3 hours of the General Education requirement for Communicating Skills. Does not count toward the major in English.

ENGL 1110 First-Year Writing for International Students: 3 semester hours

Prerequisite: Essay proficiency test or a TOFEL score of 500 or above. Designed for any student whose first language is not English. Integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. Special attention given to verb tenses, idioms, articles, and syntax. Does not count toward the major in English. Substitutes for ENGL 1100 in all university requirements.

ENGL 1120 Introduction to Literature (MOTR LITR 100): 3 semester hours

The student is introduced to the various literary types, including poetry, drama, fiction, and the essay.

ENGL 1170 American Literary Masterpieces: 3 semester hours

An introduction to major authors, works, and themes in American Literature from the nineteenth century to the present.

ENGL 1710 Native American Literature: 3 semester hours

Same as ANTHRO 1710. The course surveys the literature of American Indians from its oral tradition of myth, legend, song and oratory through its modern forms. The course satisfies the ethnic literature requirement for Missouri state certification in secondary education and the cultural diversity requirement.

ENGL 1800 Reading Life: 3 semester hours

This course teaches college-level reading in the Humanities. The course primarily covers written texts, but may also include various genres in music, television and film, and theater. The course may be counted towards the major or minor in English.

ENGL 1950 Topics in Literature: 3 semester hours

This course will introduce the student to selected literary topics and/or genres. Each semester the department will announce topics and course content. Topics such as alienation, justice, and the absurd, and genres such as science fiction and contemporary drama are typical possibilities.

ENGL 2020 Introduction to Creative Writing: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course is a creative writing survey and workshop focusing on the study of three genres—short fiction, poetry, and creative nonfiction. Students learn primary concepts and techniques of craft, including narrative, voice, character, setting, imagery, metaphor, point-of-view. Students will explore literary conventions specific to each genre, as well as universal qualities that make all writing effective for an audience. The course requires three different kinds of writing: brief analytic essays, open-ended exploratory exercises, and carefully-revised original work. This course fulfills the core requirement in Creative Writing and counts toward the Certificate in Writing.

ENGL 2040 Fiction Writing Jumpstart: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course provides exercises, discussions, models, and practice for discovering short stories and the many ways to tell them. Students will read published short stories to learn how other writers have worked with point of view, distance, voice, plot, dialogue, setting, and characterization. Students will also write exercises and stories workshop critique. Students who have taken ENGL 2060 may not take ENGL 2040 for credit. The course fulfills the core requirement in Creative Writing and counts toward the Certificate in Writing.

ENGL 2080 Advertising Copywriting: 3 semester hours

Same as MEDIA ST 2080. To give students a hands-on approach for writing advertising material for print and broadcast against tight deadlines in a professional setting.

ENGL 2110 Information Literacy: 3 semester hours

Designed especially for humanities and fine arts majors, this course introduces students to the main components of information literacy, including digital, web, and media literacies as well as library databases. Students work with both digital and print materials to find, evaluate, and synthesize information while applying the critical thinking habits of questioning and reasoning. Frequent writing and multimedia assignments will provide practice in using various technologies to assemble and to share information.

ENGL 2120 Topics in Writing: 3 semester hours

Prerequisite: ENGL 1100 or ENGL 1110. This course will introduce the student to writing in specific areas. The department will announce topics and course content in the schedule. Possible topics are argumentation, reading and writing about public affairs, sports reporting and writing, and writing about science. A student may repeat the course once when topics are different. The course counts toward the certificate in writing.

ENGL 2125 Introduction to Technical Communication: 3 semester hours

This course introduces students to the role of the professional technical communicator in business and industry. Students will explore methods of developing technical documents, including critical analysis, information design, and rhetorical expression.

ENGL 2160 Introduction to American Studies: 3 semester hours

Same as HIST 2160. This course introduces students to the multidisciplinary nature of American Studies and is a required course for those who wish to complete the minor in American Studies. It reviews the discipline from its origins in the 1930s, and it introduces students to St Louis' rich resources for American Studies.

ENGL 2240 Literature of the Old Testament: 3 semester hours

A comprehensive understanding of the Old Testament, its literary background and significance for western civilization.

ENGL 2250 Literature of the New Testament: 3 semester hours

A comprehensive understanding of the New Testament, its literary background and significance for western civilization.

ENGL 2330 Introduction to Poetry: 3 semester hours

A close study of poems, with special emphasis on the varieties of poetic form, and the means of interpretation and evaluation.

ENGL 2340 Introduction to Drama: 3 semester hours

A close study of major dramatic works in various modes, to introduce the student to the forms and techniques of dramatic literature.

ENGL 2350 Introduction to Fiction: 3 semester hours

A close study of major prose fiction, with particular attention to the varieties of fictional forms and techniques.

ENGL 2360 Hey, Have You Read _____?: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course satisfies the core curriculum requirement for the literature in English area. It introduces students to approaches to reading literature in the 21st century. The course can focus on a specialty area, such as a genre, time period, or nationality, or on a theme transcending several specialty areas. Students will learn to read closely and begin to look at literature through various theoretical or cultural lenses.

ENGL 2370 Drama: The Greatest Hits: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course satisfies the core curriculum requirement for the literature in English area. It studies some of history's most famous dramas both as literary forms and as cultural expressions. Plays will therefore be considered for themselves—for their genre, structure, and language—as well as for their social function, in an effort to better understand the complex communal values, settings, and crises which produced them. Students will read and discuss a wide variety of well-known plays from ancient Greece and Rome, the early modern English stage, and modern and contemporary culture.

ENGL 2400 Rhetorical Ways with Words: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course focuses on the diverse purposes and uses of language and writing, encouraging students to consider their functions beyond solely academic and literary realms. Specifically, students will investigate how language and writing are connected to identity, power, community, and knowledge creation. To accomplish these broad goals, students will read critical scholarship from a variety of related disciplines. They may practice field-specific methods of inquiry and/or investigate local, regional, individual rhetorical and language practices and engage in print and/or multimodal composition. This course satisfies the core curriculum requirement for the Language and Writing Studies area.

ENGL 2410 Literate Lives: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course raises definitional and exploratory questions: What is literacy? How does it change across time? Who has access to it? How can literacy both empower and marginalize people? To explore these complex questions, students will investigate the ways in which contemporary practices of literacy—reading, writing, listening, speaking, digital composing, and critical thinking—function in the lives of individuals, communities, and cultures. Students will interrogate current definitions of literacy, study scholarship about literacy, explore literacy myths, and reflect on how their own literate lives have been shaped. They may engage in field work and interact with local literacy communities. This course satisfies the core curriculum requirement for the Language and Writing Studies area.

ENGL 2810 Traditional Grammar: 3 semester hours

An introduction to the terms and concepts of traditional grammar, beginning with functions of the noun and forms of the verb in simple sentences, moving to more complex structures such as subordinate clauses and verbal phrases, and ending with the application of this material to issues of Standard English.

ENGL 2830 Introduction to English Language Variety: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course introduces students to the intersections of language and culture, including some of the many dialects of English. Students will learn why people from different cultural groups and regions use different versions of English, how they define themselves based on vocabulary, accent, and phrasing, and how these aspects of language change over time. Topics include variation in accents, morphosyntactic variation (grammar), lexical variation, and the social dimensions of language variation. This course satisfies the core curriculum requirement for the Language and Writing Studies area.

ENGL 3030 Improving on the Blank Page: Writing Poetry: 3 semester hours

Prerequisite: ENGL 1100 or the equivalent or consent of instructor. This course digs into questions of form and technique in poetry. Students will study and practice form, prosody, figurative language, and other techniques for (to borrow from Chilean poet Nicanor Parra) improving on the blank page. This course may be repeated once for a total of 6 credit hours. It counts toward the Certificate in Creative Writing.

ENGL 3040 Lying to Tell a Truth: Writing Fiction: 3 semester hours

Prerequisite: ENGL 2040 or ENGL 2060 or the equivalent or consent of instructor. This course examines and provides examples of characterization, dialogue, point-of-view, distance, weight, plot, setting, and more. Students will read published short stories, and discuss the idea of writing as discovery and exploration, that writers work out of curiosity and bewilderment and tell lies to arrive at a truth.

ENGL 3090 Turning the Kaleidoscope: How We Look at Texts: 3 semester hours

Prerequisites: ENGL 1100 or equivalent and 56 credit hours. This course introduces the use of literary theory in reading and writing about literary texts. Students learn and practice conventions of writing in English studies, basic literary research, and MLA documentation. Strongly recommended for English majors specializing in literature or anticipating graduate study in English. May not be taken on satisfactory/unsatisfactory basis. Counts towards the Certificate in Writing.

ENGL 3100 Junior-Level Writing: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 credit hours) and 56 credit hours. Focuses on writing and literacies in various contexts. Builds on intellectual maturity, knowledge, and abilities gained through prior university studies. Enhances analytical, communicative, persuasive, and explanatory capabilities. Includes complex readings and research. Fulfills the university's requirement for a junior-level course in Communicative Skills. Counts toward the Certificate in Writing. May not be taken on a satisfactory/unsatisfactory basis.

ENGL 3110 Junior-Level Writing for International Students: 3 semester hours

Prerequisites: ENGL 1110 or equivalent (3-6 credit hours) and 56 credit hours. This course, designed for any student whose first language is not English, enhances analytical, communicative, persuasive, and explanatory capabilities in contemporary American English. It emphasizes academic reading, writing, research, and documentation. It fulfills the university's junior-level writing requirement and counts toward the Certificate in Writing.

ENGL 3120 Business Writing: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course further develops the experienced writer's style and analytical capabilities to the level of sophistication necessary for upper-division writing assignments and for business and professional settings. Writing assignments may include business correspondence, reports, resumes, proposals, analyses, feasibility studies, and articles for in-house publications. The course emphasizes clarity, conscientiousness, organization, format, style, tone and mechanical correctness; expands upon students' research and documentation skills; and requires research in university libraries. Fulfills the University's requirement for a junior-level course in communicative skills. It may not be taken on a satisfactory/unsatisfactory basis.

ENGL 3130 Technical Writing: 3 semester hours

Prerequisite: ENGL 1100 or equivalent (3-6 hours) and junior standing. The major elements of industrial technical writing. Writing assignments include technical definitions, abstracts and summaries, mechanism descriptions, instructions, process analyses, technical reports and proposals. Emphasis is placed on clarity, conciseness, organization, format, style and tone. The course includes an introduction to research methods and documentation. All readings are selected from industrial material. Fulfills the University requirement for junior-level course in communicative skills, subject to the approval of the student's major department. May not be taken on the satisfactory/unsatisfactory option.

ENGL 3150 Feature Writing: 3 semester hours

Same as MEDIA ST 3150. Prerequisite: ENGL 1100 or equivalent. Study of freelance and staff-written magazine or newspaper feature articles. Emphasis on relationship between types of publication and article content, research methods, and writing style. Frequent short assignments -- journal entries, interviews, library projects, article critiques, and market reports -- lead to production of full-length feature articles. May not be taken on the S/U option. The course counts toward the Certificate in Writing.

ENGL 3160 Writing in the Sciences: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and 56 credit hours. This course is designed to teach students how to write effectively in the sciences. Writing assignments include short reports, proposals and a major project; projects may include a research or analytical report, a formal proposal or a procedures/instructions manual. The course includes an introduction to research methods and documentation. This course fulfills the University's junior-level writing requirement and may not be taken on the satisfactory/unsatisfactory option.

ENGL 3180 Reporting: 3 semester hours

Same as MEDIA ST 3180. Prerequisite: ENGL 3140 or equivalent. Theory and practice of reporting news for publication in the print media. Includes one classroom session and one field assignment weekly. Stories must be filed within deadline limits. Writing emphasis is on clarity, conciseness, and accuracy. The course counts toward the certificate in writing.

ENGL 3200 Composing Disability: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course offers students an understanding of disability as a complex and crucial part of the world and human experience. Students will approach disability as a matter of identity, language, writing, power, education, politics, literature, art, and more. More specifically, they will read disability studies critical theory, literary works, and personal narratives; create accessible multimodal projects; engage in scholarly and/or community-based research; and candidly discuss assumptions about disability. Through this work, students will assess the value and effect of different ways of thinking about disability and understand the core concepts of disability studies and its emergence as a field.

ENGL 3201 Narratives from the Forever Wars: 3 semester hours

Same as MEDIA ST 3201 and MVS 3201. This course studies literature and film written by and about those who served in the wars in Iraq and Afghanistan, with particular interest in how veterans as individuals are represented in it.

ENGL 3280 Public Relations Writing: 3 semester hours

Prerequisite: ENGL 3100 or equivalent. An introduction to the process of planning, producing, and evaluating written public relations messages. Writing assignments include media releases, letters, memos, position papers, background papers, brochures, and reports and proposals.

ENGL 3310 English Literature Before 1790 (MOTR LITR 102): 3 semester hours

Prerequisite: ENGL 1100 or equivalent. This course examines the development of English literature from the Middle Ages through the eighteenth century. Students will be introduced to major literary movements and themes through the reading and analysis of representative works of selected major authors. This course fulfills the British Literature requirement for the major.

ENGL 3320 British Literature in the Long 19th Century (MOTR LITR 102): 3 semester hours

Prerequisite: ENGL 1100 or equivalent. This course meets the requirement for one 3000 level course in British literature. It surveys the arc of British literature from about 1790 into the early 20th century: the Romantic, Victorian, and Modernist eras.

ENGL 3330 Reformers, Revolutionaries, and Romantics in the British Romantic Era: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. Students read poetry and prose by several major writers of the British Romantic period. This course meets the requirement for one 3000 level course in British literature.

ENGL 3340 Full Speed Ahead! Literature in the Dizzying Victorian Era: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. Students read poetry, essays, and fiction by major writers from the Victorian era of British literature. This course meets the requirement for one 3000 level course in British literature.

ENGL 3350 Slouching Toward Chaos: the Early 20th Century in British Literature: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. Students read poetry, drama, and fiction by major writers of the Modernist era of British literature. This course meets the requirement for one 3000 level course in British literature.

ENGL 3500 Special Studies: 1-3 semester hours

Prerequisite: A course in area of proposed work and consent of instructor. Individual work, with conferences adjusted to needs of the student. May not be used to meet specific English department distribution and language requirements. May be repeated for a maximum total of four hours credit.

ENGL 3510 World Literature Before 1650 (MOTR LITR 200): 3 semester hours

Prerequisite: ENGL 1100. This course surveys World Literature from the earliest times to 1650. Students will examine diverse literary works in a variety of genres and voices. The course will include literary works from diverse traditions throughout the world, excluding literature from the United States and England.

ENGL 3520 World Literature After 1650 (MOTR LITR 200): 3 semester hours

Prerequisites: ENGL 1100. This course surveys World Literature from 1650 to the present. Students will examine diverse literary works in a variety of genres and voices. The course will include literary works from diverse traditions from throughout the world.

ENGL 3530 Contemporary World Literature: 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course covers selected World Literature from the 20th and 21st centuries with emphasis on non-European literatures. This course may include works from Europe, Latin American, the Middle East, Africa, and Asia; it excludes literature from the United States and England.

ENGL 3710 American Literature Before 1865 (MOTR LITR 101): 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course features representative selections from American authors from the early seventeenth century to the Civil War. This course fulfills the American Literature requirement for the major.

ENGL 3720 American Literature After 1865 (MOTR LITR 101): 3 semester hours

Prerequisites: ENGL 1100 or equivalent. This course examines dramatic upheavals in society that have engendered continuous innovation in American literature since 1865. It will look closely at a variety of individual authors motivated by these artistic, cultural, political, and psychological disturbances; we will also pay close attention to specific literary movements, from Naturalism to Transrealism, energized by these societal changes. This course fulfills the American Literature requirement for the major.

ENGL 3800 Topics in Women and Literature (MOTR LITR 106): 3 semester hours

An examination of the role of women in literature, either as figures in literary works or as writers. Specific topics to vary from semester to semester. Since the topics of ENGL 3800 may change each semester, the course may be repeated for credit if the topics are substantially different.

ENGL 4030 Contemporary Critical Theory: 3 semester hours

This course is to acquaint students with a range of critical methodologies that have gained currency since the 1960's; topics may include formalist, structuralist, post-structuralist, Marxist, reader-response, psychoanalytic, feminist, cognitive, and evolutionary approaches to literature and culture.

ENGL 4060 Adolescent Literature: 3 semester hours

The course will expose students to the large variety of quality adolescent literature available for reading and study in middle and high school classes. It will also examine the relevance of a variety of issues to the reading and teaching of adolescent literature, among them: reader response; theory and practice; multi-culturalism; literacy; the relation of adolescent literature to "classic" literature the role of adolescent literature in interdisciplinary studies; adolescent literature as an incentive to extracurricular reading.

ENGL 4080 Narrative, Cognition, and Emotion: 3 semester hours

Prerequisites: ENGL 2320; ENGL 3090, prerequisite or co-requisite. Examines narrative theory in the light of recent research into cognitive organization and the structure of the emotions. Traditional and contemporary theories of narrative--or realism, symbolism, point of view, tone, and genre--are developed through recent findings in empirical science. A variety of stories and novels are used as test cases for theoretical propositions.

ENGL 4130 A Machine Made of Words: Writing Your Best Poems: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. This course examines in more detail the ways in which poets construct machines from words—that is, the way that the words of a poem provide its verbal, emotional, and intellectual energy. Through the examination and discussion of both contemporary published poetry and the work of students in the class, students will consider the question: how do poems use language to make sense of (or to defamiliarize) the world and our experience of it? The course counts toward the Certificate in Writing.

ENGL 4140 Polishing Your Stories: Producing a Publishable Short Story: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. This course gives student writers tools and practice in re-thinking and rewriting their stories. It is for students who are serious about writing stories that can be published in litmag, Bellerive, or other journals. Students will produce drafts for workshop critique and will rewrite them producing at least one that is polished enough for publication. The course counts toward the certificate in Writing.

ENGL 4150 Creative Non-Fiction: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. This course will examine the aesthetic and technical concerns of the writer of creative non-fiction. Students will read published essays and write their own to submit for workshop. This course counts toward the Certificate in Writing.

ENGL 4160 Special Topics in Writing: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. Special topics in writing that are not covered in other 4000level English courses. Since the topics of ENGL 4160 may change each semester, the course may be repeated for credit if the topics are substantially different.

ENGL 4180 Novel Beginnings: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. This course teaches students to engage the reader when writing a Sci-fi / Fantasy / Thriller / Young Adult / Literary novel. Students will work on getting the balance right, on creating a compelling event, dimensional characters, an engaging plot, a setting that feels real, and a point-of-view strategy. Students learn about key ingredients that make a novel beginning interesting to a reader and present their novel beginnings in a workshop format for revision.

ENGL 4260 Chaucer: 3 semester hours

The course concentrates on the poetry of Geoffrey Chaucer, including the Canterbury Tales, early poetic works, and the Troilus and Criseyde. All readings are in the original Middle English.

ENGL 4270 Medieval English Literature: 3 semester hours

A survey of old and middle English literature from Beowulf to Malory's Morte d'Arthur, exclusive of Chaucer. All works are read in modern English translations.

ENGL 4320 Sixteenth-Century Poetry and Prose: 3 semester hours

A broad selection of writers from the late 15th century through 1603, including Thomas More, the Sidneys, Spenser, and Shakespeare's sonnets.

ENGL 4350 Milton: 3 semester hours

All the minor poems and the three longer poems with some attention to the major prose, Milton and his relation to the politics, theology and literature of the seventeenth century.

ENGL 4360 Shakespeare's Friends and Rivals: 3 semester hours

Prerequisites: Junior standing or consent of instructor. This course studies the professional London stage from the 1580s to the 1620s with particular emphasis on the drama of Shakespeare's contemporaries. Though Shakespeare will not be the focus in this course, connections with his works will be discussed. Students will learn the conventions of dramatic genres and how to situate plays in their historical, cultural, and literary contexts. They will also explore how playwrights responded to the theater market in which they exhibited their dramatic wares and the extent to which they saw one another as rivals or collaborators.

ENGL 4370 Shakespeare: Tragedies and Romances: 3 semester hours

Prerequisites: Junior standing or consent of instructor. This course explores Shakespeare's tragedies and romances, with particular attention to their genre as well as their relation to the cultural issues of Shakespeare's time. Students will learn to see Shakespeare as a dramatic craftsman and explore the question of his contribution to English literature: whether he saw himself as an innovator or inheritor of well-known stories from the classical tradition, Britain's chronicle histories, scripture, and legend. Shakespeare's narrative poems as well as modern film adaptations may also be featured.

ENGL 4380 Shakespeare: Comedies and Histories: 3 semester hours

Prerequisites: Junior standing or consent of instructor. This course explores Shakespeare's comedies and histories, with particular attention to their genre as well as their relation to the cultural issues of Shakespeare's time, above all the place of women and the importance of marriage and male friendship. Students will learn how Shakespeare's plays explore the rights of citizens and perhaps challenge accepted notions of political power. Students will also uncover Shakespeare's debt to ancient and contemporary forms of comedy as well as his innovative contributions to that dramatic form. The sonnets as well as modern film adaptations may also be brought into the discussion of these questions.

ENGL 4450 The Eighteenth-Century English Novel: 3 semester hours

The origins and early development of the English novel, from Defoe to Jane Austen.

ENGL 4540 The Nineteenth-Century English Novel: 3 semester hours

Novels of the Romantic and Victorian periods, from Austen to George Eliot.

ENGL 4550 Novels into Films: The Nineteenth Century: 3 semester hours

Prerequisites: ENGL 3090, ENGL 3320. Novels by Austen, Eliot, Wilde, Hardy, and others read in themselves and as interpreted in film. Comparisons of the representational and aesthetic techniques available to novels and film.

ENGL 4580 Literature of the Late Nineteenth and Early Twentieth Centuries: 3 semester hours

Literature of the period between 1870 and the First World War, including works by writers such as Hardy, Conrad, James, Wilde, Stevenson, Shaw, Jefferies, and Wells.

ENGL 4610 Selected Major American Writers I: 3 semester hours

American literature of the nineteenth century: Emerson, Thoreau, Hawthorne, Melville, Whitman and others.

ENGL 4620 Selected Major American Writers II: 3 semester hours

American literature of the late nineteenth and early twentieth centuries: Dickinson, James, Twain, Cather, Frost, Dreiser and others.

ENGL 4640 American Fiction to World War I: 3 semester hours

Development of the novel and short story in America.

ENGL 4650 Modern American Fiction: 3 semester hours

The novel and short story in America since World War I. There may be some attention to British and continental influences.

ENGL 4740 Poetry Since World War II: 3 semester hours

Reading and analysis of contemporary poetry.

ENGL 4750 Modern British Fiction: 3 semester hours

Critical reading and analysis of British fiction of the twentieth century. There may be some attention to American and continental influences.

ENGL 4770 Modern Poetry: 3 semester hours

Critical reading and analysis of poetry of the late nineteenth and early twentieth centuries. Yeats, Eliot, Frost, Williams and others.

ENGL 4790 Rhetoric and Social Justice: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. This course introduces students to rhetoric as integral to language, communication, and meaning-making. Students will read rhetorical history and contemporary scholarship and theory; apply theories to various scenarios and artifacts; and become more thoughtful practitioners of rhetoric in their own lives. Specifically, the course introduces rhetoric through the lens of social justice, offering students an opportunity to use rhetorical theories and methods to better understand current social events, activist movements, practices of civic engagement, and corresponding media representations.

ENGL 4800 Introduction to English Linguistics: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. This course presents a survey of linguistics with emphasis on what the field reveals about the English language. Topics include the sounds of language, grammar, writing systems, language acquisition, language in society, language history, dialects, and usage.

ENGL 4810 Descriptive English Grammar: 3 semester hours

Prerequisites: ENGL 3100 or equivalent; ENGL 2810 or passing grade on English-Education Test of Basic Grammar. This course presents a descriptive study of modern English morphology and syntax (grammar) from the perspectives of traditional, structural, and transformational grammar.

ENGL 4820 History of the English Language: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. A historical survey of the English language from its IndoEuropean roots through Old and Middle English to the present. Topics include changes in sound, meaning, and grammar, as well as developments in American English, including regional and social dialects.

ENGL 4830 Sociolinguistics: 3 semester hours

Prerequisites: ENGL 3100 or equivalent. This course presents a survey of topics in sociolinguistics, with some emphasis on language variation in English. The course offers both quantitative and qualitative approaches. Topics may include social dialectology, variationist sociolinguistics, third-wave sociolinguistics, ethnography of communication, language in schools, language and ethnicity, language and gender, and language and sexuality.

ENGL 4850 Topics in the Teaching of Writing: 1-3 semester hours

Same as TCH ED 5850. Prerequisites: ENGL 3100 or equivalent. Special topics in the practice of and pedagogy of writing designed for in-service teachers. Topics may include writing at specific grade levels, writing/reading workshops, writing in urban settings, writing across the curriculum, action research, new technology, classroom and district-level assessment. May be repeated once for credit if topics differ. Counts toward Certificate in Writing.

ENGL 4860 Editing and the Production Process: 3 semester hours

Prerequisites: ENGL 3100 or equivalent; ENGL 2810 or ENGL 4810. This course provides students an opportunity to perform professional-level copyediting and proofreading, navigate several industry-standard publishing style manuals, understand the basic stages of the book production process and editorial roles at various stages during that process, and recognize and question trends in the practice and execution (media, format) of copyediting. This course counts toward the Professional, Creative, and Technical Writing Certificates.

ENGL 4864 Technical Editing: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course covers the principles and practices of technical editing, including usability, audience analysis, contextual editing, the conventions of scientific and technical communication, and the role of the editor in document development and publication. Students will also learn standard practices of copy editing and the use of style guides.

ENGL 4865 Content Strategy: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course examines the practice of technical communication in content management system (CMS) environments and covers such subjects as single sourcing, topic-based writing, and adaptive content. Students will learn how to perform a content audit, engage in content modeling, create content templates, and use Framemaker or a similar tool to structure content.

ENGL 4866 Help Authoring: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course addresses the technological and rhetorical skills necessary for creating effective online help systems, including context-sensitive help for computer applications.

ENGL 4867 Proposal Writing: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course familiarizes students with many aspects of writing proposals for various purposes in academic, professional, and public spheres. It offers students opportunities to write documents to promote their academic, professional, or personal goals or those of their organization(s).

ENGL 4869 Usability Studies: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course addresses the methods used by technical communicators to evaluate usability. It focuses on methods used to evaluate human interaction with communication tools and students will learn how to make products more suitable for human use.

ENGL 4870 Advanced Business and Technical Writing: 3 semester hours

Prerequisites: ENGL 3100 or its equivalent as judged by the instructor. An advanced, project-oriented course to produce substantial, multifaceted business and technical writing projects. These might include reports, manuals, proposals, Web projects, computer documentation, or other advanced written assignments. These projects demonstrate the ability to handle complex assignments requiring initiative, independent work, and professional-level writing skills.

ENGL 4871 Publishing: Writers, Editors, and Readers: 3 semester hours

Prerequisites: ENGL 3120, ENGL 3130; or equivalent. Students will explore how the technological revolution has changed the way writers write, editors edit, and readers read. Topics covered will include the social and political implications of these technological advances in book, magazine, and online publishing. We will discuss how the roles of editors and writers have changed. Students will develop a semester writing or editing project that emerges out of this exploration. This course is for writers interested in having their work published and for anyone interested in working in the publishing field. This course counts toward the Professional, Creative, and Technical Writing Certificates.

ENGL 4872 Technical Presentations: 3 semester hours

Prerequisites: ENGL 3120, ENGL 3130, or equivalent. Students learn about different kinds of presentations given in professional contexts and the technologies used to produce them. They will learn to create powerful presentations that make memorable presentations. The course is asynchronous and 100% online, and is designed for graduate students preparing papers for conferences, and for technical and business professionals presenting to their bosses, colleagues, and clients. This course counts toward the Professional and Technical Writing Certificate.

ENGL 4874 International Dimensions of Technical Communication: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course examines complexities of communication of technical information worldwide. It includes topics such as graphics, icons, symbols; user interface design; intercultural communication.

ENGL 4876 Research Methods in Technical Communication: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course addresses essential research methods in technical communication, including audience analysis, interviewing techniques, working with subject matter experts, and experimental research design.

ENGL 4877 Writing in Social Media: 3 semester hours

Prerequisites: ENGL 1100 or equivalent (3-6 hours) and junior standing. This course will address theory and practice of communication through social media. It will emphasize the role of social media in industry.

ENGL 4880 Writing for Teachers: 3 semester hours

Same as SEC ED 4880. Prerequisite: ENGL 3090 or junior level English. Writing for Teachers is an English-education course that supports writing across the curriculum for both pre-service English and content area teachers. Teacher candidates learn writing theories and literacy strategies to help their future students construct meaning from their discipline. The course works best for those who are completing level II or beginning level III education courses. The course counts toward the Certificate in Writing.

ENGL 4890 Writing Internship: 3 semester hours

Prerequisites: ENGL 3100 or its equivalent as judged by the instructor. Course limited to students who are completing certificates in writing. May be taken concurrently with the final course in the certificate sequence. Students work in a supervised internship to complete professional writing assignments. Special consent form required.

ENGL 4892 Independent Writing Project: 3 semester hours

Prerequisites: ENGL 3100 or equivalent as judged by instructor. Course limited to students who are completing their certificates in writing. May be taken concurrently with the final course in the certificate sequence. Students work individually with an instructor to complete an extensive creative writing or critical analysis writing project. This course is available on a limited basis only with the approval of the Coordinator and faculty sponsor. Special consent form is required.

ENGL 4895 Editing "Litmag": 3 semester hours

Prerequisites: ENGL 3100 or equivalent and at least two creative writing courses. Course is primarily for students nearing the end of their certificates in writing. Students in this course create "Litmag", the UM-St. Louis student literary magazine. Students will call for submissions; they will read and select work to be published; and they will produce the magazine, dealing with issues like format, budget, proofreading, print run, advertising, distribution, and publicity. The course is offered only in the spring and culminates with the publication of "Litmag" in late April.

ENGL 4925 The Short Story in World Literature: 3 semester hours

Students will read a wide variety of short fiction, from very brief pieces to novellas, including stories from all over the world and from several different centuries either in translation or in the original English. The course will also cover short theoretical works on narrative and critical commentaries on some of the fiction.

ENGL 4930 Studies in Gender and Literature: 3 semester hours

Same as GS 4930. The course examines the role of gender in literature, including the transformation of literary genres by women writers, writings by women during a particular historical period, and gender relations in literature. Specific topics vary from semester to semester. The course may be repeated for credit with departmental approval.

ENGL 4932 Female Gothic: 3 semester hours

Same as GS 4932. The course examines the historical development of the female gothic, a genre which employs narrative strategies for expressing fears and desires associated with female experience. From the late 18th century to the present, we will trace the persistence of the Gothic vision in fiction and film.

ENGL 4950 Special Topics In Literature: 3 semester hours

Special topics in literature that are not covered in other 4000-level English courses. Since the topics of ENGL 4950 may change each semester, the course may be repeated for credit if the topics are substantially different.

ENGL 5000 Introduction to Graduate Study in English: 3 semester hours

A course designed to prepare students for the professional study of English. The course will both familiarize students with basic bibliographic tools and scholarly methods and introduce them to issues that are of current critical interest to those engaged in the advanced study of literature. These issues include gender, textuality, reader-response, multiculturalism, feminism, psychoanalysis, cultural studies, literary history and the relationship of literature to philosophy, history, and science. Must be taken within the first twelve hours of graduate study.

ENGL 5100 Graduate Workshop in Poetry: 3 semester hours

Prerequisites: Open to students in the creative writing program and to others with permission of instructor. Consists of a writing workshop in which the poetry written by the students enrolled in the course is discussed and analyzed by the instructor and members of the class. Students taking this course will be expected to write original poetry throughout the course. May be repeated for maximum graduate credit of fifteen (15) hours.

ENGL 5110 Graduate Workshop in Fiction: 3 semester hours

Prerequisites: Open to students in the creative writing program and to others with permission of instructor. Consists of a writing workshop in which the fiction (short stories or chapters of a novel) written by the students enrolled in the course is discussed and analyzed by the instructor and members of the class. Students taking this course will be expected to write original fiction throughout the course. May be repeated for maximum graduate credit of fifteen (15) hours.

ENGL 5170 Techniques, Methods, and Effects in Fiction Writing: 3 semester hours

Prerequisite: Open to students in the MFA program and to others with consent of the instructor. This course analyzes the technical choices made by important contemporary fiction writers in the areas of point of view, tone, setting, form, and plot structure, and it examines the effects of those choices. Close consideration is given to fictional techniques that contribute to a story's characterization, tension, interest, reliability, drama, irony, and humor. The course is primarily for creative writers.

ENGL 5180 Form and Theory of Poetry: 3 semester hours

Prerequisites: Open to students in the MFA Program and other graduate students with consent of instructor. This course explores various aspects of traditional and contemporary poetry. The student will gain an understanding of formal poetry-rhyme and meter-as well as of traditional types of poetry, for example, the lyric and the narrative. Throughout the course, an emphasis will be maintained on free verse and a greater understanding of its practice. Students will read selectively in the poetry, theory, and critical approaches of various periods, for example, the romantic and the modern, and within various movements, such as the symbolist or confessional.

ENGL 5190 Literary Journal Editing: 3 semester hours

Prerequisites: Open to students in the MFA program who have had at least two graduate writing workshops and to others with consent of the instructor. In this course students serve as the first readers of all submissions to the university's literary magazine, *Natural Bridge*. Students will read and evaluate poems, short stories, and essays and recommend a body of work to the editorial board of the magazine. The editorial board will then consider the class consensus in its final selection of material for publication. In addition to this primary task of editorial selection, students will also be involved in the productions of an issue of the magazine. May be repeated for maximum graduate credit of nine hours.

ENGL 5200 MFA Readings: 3 semester hours

Prerequisites: Open to students in the MFA program and to others with consent of the instructor. This is an independent reading course. In consultation with an MFA faculty member, students choose works from the MFA Reading List and read them with the goal of broadening and sharpening their technical skills as writers. Students ordinarily choose works in one genre: poetry, the short story, or the novel. Each week the student reads and reports on at least one work. The course may be taken only once.

ENGL 5250 Studies in Middle English Literature: 3 semester hours

Special topics in English literature before 1500.

ENGL 5300 Renaissance Literature: 3 semester hours

Special topics in English literature from 1500 to 1660.

ENGL 5400 Eighteenth Century Literature: 3 semester hours

Studies in Augustan poetry and prose, including drama and fiction, with emphasis on background and major figures.

ENGL 5500 Nineteenth Century Literature: 3 semester hours

Special topics in English romanticism, in Victorian life and thought, and in the development of the novel and of poetry between 1797 and 1914.

ENGL 5600 American Literature Before 1900: 3 semester hours

Selected American writers or topics from the colonial period to 1900.

ENGL 5700 Twentieth-Century American Literature: 3 semester hours

Selected American writers or topics from 1900 to the present.

ENGL 5750 Twentieth-Century British Literature: 3 semester hours

Selected British and Commonwealth writers of the twentieth century.

ENGL 5800 Modern Linguistics: 3 semester hours

Prerequisite: A study of selected topics in the structure of the English language, combining readings in current linguistics publications with original research.

ENGL 5840 Theories of Writing: 3 semester hours

An analysis of major modern theories in composition.

ENGL 5850 Studies in Composition: 3 semester hours

The study of special topics in composition. Topics may include history of composition, psychology of writing, reader response theory, etc.

ENGL 5860 Writing/Reading Theory: 3 semester hours

This course studies the parallel evolution of reading and writing theory and pedagogy. Topics include the influence of psycholinguistics and reader-response theory and the link between reading and writing theory and instruction.

ENGL 5870 Composition Research: 3 semester hours

This course equips students both to analyze and conduct research in composition. Coursework will teach students to evaluate methodologies and implications, to analyze data, and to design their own research projects.

ENGL 5880 Writing in the Content Areas: 3 semester hours

Same as TCH ED 5880. Prerequisites: Graduate standing. This course emphasizes the importance of integrating writing instruction in classrooms across subject areas. Theories of writing and writing instruction will be explored, and students will discuss how to put the theories into practice in their classrooms. Students will learn to explore their own writing process while learning strategies that will help them to teach writing rather than just assign writing. The course examines the tools pre-service and in-service teachers will need to work with diverse learning communities, to utilize best practice in the teaching of writing, and to use writing as a tool for student learning in any content area. Students in this class will be held to professional writing and speaking standards. The course counts toward the Certificate in Writing.

ENGL 5890 Teaching College Writing: 3 semester hours

This course provides the opportunity for practical application of composition theory with an emphasis on improving teaching skills. Strongly recommended for graduate teaching assistants.

ENGL 5910 Studies In Poetry: 3 semester hours

Study of a few selected British and American poets.

ENGL 5920 Studies in Fiction: 3 semester hours

Study of a few selected British and American novelists and short story writers.

ENGL 5940 Seminar in Gender and Literature: 3 semester hours

Same as GS 5940. Gender studies in literature of different periods, types, and genres; satisfies area requirement (1-6) appropriate to its period, national literature, and genre.

ENGL 5950 Seminar in Special Topics: 1-3 semester hours

Special topics which are not covered in other graduate-level English courses.

ENGL 5970 Independent Reading: 1-3 semester hours

Directed study in areas of English for which courses are not available.

ENGL 6000 Thesis: 1-6 semester hours

Prerequisite: 3.5 graduate GPA. Thesis research and writing on a selected topic in English studies. May be taken over two semesters, three (3) hours each semester.

ENGL 6880 Gateway Writing Project: 6 semester hours

Same as TCH ED 6880. Prerequisite: Graduate standing. An intensive course in the writing process and the writing curriculum, designed for experienced teachers. Readings of current theory and research will be related to participants' experience as writers and as teachers. May be repeated for credit, but no more than 6 hours may be applied toward the M.Ed. Counts toward the Graduate Certificate in Teaching Writing.

ENGL 6890 Seminar in Professional Writing for Teachers: 3 semester hours

Same as TCH ED 6890. Prerequisites: TCH ED 6880 and consent of instructor. Capstone seminar for the Graduate Certificate in the Teaching of Writing. Participants will pursue the dual role of writer/ writing teacher by designing individual projects with one of these emphases: (1) research writing based on a classroom inquiry into the teaching of writing; (2) expository and creative writing based on an inquiry into the teacher's own evolution as a writer.

History

General Information

Degrees and Areas of Concentration

Students and Faculty in the History Department are curious and creative. We ask big questions about the past to understand the present and build our future. Passionate about our research and committed to scholarship in the public interest, we partner with museums, archives, schools, and community organizations to share and develop new knowledge and to provide hands on internship opportunities for students. Faculty members bring our diverse backgrounds, experiences, and expertise in a wide range of scholarly fields to our teaching and research. Majors and minors build their skills in writing, research, communication, and analysis. Our students go on to thrive in a wide range of careers: education, business, museums and public history, libraries, law, management.

Majors enjoy small, advanced level classes, ensuring they receive individual attention from faculty committed to their intellectual and professional development. Our respect for diverse ways of knowing and active collaboration with departments and institutions on campus and in the community make the History Department to interdisciplinary certificates and minors in African and African American Studies, East Asian Studies, American Studies, Latina/Latino Studies, and Religious Studies. The department offers courses in African, African American, European, Latin American, Japanese, World, and United States history from ancient to modern times. At the bachelor's level, the department offers the B.A. in history, and, in cooperation with the College of Education, the B.S. Ed. in Secondary Education with Emphasis in History and Social Studies and the B.A. in History with Secondary Social Studies

Teacher Certification. Students can complete the History major and minor online.

At the graduate level, the department offers an M.A. in History and an M.A. with emphasis in Museums, Heritage, and Public History. The department also offers a graduate certificate in History Education and a graduate certificate in Museums, Heritage and Public History. These certificates can be taken by itself or in conjunction with the M.A. in History or M.Ed. in Secondary Education.

Undergraduate Studies

General Education Requirements

History majors must meet the university and college general education requirements (p. 41). History courses that will satisfy the university's state requirement are:

HIST 1001	American Civilization to 1865 (MOTR HIST 101)	3
HIST 1002	American Civilization 1865 to Present (MOTR HIST 102)	3
HIST 1003	African-American History	3
HIST 2001	Creating Early America: European Empires, Colonial Cultures, and Native Nations, 1565-1776	3
HIST 2003	United States History: From Nation to Civil War	3
HIST 2004	United States History: The Civil War Era, 1860-1900	3
HIST 2005	The Modernization of The United States	3
HIST 2006	Recent United States History	3
HIST 2007	History Of Missouri	3
HIST 2010	From Sea to Shining Sea: The American Frontier 1763 - 1890	3
HIST 2020	History of Women and Social Movements	3
HIST 2023	US Foreign Relations and Military History to 1900	3
HIST 2024	US Foreign Relations and Military History Since 1900	3
HIST 2800	History of American Economic Development	3

Students may take any language that fulfills the college's foreign language requirement.

Majors may not take required history courses on a satisfactory/unsatisfactory basis. Students enrolled in variable credit reading courses for 5 credit hours must complete a seminar paper.

Degree Requirements

Bachelor of Arts in History

Students are encouraged to move from introductory courses at the 1000 to more advanced content-oriented courses at the 2000 level then to skill oriented courses at the 3000 and 4000 levels. Majors must complete at least 33, but not more than 45, hours in history with no grade below C-.

1000 Level

Select three courses at the 1000 level	9
--	---

2000 and 3000 Level

HIST 2999	Introduction to Historical Inquiry	4
Select an additional two to five courses at the 2000 and 3000 level.		6-15

4000 Level

Select two to four of the following courses at the 4000 level.	6-14
HIST 4142	Inquiries in U.S. History
HIST 4143	Inquiries in World History
HIST 4999	Senior Seminar ¹

¹ Students seeking a degree with distinction must enroll in this course.

Undergraduate majors must complete a residency minimum of 15 hours of 2000/3000/4000 level History courses including 6 credit hours of 4000 level courses at UMSL.

Departmental Honors

Students majoring in history may be awarded departmental honors upon graduation if they have achieved the following: a) at least a 3.2 overall GPA; b) at least a 3.5 GPA for all hours attempted in history courses; and c) an outstanding research paper in the Senior Seminar as certified by the faculty member responsible for directing it.

Learning Outcomes.

The following learning outcomes are anticipated in the successful completion of a Bachelor of Arts in History

- **Build Historical Knowledge.**
- **Develop Research Skills.**
- **Recognize that knowledge is complex, sometimes ambiguous, and subject to ongoing reexaminations.**
- **Apply the range of analytical skills to evidence that is often incomplete, complex, and contradictory.**
- **Create historical arguments and narratives.**
- **Use historical perspective as central to active citizenship.**

Minor in History

Students may minor in history by taking 19 hours of history courses as follows:

1. Three courses numbered 1000 -1999 (9 credits)
2. Three courses numbered 2000-3999, including History 2999 (10 credits)

No course in which a grade below a C- is received shall count toward a minor.

The Minor in History of Science and Technology

The Minor in History of Science and Technology (HST) is an interdisciplinary program requiring a minimum of 18 credits in HST.

All required courses must be completed with a "C" or higher. The satisfactory/unsatisfactory option may not be used. No transfer courses may be used towards the HST Minor. A minimum of 12 hours must be taken at 2000 and above with 9 of those hours being at 3000 or above.

Courses in the upper division may satisfy requirements for the student's major, consistently with the major's requirements.

Requirements**Logic or Methodology**

Select one of the following in either logic or methodology:	3
ANTHRO 4308	Practicum In Cultural Research Methods
ANTHRO 4310	Laboratory Methods In Archaeology
HIST 2999	Introduction to Historical Inquiry
PHIL 3360	Formal Logic
PHIL 4460	Advanced Formal Logic
PSYCH 2219	Research Methods
SOC 3230	Research Methods

History

Select two of the following in history of science and technology:	6
ECON 3800	History Of Economic Thought
HIST 2089	Religion, Philosophy & Science in History: Introduction to The Intellectual History Of The West
HIST 2770	Introduction To Transportation
HIST 2772	History Of Aviation In American Life
HIST 2773	Urbanization And Transportation
HIST 4143	Inquiries in World History
PHIL 4483	Topics In History And Philosophy Of Science
PSYCH 3400	Conceptual and Historical Foundations of Psychology

Science

Select 9 credit hours in the mathematical, physical, life, behavioral, or social sciences ²	9
Total Hours	18

¹ Note: HIST 4143 is offered under different topics; only the specific topic listed here counts as HPST.

² The science courses must be in addition to those satisfying the Gen Ed requirements and conditional upon their acceptance by the HST undergraduate advisor.

Prerequisites:

Some courses required by the Minor in History have prerequisites. (It should be particularly noted that all 3000 level History courses require HIST 2999.) Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for either satisfying the prerequisites by adding courses to their curriculum or obtaining a waiver from the instructor.

Alternative courses to satisfy the History requirements:

Some courses may satisfy the History requirement even though they are not listed as such, depending on what their content is. These include variable content courses, courses at the Honors College, and history of philosophy courses. If a course that deals with some aspect of History and should satisfy a requirement is not listed among those satisfying the requirements, you may do the following:

1. Obtain the description of what the course will cover.
2. Write a very short explanation of why the course ought to count toward satisfaction of the requirement, by showing how it deals with the relevant aspect of History.
3. Submit both to the History undergraduate advisor for approval.

Bachelor of Liberal Studies Option:

A minor in history may be combined with a minor in the Philosophy of Science and Technology and a capstone to form a Bachelor of Liberal Studies. The relevant capstones are either HIST 4999 or PHIL 4491. Since students taking HIST 4999 must have taken HIST 2999, it is suggested such students use to satisfy the Logic and Methodology requirement. Students can use the same course to satisfy the Logic and Methodology requirement of both minors, but cannot use the same science courses. Also, a Bachelor of Liberal Studies program is easily combined, in turn, with a major in any science as a double major. This provides the student with a deeper historical and conceptual understanding of the science(s) he or she is studying.

Related Areas

Since history is a broad discipline, it can be combined with serious work in any other discipline. Courses in the humanities, social sciences, languages, and the natural sciences may complement the history program. Students should consult with faculty advisers to select courses suited to their individual interests.

B.S. Ed. in Secondary Education with Emphasis in History

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification.

Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

B.A. in History with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

Graduate Studies

The department offers the M.A. in History, the M.A. in Museums, Heritage, and Public History, and two Graduate Certificates: History Education and

Museums, Heritage, and Public History. Certificates may be completed individually or as concentrations within the History M.A. or M.Ed. in Secondary Education or M.Ed. In Community Education. Qualified students may enter the MA through two different routes, either as graduates with a baccalaureate degree or as exceptional undergraduates via the 2 + 3 program.

The M.A. Degree

The Department of History offers two degrees: the Master of Arts in History and the Master of Arts in Museums, Heritage, and Public History. These options are described below.

Master of Arts in History

The History M.A. program offers study in U.S. History, World History, History Education, Public History and Cultural Heritage, and Museum Studies. All students receive disciplined advanced work in preparation for doctoral programs or advanced training leading to teaching or other careers. Students select one of two options for completing the Master of Arts degree: thesis or research papers. The first path requires a substantial master's thesis; this path emphasizes depth of knowledge and research competence. The second path requires several research papers. This path emphasizes breadth of historical knowledge. Both paths include a core of courses in history (see Core below). Students should consult with the Director of Graduate Studies to be sure that they have properly selected their fields of study.

Admission Requirements

Applicants must meet several departmental admission requirements in addition to the general criteria of the Graduate School. The applicant's undergraduate studies need not have been in history, but they must demonstrate high academic potential. Normally, only students with a 3.2 grade point average (3.35 for the online degree) in their undergraduate major are admitted; most successful applicants have higher grades.

Applicants must submit three letters of recommendation, preferably from former teachers, and a sample of their written work. The History Department bases its admission decisions upon the undergraduate transcript, the letters of recommendation, and the sample of written work. The deadlines for applications are March 15th for the Fall semester and October 15th for the Spring semester. Applications will be accepted after these deadlines but admission for the upcoming semester is not guaranteed.

Core

All candidates for the M.A. degree in history must complete a core of 26 hours of course work (excluding thesis credit), with no more than nine hours of history and related fields at the 5000 level. This 26-hour core must include seven courses at 3 credit hours each (21 hours in all), and one 5-credit-hour writing seminar consisting of a 2-credit-hour research paper supplement to a 3-credit-hour, 6000-level history readings course.

To earn the 26-hour core, candidates must complete HIST 6000 and select at least one field of study with a minimum of three courses (each at 3 credit hours or more.) Students may use the remaining hours to complete a second field.

In addition to this core, each candidate must select one of the two following degree options:

1. Thesis Option--32 hours total

In addition to the core, the candidate choosing this option must enroll for 6 hours of thesis credit and submit an acceptable thesis. The thesis is based on original research in primary sources. Normally, theses do not exceed 100 pages of text. Candidates receive a grade for the thesis upon its approval by an advisory committee. The committee consists of professors selected by the candidate after consultation with the major professor. One member of the committee must be from the department but outside the candidate's general area of study, and one may be outside the history department.

The advisory committee conducts an oral examination on the thesis during the candidate's last semester of residence.

The committee decides whether the candidate shall pass, fail, or fail with the option to repeat the oral examination at a later date. Students may not take the oral examination more than twice. The second examination must be held no less than one and no more than two semesters following the date of the first examination. Summer session may be counted as a semester under this procedure, but students should be aware of the difficulties involved in assembling faculty committees during the summer.

Thesis candidates must demonstrate competence in one foreign language or in quantitative methods as applied to historical study. Candidates shall demonstrate foreign language competence by translating, with the use of a dictionary, 500 words in one hour. Normally a member of the history faculty will conduct this examination and choose the test for translation. Candidates shall demonstrate quantitative methods competence by satisfactory completion of either PSYCH 2201 Psychological Statistics or SOC 3220 Sociological Statistics, or their equivalent.

2. Research Paper Option-36 hours total

To complete this option, the candidate must complete two 5-credit-hour seminars (each consisting of a 6000-level reading seminar plus 2 credit hours of supplementary work on a substantial research paper), in addition to the core. The candidate may choose a fourth field in addition to the three already represented in the core to complete this option.

MA in Museums, Heritage, and Public History

The MA in Museums, Heritage, and Public History joins theoretical and practical study at an advanced level to prepare students for careers in museums, heritage institutions, historic sites and societies, and related organizations. The program works closely with cultural resources in St Louis, particularly the city's many museums and historic sites. We focus on community engagement, the interdisciplinary and cross-cultural study of material culture, interpreting and debating the past, new media and public education, and research in archival and material collections. Our graduates work in art museums, history museums, science centers, historic house museums, and other cultural institutions across the United States and internationally.

Admission Requirements

Prospective students for the Master of Arts in Museums, Heritage, and Public History must apply specifically for this program on the graduate

application. Applications for the Master of Arts in Museums, Heritage, and Public History will be accepted only for the fall semester.

Prospective students must demonstrate high academic potential. Typically, the History department admits only students with at least a 3.2 grade point average in their undergraduate major; most successful applicants have higher grades. An undergraduate major in History is not required for admission to this program. Applicants must submit three letters of recommendation, preferably from former teachers and/or employers, and a sample of their written work. Applicants must also complete the Museums, Heritage, and Public History Supplemental Application (<http://www.umsi.edu/~museums>), which includes a statement of career intent.

Admissions decisions are based on the undergraduate transcript, the letters of recommendation, the sample of written work, and the supplemental application.

Applications must be received by the university no later than February 1.

Program Requirements (34 hours)

All candidates for the MA in Museums, Heritage, and Public History must complete the following core courses (20 hours):

HIST 6000	The Historian's Craft	3
HIST 6001	Introduction to Public History and Cultural Heritage	3
HIST 6002 or HIST 6134	Material Culture in Historical Context History Curatorship	3
HIST 6131	Museum Origins and Evolution	3
HIST 6142 or HIST 6143	Readings in U.S. History Readings in World History	5
Choose one of the following:		3
HIST 6125	Practicum in Public History and Cultural Heritage	
HIST 6127	Museums and Communities	
HIST 6129	Emerging Museum Practices	
Total Hours		20

Candidates must also complete 10 credit hours of elective courses. These may include courses listed above, if not already taken for the core, or additional courses which may include the following:

ANTHRO 4309	Archaeological Field School	3
ANTHRO 6139	Practicum In Exhibit & Program Development	3
HIST/ART HS 5592	The History of the Visual Arts in American Museums	3
ART HS 5593	Museum Management & Curatorial Practice	3
HIST 6130	Collections Management and Registration	3
HIST 6133	Museums and History in the Digital Age	3
HIST 6137	Museum Organization and Operations	3
POL SCI 6300	Leadership and Management in NonProfit Organizations	3

P P ADM 6311	Staff Management Issues in Nonprofit Organizations	1
P P ADM 6312	Legal Issues in Managing Nonprofit Organizations	1
P P ADM 6313	Financial Issues in Managing Nonprofit Organizations	1

Students may substitute other courses with approval of the Director of the Museums, Heritage, and Public History program. For courses outside the History Department, a maximum of six credits may be at the 3000 level. No 3000 level courses may be taken for graduate credit within the History Department.

Candidates conclude the degree with an internship or exit project represented by the course numbered HIST 6138 (4 credits). This capstone project will be customized to the interests and career aspirations of each student, as approved in advance by the Director.

In addition to these requirements, candidates for the MA in Museums, Heritage, and Public History are required to demonstrate either oral or written proficiency in one second language (in addition to English) by completing an appropriate language test. The test will be designed through consultation with the candidate and the faculty of the Department of Language and Cultural Studies.

The 2+3 B.A. and M.A. in History

The 2+3 B.A./B.S. – Ed and M.A. in History enables students of demonstrated academic ability and educational maturity to complete the requirements for both degrees in five years of full-time study. Because of its accelerated nature, the program requires the completion of lower-division requirements (15 hours) before entry into the three-year portion of the program. It also has prerequisites numbered 5000-5999 for graduate readings courses numbered 6000-6999. When all the requirements of the B.A./B.S. – Ed. and M.A. program have been completed, students will be awarded both the baccalaureate and master's degrees. A carefully designed program can permit a student to earn both degrees within as few as ten semesters.

The combined program requires a minimum of 137 hours, at least 5 of which must be at the senior level (HIST 4999) and at least 32 of which must be at the graduate level (courses numbered in the 5000 and 6000 range). In qualifying for the B.A. or B.S. – Ed., students must meet all university and college requirements, including the requirements of the undergraduate major. In qualifying for the M.A., students must meet all university and Graduate School requirements, including satisfactory completion of at least 32 credit hours at the graduate level.

The semester they will complete 62 undergraduate credit hours, (including 15 credit hours of appropriate 1000-level coursework in the History Department and ART ED 5588) interested students should apply to the Graduate Director of the Department of History for admission to the 2+3 combined degree program in History. A cumulative grade point average of 3.4 or higher in history courses, a writing sample, and three letters of recommendation from faculty are required for consideration. Students will be admitted to the 2+3 program under provisional status until they have completed 105 total credit hours toward their BA degree with a grade point average of 3.0 or higher. After completion of the provisional period, and with the recommendation of the graduate director, and approval of the graduate dean, students can be granted full admission into the program. Students will not be admitted to the program, if they have accumulated more than 105 credits. Students in the 2+3 program begin to pay graduate credit hour fees once they exceed the 105 credit hour

threshold. Students must maintain a grade point average of 3.0 or higher throughout the combined program. Students who officially withdraw from the 2+3 combined degree program will be awarded the B.A. or B.S. – Ed. Degree when they have successfully completed all the requirements for the degree.

Undergraduate History Requirements For Students in the 2+3 Program

The following requirements must be completed prior to enrolling in the 2+3 Program:

Three 1000-level courses	9	
HIST 2999	Introduction to Historical Inquiry (must receive a grade of C or higher)	4
Two additional 2000-3000 level courses		6
Total Hours		19

Once admitted to the program students must take the following courses:

Additional Undergraduate History Requirements For Students in the 2+3 Program:

HIST 4999, Senior Seminar (5).

Graduate History Requirements For Students in the 2+3 Program

- Three courses at the **5000-level** for 9 credit hours.
- Five courses at the **6000-level** for 17 credits beginning with **HIST 6000** (students must take two of their three 5000-level courses prior to enrolling in HIST 6000), followed by at least three courses in a major field of study and one 5-credit course.
- In addition to this core, each candidate must select one of the two following degree options:
 - a. Thesis Option –32 hours total

In addition to the fulfilling the requirements listed above, the candidate choosing this option must enroll for 6 hours of thesis credit and submit an acceptable thesis. The thesis is based on original research in primary sources. Normally, theses do not exceed 100 pages of text. Candidates receive a grade for the thesis upon its approval by an advisory committee. The committee consists of professors selected by the candidate after consultation with the major professor. One member of the committee must be from the department but outside the candidate's general area of study, and one may be outside the history department.

The advisory committee conducts an oral examination on the thesis during the candidate's last semester of residence.

The committee decides whether the candidate shall pass, fail or fail with the option to repeat the oral examination at a later date. Students may not take the oral examination more than twice. The second examination must be held no less than one and no more than two semesters following the date of the first examination. Summer session may be counted as a semester under this procedure, but students should be aware of the difficulties involved in assembling faculty committees during the summer.

Thesis candidates must demonstrate competence in one foreign language or in quantitative methods as applied to historical study. Candidates shall demonstrate foreign language competence by translating, with the use of a dictionary, 500 words in one hour. A member of the history faculty will conduct this examination and choose the test for translation. Candidates shall demonstrate quantitative methods competence by satisfactory completion of either PSYCH 2201, Psychological Statistics or SOC 3220, Sociological Statistics, or their equivalent.

b. Research Paper Option

To complete this option, the candidate must complete two additional 5-credit hour seminars (each consisting of a 6000-level reading seminar plus 2 credit hours of supplementary work on a substantial research paper.) The candidate may choose a fourth field in addition to the three already represented in the core to complete this option.

Graduate Certificate in Museums, Heritage and Public History

The Graduate Certificate in Museums, Heritage, and Public History provides interdisciplinary professional and academic training for museum professionals and others who seek to develop their practical skills and knowledge to work in the heritage sector.

All those who wish to be considered for the Graduate Certificate in Museums, Heritage, and Public History should designate this certificate program on their application to the graduate school, submit three letters of recommendation and a writing sample, and complete the Museums, Heritage, and Public History supplemental application with their application for graduate work. Applicants who wish to pursue the Graduate Certificate in Museums, Heritage, and Public History normally must have a Master's degree and a GPA of 3.2 or higher. Prospective students who wish to pursue the Graduate Certificate in Museums, Heritage, and Public History in conjunction with another graduate program should follow the normal application procedures for that program in addition to those for this certificate.

Admissions decisions are based on transcripts, the letters of recommendation, the sample of written work, and the supplemental application.

The program will accept applications twice per year, once for the fall semester and once for the spring.

Program Requirements (18 hours)

All candidates for Graduate Certificate in Museums, Heritage, and Public History must complete the following core courses (12 hours):

HIST 6001	Introduction to Public History and Cultural Heritage	3
HIST 6002 or HIST 6134	Material Culture in Historical Context History Curatorship	3
HIST 6131	Museum Origins and Evolution	3
Choose one of the following:		3
HIST 6125	Practicum in Public History and Cultural Heritage	
HIST 6127	Museums and Communities	
HIST 6129	Emerging Museum Practices	

Students must also complete an additional 2 elective courses (6 hours) as approved by the Director of Museums, Heritage, and Public History.	6
Total Hours	18

Graduate Certificate in History Education

The Graduate Certificate in History Education is designed for practicing teachers, instructional coordinators, and history educators in the community who are seeking to deepen their knowledge of history education. It offers history and social studies educators a program that integrates historical and educational knowledge, theory, and practice. The purpose of the certificate is to improve the practice of history education in schools and the community, to introduce history educators to research in the field, to deepen their historical knowledge, and to encourage sophisticated teaching and curriculum development built on research at the intersection of history and the learning sciences.

For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website: <http://umsl.edu/go/Bpa>.

Admission Requirements

Applicants wishing to pursue the Graduate Certificate in History Education in conjunction with an MA degree or an MED should follow the normal application procedures for their respective Master's level program. Applicants wishing to pursue the Graduate Certificate in History Education alone normally must have a GPA of 3.0 or higher and should apply specifically for this certificate program and submit three letters of recommendation and a writing sample along with their application.

Program Requirements

All candidates for Graduate Certificate in History Education must complete:

HIST 6013		3
HIST/TCH ED 6115	Historical Thinking in Research and Practice	3

Students must take an additional twelve credits at the graduate level in History or Education courses as approved by the Program Director.

Career Outlook for B. A. and M. A. graduates

Study and research in history sharpens organizational and writing skills important to success in a variety of fields. Men and women in business, education, law, banking, libraries, and foreign service all find it relevant to their careers. A growing interest in local history has created employment opportunities in museum, archival, and preservation work. Responses to a questionnaire sent to history graduates have indicated that alumni in a wide variety of fields are as conscious of and appreciative of their training in history as those who have chosen it as a profession. For more information on the national outlook for history majors, see the American Historical Association's Career Resources website (<https://www.historians.org/jobs-and-professional-development/career-resources/careers-for-history-majors>).

Career Outlook for M. A. in Museums, Heritage, and Public History

According to the Institute of Museum and Library Services, there are more than 35,000 museums in the United States, employing more than 400,000 individuals. History museums constitute forty-eight percent of the total museums in the country; there are more than 16,800 historical societies and historic preservation organizations alone. While job requirements vary among individual institutions and specific professional roles, the MA degree offered by this program qualifies graduates for a wide range of careers in the museum and heritage field. Faculty and mentors in the Museum Studies Program provide students with placement assistance, counseling, and access to information on career opportunities. Our alumni are employed at institutions around the country, from Santa Fe to Philadelphia, Minneapolis to Dallas.

Total Hours: 120			

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

PLEASE NOTE: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Courses

HIST 1000 Selected Topics in History: 1-3 semester hours

Prerequisite: Consent of instructor. Special topics in history. May be repeated for credit with consent of instructor.

HIST 1001 American Civilization to 1865 (MOTR HIST 101): 3 semester hours

Evolution of the cultural tradition of the Americas from the earliest times to the mid-nineteenth century, with emphasis on the relationship of ideas and institutions to the historical background. Course fulfills the state requirement.

HIST 1002 American Civilization 1865 to Present (MOTR HIST 102): 3 semester hours

Continuation of HIST 1001 to the present. Course fulfills the state requirement. Either HIST 1001 or HIST 1002 taken separately.

HIST 1003 African-American History: 3 semester hours

A survey of African-American history from the beginning of the European slave trade to the modern Civil Rights era. This course meets the state requirement.

HIST 1007 Introduction to African and African American Studies: 3 semester hours

This course engages the historical, cultural, literary, artistic, and theoretical expressions of the peoples and cultures of Africa and the African Diaspora. Designed to introduce students to the basic concepts and literature in the of discipline of African and African American Studies, the course will include presentations from faculty members and local professionals on their particular disciplinary approach, their research, or professional life.

HIST 1010 U.S. Business History: 3 semester hours

This course explores key developments in the business and economic history of America from the founding to the present. It offers foundational knowledge of the history of American business, connecting it to key issues in American history.

HIST 1030 Ancient Greece and the Roman Empire: 3 semester hours

This course surveys ancient history in the near east, the Aegean, the central and western Mediterranean. Themes: politics and economy, war and society, culture, including art, literature, technology, religion and philosophy. The chronological span is from the Neolithic Period (7500-3000 B.C.) in the near east to the fall of the Roman Empire in the fifth century A.D.

HIST 1031 From the Middle Ages to the Age of Revolutions (MOTR WCIV 101): 3 semester hours

This course focuses on lectures and discussions based on the development of western European society and tradition from approximately 1000 to 1715.

HIST 1032 Topics in European Civilization: 1715 to the Present (MOTR WCIV 102): 3 semester hours

Lectures and discussions on the development of western European society and tradition from 1715 to the present.

HIST 1037 The Wonders of Greece: Introduction to Greek History and Culture: 3 semester hours

Same as ANTHRO 1037. Our democracy and culture have been heavily influenced by Greek civilization. This course will introduce students to the culture and civilization of Greece in order to provide a better understanding of our own society. The course will cover the political and military history, art, literature, philosophy, and science of Greece from prehistoric to modern times, with special emphasis on Greek civilization's enduring democratic and cultural ideals. The course will include screening of films and use of online resources.

HIST 1038 Byzantine History and Culture: 3 semester hours

Same as ANTHRO 1038. This course introduces the history of the Byzantine Empire from the fourth through the fifteen centuries. Covering more than a millennium of history, this course focuses on selected aspects of the empire's history, while adhering to a basic chronological frame. We will examine religious developments (monasticism, theological controversy, the Catholic-Orthodox Schism); military and cultural interactions with neighbors (Crusaders, Islam); and Byzantine culture, particularly art, literature, and architecture.

HIST 1041 East Asian Civilization: 3 semester hours

The development of Asian civilization from earliest times to the Manchu conquest.

HIST 1042 East Asian Civilization: 3 semester hours

Continuation of HIST 1041 with emphasis on the Asian response to the Western incursion. Either HIST 1041 or HIST 1042 may be taken separately.

HIST 1051 Latin American Civilization: 3 semester hours

A survey of selected topics important in the development of Latin America from pre-Columbian times to the twentieth century.

HIST 1052 Mexican Civilization: 3 semester hours

This course will focus on the history and culture of Mexico from the Aztecs to the mid-twentieth century. Among the topics to be covered are: the Aztecs, Cortez and the Conquest of Mexico, colonial institutions and culture, the obtaining of political independence, disorder and dictatorship in the nineteenth century, the Mexican Revolution, contemporary Mexico. This course meets the non-Euro-American requirement.

HIST 1061 African Civilization: from the Beginning of Humanity to the End of the Slave Trade: 3 semester hours

Introduction to cultural history from the emergence of early humankind to the abolition of the Atlantic slave trade. This course fulfills the Cultural Diversity requirement.

HIST 1062 African Civilization II: From Colonies to Nations: 3 semester hours

Survey of African initiative and response in the period spanning the loss and reassertion of independence. Either HIST 1061 or HIST 1062 may be taken separately.

HIST 1075 World History to 1500: 3 semester hours

A survey of the history of humankind to 1500 including the beginnings of civilization Mesopotamia, Africa, Asia and the Americas, the rise of Classical civilizations and the development of major transnational social, economic, political and religious networks.

HIST 1076 World History Since 1500: 3 semester hours

A survey of the history of humankind since 1500, emphasizing the growing interdependency of regional economic, political, and social systems. Topics will include imperialism, industrialization, and globalization.

HIST 1111 Reacting to the Past: 4 semester hours

Reacting to the Past is a series of historical simulations built around key moments and texts from the past. In each simulation, students are assigned a role and develop that character. The course offers students a rigorous academic experience in which they conduct historical research, speak, and write extensively. Because this course requires extensive writing, it fulfills the requirement for Freshman Composition.

HIST 1776 History of American Leadership: 3 semester hours

An introduction to the study of leaders in America that will cover different categories of political, cultural, social, and intellectual leadership and achievement. Crucial to the understanding of these categories is the question: how did leaders find their gift in becoming who they were and what leadership traits can be identified in the different categories under scrutiny.

HIST 1999 Big History: From the Big Bang to the Present: 3 semester hours

Same as INTDSC 1999. An introduction to the humanities, social science, and science disciplines through a sweeping overview of natural and human history from the Big Bang to the present. Course will include lectures from faculty in various Arts and Sciences units, films, and group discussions.

HIST 1999A Big History: From the Big Bang to the Present: 6 semester hours

Same As INTDSC 1999A. An introduction to the humanities, social science, and science disciplines through a sweeping overview of natural and human history from the Big Bang to the present. Course will include lectures from faculty in various Arts and Sciences units, films, field trips, and group discussions.

HIST 2000 Selected Topics in History: 1-4 semester hours

Prerequisite: Consent of instructor. Special topics in history. The course may be repeated for credit with consent of the instructor.

HIST 2001 Creating Early America: European Empires, Colonial Cultures, and Native Nations, 1565-1776: 3 semester hours

Prerequisite: Sophomore standing or consent of instructor. This content-rich course explores the transatlantic migrations and Indian interactions that laid the foundations of the American nation before 1776.

HIST 2002 Introduction to Latina/Latino Studies: 3 semester hours

One of two mandatory courses in UMSL's new Latina/Latino Studies Program, this course introduces the experiences and conditions of U.S. Latina/Latinos of Caribbean, Latin American, and, especially, Mexican decent. Students examine how people from Hispanic- and Indo-America are both incorporated into American culture, history, and occupational life and often marginalized as either outsiders or foreign. The course studies how historical forces push and pull people from Latin America to the United States, where they create new U.S. ethnic, racial and local identities. Using films, novels/memoirs, music, and art as windows, students will identify patterns of identity formation, ethnic culture, community politics, labor struggles, and social mobility, and will map the heterogeneous mosaic of Latin American and Caribbean diasporas and communities.

HIST 2003 United States History: From Nation to Civil War: 3 semester hours

Prerequisite: Sophomore standing or consent of the instructor. The "Era of Good Feelings"; the Age of Jackson; manifest destiny; the political and social developments of the antebellum period relating to the growth of sectionalism and the developing antislavery crusade.

HIST 2004 United States History: The Civil War Era, 1860-1900: 3 semester hours

Prerequisites: Sophomore standing or consent of instructor. The Civil War, Reconstruction, industrial and urban expansion and their impact on American life.

HIST 2005 The Modernization of The United States: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. Studies in the economic, political and social development and crises of the maturing industrial United States between 1877 and 1940, and the growing importance of foreign relations.

HIST 2006 Recent United States History: 3 semester hours

Prerequisite: Sophomore standing or consent of instructor. The economic, political and social developments and crises of post-industrial United States. The role of foreign affairs in American life.

HIST 2007 History Of Missouri: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. Lecture and readings. Seventeenth-century Spanish and French explorations and interaction with the Indians; settlement and organization of the Louisiana territory; lead mining and the fur trade; the Louisiana Purchase; the Missouri territory; the struggle for statehood and slavery; antebellum politics; banking and internal improvements; westward expansion; Civil War and reconstruction; postwar agrarian politics, industrialization; Irish, German, and southern European immigration; the Progressive reforms--Political and economic changes; and twentieth-century social changes and political developments. Course satisfies the state requirement.

HIST 2008 History of St. Louis: 3 semester hours

Prerequisites: Sophomore standing or the consent of the instructor. This course will provide an overview of the history of the St. Louis metropolitan region from its founding in 1764 to the present. Main topics will include: the St. Louis region before the Europeans, forces leading to the founding of the city, St. Louis as an "urban frontier", the Age of Steam on water and rail, the questions of slavery and the Civil War, St. Louis in the Gilded Age, the World's Fair, early efforts at city planning, impact of the automobile, St. Louis during the Depression and World War II, post-war suburbanization, urban renewal St. Louis style, school desegregation, the Schoemehl years, the emergence of St. Louis "Edge Cities", and St. Louis 2004.

HIST 2010 From Sea to Shining Sea: The American Frontier 1763 - 1890: 3 semester hours

This is a history of the colonization of the Great West, from the end of the French and Indian War to the official closing of the frontier in 1890. The westward movement will be examined as a major factor in explaining American development.

HIST 2012 The Indian in American History: 3 semester hours

Prerequisites: Sophomore standing or consent of instructor. Investigates Native American encounters with non-Indian peoples between 1600 and 1900, analyzing how traditional Indian cultures changed to meet a variety of new challenges introduced to North America by Europeans and Africans. The approach will be interdisciplinary and ethnohistorical with emphasis placed on case studies of important native nations at key turning points in their history.

HIST 2013 The Rise and Fall of American Cities: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. The physical and spatial growth of U.S. cities from colonial times to the present with special attention to the impact of industrialization, public policy, and advances in transportation technology.

HIST 2015 Topics in African-American History: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. Will explore a salient topic in African-American history. Such historical documents as personal narratives, letters, government documents, and autobiographies as well as monographs, articles, and other secondary sources will be used to explore topics such as slavery and slave culture in the United States; blacks and America's wars; the African-American intellectual tradition; or, African-Americans and the Great Migration.

HIST 2017 African-American History: From Civil Rights to Black Power: 3 semester hours

Prerequisites: Sophomore standing or consent of instructor. A seminar on the activities, ideas, movement centers, and personalities that created the Civil Rights and Black Power movements in the U.S. from the 1950's through the 1970's. Some familiarity with the broad contours of U.S. History is presupposed. Special attention will be devoted to the roles of the African-American masses, college students, and women, and to the points of conflict, cooperation, and intersection between African-America and the larger American society.

HIST 2020 History of Women and Social Movements: 3 semester hours

Same as GS 2020. Prerequisites: Sophomore standing or consent of the instructor. This course explores the history of women and social movements in the nineteenth and twentieth century United States. It considers social and political movements such as abolitionism, women's suffrage, progressivism, the labor movement, the civil rights movement, and second wave feminism.

HIST 2021 War and Violence in Modern Times: 3 semester hours

Same as MVS 2021. Prerequisites: Sophomore standing or consent of the instructor. This course examines the connections between warfare and resistance, gangs and poverty, and state and non-state officials as enactors of violence. It explores the effects of war and violence on the poor in Brazil and the United States, prisoners of war in Asia, and resistance fighters in Latin America.

HIST 2022 The Automobile and American Life: 3 semester hours

This course uses the automobile as a window into 20th-century American life. It examines the influence of automobility on patterns of work and leisure; on struggles over gender, race and ethnicity; on individualism, consumerism, and government regulation. It also surveys mass automobility's effects on our physical and natural environments and looks at future prospects of automobility in the information age.

HIST 2023 US Foreign Relations and Military History to 1900: 3 semester hours

Prerequisites: Sophomore standing or consent of instructor. This course surveys the development of American land and sea power from the start of the colonial era to 1900. It emphasizes the interrelationship between U.S. foreign and military policies.

HIST 2024 US Foreign Relations and Military History Since 1900: 3 semester hours

Prerequisites: Sophomore standing or consent of instructor. This course surveys the development of American land, sea, air, space, and cyber power from 1900 to the present. It emphasizes the interrelationship between U.S. foreign and military policies.

HIST 2028 Sex, Drugs, and Rock 'n Roll: The 1960s in Song, Fashion, Dating, and Protest: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. This course examines the turbulent 1960s and the period's identification with sex, drugs, and rock 'n roll by looking historically at drugs, music, and changes in gender roles. It uses these histories to explore the cultural and political movements of the 1960s (1955 through 1973)-civil rights, black power, new left, antiwar, and feminist movements-along with the emergence of the counterculture, hallucinogenic drugs, the sexual revolution, and the whole hip scene. The class is discussion-based. There is a mid-term exam and several assignments, including a class presentation and papers on readings, music, and movies.

HIST 2030 History of U.S. Immigration: 3 semester hours

This course examines the history of free and forced newcomers to the U.S. and their descendants, including the conditions that they faced upon arrival and their subsequent struggles for political, social, and economic rights and freedoms. It explores the legal foundations that grounded the admission of certain newcomers and the exclusion or marginalization of others and how these shaped the experiences of these populations.

HIST 2063 African Diaspora to Abolition of the Slave Trade: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. Comparative in scope, the course examines major themes in West and Central Africa and their impact on the history of Africans in the Atlantic diaspora up to 1800. Themes include: slavery, multi-racialism, economics of the South Atlantic system, political dimensions and the social transformation from heterogeneous crowds to new and homogeneous communities. Linkages between Africans and their descendants in the Atlantic communities of Latin America, the Caribbean, as well as North America will be stressed. This course fulfills the Cultural Diversity requirement.

HIST 2064 African Diaspora in the Age of Migration: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. Comparative in scope, this course uses a comparative methodology to examine the major themes in West and Central Africa and their impact on the history of Africans in the Atlantic diaspora after 1800. This course fulfills the Cultural Diversity requirement.

HIST 2066 Women and Gender in African History: 3 semester hours

Same as GS 2066. This course will explore the history of Africa, highlighting African women's lives, experiences, and agency, and questioning the application of Western concepts of gender to an African setting.

HIST 2067 African History through Fiction and Film: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. This course will examine modern African history with literature and film, focusing on works that have poignantly captured important events in African history-slavery, colonialism, independence, and more.

HIST 2082 Christianity: From Jesus to Martin Luther: 3 semester hours

The purpose of this course is to orient students in the scholarship about the Christian Church in the Western tradition as an institution. Open discussion is encouraged, and all traditions will be respected in the interest of expanding our knowledge of the past as well of as the living communities today.

HIST 2083 Europe in Early Middle Ages: Paganism to Christianity: 3 semester hours

Prerequisite: Sophomore standing or consent of the instructor. The end of the Roman Empire as a universal entity; the successor states of the Mediterranean and Northern Europe; the emergence of a Western Christendom under the Franks; the development of feudal states; the Gregorian reforms; the Crusades; the revival of education and learning in the twelfth century.

HIST 2084 Crusades and Plagues: Europe in the High and Late Middle Ages: 3 semester hours

Prerequisite: Sophomore standing or consent of the instructor. Medieval society at its political, economic, and intellectual zenith; the crisis of the later Middle Ages; the Papal schism and the development of national particular churches within Catholicism; and the rise of estate institutions.

HIST 2085 Medieval England: From Arthur to Richard III: 3 semester hours

Prerequisite: Sophomore standing or consent of the instructor. A brief summary of the Anglo-Saxon heritage and the impact of the Norman Conquest, followed by an investigation of the institutional, social, and legal evolution of the realm of England. English development will be viewed in its European context.

HIST 2086 Reformation of Europe: Beyond Religion: 3 semester hours

Prerequisite: Sophomore standing or consent of the instructor. Religious, intellectual, political, and socioeconomic developments of the sixteenth century.

HIST 2088 Europe and the Renaissance: Not Just for Painters Anymore: 3 semester hours

Prerequisites: Sophomore Standing or consent of the instructor. The Italian and Northern Renaissance as a distinct age; political, socioeconomic, intellectual, religious, and artistic movements attending the decline of medieval society, and the transition to the early modern period.

HIST 2089 Religion, Philosophy & Science in History: Introduction to the Intellectual History of the West: 3 semester hours

Sophomore standing or consent of instructor. An examination of some of the most important ideas and debates that shaped the Western world. Topics include Platonic versus Aristotelian models of the universe, Medieval synthesis and the challenge of Renaissance naturalism, the Scientific Revolution, the political ideas of Thomas Hobbes, John Locke, and Jean-Jacques Rousseau, romanticism, Marxism, Darwinian evolution, Freudian psychology, existentialism, structuralism and poststructuralism.

HIST 2090 Europe in the Eighteenth Century: From the Glorious Revolution to the Napoleonic Era: 3 semester hours

Prerequisite: Sophomore standing or consent of instructor. This course offers intensive study of Europe in the period between the Glorious Revolution in England in 1688 and the fall of Napoleon in 1815. Particular emphasis will be placed on the theme of the rise of the modern. Specifically, the course will examine the struggle by intellectuals, politicians, and military figures to move Europe forward from the old regime system. Particular emphasis will be placed on the works of Voltaire, Rousseau, Locke, and Paine.

HIST 2095 History of Ireland: 3 semester hours

This course will explore Irish history from medieval to modern times. Topics will include issues of land, settlement, immigration, and modernization.

HIST 2102 Introduction To Gender Studies: 3 semester hours

Same as GS 2102, SOC WK 2102, POL SCI 2102, and SOC 2102. This core class is required for all Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

HIST 2105 Sex in America: 3 semester hours

Prerequisites: Sophomore Standing or consent of the instructor. Dissected, categorized, evaluated, feared, and enjoyed: sex in America's past, including our current obsession with it, is the primary concern of this course. Why and how have sex and sexuality become so central to identities, culture, politics, and now, our history? This course explores the complex and often hidden history of sex in the United States. It uses sex to examine big political ideas of citizenship, democracy, and cultural inclusion.

HIST 2116 History of Greece and The Balkans: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. This course is designed to introduce students to the history of the Balkans with particular emphasis on Greece. Although a part of the course will deal with nation building and nationalism, we will also examine the broad historical trends that have shaped the distinct cultural, social, and political developments in the region from the late 18th century until the end of the 20th century.

HIST 2117 Greek History and Culture: 3 semester hours

Same as ANTHRO 2117. Greek civilization has had a deep impact on contemporary society in art; social, political, and economic organization; philosophy; law; medicine; and science. This course covers major aspects of Greek history and culture from antiquity to the present. It considers the major political and military events of Greek History, as well as important aspects of Greek culture, including sports and the history of the Olympic Games, literature, philosophy, and mythology.

HIST 2118 Modern Greek History and Culture: 3 semester hours

Same as ANTHRO 2118. A history of Modern Greece, from the fall of Constantinople (1453) to the present, with an emphasis on social, cultural, and political developments. The course will provide a chronological framework of events and it will utilize art, literature, and folklore, along with traditional historical sources, to gain a better understanding of the richness of modern Greek history and culture.

HIST 2160 Introduction to American Studies: 3 semester hours

Same as ENGL 2160. Prerequisite: Sophomore standing or consent of the instructor. This course introduces students to the multidisciplinary nature of American Studies and is a required course for those who wish to complete the minor in American Studies. It reviews the discipline from its origins in the 1930s, and it introduces students to St Louis' rich resources for American Studies.

HIST 2219 United States Labor History: 3 semester hours

Examines the history of work and the working class in the United States. It focuses on the transformation of the workplace, the evolution of working class consciousness and the development of the labor movement, the role of race, gender and ethnicity in uniting or dividing the working class, and the nature of labor's relations with other social groups in the political arena. Particular emphasis on the political and economic conditions and strategies of periods when working class power was growing.

HIST 2770 Introduction to Transportation: 3 semester hours

Prerequisites: Sophomore standing or consent of instructor. Introduction to Transportation provides an overview of the transportation sector, including history, providers, users, and government regulation. The importance and significance of transportation modes of rail, water, motor, air, and pipeline: the demand and supply of transportation, and the managerial aspects of these modes of transport will be covered in the course.

HIST 2773 Urbanization and Transportation: 3 semester hours

Prerequisites: Sophomore standing or consent of instructor. Course provides an overview of urbanization and transportation in the United States. Besides examining the history of urbanization and transportation, this course offers comparisons between contemporary international urban areas for the purpose of placing the US experience in context. Additionally, the course covers key issues surrounding the planning, development, and consequences of infrastructure facilitating the movement of people and freight in the urban setting, such as financing, transport technologies, political policies, economic growth, and demographic trends.

HIST 2800 History of American Economic Development: 3 semester hours

Same as ECON 2800. Prerequisites: ECON 1000 or ECON 1001 or consent of instructor. Uses economic concepts to explain historical developments in the American economy, beginning with the hunter gatherers who crossed the Bering land bridge around 12,000 BC. Main topics include the Native American economies, European exploration and conquest, the colonial economies, indentured servitude, the American Revolution, the US Constitution, westward expansion, transportation, the Industrial Revolution, state banking and free banking, slavery, the Civil War, post-bellum agriculture, the rise of big business and antitrust, banking panics, the Federal Reserve Act, the First and Second World Wars, the New Deal, and the growth of government in postwar economy.

HIST 2999 Introduction to Historical Inquiry: 4 semester hours

Prerequisites: Sophomore standing or consent of instructor. This course is designed to develop historical thinking skills. Emphasis will be placed on reading of historical sources, exploring the rhetoric of history, identifying perspectives in historical sources, and the process of formulating historical questions. Other topics covered will include proper citation procedures and historiography. The course is writing intensive and will involve primary source research at libraries and archives.

HIST 3000 Selected Topics in History: 3 semester hours

Prerequisite: Junior standing or consent of instructor. Special topics in history to be determined by the field, availability of instructors and interest of students. The course may be repeated for credit with the consent of the instructor.

HIST 3031 Modern Japan: From the Meiji Restoration to the Present: 3 semester hours

Prerequisite: Junior Standing or consent of instructor. The economic, social, and political development of modern Japan.

HIST 3032 Modern China: From the Decline of the Qing Empire to the Global Age: 3 semester hours

Prerequisite: Junior Standing or consent of instructor. The economic, social, and political development of modern China.

HIST 3033 Modern History of the Asian Pacific Rim: 3 semester hours

Prerequisites: Junior standing or consent of the instructor. A course on the modern history of the broad economic region of East and Southeast Asia as well as the region's interaction with the United States. The course is designed for students who need to understand the political and economic dynamics of the countries around the Pacific Basin and the historical roots of various problems.

HIST 3034 History of Technology and Environment in China: 3 semester hours

Prerequisites: Junior standing or consent of instructor. Course explores how the Chinese used technology to manage the economy, environment and disasters which paralleled developments in the West. Discussions on the political function of Chinese science and technology, and on its continued influence on Chinese culture and society.

HIST 3041 Topics in American Constitutional History: 3 semester hours

Prerequisite: Junior standing or consent of instructor. Origins and development of the principal institutions and ideas of the American constitutional systems; the role of the constitution and the Supreme Court in the growth of the nation; important Supreme Court decisions; great American jurists and their impact upon the law; historical background to current constitutional issues.

HIST 3043 History of Crime and Justice: 3 semester hours

Same as CRIMIN 3043. Prerequisites: Junior standing or consent of instructor. The analysis, development, and change in philosophies and responses to crime. Emphasis on major forms and definitions of crime, the emergence of modern policing, the birth of the prison, and the juvenile court system.

HIST 3051 Latin America: From Conquest to Independence: 3 semester hours

Prerequisites: Junior standing or consent of Instructor. Latin America from the pre-Columbian Civilizations to 1808, stressing social, political, and economic institutions in the Spanish colonies. This course satisfies the Cultural Diversity requirement.

HIST 3065 From Ivory to Oil: Mining and Extraction in African History: 3 semester hours

Prerequisites: Sophomore standing or consent of the instructor. This course focuses on mining and its effects on economic and human development in twentieth century Africa. It examines specific case studies - oil, diamonds, uranium, copper, ivory, and more - to understand how African states and economies have been affected by the so-called "resource curse," and why.

HIST 3092 Europe, 1900-1950: War and Upheaval: 3 semester hours

Prerequisites: Junior standing or consent of the instructor. The impact of World Wars I and II and the search for equilibrium.

HIST 3093 Europe, 1950-Present: Peace and Prosperity: 3 semester hours

Prerequisites: Junior standing or consent of instructor. A survey of the main social, economic, political, military, and cultural trends in Europe since the outbreak of World War II.

HIST 3097 Spain: From Superpower to Napoleon's Puppet: 3 semester hours

Prerequisite: Junior standing or consent of instructor. A survey of Spanish history from the fifteenth century, emphasizing its period of imperial greatness and examining the effects of empire on national development.

HIST 4001 Special Readings: 1-10 semester hours

Prerequisite: Consent of the instructor. Independent study through readings, reports and conferences.

HIST 4002 Collaborative Research: 3 semester hours

Prerequisite: Consent of instructor. Faculty-student collaboration on a research project designed to lead toward the publication of a jointly-authored article. The faculty member will direct the research.

HIST 4003 Internship: 3-6 semester hours

Prerequisites: Consent of supervising instructor and institution offering the internship. Supervised practicum in a museum, historical agency, and other institution offering an opportunity for hands-on experience in public history. This elective course supplements but does not replace the requirements for a baccalaureate degree in history. May not be taken for graduate credit.

HIST 4014 World History for the Secondary Classroom: 3 semester hours

Prerequisites: TCH ED 3310 or consent of the instructor. This course is required for Social Studies certification. Adapts the themes and subject matter of World History to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of World history, on expanding bibliography, and on choosing methods of inquiry for use in an interactive classroom. Cannot be counted towards the minimum 39-hour history major requirement, but can be counted towards the 45 hour maximum and for Social Studies Certification. Not available for graduate credit.

HIST 4142 Inquiries in U.S. History: 3 semester hours

Prerequisites: HIST 2999. This course will develop historical thinking and writing skills through investigation in topics in National History.

HIST 4143 Inquiries in World History: 3 semester hours

Prerequisites: HIST 2999. This course will develop historical thinking and writing skills through investigation in topics in World History.

HIST 4999 Senior Seminar: 5 semester hours

Prerequisites: HIST 2999, consent of department and presentation of three examples of formal written work submitted in prior upper-division courses in history. Studies in historical methodology and historiography. Directed readings, research, and writing leading to the production of an original piece of historical scholarship. An exit interview is required. Senior seminar is required of all history majors. May not be taken for graduate credit.

HIST 5000 Advanced Selected Topics in History: 3 semester hours

Prerequisite: Graduate standing. Special topics in history. The course may be repeated for credit with consent of the instructor.

HIST 5142 Advanced Inquiries in U.S. History: 3 semester hours

Prerequisite: Graduate standing. This course will develop historical thinking and writing skills through investigation in topics in United States history.

HIST 5143 Advanced Inquiries in World History: 3 semester hours

Prerequisite: Graduate standing. This course will develop historical thinking and writing skills through investigation in topics in World history.

HIST 5592 The History of the Visual Arts in American Museums: 3 semester hours

Same as ANTHRO 5592 and ART HS 5592. Prerequisites: Graduate Standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

HIST 6000 The Historian's Craft: 1-3 semester hours

This course will introduce incoming students to graduate work, both in the field of history generally and to the M.A. program at UM-St. Louis in particular. It will familiarize them with the fields of historical study and the UMSL faculty who teach them, protocols of the profession, and methodologies of historical research, writing, and analysis. It will also help students learn about and prepare for careers outside the academy and/or Ph.D. programs in the field. Students may be required to attend colloquia off campus.

HIST 6001 Introduction to Public History and Cultural Heritage: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. This seminar will introduce students to the theory and practice of public history and cultural heritage. Readings will acquaint students with these fields of study and offer commentary on a variety of strategies for making the past relevant for contemporary audiences.

HIST 6002 Material Culture in Historical Context: 3 semester hours

Prerequisites: Graduate standing and consent of instructor. This course will present various theoretical and methodological approaches to the study of material culture. It will explore how the interpretation of objects has contributed to the understanding (or misunderstanding) of past and present cultures. The course will also examine contemporary museum practice in the display of material culture. Students will be expected to make on-site observations at different types of local museums, and will conduct research into a category of material culture that appeals to their individual interests.

HIST 6003 Economics of Museums and Heritage: 3 semester hours

Prerequisites: Graduate standing and consent of the instructor. This course introduces students to the financial history of museums and heritage, explores debates about economic strategies for museums and heritage, and empowers museum professionals to work effectively with the chief financial/administrative officer of their museum or heritage site. Topics include: government policies toward museums and heritage, the economics of blockbuster exhibitions, debates concerning collections as an economic resource for museums and cities, daily financial management, best practices for using financial resources to achieve institutional mission and priorities, long-term strategic planning, the history and development of public-private partnerships, cultural philanthropy and donations.

HIST 6004 Writing for Museums: 3 semester hours

Prerequisites: Graduate standing and consent of Museum Studies program director. This course will develop skills for professionals working in museum settings who need to communicate effectively with multiple audiences through various platforms. Topics will include writing for proposals, object descriptions, interpretive texts, and digital storytelling.

HIST 6014 World History for the Secondary School Classroom: 3-6 semester hours

Prerequisites: Graduate standing or consent of instructor. The intent of this course is to adapt the themes and subject matter of World history to the secondary classroom and to train teachers in the methodology of the Socratic symposium, techniques designed to maximize the use of sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting themes of World history, on expanding bibliography, and on methods for choosing primary sources for use in an interactive classroom.

HIST 6101 Readings in American History to 1865: 3-5 semester hours

Prerequisites: Graduate standing and consent of instructor. Directed readings and writing on selected topics and areas in American history to 1865.

HIST 6102 Readings in American History Since 1865: 3-5 semester hours

Prerequisites: Graduate standing and consent of instructor. Directed readings and writing on selected topics and areas in American history since 1865.

HIST 6115 Historical Thinking in Research and Practice: 3 semester hours

Same as TCH ED 6115. Prerequisites: Graduate Standing or consent of instructor. In this hands-on course, students examine current research and effective teaching strategies that facilitate historical thinking while also broadening content knowledge. Students further design, implement, and assess educational materials and practices that foster historical thinking, reading, and writing.

HIST 6116 Historical Thinking in Theory and Practice II: 3 semester hours

Same as TCH ED 6116. Prerequisites: HIST 6115 / TCH ED 6115 or consent of instructor. Building upon HIST 6115 / TCH ED 6115, this course emphasizes the design, implementation, and assessment of teaching materials and practices that foster historical thinking and reading. In this hands-on, action research course, students will focus on their own teaching materials and practices to improve their capacity to teach and assess students' historical thinking.

HIST 6121 Directed Readings: 1-3 semester hours

Prerequisites: Consent of a member of the Doctoral Faculty. Directed research at the graduate level.

HIST 6122 Collaborative Research: 3-6 semester hours

Prerequisites: Graduate Standing and consent of instructor. Faculty-student collaboration on a research project designed to lead toward the publication of a jointly-authored article. The faculty member will direct the research.

HIST 6123 Thesis Seminar: 1-6 semester hours

Prerequisites: Graduate standing and consent of instructor. Thesis research and writing on a selected topic in history.

HIST 6124 Graduate Internship: 3 semester hours

Prerequisites: Consent of supervising instructor and institution offering the internship. Supervised practicum in a museum, historical agency, and other institution offering an opportunity for hands-on experience in public history.

HIST 6125 Practicum in Public History and Cultural Heritage: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. In collaboration with a designated community partner, students will research and interpret the past for contemporary audiences. The course will combine traditional classroom sessions with hands-on training.

HIST 6126 Museum Studies Internship: 1-4 semester hours

Prerequisites: Graduate standing and consent of instructor. Professionally-supervised work experience in a museum setting. Requires a minimum of 50 hours of on-site attendance per credit hour and submission of a final paper.

HIST 6127 Museums and Communities: 3 semester hours

Prerequisites: Graduate standing and consent of the Director of Museum Studies. As museums and heritage institutions have sought to attract new audiences, they have tried to re-present their collections with new stories, address topics of concern to the denizens of their cities, and provide a broader range of programming than ever before. This course considers how to identify community characteristics and needs, create entry points for multiple audiences at museums, and build strong, long-term relationships with local partners. We consider difficult histories, conflict, and strategies to create space for diverse perspectives; the role of communications technologies in soliciting participation and promoting dialogue; and networks and the organizational skills for community development. Students will examine case studies of community-based museum programming, and develop an engagement strategy around an exhibit.

HIST 6129 Emerging Museum Practices: 3 semester hours

Prerequisites: Graduate students in Museum Studies or Public History or consent of the Director of Museum Studies. This course examines emerging trends and models in the museum field. The museum's educational role in society is quickly changing. Learning is not only more collaborative but also more accessible beyond the walls of the museum. Through readings, activities, and exercises, students will explore the mechanics of partnerships with cultural organizations, creative individuals, and the local community, while considering how museums should function in society today. We will examine interdisciplinary programming via collaboration with the creative class; creating social/participatory experiences; making collections personally relevant to audiences; and engaging in the sharing city. We pay particular attention to the museum's responsibility to civic duty and sustainable practices.

HIST 6130 Collections Management and Registration: 3 semester hours

Prerequisites: Consent of Director of Museum Studies Program. Most of the institutions that we call museums collect objects. A collecting institution requires a collections manager or a registrar to track, manage, and insure the safety of its objects, whether it collects art, artifacts, specimens, or live organisms. This course covers collections care and management from acquisition to evaluation, documentation, care, storage (or maintenance), loans, exhibitions, contracts, risk preparedness, and policy-making. It focuses on the practical knowledge and skills needed for collections management and registration. While much of the course material is drawn from historical, ethnographic, and art collections, the basic principles apply broadly to all collecting institutions.

HIST 6131 Museum Origins and Evolution: 3 semester hours

Prerequisites: Consent of Director of Museum Studies Program. This course traces the social and cultural history of museums from their origins in curiosity cabinets, princely collections, freak shows, and exhibitions, through their late 19th and early 20th century institutionalization, to present-day developments such as blockbuster exhibitions, community collaborations, masterpiece architecture, and the spread of museal and heritage institutions around the globe. Topics include colonialism, modernity, and the production of taxonomical knowledge; museums and nationalism; theories of culture, patrimony, and ownership; manufacture, marketing, and museums; the relationships between museums and academia; identity politics and culture wars; community-based initiatives; and virtual and digital museum spaces.

HIST 6132 Digital Video for Museums and Community History: 3 semester hours

Prerequisites: Consent of Director of Museum Studies Program. This course covers basic production and post-production in digital video, and examines how digital video has been and can be used for community history projects and museum installations. Students will learn basics of shooting, lighting, sound, scripting, and non-linear editing; interviewing and observational footage; and produce a series of documentary shorts. Readings will include the special characteristics of the cinematic medium and case studies of digital video for community-based research, advocacy, and museum audiences.

HIST 6133 Museums and History in the Digital Age: 3 semester hours

This course introduces and explores the key issues, analyses, critical debates, opportunities and potential drawbacks for museums and public historians using digital media to engage with communities. Students will gain facility in implementing digital strategies for museum and public history initiatives, including how to plan, manage, and assess the success of media projects.

HIST 6134 History Curatorship: 3 semester hours

Prerequisites: Graduate standing and consent of instructor. Principles and practices of curatorship, with a focus on historical collections. Curatorial responsibilities for object care. Role of curator in exhibit research, design, and implementation. Issues of inclusivity and shared authority. Historical shifts in curatorial practice, collecting, and museum missions.

HIST 6136 Foundations In Museology II: 3 semester hours

Same as ART HS 6036 and ANTHRO 6136. Prerequisites: HIST 6135 and consent of Director of Museum Studies Program Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

HIST 6137 Museum Organization and Operations: 3 semester hours

Same as ART HS 6037 and ANTHRO 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

HIST 6138 Museum Studies Master's Project: 5 semester hours

Same as ART HS 6038 and ANTHRO 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

HIST 6142 Readings in U.S. History: 3-5 semester hours

Prerequisite: Graduate Standing. Directed readings and writing in selected topics and areas in United States History.

HIST 6143 Readings in World History: 3-5 semester hours

Prerequisite: Graduate Standing. Directed readings and writing on selected topics and areas in World History.

HIST 6145 Topics in Environmental History: 3-5 semester hours

Prerequisite: Graduate standing. This course is an interdisciplinary examination of the interactions people have had with the land and sea, the biophysical environment, over time. Satisfies the elective requirement outside the Biology Department for the Tropical Biology and Conservation Graduate Certificate Program. May be repeated provided the topic is different.

HIST 6152 Directed Readings in U.S. History: 1-3 semester hours

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

HIST 6153 Directed Readings in World History: 1-3 semester hours

Prerequisites: Consent of a member of the graduate faculty. Directed readings and research at the graduate level.

Interdisciplinary Programs

The university offers a number of interdisciplinary programs and courses. These programs combine course offerings from several departments so the subject is examined from a multidisciplinary approach. While most persons who earn certificates do so in the process of completing their undergraduate degree, non-degree seeking students may complete a certificate. Below are descriptions of these interdisciplinary offerings:

- Bachelor of Liberal Studies degree
- Bachelor of Interdisciplinary Studies degree
- Interdisciplinary undergraduate certificates
- Interdisciplinary minors
- Interdisciplinary courses

Interdisciplinary certificates for international or areas studies are housed in the Center for International Studies.

Bachelor of Liberal Studies (BLS)

The Bachelor of Liberal Studies is a degree program that enables students to combine structured areas of academic emphasis in ways more relevant to their interests than the standard academic major.

Students who participate in this program must declare their areas of study (two minors or a minor and undergraduate certificate) at the time they declare that BLS is their intended degree. The plan of study must be approved at the beginning of the program.

The BLS program is administered through the Department of Philosophy.

To obtain a Bachelor of Liberal Studies (BLS), a student must complete:

- UMSL General Education Requirements (consult General Education (p. 41) section of course listings)
- In addition, students must complete the State Requirement (3) and Cultural Diversity Requirement (3) if not met in General Education course selection
- The university requirement of proficiency in English Composition
 - ENGL 1100 - First Year Writing (to be completed in the first 24 credit hours at the university)
 - Junior Level Writing
- The university requirement of proficiency in Mathematics (to be completed in the first 24 credit hours at the university)
- Two emphasis areas that are satisfied by completing the requirements for:

- two designated BLS Minors in participating departments or other units OR
- a designated minor and any undergraduate certificate. No course may be used more than once.
- A capstone course¹ (minimum of 3 hours) selected from one of the concentration areas that make up the identified BLS core.

Also Required

- Minimum of 45 credit hours in upper level course work (2000 or higher)
 - Electives 28-42
- A minimum of 120 credit hours
- Overall GPA of 2.0 or better
- GPA of 2.0 or better in BLS combination areas (unless otherwise specified)
- Minimum grade of C in all courses used in BLS combination areas unless otherwise specified by the department
- Residency requirement, in addition to campus residency, unless otherwise specified, 9 graded hours in each minor and certificate at 2000 level or above and one capstone course

¹ Note: Not all minors have a designated BLS capstone course so students must be careful to pair minors and certificates so that they have a capstone course.

The Colleges of Arts and Sciences (CAS), Business Administration (COBA), College of Education (COE), the Pierre Laclède Honors College (PLHC), and the School of Social Work (SW) have joined together to make available Liberal Studies combinations involving the following units:

- Department of Anthropology and Archaeology (CAS)
- Department of Art and Design (CAS)
- Department of Biology (CAS)
- College of Business Administration (COBA)
- College of Education (COE)
- Department of Chemistry and Biochemistry (CAS)
- Department of Communication and Media (CAS)
- Department of Criminology and Criminal Justice (CAS)
- Department of Economics (CAS)
- Department of English (CAS)
- Department of History (CAS)
- Pierre Laclède Honors College (PLHC)¹
- Department of Language and Cultural Studies (CAS)
- Department of Mathematics and Computer Science (CAS)
- Department of Music (CAS)
- Department of Philosophy (CAS)
- Department of Physics and Astronomy (CAS)
- Department of Political Science (CAS)
- Department of Psychological Sciences (CAS)
- Department of Sociology, Gerontology and Gender Studies (CAS)
- Department of Theatre Arts (CAS)
- School of Social Work (SW)
- Undergraduate certificates

¹ Must be admitted to Honors program.

Bachelor of Liberal Studies: Capstone and Other Restrictions

- Students who are planning to earn a Bachelor of Liberal Studies degree should declare the BLS as their major within the first 90 hours of the program. Declaration past this time may prevent timely graduation as all capstone courses are not available every semester.
- The College of Nursing and the Joint Engineering Program are not participants in the BLS program.
- The following Colleges/Departments participate in the BLS program but do not offer a capstone course and must be paired with a minor from one of the areas listed below: Business, Studio Art, Theater Arts, Statistics, Undergraduate Certificates, and Interdisciplinary minors.
- Students admitted to the Pierre Laclède Honors College who wish to present the Honors Certificate as a minor for the BLS must complete the Honors Capstone, (one or two credit hours) and also direct three to six hours of their Honors independent study requirement to work demonstrably relevant to their BLS program. Students should consult the BLS faculty advisor in the Honors College about this requirement.
- The capstone is required in addition to the courses presented for the minor. A minimum grade of C must be earned in the capstone course. The capstone course is not counted toward the minor residency requirement.
- Students choosing to combine the minor in History of Science and Technology with a minor in the Philosophy of Science and Technology may use the same course to satisfy the Logic and Methodology requirement for both minors and may select either PHIL 4491 or HIST 4999 as the capstone. However students selecting HIST 4999 must have also taken HIST 2999.
- The following have identified a Capstone, so at least one of these minors must be included in the BLS program:

Anthropology

One additional 4000 level course in Anthropology not used in the minor. 3

Art & Design

One additional 4000 level topics course in Art History not used in the minor. 3

Biology

BIOL 4889 Senior Seminar 2

Chemistry/Biochemistry

3 total hours from the options listed: 3

CHEM 3022 Introduction to Chemical Literature

CHEM 3905 Chemical Research

CHEM 4897 Seminar

Communication

One additional 3000/4000 level Communication course not used in the minor. 3

Criminology & Criminal Justice

One additional 4000 level course in Criminology and Criminal Justice, not used as part of the minor. 3

Economics

One additional 4000 level Economics course (except ECON 4105, ECON 4160, and ECON 4550) not used in the minor. 3

Education

A 3 hour capstone course must be selected from the following:

ECH ED 4989	Practicum I: Early Childhood Education/Early Childhood Special Education Site Based Experience	3
EDUC 4989	Internship I	3
ELE ED 4989	Practicum I: Elementary/Special Education Site-Based Experience	3
ELE ED 4992	Practicum I: Elementary/Special Education/TESOL Site Based Experience	3
ELE ED 4994	Practicum I: Elementary/TESOL Site Based Experience	3
MID ED 4989	Practicum I: Middle Level Education Site Based Experience	3
SEC ED 4989	Practicum I: Site-Based Experience	3

English

One additional 4000 level English Literature course not used in the minor. 3

Gerontology

One additional 4000 level course in Gerontology not used in the minor and to be coordinated with the program director for Gerontology before starting the course. 3

History

HIST 4999 Senior Seminar 5

Honors College ¹

3 total hours taken from the options listed:

HONORS 4100 Independent Portfolio Writing

HONORS 4900 Independent Study in Honors

or HONORS 4910 Independent Study: Internships

Languages and Cultures

FRENCH 3211 Contemporary French Culture 3

JAPAN 3280 Readings in Japanese 3

SPANISH 3210 Hispanic Culture And Civilization: Spain 3

or SPANISH 3211 Hispanic Culture And Civilization: Spanish America

Mathematics/Computer Science

Computer Science: One additional 4000 Level Course in Computer Science not used in the minor. 3

Mathematics: One additional 4000 Level Course in Mathematics not in the minor. 3

Media Studies

One additional 4000 level course not used in the minor. 3

Music

Select one of the following: 3

M H L T 4000 Directed Studies

THRY COM 4000 Directed Studies: Variable Topic

PDGOGY 4000 Directed Study: Variable Topic

PRACTM 4000 Directed Studies: Variable Topic

Philosophy

One additional 4000 level course not used in the minor. 3

Physics

PHYSICS 4381 Directed Readings in Physics 3

Political Science

POL SCI 3950	Senior Seminar in Political Science	3
Psychology		
One additional 4000 level Psychology course not used in the minor.		3
Sociology		
One additional 4000 level course in Sociology not used in the minor, excluding:		3
SOC 4350 or SOC 4385	Special Study Internship in Sociology	

¹ Must be admitted to Honors program.

Bachelor of Interdisciplinary Studies (BIS)

The Bachelor of Interdisciplinary Studies degree (B.I.S.) provides a flexible, individualized program of study for the self-directed learner. It is developed by each student with advisement by UMSL professional advisers and faculty, and it is intended for students who have unique educational goals that cannot be met by any other UMSL degree program.

Oversight of the B.I.S. degree is the responsibility of the Interdisciplinary Studies Committee, composed of faculty and professional staff, including representatives from Arts and Sciences (Humanities, Social Sciences, and Natural Sciences), Business, Education, Fine Arts and Communication, Nursing or other divisions. The Interdisciplinary Studies Committee will be convened and supported by the Office of the Provost.

Admission Requirements for the B.I.S. Program

Candidates for the B.I.S. degree must complete an application for admission to the program. The Interdisciplinary Studies Committee approves applications.

Approved programs of study are well-designed, coherent, structured to meet the student's unique educational goals, and not readily available under any other UMSL degree program.

Students must have demonstrated the equivalent of academic proficiency required for any other undergraduate degree at UMSL.

Degree Requirements for the B.I.S. Program

General Education Requirements

Students must complete the university's general education requirements. For details refer to the general education requirements (p. 41) section of this Bulletin.

Area of Study

In consultation with faculty and staff advisers, students will carry out an area of study of at least 36 advanced semester hours of graded credit that meets their educational goals. Graded credit consists of degree credit courses in which the student received a letter grade C- or better. The area of study must include at least nine hours at the 3000-level or above; these courses may be in one or more disciplines.

Hour and Grade Requirements

The degree requires completion of 120 semester hours with a 2.0 campus grade point average overall and in the area of study. No more than 15 hours may be taken in one department. At least 45 hours must be

earned in courses beyond the introductory level. A minimum of 24 hours of graded credit must be completed in residence at UMSL, of which 15 hours must be in the area of study and completed after admission to the B.I.S. program. Each candidate must be in residence for 24 of the last 30 hours of graded credit (exclusive of courses taken on a satisfactory/unsatisfactory basis).

Supervised Professional or Service Internship and Independent Research

Credit not exceeding 6 hours may be earned for department-approved professional internship, service internship, or independent research. The projects or activities must be formulated by the student and carried out under the supervision of a faculty member with the approval of the adviser. Students must submit a written report approved by the supervisor upon completion of the projects or activities.

Interdisciplinary Certificates

Undergraduate Certificate in Child Advocacy Studies

The undergraduate Certificate Program in Child Advocacy Studies (CAST) is an interdisciplinary program requiring 19 credits of training in Child Advocacy Studies. The CAST certificate encompasses a group of courses focused on children, youth, and traumatic stress capped by a field experience. The CAST certificate is appropriate for students who want to specialize in working in a variety of professional settings with children and adolescents, many of whom may have experienced trauma.

Most courses required by the Certificate Program in Child Advocacy Studies have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for satisfying the prerequisites. All students must take at least one course outside their home department. All required courses must be taken in residence at UM-St. Louis.

Required courses

PSYCH/SOC WK/CAST 4398	Child Maltreatment: A Multidisciplinary Approach	3
CAST 4498	Forensic Investigation of Child Abuse	3
CAST 4598	Child Abuse Assessment and Intervention	3

Electives

Please choose two of the following:

CNS ED 4310	Human Relations Skills
CRIMIN 2226/ POL SCI 2260	Law, Politics and Society
CRIMIN 2251	Youth Gangs
CRIMIN 3230	Crime Prevention
CRIMIN 3270	Juvenile Justice And Delinquency
CRIMIN/GS 4330	Violence Against Women
CRIMIN 4350	Victimology
ECH ED 3350	Family and Professional Partnerships within School/Community
ED PSY 2212	Child and Adolescent Development
ED PSY 3312	Psychology of Learning, Instruction, and Assessment

GS 2102	Introduction To Gender Studies	
GS/SOC 2224	Marriage And The Family	
GS/SOC 3250	Sociology Of Victimization	
GS/SOC WK 4610	Intimate Partner Violence	
PSYCH 2200	Drugs And Behavior	
PSYCH/GS 2232	Psychology Of Trauma	
PSYCH 2270	Developmental Psychology: Infancy, Childhood And Adolescence	
PSYCH/CAST 3290	Traumatic Stress in Childhood and Adolescence ¹	
PSYCH 3340	Clinical Problems Of Childhood	
PSYCH 4305	Developmental Psychology: Cognitive Development of Children	
SOC 2201	Deviance and Society	
SOC 4312	Sociology Of Wealth And Poverty	
SOC 4356	Sociology Of Education	
SOC WK 4110	Social Work Practice with Individuals, Families, and Groups	
SOC WK 4601	Abused And Neglected Children	
SOC WK 4620	Substance-Related and Addictive Disorders	
SOC WK 4645	Social Work in Mental Health	
Field Experience Options¹		3
A field experience in a child-related field, approved and supervised by the student's home department, is the final part of the certificate. All required CAST courses should be completed, though concurrent enrollment in one CAST course is permitted. Additionally, students must receive prior approval from the CAST program director.		
CAST 4698	Internship in Child Advocacy Studies	
CRIMIN 3280	Internship In Criminology And Criminal Justice	
EDUC 4989	Internship I	
GS 4353	Internship In Gender Studies	
SOC 4385	Internship In Sociology	
SOC WK 4800/4850	Supervised Field Experience In Social Work I	
Seminar		1
CAST 4700	Field Education Seminar	
Total Hours		19

¹ Simultaneous enrollment in a CAST seminar is required for all disciplines.

Cybersecurity Certificate

The Undergraduate Certificate in Cybersecurity is a six-course (18 credit hours) interdisciplinary studies program. It is designed to help students from all backgrounds achieve a foundation in information security. It provides students the flexibility to focus on technical and/or managerial aspects of computer, software, network, and information security. With primary courses offered by Computer Science and Information Systems departments, the program also allows students to choose from a range of electives based on student interests. This certificate serves a broad group of managers, technical specialists, and professionals with or without a bachelor's degree. A prior background in information security is not

required to enter this program. A minimum GPA of 2.5 is required for admission.

Requirements

All students must take three required courses and three electives (at least one elective must be in Computer Science)

Required Courses

INFSYS 3848	Introduction to Information Security	3
CMP SCI 4730	Computer Networks and Communications	3
or INFSYS 3842	Data Networks and Security	
CMP SCI 4782	Information Security	3
or INFSYS 3858	Advanced Security and Information Systems	

Electives

Choose three of the following (at least one must be a CMP SCI course):		9
CMP SCI 4020	Introduction to Android Apps: Android Fundamentals	
CMP SCI 4222	iOS Apps	
CMP SCI 4700	Computer Forensics	
CMP SCI 4750	Introduction to Cloud Computing	
CMP SCI 4780	Computer and Network Security	
INFSYS 3868	Secure Software Development	
INFSYS 3878	Information Security Risk Management and Business Continuity	

Total Hours	18
--------------------	-----------

Students may substitute the above courses with other courses upon approval by the program adviser in either the Computer Science or Information Systems department. In all cases, 18 hours are needed to complete the Undergraduate Certificate in Cybersecurity. A minimum of four courses must be taken in residence at UMSL. Students may not receive both the Undergraduate and the Graduate Certificate in Cybersecurity.

For more information, students can contact the program directors at cybersecurityUMSL@umsl.edu.

Entrepreneurship Certificate

This 18-credit hour certificate, which includes 9 hours of required coursework, will allow students from different majors and with different professional interests to investigate the foundations of entrepreneurial practice. This certificate is appropriate for any student who has an interest in advancing his or her knowledge, creativity, and skills necessary to become or work with entrepreneurs, bring entrepreneurial thinking to his or her workplace, and who seeks a competitive edge in the job market.

Required Courses

BUS AD 1001		
BUS AD 4001	Accelerate Capstone	
In addition, students must take at least one of the following classes:		3
BUS AD 3040		

EDUC 2002	Social Entrepreneurship	
Total Hours		3

Elective Courses

Students must complete a minimum of nine hours, chosen from any of the following lists. The groupings are suggestions that would provide a concentrated focus in a specific area.

Additional courses that may meet this requirement:

1. a course designated as Entrepreneurship in transfer;
2. future courses, as approved by the director of entrepreneurship certificate.

Entrepreneurship in the Arts

BUS AD 2030

Entrepreneurship with Digital Marketing

CMP SCI 3010	Web Programming	3
CMP SCI 4010	Advanced Web Development with Java	3
INFSYS 3847	Web Design	3
MGMT 4614	Entrepreneurship/Small Business Management	3
MKTG 3710	Consumer Behavior	3
MKTG 3720	Management of Promotion	3
MKTG 3721	Introduction to Digital Marketing Strategies	3
MKTG 3722	Introduction to Social Media Marketing	3
MKTG 5720	Marketing Communications	3

Education Entrepreneurship

ED FND 3251	Black Americans in Education	3

Evolutionary Studies Certificate

The undergraduate certificate program in evolutionary studies is designed to provide a unifying perspective on the diverse subject areas of a liberal arts education. Evolutionary biology provides a link between the sciences,

the social sciences, and the humanities. The core of the program is BIOL 1999, "Evolution for Everyone," a course on evolution for students who are not majors in biology. (Biology majors who participate in the EvoS program must take BIOL 3302 instead.) In this course, students are introduced to the history of evolutionary thinking, the basic mechanisms of evolution, and the evolution of complex behaviors. In addition to this one required course, to obtain a certificate students must fulfill twenty credits from the list of courses designated below.

No more than eight hours can be taken at the freshman level, and at least eight hours must be taken at the junior-senior level (3000 level or above).

Courses taken for the certificate in the lower division can satisfy general education requirements (that is, breadth requirements). Courses in the upper division can satisfy requirements for the student's major.

Courses in the Physical and Life Sciences

Physics and Astronomy		
ASTRON 1011	Planets And Life In The Universe	3
Biology		
BIOL 1202	Environmental Biology	3
BIOL 1821	Introductory Biology: Organisms And The Environment	5
BIOL 1999	Evolution for Everyone (Required Core Course) ¹	3
BIOL 2102	General Ecology	3
BIOL 2012	Genetics	3
BIOL 2402	Vertebrate Anatomy, Evolution and Ecology	3
BIOL 2501	Biology Of Plants	5
BIOL 3102	Animal Behavior	3
BIOL 3302	Introduction To Evolution	3
BIOL 4102	Behavioral Ecology	3
BIOL 4112	Evolution Of Animal Sociality	3
BIOL 4182	Population Biology	3
BIOL 4422	Entomology	3
BIOL 4442	Developmental Biology	3
BIOL 4501	Flowering Plant Families: Phylogeny And Diversification	5

Courses in the Social Sciences

Anthropology		
ANTHRO 1005	Introduction To Biological Anthropology	4
ANTHRO 2105	Human Variation	3
Psychology		
PSYCH 1003	General Psychology	3
PSYCH 2200	Drugs And Behavior	3
PSYCH 2205	Human Sexuality: Psychological Perspectives	3
PSYCH 2211	Introduction To Biological Psychology	3
PSYCH 3205	Evolutionary Psychology	3
PSYCH 3390	Directed Studies	1-6
PSYCH 3500	Health Psychology	3
PSYCH 4300	Introduction To Psychopharmacology: Drugs And Mental Illness	3

PSYCH 4311	Psychology Of Nonverbal Behavior	3
PSYCH 4330	Hormones, The Brain And Behavior	3
PSYCH 4349	Human Learning And Memory	3
PSYCH 4356	Cognitive Processes	3
PSYCH 3400	Conceptual and Historical Foundations of Psychology	3
PSYCH 4374	Introduction To Clinical Neuropsychology	3

Courses in the Humanities

English		
ENGL 4030	Contemporary Critical Theory	3
ENGL 4080	Narrative, Cognition, And Emotion	3

Philosophy

PHIL 2280	Minds, Brains, And Machines	3
PHIL 2281	Darwinism and the Philosophy of Biology	3

Honors College Courses

See Honors College Courses below

¹ Biology majors who participate in the EvoS program must take BIOL 3302 instead.

Honors College Courses

The Honors College will offer seminars as part of the Evolutionary Studies certificate or minor, and they will be identified as such before the opening of registration periods. EvoS seminars in honors will be open to non-Honors College students with at least a 3.0 GPA (students must obtain permission numbers from the Honors College). Please note that all honors college course numbers (e.g.) relate to generic course titles (e.g. "Inquiries in the Humanities"), and so it is very important to register for the section number with the proper Evolutionary Studies seminar title. Where these honors college courses are cross-listed (e.g. with English xxxx or Philosophy yyyy), non-honors college students should take them under their departmental number.

History and Philosophy of Science and Technology Certificate

The undergraduate Certificate Program in History and Philosophy of Science and Technology (HPST) is an interdisciplinary program requiring a minimum of 18 credits in HPST.

All required courses must be completed with a "C-" or higher. The satisfactory/unsatisfactory option may not be used towards the HPST Certificate. A minimum of 12 hours must be taken at 2000 and above with 9 of those hours being at 3000 or above. Courses in the upper division (3000 level and above) may satisfy requirements for the student's major, consistently with the major's requirements.

Requirements

1. History:

Select two of the following courses in History and Technology:		6
ECON 3800	History Of Economic Thought	
HIST 2089	Religion, Philosophy & Science in History: Introduction to The Intellectual History Of The West	
HIST 2770	Introduction To Transportation	

HIST 2772	History Of Aviation In American Life	
HIST 2773	Urbanization And Transportation	
HIST 4143	Inquiries in World History ¹	
PHIL 4483	Topics In History And Philosophy Of Science	
PSYCH 3400	Conceptual and Historical Foundations of Psychology	
Total Hours		6
2. Philosophy:		
PHIL 3380	Philosophy Of Science	3
Select one of the following in the philosophy of science:		3
PHIL 2280	Minds, Brains, And Machines	
PHIL 2281	Darwinism and the Philosophy of Biology	
PHIL 2282	Philosophy of Science in Historical Perspectivce	
PHIL 3380	Philosophy Of Science	
PHIL 4452	Feminism And Science	
PHIL 4479	Philosophy Of Cognitive Science	
PHIL 4480	Topics In Philosophy Of Science	
PHIL 4482	Philosophy Of Social Science	
PHIL 4483	Topics In History And Philosophy Of Science	
PSYCH 3400	Conceptual and Historical Foundations of Psychology	
Total Hours		6

3. Science: Two courses in the mathematical, physical, life, behavioral, or social sciences. The science courses must be in addition to those satisfying the Gen Ed requirements (for students pursuing a degree at UM St. Louis) and conditional upon their acceptance by the HPST Certificate Undergraduate advisor (6 credit hours).

¹ Note: HIST 4143 is offered under different topics; only the specific topic listed here counts as HPST.

Prerequisites

Some courses required by the Certificate Program in HPST have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for either satisfying the prerequisites by adding courses to their curriculum or obtaining a waiver from the instructor.

Alternative courses to satisfy the History and Philosophy requirements:

Some courses may satisfy either the History or the Philosophy requirement even though they are not listed as such, depending on what their content is. These include but are not listed among those satisfying the requirements, you may do the following:

- Obtain the description of what the course will cover.
- Write a very short explanation of why the course ought to count toward satisfaction of the requirement, by showing how it deals with the relevant aspect of HPST.

Submit both to the HPST undergraduate advisor for approval.

Labor Studies Certificate

The Labor Studies Certificate is designed for students who are interested in a focused specialty in labor studies. The 18 credit hour curriculum consists of six credit courses offered over a three-semester period.

HIST 2219	United States Labor History	3
ECON 3450	Labor in the Global Political Economy	3
POL SCI 1450	Introduction To Labor Studies	3
POL SCI 3220	Labor Law	3
POL SCI 3430	Union Leadership And Administration	3
Total Hours		15

Certificate in Neuroscience

The undergraduate Certificate Program in Neuroscience is an interdisciplinary program requiring 20 credits of training in Neuroscience. The Program provides a group of related courses capped by a research experience. The Program is likely to be of particular interest to students who want to pursue graduate or professional training, but it is intended to appeal to any student interested in Neuroscience.

Courses taken for the certificate in the lower division (1000 and 2000 level) may satisfy general education requirements (that is, breadth requirements), if they are approved general education courses. Courses in the upper division (3000 level and above) may satisfy requirements for the student's major, consistently with the major's requirements. All required courses must be completed with a "B-" average or higher. Pass/Fail grades do not count.

Most courses required by the Certificate Program in Neuroscience have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for satisfying the prerequisites.

Requirements

The two entry level courses:

BIOL 1831	Introductory Biology: From Molecules To Organisms ¹	5
or BIOL 1012	General Biology	
or BIOL 1102	Human Biology	
PSYCH 2211	Introduction To Biological Psychology	3
Select one of the following statistics courses:		3
BIOL 4122	Biometry	
MATH 1320	Applied Statistics I	
PSYCH 2201	Psychological Statistics	
SOC 3220	Social Statistics	

Electives

Select two of the following: ²		6
BIOL 3102	Animal Behavior	
BIOL 4822	Introduction To Neuroscience	
CHEM 4712	Biochemistry	
CMP SCI 4300	Introduction To Artificial Intelligence	
CMP SCI 4340	Introduction to Machine Learning	
PHIL 2280	Minds, Brains, And Machines	
PHIL 3378	Philosophy of Mind	

PHIL 4478	Topics In Philosophy Of Mind
PHIL 4479	Philosophy Of Cognitive Science
PHYSICS 4347	Biophysics Of Imaging
PSYCH 4300	Introduction To Psychopharmacology: Drugs And Mental Illness
PSYCH 4314	Behavioral Neuroscience
PSYCH 4330	Hormones, The Brain And Behavior
PSYCH 4349	Human Learning And Memory
PSYCH 4356	Cognitive Processes
PSYCH 4372	Introduction to Social Neuroscience
Select at least 3 credits from one or more semesters of research experience ³	
BIOL 4905	Research
CHEM 3905	Chemical Research
CMP SCI 4880	Individual Studies
PHIL 4450	Special Readings In Philosophy
PHYSICS 3390	Research
PSYCH 3390	Directed Studies
Total Hours	20

¹ BIOL 1831 is strongly recommended, especially for those considering taking BIOL 4822 Introduction to Neurosciences towards their Neuroscience Certificate (BIOL 1831 is a prerequisite for BIOL 4822)"

² At least one elective must be taken outside the student's major

³ This requires completion of a Directed Research Assistantship with a Neuroscience faculty member within any of the participating departments. The research project must be approved in advance by the undergraduate advisor with the assistance of a committee of Neuroscience faculty. It is expected that this research will lead to a presentation of the research (e.g., at the UM-St. Louis Neuroscience seminar or the Undergraduate Research Symposium).

Studies in Religions Certificate

A certificate in studies in religions requires the completion of 18 hours with a grade of C or better.

Courses must be chosen from two or more departments (interdisciplinary offerings excluded), and the program must include two or more courses that focus on different major religious traditions. (Courses that fulfill this requirement are marked with an asterisk [*] in the list below.)

In addition, students are encouraged to broaden their understanding of religions and religious experience by enrolling in several courses in which these subjects are studied in philosophical or cultural contexts.

Students must obtain the approval of the coordinator of studies in religions before completing 12 hours toward this certificate.

Requirements

Select 6 of the following list in accordance with the guidelines above: 18

Anthropology	
Art	
ANTHRO 2173	Archaeology And Cultures Of The Biblical World
ART HS 2225	Medieval Art

English	
ENGL 2240	Literature Of The Old Testament
ENGL 2250	Literature Of The New Testament
ENGL 4950	Special Topics In Literature ¹
History	
HIST 2000	Selected Topics in History ²
HIST 2082	Christianity: From Jesus to Martin Luther
HIST 2083	Europe In Early Middle Ages: Paganism to Christianity
HIST 2089	Religion, Philosophy & Science in History: Introduction To The Intellectual History Of The West
Philosophy	
PHIL 1120	Asian Philosophy
PHIL 1185	Philosophy Of Religion
PHIL 3302	Medieval Philosophy
Political Science	
POL SCI 2610	Ancient And Medieval Political Thought
POL SCI 2650	American Political Thought
Total Hours	18

¹ Note: ENGL 4950 should only be taken when Religious Literature is the topic.

² Topic in HIST 2000 must be a religious topic.

Trauma Studies Certificate

The trauma studies certificate is designed for students who are interested in a focused specialty in trauma studies or victim services in addition to their own major. It is appropriate for students in the College of Arts and Sciences or any of the schools of the university. It is particularly appropriate for students wishing to pursue careers in psychology, social work, sociology, criminology, law, public health, or nursing.

Requirements

A student may earn a trauma studies certificate by completing 18 hours with a GPA of 2.0 or better from at least three departments from the following courses:

Select at least three of the following: 12	
Criminology and Criminal Justice	
CRIMIN 1120	Criminal Law
CRIMIN 4300	Communities And Crime
CRIMIN 4350	Victimology
Psychology	
PSYCH 2232	Psychology Of Trauma
PSYCH 3390	Directed Studies (for three credits only toward certificate) ¹
Social Work	
SOC WK 3100	Introduction To Strategies for Social Work Practice
SOC WK 4601	Abused And Neglected Children
SOC WK 4602	Child Welfare Practicum Seminar
Sociology	

SOC 3250	Sociology Of Victimization	
Select up to two of the following:		6
Criminology and Criminal Justice		
CRIMIN 3230	Crime Prevention	
CRIMIN 2240	Policing

Interdisciplinary Minors

Minor in American Studies

American Studies involves an interdisciplinary approach to the study of the history, cultures, politics, and economy of the United States, its colonial antecedents, and its indigenous peoples. At UMSL, the minor enables students also to study the city and region of St. Louis, a quintessentially American city.

Students interested in this minor should contact the coordinator of American Studies for advice and information.

There are 18 hours required in the minor, and in completing these hours candidates must take courses from at least three disciplines. Candidates must have a cumulative grade point average of 2.0 or better in the minor. Three hours of the minor may be taken on a satisfactory/unsatisfactory basis, and a maximum of nine hours will be accepted in transfer. Candidates wishing to take American Studies courses in the Honors College do not need to be members of the Honors College but must register for the courses via the Honors College.

Requirements for the Minor.

Completion of the American Studies Minor requires at least 18 credit hours (6 courses) including an interdisciplinary introductory course. Of the remaining 15 hours, at least six hours must be taken from a small group of core courses designed to give students a foundation for further study and at least six hours from a larger group of elective courses which will broaden students' experience or enable them to specialize in specific areas. At least six hours must be taken from advanced level (3000 and

4000) undergraduate courses. Students are recommended to include in this advanced work an American Studies "capstone", an option that may be fulfilled in several ways, which are described below.

Introductory Course

HIST 2160	Introduction to American Studies (must be taken in first 12 hours of the minor)	3
-----------	--	---

Core Courses

Choose at least one of the following: 3

ENGL 2710	American Literature Before 1865	
ENGL 2720	American Literature After 1865	

Choose at least one of the following: 3

HIST 1001	American Civilization To 1865	
HIST 1002	American Civilization 1865 To Present	
POL SCI 1100	Introduction To American Politics	
HONORS 1230	American Traditions: Social And Behavioral Sciences	

Elective Courses

Choose at least two courses from the following American Studies electives 6

Anthropology		
ANTHRO 1710	Native American Literature	
ANTHRO 2120	Native Peoples Of North America	
ANTHRO 2121	Native American Spirituality	
ANTHRO 2139	Shamans, Serpents, and Spirits: Archaeology of the Borderlands	

Art History

ART HS 1104	Indigenous Arts Of North America	
ART HS 2270	American Art To 1876	
ART HS 2272	American Art Since 1876	
ART HS 2279	American Architecture	

Criminology

CRIMIN 1100	Introduction To Criminology And Criminal Justice	
CRIMIN 1120	Criminal Law	
CRIMIN 1150	Violence In America	
CRIMIN 4300	Communities And Crime	
CRIMIN 4325	Gender, Crime, And Justice	
CRIMIN 4340	Race, Crime, And Justice	

Economics

ECON 2200	Monetary Policy in Historical Perspective	
ECON 2800	History Of American Economic Development	

English

ENGL 4610	Selected Major American Writers I	
ENGL 4620	Selected Major American Writers II	
ENGL 4640	American Fiction To World War I	
ENGL 4650	Modern American Fiction	

History

HIST 1004	The History Of Women In The United States	
-----------	---	--

HIST 2005	The Modernization Of The United States
HIST 2008	History Of St. Louis
HIST 215	Topics In African-American History
HIST 2028	Sex, Drugs, and Rock 'n Roll: The 1960s in Song, Fashion, Dating, and Protest
Gender Studies	
GS 2020	History of Women and Social Movements
GS 2380	Politics of Gender in the United States
GS 3031	History Of Women In The United States
GS 3700	Diversity And Social Justice
GS 4335	Gender and Body Image in Media and Culture
Honors	
HONORS 2010	Inquiries In The Humanities (topic must be approved by American Studies coordinator)
HONORS 2030	Inquiries In The Social And Behavioral Sciences (topic must be approved by American Studies coordinator)
HONORS 3010	Advanced Honors Seminar In The Humanities (topic must be approved by American Studies coordinator)
HONORS 3030	Advanced Honors Seminar In The Social And Behavioral Sciences (topic must be approved by American Studies coordinator)
Military and Veterans Studies	
MVS 2100	Veterans in America
MVS 2130	Gender and the Military
Music History	
M H L T 1003	History of Rock Music
M H L T 1060	Introduction To African-American Music
M H L T 1070	Introduction To Jazz
M H L T 1120	The American Musical Film
M H L T 1140	Popular Music in America
M H L T 1190	Musical Journey of the Native North American
M H L T 4280	American Music
Political Science	
POL SCI 2260	Law, Politics and Society
POL SCI 2320	African Americans And The Political System
POL SCI 2370	The Politics of Identity and Social Justice
POL SCI 2380	The Politics of Gender in the United States
POL SCI 2650	American Political Thought
POL SCI 3210	Civil Liberties
POL SCI 3300	The American Presidency

POL SCI 3330	Public Opinion and Political Participation
POL SCI 3460	The Politics Of Poverty And Welfare
Sociology	
SOC 1040	Social Problems
SOC 1999	The City
SOC 2170	Aging in America: Concepts & Controversies
SOC 2202	Urban Sociology
SOC 2316	Power, Ideology And Social Movements
SOC 4100	Introduction to Feminist and Gender Theory
SOC 4312	Sociology Of Wealth And Poverty

Student considering other elective choices must work with the American Studies faculty coordinator to obtain approval to apply these courses to the minor.

Capstone options:

Students are encouraged to complete a capstone for the American Studies minor. A capstone course can satisfy three credit hours of the 18 hour minor. Experiences that could serve as a capstone include appropriate departmental capstone courses, independent studies, research projects, and internships. Interested students should work with the coordinator of American Studies to have a capstone course approved.

Minor in Child Advocacy Studies

The undergraduate minor in Child Advocacy Studies (CAST) is an interdisciplinary program requiring 15 credits of training in Child Advocacy Studies. The CAST minor encompasses a group of courses focused on children, youth, and traumatic stress. The CAST minor is appropriate for students who want to explore working in a variety of professional settings with children and adolescents, many of whom may have experienced trauma.

Most courses required by the minor in Child Advocacy Studies have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for satisfying the prerequisites. All required courses must be taken in residence at UM-St. Louis.

Required courses:

PSYCH/CAST 3290	Traumatic Stress in Childhood and Adolescence ¹	3
PSYCH/SOC WK/CAST 4398	Child Maltreatment: A Multidisciplinary Approach ¹	3
CAST 4498	Forensic Investigation of Child Abuse	3
or CAST 4598	Child Abuse Assessment and Intervention	
Electives		6

Please choose two of the following:

CAST 4498	Forensic Investigation of Child Abuse (if course not used above)
CAST 4598	Child Abuse Assessment and Intervention (if course not used above)

CRIMIN 2226/ POL SCI 2260	Law, Politics and Society
CRIMIN 2251	Youth Gangs
CRIMIN 3230	Crime Prevention
CRIMIN 3270	Juvenile Justice and Delinquency
CRIMIN/GS 4330	Violence Against Women
CRIMIN 4350	Victimology
CNS ED 4310	Interpersonal Skills in Helping Relationships
ED PSY 3312	Psychology of Learning, Instruction, and Assessment
ECH ED 3350	Family and Professional Partnerships within School/Community
GS 2102	Introduction to Gender Studies
GS/SOC 2224	Marriage and the Family
GS/SOC 3250	Sociology of Victimization
GS/SOC WK 4610	Intimate Partner Violence
PSYCH 2200	Drugs and Behavior
PSYCH/GS 2232	Psychology of Trauma
PSYCH 2270	Developmental Psychology: Infancy, Childhood and Adolescence
PSYCH 3340	Clinical Problems of Childhood
PSYCH 4305	Developmental Psychology: Cognitive Development of Children
SOC 2201	Deviance and Society
SOC 4312	Sociology of Wealth and Poverty
SOC 4356	Sociology of Education
SOC WK 4110	Social Work Practice with Individuals, Families, and Groups
SOC WK 4601	Abused and Neglected Children
SOC WK 4620	Substance-Related and Addictive Disorders
SOC WK 4645	Social Work in Mental Health

Total Hours 15

Minor in Classical Studies

The minor in Classical Studies is an interdisciplinary course of studies intended to encourage undergraduates in various disciplines to come to a fuller awareness of the cultures of ancient Greece and Rome and of the classical tradition that underlies much of modern Western civilization. In addition to appealing to any student's curiosity about the early stages of society in the West, the minor provides an especially valuable supplement to those who are majoring in many liberal arts areas including history, literature, philosophy, foreign languages, and art.

Students pursuing the minor will acquire a foundation in either Greek or Latin. They may choose to use either sequence to fulfill the foreign language requirement in the College of Arts and Sciences.

Requirements

Candidates for the minor must complete 19 credit hours of course work including:

LATIN 1001 & LATIN 1002	Latin I and Latin II	10
----------------------------	-------------------------	----

or GRK ANC 1001 & GRK ANC 1002	Ancient Greek I and Ancient Greek II	
Select three of the following:		9
ART HS 2211	Art And Archaeology Of The Ancient World	
ART HS 2212	Greek Art And Archaeology	
ART HS 2213	Roman Art & Archaeology	
ART HS 4411	Topics In Ancient Art And Archaeology	
GRK ANC 2101	Intermediate Ancient Greek Language And Culture	3
HIST 2081	Rome: The Republic And Empire	
LATIN 2101	Intermediate Latin Language And Culture	
PHIL 3301	Ancient Philosophy	
PHIL 4401	Plato	
PHIL 4402	Aristotle	
Any other course approved by the coordinator		
Total Hours		22

Minor in Environmental Studies

This is an interdisciplinary program that integrates the natural and physical sciences with the social sciences and humanities to study current environmental problems resulting from human population growth, global climate change, overuse of natural resources, pollution and biodiversity loss. A minimum 18 hours are required, 9 of which must be in the natural and physical sciences, including the listed Honors College courses, and 9 must be from the social sciences and humanities. Both BIOL 1202 (Environmental Biology) and POL SCI 3480 Environmental Politics must be completed as part of the total 18 hours. A total of 12 hours must be taken at or above the 2000 level, with one additional course at or above the 3000 level besides POL SCI 3480. At least 9 hours must be taken while in residence at UMSL. A minimum GPA of 2.0 is required.

ANTHRO 1005	Introduction To Biological Anthropology	4
ANTHRO 2126	Archaeology Of Greater St Louis	3
ANTHRO 3228	People and Plants	3
ANTHRO 3232	Environmental Archaeology	3
ANTHRO 3270	Human Ecology, Cultural Collapse, and Sustainable Developments	3
BIOL 1202	Environmental Biology	3
BIOL 1821	Introductory Biology: Organisms And The Environment	5
BIOL 2102	General Ecology	3
BIOL 2103	General Ecology Laboratory	2
BIOL 2501	Biology Of Plants	5
BIOL 3202	Conservation Biology	3
BIOL 3203	Conservation Biology Laboratory	2

POL SCI 3595	Studies In Comparative Politics	3
POL SCI 3850	International Organizations And Global Problem-Solving	3
POL SCI 3900	Special Readings	1-10

Minor in Latina/Latino Studies

Latina/Latino Studies at the University of Missouri-St. Louis is an interdisciplinary program dedicated to the study of the historical, social, political, language, and cultural experiences of U.S. Latina/Latinos, their families and communities. Students in this program will examine how transnational understandings of race, ethnicity, politics, culture, and language are mapped onto and struggled over within the United States, the Midwest, and St. Louis.

In addition to two required courses—Introduction to Latina/Latino Studies and an internship/service learning Capstone Experience—students will select three electives to round out the minor, each from a different discipline, on topics such as immigration, bilingualism, cultural worldview, comparative politics, and history (more classes will be added as created). Students will combine courses across the disciplinary spectrum into an individualized program to gain a deeper understanding of Latina/Latino cultures, histories, and social conditions; while they engage in collaborative projects, civic programs, and service learning; and enhance writing and analytical skills.

Introductory Course

HIST 2002	Introduction to Latina/Latino Studies	3
-----------	---------------------------------------	---

Electives

Choose 3 from following list; at most one course from each discipline will count toward the minor/certificate

ANTHRO 2139	Shamans, Serpents, and Spirits: Archaeology of the Borderlands	
CRIMIN 4340	Race, Crime, And Justice	
TCH ED 3210	General Linguistics in Tchg English to Speakers of Other Languages	

TCH ED 3211	Basic Principles of Second and Foreign Language Acquisition	
TCH ED 3212	Sociolinguistics and Communication in the Classroom	
FGN LANG 2100	Languages and World View	
HIST 3061	Mexican American History	
HIST 3042	U.S. Social Movements In The 20Th Century	
PHIL 1030	Present Moral Problems	
POL SCI 1500	Introduction To Comparative Politics	
POL SCI 2530	Political Systems Of South America	
POL SCI 2540	Political Systems Of Mexico, Central America And The Caribbean	
SPANISH 3220	Introduction to Spanish Translation and Interpreting	
SPANISH 2101 or above (SPANISH 1199 can substitute)		

Capstone

A service learning/internship capstone experience course in the Latina/Latino community approved by the program director.	3
---	---

Total Hours	15
-------------	----

Minor in Legal Studies

The minor in Legal Studies is open to all undergraduate students at UMSL, whatever their major field. It offers a secondary field of concentration in one of the most important areas of social life. Students may use the minor as a complement to their major, as an additional qualification for career opportunities, or as general education.

This interdisciplinary minor coordinates liberal arts courses related to law. A faculty member in Legal Studies will advise students and will work with their major advisers in planning appropriate courses.

Candidates must take:

POL SCI/CRIMIN 1200	Foundations Of Law: An Introduction To Legal Studies	3
Select five of the following: ¹		15
BUS AD 1900	Introduction to Personal Law	
BUS AD 2900	Legal Environment Of Business	
BUS AD 3900	Business Law: Contracts, Sales, Secured Transactions, Bankruptcy	
BUS AD 3901	Business Law:Negotiable Instruments, Business Organ., Property	
INTL BUS 3280	The Law Of International Business Transactions	
CRIMIN 1100	Introduction To Criminology And Criminal Justice	
CRIMIN 1120	Criminal Law	
CRIMIN 2130	Criminal Justice Policy	
CRIMIN 2250	Courts	
CRIMIN 3345	Rights Of The Offender	
CRIMIN 4300	Communities And Crime	
ECON 3650	Law And Economics	
HIST 3041	Topics In American Constitutional History	

HIST 2085	Medieval England: From Arthur to Richard III	
MEDIA ST 3355	Media Law And Regulation	
PHIL 4487	Topics In Philosophy Of Law	
POL SCI 2260	Law, Politics and Society	
POL SCI 2280	Judicial Politics And Policy	
POL SCI 2290	Gender And The Law	
POL SCI 3200	Constitutional Law	
POL SCI 3210	Civil Liberties	
POL SCI 3260	The Supreme Court	
POL SCI 4850	International Law	
Total Hours		18

¹ At least three courses must be taken at the 3000 level and above. No more than two courses from a single discipline may be included in the minor.

Minor in Public Affairs Journalism Requirements

1. Nine hours in communication/English professional training:

ENGL 3140	News Writing	3
or MEDIA ST 3214	News Writing	
ENGL 3180	Reporting	3
or MEDIA ST 2212	Broadcast Writing And Reporting	

Select one of the following:

ENGL 4890	Writing Internship	
MEDIA ST 3394	Internship In Journalism	
MEDIA ST 3396	Internship In Radio	
MEDIA ST 3397	Internship In Television/Film	

Total Hours 6

2. Nine hours in public affairs at the 3000 level or above
- a. Students earning a writing certificate or majoring in communication with a mass communication emphasis must take 15 hours (at least 9 of these at the 3000 level or above) in economics, political science, or sociology.
 - b. Students majoring in economics, political science, or sociology must take nine hours (in addition to the required English/communication courses) at the 3000 level or above in addition to English/communication courses chosen from those listed above and/or in the two cognate areas outside their major (i.e., economics, political science, or sociology).

A list of courses applicable to the minor is available from the coordinator.

Minor in Urban Studies

A minor in urban studies includes 18 hours of course work. Candidates must have a cumulative grade point average of 2.0 or better in the minor. Courses taken on a satisfactory/unsatisfactory basis may not be applied to the minor. Special topics courses relevant to urban studies may be included in the minor when approved in advance by the coordinator of the urban studies minor.

Requirements

Students must take:

Select six of the following ¹		18
ART HS 2279	American Architecture	
ART HS 3365	The Artist And The City	
CRIMIN 3230	Crime Prevention	
CRIMIN 4300	Communities And Crime	
ECON 4700	Urban Areas and Real Estate Markets	
HIST 3000	Selected Topics In History	
POL SCI 2350	Introduction To Urban Politics	
POL SCI 3450	Urban Administration	
PSYCH 3256	Environmental Psychology	
SOC 1040	Social Problems	
SOC 2202	Urban Sociology	
SOC 3344	Problems Of Urban Community	
Total Hours		18

¹ At least three courses at the 3000 level or above. No more than two courses from a single discipline may be included in the minor.

Courses

INTDSC 1003 University Studies: 1 semester hour

This course, required of all new freshmen in the College of Arts and Sciences, is designed to assist students in making the transition to the university experience and to UMSL by giving students the knowledge and tools needed to succeed as a scholar. The course will also familiarize students with the relationship between their education and their career and personal goals, and will assist in developing positive connections with faculty, staff, and peers at UMSL. Students will learn about faculty expectations, support services, and student life, as well as academic disciplines. The course counts toward the 120 credit hours needed for graduation.

INTDSC 1004 SUCCEED Special Topics: 1-3 semester hours

Prerequisites: By consent of SUCCEED director. This course is designed to assist students in the SUCCEED program make the transition to the university experience and to UMSL. This course gives students in SUCCEED the opportunity to be co-enrolled in courses that meet their interests and abilities through a mutual agreement between SUCCEED staff and UMSL course instructors regarding enrollment and student expectations.

INTDSC 1010 Information Research and Student Success: 1 semester hour

Students will use online library resources to learn search techniques for different types of information. Course content will be delivered through interactive, online tutorials and short, informative videos. Students will develop an understanding of academic research that will set a foundation for critical thinking skills. The course will help students in practical ways, such as for researching term papers, but also in more abstract ways, such as exposing them to the world of scholarship and academic knowledge.

INTDSC 1030 Language and Communicative Arts Across the Disciplines: 3 semester hours

This course is designed to advance the academic skills of university-level students. This course consists of listening to academic lectures across the disciplines; reading texts and articles to supplement lectures; writing summaries, essays and responses to exam questions; understanding and editing grammar and sentence structure; phonetics and word stress patterns; presentation skills; and advancing skills in note-taking, critical thinking, and comprehension of advanced college-level vocabulary of various fields of study.

INTDSC 1220 Special Topics in Gerontology: 3 semester hours

Same as GERON 2220. Selected topics dealing with various aspects of gerontology. The specific content of this course will vary from semester to semester. The course may be repeated with permission from the Gerontology Director.

INTDSC 1700 Major and Career Exploration: 1 semester hour

This course is designed to provide students with the opportunity to learn and explore various majors and career paths within a structured setting. Both informative and interactive, the course will provide students with the opportunity to learn broadly about college majors and their relationship to the 'world of work,' while also researching specifically the options they are interested in pursuing. The course seeks to assist students with answering two questions, "What do I want to study?" and "How do I want to make a life for myself (and family)?" Components of the course will also educate students about the current and projected employment market, and how to further research pertinent career information.

INTDSC 1999 Big History: From the Big Bang to the Present: 3 semester hours

Same as HIST 1999. An introduction to the humanities, social science, and science disciplines through a sweeping overview of natural and human history from the Big Bang to the present. Course will include lectures from faculty in various Arts and Sciences units, films, and group discussions.

INTDSC 1999A Big History: From the Big Bang to the Present: 6 semester hours

Same as HIST 1999A. An introduction to the humanities, social science, and science disciplines through a sweeping overview of natural and human history from the Big Bang to the present. Course will include lectures from faculty in various Arts and Sciences units, films, field trips, and group discussions.

INTDSC 2003 Careers in Health and Medicine: 1 semester hour

Same as ANTHRO 2003, GERON 2003, SOC 2003. In this course, students will learn about occupations in such fields as medicine, the allied health professions, health non-profit organizations, and global healthcare delivery. Students will understand the education and skills necessary for various careers and for application to medical, professional, and graduate schools, and will become familiar with majors, certificates and minors that are available at UMSL. They will learn about employment opportunities in the healthcare industry in the St. Louis metropolitan area, and will be introduced to members of the local community who give guest lectures. Students will gain practical experience by shadowing a healthcare professional in their job.

INTDSC 3010 Peer Mentoring: 1-3 semester hours

Prerequisites: Consent of instructor. The objective of this interdisciplinary course is to prepare and support undergraduate students working across campus as learning assistants, tutors, peer mentors, student leaders, etc. The course will support the development of general pedagogical knowledge of active learning, leadership and facilitation skills, and effective communication and listening skills, that they will use to facilitate learning in settings where students are working collaboratively, reviewing course content, or receiving supplemental instruction to guide their success. This course may be repeated for up to 6 credit hours.

Language and Cultural Studies

General Information

Degrees and Areas of Concentration

Language and Cultural Studies offers courses in French, German, Japanese, and Spanish, as well as a Dual Language Professional option, leading to the B.A. in Modern Language degree, and an emphasis in each of these languages for students seeking the B.S. Ed. in Secondary Education as well as the B.A. in Modern Language with Master's Level Coursework for Secondary Teacher Certification. In addition, the program offers courses in English for Academic Purposes, Arabic, Chinese, and Latin.

Minors may also be earned in the department. For details, see the specific requirements which appear later in this section.

Study Abroad

Language students who have been at the University of Missouri-St. Louis at least one semester and have studied the language for at least one year may receive credits for formal study abroad. Students must present a list of language course descriptions from the institution abroad to receive prior consent of the department, and must present a transcript for evaluation upon return to receive credit for those courses. Exchange programs are available with many universities in foreign countries. For information, please contact the Study Abroad Office at <http://www.umsl.edu/services/abroad/>.

Alumni Scholarship

Qualified junior and senior language majors may apply for the Modern Language Alumni Scholarship, which is renewable each year on a competitive basis. For information, please contact Student Financial Aid at <http://www.umsl.edu/services/finaid/>.

Marcus Allen Memorial Scholarship

Qualified students of French may apply for the Marcus Allen Memorial Scholarship which is awarded on a competitive basis and must be used within one semester of the award. For information, please contact Student Financial Aid.

Baldini Family Scholarship

Qualified full-time students pursuing a Modern Language degree with teacher certification may apply for this scholarship which is awarded on a competitive basis and must be used within one semester of the award. For information, please contact Student Financial Aid.

Community College Scholarship

Qualified community college students may apply for the Modern Language Community College Scholarship to be used for educational fees toward

enrollment in third semester or higher courses in French, German, Japanese, or Spanish. This scholarship must be used within one semester of the award. For information, please contact Student Financial Aid.

German Scholarship

Students of German may apply for the German Scholarship. Funds may be used toward educational fees for German courses or toward study abroad in a German-speaking country. For information, please contact Student Financial Aid

Allen B. and Helen S. Shopmaker Spanish Scholarship

Qualified full-time students pursuing a Modern Language degree with a concentration in Spanish may apply for this scholarship. For information, please contact Student Financial Aid.

Departmental Honors

Candidates for departmental honors in Modern Languages must meet the following requirements:

1. Achieve a GPA of 3.5 in the major for all hours attempted beyond the first two semesters. (Language Courses 1001 and 1002).
2. Maintain an overall GPA of 3.0.

Undergraduate Studies

General Education Requirements

Each language major must satisfy the general education requirements (p. 41) of the university and the general education requirements of the College of Arts and Sciences.

Specific Requirements or Restrictions

Students entering with no high school language units must enroll in Language 1001 or may enroll in Language 2115. Language 2115 (a, b, and c) is the intensive study of a language and will satisfy the foreign language requirement. 2115a, 2115b, and 2115c are co-requisites and must be taken concurrently. To satisfy the foreign language requirement all three sections must be completed with a grade of C- or better.

A grade of D in a Language 1001 course is a passing grade but not an entrance grade for a Language 1002 course. A grade of D in a Language 1002 course is a passing grade but not an entrance grade for a Language 2101 course or its equivalent. A grade of D in a Language 2101 course fulfills the language requirement, but is not an entrance grade for a higher-level course.

Demonstration of a high level of proficiency may affect the number of hours required for the major. Native or heritage speakers of a language should consult with the department concerning appropriate placement and advising. Students with previous language coursework should contact the department for language placement testing and advising. Students may not take for credit an elementary course if they have already completed a higher-level course for which the elementary course, or its equivalent, is a prerequisite.

Degree Requirements

All courses for the major must be passed with a grade of C- or better. No course required for the major may be taken on a satisfactory/unsatisfactory (s/u) basis with the exception of those taken abroad as part of a university program that has received departmental approval.

Bachelor of Arts

All students seeking a B.A. in a Modern Language must successfully complete FL 2100 Languages and World View, and must meet the departmental requirement of a minimum of 33 hours in French or 33 hours in German or 37 hours in Japanese or 35 hours in Spanish (excluding Language 1001 and 1002). The maximum number of hours that may be taken in the major is 45 (including Language 1001 and 1002). In addition, students seeking the B.A. in a Modern Language who desire a teaching certificate must also take FGN LANG 4589 (same as SEC ED 4589), Curriculum and Methods of Teaching Foreign Languages, FGN LANG 4590 (same as SEC ED 4590), and fulfill the professional secondary education requirements of the College of Education.

B.S. Ed. in Secondary Education with Emphasis in a Foreign Language

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. degree in the language; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification.

Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

B.A. in a Foreign Language with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Transfer Students

Transfer students majoring in one of the modern languages must complete at UMSL a minimum of 12 graded hours in language courses at the 3000 level or above with a grade point average of 2.0 or better in those courses.

Native Speakers

Native speakers must complete at least two courses at the 3000 level and four courses at the 4000 level to obtain a major in their native language.

Specific Requirements for Concentration in French

Each major with a French concentration must complete the following courses:

FRENCH 2101	Foreign Language and Culture III (or the equivalent)	3
-------------	--	---

FRENCH 2170	Intermediate French Language And Culture	3
FRENCH 2180	Readings In French	3
FRENCH 3200	French Grammar in Review	3
Select four additional courses at the 3000-level		12
Select three courses at the 4000-level		9
Total Hours		33

Specific Requirements for the Concentration in German

Each major with a concentration in German must complete the following courses:

GERMAN 2101	Intermediate Language And Culture: German III	3
GERMAN 2170	Intermediate Practice in Speaking and Writing German	3
GERMAN 2180	Intermediate Readings In German	3
GERMAN 3201	Introduction to German Literature	3
GERMAN 3202	Introduction to German Film	3
GERMAN 3208	The German-Speaking Countries in the Modern World	3
Select one course at the 3000-level		3
Select three courses at the 4000-level		9
Total Hours		30

Specific Requirements for the Concentration in Japanese

Each major with a concentration in Japanese must complete the following courses:

JAPAN 2101	Intermediate Japanese I	5
JAPAN 2102	Intermediate Japanese II	5
JAPAN 3201	Intermediate Japanese III	4
JAPAN 3202	Intermediate Japanese IV	4
JAPAN 3280	Readings in Japanese	3
JAPAN 4301	Advanced Japanese I	3
JAPAN 4302	Advanced Japanese II	3
JAPAN 4380	Advanced Readings in Japanese	3
Select 9 hours from the following: ¹		9
ANTHRO 3237	Contemporary Japanese Culture	
HIST 3031	Modern Japan: From the Meiji Restoration to the Present	
HIST 3033	Modern History Of The Asian Pacific Rim	
JAPAN 1005	Practicum in East Asian Calligraphy	
JAPAN 1011	Anime Nation: Popular Culture in Japan	
JAPAN 1199	Special Topics: Language Immersion: Japanese	
JAPAN 2191	Special Topics in Japanese Culture	
JAPAN 2170	Kanji: A Radical Approach	
JAPAN 2199	Special Topics: Language Immersion: Japanese	
JAPAN 3210	Japanese Culture and Society	

JAPAN 3211	Topics in Japanese Culture	
Total Hours		39

¹ Only three hours may be taken at the 1000 level.

Specific Requirements for Concentration in Spanish

Each major with a Spanish concentration must complete the following courses:

SPANISH 2101	Spanish Language And Culture III (or the equivalent)	3
SPANISH 2172	Spanish Composition	4
SPANISH 2180	Readings In Spanish	4
SPANISH 3210	Hispanic Culture And Civilization: Spain	3
or SPANISH 3211	Hispanic Culture And Civilization: Spanish America	
SPANISH 3280	Introduction To Hispanic Literature: Spain	3
or SPANISH 3281	Introduction To Hispanic Literature: Spanish America	
or SPANISH 3282	Introduction to Hispanic Literature: A Survey Course	
SPANISH 3326	Introduction to Hispanic Linguistics	3
Select one additional course at the 3000-level (see course descriptions for more detail)		3
Select three courses at the 4000-level		9
Select an additional course at the 2000-level, 3000-level, or 4000-level. The selected course must be consistent with the student's level of study.		3
Total Hours		35

Specific Requirements for Concentration in Dual Language Professional

FGN LANG 2100	Languages and World View	3
Choose two of the following language options.		30-33

At least one course (minimum 3 credit hours) must include an internship, service learning, or study abroad component.

French		
FRENCH 2170	Intermediate French Language And Culture	
FRENCH 2180	Readings In French	
Three courses at the 3000-level or higher, at least one of which must be business/professions-focused		
German		
GERMAN 2170	Intermediate Practice in Speaking and Writing German	
GERMAN 2180	Intermediate Readings In German	
Three courses at the 3000-level or higher		
Japanese		
JAPAN 2102	Intermediate Japanese II	
Choose two of the following courses:		
JAPAN 2170	Kanji: A Radical Approach	
JAPAN 3202	Intermediate Japanese IV	

JAPAN 3210	Japanese Culture and Society	
JAPAN 3211	Topics in Japanese Culture	
JAPAN 3280	Readings in Japanese	
JAPAN 3201	Intermediate Japanese III	
Spanish		
Two courses at the 2000-level above 2101		
Three courses at the 3000-level, at least one of which must be business/professions-focused		
One 4000-Level Capstone		3
Capstone course requirement may be met by 4000-level language course		
Total Hours		36-39

Learning outcomes for Majors

Students completing the BA in Modern Languages should be able to demonstrate competencies in 4 major Skills and Knowledge areas in the language of concentration: Linguistics, Critical Thinking, Cultural/Global Awareness, and Self- Reflection. The competencies should include the ability to:

- describe and narrate--both orally and in writing--in the past, present and future
- read authentic documents such as newspapers and literary texts for concrete information
- understand conversations, radio, and television programming on concrete topics in the target language
- summarize, analyze, and synthesize information derived from a variety of sources and media
- demonstrate knowledge of the history, geography, politics, and arts of the target culture
- make connections with and draw contrasts between the target culture and their own
- understand the value and necessity of life-long learning and translingual and transcultural competence.

Minor in French, German, Japanese or Spanish

A minor in French, German, Japanese or Spanish requires the completion of four courses in the language beyond the basic foundation sequence (Language 1001, Language 1002, and Language 2101). Transfer students must complete at least two courses for the minor at UMSL. All courses must be passed with a grade of C- or better.

Specific requirement for the minor in French

FRENCH 2170	Intermediate French Language And Culture	3
FRENCH 2180	Readings In French	3
Select two French courses on the 3000-level or above.		6
Total Hours		12

Specific requirement for the minor in German

GERMAN 2170	Intermediate Practice in Speaking and Writing German	3
GERMAN 2180	Intermediate Readings In German	3

Select two German courses on the 3000-level or above.	6
Total Hours	12

Specific requirement for the minor in Japanese

JAPAN 2102	Intermediate Japanese II	5
JAPAN 3201	Intermediate Japanese III	3
JAPAN 3202	Intermediate Japanese IV	3
Select one course in Japanese Studies.		3
Total Hours		14

Specific requirement for the minor in Spanish

Select two of the following:		7-8
SPANISH 2172	Spanish Composition	
SPANISH 2180	Readings In Spanish	
SPANISH 2199	Special Topics: Language Immersion: Spanish	
Plus two Spanish courses on the 3000-level or above		6
Total Hours		13-14

Minimum total hours required for the minor in Spanish is 12 beyond SPANISH 2101.

Minor in Modern Languages

A minor in Modern Languages requires the completion of 4 courses beyond the introductory sequence (1001, 1002 and 2101), two in each of two different languages. For students who are seeking a BA in Modern Language, the two languages must be different than the language in which they are majoring.

Minor in Classical Studies

The minor in Classical Studies is an interdisciplinary course of studies intended to encourage undergraduates in various disciplines to come to a fuller awareness of the cultures of ancient Greece and Rome and of the classical tradition that underlies much of modern Western civilization. Specific requirements for the minor are detailed on the Interdisciplinary Programs (p. 171) page.

Students pursuing a graduate degree in secondary education may select an emphasis area in French, German, Japanese or Spanish. These required eighteen hours may be selected from 3000 and 4000 level courses in these languages.

Certificate in Modern Language and Study Abroad

Students seeking the certificate must complete language courses at UMSL and abroad. The Center for International Studies and the Department of Language and Cultural Studies cooperate in offering the Certificate.

1. Modern language study at UMSL

Students must select one of the following languages and complete the required courses at UMSL. Total: 6 credit hours. (8 hours for Spanish)

French

FRENCH 2170	Intermediate French Language And Culture	3
-------------	--	---

FRENCH 2180	Readings In French	3
Total Hours		6

German

GERMAN 2170	Intermediate Practice in Speaking and Writing German	3
GERMAN 2180	Intermediate Readings In German	3
Total Hours		6

Spanish

SPANISH 2172	Spanish Composition	4
SPANISH 2180	Readings In Spanish	4
Total Hours		8

Japanese

JAPAN 2102	Intermediate Japanese II	5
JAPAN 3201	Intermediate Japanese III	4
Total Hours		9

2. Foreign language study abroad

Students must complete a minimum of two additional three credit hour courses taught in the target language at a foreign university that is affiliated with the UMSL Study Abroad Program, with the goal of increasing linguistic competence. All courses must be approved by Language faculty members.

Students should consult the study abroad advisor in International Studies and Programs to select a site for their study abroad experience. Then, students should consult their advisor in the Department of Language and Cultural Studies to select appropriate courses.

Career Outlook

Career options for graduates with a major or minor in modern languages include the following fields: teaching, social work, nursing, engineering, business, communications, government, journalism, travel industry, translation, and research. Our graduates have been especially successful when they combine advanced study in a modern language with another major. They are then able to add proficiency in a foreign language and culture to their knowledge and skills in another specialty. Experience with world cultures makes our graduates more adaptable and better prepared to meet the challenges of a global and increasingly diverse job market.

Arabic Courses

ARABIC 1001 Arabic I: 5 semester hours

Emphasis is placed upon the understanding, speaking, reading and writing of Arabic and upon the acquisition of the fundamentals of grammar and syntax.

ARABIC 1002 Arabic II: 5 semester hours

Prerequisites: ARABIC 1001 or equivalent. Emphasis is placed upon the understanding, speaking, reading and writing of Arabic. Continuation of acquisition of the fundamentals of grammar and syntax.

ARABIC 2101 Intermediate Arabic I: 5 semester hours

Prerequisites: ARABIC 1002 or equivalent. Students will advance their understanding of Arabic culture through discussions, readings and written work. Language skills will be further developed through meaningful communicative interaction.

ARABIC 2102 Intermediate Arabic II: 5 semester hours

Prerequisites: ARABIC 2101 or equivalent. Continuation of ARABIC 2101.

ARABIC 2190 Special Readings: 1-3 semester hours

Prerequisites: ARABIC 2102 or consent of the department. Independent study through readings, reports and conferences.

Chinese Courses

CHINESE 1001 Chinese I: 5 semester hours

Emphasis is placed upon the understanding, speaking, reading, and writing of Mandarin Chinese and upon the acquisition of the fundamentals of grammar and syntax.

CHINESE 1002 Chinese II: 5 semester hours

Prerequisites: Chinese I or equivalent. Emphasis is placed upon the understanding, speaking, reading, and writing of Mandarin Chinese. Continuation of the acquisition of the fundamentals of grammar and syntax.

CHINESE 1003 Chinese III: 3 semester hours

Prerequisites: CHINESE 1002 or equivalent. Review and practice of vocabulary, fundamentals of grammar, syntax, reading and writing acquired in CHINESE 1002. This course is not a CHINESE 2101 equivalent and may not be counted towards a foreign language requirement.

CHINESE 1005 Chinese Calligraphy and Writing in East Asia: 1 semester hour

Same as JAPAN 1005. This course is an introduction to the art of Chinese calligraphy and the history and basic features of the writing systems in East Asia (Chinese, Japanese, Korean, Mongolian, Tibetan, etc.). Emphasis is placed on the Chinese script and writing Chinese characters correctly with a calligraphy brush and ink. Students practice writing basic strokes and characters and creating their own calligraphic works.

CHINESE 1199 Special Topics: Language Immersion: Chinese: 1 semester hour

Prerequisites: CHINESE 1001 or concurrent enrollment in CHINESE 1001. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

CHINESE 2101 Intermediate Chinese I: 5 semester hours

Prerequisites: CHINESE 1002 or equivalent. Grammar review and continued development of language skills.

CHINESE 2102 Intermediate Chinese II: 5 semester hours

Prerequisites: CHINESE 2101 or equivalent. Continuation of CHINESE 2101.

CHINESE 2150 Chinese Literature in Translation: 3 semester hours

A historical and critical introduction to great works in classical Chinese literature and culture. All required readings will be in English translation. This course may be repeated for credit with different literary works with departmental approval. This course satisfies the University cultural diversity requirement.

CHINESE 2190 Special Readings: 1-6 semester hours

Prerequisites: CHINESE 2102 or consent of the department. Independent study through readings, reports, and conferences.

CHINESE 2191 Special Topics in Chinese Culture: 3 semester hours

A topically organized introduction to Chinese culture and society. May be repeated for credit (up to 9 credits) when the topic varies.

CHINESE 2199 Special Topics: Language Immersion: Chinese: 1 semester hour

Prerequisites: CHINESE 2101 or concurrent enrollment in CHINESE 2101. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

English for Academic Purposes Courses

EAP 3202 Listening and Speaking Skills: 3 semester hours

Prerequisites: Placement by examination. This intermediate-level course is for students who are non-native speakers of English to gain skills in listening and speaking for both conversational and academic situations. Students improve comprehensive and discrete listening skills, note-taking skills, vocabulary use, discussion skills, and understanding of American culture.

EAP 3203 Reading and Writing I: 3 semester hours

Prerequisites: Minimum TOEFL Score of 500 or placement by examination. In this course International students develop fluency in their reading and writing skills in American English. This course consists of reading a variety of types of written texts, vocabulary building, organization in writing from the paragraph to essay, techniques for generating ideas, grammar use and editing. This course does not count toward a degree.

EAP 3205 Grammar for Speaking and Writing I: 3 semester hours

Prerequisites: Placement by examination. A course for non-native speakers of English who have already studied basic English grammar. The content covers intensive study of verb tenses; their forms, meanings and integrated use; other grammatical structures; analyses of language use in written texts; and applied use in both speaking and writing to increase communicative competence.

EAP 4301 Advanced EAP Conversation and Pronunciation: 3 semester hours

Prerequisites: Placement by examination or permission of instructor. Designed for non-native speakers who need to improve their fluency and pronunciation in American English. Conversation strategies, oral presentations and extensive practice to modify accent are included. This course may count towards elective credit in the Colleges of Business and Arts and Sciences.

EAP 4302 Language Skills for Academic Success: 3 semester hours

Prerequisites: Placement by examination or successful completion of EAP 3202. Designed for the student who is a non-native speaker of English to enhance academic language skills needed for the American university. This course includes readings and lectures from various disciplines, strategies for effective listening comprehension and note-taking, vocabulary building exercises, exam preparation, and participation in class discussions. This course may count towards elective credit in the Colleges of Business and Arts and Sciences.

EAP 4303 Reading and Writing II: 3 semester hours

Prerequisites: Placement by examination or successful completion of EAP 3203. This course prepares students for ENGL 1100 or ENGL 1110. Activities targeting writing skills include the organization of essays, rhetorical forms and their structural organization, revision of ideas, research techniques, grammar use and editing. To develop reading skills, students read articles and a novel, practice reading strategies and learn how to summarize articles. This course may count towards elective credit in the Colleges of Business and Arts and Sciences.

EAP 4305 Grammar for Speaking and Writing II: 3 semester hours

Prerequisites: Placement by examination or successful completion of EAP 3205. This course is for students who are non-native speakers of English who need review and applied practice of English grammar for oral and written work. This course may count towards elective credit in the Colleges of Business and Arts and Sciences.

EAP 4307 Advanced Speaking Skills: 3 semester hours

Prerequisites: EAP 4301, placement by examination or consent of instructor. Designed for non-native speakers who have fluency in speaking English but need to modify their accent to be better understood and feel confident expressing ideas. Course includes review and practice of the pronunciation of the consonants and vowels in American English; accent modification achieved through extensive practice of stress, rhythm and intonation patterns; and the development of speaking skills through presentations. This course may count towards elective credit in the Colleges of Business and Arts and Sciences.

EAP 4390 Special Readings: 1-3 semester hours

Prerequisites: Consent of the instructor. Independent study through readings, reports, and conferences. This course may count towards elective credit in the Colleges of Business and Arts and Sciences.

EAP 4603 Research Paper Writing Workshop For International Students: 3 semester hours

Prerequisites: Successful completion of EAP 4303 or placement by examination. Organized as a workshop, this class focuses on the process of research paper writing, from choosing a topic to the final research paper. Class activities include using library resources for research, applying critical thinking skills, synthesizing source material, avoiding plagiarism, and using appropriate MLA or APA format. Editing for grammatical accuracy and word choice is included as necessary. Class enrollment is limited to 12 students. This course may count towards elective credit in the Colleges of Business and Arts and Sciences.

EAP 5400 Seminar for International Teaching Assistants: 1-3 semester hours

Prerequisites: Consent of the department. Focus is on presentation skills, strategies to facilitate communication, and cultural differences in education. Students develop effective teaching skills through class presentations. Not applicable to graduate degree program.

Foreign Language-Other Courses

FGN LANG 1111 Reacting to the Past: Language, Immigration, and Social Change: 4 semester hours

Reacting to the Past is a series of culturally accurate simulations built around key moments, ideas, and texts from the past. In each simulation, students are assigned one role; they research their character and learn to speak and write in his or her voice. The course offers students a rigorous inter-disciplinary learning experience in which they conduct academic research, speak publicly, and write extensively in different genres. It integrates critical reading, writing, and thinking skills and studies actual writing practices. Sequenced reading and writing assignments build cumulatively to more complex assignments. Includes formal and informal writing, drafting and revising, editing for correctness, synthesizing source material, and documenting sources accurately. This course fulfills the requirement for Freshman Composition.

FGN LANG 1199 Special Topics: Language Immersion: 1-5 semester hours

Prerequisites: Consent of Department Chair. Study abroad experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit provided that the topic is different.

FGN LANG 1200 Languages and Identities: 3 semester hours

This course will analyze contemporary readings, movies, and case studies from Eastern and Western cultures to explore how the languages we use in our daily lives impact our sense of self-identity and the ways we are perceived by others.

FGN LANG 2100 Languages and World View: 3 semester hours

Same as ANTHRO 2100 and SOC 2200. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

FGN LANG 2192 Service Learning in Foreign Languages: 1-3 semester hours

Prerequisites: Permission of course instructor and concurrent enrollment in a Foreign Language course (Arabic, Chinese, English as a Second Language, French, German, Greek, Japanese, Latin or Spanish) at the 2000-level or higher. Taken concurrently with a qualifying foreign language course, students will participate in a community service experience that is academically integrated into the students' course of study. Community service in a local or international community organization, as approved by the course instructor, is required. Determination of the type of community service to be conducted and the number of hours required will be made in consultation with the instructor. May be repeated for a maximum of 6 credit hours.

FGN LANG 2199 Special Topics: Language Immersion: 1-5 semester hours

Prerequisites: Consent of department chair. Study abroad experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit provided that the topic is different.

FGN LANG 3199 Special Topics: Language Immersion: 1-3 semester hours

Prerequisites: Consent of department chair. Study abroad experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit provided that the topic is different.

FGN LANG 3294 Internship in Languages: 1-3 semester hours

Prerequisites: FGN LANG 2100 plus completion of 2000-level language requirements and consent of Internship Coordinator in Languages. This internship gives students of languages and cultures the opportunity to use their unique and developing skills at an appropriate agency, organization, or business, to gain valuable work experience, and to begin networking with organizations in the St. Louis region and beyond. Students will attend a minimum of three face-to-face meetings with the internship coordinator and write weekly journals and a final report about their experiences. Their course grade will reflect their work at the internship site as well as their written assignments for the course.

FGN LANG 4100 Language Theories and Global Issues: 3 semester hours

Prerequisites: Junior standing. This course offers an in-depth study of the fabric of language, its impact on self- and cultural identity, and its roles in the shaping of social relations, school and work environments, and geopolitics. Through the lenses of scholarly research, theories of language acquisition, world literature, literary and cultural theory, and first-hand accounts by immigrant populations, students will reflect on what constitutes cultural identity.

FGN LANG 4307 Community-Based Research: 3 semester hours

Prerequisites: Junior standing, completion of junior-level writing requirement, and appropriate language proficiency as determined by instructor. This advanced course includes a research component that incorporates qualitative/ethnographic modes of inquiry. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying linguistic, cultural, and sociological knowledge to practical issues faced by communities and institutions in the St. Louis area. May count towards the B.A. in Modern Languages with consent of faculty advisor in languages. May be repeated provided the topic is different.

FGN LANG 4394 Advanced Internship in Languages: 1-3 semester hours

Prerequisites: FGN LANG 2100 plus completion of at least two 3000-level classes in a language and consent of the Internship Coordinator in Languages. This internship gives students of languages and cultures the opportunity to use their unique and advanced language skills at an appropriate agency, organization, or business in the St. Louis region and beyond. Students will attend a minimum of three face-to-face meetings with their internship coordinator and write weekly journals and a final report about their experiences. Their course grade will reflect their work at the internship site as well as their written assignments for the course.

FGN LANG 4589 Curriculum and Methods of Teaching Foreign Languages: 3 semester hours

Same as SEC ED 4589. This course is a study of the scope and sequence of the foreign language courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course emphasizes second language acquisition and socio-cultural theories of learning which undergird the approach, examination and analysis of foreign language teaching practices. Attention is also directed toward learning the techniques and research of the scholar in the field of foreign language. To be taken concurrently with Practicum I, SEC ED 4989.

FGN LANG 4590 Foreign Language Teaching Seminar: 2 semester hours

Same as SEC ED 4590. Prerequisites: Concurrent enrollment in SEC ED 4990 or consent of instructor. A practicum course in the teaching of foreign languages. Review and explanation of drills, dialogues, and a variety of classroom techniques, oral and written. A continuation of FGN LANG 4589 / SEC ED 4589, Curriculum and Methods, with an emphasis on specific practical skills. To be taken concurrently with SEC ED 4990, Student Teaching. Not available for graduate credit.

FGN LANG 5100 Language Theories and Global Issues: 3 semester hours

Prerequisites: Graduate standing. This course offers an in-depth study of the fabric of language, its impact on self- and cultural identity, and its roles in the shaping of social relations, school and work environments, and geopolitics. Through the lenses of scholarly research, theories of Language Acquisition, world literature, literary and cultural theory, and first-hand accounts by immigrant populations, students will reflect on what constitutes cultural identity. Designing a professional research project will allow graduate students to consider the practical consequences of language and culture in their field of study and develop strategies to live and work in a diverse environment.

FGN LANG 5311 Special Topics in Foreign Language Teaching: 3 semester hours

Prerequisite: Consent of the instructor. Designed for in-service foreign language teachers, this course focuses on the study of special topics in the field of foreign language learning with an emphasis on research applications to the improvement of practice. Topics may include technology for FL learning, the teaching of writing in the FL classroom, the teaching of reading in the FL classroom, proficiency-oriented instruction and assessment, second language acquisition for FL teachers, action research in the FL classroom. May be repeated for credit provided the topic is different. May be applied toward the Master's in Secondary Education with an emphasis in FL teaching.

French Courses

FRENCH 1001 French Language and Culture I (MOTR LANG 101): 5 semester hours

Students will develop communicative skills in French, including listening, speaking, reading, and writing. Introduction to Francophone culture through discussion of readings and visual media. Intended for students with no previous French experience. Students with previous French experience are expected to contact the department for placement advising.

FRENCH 1002 French Language and Culture II (MOTR LANG 102): 5 semester hours

Prerequisite: FRENCH 1001 or equivalent. Students will continue to develop communicative skills in French, including listening, speaking, reading, and writing. Continued exploration of Francophone culture through discussion of readings and visual media.

FRENCH 2101 Foreign Language and Culture III: 3 semester hours

Students will further develop the four language skills through meaningful communicative interaction. Students will advance their understanding of Francophone culture through discussion of readings and visual media. Students who have successfully completed this course may advance to FRENCH 2170 and FRENCH 2180.

FRENCH 2115A Intensive French: 5 semester hours

Prerequisite: Special consent required. An intensive study of French language and culture. Students will develop communicative skills, including listening, speaking, reading, and writing. Completion of the course with a grade of C- or better will satisfy the foreign language requirement of the B.A. degree. Students who have successfully completed FRENCH 2115A, FRENCH 2115B, and FRENCH 2115C may advance to FRENCH 2170 and FRENCH 2180.

FRENCH 2115B Intensive French: 5 semester hours

Prerequisite: Special consent required. An intensive study of French language and culture. Students will develop communicative skills, including listening, speaking, reading, and writing. Completion of the course with a grade of C- or better will satisfy the foreign language requirement of the B.A. degree. Students who have successfully completed FRENCH 2115A, FRENCH 2115B, and FRENCH 2115C may advance to FRENCH 2170 and FRENCH 2180.

FRENCH 2115C Intensive French: 3 semester hours

Prerequisite: Special Consent Required. An intensive study of French language and culture. Students will develop communicative skills, including listening, speaking, reading, and writing. Completion of the course with a grade of C- or better will satisfy the foreign language requirement of the B.A. degree. Students who have successfully completed FRENCH 2115A, FRENCH 2115B, and FRENCH 2115C may advance to FRENCH 2170 and FRENCH 2180.

FRENCH 2170 Intermediate French Language and Culture: 3 semester hours

Prerequisites: FRENCH 2101 or equivalent. Students will continue to advance in their development of the four language skills through meaningful communicative interaction. Students will further advance their understanding of Francophone culture. This course should be taken concurrently with FRENCH 2180.

FRENCH 2180 Readings in French: 3 semester hours

Prerequisite: FRENCH 2101 or equivalent. This course will introduce students to a variety of literary and non-literary texts in French. This course should be taken concurrently with FRENCH 2170.

FRENCH 2190 Special Readings In French: 1-3 semester hours

Prerequisite: FRENCH 2101 and consent of the department. Independent study on mutually acceptable topics through readings, reports, and conferences.

FRENCH 2199 Special Topics: Language Immersion: French: 1-3 semester hours

Prerequisite: FRENCH 2101 or consent of instructor. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit provided that the topic is different.

FRENCH 3199 Special Topics: Language Immersion in French: 1-3 semester hours

Prerequisites: Consent of the instructor. Study abroad experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit provided that the topic is different.

FRENCH 3200 French Grammar in Review: 3 semester hours

Prerequisite: FRENCH 2170 and FRENCH 2180. This course is designed to increase students' ability to communicate clearly and effectively through study and practice of forms and structures of the French language. Strong emphasis in writing.

FRENCH 3205 French in Commerce and Media: 3 semester hours

Prerequisite: FRENCH 2170 and FRENCH 2180. Professional and practical applications of French in commerce and media, including conventions of correspondence, business etiquette, and travel.

FRENCH 3210 Introduction to French and Francophone Studies: 3 semester hours

Prerequisites: FRENCH 2170 and FRENCH 2180. This course studies a selection of texts from French and Francophone cultures. Students will acquire essential terms and strategies for academic oral and written communication. Topics may vary, and course may be repeated for credit if topics are different.

FRENCH 3211 Contemporary French Culture: 3 semester hours

Prerequisites: FRENCH 2170 and FRENCH 2180. Aspects of contemporary French culture, including history, geography, education, politics, and gastronomy, studied through a variety of authentic cultural materials.

FRENCH 3271 Intermediate French Conversation: 3 semester hours

Prerequisite: FRENCH 2170 or consent of the instructor. Emphasis will be placed upon the further development of communicative skills in French.

FRENCH 3280 Introduction to French Literature: 3 semester hours

Prerequisites: FRENCH 2170 and FRENCH 2180. This course is designed to acquaint students with French literature from the Middle Ages through the present.

FRENCH 3290 Special Readings: 1-3 semester hours

Prerequisite: Consent of department. Independent study through readings, reports and conferences.

FRENCH 3311 Introduction to Special Topics in French Culture: 3 semester hours

Prerequisites: FRENCH 2170 and FRENCH 2180. Selected topics in French or francophone culture taught in French. This course may be repeated once for credit provided that the topic is different.

FRENCH 4300 Advanced Grammar and Stylistics: 3 semester hours

Prerequisite: FRENCH 3200 or equivalent. This course is designed to improve students' writing skills through advanced study of modern French prose style.

FRENCH 4301 Methods of Translation in French and English: 3 semester hours

Prerequisites: FRENCH 3200 or equivalent. In this course students will study comparative French/English syntax and stylistics, investigate translation techniques, and develop skills in translation. Students will also be responsible for a project and a product useful for a community partner.

FRENCH 4310 Advanced French and Francophone Studies: 3 semester hours

Prerequisites: FRENCH 3200. This course studies a selection of texts from French and Francophone cultures. Students further improve their academic communication skills and learn how to conduct research in French cultural studies. Topics may vary, and course may be repeated for credit if topics are different.

FRENCH 4311 Special Topics in French Culture and Literature: 3 semester hours

Prerequisites: Three French courses at the 3000 level or above. Selected topics in French/Francophone culture and literature. This course may be repeated for credit provided the topic is different each time.

FRENCH 4390 Advanced Independent Study: 1-3 semester hours

Prerequisite: Consent of instructor. Independent study through readings, reports and discussions.

FRENCH 4394 Advanced Internship in French: 1-3 semester hours

Prerequisites: FGN LANG 2100, completion of at least two 3000-level classes in French, and consent of the Internship Coordinator in French. This internship course gives students of French the opportunity to use their unique and advanced language skills at an appropriate agency, organization, or business in the St. Louis region and beyond. This course may be repeated for a maximum of 3 credit hours.

FRENCH 5311 Advanced Topics in French Culture and Literature: 3 semester hours

Prerequisites: Graduate standing or permission of instructor. Selected topics in French/Francophone culture and literature. This course may be repeated for credit provided the topic is different each time. Students will be expected to conduct an independent research project.

German Courses

GERMAN 1001 Beginning Language and Culture German I: 5 semester hours

Introduction for students with little or no knowledge of German. Students will develop listening comprehension, speaking, reading, and writing skills and become familiar with the cultures and history of the German-speaking countries. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence.

GERMAN 1002 Beginning Language and Culture: German II: 5 semester hours

Prerequisite: GERMAN 1001 or equivalent. Students will continue to develop listening comprehension, speaking, reading, and writing skills and to become familiar with the cultures and history of the German-speaking countries. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence.

GERMAN 2101 Intermediate Language And Culture: German III: 3 semester hours

Prerequisites: GERMAN 1002 or equivalent. Students will advance their understanding of German-speaking cultures through discussions, readings, and written work. Through meaningful communicative interaction, students will further develop their language skills. The course is conducted mainly in German. GERMAN 1001, GERMAN 1002, and GERMAN 2101 together form the introductory German language sequence. Students who have successfully completed this course may advance to GERMAN 2170 or GERMAN 2180.

GERMAN 2170 Intermediate Practice in Speaking and Writing German: 3 semester hours

Prerequisites: GERMAN 2101 or equivalent. In this course students will strengthen their communication skills and grammar in spoken and written German. Students will work with authentic literary texts, news articles, film, and music. GERMAN 2170 and GERMAN 2180 together form the bridge between the introductory German language sequence (GERMAN 1001, GERMAN 1002, and GERMAN 2101) and the advanced culture and literature courses. The course is conducted in German.

GERMAN 2180 Intermediate Readings In German: 3 semester hours

Prerequisites: GERMAN 2101 or equivalent. In this course students will strengthen their communication skills and grammar in spoken and written German. Students will read and discuss authentic German texts. GERMAN 2170 and GERMAN 2180 together form the bridge between the introductory German language sequence (GERMAN 1001, GERMAN 1002, and GERMAN 2101) and the advanced culture and literature courses. The course is conducted in German.

GERMAN 2190 Intermediate Independent Study: 1-3 semester hours

Prerequisite: GERMAN 2170 and GERMAN 2180, and consent of instructor and department. In consultation with the instructor, students undertake independent work to further develop intermediate German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

GERMAN 2199 Special Topics: Language Immersion: 1 semester hour

Prerequisites: GERMAN 1002. Faculty-led experience designed specifically to enhance acquisition of German language and culture. This course may be repeated for credit if the topics vary. The course is conducted in German.

GERMAN 3201 Introduction to German Literature: 3 semester hours

Prerequisite: Two years of college German or equivalent. Readings and critical analysis of selected works of literature written in the German language. This course is conducted in German.

GERMAN 3202 Introduction to German Film: 3 semester hours

Prerequisite: Two years of college German or equivalent. Viewings and critical analysis of selected films produced in the German language. The course is conducted in German.

GERMAN 3208 The German-Speaking Countries in the Modern World: 3 semester hours

Prerequisite: Two years of college German or equivalent; GERMAN 2170 or equivalent. A critical examination of issues in the culture and politics of the German-speaking countries since 1945 through a variety of media. The course is conducted in German.

GERMAN 3210 German Culture and Civilization: 3 semester hours

Prerequisite: Two years of college German or equivalent. A survey of the development of German culture and civilization and the emergence of a German identity. The course is conducted in German.

GERMAN 3211 Topics in German Culture: 3 semester hours

Prerequisites: Two years of college German or equivalent. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

GERMAN 3280 German Literature and Culture I: Beginnings-Enlightenment: 3 semester hours

Prerequisites: At least one 3000-level German course or consent of the instructor and department. This survey course will familiarize students with the development of German literature and culture through the end of the Enlightenment. Critical analysis of representative texts and other media. The course is conducted in German.

GERMAN 3281 German Literature and Culture II: Romanticism - Present: 3 semester hours

Prerequisites: At least one 3000-level German course or consent of instructor and department. This survey course will familiarize students with the development of German literature and culture from the end of the Enlightenment through the present day. Critical analysis of representative texts and other media. The course is conducted in German.

GERMAN 3290 Advanced Independent Study I: 1-3 semester hours

Prerequisite: GERMAN 3201, GERMAN 3202, GERMAN 3208, GERMAN 3210, and consent of instructor and department. In consultation with the instructor, students undertake independent work to transition from intermediate to advanced German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

GERMAN 4311 Special Topics In German Culture: 3 semester hours

Prerequisites: At least two 3000 level German courses or consent of instructor and department. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

GERMAN 4390 Advanced Independent Study II: 1-3 semester hours

Prerequisite: GERMAN 3201, GERMAN 3202, GERMAN 3208, and GERMAN 3210, and consent of instructor and department. In consultation with the instructor, students undertake independent work to further develop advanced German language skills and to deepen their knowledge of culture and history. The course is conducted in German.

GERMAN 4394 Advanced Internship in German: 1-3 semester hours

Prerequisites: FGN LANG 2100, completion of at least two 3000-level classes in German, and consent of the Internship Coordinator in German. This internship course gives students of German the opportunity to use their unique and advanced language skills at an appropriate agency, organization, or business in the St. Louis region and beyond. This course may be repeated for a maximum of 3 credit hours.

GERMAN 4398 Survey Of German Literature Part II: 3 semester hours

Prerequisite: GERMAN 3201 or GERMAN 3202. Special emphasis on the summary and synthesis of trends and characteristics of major periods in German literature considered in the general context of European culture.

GERMAN 5311 Advanced Topics In German Culture: 3 semester hours

Prerequisites: Graduate standing or consent of instructor and department. Discussion of significant topics in German culture. This course may be repeated for credit if the topics vary. The course is conducted in German, or in English when cross-listed with another department.

Greek Ancient Courses**GRK ANC 2152 A Brief Introduction to Greek and Latin in English Today: 1 semester hour**

Same as LATIN 2152. This outline course is designed to enrich the student's general liberal arts vocabulary as well as to improve mastery of terms used in law, medicine, and science. The emphasis is on vocabulary derived from Greek and Latin. Included will be the Greek alphabet and an introduction to historical language change involving the relationship among Greek, Latin, and Romance languages, and Germanic languages (particularly English). This course is not to be taken in addition to GRK ANC 2151.

Greek Modern Courses**GRK MOD 1001 Modern Greek I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, reading, and writing of Modern Greek and upon the acquisition of the fundamentals of grammar and syntax.

GRK MOD 1002 Modern Greek II: 5 semester hours

Prerequisite: GRK MOD 1001 or equivalent. The study of vocabulary, grammar and syntax is continued from GRK MOD 1001. Readings and discussions from selected classical authors.

GRK MOD 2101 Intermediate Modern Greek Language and Culture: 3 semester hours

Prerequisites: GRK MOD 1002 or equivalent. Students will advance their understanding of modern Greek culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

GRK MOD 2102 Intermediate Modern Greek Language And Culture II: 3 semester hours

Prerequisite: GRK MOD 2101 or equivalent. Emphasis is placed on the study of Greek and Greek-American culture and the continued development of language skills through meaningful communicative interaction.

GRK MOD 2150 Modern Greek Literature in Translation: 3 semester hours

This course is an exploration of significant works by major Modern Greek authors, dealing with relevant issues of Western literary traditions. Authors include: Cavafy, Kazantzakis, Seferis, Solomos, Elytis.

Japanese Courses**JAPAN 1001 Japanese I: 5 semester hours**

Emphasis is placed upon the understanding, speaking, and writing of Japanese and upon the acquisition of the fundamentals of grammar and syntax.

JAPAN 1002 Japanese II: 5 semester hours

Prerequisites: JAPAN 1001 or equivalent. Emphasis is placed upon the understanding, speaking, reading, and writing of Japanese. Continuation of the acquisition of the fundamentals of grammar and syntax.

JAPAN 1003 Japanese III: 3 semester hours

Prerequisite: JAPAN 1002 or equivalent. Review and practice of fundamentals of grammar, syntax, reading and writing acquired in JAPAN 1002. This course is not a JAPAN 2101 equivalent and may not be counted towards a foreign language requirement.

JAPAN 1005 Practicum in East Asian Calligraphy: 1 semester hour

Same as CHINESE 1005. This course is an introduction to the art of calligraphy in East Asia. Emphasis is placed on writing Japanese syllabaries and Chinese characters correctly with a calligraphy brush and ink. Students practice writing basic strokes and characters and creating their own calligraphic works.

JAPAN 1011 Anime Nation: Popular Culture in Japan: 3 semester hours

A look at postmodern samurai, preteen ninjas, praying at shrines and other elements of J-pop culture. This online course uses various clips and full-length animated features to introduce and explore topics such as family life, school life, shared values, contemporary social issues, fashion, and metaphysics. Critical texts, essays, and narrated presentations provide background for analysis and appreciation.

JAPAN 1199 Special Topics: Language Immersion: Japanese: 1 semester hour

Prerequisite: JAPAN 1001 or concurrent enrollment in JAPAN 1001. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

JAPAN 2101 Intermediate Japanese I: 5 semester hours

Prerequisite: JAPAN 1002 or equivalent. Students will advance their understanding of Japanese culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

JAPAN 2102 Intermediate Japanese II: 5 semester hours

Prerequisites: JAPAN 2101 or equivalent. Continuation of JAPAN 2101.

JAPAN 2111 The World of Anime - Advanced Topics in Japanese Animation: 3 semester hours

Prerequisites: JAPAN 1011 or consent of instructor. Students will explore and analyze anime and manga from sociological, literary, and anthropological perspectives, attempting to foster deeper understanding of contemporary Japan and the historical context from which the selected works emerged.

JAPAN 2150 Classical Japanese Literature In Translation: 3 semester hours

An exploration of Classical Japanese literary masterpieces and the world from which they arose. All required readings will be in English translation. This course may be repeated for credit with different literary works as a topic.

JAPAN 2170 Kanji: A Radical Approach: 3 semester hours

Prerequisites: JAPAN 2101 or equivalent. This course will systematically introduce the most common radicals and other key components of kanji (Chinese characters). Students will learn how to use radicals to interpret unfamiliar kanji, categorize them, and more efficiently commit them to memory. The principles learned in this course can be used to facilitate students' individual kanji-learning goals, which may include mastery of the 2136 joyo kanji.

JAPAN 2190 Special Readings: 1-3 semester hours

Prerequisites: JAPAN 2102 or consent of the department. Independent study through readings, reports, and conferences.

JAPAN 2191 Special Topics in Japanese Culture: 3 semester hours

A topically organized introduction to Japanese culture and society. May be repeated for credit when the topic varies.

JAPAN 2199 Special Topics: Language Immersion: Japanese: 1 semester hour

Prerequisite: JAPAN 2101 or concurrent enrollment in JAPAN 2101. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary.

JAPAN 3201 Intermediate Japanese III: 4 semester hours

Prerequisites: JAPAN 2102 or equivalent. In this course, students will continue to advance their understanding of Japanese culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course satisfies the University cultural diversity requirement.

JAPAN 3202 Intermediate Japanese IV: 4 semester hours

Prerequisites: JAPAN 3201 or equivalent. In this course, students will continue to advance their understanding of Japanese culture through discussions, readings and written work. Language skills developed in JAPAN 3201 will be further developed in this course through meaningful communicative interaction.

JAPAN 3210 Japanese Culture and Society: 3 semester hours

This faculty-led study tour enhances acquisition of the target culture and language through guided experiential learning. Pre-departure lectures introduce various aspects of Japanese society and culture, including history, pop culture, and business. In-country activities include follow-up lectures, language study, trips to sites of historical significance, and company and museum visits. The course is conducted in English and is designed for students of various disciplines. This course may be repeated once for credit.

JAPAN 3211 Topics in Japanese Culture: 3 semester hours

Prerequisites: JAPAN 2102, or concurrent enrollment in JAPAN 3201. This course advances communication and presentation skills through discussions of significant topics in Japanese culture. The course is conducted in Japanese. This course may be repeated for credit if the topics vary.

JAPAN 3280 Readings in Japanese: 3 semester hours

Prerequisites: JAPAN 3201 or concurrent enrollment in JAPAN 3202. Development of language skills through reading and discussion of a variety of literary and non-literary texts in Japanese.

JAPAN 3290 Special Readings: 1-3 semester hours

Prerequisites: JAPAN 2190 or consent of instructor. Independent study through readings, reports and conferences.

JAPAN 4301 Advanced Japanese I: 3 semester hours

Prerequisite: JAPAN 3202 or equivalent. This course develops students' existing linguistic knowledge and communicative skills in both spoken and written Japanese. Students will use authentic materials such as newspaper articles, essays, short stories, television programs, and films as the basis for discussion. This course may be repeated for credit a limited number of times if the topics vary.

JAPAN 4302 Advanced Japanese II: 3 semester hours

Prerequisite: JAPAN 4301 or equivalent. Building on JAPAN 4301, this course continues to develop students' linguistic knowledge and communicative skills in both spoken and written Japanese. Students will use authentic materials such as newspaper articles, editorials, essays, short stories, television programs and films for the basis of discussion. This course may be repeated for credit a limited number of times if the topics vary.

JAPAN 4380 Advanced Readings in Japanese: 3 semester hours

Prerequisites: JAPAN 4301 or concurrent enrollment in JAPAN 4302.
Continued development of advanced language skills through reading and discussion of a variety of literary and non-literary texts in Japanese.

JAPAN 4390 Special Readings: 1-3 semester hours

Prerequisites: JAPAN 3290 or consent of instructor. Independent study through readings, reports and conferences.

JAPAN 4394 Advanced Internship in Japanese: 1-3 semester hours

Prerequisites: FGN LANG 2100, completion of at least two 3000-level classes in Japanese, and consent of the Internship Coordinator in Japanese. This internship course gives students of Japanese the opportunity to use their unique and advanced language skills at an appropriate agency, organization, or business in the St. Louis region and beyond. This course may be repeated for a maximum of 3 credit hours.

Latin Courses

LATIN 1001 Latin I: 5 semester hours

A study of Latin grammar, syntax and vocabulary accompanied by reading selections from literary texts.

LATIN 1002 Latin II: 5 semester hours

Prerequisite: LATIN 1001 or equivalent. The study of vocabulary, grammar and syntax is continued from LATIN 1001, including readings and discussion from selected classical authors.

LATIN 2101 Intermediate Latin Language and Culture: 3 semester hours

Prerequisites: LATIN 1002 or equivalent. Students will advance their understanding of Roman culture through discussions, readings, and written work. Language skills will be further developed through meaningful communicative interaction. This course fulfills the Humanities requirement.

LATIN 2150 Latin Literature in Translation: 3 semester hours

Prerequisites: Sophomore standing. Reading and discussion of selected works in Latin literature from Republican Rome to late antiquity in English translation. This course may be repeated for credit if the topics vary.

LATIN 2152 A Brief Introduction to Greek and Latin in English Today: 1 semester hour

Same as GRK ANC 2152. This online course is designed to enrich the student's general liberal arts vocabulary as well as to improve mastery of terms used in law, medicine, and science. The emphasis is on vocabulary derived from Greek and Latin. Included will be the Greek alphabet and an introduction to historical language change involving the relationship among Greek, Latin, and Romance languages, and Germanic languages (particularly English). This course is not to be taken in addition to GRK ANC 2151.

LATIN 2190 Special Readings: 1-3 semester hours

Prerequisite: LATIN 2101 and consent of department. Independent study through readings, reports and conferences.

Spanish Courses

SPANISH 1001 Spanish Language and Culture I (MOTR LANG 103): 5 semester hours

This first Spanish course is designed to encourage the development of communicative proficiency through an integrated approach to the teaching of all four language skills - listening and understanding, reading, writing, and speaking. It encourages development of communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they develop their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. SPANISH 1001, SPANISH 1002, and SPANISH 2101 together form the introductory Spanish language sequence. Note: Intended for students with no previous Spanish experience. Students with previous Spanish experience are expected to contact the department for placement advising.

SPANISH 1002 Spanish Language and Culture II (MOTR LANG 104): 5 semester hours

Prerequisite: SPANISH 1001 or equivalent. This second Spanish course is designed to continue the development of communicative proficiency through an integrated approach to the teaching of all four language skills - listening and understanding, reading, writing, and speaking. It encourages development of communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they strengthen their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. SPANISH 1001, SPANISH 1002, and SPANISH 2101 together form the introductory Spanish language sequence.

SPANISH 1199 Special Topics: Language Immersion: Spanish: 1-3 semester hours

Prerequisites: SPANISH 1002 or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated, provided the topics vary, for a maximum of 3 credits.

SPANISH 2101 Spanish Language And Culture III: 3 semester hours

Prerequisites: SPANISH 1002 or equivalent. This third Spanish course is designed to further develop communicative proficiency through an integrated approach to the teaching of all four language skills - listening and understanding, reading, writing, and speaking. It continues the development of communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they strengthen their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. Students will complete a final project that demonstrates the knowledge acquired through the basic language sequence. SPANISH 1001, SPANISH 1002, and SPANISH 2101 together form the introductory Spanish language sequence. Successful completion fulfills the foreign language requirement for Bachelor of Arts candidates. Students who have successfully completed this course may advance to SPANISH 2172/ SPANISH 2172A or SPANISH 2180/ SPANISH 2180A.

SPANISH 2115A Intensive Spanish Language and Culture: 5 semester hours

Prerequisite: Special consent required. Contact department for information. This intensive study of Spanish is equivalent to SPANISH 1001, SPANISH 1002, and SPANISH 2101, and is offered in a condensed format. It is designed to develop communicative proficiency through an integrated approach to the teaching of all four language skills: listening and understanding, reading, writing, and speaking. It develops communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they build their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. Students will complete a final project that demonstrates the knowledge acquired through the basic language sequence. Successful completion of SPANISH 2115A, SPANISH 2115B and SPANISH 2115C fulfills the foreign language requirement for Bachelor of Arts candidates. Students who have successfully completed this course may advance to SPANISH 2172/ SPANISH 2172A or SPANISH 2180/ SPANISH 2180A. SPANISH 2115A, SPANISH 2115B and SPANISH 2115C are co-requisites and must be taken concurrently. All three must be completed with a grade of C- or better to satisfy the foreign language requirement.

SPANISH 2115B Intensive Spanish Language and Culture: 5 semester hours

Prerequisite: Special consent required. Contact department for information. This intensive study of Spanish is equivalent to SPANISH 1001, SPANISH 1002, and SPANISH 2101, and is offered in a condensed format. It is designed to develop communicative proficiency through an integrated approach to the teaching of all four language skills: listening and understanding, reading, writing, and speaking. It develops communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they build their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. Students will complete a final project that demonstrates the knowledge acquired through the basic language sequence. Successful completion of SPANISH 2115A, SPANISH 2115B and SPANISH 2115C fulfills the foreign language requirement for Bachelor of Arts candidates. Students who have successfully completed this course may advance to SPANISH 2172/ SPANISH 2172A or SPANISH 2180/ SPANISH 2180A. SPANISH 2115A, SPANISH 2115B and SPANISH 2115C are co-requisites and must be taken concurrently. All three must be completed with a grade of C- or better to satisfy the foreign language requirement.

SPANISH 2115C Intensive Spanish Language and Culture: 3 semester hours

Prerequisite: Special consent required. Contact department for information. This intensive study of Spanish is equivalent to SPANISH 1001, SPANISH 1002, and SPANISH 2101, and is offered in a condensed format. It is designed to develop communicative proficiency through an integrated approach to the teaching of all four language skills: listening and understanding, reading, writing, and speaking. It develops communicative proficiency through an interactive task-based approach, provides students with an active and rewarding learning experience as they build their language skills and cultural competency, and fosters awareness of the Spanish-speaking world through authentic cultural materials and information. Students will complete a final project that demonstrates the knowledge acquired through the basic language sequence. Successful completion of SPANISH 2115A, SPANISH 2115B and SPANISH 2115C fulfills the foreign language requirement for Bachelor of Arts candidates. Students who have successfully completed this course may advance to SPANISH 2172/ SPANISH 2172A or SPANISH 2180/ SPANISH 2180A. SPANISH 2115A, SPANISH 2115B and SPANISH 2115C are co-requisites and must be taken concurrently. All three must be completed with a grade of C- or better to satisfy the foreign language requirement.

SPANISH 2171 Spanish Conversation And Pronunciation: 3 semester hours

Prerequisites: SPANISH 2101 or SPANISH 1199 or equivalent. This course will emphasize the development of oral skills in Spanish as well as the problems of Spanish pronunciation and intonation.

SPANISH 2172 Spanish Composition: 4 semester hours

Prerequisite: SPANISH 2101 or equivalent. This course is intended to develop the ability to communicate effectively in Spanish with an emphasis on the process of writing, including drafting, revising, and editing through collaborative activities. This course prepares students for the kind of reading, writing, and oral discourse required in upper-level Spanish courses. Selected aspects of Spanish grammar are reviewed. This course includes an online component.

SPANISH 2180 Readings In Spanish: 4 semester hours

Prerequisite: SPANISH 2101 Or Equivalent. This course is intended to improve students' reading skills in Spanish through an assortment of written texts of various literary genres and non-fiction works from Latin America and Spain. Students collaborate in the activities of verifying comprehension, analyzing texts, and stating and defending a position. Selected aspects of Spanish grammar are reviewed. This course includes an online component.

SPANISH 2190 Special Readings: 1-3 semester hours

Prerequisite: SPANISH 2101 and consent of department. Independent study through readings, reports and conferences.

SPANISH 2199 Special Topics: Language Immersion: Spanish: 1-3 semester hours

Prerequisite: SPANISH 2101 or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary, for a maximum of 3 credits.

SPANISH 3199 Special Topics: Language Immersion: Spanish: 1-3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary for a maximum of 3 credits.

SPANISH 3210 Hispanic Culture And Civilization: Spain: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. The Development of Spanish Peninsula Civilization from its Romantic Beginnings to the Present.

SPANISH 3211 Hispanic Culture And Civilization: Spanish America: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. The development of the cultures and civilization of the Spanish speaking nations of the western hemisphere.

SPANISH 3215 Practicum In Spanish: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. This course introduces students to the Hispanic/Latino cultures in the US through community service and academic work. Students will perform a minimum of 20 hours per semester of supervised fieldwork in local organizations that serve area Hispanics. Students will study several issues related to the community they serve, will reflect on their field experience, and will connect their field experience with class readings and discussions. Required weekly seminar accompanies the field experience. Designed for majors of various disciplines. Placement at the agencies is relevant to the enrolled student's.

SPANISH 3220 Introduction to Spanish Translation and Interpreting: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. This course introduces students to the theory and practice of translation and interpreting in professional settings. It combines translation/interpretation theory with hands-on practice using a variety of activities from specialized areas, including medical and legal professions. This course has a community-based component.

SPANISH 3260 Spanish For Business: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. Cultivation of advanced language skills with emphasis on business vocabulary, basic business and cultural concepts and situational practice to help prepare for interaction in the Spanish speaking business world. Designed for international business students, economics students, or anyone interested in expanding their awareness of the Spanish language or wishing to explore the possibilities of positions with companies that need to conduct business in Spanish.

SPANISH 3261 Spanish for the Professions: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199. This course explores different professions in the Hispanic world, including health, law, media, and business. Students focus on vocabulary and specific professional skills culturally appropriate for the Hispanic communities in Latin America, Spain, and the United States. Emphasis is placed on both the acquisition of professional language as well as intercultural competence.

SPANISH 3271 Advanced Spanish Conversation: 3 semester hours

Prerequisite: SPANISH 2171 or consent of department. Emphasis will be placed upon the further development of oral skills in Spanish.

SPANISH 3280 Introduction To Hispanic Literature: Spain: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. A survey course that introduces students to a rich variety of Peninsular texts ranging from the early Hispano-Arabic texts, through the Middle Ages, the Golden Age, and finally, modern Peninsular literature. The focus is on texts and excerpts that will familiarize students with the major movements and styles of Peninsular literature. The socio-political contexts in which the works were written will be studied.

SPANISH 3281 Introduction To Hispanic Literature: Spanish America: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. A survey course that introduces students to selected texts of Spanish American writers from the colonial period to the present. The focus is on texts and excerpts that will familiarize students with the major movements and styles of Spanish-American literature. The socio-political contexts in which the works were written will also be studied.

SPANISH 3282 Introduction to Hispanic Literature: A Survey Course: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. This course surveys major contexts, movements and styles of Peninsular and Spanish American literatures. Writings from the early Hispano-Arabic period through the modern Peninsular period and pre-Conquest through contemporary Spanish American literature will be studied.

SPANISH 3290 Special Readings: Spanish: 1-3 semester hours

Prerequisite: Consent of department. Independent study through readings, reports and conferences.

SPANISH 3311 Introduction to Special Topics in Hispanic Culture: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. Selected topics in Hispanic culture taught in Spanish. This course may be repeated twice for credit provided that the topic is different each time.

SPANISH 3326 Introduction to Hispanic Linguistics: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or the equivalent. Students will develop an understanding of the basic aspects and tools of analysis in the primary areas of linguistics as applied to the Spanish language, including phonetics and phonology, morphology, syntax, semantics, pragmatics, and sociolinguistics.

SPANISH 3327 Introduction to Hispanic Dialectology: 3 semester hours

Prerequisites: 2 of the following 3 courses: SPANISH 2172, SPANISH 2180, SPANISH 2199; or equivalent. Students will develop awareness of the different dialects and colloquialisms found in the Spanish-speaking world.

SPANISH 4172 Introduction To Creative Writing In Spanish: 3 semester hours

Prerequisites: SPANISH 3280 or SPANISH 3281 (junior status) or consent of instructor. This course will be presented in two parts. First, students will read literature samples and discuss theory for creative writing; and second, they will explore their own creativity by writing poetry, essays and short stories through exercises and examples given by the instructor.

SPANISH 4173 Special Topics in Creative Writing: 3 semester hours

Prerequisites: SPANISH 3282, at least one additional 3000 level SPANISH course, and junior level status; SPANISH 4172 is recommended, but not required. This course will focus on one specific genre of creative writing per semester. The genre will vary from semester to semester, and will include, but not be limited to, poetry, essays, memoirs, and fiction. A variety of Hispanic authors' works will be explored in order to familiarize students with diverse styles and voices. This course may be repeated for credit if the topics vary.

SPANISH 4199 Special Topics: Language Immersion: 1-3 semester hours

Prerequisites: SPANISH 3280 or SPANISH 3281 or equivalent. Faculty-led experience designed specifically to enhance acquisition of the target language and culture. This course may be repeated for credit if the topics vary, for a maximum of 3 credits.

SPANISH 4300 Advanced Grammar: 3 semester hours**SPANISH 4311 Special Topics In Hispanic Culture: 3 semester hours**

Prerequisites: SPANISH 3280, or SPANISH 3281 or junior standing. Selected topics in Hispanic culture taught in Spanish. This course may be repeated for credit provided the topic is different each time.

SPANISH 4312 Special Topics in Hispanic Literature: 3 semester hours

Prerequisites: Junior standing or SPANISH 3280 or SPANISH 3281. Selected topics in Hispanic literature taught in Spanish. This course may be repeated for credit provided that the topic is different each time.

SPANISH 4323 Spanish Second Language Acquisition: 3 semester hours

Prerequisites: SPANISH 3326 or equivalent, or by instructor approval. This course provides an introduction to the theoretical and methodological foundations of second language acquisition of Spanish. Key topics in the field such as learner strategies, the role of formal instruction, target language input, influence from the first language, and effects of study abroad are addressed. Students read and critique relevant literature on the acquisition of different phonological, morphosyntactic, lexical, and discourse features of Spanish as a second language. Small-scale analyses of Spanish interlanguage data are also conducted. Course taught in Spanish.

SPANISH 4324 Spanish Sociolinguistics: 3 semester hours

Prerequisites: SPANISH 3326 or equivalent, or consent of instructor. This course examines how Spanish is used within its social context. Key theoretical and methodological concepts from the field of sociolinguistics are discussed as applied to the Spanish language. Topics include language and identity, speech style, gender and language use, language attitudes, languages in context, bilingualism, and language change. Students are introduced to phonological, morphosyntactic, and discursive features subject to sociolinguistic variation across the Spanish-speaking world. The social context and implications of Spanish in the United States are also addressed. Course taught in Spanish.

SPANISH 4328 Spanish Phonetics and Phonology: 3 semester hours

Prerequisites: SPANISH 3326 or equivalent. This course, taught in Spanish, is a detailed study of the sound system of Spanish. The course includes an articulatory and acoustic description of Spanish sounds and suprasegmental features (including stress and intonation patterns). Students will learn to represent Spanish speech sounds and patterns through transcription. The course additionally incorporates a comparison of English and Spanish sound systems along with an introduction to major differences in pronunciation across different varieties of Spanish.

SPANISH 4329 History of the Spanish Language: 3 semester hours

Prerequisites: At least two SPANISH courses at the 3000 level; SPANISH 3326 is recommended. This course will serve as an introduction to the history of the Spanish language. Students will study the transformation of the language as it spread across the globe throughout history.

SPANISH 4330 Cervantes: 3 semester hours

Prerequisite: SPANISH 3280. A study of Don Quixote in relation with the author's life and with the cultural background of the Spanish Golden Age. Independent readings on other works of Cervantes.

SPANISH 4331 Picaresque And Satirical Prose (1550-1650): 3 semester hours

Prerequisite: SPANISH 3280. A study of Renaissance and Baroque prose in its social context. All readings and discussions in Spanish.

SPANISH 4390 Special Readings: 1-3 semester hours

Prerequisite: Consent of instructor. Independent study through readings, reports and conferences.

SPANISH 4394 Advanced Internship in Spanish: 1-3 semester hours

Prerequisites: FGN LANG 2100, completion of at least two 3000-level classes in Spanish, and consent of the Internship Coordinator in Spanish. This internship course gives students of Spanish the opportunity to use their unique and advanced language skills at an appropriate agency, organization, or business in the St. Louis region and beyond. This course may be repeated for a maximum of 3 credit hours.

SPANISH 4399 Seminar On Hispanic Literature: 3 semester hours

Required of major students in the senior year. Subject to be announced every year by the instructor in charge of the seminar.

SPANISH 4500 Spanish for the Sciences: 3 semester hours

Prerequisites: Two Spanish courses at the 3000 level or consent of instructor. This course will focus on scientific and environmental questions, debates, and discourses in the Spanish-speaking world. Students will work with a variety of socio-historical situations to help frame issues such as biodiversity, water scarcity, oil spills, wildfires and ecotourism. While the course will largely focus on scientific and environmental writing, another component will be the consideration of cultural responses to scientific and environmental problems, including documentaries, podcasts, poetry and visual art. The course will offer students a broad range of voices currently participating in scientific and environmental discourses in order to think comparatively about some of the most pressing issues facing humanity today. All course work will be conducted in Spanish.

SPANISH 5172 Introduction to Creative Writing in Spanish: 3 semester hours

Prerequisites: Graduate Standing or permission of instructor. This course will be presented in two parts. First, students will read literature samples and receive theory for creative writing; and second, they will explore their own creativity by writing poetry, essays and short stories through exercises and examples given by the instructor.

SPANISH 5173 Advanced Special Topics in Creative Writing: 3 semester hours

Prerequisites: Advanced proficiency in Spanish and graduate status; SPANISH 5172 is recommended but not required. This course will focus on one specific genre of creative writing per semester. The genre will vary from semester to semester, and will include, but not be limited to, poetry, essays, memoirs, and fiction. A variety of Hispanic authors' works will be explored in order to familiarize students with diverse styles and voices. This course may be repeated for credit if the topics vary.

SPANISH 5199 Intensive Advanced Immersion Experience: 1-3 semester hours

Prerequisites: In-service teacher of target language or enrollment in post degree completion program. Designed for in-service and pre-service/post baccalaureate foreign language teachers, this course focuses specifically on enhancing oral proficiency in the target language and enriching cultural knowledge for purposes of classroom language instruction. The course may simulate a study abroad immersion experience or may be taught within the context of a study abroad program. This course may be repeated, provided the topics vary, for a maximum of 3 credits.

SPANISH 5311 Advanced Topics In Spanish Culture: 3 semester hours

Prerequisites: Graduate standing or permission of instructor. Selected topics in Spanish culture; may be repeated for credit with a different topic. Students will be expected to conduct an independent research project. Language of instruction is Spanish.

SPANISH 5312 Advanced Topics in Hispanic Literature: 3 semester hours

Prerequisites: Graduate standing or permission of instructor. Selected topics in Hispanic literature taught in Spanish. This course may be repeated for credit provided that the topic is different each time.

SPANISH 5323 Spanish Second Language Acquisition: 3 semester hours

Prerequisites: Graduate standing or permission of instructor. This course, taught in Spanish, provides an introduction to the theoretical and methodological foundations of second language acquisition on Spanish. Key topics in the field are illustrated through examples from Spanish, such as learner strategies, the role of formal instruction, target language input, influence from the first language, and effects of study abroad. Students read and critique relevant literature on the acquisition of different phonological, morphosyntactic, lexical, and discourse features of Spanish as a second language. Analyses of Spanish interlanguage data are also conducted.

SPANISH 5324 Advanced Spanish Sociolinguistics: 3 semester hours

Prerequisites: Graduate standing or consent of the instructor, and advanced proficiency in Spanish. This advanced course in Spanish linguistics examines how Spanish is used within its social context. Key theoretical and methodological concepts from the field of sociolinguistics are discussed as applied to the Spanish language. Topics include language and identity, speech style, gender and language use, language attitudes, languages in contact, bilingualism, and language change. The social context and implications of Spanish in the United States are also addressed. Students will complete a sociolinguistic research study design and presentation. Course taught in Spanish.

SPANISH 5328 Spanish Phonetics and Phonology: 3 semester hours

Prerequisites: Graduate standing or permission of instructor. This course, taught in Spanish, is a detailed study of the sound system of Spanish. The course includes an articulatory and acoustic description of Spanish sounds and suprasegmental features (including stress and intonation patterns). Students read and critique state-of-the-art experimental research on second language Spanish phonology and conduct analyses of Spanish phonological data. The course additionally incorporates a comparison of English and Spanish sound systems along with an introduction to major differences in pronunciation across different varieties of Spanish.

SPANISH 5329 Advanced History of the Spanish Language: 3 semester hours

Prerequisites: Advanced proficiency in Spanish and graduate status. This course will explore the history of the Spanish language. Students will study the transformation of the language as it spread across the globe throughout history. Students will be responsible for completing a research project.

SPANISH 5330 Cervantes: 3 semester hours

Prerequisites: Graduate standing and advanced proficiency in Spanish, or permission of the instructor. A study of Don Quixote in relation to the author's life and the cultural background of the Spanish Golden Age. Course includes independent readings on other works of Cervantes. All course work will be in Spanish. This course is intended to improve proficiency both orally and in writing in accordance with ACTFL guidelines through discussion, debate, online interactions, presentations, and papers. Students will lead a class discussion about a particular theme that requires them to do in-depth research, and will develop a Unit Plan for teaching the Quixote.

SPANISH 5500 Advanced Spanish for the Sciences: 3 semester hours

Prerequisites: Graduate standing and advanced proficiency in Spanish, or permission of the instructor. This course will focus on scientific and environmental questions, debates, and discourses in the Spanish-speaking world. Students will work with a variety of socio-historical situations to help frame issues such as biodiversity, water scarcity, oil spills, wildfires and ecotourism. While the course will largely focus on scientific and environmental writing, another component will be the consideration of cultural responses to scientific and environmental problems, including documentaries, podcasts, poetry and visual art. All course work will be in Spanish. This course will offer students a broad range of voices currently participating in scientific and environmental discourses in order to think comparatively about some of the most pressing issues facing humanity today. Students will lead a class discussion about a particular theme relevant to their field of study.

Mathematics and Computer Science

General Information

Degrees and Areas of Concentration

The Department of Mathematics and Computer Science offers undergraduate and graduate degree programs, minors, and certificates.

At the undergraduate level, the department offers degree programs in mathematics and computer science.

In mathematics, the department offers work leading to the Bachelor of Arts (B.A.) in mathematics, the Bachelor of Science (B.S.) in mathematics, the B.S. in mathematics with an emphasis in data science (pending CBHE approval), the B.S. in mathematics with an emphasis in fiscal mathematics and, in cooperation with the College of Education, the Bachelor of Secondary Education (B.S.Ed.) in Secondary Education with an emphasis in mathematics and the B.A. or B.S. in mathematics with master's level coursework for secondary teacher certification.

In computer science, the department offers the B.S. in computer science.

The department also offers minors in computer science, mathematics, and statistics, a Certificate in Actuarial Studies, a Certificate in Internet and Web, a Certificate in Mobile Apps and Ubiquitous Computing, a Certificate

in Data Science, and in cooperation with the Department of Information Systems a joint Certificate in Cybersecurity.

At the graduate level, the department offers a Master of Arts (M.A.) degree in mathematics with an emphasis in mathematics or data science (pending CBHE approval), a Master of Science (M.S.) degree in computer science and a Doctor of Philosophy (Ph.D.) in mathematical and computational sciences – with options in mathematics, computer science, and statistics. The department also offers, in cooperation with the Department of Information Systems, a joint Certificate in Cybersecurity.

Undergraduate Programs Overview

The program leading to the B.A. in mathematics provides a broad grounding in different areas of mathematics, giving students the depth necessary to pursue various aims such as graduate studies or other career choices.

The B.S. in mathematics, the B.S. in mathematics with an emphasis in data science (pending CBHE approval), and the B.S. in mathematics with an emphasis in fiscal mathematics provide sufficient background in mathematics, statistics, and to some extent, computer science to produce graduates who can work in areas requiring applied mathematical techniques and tools. These degrees are structured to allow additional, optional, courses that enable the student to focus on a variety of further areas of interest. Moreover, students pursuing any of these degrees will graduate with greatly enhanced analytic and writing skills, which are valuable in a wide array of fields and professions.

The B.S.Ed. in secondary education with an emphasis in mathematics introduces students to those branches of mathematics most relevant to the teaching of secondary school mathematics.

The B.S. in computer science combines traditional computer science studies, with its depth and breadth, with more practical exposure to a wide variety of tools and technologies. Students in this program are exposed to thorough background in mathematics and statistics, and can also develop expertise in a specific area of interest through available certificates and electives, including those based on math or statistics such as AI and data science/analytics. In addition, students are prepared for working in groups, technical reading and writing, and professional and ethical aspects. Students completing this degree are well prepared for further graduate studies in computer science.

The Certificate in Actuarial Studies is designed to provide the education needed for entry level employment in the actuarial profession.

The Certificate in Data Science is designed to provide computing and statistical foundations for work with big data and data analytics.

The Certificate in Internet and Web is designed to provide a broad training in technologies related to the Internet and Web, with flexibility allowing a student to satisfy specific interests.

The Certificate in Mobile Apps and Ubiquitous Computing is designed to provide training in technologies and framework for mobile apps and computing.

The joint Certificate in Cybersecurity is designed to provide basic training in emerging areas of information, data, and network security.

Dual Programs

The Department offers dual degree programs in mathematics and computer science for students with strong academic records. The B.A./

B.S. and M.A. dual degree program in mathematics and the B.S./M.S. dual degree program in computer science are designed to provide an opportunity for strong undergraduate majors to start earning graduate work credit before actually completing their undergraduate degree and to shorten, or accelerate, the time required as students to earn their graduate degrees.

Graduate Programs Overview

Students pursuing the M.A. degree in mathematics may choose the traditional track of M.A. in either pure or applied mathematics or the track in data science (pending CBHE approval). The traditional track is well suited for students preparing to teach at the high school or junior college level. Those who concentrate on applied courses in the traditional track build a foundation for the application of mathematics in industry and the continuation of their education in the Ph.D. program in mathematical and computational sciences. Our graduates with the traditional track will have abilities in the basic areas of mathematics, and a breadth of knowledge in core subjects at the graduate level. They will study at least one area of mathematics or statistics in depth and will understand some of the contemporary research in mathematics and statistics. The M.A. with data science emphasis is well suited for students preparing to work in industry as data scientists. Our graduates with data science emphasis will acquire a solid foundation in statistics and computational skills with emphasis on applications to data science. Our graduates with either tracks will develop the ability to prepare and deliver oral and written presentations and the ability to pursue mathematical knowledge independently.

The M.S. degree in computer science emphasizes practical aspects of the field. Our graduates have good understanding of the software process and its challenges, good understanding of computers systems and its parts, and be exposed to a wide range of technologies. They will also be prepared for team work, independent research, and technical reporting and presentations. In addition, available electives allow the students to focus in specific areas of interest.

The Ph.D. program in mathematical and computational sciences has options in mathematics, computer science, and statistics. The mathematics and statistics options prepare students for a leadership role involving research and development in both industrial and academic settings. Students choosing one of these options will develop abilities in the basic areas of algebra, analysis, and statistics, and will possess breadth of knowledge in core subjects at the graduate level. They will study at least one area of mathematics or statistics in depth and will understand contemporary research in applied mathematics and statistics. They will develop the ability to prepare and deliver oral and written presentations, and they will possess the ability to pursue and produce mathematical or statistical knowledge independently.

Students choosing the computer science option will develop a breadth of abilities in the core areas of computer science at the graduate level. They will gain a depth of ability in contemporary research in their chosen subfield of computer science, and will be able to pursue independent research in their area of specialization.

Students may enroll in any of these graduate programs on a part-time basis, and with proper scheduling all can be completed in the evening.

Career Outlook

A degree in mathematics or computer science prepares well-motivated students for interesting careers. Our graduates find positions in industry, government, and education. The demand for individuals well trained

in statistics, computer science, data science, and mathematics is greater than the available supply. In addition, a number of graduates in mathematics have elected careers in business, law and other related fields where they find logical and analytical skills valuable.

Graduates in computer science and mathematics from UMSL are located throughout the country, and they also have a strong local presence. They have careers in banking, health care, engineering and manufacturing, law, finance, public service, management, and actuarial management. Many are working in areas such as systems management, information systems and data management, scientific computing, and scientific positions in the armed services. Others have careers in education, especially at secondary and higher levels.

Department Scholarships

The Department of Mathematics and Computer Science offers many merit and need based scholarships available to department majors.

The Alumni Scholarship is a monetary award for outstanding undergraduate students open to all junior and senior department majors.

The Edward Z. Andalafte Memorial Scholarship is a monetary award for outstanding undergraduate department majors at the sophomore level or higher.

The Raymond and Thelma Balbes Scholarship in Mathematics is a monetary award for students at the sophomore level or higher who are pursuing a degree in mathematics, have an overall GPA of at least 3.0 and a GPA of at least 3.2 in mathematics and who have completed three semesters of calculus.

The Joseph M. and Mary A. Vogl Scholarship in Mathematics is a need based monetary award for mathematics majors.

The Computer Science Scholarship is a monetary award for outstanding computer science majors with preference given to freshman and sophomore students. Applicants must have a grade point average of 3.5 or higher in courses taken in the department.

The Boeing Company Scholars Program in Computer Science is a monetary award for full-time (at least 12 hours) upper-level undergraduate students in computer science. Recipients must have a minimum GPA of 3.2 and must maintain a GPA of 3.0. Preference will be given to traditionally underrepresented populations.

Undergraduate Studies

General Education Requirements

All department majors must satisfy the university and appropriate school or college general education requirements (p. 41). All mathematics courses may be used to meet the university's general education breadth of study requirement in natural sciences and mathematics.

Satisfactory/Unsatisfactory Restrictions

All department majors may not take mathematical sciences or related area courses on a satisfactory/unsatisfactory basis. Students considering graduate study should consult with their advisers about taking work on a satisfactory/unsatisfactory basis.

Degree Requirements

All courses of the department presented to meet the degree requirements must be completed with a grade of C- or better. At least four courses

numbered 3000 or above must be taken in residence. Students must have a 2.0 grade point average in the mathematical sciences courses completed.

Students enrolling in introductory mathematics courses should check the prerequisites to determine if a satisfactory score on the Mathematics Placement Test is necessary. Placement into introductory courses assumes a mastery of two years of high school algebra.

A minimum grade of C- is required to meet the prerequisite requirement for any course except with permission of the department.

Note: Courses that are prerequisites for higher-level courses may not be taken for credit or quality points if the higher-level course has been satisfactorily completed.

Many students are qualified, as a result of having studied calculus in high school, to begin their major with MATH 1900, Analytic Geometry and Calculus II, or MATH 2000, Analytic Geometry and Calculus III. These students are urged to consult with the department before planning their programs. Credit for MATH 1800, Analytic Geometry and Calculus I, will be granted to those students who complete MATH 1900 with a grade of C- or better.

Similarly, students who are ready to begin their computer science studies with CMP SCI 2250, Programming and Data Structures, will be granted credit for CMP SCI 1250, Introduction to Computing, once they complete CMP SCI 2250 with a grade of C- or better.

Declaring the Mathematics Major

Students seeking to major in mathematics are first designated as "pre-mathematics majors" until they have completed both MATH 1900 and MATH 2000 or equivalent courses. Upon successful completion of these two courses with grades of C or better, students will be allowed to declare mathematics as their major. Each of these courses must be completed successfully within two attempts.

Degree Requirements in Mathematics

All mathematics majors in all undergraduate programs must complete the mathematics core requirements.

Core Requirements

1. The following courses are required:

CMP SCI 1250	Introduction to Computing	3
MATH 1320	Introduction to Probability and Statistics	3
MATH 1800	Analytic Geometry And Calculus I	5
MATH 1900	Analytic Geometry And Calculus II	5
MATH 2000	Analytic Geometry And Calculus III	5
MATH 2020	Introduction to Differential Equations	3
MATH 2450	Elementary Linear Algebra	3
MATH 3250	Foundations of Mathematics	3
or CMP SCI 3130	Design and Analysis of Algorithms	
MATH 4100	Real Analysis I	3
Total Hours		33

2. The related area requirements as described below must be satisfied. Students seeking a double degree, either within this department

or with another department, do not have to fulfill the related area requirements.

Bachelor of Arts in Mathematics

In addition to the core requirements and the College of Arts and Sciences' foreign language requirement, three mathematics courses at the 4000 level or higher must be completed. Of these, one must be MATH 4400, Introduction to Abstract Algebra

Bachelor of Science in Mathematics

In addition to the core requirements, the B.S. in Mathematics degree requires:

1. Completing all of the following:

MATH 4160	Complex Analysis I	3
MATH 4400	Introduction To Abstract Algebra I	3
MATH 4450	Linear Algebra	3
Total Hours		9

2. Completing an additional three courses numbered above 4000 in mathematics, statistics or computer science, at least one of which must be in mathematics/statistics.

Bachelor of Science in Mathematics with an Emphasis in Fiscal Mathematics

Core Requirements

CMP SCI 1250	Introduction to Computing	3
MATH 1320	Introduction to Probability and Statistics	3
MATH 1800	Analytic Geometry And Calculus I	5
MATH 1900	Analytic Geometry And Calculus II	5
MATH 2000	Analytic Geometry And Calculus III	5
MATH 2020	Introduction to Differential Equations	3
MATH 2450	Elementary Linear Algebra	3
MATH 3250	Foundations of Mathematics	3
MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3

Specialized Requirements

MATH 3010	Financial Mathematics I	3
MATH 3020	Financial Mathematics II	3
FINANCE 3500	Financial Management	3
MATH 4005	Exploratory Data Analysis with R	3

In addition, two further courses in mathematics, statistics or computer science numbered above 4000.

Related Requirements

ECON 4100	Introduction to Econometrics	4
ECON 4110	Applied Econometrics	4
or ECON 4130	Business and Economic Forecasting	

Complete two of the following courses:

FINANCE 3503	Computer Applications in Finance	
FINANCE 3520	Investments	
FINANCE 3521	Financial Engineering: Applying Derivatives	
FINANCE 3523	Fixed Income Analysis	

FINANCE 3540	Introduction to Financial Institutions and Financial Markets	
Total Hours		68

Related Area Requirements for majors in Mathematics

Candidates for the B.A. in Mathematics must satisfy the requirements in one of the groups below with a grade of C-or better. Candidates for the B.S.Ed. in Mathematics and B.S. in Mathematics must satisfy the requirements in two of the groups below with a grade of C-or better.

If candidates choose group 2, then they cannot apply either of the two courses listed in that group towards the additional 4000 level mathematics courses (beyond the core requirements) that must be completed for each of these degrees.

Students seeking a double degree, either within this department or with another department do not have to fulfill the related area requirements.

Related Area Courses

1) Computer Science

Select two of the following:		6
CMP SCI 2250	Programming and Data Structures	
CMP SCI 2700	Computer Organization and Architecture	
CMP SCI 3130	Design and Analysis of Algorithms	
CMP SCI 4140	Theory of Computation	
CMP SCI 4410	Introduction to Computer Graphics	
CMP SCI 4420	Introduction to Digital Image Processing	

2) Statistics

MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3

3) Biology

BIOL 2102	General Ecology	3
BIOL 2103	General Ecology Laboratory	2

4) Biology

BIOL 2012	Genetics	3
BIOL 4182	Population Biology	3

5) Chemistry

CHEM 1111	Introductory Chemistry I	5
CHEM 1121	Introductory Chemistry II	5

6) Chemistry

CHEM 3312	Physical Chemistry I	3
And another 3000-level, or above, chemistry course.		3

7) Economics

ECON 1001	Principles of Microeconomics	3
ECON 1002	Principles of Macroeconomics	3
ECON 4100	Introduction to Econometrics	4

8) Philosophy

PHIL 3360	Formal Logic	3
PHIL 3380	Philosophy of Science	3

9) Physics

PHYSICS 2111	Physics: Mechanics and Heat	5
--------------	-----------------------------	---

PHYSICS 2112	Physics: Electricity, Magnetism, and Optics	5
10) Physics		
PHYSICS 3221	Mechanics	3
And another 3000 level, or above, physics course.		
11) Business Administration		
SCMA 3320	Advanced Supply Chain and Operations Management	3
SCMA 4350	Prescriptive Analytics and Optimization	3
12) Engineering		
ENGR 2310	Statics	3
ENGR 2320	Dynamics	3

B.S. Ed. in Secondary Education with Emphasis in Mathematics

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

B.A. or B.S. in Mathematics with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Declaring the Computer Science Major

Students seeking to major in computer science are first designated as "pre-computer science majors" until they have completed CMP SCI 2750 or equivalent course. Upon successful completion of this course with a grade of C- or better, students will be allowed to declare computer science as their major. This course must be completed successfully within two attempts.

Degree Requirements in Computer Science

Candidates for the B. S. Computer Science degree must complete the following work:

1) Computer Science Core

CMP SCI 1250	Introduction To Computing	3
CMP SCI 2250	Programming And Data Structures	3
CMP SCI 2261	Object-Oriented Programming	3
CMP SCI 2700	Computer Organization and Architecture	3
CMP SCI 2750	System Programming and Tools	3
CMP SCI 3010	Web Programming	3
CMP SCI 3130	Design and Analysis of Algorithms	3
CMP SCI 4250	Programming Languages	3
CMP SCI 4280	Program Translation	3
CMP SCI 4500	Introduction to the Software Profession	3
CMP SCI 4760	Operating Systems	3

2) Computer Science Electives

Select five more elective computer science courses, numbered above 3000.	15
--	----

3) Mathematics and Statistics

MATH 1320	Applied Statistics I	3
MATH 1800	Analytic Geometry And Calculus I	5
MATH 1900	Analytic Geometry And Calculus II	5
MATH 2450	Elementary Linear Algebra	3
MATH 3000	Discrete Structures	3

4) Additional Skills

ENGL 3130	Technical Writing	3
-----------	-------------------	---

Total Hours	70
-------------	----

There are no related area requirements for majors in Computer Science

BS and MS Dual Degree in Computer Science

BS and MS Dual Degree in Computer Science

The Integrated BS/MS ("2+3") dual degree program involves dual credit for qualified undergraduate Computer Science students. It allows the students to concurrently earn credit for some graduate courses while working on their undergraduate degree, reducing the total hours needed for the subsequent MS degree by up to 12 credit hours.

Entry Requirements

Undergraduate majors can apply for provisional admission to this program if:

1. They have completed at least 60 credit hours of coursework.
2. Their overall GPA is 3.0 or higher.
3. Non-CS majors must at the same time become CS majors.

Upon acceptance to the program in the provisional status, the student continues to work toward his/her undergraduate degree in computer science.

After completion of a minimum of 90 hours and no more than 30 hours away from the undergraduate degree, a provisionally admitted student applies for formal admission to the graduate program. At this point, the

student must meet the entry requirements for admission to the M.S. degree in Computer Science.

Degree Requirements

After acceptance into the program, the student continues to complete his/her undergraduate degree. The student is reclassified as a graduate student from the next semester and must pay graduate fees. The student will be assigned a graduate adviser to help optimize the transition to the graduate program. The student continues taking the undergraduate courses but is also allowed to take courses reserved for graduate students. The student completes all the courses to fulfill the requirements to complete his/her M.S. degree in Computer Science – but must also complete the undergraduate requirements. Up to 12 credit hours can be counted towards both the undergraduate and graduate degrees, substantially reducing the hours needed to complete the graduate program by itself.

A student may file for and receive the undergraduate degree at any time when all the requirements are completed, before or in the same semester in which the Master's degree is completed. A student must still complete all the requirements to get a B.S. degree, regardless of whether the student files for the degree or not. A student may choose to finish the studies just with a B.S.

Minor Requirements

The department offers minors in computer science, mathematics, and statistics. All courses presented for any of these minors must be completed with a grade of C- or better.

Minor in Computer Science

The requirements for the minor are:

CMP SCI 1250	Introduction To Computing	3
CMP SCI 2250	Programming And Data Structures	3
Select three additional computer science courses numbered 2000 or above.		9
Total Hours		15

A minimum of two computer science courses numbered above 2000 must be taken in residence in the Department of Mathematics and Computer Science at UMSL.

Minor in Mathematics

The requirements for the minor are:

MATH 1800	Analytic Geometry And Calculus I	5
MATH 1900	Analytic Geometry And Calculus II	5
MATH 2000	Analytic Geometry And Calculus III	5
Select two additional three-hour mathematics courses numbered above 2400 ¹		6

¹ excluding MATH 2510

A minimum of two mathematics courses numbered 2000 or above must be taken in residence in the Department of Mathematics and Computer Science at UMSL.

Minor in Statistics

The requirements for the minor are:

MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3
Select two additional courses in statistics numbered above 3000		6
Total Hours		12

A minimum of two statistics courses numbered above 3000 must be taken in residence in the Department of Mathematics and Computer Science at UMSL.

Certificate in Actuarial Studies

Actuaries use the tools of economics, finance, and mathematics to evaluate and price risk. They are employed by insurance companies, pension funds, consulting firms, and a variety of other financial institutions. The actuarial profession has consistently been ranked as one of the most desirable professions in which to be employed. To become an actuary one must satisfy certain educational requirements, pass exams offered by the Society of Actuaries, and complete professional courses.

The Certificate in Actuarial Studies is designed to provide the education needed for entry level employment in the actuarial profession. Those who complete the certificate will satisfy some of the Validation by Educational Experience requirement of the Society of Actuaries and be prepared to take the first two actuarial examinations (P and FM).

Completion of the certificate requires the following courses. Please note that many of these courses have prerequisites so anyone pursuing the certificate should work carefully with an academic advisor.

Required Courses

FINANCE 3500	Financial Management	3
FINANCE 3521	Financial Engineering: Applying Derivatives	3
MATH 3010	Financial Mathematics I	3
MATH 3020	Financial Mathematics II	3
MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3
Total Hours		18

Residency Requirement: Of the above required six courses at least five must be taken at the University of Missouri-St. Louis.

Certificate in Internet and Web

The undergraduate Certificate in Internet and Web is a six-course (18 credit hours) program. It is designed to provide a broad training in technologies related to the Internet and Web, with flexibility allowing a student to satisfy specific interests. A minimum GPA of 2.5 is required for admission.

Required:

CMP SCI 3010	Web Programming	3
CMP SCI 4010	Advanced Web Development with Java	3
CMP SCI 4011	Client-Side Technologies	3
CMP SCI 4012	Introduction to Enterprise Web Development	3
Choose two of the following:		6
CMP SCI 4020	Introduction to Android Apps: Android Fundamentals	

CMP SCI 4030	Introduction to Intelligent Web
CMP SCI 4610	Database Management Systems
CMP SCI 4730	Computer Networks and Communications
CMP SCI 4750	Introduction to Cloud Computing
INFSYS 3846	E-Commerce

Total Hours 18

A minimum of four courses must be taken in residence at UMSL. Courses may be substituted with the permission of the department. For more information, students can contact the department chair or email info@arch.umsi.edu.

Certificate in Data Science

The certificate program provides basic training on skills required for working in growing and popular fields involving data and data analysis. It provides both statistical and computational background while also allowing to focus on specific technologies. A student pursuing this certificate can choose from one of the two tracks, the computational track and the statistical track. Each track consists of three required courses (9 credit hours) plus three additional elective courses (9 credit hours).

Required Courses for the Computational Track:

CMP SCI 4340	Introduction to Machine Learning	3
CMP SCI 4342	Introduction to Data Mining	3
Choose one from the following:		3
MATH 4005	Exploratory Data Analysis with R	
MATH 4200	Mathematical Statistics I	

Required Courses for the Statistical Track:

MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3
Choose one from the following:		3
MATH 4250	Introduction to Statistical Methods in Learning and Modeling	
CMP SCI 4340	Introduction to Machine Learning	

Electives for both tracks:

Select additional three courses from the following: 9

CMP SCI 4030	Introduction to Intelligent Web
CMP SCI 4300	Introduction to Artificial Intelligence
CMP SCI 4320	Introduction to Evolutionary Computation
CMP SCI 4340	Introduction to Machine Learning
CMP SCI 4342	Introduction to Data Mining
CMP SCI 4370	Introduction to Biological Data Science
CMP SCI 4390	Introduction to Deep Learning
MATH 4005	Exploratory Data Analysis with R
MATH 4090	Introduction to High-dimensional Data Analysis
MATH 4200	Mathematical Statistics I
MATH 4210	Mathematical Statistics II
MATH 4220	Bayesian Statistical Methods
MATH 4225	Introduction to Statistical Computing

MATH 4250	Introduction to Statistical Methods in Learning and Modeling
MATH 4260	Introduction to Stochastic Processes

Residency requirement: of the required six courses at least five must be taken at the University of Missouri – St. Louis. Elective courses may be substituted with the permission of the program director. For more information, contact the department chair or email info@arch.umsi.edu.

Certificate in Mobile and Ubiquitous Computing

The undergraduate Certificate in Mobile Apps and Ubiquitous Computing is a six-course (18 credit hours) program. It is designed to provide training in technologies and framework for mobile apps and computing. A minimum GPA of 2.5 is required for admission.

Required Courses:

CMP SCI 4020	Introduction to Android Apps: Android Fundamentals	3
CMP SCI 4220	Introduction to iOS Programming and Apps	3
CMP SCI 4222	iOS Apps	3
CMP SCI 4792	Mobile and Ubiquitous Computing	3
Choose two of the following:		6
CMP SCI 4010	Advanced Web Development with Java	
CMP SCI 4610	Database Management Systems	
CMP SCI 4750	Introduction to Cloud Computing	

Total Hours 18

A minimum of four courses must be taken in residence in the Department of Mathematics and Computer Science at UMSL. Courses may be substituted with the permission of the department. For more information, students can contact the department chair or email info@arch.umsi.edu.

Graduate Studies

The Department of Mathematics and Computer Science offers an M.A. degree in mathematics with emphasis in mathematics, a Ph.D. degree in mathematical and computational sciences (with options in mathematics, computer science, and statistics), and an M.S. degree in computer science.

Admission

Applicants must meet the general admission requirements of the Graduate School, described elsewhere in this Bulletin. Additional admission requirements for specific programs are listed below.

Mathematics Programs

Applicants must have at least a bachelor's degree in mathematics or in a field with significant mathematical content. Examples of such fields include computer science, economics, engineering and physics. An applicant's record should demonstrate superior achievement in undergraduate mathematics.

Individuals may apply for direct admission to either the M.A. or Ph.D. program. Candidates for the M.A. degree may choose to concentrate in either pure or applied mathematics. Students in the M.A. program who

want to transfer to the Ph.D. program upon successful completion of 15 credit hours must fill out a new application through Graduate Admissions.

Students intending to enter the Ph.D. program must have a working ability in modern programming technologies. A student with a deficiency in this area may be required to take courses at the undergraduate level in computer science.

Applicants for the Ph.D. program must, in addition, submit three letters of recommendation and scores from the Graduate Record Examination (GRE) general aptitude test.

Computer Science Programs

Applicants must have at least a bachelor's degree, preferably in computer science or in a related area. Applicants with bachelor's degrees outside of computer science must demonstrate significant proficiency in computer science by showing competence (proving related academic or professional experience, or taking a test) in the following areas. Courses in parenthesis are UMSL courses that can be used to fulfill the requirement.

Programming skills in C or C++ and Java (CMP SCI 1250 or CMP SCI 2250, and CMP SCI 2261)

Proficiency with Object-Oriented concepts and terminology (CMP SCI 2261)

Proficiency with dynamic data structures (CMP SCI 2250)

Proficiency with computer organization, architecture, or assembly level programming (CMP SCI 2700)

Proficiency with design and time/space analysis of algorithms (CMP SCI 3130)

Familiarity with Unix/Linux/OSX and with command-line scripting with tools (CMP SCI 2750)

Students must also have satisfactorily completed mathematics courses equivalent to the following UMSL courses:

Two semesters of calculus (MATH 1800 and MATH 1900)

A course in elementary linear algebra (MATH 2450)

A course in discrete mathematics (MATH 3000)

An elementary course in probability or statistics (MATH 1320)

A student missing some of the above requirements may be admitted on restricted status if there is strong supportive evidence in other areas. The student will have to take the missing courses, or otherwise demonstrate proficiency. Special regulations of the Graduate School that apply to students on restricted status are described in the UMSL Bulletin.

Preliminary Advisement

Incoming students are assigned advisers with whom they should consult before each registration period to determine an appropriate course of study. If necessary, students may be required to complete undergraduate course work without receiving graduate credit.

Students interested in the Ph.D. program in mathematical and computational sciences with the computer science option must follow the requirements for that program and that option.

Master of Arts in Mathematics

(emphasis areas pending CBHE approval)

Candidates for the M.A. degree must complete 30 hours of course work with at least 15 hours of courses numbered 5000 or above. All courses numbered below 5000 must be completed with grades of at least B. The selections of the courses numbered 5000 or above need the prior approval of the graduate advisor. The program has two options:

- **Mathematics option**
- **Data Science option**

For the mathematics option, the courses taken must include those listed below in the mathematics core and other seven mathematics courses numbered 4000 or higher with at least five courses numbered 5000 or above. For the data science option, the courses taken must include the data-science core courses listed below and five elective courses chosen from the listed below in the data-science electives. Up to 2 courses in the data-science electives can be substituted with other courses upon student's request and graduate program director's approval.

Students who have already completed courses equivalent to those in the core may substitute other courses numbered above 4000. All substitutions of courses for those listed in the core require the prior approval of the graduate director.

Thesis Option

Either for the mathematics option or for the data science option, the non-core course work may consist of an M.A. thesis written under the direction of a faculty member in the Department of Mathematics and Computer Science. A thesis is not, however, required for this degree. A student who wishes to write a thesis should enroll in 6 hours of MATH 6900, M.A. Thesis. Students writing an M.A. thesis must defend their thesis in an oral exam administered by a committee of three department members which includes the thesis director.

Mathematics

Core Course		
MATH 4100	Real Analysis I	3
MATH 4160	Complex Analysis I	3
MATH 4450	Linear Algebra	3
Electives ¹		21
Total Hours		30

¹ Electives must be seven mathematics courses numbered 4000 or higher with at least five courses numbered 5000 above.

Data Science Emphasis

Core Courses		
MATH 4005	Exploratory Data Analysis with R	
MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3
MATH 5070	Nonlinear Optimization	
MATH 5250	Statistical Methods in Learning and Modeling	
Elective Courses		15

Degree Requirements

BA/BS and MA Dual Degree Program in Mathematics

This is an integrated BA/BS and MA ("2+3") dual degree program in Mathematics: it is designed to provide an opportunity for mathematics majors at the University of Missouri-St. Louis (UMSL) with a strong academic record to start earning graduate work credit before actually completing their undergraduate degree and to shorten, or accelerate, the time required as graduate students to earn their master's degree. A student in this program can apply up to 12 credit hours of 4000-and-above level courses towards both programs.

Entry Requirements

- Undergraduate math majors can apply for provisional admission for this program if:
 - They have completed at least 60 credit hours of coursework and
 - Their GPA is 3.0 or higher.

Students submit their applications to the department. Once a student is admitted in this provisional status, the student continues to work toward his/her undergraduate degree until the student completes 90-102 undergraduate credit hours. Meanwhile the student will be advised to complete the required courses for graduate admission.

- A provisionally admitted student is reviewed for formal admission after completing 90 undergraduate credit hours. Minimal requirements for admission include:
 - GPA of 3.0 or higher at the time of the review
 - MATH 1320, MATH 2020, MATH 2450, MATH 3250 - all completed with a grade of B- or higher.

A student's application meeting the minimal requirements does not mean the student is automatically admitted in this program. The math graduate committee will review the application and make a decision. In case the application is approved, the student needs to complete a formal application for admission into the graduate program and is recommended for admission by the graduate committee.

Degree Program

- The current separate requirements for BA/BS and MA in math remain unchanged.

- Once the student is admitted in this program, the student is allowed to take graduate courses (paid with graduate fees).
- The student in this program can apply up to 12 credit hours of 4000-and-above level courses towards both the bachelor and master's degrees. The student may get the BA/BS and MA degrees at the same time.
- In case a student cannot complete the master's degree for some reason, up to 12 credit hours of graduate level courses can be applied towards the BA/BS degree.
- Students will pay graduate fees for all courses after being admitted and starting the program.

Master of Science in Computer Science

Candidates for the M.S. degree in Computer Science must complete 30 hours of course work, subject to the Graduate School regulations. Of these, at least 18 hours must be numbered 5000 or above, with at least one course numbered 6000 or above, chosen with the prior approval of the Graduate Director. All courses numbered below 5000 must be completed with grades of at least B-. Outside computer science, up to 6 hours of related course work is allowed upon permission of the Graduate Director.

Students must satisfy all of the following core requirements:

CMP SCI 4760	Operating Systems	3
CMP SCI 4250	Programming Languages	3
CMP SCI 5700	Computer Systems	3
CMP SCI 5500	Software Engineering	3
CMP SCI 5130	Advanced Data Structures And Algorithms	3
Total Hours		15

Waiving or substituting for a specific requirement can be done on the basis of prior course work or experience at the discretion of the Graduate Director, but it will not reduce the total hours required for the degree.

Additionally, students must attend at least five different seminars or colloquium presentations in the department.

Thesis Option

Students may choose to write an M.S. thesis under the direction of a faculty member in the Department of Mathematics and Computer Science. A thesis is not, however, required for this degree. A student who wishes to write a thesis should enroll in 6 hours of CMP SCI 6900, Thesis. Students writing an M.S. thesis must defend their thesis in an oral exam administered by a committee of three department members which includes the thesis director.

Doctor of Philosophy in Mathematical and Computational Sciences

The program has three options:

- Mathematics Option
- Computer Science Option
- Statistics Option

The requirements for the Ph.D. degree include the following:

- Course work
- Ph.D. candidacy

3. Doctoral dissertation

The requirements are described in detail below.

1. Course Work

A minimum of 60 hours of courses numbered 4000 or above.

In the Mathematics Option, at least 33 hours must be in courses numbered 5000 or above.

In the Computer Science Option, at least 45 hours must be in courses numbered 5000 or above.

In the Statistics Option, at least 33 hours must be in courses numbered 5000 or above.

At most 9 hours of a student's enrollment in MATH 7990 (Dissertation Research) may be counted. Students are expected to maintain a 3.0 average on a 4.0 scale. All courses numbered below 5000 must be completed with a grade of at least B. Courses outside the Department of Mathematics and Computer Science will require approval of the graduate director.

When students who have earned a Master's degree are admitted to the doctoral program, appropriate credits of course work may be applied toward meeting the requirements for the doctoral degree, subject to Graduate School regulations and the approval of the graduate director. The same applied to those with some appropriate graduate credits but without a completed Master's degree.

2. Ph.D. Candidacy

Advancement to Ph.D. candidacy is a three-step process consisting of:

- Completing 18 hours of 5000 level courses other than MATH 7990, Ph.D. Dissertation Research.
- Passing the comprehensive examination.
- Selecting a Ph.D. committee and preparing a dissertation proposal and defense of the proposal.

Qualifying Examination

A student must fulfill the following requirements.

Basic Requirement

Pass one written examination covering fundamental topics. This examination would normally take place within the first 12 credit hours of study after admission to the Ph.D. program.

Mathematics Option

Topics from real analysis, complex analysis, and linear algebra:

MATH 4100	Real Analysis I	3
MATH 4160	Complex Analysis I	3
MATH 4450	Linear Algebra	3
Total Hours		9

Computer Science Option

Topics from the theory of programming languages, operating systems, analysis of algorithms, and computer systems:

CMP SCI 4250	Programming Languages	3
CMP SCI 4760	Operating Systems	3

CMP SCI 5130	Advanced Data Structures And Algorithms	3
CMP SCI 5700	Computer Systems	3
Total Hours		12

Statistics Option

Topics from real analysis, linear algebra, and mathematical statistics:

MATH 4100	Real Analysis I	3
MATH 4450	Linear Algebra	3
MATH 4200	Mathematical Statistics I	3
MATH 4210	Mathematical Statistics II	3
Total Hours		12

Additional Requirement

After fulfilling the basic requirement above, the student must meet one of the following:

- Pass a written examination in an area of the student's interests. This area will be approved by the graduate committee and will be based on a set of two or more graduate courses taken by the student. This examination would normally take place within the first 24 credit hours of study after admission to the Ph.D. program.
- Write a survey paper in a specialized area under the direction of a member of the graduate faculty. The student should propose to take this option when he/she has already finished at least 2 graduate level courses and has the approval of the graduate committee. The paper should be submitted within four semesters, at which time an oral examination given by a committee of at least three members of the graduate faculty must be passed.

In both parts 1) and 2), the graduate committee will determine if the topics are consistent with the option that the student is pursuing.

Dissertation Committee and Dissertation Proposal

After completing the comprehensive examinations, each student chooses a dissertation advisor and prepares a Dissertation Proposal. Usually students choose an advisor from contacts made through their course work. The dissertation committee will be formed, and the student will meet with this committee for an oral defense of his/her dissertation proposal. The dissertation proposal is a substantial document describing the problem to be worked on and the methods to be used, as well as demonstrating the student's proficiency in written communication.

Doctoral Dissertation

Each Ph.D. candidate must write a dissertation that is an original contribution to the field on a topic approved by the candidate's Ph.D. Committee and the department, and which meets the standards and requirements set by the Graduate School including the public defense of the dissertation. Students working on a dissertation may enroll in MATH 7990, Ph.D. Dissertation Research. A maximum of 9 hours in MATH 7990 can be used toward the required hours of work in courses numbered 5000 or above.

BS and MS Dual Degree in Computer Science

The Integrated BS/MS ("2+3") dual degree program involves dual credit for qualified undergraduate Computer Science students. It allows the students to concurrently earn credit for some graduate courses while working on their undergraduate degree, reducing the total hours needed for the subsequent MS degree by up to 12 credit hours.

Entry Requirements

Undergraduate majors can apply for provisional admission to this program if:

1. They have completed at least 60 credit hours of coursework.
2. Their overall GPA is 3.0 or higher.
3. Non-CS majors must at the same time become CS majors.

Upon acceptance to the program in the provisional status, the student continues to work toward his/her undergraduate degree in computer science.

After completion of a minimum of 90 hours and no more than 30 hours away from the undergraduate degree, a provisionally admitted student applies for formal admission to the graduate program. At this point, the student must meet the entry requirements for admission to the M.S. degree in Computer Science.

Degree Requirements

After acceptance into the program, the student continues to complete his/her undergraduate degree. The student is reclassified as a graduate student from the next semester and must pay graduate fees. The student will be assigned a graduate adviser to help optimize the transition to the graduate program. The student continues taking the undergraduate courses but is also allowed to take courses reserved for graduate students. The student completes all the courses to fulfill the requirements to complete his/her M.S. degree in Computer Science – but must also complete the undergraduate requirements. Up to 12 credit hours can be counted towards both the undergraduate and graduate degrees, substantially reducing the hours needed to complete the graduate program by itself.

A student may file for and receive the undergraduate degree at any time when all the requirements are completed, before or in the same semester in which the Master's degree is completed. A student must still complete all the requirements to get a B.S. degree, regardless of whether the student files for the degree or not. A student may choose to finish the studies just with a B.S.

Financial Assistance

Any student who intends to apply for financial assistance, in the form of a teaching assistantship or a research assistantship, is required to have three letters of recommendation submitted with the application to the graduate program in Mathematics or Computer Science. The application must include scores on the GRE general aptitude test. Applicants are also encouraged to submit scores in the GRE subject area test in Mathematics or Computer Science. Applications for financial assistance should be submitted before February 15 prior to the academic year in which the student expects to begin graduate study. Notifications of awards are generally made March 15, and students awarded financial assistance are expected to return letters of acceptance by April 15.

Computer Science Courses

CMP SCI 1011 Introduction to the Internet and World Wide Web: 3 semester hours

Intended for any student wishing to utilize the Internet and World Wide Web more effectively. Topics include networking basics, the Internet and World Wide Web, browsers, search engines, Web Services, utilities, tools, online privacy and security. Students will learn to develop a personal web page using skills acquired in the course.

CMP SCI 1012 Learning to Program Using Virtual Worlds: 3 semester hours

Introduces modern programming principles without requiring the knowledge of a traditional programming language. Instead, this course utilizes a novel graphical approach that enables the student to create, populate, and manipulate virtual 3-dimensional worlds which resemble video games. The development of these worlds allows students to gain direct experience and skills in using computers to solve problems. Students will create worlds of varying complexity.

CMP SCI 1250 Introduction to Computing: 3 semester hours

Prerequisites: MATH 1030 or MATH 1045 with B- or better, or MATH 1100, or MATH 1800, or a 70% on the proctored UMSL ALEKS Math Placement obtained at most one year prior to enrollment in this course. This course provides an introduction to the concepts of computation, problem solving, and computer systems. It covers fundamental programming constructs, basic data types, and modularization using a modern high level language. Problem solving skills are developed through a progression of programming projects.

CMP SCI 2250 Programming and Data Structures: 3 semester hours

Prerequisite: CMP SCI 1250. Continuation of CMP SCI 1250. Discusses properties and implementation of abstract data types such as lists, trees, stacks and queues. Introduces procedural and class abstraction, basic program architecture, use of interfaces, modular programming, and file processing.

CMP SCI 2261 Object-Oriented Programming: 3 semester hours

Prerequisite: CMP SCI 2250. Introduces object-oriented concepts, terminology, and notation (UML) using Java. Covers encapsulation, classes, objects, inheritance, and the use of class libraries. Additional topics may include graphical user interfaces, applets, and related tools and technologies.

CMP SCI 2700 Computer Organization and Architecture: 3 semester hours

Prerequisites: CMP SCI 1250 and CMP SCI 2250 (CMP SCI 2250 can be taken concurrently). This course introduces details of computer systems from architectural and organizational points of view. It covers data representation, basic digital logic circuits, memory types and hierarchies, I/O and storage devices, CPU architectures such as RISC, CISC, parallel, and multi-core.

CMP SCI 2750 System Programming and Tools: 3 semester hours

Prerequisites: CMP SCI 2250 and CMP SCI 2700 (CMP SCI 2700 can be taken concurrently). This course covers systems programming, scripting, libraries, utilities, and development tools. Additional programming topics include piping, binary files, exception handling, command-line arguments and symbolic debugging. This course also explores tools available in the Unix/Linux environments.

CMP SCI 3010 Web Programming: 3 semester hours

Prerequisites: CMP SCI 2261 (or concurrent enrollment). This course provides a survey of current Web technologies including markup languages (such as HTML/XHTML, CSS, XML), client side languages (such as JavaScript), server side languages (such as PERL, PHP), and Web protocols. Client-server computing projects are a course requirement.

CMP SCI 3130 Design and Analysis of Algorithms: 3 semester hours

Prerequisites: CMP SCI 2250, MATH 1320, and MATH 3000. This course addresses the design and analysis of fundamental algorithms in computer science. Studies basic sorting algorithms, priority queues, order statistics, search trees, and hash tables. Analysis techniques may involve time and space complexity analysis of both iterative and recursive algorithms, analysis of algorithm correctness, and amortized complexity analysis. Additional topics may include data compression, string manipulation, greedy algorithms, dynamic programming, and graph traversal.

CMP SCI 3200 .NET Framework: 3 semester hours

Prerequisites: CMP SCI 3010. This course introduces the .NET framework and related languages and technologies. Topics will include Visual Studio and C# for OOP and web applications. Additional topics may include ASP.NET with MVC, data access, and windows communication.

CMP SCI 3410 Video Game Design and Development: 3 semester hours

Prerequisites: CMP SCI 2261. This course covers major aspects of the design and development of video games, including world/level design, game UI design, game character design, game engine programming, 2D/3D modeling and rendering, game physics and animation. This is a project-based course in which students learn to apply acquired knowledge and skills to building a video game in a team environment.

CMP SCI 3710 Assembly Language Programming: 3 semester hours

Prerequisite: CMP SCI 2700. Explores machine architecture concepts and principles through a study of assembly language programming. Topics covered include integer and floating point arithmetic, procedures, conditional processing, strings, macros, and interfaces to high level languages. Programming projects using a commercially available assembly language will be required.

CMP SCI 3760 Cyber Threats and Defense: 3 semester hours

Prerequisites: CMP SCI 2250. This course provides students with the basic foundation knowledge in various cyber threats, defense methods and mechanisms. For cyber threats, the course uses an adversary model (resources, capabilities, intent, motivation, access) to cover threats such as password cracking, backdoors, trojans, viruses, wireless attacks, sniffing, spoofing, session hijacking, denial of service, DDoS, BOTs, MAC spoofing, web app attacks, zero-day exploits, and vulnerabilities that enable them. Cyber threat topics include attack timing, social engineering, attack indication, attack trees, insider problem, covert channels, and threat information sources (e.g., CERT). Typical cyber defense mechanisms will also be covered including intrusion detection, honeypot and honeynets, network monitoring and traffic analysis, access control, DMZ and proxies, network hardening.

CMP SCI 3780 Software Security: 3 semester hours

Prerequisites: CMP SCI 2261, CMP SCI 2750, and CMP SCI 3010. This course introduces the basic software security principles and pitfalls, including topics such as buffer, integer and string problems, runtime errors, SQL and command injection. Additional topics may include data protection, secure file access, password and network security.

CMP SCI 3990 Undergraduate Internship in Computer Science: 3 semester hours

Prerequisites: Consent of Advisor. The internship provides for a student to attain field experience in an organization related to Computer Science. A student is engaged off-campus for an assignment of at least 320 hours working on a project as directed by his/her supervisor in the host organization. The project should be approved by the student's academic advisor, or a designated faculty member, who will monitor the student's progress. The course cannot be repeated for credit.

CMP SCI 4010 Advanced Web Development with Java: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 3010; or graduate standing. This course covers more advanced Java topics, along with related concepts and technologies for Web development. Topics may include database connectivity, multi threading, security, networking, MVC pattern, testing and source control for Java applications, and server-side topics such as servlets and web servers.

CMP SCI 4011 Client-Side Technologies: 3 semester hours

Prerequisites: CMP SCI 3010. This course explores in depth the current state-of-the-art front-end, client-side technologies, focusing on JavaScript. Topics may include MongoDB, AngularJS, React, jQuery, Node.js, Express.js, and CSS.

CMP SCI 4012 Introduction to Enterprise Web Development: 3 semester hours

Prerequisites: CMP SCI 4010. This course covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

CMP SCI 4020 Introduction to Android Apps: Android Fundamentals: 3 semester hours

Prerequisites: CMP SCI 4010, or consent of the instructor. This course covers the fundamental programming principles, software architecture and user experience considerations underlying handheld software applications and their development environments. Involves in-depth, hands-on examples, implemented on the Android Platform, and discussion of security. Credit not granted for both CMP SCI 4020 and CMP SCI 5020.

CMP SCI 4030 Introduction to Intelligent Web: 3 semester hours

Prerequisites: CMP SCI 3010 and CMP SCI 3130. This course covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

CMP SCI 4140 Theory of Computation: 3 semester hours

Prerequisites: CMP SCI 3130 or graduate standing. This course provides an introduction to the theory of computation. It describes basic computational models, such as finite state machines, pushdown automata, Turing machines and grammars. It also covers the concept of nondeterministic computation and the relationships between different computational models. Additionally it discusses decidability, reducibility, and classification of problems into complexity classes based on their time and space complexity, such as P, NP, and PSPACE.

CMP SCI 4220 Introduction to iOS Programming and Apps: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 2750; or graduate standing. This course will use Swift for building iOS apps. It also introduces Xcode, Interface Builder, basic design patterns like MVC and delegation, and core libraries for Swift and iOS. Additional topics may include network communication, data persistence, basic animation, and mapping. This is a project-oriented class that will require significant use of a Mac with Xcode installed.

CMP SCI 4222 iOS Apps: 3 semester hours

Prerequisites: CMP SCI 4220 or consent of the instructor. This course focuses on building more sophisticated iOS apps. May include networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

CMP SCI 4250 Programming Languages: 3 semester hours

Prerequisites: CMP SCI 2261 or graduate standing. This course studies the principles, approaches, and trade-offs in modern programming languages, including a comparative study of syntax, semantics, and pragmatics. It also examines major programming paradigms: object-oriented, imperative, functional and logic.

CMP SCI 4280 Program Translation: 3 semester hours

Prerequisites: CMP SCI 2700, CMP SCI 2750, CMP SCI 3130, and CMP SCI 4250, or graduate standing. This course focuses on methods, techniques, and mechanisms used to create the abstraction from high level programming to machine level execution. Using program translation as an example of a complex task, this course also teaches how to manage and develop solutions for complex programming problems using modular incremental development and testing using an individual semester long project.

CMP SCI 4300 Introduction to Artificial Intelligence: 3 semester hours

Prerequisites: CMP SCI 3130. This course provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications. Credit cannot be granted for both CMP SCI 4300 and CMP SCI 5300.

CMP SCI 4320 Introduction to Evolutionary Computation: 3 semester hours

Prerequisites: CMP SCI 2261, CMP SCI 2750 and CMP SCI 3130. This course introduces the concepts of nature-inspired problem solving with artificial evolution using selection, crossover, mutation and inheritance. It discusses applications of evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms, evolutionary programming, evolution strategies, and genetic programming. Credit not granted for both CMP SCI 4320 and CMP SCI 5320.

CMP SCI 4340 Introduction to Machine Learning: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 3130. This course provides an introduction to machine learning in the context of applications such as data mining, natural language processing, and adaptive computer systems. The course reviews several supervised, unsupervised, and reinforcement machine learning techniques such as naive Bayes networks, clustering, and decision trees. Selected concepts in computational learning theory may also be covered. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

CMP SCI 4342 Introduction to Data Mining: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 3130. This course provides an introduction to data mining principles, algorithms and applications. Topics may include data preprocessing, data transformation, similarity and dissimilarity measures, data representation, classification techniques, association analysis, cluster analysis, regression, dimension reduction, and anomaly detection. Credit not granted for both CMP SCI 4342 and CMP SCI 5342.

CMP SCI 4370 Introduction to Biological Data Science: 3 semester hours

Prerequisites: CMP SCI 3130 or consent of instructor. This course provides an introduction into several key areas of biological data science, with a focus upon genetic data. Relevant background topics in genetics, current issues, and a variety of available resources will be explored. Upon successful completion of this course, the student will be able to evaluate algorithms for analyzing genetic data, including assessments of sources of errors and analysis of time and space complexity; address shortcomings in existing approaches; and implement efficient and effective software for exposing information hidden in genetic data. Credit cannot be granted for both CMP SCI 4370 and CMP SCI 5370.

CMP SCI 4390 Introduction to Deep Learning: 3 semester hours

Prerequisites: CMP SCI 3130 or consent of instructor. This course introduces mathematical foundations for deep learning, and follows with practical applications using selected domains such as image classification or protein predictions. It also covers dense neural networks, convolutional neural networks, recurrent neural networks, and other state-of-the-art networks. Credit cannot be granted for both CMP SCI 4390 and CMP SCI 5390.

CMP SCI 4410 Introduction to Computer Graphics: 3 semester hours

Prerequisites: CMP SCI 2250 and MATH 2450. This course covers the theoretical foundation and algorithms for computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects, using standard graphics API. A brief discussion of special graphics hardware, such as GPU, may be included. Credit cannot be granted for both CMP SCI 4410 and CMP SCI 5410.

CMP SCI 4420 Introduction to Digital Image Processing: 3 semester hours

Prerequisites: MATH 1900, MATH 2450, CMP SCI 2750, and CMP SCI 3130. This course focuses on image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

CMP SCI 4500 Introduction to the Software Profession: 3 semester hours

Prerequisites: CMP SCI 2261, CMP SCI 3010, and MATH 3000. This course focuses on software development and on the skills required for success in the software profession. Topics related to software development may include software process, models and views, software architectures, documentation, and testing strategies. Topics related to the profession may include ethics, licensing, copyright, trademarks, and professional conduct. Individual and group projects, research, and presentations may be required in this capstone course.

CMP SCI 4520 Introduction to Object-Oriented Analysis and Design: 3 semester hours

Prerequisites: CMP SCI 2261 and CMP SCI 3130. This course covers object-oriented development, using UML and following an agile process. It discusses elements of analysis, requirements, design, implementation and deployment, such as use cases, static and dynamic models, patterns, and frameworks. This course includes a semester long project. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

CMP SCI 4610 Database Management Systems: 3 semester hours

Prerequisites: CMP SCI 3010 and MATH 3000; or graduate standing. This course focuses on database theory and applications, with emphasis on the relational model. Topics include database design, modeling, file systems, indexing, integrity constraints, relational algebra, normalization, transaction processing, and concurrency control. Students are exposed to emerging DBMS technologies and applications. Several programming projects will be required using a popular SQL server.

CMP SCI 4700 Computer Forensics: 3 semester hours

Prerequisites: CMP SCI 2750 and CMP SCI 3010; or graduate standing. This course explores topics and methodologies for examining digital evidence, along with some principles of the investigative process. Includes memory, file system, operating system, network, and mobile device forensics. This course addresses both theory and hands-on aspects for conducting digital forensic examinations.

CMP SCI 4730 Computer Networks and Communications: 3 semester hours

Prerequisites: CMP SCI 2750 and MATH 1320; or graduate standing. This course provides a broad overview of computer networks and communications. Covers the fundamental principles and protocols across the whole layering structure of the Internet protocol stack. A top-down approach covers multiple topics including network application layer, transport layer, network layer, link layer, and physical layer protocols. May also include a range of related technologies such as WWW, HTTP, FTP, DNS, SMTP, TCP, UDP, ICMP, IPv4, IPv6, OSPF, RIP, BGP, IEEE 802.11 (WiFi), cellular networks, LANs, Ethernet, CSMA/CD, CDMA, multimedia networking, network management, and security in Internet.

CMP SCI 4732 Introduction to Cryptography for Computer Security: 3 semester hours

Prerequisites: MATH 3000 or consent of instructor. This course provides an introduction to cryptography as it applies to computer security. It describes cryptographic code-making and code-breaking, and how they are integrated within larger security systems. Topics include symmetric encryption algorithms like AES, asymmetric encryption using prime number factorization and elliptic curves, message authentication codes, key exchange protocols and attacks on all these systems. Additional topics may include onion networks and blockchain technology, as well as possible attacks on those systems. Credit cannot be granted for more than one of CMP SCI 4732, CMP SCI 4780, and CMP SCI 5732.

CMP SCI 4740 Introduction to High Performance Computing: 3 semester hours

Prerequisites: CMP SCI 2750 and CMP SCI 3130. This course introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures. Credit not granted for both CMP SCI 4740 and CMP SCI 5740.

CMP SCI 4750 Introduction to Cloud Computing: 3 semester hours

Prerequisites: CMP SCI 2750. This course provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

CMP SCI 4760 Operating Systems: 3 semester hours

Prerequisites: CMP SCI 2750 and CMP SCI 3130; or graduate standing. This course covers the structure of a generic operating system, considering in detail the algorithms for interprocess communication, process scheduling, resource management, memory management, file systems, and device management. It presents examples from contemporary operating systems and requires practical projects implemented within a modern operating system or simulator environment.

CMP SCI 4780 Computer and Network Security: 3 semester hours

Prerequisites: CMP SCI 4730 or graduate standing. This course provides a broad overview of computer and network security technologies and concerns from multiple perspectives, such as cryptography, Public Key Infrastructures (PKI), hashes and message digests, computer viruses and malware, email security, TCP/IP security, IPSec, Secure Socket Layer (SSL), Transport Layer Security (TLS), Virtual Private Networks (VPN), Firewall, AAA (Authentication, Authorization, Accounting), wireless and mobile systems security, secure identifications (IDs), cloud security, privacy and integrity, network attacks, system monitoring, and Intrusion Detection System (IDS). Management and human factors related to security will also be discussed.

CMP SCI 4782 Information Security: 3 semester hours

Prerequisites: CMP SCI 4730 or CMP SCI 4732 or CMP SCI 4780 or consent of instructor. This course covers topics related to maintaining security in an organizational infrastructure, including risk analysis of the environment, access level and control including multi-factor authentication, and detection capabilities to ensure adequate security monitoring. Additional topics may include network level protections, firewalls, intrusion detection/prevention systems, securing web and mobile applications, securing cloud implementations, and overall architectural considerations for system security. Credit not granted for both CMP SCI 4782 and CMP SCI 5782.

CMP SCI 4792 Mobile and Ubiquitous Computing: 3 semester hours

Prerequisites: CMP SCI 4730 or consent of instructor. This course covers mobile and wireless networking and provides a comprehensive treatment of wireless data and telecommunication networks. Topics include recent trends in mobile and wireless networking, wireless coding and modulation, wireless signal propagation, wireless local area networks, millimeter wave gigabit wireless networks, vehicular wireless networks, white spaces, Bluetooth and Bluetooth Smart, wireless personal area networks, wireless protocols for Internet of Things (IoT), and cellular networks.

CMP SCI 4880 Individual Studies: 1-3 semester hours

Prerequisites: Consent of instructor. This course allows a student to pursue individual studies under the supervision of a faculty member. It may include development of a software project. The course may be repeated for credit.

CMP SCI 4890 Topics in Computer Science: 3 semester hours

Prerequisites: Consent of the Instructor. This course covers a special topic in computer science to be determined by recent developments in the field and the interests of the instructor. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

CMP SCI 5012 Enterprise Web Development: 3 semester hours

Prerequisites: CMP SCI 4010 or consent of instructor. Covers design and implementation issues for enterprise web development, and some popular advanced technologies. Topics include MVC and persistence frameworks, such as Spring and Hibernate. Other topics may include Java Web services, EJB, messaging standards such as JMS, and Java EE design patterns. Students will develop enterprise-level web application projects. Credit cannot be earned for both CMP SCI 4012 and CMP SCI 5012.

CMP SCI 5020 Android Apps: Android Fundamentals: 3 semester hours

Prerequisites: CMP SCI 4010 or consent of instructor. Covers the fundamental programming principles, software architecture and user experience considerations underlying handheld software applications and their development environments. Involves in-depth, hands-on examples, implemented on the Android Platform, and discussion of security. Credit not granted for both CMP SCI 4020 and CMP SCI 5020.

CMP SCI 5030 Intelligent Web: 3 semester hours

Prerequisite: Graduate standing. This course covers the application of artificial intelligence and other modern techniques to help construct, navigate, and experience the Web. Topics may include retrieval models, classification, mining, association, topology, and indexing algorithms such as PageRank and HITS. Credit cannot be earned for both CMP SCI 4030 and CMP SCI 5030.

CMP SCI 5130 Advanced Data Structures and Algorithms: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course covers analysis of time and space complexity of iterative and recursive algorithms along with performance bounds, design of data structures for efficient performance, sorting algorithms, probabilistic algorithms, divide and conquer strategies, various algorithms on graphs, and np completeness.

CMP SCI 5222 Advanced iOS Apps: 3 semester hours

Prerequisites: CMP SCI 4220 or consent of instructor. Focuses on building sophisticated apps using iOS. Will cover recent developments in networking such as web services, Bluetooth and wifi connectivity, graphics and animation in 2-d and 3-d, autolayouts, OpenGL, advanced data sources such as plist and core data, source control and unit testing. May also discuss security topics. Credit not granted for both CMP SCI 4222 and CMP SCI 5222.

CMP SCI 5300 Artificial Intelligence: 3 semester hours

Prerequisites: Graduate standing. This course provides an introduction to artificial intelligence. The list of topics may include search, planning, knowledge-based reasoning, probabilistic inference, machine learning, natural language processing, and practical applications. Credit cannot be granted for both CMP SCI 4300 and CMP SCI 5300.

CMP SCI 5320 Evolutionary Computation: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course introduces the concepts of nature-inspired problem solving with artificial evolution using selection, crossover, mutation and inheritance. It discusses applications of evolutionary algorithms, overviews the existing models and instances, and analyzes specific instances such as genetic algorithms, evolutionary programming, evolution strategies, and genetic programming. Credit not granted for both CMP SCI 4320 and CMP SCI 5320.

CMP SCI 5340 Machine Learning: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course provides an introduction to machine learning in the context of applications such as data mining, natural language processing, and adaptive computer systems. The course reviews several supervised, unsupervised, and reinforcement machine learning techniques such as naive Bayes networks, clustering, and decision trees. Selected concepts in computational learning theory may also be covered. Credit cannot be granted for both CMP SCI 4340 and CMP SCI 5340.

CMP SCI 5342 Data Mining: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course provides an introduction to data mining principles, algorithms and applications. Topics may include data preprocessing, data transformation, similarity and dissimilarity measures, data representation, classification techniques, association analysis, cluster analysis, regression, dimension reduction, and anomaly detection. Credit not granted for both CMP SCI 4342 and CMP SCI 5342.

CMP SCI 5370 Biological Data Science: 3 semester hours

Prerequisites: Graduate standing in Computer Science or consent of instructor. This course provides an introduction into several key areas of biological data science, with a focus upon genetic data. Relevant background topics in genetics, current issues, and a variety of available resources will be explored. Upon successful completion of this course, the student will be able to evaluate algorithms for analyzing genetic data, including assessments of sources of errors and analysis of time and space complexity; address shortcomings in existing approaches; and implement efficient and effective software for exposing information hidden in genetic data. Credit cannot be granted for both CMP SCI 4370 and CMP SCI 5370.

CMP SCI 5390 Deep Learning: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course reviews a typical machine learning recipe, mathematical foundations for deep learning, and provides an introduction to deep learning. Topics include dense neural networks, convolutional neural networks, and recurrent neural networks. The course will cover building, training, and using deep neural networks for solving various machine learning problems like image classification and protein contact prediction. Credit cannot be granted for both CMP SCI 4390 and CMP SCI 5390.

CMP SCI 5410 Computer Graphics: 3 semester hours

Prerequisites: Graduate standing in Computer Science. This course covers the theoretical foundation and algorithms of computer graphics. Students learn the basics of graphics programming for modeling, rendering, and animation of 2D and 3D objects, using standard graphics API. A brief discussion of special graphics hardware, such as GPU, may be included. Credit cannot be granted for both CMP SCI 4410 and CMP SCI 5410.

CMP SCI 5420 Digital Image Processing: 3 semester hours

Prerequisites: Graduate Standing in Computer Science. This course focuses on image analysis and visual perception. Students learn data structures and algorithms for image processing, region and texture analysis, image filtering, edge detection, contour following, and image enhancement in both spatial and frequency domain. Other topics may include color processing, coding for storage, retrieval, transmission, and image restoration. Credit cannot be granted for both CMP SCI 4420 and CMP SCI 5420.

CMP SCI 5500 Software Engineering: 3 semester hours

Prerequisite: Graduate standing. Introduces software engineering as a discipline, discusses stages of the software life cycle, compares development models such as waterfall, prototyping and incremental/iterative, covers requirements analysis, effort and cost estimation, compares structured and object-oriented analysis and design methods. Discusses verification/validation, quality assurance, software reliability, testing methods, maintenance, documentation, project management and team structure, metrics, and available tools.

CMP SCI 5520 Object Oriented Analysis and Design: 3 semester hours

Prerequisite: Graduate Standing in Computer Science. This course covers object-oriented development, illustrated with a visual modeling language and following an agile process. Discusses elements of analysis, requirements, design, implementation, and deployment such as use cases, static and dynamic diagrams, patterns, and frameworks. This course includes a semester long project starting with requirements and culminating with deployment. Credit not granted for both CMP SCI 4520 and CMP SCI 5520.

CMP SCI 5620 Intelligent Information Retrieval: 3 semester hours

Prerequisites: CMP SCI 4300 or CMP SCI 5300. This course studies techniques for analysis of information by statistical, syntactical, and logical methods. Topics related to multimedia information are also discussed.

CMP SCI 5700 Computer Systems: 3 semester hours

Prerequisite: Graduate standing in Computer Science. This course focuses on parallel computing architectures, including RISC, pipelining, vector processing, SIMD, MIMD, and array processing. It introduces different memory and I/O subsystems, hardware description languages, and it demonstrates performance enhancement using different architectures studied.

CMP SCI 5732 Cryptography for Computer Security: 3 semester hours

Prerequisites: Graduate standing. This course provides an introduction to cryptography as it applies to computer security. It describes cryptographic code-making and code-breaking, and how they are integrated within larger security systems. Topics include symmetric encryption algorithms like AES, asymmetric encryption using prime number factorization and elliptic curves, message authentication codes, key exchange protocols and attacks on all these systems. Additional topics may include onion networks and blockchain technology, as well as possible attacks on those systems. Credit cannot be grant for more than one of CMP SCI 4732, CMP SCI 4780, and CMP SCI 5732.

CMP SCI 5740 High Performance Computing: 3 semester hours

Prerequisite: Graduate Standing in Computer Science. This course introduces algorithms for multiprocessor and multi-core architectures. Students learn the models of modern parallel computation and techniques to take advantage of parallel architectures for distributed and shared memory multi-processor architectures. Credit not granted for both CMP SCI 4740 and CMP SCI 5740.

CMP SCI 5750 Cloud Computing: 3 semester hours

Prerequisites: Graduate standing. Provides an introduction to development and deployment of applications in the cloud space. Touches on different aspects of cloud computing such as IaaS, PaaS, and SaaS. Includes significant discussion on legal and security aspects of clouds in the marketplace. May also include public, private, and hybrid clouds, and Internet of Things. Credit not granted for both CMP SCI 4750 and CMP SCI 5750.

CMP SCI 5782 Advanced Information Security: 3 semester hours

Prerequisites: CMP SCI 4730 or CMP SCI 4732 or CMP SCI 4780 or CMP SCI 5732 or consent of instructor. The topics covered in this course are risk analysis to understand the security requirements of an environment; access controls to understand the level of controls needed for different practical situations, including multi-factor authentication; detection capabilities, to ensure adequate security monitoring for information systems; network level protections, with firewalls, intrusion detection/prevention systems; securing the web and mobile applications and cloud implementations; and overall security architecture to understand how various controls can provide the security-in-depth that is required in the current environment. Credit not granted for both CMP SCI 4782 and CMP SCI 5782.

CMP SCI 5794 Security of IoT Systems: 3 semester hours

Prerequisites: CMP SCI 4730 or consent of the department. This course covers the cutting-edge techniques on the emerging edge cloud and wireless/mobile Internet of Things (IoT) systems. It covers the IoT reference architecture, integrated IoT security architecture, major threats and vulnerabilities with the IoT devices and edge cloud, and defense mechanisms. It includes hands-on labs on both the vulnerabilities and defense of the systems. Credit cannot be granted for both CMP SCI 4794 and CMP SCI 5794.

CMP SCI 5870 Computer Science Seminar: 1-3 semester hours

Prerequisites: Graduate standing. This is a seminar on various topics. Substantial student reading and participation is expected. It may be taken more than once for credit with the consent of the department.

CMP SCI 5880 Computer Science Independent Project: 1-3 semester hours

Prerequisites: Graduate standing and consent of instructor This course offers the student an opportunity to work on an advisor-supervised project, individually or in a group. A student may repeat the course for up to 6 credit hours total, but at most 6 hours can be accumulated for CMP SCI 5880 and CMP SCI 6900.

CMP SCI 5890 Topics in Computer Science: 1-3 semester hours

Prerequisites: Graduate standing. This course offers various topics not offered on a regular basis. This course may be taken for credit more than once so long as the topic discussed in each semester is different.

CMP SCI 5900 Graduate Internship in Computer Science: 3 semester hours

Prerequisites: Consent of Advisor. The internship provides for a student to attain field experience in an organization related to Computer Science. A student is employed off-campus for an assignment of at least 320 hours working on a project as directed by his/her supervisor in the host organization. The project should be approved by the student's academic advisor, or a designated faculty member, who will monitor the student's progress. The student is responsible for having the project supervisor at the company establish contact with the academic advisor to establish schedule and goals, and a procedure to evaluate the goals. The student will submit a written report to the advisor at the end of internship. The course cannot be repeated for credit. Students completing this course will be allowed only up to three hours of Independent Study (CMP SCI 5880).

CMP SCI 6320 Advances in Evolutionary Computation: 3 semester hours

Prerequisites: CMP SCI 5320. This course focuses on some advanced topics in genetic and evolutionary computation (both theory and applications). Topics may include genetic algorithm variants, intelligent metaheuristics, evolutionary machine learning, differential evolution, swarm intelligence, learning classifier systems, and Markov models. A substantial part of the course will be based on selected topics from recent literature. This is a project-based course, with the project typically involving literature search and conducting and reporting research. Projects may involve developing specific applications or implementing a specific model.

CMP SCI 6340 Genetic Programming: 3 semester hours

Prerequisites: CMP SCI 5320. This course provides an in-depth exploration of Genetic programming, including advanced concepts such as scalability, evolution of modularity and regularity, and constrained evolution with CGP, STGP, or CFG-based GP. It may be reading, research, or application oriented.

CMP SCI 6410 Topics in Computer Graphics: 3 semester hours

Prerequisites: CMP SCI 4410 or CMP SCI 5410. This course covers various aspects of advanced graphics techniques, such as geometric modeling, rendering, shading, texturing, and computer animation. The course provides an in-depth study of recent advanced topics in computer graphics.

CMP SCI 6420 Topics In Image Processing and Multimedia: 3 semester hours

Prerequisites: CMP SCI 5420. This course covers new developments in digital image processing, computer vision, and multimedia. Topics to be covered may include image databases, object tracking, and large-scale data visualization.

CMP SCI 6900 Thesis: 1-6 semester hours

Prerequisites: Completion of at least 12 graduate credits and approval of research topic by thesis advisor. This course is designed for those students intending to present a thesis as part of their M.S. program. At most 6 hours can be accumulated for CMP SCI 5880 and CMP SCI 6900.

Mathematics Courses**MATH 0005 Intermediate Algebra: 3 semester hours**

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Preparatory material for college level mathematics courses. Covers systems of linear equations and inequalities, polynomials, rational expressions, exponents, quadratic equations, graphing linear and quadratic functions. This course carries no credit towards any baccalaureate degree.

MATH 1020 Contemporary Mathematics (MOTR MATH 120): 3 semester hours

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Presents methods of problem solving, centering on problems and questions which arise naturally in everyday life. May include aspects of algebra and geometry, the mathematics of finance, probability and statistics, exponential growth, and other topics chosen from traditional and contemporary mathematics which do not employ the calculus. May be taken to meet the mathematical proficiency requirement, but may not be used as a prerequisite for other mathematics courses. Designed for students who do not plan to take calculus. Credit will not be granted for MATH 1020 if credit has been granted for MATH 1310, MATH 1800, MATH 1100, MATH 1102, or MATH 1105. Concurrent enrollment in MATH 1020 and any of these courses is not permitted.

MATH 1021 Choice and Chance: 3 semester hours

Same as PHIL 1021. Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. This course provides an introduction to inductive logic and the theory of probability in an organized and systematic way, so as to give students tools for more effective decision-making. We will introduce the probability calculus, basic concepts of utility theory, decision theory and different approaches to understanding probability. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

MATH 1025 Geometry in the Real World: 3 semester hours

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Presents topics in geometry designed to enrich the student's understanding of mathematics. Geometry as it applies to the physical world and such fields as art, music, nature, motion, architecture and city planning will be examined. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

MATH 1030 College Algebra (MOTR MATH 130): 3 semester hours

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. Topics in algebra and probability, polynomial functions, the binomial theorem, logarithms, exponentials, and solutions to systems of equations.

MATH 1035 Trigonometry: 2 semester hours

Prerequisite: MATH 1030 or MATH 1040, or concurrent registration in either of these two courses, or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. A study of the trigonometric and inverse trigonometric functions with emphasis on trigonometric identities and equations.

MATH 1040 College Algebra for Science and Engineering: 4 semester hours

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. Topics in this course include factoring, simplifying rational functions, functions and their graphs, solving linear and nonlinear equations, polynomial functions, inverse functions, the binomial theorem, logarithms, exponentials, solutions to systems of equations using matrices, solutions to nonlinear systems of equations, and sequences.

MATH 1045 PreCalculus (MOTR MATH 150): 5 semester hours

Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or consent of the department. This course covers topics including factoring, simplifying rational functions, functions and their graphs, solving linear and nonlinear equations, polynomial functions, inverse functions, the binomial theorem, logarithms, exponentials, solutions to systems of equations using matrices, solutions to nonlinear systems of equations, and sequences. Students will also study trigonometric and inverse trigonometric functions with emphasis on trigonometric identities and equations.

MATH 1100 Basic Calculus: 3 semester hours

Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or a satisfactory score on the UMSL ALEKS Placement Examination, obtained at most one year prior to enrollment in this course. This course introduces plane analytic geometry and basic differential and integral calculus with applications to various areas. No credit for Mathematics majors. Credit not granted for both MATH 1800 and MATH 1100.

MATH 1102 Finite Mathematics: 3 semester hours

Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. This course introduces logic and set theory, partitions and counting problems, elementary probability theory, stochastic processes, Markov chains, vectors and matrices, linear programming, and game theory.

MATH 1105 Basic Probability and Statistics: 3 semester hours

Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. An introduction to probability and statistics. Topics include the concept of probability and its properties, descriptive statistics, discrete and continuous random variables, expected value, distribution functions, the central limit theorem, random sampling and sampling distributions. Credit not granted for more than one of MATH 1310, MATH 1320, and MATH 1105.

MATH 1150 Structure of Mathematical Systems I: 3 semester hours

Prerequisites: 45 hours of college credit and a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course OR successful completion of MATH 1030 no more than 2 years prior to enrollment in this course. This course examines topics including problem solving, patterns, sets, numeration systems, whole numbers and operations, positive rational numbers and operations, and an introduction to variables and equations, with an emphasis placed on using multiple techniques for each of the aforementioned topics.

MATH 1310 Elementary Statistical Methods: 3 semester hours

Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. An introduction to the basic tools and elementary methods of statistics, such as testing of hypotheses, analysis of variance, method of least squares, and time series. A student may not receive credit for more than one of MATH 1310, MATH 1320, and MATH 1105.

MATH 1320 Introduction to Probability and Statistics: 3 semester hours

Prerequisites: MATH 1030 or MATH 1040 or MATH 1045 or consent of the department. The course will cover basic concepts and methods in probability and statistics. Topics include descriptive statistics, probabilities of events, random variables and their distributions, sampling distributions, estimation of population parameters, confidence intervals and hypothesis testing for population means and population proportions, chi-square tests. A student may not receive credit for more than one of MATH 1310, MATH 1320 and MATH 1105.

MATH 1800 Analytic Geometry and Calculus I: 5 semester hours

Prerequisites: MATH 1030 and MATH 1035, or MATH 1040 and MATH 1035, or MATH 1045, or a satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course, or approval of the department. This course provides an introduction to differential and integral calculus. Topics include limits, derivatives, related rates, Newton's method, the Mean-Value Theorem, Max-Min problems, the integral, the Fundamental Theorem of Integral Calculus, areas, volumes, and average values.

MATH 1900 Analytic Geometry and Calculus II: 5 semester hours

Prerequisite: MATH 1800. Topics include conic sections, rotation of axes, polar coordinates, exponential and logarithmic functions, inverse (trigonometric) functions, integration techniques, applications of the integral (including mass, moments, arc length, and hydrostatic pressure), parametric equations, infinite series, power and Taylor series.

MATH 2000 Analytic Geometry and Calculus III: 5 semester hours

Prerequisite: MATH 1900. Topics include vectors, cylindrical and spherical coordinates, vector-valued functions, arc length and curvature, functions of several variables, partial and directional derivatives, gradients, extrema, Lagrange multipliers, multiple integrals, change of variables, surface area, vector fields, Stokes' Theorem.

MATH 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour

Same as CHEM 2010, PHYSICS 2010, BIOL 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

MATH 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour

Same as CHEM 2011, PHYSICS 2011, BIOL 2011, and SEC ED 2011. Prerequisites: BIOL 2010, CHEM 2010, PHYSICS 2010, MATH 2010, or SEC ED 2010. Students explore teaching careers, become familiar with STEM school setting through observing and discussing the school environment and by developing and teaching inquiry-based lessons.

MATH 2020 Introduction to Differential Equations: 3 semester hours

Prerequisite: MATH 2000. Topics will be chosen from: linear differential equations, equations with constant coefficients, laplace transforms, power series solutions, systems of ordinary differential equations.

MATH 2300 Introduction to Discrete Structures: 3 semester hours

Prerequisites: MATH 1100 or MATH 1800, and CMP SCI 1250. This course treats fundamental mathematical concepts in discrete structures useful for computer science. Topics include logic, sets, equivalence relations and partitions, functions, elementary number theory, cardinality, basic combinatorial methods, trees and graphs.

MATH 2450 Elementary Linear Algebra: 3 semester hours

Prerequisite: MATH 1100 or MATH 1900. An introduction to linear algebra. Topics will include complex numbers, geometric vectors in two and three dimensions and their linear transformations, the algebra of matrices, determinants, solutions of systems of equations, eigenvalues and eigenvectors.

MATH 2510 Structure of Mathematical Systems II: 3 semester hours

Prerequisites: MATH 1150. Topics include an introduction to probability, statistics, and displays of data; a study of elementary geometry, including points, lines, planes, angles, properties of triangles, properties of quadrilaterals, other 2- and 3-dimensional shapes; similarity; measurement and conversions; Pythagorean Theorem; perimeter; area; surface area, and volume. This course does not apply towards the elective requirements for any of the majors, minors or related areas in mathematics and statistics.

MATH 3000 Discrete Structures: 3 semester hours

Prerequisites: MATH 1900 or MATH 1100, and CMP SCI 1250 or equivalent. This course introduces fundamental concepts and important data structures in Discrete Mathematics and serves as an important foundation for subsequent courses in Computer Science. It provides a formal system on which mathematical reasoning is based, and various problem-solving strategies with emphasis on the algorithmic approach (both iterative and recursive). Topics include logic, sets, functions and relations; methods of proof, including mathematical induction; elements of number theory; order of growth and basic analysis of algorithms efficiency; recurrence relations; basic counting methods; graphs and trees. Credit not granted for students with Mathematics major.

MATH 3010 Financial Mathematics I: 3 semester hours

Prerequisites: MATH 1900 or MATH 1100, and MATH 1320 or SCMA 3300 (or equivalents). This course introduces the theory of interest, annuities (certain), annuities with differing pay periods, amortization schedules and sinking funds.

MATH 3020 Financial Mathematics II: 3 semester hours

Prerequisites: MATH 3010. This course introduces the premium-discount formula for bonds, bond amortization, term structure of interest rates and pricing theory for options.

MATH 3100 Problem Solving in Mathematics: 1 semester hour

Prerequisite: MATH 2000. Course will train students to solve and write solutions to challenging mathematical problems, like those found in competitive exams like the Putnam Exam.

MATH 3250 Foundations of Mathematics: 3 semester hours

Prerequisites: MATH 1900 and CMP SCI 1250. The course will focus on developing an understanding of proofs and rigorous mathematical reasoning. Topics will include logic, sets, relations, functions, number theory, and counting methods.

MATH 3320 Applied Statistics: 3 semester hours

Prerequisites: MATH 1320. The course will cover topics including multiple regression, analysis of variance, generalized linear models, and applications of these methods. Using R for statistical analysis will be part of the course.

MATH 3520 Structure of Mathematical Systems III: 3 semester hours

Prerequisites: MATH 2510. Topics from MATH 1150 and MATH 2510 are continued. Other topics include integers and the real number system, relations and functions, coordinate system and linear equations, congruence, geometric constructions, geometric proofs, isometries, tessellations, and trigonometry. This course does not apply towards the elective requirements for any of the majors, minors or related areas in mathematics and statistics.

MATH 4005 Exploratory Data Analysis with R: 3 semester hours

Prerequisites: MATH 1320, MATH 2000 and MATH 2450. This course covers data analysis methods with R. It introduces the basic goals and techniques of the data science process, methods of characterizing and visualizing data and building predictive and inferential models. R will be introduced at the beginning of the class and then used throughout the rest of the class.

MATH 4030 Applied Mathematics I: 3 semester hours

Prerequisite: MATH 2020 and MATH 2450. Topics chosen from Fourier series, special functions, partial differential equations, and boundary value problems.

MATH 4060 Applied Differential Equations: 3 semester hours

Prerequisites: MATH 2020 and MATH 2450. The study of ordinary differential equations and partial differential equations is continued with applications in such areas as physics, engineering and biology.

MATH 4070 Introduction to Nonlinear Optimization: 3 semester hours

Prerequisites: MATH 1320, MATH 2000, MATH 2450 and (MATH 3000 or MATH 3250). This course will introduce the theory, methods, and applications of nonlinear optimization. It will cover convex functions, convex analysis, linear and quadratic programs, semidefinite programming and other optimization problems. Topics may include duality theory, algorithms of descent method, Newton's method and interior-point methods, and applications to signal processing, statistics and other fields will be covered. Credit cannot be earned for both MATH 4070 and MATH 5070.

MATH 4080 Introduction to Scientific Computation: 3 semester hours

Prerequisites: MATH 2000 and MATH 2450. This course will introduce fundamental algorithms in numerical linear algebra, matrix factorizations including SVD and QR, direct and iterative methods for solving linear systems, least squares problems and eigenvalue problems. Other topics covered will be chosen from numerical integration and differentiation, iterative methods for ODEs and PDEs, Discrete Fourier transform and FFT, spline smoothing and kernel smoothing. Credit cannot be earned for both MATH 4080 and MATH 5080.

MATH 4090 Introduction to High-dimensional Data Analysis: 3 semester hours

Prerequisites: MATH 1320, MATH 2000 and MATH 2450. This course introduces several advanced classical and modern techniques for modeling and analysis of high-dimensional datasets with low-dimensional structures. The topics covered in this course include principal component analysis, factor analysis, clustering-based methods, and sparse and low-rank recovery theory and algorithms. Credit cannot be earned for both MATH 4090 and MATH 5090.

MATH 4100 Real Analysis I: 3 semester hours

Prerequisites: MATH 3250, or CMP SCI 3130, or consent of instructor. This course provides an introduction to real analysis in one variable. Topics include the real number system, limits, continuity, differentiability, and sequences and series of functions.

MATH 4160 Complex Analysis I: 3 semester hours

Prerequisites: MATH 2000 or consent of the instructor. This course introduces complex numbers and their geometrical representation, point sets, analytic functions of a complex variable, complex integration, Taylor and Laurent series, residue theorem, and conformal mapping.

MATH 4200 Mathematical Statistics I: 3 semester hours

Prerequisites: MATH 1320 and MATH 2000. Introduction to the theory of probability and statistics using concepts and methods of calculus.

MATH 4210 Mathematical Statistics II: 3 semester hours

Prerequisites: MATH 4200. Continuation of MATH 4200. Sampling distributions, estimation theory, properties of estimators, hypothesis testing, Neyman-Pearson Theorem, likelihood ratio tests, introduction of analysis of variance and linear models. Basics of some nonparametric procedures.

MATH 4220 Bayesian Statistical Methods: 3 semester hours

Prerequisites: MATH 1320, MATH 2000 or MATH 1100; or consent of the instructor. This course introduces Bayesian methods in data analysis and the use of the R language and BUGS. The first half of the course covers inferential theorems and computation methods on fundamental Bayesian statistics, such as estimation, hypothesis testing, MCMC methods, model selection and hierarchical modeling. The second half of the course concentrates on particular models used in practice, such as Bayesian generalized linear models, Bayesian two-factor ANOVA, Bayesian logistic and probit models.

MATH 4225 Introduction to Statistical Computing: 3 semester hours

Prerequisites: MATH 1320, MATH 2000 and MATH 2450. This course will introduce fundamental algorithms in Monte Carlo methods: random variable generation, Monte Carlo integration, Monte Carlo optimization, Markov chain Monte Carlo, Metropolis-Hastings algorithm, Gibbs sampler, Langevin algorithms and Hamilton Monte Carlo, perfect, iterated and sequential importance sampling. Other topics covered may include particle systems, hidden Markov models, parallel and cloud computing. Credit cannot be earned for both MATH 4225 and MATH 5225.

MATH 4230 Numerical Analysis I: 3 semester hours

Prerequisites: MATH 2020, MATH 2450, and the ability to program in an upper-level language. Solutions of equations, interpolation and approximation numerical differentiation and integration, and numerical solutions of initial value problems in ordinary differential equations. Selected algorithms will be programmed for solution on computers.

MATH 4250 Introduction to Statistical Methods in Learning and Modeling: 3 semester hours

Prerequisites: MATH 1320, MATH 2000 and MATH 2450. This course will introduce basic statistical principles and methods for modeling, inference, prediction and classification. The topics will be chosen from linear regression, basis expansion methods, kernel smoothing methods, model regularization, model selection and assessment, and other nonparametric methods. Credit cannot be earned for both MATH 4250 and MATH 5250.

MATH 4260 Introduction to Stochastic Processes: 3 semester hours

Prerequisites: MATH 4200. Basic theory and applications of stochastic processes. Markov chains, recurrent and transient states, stationary distributions, ergodic theorem, renewal processes, discrete martingales and stationary processes.

MATH 4350 Theory of Numbers: 3 semester hours

Prerequisites: MATH 2450 and either MATH 3000 or MATH 3250; or consent of instructor. This course examines the properties of integers, multiplicative functions, congruences, primitive roots, and quadratic residues.

MATH 4390 Topics in Probability and Statistics: 3 semester hours

Prerequisites: Consent of instructor. A seminar on special topics in probability and statistics to be determined by the interests of the instructor. May be repeated for credit provided different topics are studied.

MATH 4400 Introduction to Abstract Algebra I: 3 semester hours

Prerequisites: MATH 2450 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course introduces groups, rings, and fields, with an emphasis on groups and rings.

MATH 4450 Linear Algebra: 3 semester hours

Prerequisites: MATH 2450 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on topics selected from vector spaces, bases, linear transformations, matrices, canonical forms, eigenvalues, hermitian and unitary matrices, inner product spaces, and quadratic forms.

MATH 4460 Introduction to Coding Theory: 3 semester hours

Prerequisites: MATH 2450 and either MATH 3000 or MATH 3250. This course is an introductory course in coding theory. Topics may include linear codes, generator and parity check matrices, dual codes, weight and distance, encoding and decoding, and the Sphere Packing Bound; various examples of codes like the Hamming codes, Golay codes, binary Reed-Muller codes, and the hexacode; Shannon's theorem for the binary symmetric channel, upper and lower bounds on the size of linear and nonlinear codes; constructions and properties of finite fields, basic theory of cyclic codes; concepts of idempotent generator, generator polynomial, zeros of a code, and defining sets, special families of BCH and Reed-Solomon cyclic codes as well as generalized Reed-Solomon codes. Credit cannot be granted for both MATH 4460 and MATH 5460.

MATH 4500 Special Readings: 1-10 semester hours

Prerequisites: 6 credit hours at the Math 4000 level and consent of the instructor. Advanced topics in Mathematics. May be repeated for credit if the topic differs.

MATH 4550 Combinatorics: 3 semester hours

Prerequisites: MATH 2450 and either MATH 3000 or MATH 3250; or consent of instructor. This course introduces advanced counting methods including the use of generating functions for the solution of recurrences and difference equations. Additional topics may include: graphs and trees, combinatorial designs, combinatorial games, error-correcting codes, and finite-state machines.

MATH 4580 Mathematical Logic: 3 semester hours

Prerequisites: MATH 2450 and one of MATH 3250, CMP SCI 3130, or PHIL 4460; or consent of instructor. This course focuses on a study of the logic of mathematics by the axiomatic method, with a development of the propositional calculus and restricted predicate calculus emphasizing its application to the foundations of mathematics.

MATH 4620 Projective Geometry: 3 semester hours

Prerequisites: MATH 2000, MATH 2450, and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course provides an analytic approach to the study of projective spaces. Theorems of Desargues, Pascal, and Brianchon and projective properties of conics are studied.

MATH 4660 Foundations of Geometry: 3 semester hours

Prerequisites: MATH 2450 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on a development of portions of Euclidean geometry from a selected set of axioms, including a discussion of consistency, independence, categoricity, and completeness of the axioms.

MATH 4670 Introduction to Non-Euclidean Geometry: 3 semester hours

Prerequisites: MATH 2000, MATH 2450, and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on a summary of the history of the non-Euclidean geometries and a study of hyperbolic plane geometry.

MATH 4800 Introduction to Topology: 3 semester hours

Prerequisites: MATH 2000 and either MATH 3250 or CMP SCI 3130; or consent of instructor. This course focuses on the study of topological spaces, including the concepts of limit, continuity, connectedness, compactness, etc. Special emphasis is placed on, and examples taken from, the space of real numbers.

MATH 4890 Topics in Mathematics: 3 semester hours

Prerequisite: Consent of instructor.

MATH 4995 Internship in Actuarial Science: 1-3 semester hours

Same as ECON 4995. Prerequisites: Junior standing and consent of program director. Supervised off-campus training in a private or public sector position in which the student applies the knowledge and skills learned in their actuarial science coursework. The internship is monitored by a faculty member and the student must provide a written report at the end of the project. This course may be repeated for a maximum of 6 credit hours.

MATH 5060 Computational Harmonic Analysis: 3 semester hours

Prerequisites: MATH 4030, MATH 4100 and MATH 4450. The course covers the basics of Fourier analysis and wavelet analysis. Topics include Fourier transforms and series, discrete Fourier transform, discrete cosine transform and their fast computational schemes, fast wavelet transform, and the lifting scheme. Additional topics include industrial standards for image compression and several aspects of signal processing.

MATH 5070 Nonlinear Optimization: 3 semester hours

Prerequisites: Graduate standing. This course will introduce the theory, methods, and applications of nonlinear optimization. It will cover convex functions, convex analysis, linear and quadratic programs, semidefinite programming and other optimization problems. Topics chosen from duality theory, algorithms of descent method, Newton's method and interior-point methods, and applications to signal processing, statistics and other fields will be covered. Topics are the same as Math 4070 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both Math 4070 and Math 5070.

MATH 5080 Scientific Computation: 3 semester hours

Prerequisites: Graduate standing. This course will introduce fundamental algorithms in numerical linear algebra, matrix factorizations including SVD and QR, direct and iterative methods for solving linear systems, least squares problems and eigenvalue problems. Other topics covered will be chosen from numerical integration and differentiation, iterative methods for ODE's and PDE's, Discrete Fourier transform and FFT, spline smoothing and kernel smoothing. Topics are the same as MATH 4080 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4080 and MATH 5080.

MATH 5090 High-dimensional Data Analysis: 3 semester hours

Prerequisites: Graduate standing. This course introduces several advanced classical and modern techniques for modeling and analysis of high-dimensional datasets with low-dimensional structures. The methods covered in this course include principal component analysis, factor analysis, clustering-based methods, and sparse and low-rank recovery theory and algorithms. Topics are the same as MATH 4090 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4090 and MATH 5090.

MATH 5100 Real Analysis II: 3 semester hours

Prerequisites: MATH 4100. Introduction to measure and integration. Topics include the Riemann-Stieltjes integral, Lebesgue measure, measurable functions, the Lebesgue integral, Radon-Nikodym and Fubini theorems and the basics of L_p -spaces.

MATH 5110 Differentiable Manifolds: 3 semester hours

Prerequisites: MATH 4100, MATH 4450, and MATH 4800. An introduction to smooth manifolds and maps. Topics will include the Implicit Function Theorem, Sard's Theorem, transversality, intersection and degree theory, differential forms and integration on manifolds.

MATH 5140 Set Theory and Metric Spaces: 3 semester hours

Prerequisites: MATH 4100 or consent of instructor. Naive set theory, cardinal arithmetic, ordinal numbers, the axiom of choice and equivalents, metric spaces, convergence, continuity, compactness, contraction principals and applications. Construction of completions and examples like real numbers and p-adic numbers. Other topics could include the Stone-Weierstrass theorem and metrization theorems.

MATH 5160 Complex Analysis II: 3 semester hours

Prerequisites: MATH 4160 and either MATH 4100 or MATH 4800. A second course in complex analysis, emphasizing the theory of analytic functions, and including various topics like the Riemann mapping theorem, normal families, analytic continuation, representations of analytic functions, and elliptic functions.

MATH 5225 Statistical Computing: 3 semester hours

Prerequisites: Graduate standing. This course will introduce fundamental algorithms in Monte Carlo methods: random variable generation, Monte Carlo integration, Monte Carlo optimization, Markov chain Monte Carlo, Metropolis-Hastings algorithm, Gibbs sampler, Langevin algorithms and Hamilton Monte Carlo, perfect, iterated and sequential importance sampling. Other topics covered may include particle systems, hidden Markov models, parallel and cloud computing. Topics are the same as Math 4085 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4225 and MATH 5225.

MATH 5250 Statistical Methods in Learning and Modeling: 3 semester hours

Prerequisites: Graduate standing. This course will introduce basic statistical principles and methods for modeling, inference, prediction and classification. The topics will be chosen from linear regression, basis expansion methods, kernel smoothing methods, model regularization, other nonparametric methods, and model selection and assessment. Topics are the same as MATH 4250 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be earned for both MATH 4250 and MATH 5250.

MATH 5320 Topics in Statistics and its Applications: 3 semester hours

Prerequisites: MATH 4210 or consent of instructor. The course studies classical and recently developed statistical procedures selected from areas including multivariate analysis, linear and non-linear models, nonparametric methods, and statistical learning. Emphasis is on applications of the procedures.

MATH 5460 Coding Theory: 3 semester hours

Prerequisites: Graduate standing. This course is an introductory course in coding theory. Topics may include linear codes, generator and parity check matrices, dual codes, weight and distance, encoding and decoding, and the Sphere Packing Bound; various examples of codes like the Hamming codes, Golay codes, binary Reed-Muller codes, and the hexacode; Shannon's theorem for the binary symmetric channel, upper and lower bounds on the size of linear and nonlinear codes; constructions and properties of finite fields, basic theory of cyclic codes; concepts of idempotent generator, generator polynomial, zeros of a code, and defining sets, special families of BCH and Reed-Solomon cyclic codes as well as generalized Reed-Solomon codes. Topics are the same as MATH 4460 but material is covered at a greater depth and additional projects/assignments are required. Credit cannot be granted for both MATH 4460 and MATH 5460.

MATH 5500 Directed Readings: 1-6 semester hours

Prerequisite: Consent of instructor. Independent readings at an advanced level.

MATH 5550 Topics in Advanced Math for the Teacher: 3 semester hours

Prerequisite: Consent of instructor. This course will look at various topics in Algebra, Analysis, and Geometry that will deepen a teacher's understanding of the Mathematics of the precollegiate curriculum. It can be taken more than once for credit.

MATH 5600 Topics in Computation: 3 semester hours

Prerequisite: Consent of instructor. The course will cover various advanced topics in computation, and can be taken more than once for credit. Examples of such topics are: computer graphics, computer architecture, theories of language, analysis of operating systems, numerical geometry and computer aided design, etc.

MATH 5700 Topics in Applied Mathematics: 3 semester hours

Prerequisite: Consent of instructor. The course will cover various advanced topics on applied mathematics, and can be taken more than once for credit. Examples of such topics are: fast transforms, digital filters, etc.

MATH 5710 Topics in Analysis: 3 semester hours

Prerequisites: MATH 5100 or consent of instructor. Topics selected from the areas of Fourier analysis, harmonic analysis, functional analysis, special functions, generalized functions, and partial differential equations. May be taken more than once for credit with consent of department.

MATH 5770 Advanced Topics in Nonlinear Optimization: 3 semester hours

Prerequisites: MATH 4070 or MATH 5070; or consent of the instructor. Topics chosen from theory and algorithms of Lagrange multipliers, algorithms for solving variational inequalities, forward-backward splitting algorithms and proximal alternating minimization algorithm for non-convex optimization problems.

MATH 5820 Topics in Algebra: 3 semester hours

Prerequisite: Consent of instructor. Topics selected from the theory of groups, rings, fields, algebras and other algebraic systems. May be taken more than once for credit with consent of department.

MATH 6900 Masters Thesis: 1-6 semester hours

Prerequisite: Consent of instructor. Thesis work under the supervision of a faculty member. The course is designed for those students intending to present a thesis as part of their M.A. program. Students who do not write a thesis cannot apply MATH 6900 to a degree.

MATH 7990 Ph.D. Dissertation Research: 1-9 semester hours

Prerequisites: Completion of comprehensive examinations. May be taken for no more than nine hours.

Military and Veterans Studies

General Information

Veterans Studies is a multi-disciplinary field of study devoted to developing a clearer understanding of veterans and the veteran experience.

Veterans Studies will provide students a foundational understanding of military structure, culture, combat, and the personal changes resulting from military service. It will challenge students to think more clearly about how veterans fit into society and what obligations, if any, a society holds towards its veteran community. The program provides students the knowledge necessary to better serve veterans and the veteran community, as well as better relate to veterans in our society.

Mission

The mission of the Department of Military and Veterans Studies is to enable success for current and future veterans on campus, and to provide a researched-based curriculum for students who are interested in studying the veteran experience.

Academic programs

Military and Veterans Studies provides academic programs leading to one of two undergraduate minors (or a bachelor's degree through the interdisciplinary studies program). Coursework is multi-disciplinary and it is designed for students of any background or any major. Military and Veterans Studies students will graduate with a nuanced understanding of the military and veteran experience, the role veterans play in our society, and the obligations our society might hold towards this subset of our population.

Student Services

The Department of Military and Veterans Studies enables success for current and future veterans primarily through its sponsorship of the UMSL Veterans Center. The Veterans Center exists to assist veterans in their transition from military to campus life. It is a one-stop resource center, staffed by student veterans and veteran volunteers, committed to facilitating and coordinating the overall integration of veterans into the UMSL academic community. The UMSL Veterans Center is UMSL Veterans serving UMSL Veterans!

Expected Learning Outcomes

Upon completion of the veterans studies minor, a student will be able to:

- Identify historical trends and patterns related to American society's relationship with its service members and veterans.
- Apply social science research methods to illustrate the evolving relationship between veterans and American society.
- Identify and summarize how different methods employed by the US to fill its military influence society's perception of its obligations to veterans.
- Identify areas where race, class and gender impact the military or veteran experience in American society
- Identify how social representations of veterans and service have been constructed in different time periods and by different social institutions.
- Compare and contrast the concept of "veteranness" in different socio-cultural contexts using multi-disciplinary techniques.
- Analyze how media (including art, literature, theater and film) functions to both contextualize and personalize veteran experiences.
- Evaluate American veteran public policies in an interdisciplinary manner and propose innovative policies or processes to address current concerns in the veteran community.

Minor in Veterans Studies

The Minor in Veterans Studies is a multi-disciplinary program whose course work enhances students' majors to prepare them to work for or with veterans. It is also designed to encourage and enable veteran students to reflect more deeply on their service experiences. This minor includes a foundation course, a series of elective courses, and a capstone. Electives may be chosen from four areas, or from any MVS course above the 2000 level.

Cultural: exploring perspectives and experiences of veterans through various media

Relational: understanding how veterans relate among various aspects of our society

Institutional: understanding the context and structure of military service and veteran institutions now and in the past

Clinical: establishing effective skills to better serve for, with, and in veteran populations

Alternative elective courses could be included with the consent of the department chair. While it is encouraged, students are not required to limit their electives to a single area.

FAQ's

What is Veterans Studies?

Veterans Studies is a multi-disciplinary field of study devoted to developing a clearer understanding of veterans and the veteran experience. Veteran Studies will provide students a foundational understanding of military structure, culture, combat, and the personal changes resulting from military service. It will challenge students to think more clearly about how veterans fit into society, and what obligations, if any, a society holds towards its veteran community. The program provides students the knowledge necessary to better serve veterans and the veteran community, as well as better relate to veterans in our society.

What will I learn?

Veteran Studies will provide students a foundational understanding of military structure, culture, combat, and the personal changes resulting from military service. It will challenge students to think more clearly about how veterans fit into society and what obligations, if any, a society holds toward its veteran community.

Do I need to be a veteran to take Veterans Studies classes?

No. In fact our goal is to provide non-veterans the academic depth to understand and serve in the veteran community.

If I am a veteran, should I take Veterans Studies classes?

Absolutely. Veterans are encouraged to join Veterans Studies for the same reasons as other students. But also so they can explore new ways to reflect on their own service and experiences

Why should I take a Military and Veterans Studies Course?

If you want to better understand the veteran experience as an emphasis in your major or just because of your curiosity, then Military and Veterans Studies is a fit for you. Veterans Studies courses develop insights and multidisciplinary perspectives that enhance your major. Typical majors include: Psychology, Criminology and Criminal Justice, Social Work, Sociology, Anthropology, Nursing, History, Political Science, Business and English. This list is not exhaustive.

Background

The Military Science Program in the Department of Military and Veterans Studies is the academic home to Army Reserve Officers Training Corps (Army ROTC). UMSL is partner institution in the Gateway Army ROTC

Battalion – which is hosted at Washington University in St. Louis. Completion of the Army ROTC program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty, nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers' educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a thirty-two-day summer camp, normally between the junior and senior years. Nursing students attend a nursing internship at Army hospitals following the normal summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The program offers both a four-year and a two-year program, each with its own special advantages. Students are invited contact the Military Science Program to obtain additional information.

The program requires four years of military science courses, which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as a freshman or as a sophomore.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below. Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

Basic Course

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, basic leadership and time management, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course.

Advanced Course

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet leaders. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (seventy-five minutes) periods and a one and a half hour (ninety minutes) leadership laboratory period each week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course. Students entering this course must be selected in accordance with the prerequisites listed below.

- Pass a military physical examination
- Pass a background screening
- Pass the three-event physical fitness test
- Pass healthy body-fat standards

Monetary Allowances

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of \$400–\$500 per month for up to twenty months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide over \$16,000 during the last two years of school. Both the United States Army Reserve and the National Guard offer additional monetary incentives for cadets who join their organizations.

Army ROTC College Scholarship Program

Financial assistance is available in the form of two-, three-, or four-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, the students/cadets receive reimbursement for their tuition and fees. Additionally, Army scholarship recipients receive a flat-rate allowance of \$1200 per year for textbooks and other expenses and a stipend for up to 10 months per year. There are also numerous national and organizational scholarships that students may compete for as members of Army ROTC.

Textbooks and Uniforms

All textbooks, uniforms, items of insignia, and equipment incident to membership in the Army ROTC Program are furnished by the Gateway Battalion.

Leadership Laboratory

Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for one and one half hours (ninety minutes) each week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

FAQs

What is Army ROTC?

ROTC is the Reserve Officers Training Corps. It is the largest officer commissioning program for the U.S. Army. It is structured as a college class in which one learns valuable leadership skills.

Do ROTC courses count for credit?

Yes! All MIL SCI courses at UMSL count as elective credit (towards your 120 requirement) and your grades are included in GPA calculations. In addition, MIL SCI 1101 and MIL SCI 1102 are core courses for the Military History / Military Logistics Minor.

Am I joining the Army by signing up for ROTC?

NO, you are not joining the Army. Only if you are commissioned as a Second Lieutenant will you join the Army. If you are not receiving scholarship or stipend support, there is no military obligation whatsoever during the first two years of ROTC.

Can I just take the ROTC class for the leadership education or for my minor?

YES. You can take any 1000 or 2000 level class without prerequisite or obligation. You can choose (or not choose) to participate in the extracurricular events like physical training, field training and other

military skills. Before signing up for a 2000 level class, you should have a discussion with the UMSL ROTC advisor.

How about Scholarships? Do you have any available?

The Army offers full tuition 2, 3, and 4 year scholarships for the best students (you must be medically, physically, academically qualified and pass a background check). These scholarships are merit and potential based. The number and type of scholarships available is different every year, but once awarded a scholarship is a financial commitment from the Army to you through your graduation.

Main Number: 314-977-8227

Background

The Aerospace Studies program in the Department of Military and Veterans Studies is the academic home to Air Force Reserve Officers Training Corps (Air Force ROTC). UMSL is partner institution in Detachment 207, Air Force ROTC – which is hosted at St. Louis University. This program provides pre-commissioning education for qualified students who desire to serve on active duty as commissioned officers in the United States Air Force.

The aerospace studies curriculum is divided into two phases: (1) the general military course; and (2) the professional officer course. The department offers a standard and condensed four-year commissioning programs. The four-year program provides coursework during the freshman through senior years. The condensed program compresses the general military course to one academic year beginning in the fall. To obtain specific information, please contact the Aerospace Studies Program directly.

General Military Course

This program of instruction is open to any student and consists of the first- and second-year courses for students in the four-year Air Force Reserve Officer Training Corps (AFROTC) program. These courses deal with the Air Force structure and the development of air power. They strengthen interest in becoming a professional Air Force officer, develop knowledge of world military forces, and enable the student to understand how the United States Air Force supports national objectives and policies.

Professional Officer Course

Aerospace studies courses offered during the third and fourth years must be completed by all students who seek a commission through AFROTC. Coursework continuity is designed to prepare college students to serve as active duty Air Force officers upon graduation and commissioning. The curriculum stresses national security in contemporary American society, leadership, management, and professionalism. Special emphasis is placed on developing the cadet's communication skills. Students entering this course must be selected in accordance with the prerequisites listed below. Students not currently enrolled in the AFROTC program must have permission of the department chairperson prior to enrolling in these courses.

- Pass a military physical examination
- Pass the four-event physical fitness test
- Pass height/weight standards

- Have a 2.5 cumulative GPA or higher for undergraduates or a 3.0 cumulative GPA or higher for graduate students.

Note: Call the Aerospace Studies Program at 314-977-8227 for specific requirements.

Leadership Laboratory

Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for up to two hours each week. All uniforms and equipment required for cadet activities are furnished. It is required for members of the Air Force Reserve Officer Training Corps, or students who are eligible to pursue a commission as determined by the chairman of the Department of Aerospace Studies.

Monetary Allowances

Once the admission criteria have been met, the student may compete for the opportunity to contract for four years of active duty as a commissioned officer upon graduation. Upon selection and acceptance, the student receives a monthly, tax-exempt stipend ranging from \$300.00–\$500.00. Tuition assistance is possible but not guaranteed. It is awarded on a competitive basis.

Field Training

Cadets are required to attend a four-week field training course at Maxwell Air Force Base in Montgomery, AL before they may formally enroll in the professional officer course. Field training provides a better understanding of the United States Air Force mission, increases the cadets' proficiency in junior officer training areas, and stresses the importance of physical conditioning. Students attending these courses receive pay for the encampment plus travel allowances.

FAQ

How do I join AFROTC if I am already in college?

Once you are enrolled as a full time student, you can register for AERO 1001 in the fall or AERO 1002 in the spring. If you are a sophomore or only have 3 years left of your degree, you may still join but will need to contact the Unit Admissions Officers first.

Do AFROTC courses count for credit?

Yes! All AERO courses at UMSL count as elective credit (towards your 120 requirement) and your grades are included in GPA calculations.

What is the difference between AFROTC and enlisting in the Air Force?

AFROTC is one of three commissioning sources for the USAF. Upon completion of a bachelor's degree and AFROTC you will be commissioned as an officer, followed by specific training in a career field. Officers are trained to be the leaders and supervisors of enlisted personnel. Rank, pay, and career opportunities for officers are commensurate with their elevated level of responsibility. Enlisting in the Air Force is done through a local recruiter followed by basic training and prospective technical training. This avenue does not require a college degree.

Will the Air Force pay for my school?

AFROTC offers many scholarship opportunities. Prospective AFROTC cadets can apply for a high school scholarship before entering into college.

Once in college, AFROTC cadets can apply for an in-college scholarship. This process is handled by the host detachment.

Air Science Courses

AERO 1001 The Air Force Today: 2 semester hours

Introduction to contemporary military issues and overall Air Force structure. Professionalism, human rights, and civilian-military relationships are stressed. Leadership laboratory activities designed to develop leadership potential, and includes military customs and courtesies, drill and ceremonies and base visitations.

AERO 1002 The Air Force Today: 2 semester hours

Continuation of AERO 1001. Includes strategic offensive and defense forces, general purpose forces, aerospace support forces, and relationships with U.S. Army forces. Individual communicative skills emphasized.

AERO 1500 Leadership Laboratory: 0 semester hours

Prerequisites: Students must be enrolled in an AERO course. Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop each student's leadership potential. Course work includes a study of Air Force customs and courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force junior officer. Students develop their leadership potential in a practical, supervised laboratory, which typically includes field trips to Air Force installations throughout the United States. This course is generally taught at St. Louis University. It is required for all AF ROTC students.

AERO 2001 The Air Force Way: 2 semester hours

.

AERO 2002 The Air Force Way: 2 semester hours

.

AERO 3001 Air Force Management and Leadership: 3 semester hours

Integrated management course emphasizing the individual as a manager in air force milieu. Motivational and behavioral processes, leadership, communication, and group dynamics covered for development of the junior officer's professional skills as an Air Force officer. Basic managerial processes involving decision-making, utilization of analytic aids in planning, organizing and controlling in a changing environment are emphasized as professional concepts. Classroom activity, three hours per week; leadership laboratory, one hour per week.

AERO 3002 Air Force Management and Leadership: 3 semester hours

Continuation of AERO 3001. Includes organizational and personal values, management of forces in change, organizational power, politics, and managerial strategy and tactics within context of the military organization. actual Air Force cases used to enhance learning and communication processes. Classroom activity, three hours per week; leadership laboratory, one hour per week.

AERO 4001 National Security Forces in Contemporary American Society: 3 semester hours

The armed forces as an integral element of society; American civil-military relations; environmental context in which U.S. defense policy is formulated and implemented; societal attitudes toward the military leader-manager in a democratic society; fundamental values and socialization processes associated with the armed services. Individual and group oral and written reports. Classroom activity, three hours per week; leadership laboratory, one hour per week.

AERO 4002 National Security Forces in Contemporary American Society: 3 semester hours

Continuation of AERO 4001. Requisites for maintaining adequate national security forces; political, economic and social constraints on the national defense structure; impact of technological and international developments on strategic preparedness; formulation and implementation of national security policy. Classroom activity, three hours per week; leadership laboratory, one hour per week.

Military Science Courses**MIL SCI 1101 Introduction to Leadership I: 3 semester hours**

Examine the challenges and competencies that are critical for effective leadership. You will learn how the personal development of life skills such as cultural understanding, goal setting, time management, mental/physical resiliency, and stress management relate to leadership, officership, and the Army profession. Enrollment in MIL SCI 1101 does not require a commitment to join the US Army, (FALL ONLY).

MIL SCI 1102 Introduction to Leadership II: 3 semester hours

Investigate leadership fundamentals such as problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. You will explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive exercises. Learn fundamental military concepts and explore the Army's leadership philosophy. Enrollment in MIL SCI 1102 does not require a commitment to join the US Army. (SPRING ONLY).

MIL SCI 1500 Leadership Laboratory: 0 semester hours

Prerequisites: Must be currently enrolled in a MIL SCI course. Leadership Laboratory provides basic and advanced leadership experience in military courtesy, drill and ceremonies and practical application of classroom-taught subjects. Functions and responsibilities of leadership positions are developed through student-led staff planning actions and command positions. This course normally meets at Washington University. Note: All military science scholarship and advanced course students must register for MIL SCI 1500.

MIL SCI 2201 Innovative Team Leadership: 3 semester hours

Explore the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and leadership theories. The focus continues to build on developing knowledge of leadership attributes and core leader competencies through the understanding of Army rank, structure, and duties as well as broadening knowledge of land navigation and squad tactics. Enrollment in MIL SCI 2201 does not require a commitment to join the US Army. (FALL ONLY).

MIL SCI 2202 Foundations of Tactical Leadership: 3 semester hours

Develop greater self-awareness as you assess your own leadership styles and practice communication and team building skills. Examine the challenges of leading teams in the complex operational environment. Study dimensions of terrain analysis, patrolling, and operation orders. Explores the dynamics of adaptive leadership in the context of military operations. Enrollment in MIL SCI 2202 does not require a commitment to join the US Army. (SPRING ONLY).

MIL SCI 3301 Adaptive Team Leadership: 3 semester hours

Prerequisites: Successful completion of MIL SCI 1101 through 2202; OR attendance at the Leader's Training Course (LTC); OR member of US Army Reserve or National Guard Unit. This is an academically challenging course where you will study, practice, and apply the fundamentals of Army leadership, officership, Army values and ethics, and small unit tactics. At the conclusion of this course you will be capable of planning, coordinating, navigating, motivating and leading a team or squad in the execution of a tactical mission during a classroom practical exercise (PE), a leadership lab, or during a situational training exercise (STX) in a field environment. (FALL ONLY).

MIL SCI 3302 Applied Team Leadership: 3 semester hours

Prerequisites: MIL SCI 3301. Continue to learn and apply the fundamentals of Army leadership, officership, Army values and ethics as you hone your leadership abilities in a variety of tactical environments and the classroom. Successful completion of this course will help prepare you for success at the ROTC Leader Development and Assessment Course (LDAC) which you will attend the summer following this course at Fort Lewis, WA. You will receive systematic and specific feedback on your leadership attributes, values and core leader competencies from your instructors, other ROTC cadre, and senior cadets. (SPRING ONLY).

MIL SCI 4401 Adaptive Leadership: 3 semester hours

Prerequisites: Successful completion of the ROTC Leadership Development and Assessment Course (LDAC). This course focuses on practical application of adaptive leadership. Throughout the semester, students will attend weekly training meetings and fill the roles of Army staff officers. They will plan, execute and assess ROTC training and recruiting events. Study will also focus on the Army values, leader ethics and how they are applied in the Full Spectrum Operating Environment. The officer's role in the Uniform Code of Military Justice, counseling of subordinates, administrative actions and other aspects of everyday military life will also be discussed. (FALL ONLY).

MIL SCI 4402 Leaders in a Complex World: 3 semester hours

Prerequisites: MIL SCI 4401. Explore the dynamics of leading in the complex situation of current military operations in the contemporary operating environment. Examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. You will also explore aspects of interacting with non-government organizations, civilians on the battlefield and host nation support. Significant emphasis is placed on preparing you for your branch school and first unit of assignment. (SPRING ONLY).

MIL SCI 4411 Advanced Military Science Studies I: 3 semester hours

Prerequisites: MIL SCI 4401 or permission of instructor. An in-depth study of the role of the Army officer in today's Army.

MIL SCI 4412 Advanced Military Science Studies II: 3 semester hours

Prerequisites: MIL SCI 4401 or permission of instructor. A study of how the Army officer develops the leadership traits necessary to lead soldier's into battle.

MIL SCI 4413 Military Medical Technologies Independent Study: 3 semester hours

This course explores how medical advances have improved soldiers' chances of surviving battlefield injuries from the Civil War to the Iraq War. Also explores how soldiers are now surviving more catastrophic injuries and what the implications are on long term health care for these soldiers both physically and mentally.

Military and Veterans Studies Courses

MVS 1100 Veterans Transition Seminar: 1 semester hour

This course is designed for the student veteran who is new to UMSL but not eligible for the First Year Experience class. It will survey essential life skills (time management, financial management, physical fitness) and tools for academic success (note-taking, writing, research, oral presentation). It will familiarize students with the relationship between their education and their career and personal goals. It will also expose students to campus and veteran-specific support services. Maybe most importantly, this course will provide a venue for veterans to connect with other veterans who are facing a similar transition.

MVS 2000 Selected Topics in Military or Veterans Studies: 1-3 semester hours

Selected topics in military or veterans studies. The topics will vary each semester. May be taken more than once for credit as long as the topic differs.

MVS 2021 War and Violence in Modern Times: 3 semester hours

Same as HIST 2021. Prerequisites: Sophomore standing or consent of the instructor. This course examines the connections between warfare and resistance, gangs and poverty, and state and non-state officials as enactors of violence. It explores the effects of war and violence on the poor in Brazil and the United States, prisoners of war in Asia, and resistance fighters in Latin America.

MVS 2100 Veterans in America: 3 semester hours

Prerequisite: ENGL 1100, ENGL 1110 or HONORS 1100. With a focus on the American veteran experience, this survey course will explore basic concepts, ideas and research into veterans and veteran institutions. In a multidisciplinary manner, we will examine military culture, the unique status of veterans in our society, and veteran institutions. We will study the successes, challenges and obligations our society faces related to its veteran community.

MVS 2130 Gender and the Military: 3 semester hours

Same as: GS 2130. This course investigates how the military treats gender difference, explores how military culture is defined, and how gender is a socially constructed concept. Topics include: What is military culture? What is gender? How do military culture and gender intersect? How does gender identity affect the military/soldiers? How prevalent are sexual assault and sexual harassment? How does this affect morale? How might it be eradicated? How do LGBTQ issues play out in military culture? How do disability and trauma shape the military experience? How does the military experience affect veterans' families? How are these issues being addressed globally?.

MVS 2200 Examining Cultural Experiences of Veterans: 3 semester hours

Prerequisites: Consent of the instructor. This course is designed to explore the cultural experiences of veterans. Through discussion, reflection and writing, students will examine the service experience in another culture and then relate those limited interactions within the context of the culture as a whole. For non-western cultural experiences, this course meets UMSL Cultural Diversity [CD] requirement.

MVS 2850 National Security Policy and Practice: 3 semester hours

Same as POL SCI 2551. This simulation-driven course focuses on national security policies and the processes that put these policies into practice. It examines the elements that underpin national security policy and the processes employed by the US government for integrating and synchronizing those instruments in the pursuit of national security objectives.

MVS 2860 Understanding Terrorism in the 21st Century: 3 semester hours

Same as POL SCI 2860. This course seeks to provide insight into the use of terrorism, as a means to achieve a political end, in our current globalized environment. It will review various facets of terrorism including societal disturbances that allow terrorist organizations to flourish, various types of domestic and international non-state actors that use terrorism, terrorism as the next generation of warfare, and the global response to the threat of terrorism. Students will exit the course with a more complete understanding of the multi-faceted threat terrorism poses to our increasingly globalized society.

MVS 3100 Current Issues in Military and Veterans Studies: 1-4 semester hours

Selected topics in military or veterans affairs with emphasis on current issues and trends. May be repeated as long as the topic is different for a maximum of 6 credit hours.

MVS 3201 Narratives from the Forever Wars: 3 semester hours

Same as MEDIA ST 3201 and ENGL 3201. This course studies literature and film written by and about those who served in the wars in Iraq and Afghanistan, with particular interest in how veterans as individuals are represented in it.

MVS 3300 Veterans Public Policy and Advocacy: 3 semester hours

This course provides an overview of American public policy towards military veterans and then works to propose more effective veteran policies. The focus of the course will be on understanding the current issues facing veterans. Once that is accomplished we will design new solutions to the current problems. Finally, we will practice effecting change through various written products and presentations.

MVS 3500 Internship in Veterans Studies: 1-3 semester hours

Prerequisites: Junior Standing and consent of the department chair. Independent study involving regular on-site work with an appropriate public or private agency serving the veteran community. A written report reflecting on the experience is required. Course may be repeated for a maximum of 6 credit hours.

MVS 4100 Veterans Studies Capstone Seminar: 3 semester hours

Prerequisites: MVS 2100 and senior standing. Mentored by a faculty member, students in this course will apply insights gained from previous coursework into a substantial Veterans Studies project. Students will work with the instructor and the class to develop a topic, establish a research or project plan, then prepare a project or paper suitable for presentation to the public. Students should expect that their work will be published or presented at an end-of-the-year symposium. This is not an independent study.

MVS 4200 Independent Study in Military and Veterans Issues: 1-3 semester hours

Prerequisite: Consent of instructor. Faculty mentored, independent study through readings, reports, or field research. No student may take more than a cumulative total of 6 hours of Independent Study.

MVS 4300 Current Topics in Military or Veterans Studies: 1-3 semester hours

Prerequisites: Junior standing. Selected topics in military or veterans studies with emphasis on current issues and trends. May be repeated as long as the topic is different for a maximum of 6 credit hours.

MVS 4345 War Crimes, Genocide, and Justice in the 20th and 21st Centuries: 3 semester hours

Same as SOC 4345, POL SCI 4345, and CRIMIN 4345. Prerequisite: ENGL 3100. This course provides advanced undergraduate and Master's level students a comprehensive overview of the subject of war crimes, crimes against humanity, genocide and legal responses to these crimes in the modern era. The goal of this course is to engage students in sustained, critical thought about these issues and to foster a deeper understanding of both the causes and consequences—legal, social and human—of these egregious crimes.

MVS 6220 Social Policy and Military Veterans: 3 semester hours

Same as SOC WK 6220. Prerequisites: SOC WK 5200 or its equivalent or consent of the instructor and graduate standing. This course provides an overview of public policy towards military veterans, with an emphasis on social work. The course focuses on political theory and public policy and reviews the various methodological approaches to studying public policy, the pertinent theories related to public policy analysis, an introduction to military culture and current issues facing veterans. The main focus of the course will be on understanding the current issues facing veterans and how public policy affects these issues.

Philosophy

General Information

Philosophy continues to keep alive the tradition begun by Socrates, Plato, and Aristotle of critically examining one's most cherished assumptions. Moreover, it deals with questions that are common to several areas of inquiry, such as art, ethics, the social sciences, the natural sciences, and the various professions. The study of philosophy also encourages logical precision, a heightened awareness of assumptions used in any discussion, and an attitude of both open-mindedness and responsible criticism toward new and unusual ideas. These skills are particularly useful for students planning careers in law, business, computer science, writing, or other fields requiring such disciplines of mind. For these reasons many students have found it useful to combine a major in another field with a major in philosophy. To accommodate such students, the department has a special program for double majors.

The philosophy faculty has an unusually wide range of research interests. Faculty members have written books and articles addressing not only the classical and traditional concerns of philosophy, but also contemporary controversies in the fields of law, psychology, sociology, political theory, biology, medical ethics, theology, logic, and philosophy of history as well. For their research in some of these areas, members have been awarded a number of national research grants, including fellowships from the National Science Foundation, the American Council of Learned Societies, and the National Endowment for the Humanities.

In keeping with this emphasis on diversity, the department is represented by scholars trained in widely different approaches to philosophy, such as the analytic tradition, Continental idealism and existentialism, Marxist dialectic, and Asian modes of thought.

Undergraduate Studies

General Education Requirements

Majors must meet the university and college general education requirements (p. 41). PHIL 1120: Asian Philosophy and PHIL 1125: Islamic Philosophy satisfy the college cultural diversity requirement.

Majors may not count philosophy courses taken on a satisfactory/unsatisfactory basis toward the degree requirements.

Expected Learning Outcomes

- Acquire basic knowledge of traditional philosophical issues in the western tradition.
- Develop critical thinking skills based on knowledge of the standards governing logical reasoning.
- Acquire familiarity with philosophical issues that arise in some other disciplines (e.g. biology, art, education, etc.).
- Acquire a basic understanding of ethical and social-political principles and their role in resolving ethical disputes and in evaluating social practices and institutions.
- Become acquainted with current philosophical debates in the areas of epistemology, metaphysics, and value theory, and with the arguments and proposals made to resolve them.

Bachelor of Arts in Philosophy

The undergraduate major in philosophy requires 30 hours of philosophy coursework. All majors must complete the general education (p. 41) course requirements. Candidates for the B.A. degree may take any foreign language to meet the foreign language requirement. Students who double major with a B.A. in Philosophy and a B.S. degree in Biology, Biochemistry and Biotechnology, Chemistry, Computer Science, Mathematics, or Physics may waive the foreign language requirement. Students with particular interests may choose to structure their major around tracks offered by the department. A minimum of 18 hours, including all courses for the major at or above the 3000 level, must be taken in residence in the UMSL Department of Philosophy. Philosophy majors must complete all required courses (under Course Requirements) with a grade of "C-" or higher and maintain a 2.0 GPA for all their Philosophy coursework.

Degree Requirements

General Education Requirements

Majors must meet the university and college general education requirements (p. 41). PHIL 1120: Asian Philosophy and PHIL 1125: Islamic Philosophy satisfy the college cultural diversity requirement. Majors may not count philosophy courses taken on a satisfactory/unsatisfactory basis toward the degree requirements.

Course Requirements

History of Philosophy

Select one of the following:		3
PHIL 1110	Western Philosophy I: Antiquity To The Renaissance	
PHIL 3301	Ancient Philosophy	
PHIL 3302	Medieval Philosophy	
And one of the following:		3
PHIL 1111	Western Philosophy II: Descartes To The Present	
PHIL 3303	Early Modern Philosophy	
PHIL 3304	Kant and Nineteenth Century Philosophy	
PHIL 3305	Twentieth Century Philosophy	
PHIL 3307	American Philosophy	

Logic

Select one of the following:	3
PHIL 1160 Critical Thinking	
PHIL 3360 Formal Logic	

Normative Philosophy

Select one of the following:	3
PHIL 1130 Approaches to Ethics	
PHIL 4430 Social and Political Philosophy	
PHIL 4435 Classical Ethical Theory	
PHIL 4438 Recent Ethical Theory	

Junior Level Requirement

Select one of the following:	3
Any 3000 level History of Philosophy course not used to satisfy the History of Philosophy Requirement above	
PHIL 3374 Philosophy of Art	
PHIL 3378 Philosophy of Mind	
PHIL 3380 Philosophy of Science	

Core Requirement

Select one of the following:	3
PHIL 4440 Theories of Knowledge	
PHIL 4445 Metaphysics	

Senior Seminar	3
PHIL 4491 Senior Seminar	

Elective Hours	9
Total Hours	30

Tracks

Tracks are ways that the Philosophy major may be completed but they are not mandatory; a student may complete the Philosophy major without following any track. All students on a track must complete the course requirements of the major. Students may use the same course to satisfy the major's course requirements and the requirements of individual tracks but, if they do so, they need to add enough elective courses to reach a total of 30 hours of philosophy coursework.

Pre-Law

PHIL 4487 Topics in Philosophy of Law	3
Select two of the following:	6
PHIL 2251 Sexual Ethics	
PHIL 2252 Crime and Punishment	
PHIL 2254 Business Ethics	
PHIL 2255 Environmental Ethics	
PHIL 2256 Bioethics	
PHIL 2258 Medicine, Values, and Society ¹	
PHIL 2283 Markets and Morals	
PHIL 4430 Social and Political Philosophy	
PHIL 4435 Classical Ethical Theory	
PHIL 4437 Metaethics	
PHIL 4438 Recent Ethical Theory	
PHIL 4439 Topics in Ethical Theory	
Total Hours	9

Science Studies

PHIL 3380 Philosophy of Science	3
Select two of the following, at most one at the 2000 level:	6
PHIL 2258 Medicine, Values, and Society ¹	
PHIL 4465 Theory of Decisions and Games	
PHIL 4479 Philosophy of Cognitive Science	
PHIL 4480 Topics in Philosophy of Science	
Total Hours	9

Psychology and Neuroscience

PHIL 3378 Philosophy of Mind	3
Select two of the following:	6
PHIL 2280 Minds, Brains, and Machines	
PHIL 3380 Philosophy of Science	
PHIL 4465 Theory of Decisions and Games	
PHIL 4478 Topics in Philosophy of Mind	
PHIL 4479 Philosophy of Cognitive Science	
Total Hours	9

Ethics and Society

Select two of the following:	6
PHIL 4430 Social and Political Philosophy	
PHIL 4435 Classical Ethical Theory	
PHIL 4437 Metaethics	
PHIL 4438 Recent Ethical Theory	
PHIL 4439 Topics in Ethical Theory	
Select one of the following:	3
PHIL 2251 Sexual Ethics	
PHIL 2254 Business Ethics	
PHIL 2255 Environmental Ethics	
PHIL 2256 Bioethics	
Total Hours	9

Health Sciences

PHIL 2256 Bioethics	3
Select two of the following:	6
PHIL 2251 Sexual Ethics	
PHIL 2257 Happiness and the Meaning of Life	
PHIL 2258 Medicine, Values, and Society ¹	
PHIL 2280 Minds, Brains, and Machines	
PHIL 4478 Topics in Philosophy of Mind	
PHIL 4479 Philosophy of Cognitive Science	
Total Hours	9

History

Select one of the following:	3
PHIL 3301 Ancient Philosophy	
PHIL 3302 Medieval Philosophy	
PHIL 4401 Plato	
PHIL 4402 Aristotle	

PHIL 4410	Topics and Figures in the History of Philosophy (depending upon the historical figure)	
Select one of the following:		3
PHIL 3303	Early Modern Philosophy	
PHIL 3304	Kant and Nineteenth Century Philosophy	
PHIL 4406	Empiricism	
PHIL 4407	Kant	
PHIL 4408	Hegel	
PHIL 4410	Topics and Figures in the History of Philosophy (depending upon the historical figure)	
Select one of the following or an additional course from one of the above categories:		3
PHIL 3305	Twentieth Century Philosophy	
PHIL 3307	American Philosophy	
PHIL 4421	The Analytic Tradition	
PHIL 4435	Classical Ethical Theory	
Total Hours		9

¹ For Honors College students.

Departmental Honors

Majors with a 3.2 or higher grade point average in all courses may, with the department's consent, earn departmental honors by:

1. Taking , Introduction to Formal Logic;
2. Completing at least 3 hours of PHIL 4450, Special Readings in Philosophy;
3. Submitting an acceptable thesis before the end of the senior year.

Philosophy as Part of a Double Major

Consider combining your philosophy major with another major. Philosophy trains students in basic, portable skills such as thinking independently and creatively, analyzing and constructing arguments, communicating clearly and persuasively, and considering multiple viewpoints. So philosophy naturally complements virtually every other field.

Bachelor of Liberal Studies

Build a bridge to some other discipline by combining one of the minors offered by the Philosophy department with with a minor in a second field to get a Bachelor of Liberal Studies. For more information, please go to the Interdisciplinary Studies (p. 171) program page.

Minor in Philosophy

The undergraduate minor in philosophy requires any five philosophy courses, at least three of which must be taken at the 3000 level or higher. Students with particular interests are encouraged to use the tracks above to organize their minor. At least 6 hours of course work for the minor at the 2000 level or higher must be taken in residence in the UMSL Department of Philosophy.

A GPA of 2.0 or better is required in courses presented for the minor. Prospective minors are encouraged to consult with members of the department for advice in planning an appropriate sequence of courses.

Minor in Law and Philosophy

The undergraduate minor in Law and Philosophy requires five philosophy courses (15 credit hours). At least 6 hours must be at the 3000 level or above. A GPA of 2.0 or better is required in courses presented for the minor. Prospective minors are encouraged to consult with members of the department for advice in planning an appropriate sequence of courses.

PHIL 2252	Crime and Punishment	3
PHIL 4487	Topics In Philosophy Of Law	3
PHIL 1160	Critical Thinking	3
or PHIL 3360	Formal Logic	
Two courses in Philosophy ¹		6
Total Hours		15

¹ PHIL 3000-level or higher courses must be taken in residence in the UMSL Department of Philosophy. In special cases, one of the 3000-level or higher courses may be taken outside of the UMSL Department of Philosophy; the course must (1) have a strong law and philosophy component and (2) have been pre-approved by the Pre-Law advisor.

Minor in Philosophy of Science and Technology (PST)

The Minor in Philosophy of Science and Technology (PST) is an interdisciplinary program requiring a minimum of 18 credits in PST.

All required courses must be completed with a "C" or higher. The satisfactory/unsatisfactory option may not be used. No transfer courses may be used towards the PST Minor. A minimum of 12 hours must be taken at 2000 and above with 9 of those hours being at 3000 or above. Courses in the upper division may satisfy requirements for the student's major, consistently with the major's requirements.

Requirements

Math

Select one of the following courses in either statistics or calculus:		3
BIOL 4122	Biometry	
ECON 3100	Economic Statistics	
MATH 1320	Introduction to Probability and Statistics	
MATH 1800	Analytic Geometry And Calculus I	
PSYCH 2201	Psychological Statistics	
SOC 3220	Social Statistics	

Logic and Methodology

Select one of the following courses in either logic or methodology:		3
ANTHRO 4308	Practicum In Cultural Research Methods	
ANTHRO 4310	Laboratory Methods In Archaeology	
HIST 2999	Introduction to Historical Inquiry	
PHIL 3360	Formal Logic	
PHIL 4460	Advanced Formal Logic	
PSYCH 2219	Research Methods	
SOC 3230	Research Methods	

Philosophy

PHIL 3380	Philosophy Of Science	3
-----------	-----------------------	---

Select one of the following in the philosophy of science and technology: 3

PHIL 2280	Minds, Brains, And Machines
PHIL 2281	Darwinism and the Philosophy of Biology
PHIL 2282	Philosophy of Science in Historical Perspective
PHIL 3380	Philosophy Of Science
PHIL 4452	Feminism And Science
PHIL 4479	Philosophy Of Cognitive Science
PHIL 4480	Topics In Philosophy Of Science
PHIL 4482	Philosophy Of Social Science
PHIL 4483	Topics In History And Philosophy Of Science
PSYCH 3400	Conceptual and Historical Foundations of Psychology

Science

Select 6 credit in the mathematical, physical, life, behavioral, or social sciences. ¹ 6

Total Hours 18

¹ The science courses must be in addition to those satisfying the Gen Ed requirements and conditional upon their acceptance by the PST undergraduate advisor.

Prerequisites

Some courses required by the Minor in PST have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for either satisfying the prerequisites by adding courses to their curriculum or obtaining a waiver from the instructor.

Alternative courses to satisfy the Philosophy requirements

Some courses may satisfy the Philosophy requirement even though they are not listed as such depending on their content. These include variable content courses, courses at the Honors College, history of philosophy courses, and courses in metaphysics. If a course that deals with some aspect of PST and should satisfy a requirement is not listed among those satisfying the requirements, you may do the following:

1. Obtain the description of what the course will cover.
2. Write a very short explanation of why the course ought to count toward satisfaction of the requirement, by showing how it deals with the relevant aspect of PST.
3. Submit both to the PST undergraduate advisor for approval.

Bachelor of Liberal Studies Option:

A minor in PST may be combined with a minor in the History of Science and Technology and a capstone to form a Bachelor of Liberal Studies. The relevant capstones are either or HIST 4999. Since students taking must have taken HIST 2999, it is suggested such students use to satisfy the Logic and Methodology requirement. Students can use the same course to satisfy the Logic and Methodology requirement of both minors, but cannot use the same science courses. Also, students that pursue the Bachelor of Liberal studies combining these two minors must pursue at least one science at an advanced level. Such a Liberal Studies program

is easily combined, in turn, with a major in any science as a double major. This provides the student with a deeper historical and conceptual understanding of the science(s) he or she is studying.

History and Philosophy of Science and Technology Certificate

The undergraduate Certificate Program in History and Philosophy of Science and Technology (HPST) is an interdisciplinary program requiring a minimum of 18 credits in HPST.

All required courses must be completed with a "C-" or higher. The satisfactory/unsatisfactory option may not be used towards the HPST Certificate. A minimum of 12 hours must be taken at 2000 and above with 9 of those hours being at 3000 or above. Courses in the upper division (3000 level and above) may satisfy requirements for the student's major, consistently with the major's requirements.

Requirements

1. History:

Select two of the following courses in History and Technology: 6

ECON 3800	History Of Economic Thought
HIST 2089	Religion, Philosophy & Science in History: Introduction to The Intellectual History Of The West
HIST 2770	Introduction To Transportation
HIST 2772	History Of Aviation In American Life
HIST 2773	Urbanization And Transportation
HIST 4143	Inquiries in World History ¹
PHIL 4483	Topics In History And Philosophy Of Science
PSYCH 3400	Conceptual and Historical Foundations of Psychology

Total Hours 6

2. Philosophy:

PHIL 3380 Philosophy Of Science 3

Select one of the following in the philosophy of science: 3

PHIL 2280	Minds, Brains, And Machines
PHIL 2281	Darwinism and the Philosophy of Biology
PHIL 2282	Philosophy of Science in Historical Perspective
PHIL 3380	Philosophy Of Science
PHIL 4452	Feminism And Science
PHIL 4479	Philosophy Of Cognitive Science
PHIL 4480	Topics In Philosophy Of Science
PHIL 4482	Philosophy Of Social Science
PHIL 4483	Topics In History And Philosophy Of Science
PSYCH 3400	Conceptual and Historical Foundations of Psychology

Total Hours 6

3. Science: Two courses in the mathematical, physical, life, behavioral, or social sciences. The science courses must be in addition to those satisfying the Gen Ed requirements (for students pursuing a degree

at UM St. Louis) and conditional upon their acceptance by the HPST Certificate Undergraduate advisor (6 credit hours).

¹ Note: HIST 4143 is offered under different topics; only the specific topic listed here counts as HPST.

Prerequisites

Some courses required by the Certificate Program in HPST have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for either satisfying the prerequisites by adding courses to their curriculum or obtaining a waiver from the instructor.

Alternative courses to satisfy the History and Philosophy requirements:

Some courses may satisfy either the History or the Philosophy requirement even though they are not listed as such, depending on what their content is. These include but are not listed among those satisfying the requirements, you may do the following:

- Obtain the description of what the course will cover.
- Write a very short explanation of why the course ought to count toward satisfaction of the requirement, by showing how it deals with the relevant aspect of HPST.

Submit both to the HPST undergraduate advisor for approval.

Certificate in Neuroscience

The undergraduate Certificate Program in Neuroscience is an interdisciplinary program requiring 20 credits of training in Neuroscience. The Program provides a group of related courses capped by a research experience. The Program is likely to be of particular interest to students who want to pursue graduate or professional training, but it is intended to appeal to any student interested in Neuroscience.

Courses taken for the certificate in the lower division (1000 and 2000 level) may satisfy general education requirements (that is, breadth requirements), if they are approved general education courses. Courses in the upper division (3000 level and above) may satisfy requirements for the student's major, consistently with the major's requirements. All required courses must be completed with a "B-" average or higher. Pass/Fail grades do not count.

Most courses required by the Certificate Program in Neuroscience have prerequisites. Some students may satisfy prerequisites by virtue of their prior curriculum. When this is not the case, students are responsible for satisfying the prerequisites.

Requirements

The two entry level courses:

BIOL 1831	Introductory Biology: From Molecules To Organisms ¹	5
or BIOL 1012	General Biology	
or BIOL 1102	Human Biology	
PSYCH 2211	Introduction To Biological Psychology	3
Select one of the following statistics courses:		3
BIOL 4122	Biometry	
MATH 1320	Applied Statistics I	
PSYCH 2201	Psychological Statistics	
SOC 3220	Social Statistics	

Electives

Select two of the following: ²		6
BIOL 3102	Animal Behavior	
BIOL 4822	Introduction To Neuroscience	
CHEM 4712	Biochemistry	
CMP SCI 4300	Introduction To Artificial Intelligence	
CMP SCI 4340	Introduction to Machine Learning	
PHIL 2280	Minds, Brains, And Machines	
PHIL 3378	Philosophy of Mind	
PHIL 4478	Topics In Philosophy Of Mind	
PHIL 4479	Philosophy Of Cognitive Science	
PHYSICS 4347	Biophysics Of Imaging	
PSYCH 4300	Introduction To Psychopharmacology: Drugs And Mental Illness	
PSYCH 4314	Behavioral Neuroscience	
PSYCH 4330	Hormones, The Brain And Behavior	
PSYCH 4349	Human Learning And Memory	
PSYCH 4356	Cognitive Processes	
PSYCH 4372	Introduction to Social Neuroscience	
Select at least 3 credits from one or more semesters of research experience ³		3
BIOL 4905	Research	
CHEM 3905	Chemical Research	
CMP SCI 4880	Individual Studies	
PHIL 4450	Special Readings In Philosophy	
PHYSICS 3390	Research	
PSYCH 3390	Directed Studies	
Total Hours		20

¹ BIOL 1831 is strongly recommended, especially for those considering taking BIOL 4822 Introduction to Neurosciences towards their Neuroscience Certificate (BIOL 1831 is a prerequisite for BIOL 4822)"

² At least one elective must be taken outside the student's major

³ This requires completion of a Directed Research Assistantship with a Neuroscience faculty member within any of the participating departments. The research project must be approved in advance by the undergraduate advisor with the assistance of a committee of Neuroscience faculty. It is expected that this research will lead to a presentation of the research (e.g., at the UM-St. Louis Neuroscience seminar or the Undergraduate Research Symposium).

Graduate Studies

Expected Learning Outcomes

- Acquire advanced knowledge of traditional philosophical issues in the western tradition.
- Develop critical thinking skills based on knowledge of the standards governing logical reasoning.
- Acquire familiarity with philosophical issues that arise in some other disciplines (e.g. biology, art, education, etc.).
- Acquire a basic understanding of ethical principles and their role in resolving ethical disputes.

- Acquire the knowledge and skills required to write a paper identifying a philosophical issue and presenting arguments supporting a thesis for resolving it.

Master of Arts in Philosophy

To earn a M.A. in philosophy, students must complete at least 30 hours of graduate-level course work. In addition, students must write a thesis, for which they must take three to six credit hours of Thesis Research. Entering students must demonstrate a competence in logic, either by having passed the relevant course prior to admission or by taking PHIL 5561: Graduate Formal Logic here at UMSL. Students should take PHIL 5400: Proseminar in Philosophy in the first year of residency. At least two-thirds of the course work must be completed in residence at UMSL. In addition, the courses taken are subject to two distribution requirements:

1. At least half of the courses must be at the 5000 level.
2. Two courses (6 credit hours) must be chosen from each of the following four subject areas:
 - Value Theory
 - History of Philosophy
 - Logic/Philosophy of Science
 - Epistemology/Metaphysics

2+3 B.A. and M.A. in Philosophy

The Combined B.A./M.A. Program in Philosophy provides an opportunity for students of recognized academic ability and educational maturity to fulfill integrated requirements of undergraduate and master's degree programs in three years from the beginning of their junior year. When all the requirements of the B.A./M.A. program have been completed, students will be awarded both the B.A. and M.A. degrees. With a carefully designed program, a student can earn both degrees within as few as ten semesters.

The Combined Program requires a minimum of 138 credit hours, of which at least 30 must be at the upper division level course numbers in the 4000-5999 range (excluding PHIL 5495). In qualifying for the B.A., students must meet all university and college requirements, including all the requirements of the regular undergraduate major in philosophy described above. Students will normally take PHIL 3360: Formal Logic and two courses in the 3301-3307: History of Philosophy sequence in their junior years, along with electives. Any courses still needed to satisfy college foreign language and expository writing requirements would also be taken during this year. PHIL 4491: Senior Seminar and more specialized courses are taken in the senior year. In the fifth year, students take advanced electives and such required courses as are needed to fulfill remaining university, Graduate School, and departmental requirements for the M.A. This includes satisfactory completion of 30 graduate credit hours, at least 18 of which must be in courses numbered above 5000 and among which must be at least three in each of the four subject areas listed for the regular M.A. program, and one of which must be PHIL 5400: Proseminar in Philosophy. Up to 12 graduate credit hours may be applied simultaneously to both the B.A. and M.A. requirements. In addition to the above coursework, students must also write a thesis, in which case at least three hours must be taken in PHIL 5495. Students should apply to the Graduate Committee for admission to the Combined B.A./M.A. Program in Philosophy the semester they will complete sixty undergraduate credit hours or as soon thereafter as possible. It is also recommended that students complete the foreign language requirement and the junior-level writing requirement before applying. A cumulative grade point average of 3.0 or higher and three letters of recommendation from faculty are required for consideration.

Students should apply to the Graduate Committee for admission to the Combined B.A./M.A. Program in Philosophy the semester they will complete sixty undergraduate credit hours or as soon thereafter as possible. It is also recommended that students complete the foreign language requirement and the junior-level writing requirement before applying. A cumulative grade point average of 3.0 or higher and three letters of recommendation from faculty are required for consideration.

Students will be admitted to the Combined Program under provisional status until they have completed fifteen credit hours in it with a grade point average of 3.0 or higher. After the completion of the provisional period, and with the recommendation of the Graduate Committee, students can be granted full admission into the program. Students must maintain a grade point average of 3.0 or higher throughout the Combined Program. Students who officially withdraw from the Combined Program who have successfully completed all the requirements for the B.A. degrees will be awarded the B.A. degree.

Philosophy Requirements for Students in the 2+3 Program

1. To be taken in the junior year:
Select four courses (12 credit hours) from the following:
 - a. PHIL 3360: Formal Logic
 - b. Two courses in the History of Philosophy, each at the 2000 level or above.
 - c. One additional Philosophy course, at the 2000 level or above.
2. To be taken in the senior year:
3.

PHIL 4491	Senior Seminar	3
PHIL 4445	Metaphysics	3
or PHIL 4440	Theories Of Knowledge	
Two History courses, each at the upper division		6
One course from the PHIL 4470-PHIL 4487 sequence		3
Select one of the following:		3
PHIL 4430	Social And Political Philosophy	
PHIL 4435	Classical Ethical Theory	
PHIL 4438	Recent Ethical Theory	
Total Hours		18
4. To be taken in the final year of the program:
Six courses (18 credit hours)
 - a. At least five of these courses must be at or above the 5000 level.
 - b. Courses must be selected so that the student has taken at least one and preferably two courses from each of the four subject areas in the course of completing the 2 + 3 program:
 - Value Theory
 - History of Philosophy
 - Logic/Philosophy of Science
 - Epistemology/Metaphysics
 - c. PHIL 5400: Proseminar in Philosophy

Cooperative arrangement with Saint Louis University.

The strengths of the UMSL Department of Philosophy are complemented by those of the Saint Louis University Philosophy Department, which has strengths in the history of philosophy as well as in philosophy of religion. To enhance students' opportunities for instruction and expertise, the two departments have worked out a cooperative arrangement that permits

graduate philosophy students on each campus to take up to four courses at the partner institution. In any given semester, UMSL graduate students must take at least half of their courses at their home institution. Students admitted to the M.A. program on a probationary basis must take all their courses at UMSL during their first semester.

Sample Four Year Plan

First Year		
Fall	Hours Spring	Hours
INTDSC 1003 ¹	1 PHIL 1111	3
ENGL 1100	3 CORE – Communication Proficiency	3
MATH 1020 or 1030	3 EXPLORE – Social Sciences	3
PHIL 1110 ⁰	3 EXPLORE – Math & Sciences	3
Foreign Language 1001	5 Foreign Language 1002	5
	15	17
Second Year		
Fall	Hours Spring	Hours
PHIL 1130 ²	3 PHIL 1160 or 3360	3
Foreign Language 2101	3 EXPLORE – Social Sciences	3
CORE – Information Literacy	3 EXPLORE – Math & Sciences	3
CORE – US History & Government	3 Cultural Diversity Requirement	3
EXPLORE – Math & Sciences	3 Elective or minor	3
	15	15
Third Year		
Fall	Hours Spring	Hours
PHIL 3301	3 PHIL 3303, 3305, or 3305	3
PHIL 3374, 3378, or 3380	3 PHIL 4440	3
ENGL 3100	3 EXPLORE – Humanities & Fine Arts	3
EXPLORE – Social Sciences	3 2000+ level elective or minor	3
Elective or minor	3 Elective or minor	3
	15	15
Fourth Year		
Fall	Hours Spring	Hours
PHIL 4430, 4435, or 4438	3 PHIL 4491	3
PHIL 4445	3 PHIL 2000+ Elective	3
2000+ elective or minor	9 Elective or minor	7
	15	13
Total Hours: 120		

¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 24 college credits.

² 1000-level Philosophy courses may be used toward the General Education Humanities requirement.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Courses

PHIL 1021 Choice and Chance: 3 semester hours

Same as MATH 1021. Prerequisites: A satisfactory score on the UMSL ALEKS Math Placement Examination, obtained at most one year prior to enrollment in this course. This course provides an introduction to inductive logic and the theory of probability in an organized and systematic way, so as to give students tools for more effective decision-making. We will introduce the probability calculus, basic concepts of utility theory, decision theory and different approaches to understanding probability. This course is designed to be accessible to students of all levels. Satisfies mathematics proficiency.

PHIL 1030 Present Moral Problems: 3 semester hours

This course will explore a range of ethical dilemmas with an eye towards living the best life. How should I live? What actions are right and wrong? How should I treat myself and others? In this class, we will consider these and other issues by investigating practical problems in daily life including: human rights, the environment, hunger and poverty, war and violence, racial and ethnic discrimination, gender roles and marriage, abortion, and euthanasia,.

PHIL 1050 Existentialism and Phenomenology: 3 semester hours

The course will cover classic works by philosophers and writers in the existential and phenomenological traditions. Topics include free will, existential crisis, despair, anxiety, faith, the death of God, the origin of morals, authentic life, as well as the structure and content of conscious experience.

PHIL 1090 Philosophy Looks at the Arts: 3 semester hours

This online course will explore the distinct resources of various arts - the raw materials of each, what each can represent, express, convey - and key differences among them. After an introductory unit devoted to art in general, the course will present eight units examining the arts of painting, photography, sculpture, architecture, music, literature, drama, and film. The course will employ a variety of instructional materials. These include posted essays, streaming video, readings from an assigned text, and participation on an interface discussion board.

PHIL 1091 Great Philosophers: 3 semester hours

This online course introduces philosophy through a survey and examination of the ideas of fifteen of the most important figures in the history of the subject. From Socrates to Nietzsche, the questions, answers, and lives of the great philosophers are explored in a multimedia context. This course does not satisfy any of the requirements for philosophy major or minor.

PHIL 1110 Western Philosophy I: Antiquity To The Renaissance: 3 semester hours

Lectures and discussions tracing the development of western philosophy from its beginnings among the pre-Socratics through the Middle Ages and Renaissance. Philosophical ideas will be examined in the cultural and historical context: the Greek city-state, the rise of Christianity, etc.

PHIL 1111 Western Philosophy II: Descartes to the Present: 3 semester hours

Lectures and discussions on the development of western philosophy from Descartes (1596-1650) to the present. Philosophical ideas will be examined with an eye to their historical and cultural setting: the rise of modern science, the industrial revolution, the rise of capitalism, etc.

PHIL 1120 Asian Philosophy: 3 semester hours

Critical study of selected philosophical classics of India and China. This course fulfills the cultural diversity requirement.

PHIL 1125 Islamic Philosophy: 3 semester hours

An introduction to arabic philosophy in the islamic classical period (roughly from the mid-ninth through the twelfth centuries). We consider the philosophical and theological background, and then examine the thought of such notable Islamic philosophers as al-Kindi, Ibn Sina, al-Ghazali, and Ibn Rushd. Topics treated typically include proofs for the existence of God, whether the world is eternal or had a beginning, the nature of the soul and whether it is immortal, and the distinction between essence and existence. This course fulfills the cultural diversity requirement.

PHIL 1130 Approaches to Ethics (MOTR PHIL 102): 3 semester hours

A study and discussion of representative topics in moral philosophy such as moral skepticism, moral objectivity, theories of obligation and value, evaluation of social institutions and the relation between morality and science. Traditional and contemporary writers will be considered.

PHIL 1150 Introduction to Philosophy (MOTR PHIL 100): 3 semester hours

A study and discussion of representative topics in philosophy such as free will and determinism, concepts of mind and body, the basis of value judgments, knowledge and belief, and the possibility of constructing a world view.

PHIL 1151 Love 101: 3 semester hours

A critical review of what media personalities, philosophers, criminal justice experts, medical experts, neuroscientists, and psychologists have said about love and its place in our lives. Included will be such topics as the neuroscience of love, love across culture, love and commitment issues, marriage and the "seven-year itch," jealousy, domestic violence, and verbal abuse. Larger questions will include the role of love in the good life; the ethics of love; the psychological consequences of obsession, breakups and divorce; arranged marriages vs. freely chosen love; and the morality of laws that affect relationships between loving partners.

PHIL 1160 Critical Thinking (MOTR PHIL 101): 3 semester hours

An introduction to the language and logical structure of arguments, the principles of sound reasoning, and application of these principles in a variety of contexts.

PHIL 1178 Superhuman Mind: 3 semester hours

As a study of people with special neurological talents, this course will look at cases of people who became geniuses by accident, human echolocation (deaf people who can detect sound), lucid dreaming, telepathy used to solve crimes, and more.

PHIL 1180 Science vs. God: 3 semester hours

This course examines whether religion and science are compatible, discusses the science-religion debate historically, and broaches philosophical issues surrounding belief, especially whether belief should be based in empirical evidence or in faith. Following these introductory course sessions, the class will discuss, in detail, topics in science and religion, including creation versus evolution; human nature (including abortion and stem cell research); the nature of sexuality and gender; the science of religion; morality; the environment from a religious perspective; meaningfulness in the universe; and finally, evidence for or against the afterlife, existence of a divinity, and divine providence.

PHIL 1185 Philosophy of Religion: 3 semester hours

A philosophical investigation of such problems as the nature of religious faith and experience, the relation of faith and reason, alternative concepts of deity and the problem of evil.

PHIL 2249 Accounting Ethics: 3 semester hours

The course is a study of moral problems as they relate to the profession of accounting. We will analyze a number of major cases (Enron, HealthSouth, etc.) in which accounting lapses were involved, and we will look at general moral theories which might illuminate these problems. A major component of the course work will be writing essays which address specific moral dilemmas which have arisen or might arise for accountants. The course is primarily online, but there will be five required 75-minute class meetings spread through the semester.

PHIL 2250 Philosophy and Current Issues: 3 semester hours

A careful examination of such current social controversies as women's liberation, the ethics of abortion, public accountability of holders of high offices, and the subtler forms of racism and other prejudices. Although there is no formal prerequisite, it is recommended that students have taken, or be concurrently enrolled in, at least one other philosophy course.

PHIL 2251 Sexual Ethics: 3 semester hours

A critical review of what philosophers, both classical and contemporary, have said about sexual experience and its place in our lives. Included will be such topics as sexual desire, sexual perversion, love and commitment, marriage and adultery, larger questions might include that role of sexual experience in the good life, issues of sexual privacy, and the morality of laws which regulate sexual activity.

PHIL 2252 Crime and Punishment: 3 semester hours

Same as CRIMIN 2252. This course will address fundamental conceptual, ethical, and moral issues that arise in the context of the legal system. Topics may include punishment, pre-trial detention, the death penalty, acquittal of persons who are legally guilty, plea bargaining, moral obligation to obey the law, and laws restricting civil liberties.

PHIL 2253 Philosophy and Feminism: 3 semester hours

Same as GS 2253. A critical examination of what various philosophers have said about issues of concern to women. Sample topics include oppression, racism, women's nature, femininity, marriage, motherhood, sexuality, pornography, the ethics of care.

PHIL 2254 Business Ethics: 3 semester hours

A critical survey from the perspective of moral theory of businesses and business practices. Topics vary but usually include some of the following: Whether the sole moral obligation of businesses is to make money; whether certain standard business practices, e.g., the creation of wants through advertising, are moral; whether businesses ought to be compelled, e.g., to protect the environment or participate in affirmative action programs.

PHIL 2255 Environmental Ethics: 3 semester hours

Examines such issues as the value of wilderness, our duties to animals and the natural world, pollution and development, environmental justice.

PHIL 2256 Bioethics: 3 semester hours

Same as GERON 2256. An examination of ethical issues in health care practice and clinical research and in public policies affecting health care. Topics include: abortion, euthanasia, health care, experimentation, informed consent and the right to health care.

PHIL 2257 Happiness and the Meaning of Life: 3 semester hours

This course is an accessible introduction to the historical and contemporary perspectives on happiness and the meaning of life in philosophy. It examines the nature of happiness by focusing on three major theories: happiness as pleasure, happiness as excellence and happiness as desire satisfaction. Other issues examined may include the relevance of virtue for happiness, the experience machine argument, the best way to pursue happiness as a personal or a policy goal, and other related topics.

PHIL 2258 Medicine, Values, and Society: 3 semester hours

Social, conceptual, and policy issues connected with medicine form the focus of the course. Topics may include: (1) role played by race & gender in design of research and distribution of care; (2) whether diseases are socially constructed categories reflecting the values of society; (3) development of social policies that offer universal access to health care; (4) the legitimacy of using psychotropic drugs to enhance life, rather than treat the disease. The course differs from Bioethics by emphasizing policy issues and their conceptual basis. Content of this course may vary.

PHIL 2259 Engineering Ethics: 3 semester hours

An examination of ethical issues in engineering using professional engineering codes as a starting point. The course will have a problem solving orientation, focusing on the analysis of particular cases. Actual high-profile cases such as the Challenger disaster will be considered, as well as hypothetical cases illustrating the more commonly encountered moral problems in engineering (such as accepting gifts from vendors). Topics include the engineer/manager relationship, engineers and the environment, honesty in engineering, and risk, safety, and liability.

PHIL 2276 Philosophy of Film: 3 semester hours

Critical study of such issues as film's relation to photography, shots and editing, documentary vs. fiction films, cinematic narration, our identification with film characters, criticism and evaluation.

PHIL 2277 Philosophy and Food: 3 semester hours

This course will examine issues surrounding the production, consumption, and enjoyment of food. Questions about food choices, food scarcity, self-control, and aberrant eating will be addressed. The focus will range from global issues such as population growth, the carrying capacity of the planet, famine, and GMO crops to more narrowly focused topics such as the workings of our sense of taste, our ability to evaluate and rank different food items, and the very idea of expertise in tasting.

PHIL 2280 Minds, Brains, and Machines: 3 semester hours

An introduction to basic philosophical issues in cognitive science. General topics include minds as computers; computers as minds, or the possibility of artificial intelligence that is truly intelligent; relationship between mental function and brain function. Some areas of current research, such as reasoning, vision, and emotion.

PHIL 2283 Markets and Morals: 3 semester hours

Prerequisites: MATH 1030, or equivalent. This course will explore some moral issues connected with economic markets: the reasons for and against promoting free markets and free trade; whether we should be able to buy and sell anything or are there goods and services that should be above market transactions; whether free markets make us happier; how free markets are related to individual freedom; whether the efficacy of markets requires individuals to be moral; what moral grounds there are, if any, for capitalism, libertarianism, socialism, and Marxism.

PHIL 2380 Ethics in Science: 3 semester hours

This course provides an overview of ethical issues in the practice of the sciences. Students will be introduced to basic concepts and theories of ethics and will apply them to contemporary and historical cases.

PHIL 3286 International Business Ethics: 3 semester hours

Same as INTL BUS 3286. The course will deal with moral issues that are raised by the increasing globalization of business. Apart from the general issue of whether this globalization is itself a good thing, we will discuss such issues as child labor, working conditions, safety standards, environmental policies, bribery and other "corrupt" practices, respect for intellectual property, etc. Frequent short papers will be assigned.

PHIL 3301 Ancient Philosophy: 3 semester hours

Freshman admitted by consent of department. The principle philosophical doctrines of the ancient world, with special emphasis on the philosophies of Plato and Aristotle. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

PHIL 3302 Medieval Philosophy: 3 semester hours

A critical study of the important philosophies of the period from August to the Renaissance. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

PHIL 3303 Early Modern Philosophy: 3 semester hours

Principal figures in the development of rationalism, empiricism and skepticism in early modern Europe, from Descartes through Hume. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

PHIL 3304 Kant and Nineteenth Century Philosophy: 3 semester hours

Study of Kant and such major nineteenth century figures as Hegel and Nietzsche, Mill and Pierce. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

PHIL 3305 Twentieth Century Philosophy: 3 semester hours

Representative topics in contemporary philosophy, with readings selected from pragmatism, logical positivism, linguistic analysis and existentialism. Although there is no formal prerequisite, it is recommended that students have taken at least one other philosophy course.

PHIL 3307 American Philosophy: 3 semester hours

Prerequisite: Six hours of philosophy or consent of instructor. A study of selected American philosophers.

PHIL 3327 Race and Racism: 3 semester hours

This course will investigate the concepts of race and racism through an examination of metaphysical, psychological, ethical, and political problems associated with race.

PHIL 3360 Formal Logic: 3 semester hours

An introductory study of logical truth and deductive inference, with emphasis on the development and mastery of a formal system.

PHIL 3369 The Marxist Heritage: 3 semester hours

Same as POL SCI 3690. Study of Marx and leading Marxists, designed to evaluate their influence on recent political, economic, and social thought and institutions.

PHIL 3374 Philosophy of Art: 3 semester hours

Same as ART HS 3374. A critical study of such issues as the definition of art, the nature of aesthetic experience, meaning and interpretation in the arts, art and emotion, value in art.

PHIL 3378 Philosophy of Mind: 3 semester hours

Prerequisites: Three hours of philosophy or consent of instructor. An introduction to philosophical issues pertaining to the mind. Topics may include how the mind relates to the body, how the mind represents the world, how the mind works, consciousness, and free will.

PHIL 3380 Philosophy of Science: 3 semester hours

An examination of science: what makes science special? Topics may include (but are not limited to): empiricism and of induction; paradigms and revolutions; explanation, causation and laws; realism versus instrumentalism; critiques of science such as those of feminism or postmodernism; and reductionism - ultimately is it all just physics?.

PHIL 4401 Plato: 3 semester hours

Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. A study of selected Platonic dialogues.

PHIL 4402 Aristotle: 3 semester hours

Prerequisites: Six hours of philosophy, a course in Ancient Philosophy recommended, graduate standing, or consent of instructor. A selective study of Aristotle's major works.

PHIL 4406 Empiricism: 3 semester hours

Prerequisites: Six hours of philosophy, a course in Early Modern philosophy recommended, graduate standing, or consent of instructor. An examination of the philosophies of such major figures as Locke, Berkeley, and Hume.

PHIL 4407 Kant: 3 semester hours

Prerequisites: Six hours of philosophy, PHIL 3304 or equivalent recommended, graduate standing or consent of instructor. A systematic study of the Critique of Pure Reason.

PHIL 4408 Hegel: 3 semester hours

Prerequisites: Six hours of philosophy, PHIL 3304 or equivalent recommended, graduate standing, or consent of instructor. A critical study of the writings and influence of Hegel.

PHIL 4410 Topics and Figures in the History of Philosophy: 3 semester hours

Prerequisites: Nine hours of philosophy, graduate standing, or consent of instructor. In-depth examination of a particular topic, significant figure or philosophical movement from the history of philosophy. The philosopher or movement to be studied will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and department chair.

PHIL 4420 Topics in Non-Western Philosophy: 3 semester hours

Prerequisites: PHIL 1120, graduate standing or consent of instructor. An extensive exploration of issues in some particular non-Western tradition (Islamic, Indian, or Chinese). This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 4421 The Analytic Tradition: 3 semester hours

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. PHIL 3305 and PHIL 3360 strongly recommended. Course studies in depth the development of analytic philosophy with a broad emphasis on its style and substance. Topics may include early writings that set the stage for this tradition (Frege, Moore, Russell), the basic texts of Logical Positivism (Carnap, Schlick, Neurath, Hempel), and later responses including reassessment of the doctrine, the revival of naturalism, and the "death" of philosophy (Wittgenstein, Quine, Sellars). This is a variable content course that may be taken again for credit with consent of the instructor and the department chair.

PHIL 4430 Social and Political Philosophy: 3 semester hours

Prerequisites: Six credit hours of philosophy required or consent of instructor. This course will cover several classic works of political theory, with a particular focus on the nature of justice, the proper extent of liberty, and social contract arguments for the legitimacy of state authority. Readings from Plato, Hobbes, Locke, Hume, Rousseau, Bentham, Mill, Marx and Rawls.

PHIL 4435 Classical Ethical Theory: 3 semester hours

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. Significant contributions to moral philosophy from Plato and Aristotle to Bentham and Mill.

PHIL 4437 Metaethics: 3 semester hours

Prerequisites: Six credit hours of Philosophy. This course deals with questions regarding the foundations of ethics and the status of our ethical judgments about what's right and wrong, good and bad. The course will consider contemporary approaches to issues such as moral motivation, moral reasons, moral explanations, moral disagreement, moral knowledge, and moral supervenience, as well as various debates between realists and antirealists, and between cognitivists and expressivists.

PHIL 4438 Recent Ethical Theory: 3 semester hours

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. A study of major contributions to twentieth-century ethics, including works by such writers as Moore, Dewey, Ross, Stevenson, Hare, and Rawls.

PHIL 4439 Topics in Ethical Theory: 3 semester hours

Prerequisites: PHIL 4435, PHIL 4438, nine hours of philosophy, graduate standing, or consent of instructor. Formulation and evaluation of major theories in normative ethics, metaethics, and axiology. Topics include: egoism, moral realism, act and rule utilitarianism, and varieties of naturalism and non-naturalism in ethics. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

PHIL 4440 Theories of Knowledge: 3 semester hours

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. An examination of concepts and problems involved in the characterization of knowledge. Specific topics will vary, but will usually include knowledge, belief, skepticism, evidence, certainty, perception, truth, and necessity.

PHIL 4445 Metaphysics: 3 semester hours

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. An examination of selected metaphysical topics such as substance, universals, causality, necessity, space and time, free will, being, and identity.

PHIL 4450 Special Readings in Philosophy: 1-3 semester hours

Prerequisite: Consent of department. Independent study through readings, reports, and conferences. This is a content course and may be taken again up to a total of 6 credit hours with consent of instructor and department chair.

PHIL 4451 Special Topics in Philosophy: 3 semester hours

Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. A critical study of classical and/or contemporary contributions to a selected topic in philosophy. The topic to be considered will be announced prior to registration. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

PHIL 4458 Ethics and the Computer: 3 semester hours

Prerequisites: Six hours of coursework above the level of MATH 1030 in Math/Computer Science or at least six hours of philosophy or consent of instructor. An examination of ethical issues concerning the use of computers generally and software engineering in particular. Aims at developing awareness of these issues, and skills for ethical decision-making regarding them through careful, analytical methods. Typical issues include privacy, intellectual property, computer fraud, and others.

PHIL 4460 Advanced Formal Logic: 3 semester hours

Prerequisites: PHIL 3360, graduate standing, or consent of instructor. Rigorous study of major developments in contemporary logic. Emphasis is given to theoretical problems and some attention is devoted to philosophical issues arising from logic.

PHIL 4465 Theory of Decisions and Games: 3 semester hours

Same as POL SCI 4060. Prerequisites: Six hours of Philosophy and junior standing, or POL SCI 6401 (or the equivalent) or consent of the instructor. A study of rational decision-making, including games against nature, zero-sum games, and social choices. Topics will include the following: expected utility maximization, the Prisoner's Dilemma, Nash equilibria, and Arrow's theorem on the impossibility of a social welfare function. Parts of the course are technical in nature; a prior course in mathematics (e.g., finite mathematics, calculus, statistics or an economics course with a mathematical component), symbolic logic, or some other course with comparable mathematical content.

PHIL 4474 Topics in Aesthetics: 3 semester hours

Prerequisites: PHIL 3374, graduate standing or consent of instructor. Selected topics, such as vision and representation, musical aesthetics, and recent theorists. This is a variable content course that may be taken again for credit with the approval of the instructor and the department chair.

PHIL 4478 Topics in Philosophy of Mind: 3 semester hours

Prerequisites: PHIL 3378 or six hours of other philosophy courses or consent of instructor. An examination of selected topics at the interface of philosophical and psychological research. This is a variable content course and can be taken again for credit with the consent of the instructor and the department chair.

PHIL 4479 Philosophy of Cognitive Science: 3 semester hours

Prerequisites: PHIL 3378 or PHIL 4478 or nine hours of other philosophy courses or consent of instructor. An exploration of the philosophical foundations of cognitive science, a cooperative effort of philosophers, cognitive psychologists, brain scientists, computer scientists, and others to understand the relationship between the mind and the brain.

PHIL 4480 Topics in Philosophy of Science: 3 semester hours

Prerequisites: Consent of the instructor. An advanced introduction to the philosophy of science for advanced undergraduates in philosophy and graduate and professional students. Topics covered include scientific method, confirmation, explanation, the nature of theories, scientific progress, science criticism, ethics in science, and science and religion.

PHIL 4487 Topics in Philosophy of Law: 3 semester hours

Same as CRIMIN 4487. Prerequisites: CRIMIN 1100 and three hours of philosophy, graduate standing, or consent of instructor. An intensive study of recent philosophical debate about such issues as the authority of law, legal equality and justice, legal responsibility, self-determination and privacy, and legal punishment. This is a variable content course and may be taken again for credit with consent of the instructor and the department chair.

PHIL 4491 Senior Seminar: 3 semester hours

Prerequisites: Senior standing; at least 12 hours of philosophy at the 2000 level or above; or consent of instructor. Intensive study of a central philosophical problem. The course emphasizes the fundamentals of philosophical writing and scholarship. Students will write a major paper to be evaluated by two members of the Philosophy Department and the course instructor.

PHIL 5400 Proseminar in Philosophy: 3 semester hours

Prerequisites: Graduate standing. Required of all entering Graduate Students in the Fall Semester of the first full year of residency. Topics vary. Other graduate students may take this course with the permission of the instructor and the director of Graduate Studies in Philosophy. Students will be expected to write papers, give presentations, and join in class discussion.

PHIL 5403 Seminar on Themes in the History of Philosophy: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. Close study of selected topics, texts, or school of thought in the history of philosophy. Topics may include but are not limited to historical theories of science, Hellenistic philosophy, Neoplatonism, and historical approaches concerning the nature of time. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

PHIL 5410 Seminar in Significant Figures in Philosophy: 3 semester hours

Prerequisites: Graduate standing. In depth study of the work of a single philosopher. The philosopher selected will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5478 Seminar in Philosophy of Mind: 3 semester hours

Prerequisites: Graduate standing. Topics may include functionalism and physicalism; representation and the nature of propositional attitudes such as belief, desire, and the various emotions; folk psychology and knowledge of other minds; introspection and knowledge of one's own mind; conscious and unconscious mental states and processes. This is a variable content course and may be taken again for credit with consent of the instructor and the department chair.

PHIL 5495 Thesis Research: 1-3 semester hours

Prerequisites: Graduate standing or consent of instructor. May be repeated once for credit with the consent of the instructor and the department chair.

PHIL 5521 Seminar in Analytic Philosophy: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. Intensive study of selected topics, texts, or individuals in historical or contemporary analytic philosophy. Topics may include, but are not limited to, Frege semantics, Russell's theory of definite descriptions, logical positivism, Wittgenstein's philosophy of language, Quine on the analytic/ synthetic distinction, Kripke possible-world semantics, theories of propositions, the analysis of knowledge, contextualism in epistemology and language, relative semantics, epistemic two-dimensionalism, conceivability vs. possibility, three-dimensionalism vs. four-dimensionalism, presentism vs. eternalism, and applications of core concepts in other areas of philosophy. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

PHIL 5530 Seminar in Social and Political Philosophy: 3 semester hours

An intensive study of contemporary philosophical debate about such issues such as civil liberty, economic justice, political decision-making, and state authority. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5533 Philosophy of Law: 3 semester hours

Same as CRIMIN 5533. Prerequisite: Graduate standing or consent of instructor. Examination of origins of law and the basis for legal obligation. Specific consideration of the justification of punishment, morality and law, and legal reasoning.

PHIL 5537 Seminar in Metaethics: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. The course deals with questions regarding the foundations of ethics and the status of our ethical judgements about what's right and wrong, good and bad. The course will consider contemporary approaches to issues such as moral motivation, moral reasons, moral explanations, moral disagreement, moral knowledge, and moral supervenience, as well as various debates between realists and antirealists, and between cognitivists and expressivists.

PHIL 5538 Seminar in Ethical Theory: 3 semester hours

Prerequisites: Graduate standing or consent of the instructor. In this course we will seek to answer questions from normative ethics or metaethics, which may include: What do all morally wrong actions have in common? What does the word "wrong" mean? How, if at all, can we verify moral judgements? Are any moral judgements valid for all societies? Do we always have good reason to be moral?.

PHIL 5540 Seminar in Epistemology: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. Close study of selected topics, texts, or individuals in epistemology. Topics may include (but are not limited to) theories of justification, naturalism in epistemology, and conceptions of knowledge. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5545 Seminar in Metaphysics: 3 semester hours

Prerequisites: Graduate standing. Intensive study of a selected topic or problem area in metaphysics, e.g. mind-body identity, nature of the self, or conception of time. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5551 Special Readings in Philosophy: 1-3 semester hours

Prerequisites: Graduate Standing, written consent of instructor. Independent study through readings, reports, and conferences. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5560 Seminar in Logic: 3 semester hours

Prerequisites: Graduate standing. A focused study of topics in logic and/or its history. Representative topics include: Aristotelian logic, modal logic, the Godel incompleteness theorems, relevance logic, paraconsistent logic, free logic. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5561 Graduate Formal Logic: 3 semester hours

Prerequisite: Graduate standing; permission of the department. A rigorous introduction to formal logic that includes sentential calculus, predicate logic, and completeness proofs. May be taken for graduate credit only with permission of the graduate advisor and chair.

PHIL 5579 Seminar in Philosophy of Cognitive Science: 3 semester hours

Prerequisites: Graduate standing. General topics include the role of computation in cognitive science, the merits of symbolic computation and connectionism, the aims and methods of artificial intelligence, and the relationship between cognitive science and our everyday understanding of people. Specific topics may include perception, reasoning, consciousness, language, emotion, and will. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

PHIL 5580 Seminar in Philosophy of Science: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. Focus is on recent issues and controversies. Topics may include: theories and observation, models of explanation, confirmation, realism and antirealism, empiricism & naturalism, "social construction" and feminist views of science. This is a variable content course and may be taken again with the consent of the instructor and the department chair.

PHIL 5582 Seminar in Philosophy of Social Science: 3 semester hours

Prerequisites: Graduate Standing or consent of instructor. Intensive examination of selected topics, such as the nature of explanation in social science, rationality, value-freedom and objectivity, or relation of social to natural sciences. This is a variable content course and may be taken again for credit with consent of instructor and department chair.

PHIL 5590 Philosophical Issues in Other Disciplines: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. An examination of selected philosophical issues in disciplines other than philosophy. One or more such disciplines as history, political science, psychology, sociology, biology, chemistry, physics, or mathematics will be chosen. The discipline(s) and issues selected will be announced prior to registration. This is a variable content course and may be taken again for credit with the consent of the instructor and the department chair.

Physics and Astronomy

General Information

The Department's faculty members have a diversity of interests and are active in various experimental and theoretical research areas. Students successfully completing this program will obtain an understanding of basic physics concepts, mathematical and problem-solving skills needed to solve basic physics problems, experimental skills in physics, astrophysics, or biophysics, and the ability to analyze and interpret scientific data and write scientific papers or reports.

Degrees and Areas of Concentration

The Department of Physics and Astronomy offers superb course work leading to the following baccalaureate degrees:

- B.A. in Physics
- B.S. in Physics with emphasis areas of
 - Astrophysics
 - Engineering Physics
 - General Physics
 - Biophysics
 - Optical Biophysics
- B.A. or B.S. in Physics with Master's Level Coursework for Secondary Teacher Certification
- B.S. in Secondary Education with Emphasis in Physics.

The Department of Physics and Astronomy also offers the following graduate degree programs:

- Master of Science in Physics: The M.S. program combines a sound basis in the fundamental areas of classical and modern physics from both a theoretical and an applied perspective. The program is designed to enable students with undergraduate backgrounds in physics or other technical areas to further their professional development and maintain and improve their technical development. Students receiving a M.S. in physics will obtain an understanding of advanced physics concepts and mathematical and problem-solving skills needed to solve advanced physics problems. Students are strongly encouraged to be involved with faculty research programs that will develop experimental skills in physics, astrophysics, or biophysics as well as experience in analyzing and interpreting

scientific data and the writing of scientific papers, reports, or theses. The writing of a thesis is optional.

- **Ph.D. in Physics:** The Ph.D. degree is offered in cooperation with the Missouri University of Science and Technology Physics Department. Students must satisfy the Missouri S&T admission standards, and the Missouri S&T Qualifying Exam in Physics is required of University of Missouri-St. Louis Ph.D. students. However, all course work and dissertation research may be completed while the student is in residence at UMSL. In addition to obtaining an understanding of advanced physics concepts and mathematical and problem-solving skills needed to solve advanced physics problems, Ph.D. students are expected to conduct independent scientific research in physics, astrophysics, or biophysics while learning to analyze and interpret scientific data and write scientific papers, reports, and a dissertation.

Fellowships and Scholarships

The Department of Physics and Astronomy offers a number of scholarships and awards.

- **Physics & Astronomy Alumni Scholarship** is available to new physics majors with outstanding ACT or SAT scores or continuing physics majors with outstanding academic records.
- The **Richard D. Schwartz Scholarship** is available to full-time junior/senior physics majors in good standing.
- The **Don C. and Susan P. Winter Endowed Scholarship** in Physics & Astronomy is available to physics majors with a minimum ACT score of 24 or who have a minimum GPA of 3.0.
- The **Pierre Laclède/Physics & Astronomy Alumni Scholarship** for undergraduate physics majors is available to physics majors who are also accepted into the Pierre Laclède Honors College.
- The **Junior Alumni Award** is awarded to physics majors who attain a 3.5 average or better in Physics 2111 and 2112. The award is given to the student in the semester they enroll in Physics 3200. Transfer students must take Physics 2112 on this campus to be eligible for this scholarship.
- The **Senior Alumni Award** is given to the outstanding physics major at the senior level with the highest GPA among the senior class.
- The **Jeffrey Earl Award** is given to an outstanding graduating senior every May.
- **Undergraduate Research Awards** are available for undergraduate physics majors who conduct a research project with a faculty mentor. Students receiving this award are required to enroll for at least one credit hour of Physics 3390 and present their research results at the campus Undergraduate Research Symposium in April.
- **Teaching Assistantships** with stipends may also be available to qualifying students to prepare them for the independent effort required in industry or graduate school.
- **NASA Research Internships** for the summer and academic year are available for students interested in astrophysics through the NASA/Missouri Space Grant Consortium.

Departmental Honors

The Department of Physics & Astronomy will award departmental honors to those B.A. and B.S. degree candidates in Physics with an overall grade point average of 3.2 or better. They must also successfully complete at least 3 credits of PHYS 3390 (Research).

Career Outlook

Many of our students have been successful in subsequent graduate studies in astrophysics and meteorology, as well as physics. Our alumni have pursued graduate studies and earned doctorate degrees at institutions such as Cornell University, MIT, University of Wisconsin, University of Chicago and Washington University. Students who have elected for careers in industry are now working in a variety of settings for such firms as Emerson Electric, Hewlett Packard, IBM, Boeing and MEMC Electronic Materials (now SunEdison). Several former students are currently teaching physics in high schools around the St. Louis area.

Undergraduate Studies

General Education Requirements

Majors must complete the university and college general education requirements (p. 41). Any of the following courses may be used to satisfy the physical science requirement:

ASTRON 1001	Cosmic Evolution Introductory Astronomy (MOTR ASTR 100L)	4
ASTRON 1001A	Cosmic Evolution/Introduction Astronomy (MOTR ASTR 100)	3
ASTRON 1011	Planets and Life in the Universe	3
ASTRON 1012	The Violent Universe and the New Astronomy	3
ASTRON 1050	Introduction to Astronomy I (MOTR ASTR 100)	3
ASTRON 1051	Introduction to Astronomy II	3
ATM SCI 1001	Elementary Meteorology	4
GEOL 1001	General Geology	4
GEOL 1001A	General Geology	4
GEOL 1002	Historical Geology	4
GEOL 1002A	Historical Geology Lecture	3
PHYSICS 1001	How Things Work (MOTR PHYS 100)	3
PHYSICS 1011	Basic Physics I (MOTR PHYS 150L)	4
PHYSICS 1011A	Basic Physics I (MOTR PHYS 150)	3
PHYSICS 1012	Basic Physics II	4
PHYSICS 1012A	Basic Physics II	3
PHYSICS 2111	Physics: Mechanics and Heat (MOTR PHYS 200L)	5
PHYSICS 2112	Physics: Electricity, Magnetism, and Optics	5

Undergraduate Studies

Declaring the Physics Major

Students seeking to major in physics are first designated as 'pre-physics majors' until they have completed both PHYSICS 2111 and PHYSICS 2112 or equivalent courses. Upon successful completion of PHYSICS 2111 and PHYSICS 2112 with grades of C or better, students will be allowed to declare physics as their major. Each of these courses must be completed successfully within two attempts.

Degree Requirements

All physics majors in all programs must complete the physics core curriculum with the exception that majors pursuing the Physics Education option are not required to take PHYSICS 1099 and CMP SCI 1250. In addition to the core courses, each individual program has its own specific

requirements. Required Physics, Mathematics, Chemistry, Biology, Optometry and Computer Science courses for a major or minor in physics may not be taken on a satisfactory/unsatisfactory grading basis.

Core Curriculum

The following physics courses are required: 23

PHYSICS 1099	Windows On Physics
PHYSICS 2111	Physics: Mechanics And Heat
PHYSICS 2112	Physics: Electricity, Magnetism, And Optics
PHYSICS 3200	Mathematical Methods Of Theoretical Physics
PHYSICS 3221	Mechanics
PHYSICS 3223	Electricity And Magnetism
PHYSICS 3231	Introduction To Modern Physics I
Also required are: 26	
MATH 1800	Analytic Geometry And Calculus I
MATH 1900	Analytic Geometry And Calculus II
MATH 2000	Analytic Geometry And Calculus III
MATH 2020	Introduction To Differential Equations
CHEM 1111	Introductory Chemistry I
CMP SCI 1250	Introduction To Computing

Total Hours 49

Note: Students are urged to begin the calculus sequence [MATH 1800, Analytic Geometry and Calculus I] as soon as possible to avoid delays in graduation.

Students with experience in digital computer programming may be excused from CMP SCI 1250.

Bachelor of Arts in Physics

The B.A. program is tailored to students wishing to preserve the option for specialization in graduate school without sacrificing the advantages of a liberal arts education. In addition to the core curriculum, including the foreign language requirement, at least three electives at the 3000 or 4000 levels must be completed. It is recommended that at least one of these three electives include ASTRON 4322, PHYSICS 4311, or PHYSICS 4347 for the required capstone course. The Department of Physics and Astronomy will accept the three-course sequence in American Sign Language as a substitution for the foreign language requirement for the degree. At least 31 hours of physics courses, but no more than 45 hours, are required.

Bachelor of Science in Physics

The B.S. degree provides students with six options: general physics, astrophysics, engineering physics, medical physics, biophysics, optical biophysics or physics education.

General Physics Option

This option may be elected by students desiring a greater concentration in physics and mathematics and is recommended for students wishing to enter graduate study in physics. At least 50 hours are required. In addition to the core curriculum, the following physics courses are required:

Physics		
PHYSICS 4310	Modern Electronics	3

PHYSICS 4311	Advanced Physics Laboratory I	3
PHYSICS 4323	Modern Optics	3
PHYSICS 4331	Intro To Quantum Mechanics	3
PHYSICS 4341	Thermal And Statistical Physics	3
PHYSICS 4350	Computational Physics	3

Select three electives at or above the 4000 level in physics or astronomy. 9

Astronomy

ASTRON 1050	Introduction To Astronomy I	3
or ASTRON 1051	Introduction To Astronomy II	

Mathematics

MATH 2450	Elementary Linear Algebra	3
-----------	---------------------------	---

Select one elective in mathematics at or above the 3000 level, or in computer science at or above the 2000 level. 3

Chemistry

CHEM 1121	Introductory Chemistry II (or equivalent)	5
-----------	---	---

Total Hours 41

Astrophysics Option

Students who have interests in the aerospace sciences or anticipate graduate studies in astrophysics may elect this option. At least 48 hours must be taken. In addition to the core curriculum, the following physics courses are required:

Physics

PHYSICS 4323	Modern Optics	3
PHYSICS 4331	Intro To Quantum Mechanics	3
PHYSICS 4341	Thermal And Statistical Physics	3
PHYSICS 4350	Computational Physics	3

Astronomy

ASTRON 1050	Introduction To Astronomy I	3
ASTRON 1051	Introduction To Astronomy II	3
ASTRON 4301	Astrophysics	3
ASTRON 4322	Observational Astronomy	4

Select one physics elective at or above the 4000 level. ¹ 3

Mathematics

MATH 2450	Elementary Linear Algebra	3
-----------	---------------------------	---

Total Hours 31

¹ With consent of the astronomy adviser, there may be substitution of ASTRON 1001, ASTRON 1001A, ASTRON 1011 or ASTRON 1012 for ASTRON 1050 or ASTRON 1051.

Engineering Physics Option

Students interested in careers in the research and development field of industry should consider this option. This program exposes the student to a basic engineering curriculum, as well as to areas of physics with industrial applications, such as electronics, modern optics, and linear analysis. At least 49 hours, but no more than 51, are required. In addition to the core curriculum, the following courses are required:

Joint Engineering

ENGR 2310	Statics	3
ENGR 2320	Dynamics	3

Joint Electrical Engineering		
J E ENGR 2300	Introduction To Electrical Networks	3
Physics		
PHYSICS 4310	Modern Electronics	3
PHYSICS 4311	Advanced Physics Laboratory I	3
PHYSICS 4323	Modern Optics	3
PHYSICS 4331	Intro To Quantum Mechanics	3
PHYSICS 4341	Thermal And Statistical Physics	3
Mathematics		
MATH 1320	Applied Statistics I	3
MATH 2450	Elementary Linear Algebra	3
Select one elective in mathematics at or above the 3000 level, or in a computer science at or above the 2000 level.		3
Total Hours		33

Biophysics Option

This option is designed for students who are interested in careers in various medical fields or biophysics. This option provides a strong preparation in physics, mathematics, chemistry, and biology for students who intend to apply for admission to medical schools. At least 41 hours of physics and biology combined, but no more than 51, are required. In addition to the core curriculum, the following physics and biology courses are required:

Physics		
PHYSICS 4310	Modern Electronics	3
PHYSICS 4347	Introduction to Biophysics	4
Select two additional physics electives at the 4000 level.		6
Biology		
BIOL 1831	Introductory Biology: From Molecules To Organisms	5
BIOL 1821	Introductory Biology: Organisms And The Environment	5
BIOL/CHEM 4712	Biochemistry	3
BIOL 4713	Techniques in Biochemistry	2
Chemistry		
CHEM 1121	Introductory Chemistry II	5
CHEM 2612	Organic Chemistry I	3
Total Hours		36

Optical Biophysics Option

This program is designed for students wanting to obtain a strong biophysics emphasis that will also prepare them for the optometry program at UMSL. This 3+4 program allows students to complete their B.S. in physics and Doctor of Optometry degrees in seven years. Students can complete their B.S. in physics degree in their fourth year while starting coursework in the College of Optometry. A total of 55 hours in physics, biology, and optometry courses are required. In addition to the physics core curriculum, the following courses are required:

Physics		
PHYSICS 4341	Thermal And Statistical Physics	3
Biology		
BIOL 1831	Introductory Biology: From Molecules To Organisms	5

BIOL 1821	Introductory Biology: Organisms And The Environment	5
BIOL 2482	Microbiology	3
BIOL 2483	Microbiology Laboratory	2
Optometry (fourth year only)		
OPTOM 8020	Basic and Clinical Optics I	4
OPTOM 8060	Biochemistry	3
OPTOM 8120	Basic & Clinical Optics II	5
OPTOM 8140	Physical Optics and Photometry ¹	3
Chemistry		
CHEM 1121	Introductory Chemistry II	5
CHEM 2612	Organic Chemistry I	3
CHEM 2622	Organic Chemistry II	3
CHEM 2633	Organic Chemistry Laboratory	2
Psychology		
PSYCH 1003	General Psychology	3
Select one elective in psychology		3
Statistics		
MATH 1320	Applied Statistics I	3
or PSYCH 2201	Psychological Statistics	
Total Hours		55

¹ This course will not be offered in 2013-2014. Please contact the department for more information.

Note: Upon declaring physics as a major and selecting this option, students should seek an initial interview with the Director of Student Services and the Pre-Optometry Advisor in the UMSL College of Optometry to ensure that all prerequisites for the College of Optometry will be completed. A similar review is recommended at the beginning of the Winter Semester of the second year. In August following the completion of their second year of this program, students may apply formally to the UMSL College of Optometry and arrange to take the Optometry Admissions Test (OAT) during the Fall semester of their third year. The applicant will be invited for a formal interview for acceptance into the College of Optometry professional program following receipt of a completed application in the Fall Semester of the candidate's third year. Following the formal interview with the College of Optometry at the beginning of the third year, students with a 3.0 or better grade point average in the science prerequisites for optometry and a score of 310 or better on the OAT exam may be accepted into the College of Optometry.

B.S. Ed. in Secondary Education with Emphasis in Physics

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the discipline-specific coursework parallels the B.A. or B.S. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification. Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

B.A. or B.S. in Physics with Master's Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. or B.S. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master's level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master's Degree in Secondary Education, with additional coursework. Students interested in Master's Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education.

Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.

Minor in Physics

Students may complete a minor in physics with the flexibility of emphasis on classical physics, modern physics, or a combination of the two areas. The following physics courses are required:

PHYSICS 1099	Windows On Physics	1
PHYSICS 2111	Physics: Mechanics And Heat	5
PHYSICS 2112	Physics: Electricity, Magnetism, And Optics	5
PHYSICS 3200	Mathematical Methods Of Theoretical Physics	3
Select two additional emphasis courses from the following:		6
PHYSICS 3221	Mechanics	
PHYSICS 3223	Electricity And Magnetism	
PHYSICS 3231	Introduction To Modern Physics I	
PHYSICS 4310	Modern Electronics	
Total Hours		20

A GPA of at least 2.0 is required in courses presented for a minor. It is required that a student completes a minimum of 6 hours of graded work in 2000 level or above courses on the UMSL campus.

Graduate Studies

Admission Requirements

The Department requires applicants to have adequate backgrounds in such areas as mechanics, thermodynamics, electromagnetism, optics, electronics, and modern physics. Students admitted to the program with deficiencies in these areas are required to take appropriate undergraduate courses. If necessary, a remedial program is determined in consultation with the department graduate studies director at the time of application for admission.

Graduate Degree Requirements

Master's

A student must complete 30 credit hours in graduate physics courses with at least 15 of these at the 5000 or 6000 level. Writing a thesis is optional. A maximum of six (3) credit hours of Research, PHYSICS 6490, may be counted toward the minimum 15 hours with (or without) the thesis option. Students must pass a comprehensive examination, which includes a defense of the thesis for students who have chosen to write one. A grade

point average of 3.0 must be maintained during each academic year. Students must complete their degree program within 130 percent of the semester hour requirements for the degree. The requirements must be fulfilled within six years from the time of admission. Two-thirds of required graduate credit must be taken in residence. There is no foreign language requirement.

Typical Program

First Semester

PHYSICS: 6000 level and 4000, 5000 level course	6
---	---

Second Semester

PHYSICS: 6000 level and 4000, 5000 level course	6
---	---

Third Semester

PHYSICS: 6000 level and 4000, 5000 level course	6	
PHYSICS 6490	Research	3

Fourth Semester

PHYSICS: 6000 level and 4000 level course		6
PHYSICS 6490	Research	3
Total Hours		30

First Semester

PHYSICS: 6000 level and 4000, 5000 level course	6
---	---

Second Semester

PHYSICS: 6000 level and 4000, 5000 level course	6
---	---

Third Semester

PHYSICS: 6000 level and 4000, 5000 level course	6	
PHYSICS 6490	Research	3

Fourth Semester

PHYSICS: 6000 level and 4000 level course		6
PHYSICS 6490	Research	3
Total Hours		30

Doctorate

Students must complete a minimum of 48 hours past the master's degree with satisfactory performance. The university has a residency requirement of three years/six semesters (for those with master's degree, two years/four semesters) at UMSL and/or Missouri S&T. The Ph.D. qualifying exam, dissertation, and dissertation exam are administered in cooperation with Missouri S&T. All graduate work requires B grades or better. The dissertation may be written in absentia, and there is no foreign language requirement.

Special Equipment, Facilities, or Programs

The William L. Clay Center for Nanoscience, which opened in 1996, is an interdisciplinary facility bringing together both physicists and chemists for research in materials science. A focus of the center is to foster collaborations between its members and colleagues in industry. The center houses the Microscope Image and Spectroscopy Tech Lab where research at the forefront of nanotechnology is conducted with transmission electron, scanning probe, and scanning electron microscopes in a building uniquely designed for such work. The center is spearheading the formation of the Missouri NanoAlliance, a nano-characterization and synthesis network that will facilitate the sharing of resources across Missouri. The Center for Neurodynamics was established in 1995 to conduct research at the interface between physics and biology, with a focus on the roles of noise and stochastic synchronization in neural processing. More recently, the Center for Neurodynamics has expanded to become a virtual

meeting place for researchers working on interdisciplinary topics in the neurosciences. Currently, thirteen UMSL faculty members – coming from departments as wide-ranging as Optometry, Biology, Philosophy, Psychology, Chemistry & Biochemistry, and Physics & Astronomy – belong to the Center. Astronomers make use of national facilities at Kitt Peak, Cerro Tololo, and Mauna Kea Observatories. The university provides email and internet services through numerous student labs equipped with computers with Windows and Macintosh operating systems, flat-bed document scanners, and color printers. The department maintains UNIX/LINUX/OSX workstations for image processing.

Career Outlook

Many of our students have been successful in subsequent graduate studies in astronomy and atmospheric science, biomedical engineering, medical physics, and patent law, as well as in physics. Our alumni have pursued graduate studies and earned doctorate degrees at institutions such as Cornell University, University of Wisconsin, Washington University, and University of Chicago. The many students who elected a career in industry are now working in a variety of settings for such firms as International Business Machines, Emerson Electric, MEMC Electronic Materials, Motorola, A T & T, Hewlett-Packard, Boeing, and the National Center for Atmospheric Research. Several former students are currently teaching physics in high schools around the St. Louis area.

Astronomy Courses

ASTRON 1001 Cosmic Evolution Introductory Astronomy (MOTR ASTR 100L): 4 semester hours

Overview of astronomy, from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe. The format is three classroom hours and one 2-hour laboratory session per week to enhance lecture material.

ASTRON 1001A Cosmic Evolution/Introduction Astronomy (MOTR ASTR 100): 3 semester hours

Overview of astronomy, from the planets to the Big Bang. Topics include the celestial motions, planets and the formation of the solar system, stars and stellar evolution, galaxies, and cosmology. Students will be introduced to the latest discoveries and how they affect our understanding of the universe. Three classroom hours per week. Same as ASTRON 1001 without the laboratory.

ASTRON 1011 Planets and Life in the Universe: 3 semester hours

Man's concept of the solar system from Stonehenge to Einstein; geology and meteorology of the planets of our solar system, with particular attention to results from the space program; exobiology--study of the possibilities of life on other worlds and the best method of communicating with it. Three lecture hours per week.

ASTRON 1012 The Violent Universe and the New Astronomy: 3 semester hours

A nontechnical course focusing on recent results which larger telescopes and the space program have made available. Pulsars, x-ray stars, and black holes; radio astronomy, our galaxy, and interstellar molecules; exploding galaxies and quasars; origin of the expanding universe. Three lecture hours and one observing session per week.

ASTRON 1050 Introduction to Astronomy I (MOTR ASTR 100): 3 semester hours

Prerequisites: MATH 1030 and MATH 1035. A survey of the history of astronomy from the ancient times to present. Theories for the formation and evolution of the solar system and the general features of the solar system and planetary motions are discussed. The physical concept of gravity is presented. The detailed properties of the planets, comets, and asteroids are reviewed, concentrating on recent results from space missions.

ASTRON 1051 Introduction to Astronomy II: 3 semester hours

Prerequisites: MATH 1030 and MATH 1035. A survey of astronomy beyond the solar system. Topics include stars and stellar evolution, neutron stars, and black holes. The physical concept of light and the design of telescopes is discussed in detail. The structure of the Milky Way Galaxy and the large scale structure of the universe are explored. Dark matter, quasars, and active galactic nuclei are discussed in the context of theories for the formation and evolution of the universe. Course does not need to be taken in sequence with ASTRON 1050.

ASTRON 4301 Astrophysics: 3 semester hours

Prerequisite: PHYSICS 3231 or consent of instructor. A moderately technical introduction to astrophysics. Topics will include: physics of stellar interiors and atmospheres; interpretation of stellar spectra; stellar evolution; radio astronomy; and cosmology.

ASTRON 4322 Observational Astronomy: 4 semester hours

Prerequisite: ASTRON 1050, ASTRON 1051 and PHYSICS 3231. Tools of the astronomer: telescopes, spectroscopy, photoelectric photometry. Students will work on a number of projects which will enable them to develop expertise in obtaining, reducing, and analyzing astronomical observations. Student night observing will be an important part of the course. This course is primarily for persons who are astronomy or physics majors or who have some equivalent background.

Atmospheric Science Courses

ATM SCI 1001 Elementary Meteorology: 4 semester hours

Prerequisites: MATH 1020 or equivalent. An elementary course covering atmospheric phenomena, weather, and climate. Topics included are temperature, pressure, and moisture distributions in the atmosphere and dynamical effects such as radiation, stability, storms, and general circulation. Four classroom hours per week with one hour being a learning enhancement session to include demonstrations and exercises on problem solving.

ATM SCI 1001A Elementary Meteorology: 3 semester hours

Prerequisite: MATH 1020 or equivalent. An elementary course covering atmospheric phenomena, weather, and climate. Topics included are temperature, pressure, and moisture distributions in the atmosphere and dynamical effect such as radiation, stability, storms, and general circulation. Same as ATM SCI 1001 without the learning enhancement session.

Geology Courses

GEOL 1001 General Geology: 4 semester hours

Earth materials and processes, including geological aspects of the resource/energy problem. Laboratory involves identification of common rocks and minerals.

GEOL 1001A General Geology: 4 semester hours

Earth materials and processes, including geological aspects of the resource/energy problem. Laboratory involves identification of common rocks and minerals.

GEOL 1001L General Geology Lab: 1 semester hour

This geology laboratory involves identification of common rocks and minerals.

GEOL 1002 Historical Geology: 4 semester hours

Study of changes in Geography, climate and life through geological time; origin of and continents oceans basins, and mountains in light of continental drift. Laboratory primarily involves description and identification of fossils. Three hours of lecture and two hours of lab.

GEOL 1002A Historical Geology Lecture: 3 semester hours

Study of changes in geography, climate and life through geological time; origin of continents, ocean basins, and mountains in light of continental drift. Same as GEOL 1002 without the laboratory.

GEOL 1053 Oceanography (MOTR PHYS 110): 3 semester hours

The atmospheric and ocean circulations; the chemistry and geology of the deep sea; and their effects on the distribution of marine organisms.

Physics Courses

PHYSICS 1001 How Things Work (MOTR PHYS 100): 3 semester hours

Can baseball players hit home runs more easily when the weather is hot and humid? This course provides a practical introduction to understanding common life experiences by using physical intuition and basic ideas of physics. Powerful scientific principles are demonstrated through topics ranging from airplane wings to compact disk players, from lightning strikes to lasers.

PHYSICS 1011 Basic Physics I (MOTR PHYS 150L): 4 semester hours

Prerequisites: MATH 1030 and MATH 1035, MATH 1100 or MATH 1800 strongly recommended. A course specifically designed for students in health and life sciences covering the topics in classical mechanics such as kinematics, Newton's laws, energy, momentum and oscillations. This course will not fulfill the PHYSICS 2111 requirement for physics, chemistry, and engineering majors. Three classroom hours and two hours of laboratory per week.

PHYSICS 1011A Basic Physics I (MOTR PHYS 150): 3 semester hours

Prerequisites: MATH 1030 and MATH 1035, MATH 1100 or MATH 1800 strongly recommended. A course specifically designed for students in health and life sciences, covering the topics of classical mechanics, heat and sound. Will not fulfill the PHYSICS 2111 requirement for physics, chemistry, and engineering majors. Three classroom hours per week. There is no laboratory associated with this course.

PHYSICS 1012 Basic Physics II: 4 semester hours

Prerequisites: PHYSICS 1011. A continuation of PHYSICS 1011. A course specifically designed for students in health and life sciences covering electricity, magnetism, light, optics and waves. This course will not fulfill the PHYSICS 2112 requirement for physics, chemistry, and engineering majors. Three classroom hours and two hours of laboratory per week.

PHYSICS 1012A Basic Physics II: 3 semester hours

Prerequisites: PHYSICS 1011 or PHYSICS 1011A. A continuation of PHYSICS 1011. A course specifically designed for students in health and life sciences covering the topics of electricity, magnetism, light and radiation. Will not fulfill the PHYSICS 2112 requirement for physics, chemistry, and engineering majors. Three classroom hours. There is no laboratory associated with this course.

PHYSICS 1099 Windows on Physics: 1 semester hour

A seminar designed to introduce physics majors to research areas in physics and physics-related fields in the Department of Physics and Astronomy. In addition to fundamental areas of physics, the areas of astrophysics, biophysics, materials science, and nanotechnology will be included. Career opportunities for students with physics degrees will be discussed and the physics curriculum will be reviewed. The course meets weekly and is required of all physics majors and minors who are transfer students.

PHYSICS 2010 Introduction to Inquiry Approaches to STEM Education (STEP I): 1 semester hour

Same as CHEM 2010, BIOL 2010, MATH 2010, and SEC ED 2010. Prerequisites: Concurrent enrollment BIOL 1821, BIOL 1831, CHEM 1111, CHEM 1121, PHYSICS 2111, PHYSICS 2112, MATH 1800, or MATH 1900 or have a declared STEM major. Students who want to explore teaching careers become familiar with lesson plan development by writing, teaching and observing lessons in a local school class. Students build and practice inquiry-based lesson design skills and become familiar with and practice classroom management in the school setting. As a result of the STEP I experiences students should be able to decide whether to continue to explore teaching as a career and ultimately finishing the remainder of the WE TEACH MO curriculum leading to teacher certification. The classroom observations and teaching represent a major field component and requires at least one two hour block of free time during the school day once a week.

PHYSICS 2011 Designing Inquiry-Based STEM Experiences (STEP II): 1 semester hour

Same as CHEM 2011, BIOL 2011, MATH 2011, and SEC ED 2011. Prerequisites: BIOL 2010, CHEM 2010, PHYSICS 2010, MATH 2010, or SEC ED 2010. Students explore teaching careers, become familiar with STEM school setting through observing and discussing the school environment and by developing and teaching inquiry-based lessons.

PHYSICS 2111 Physics: Mechanics and Heat (MOTR PHYS 200L): 5 semester hours

Prerequisites: MATH 1900 (may be taken concurrently). An introduction to the phenomena, concepts, and laws of mechanics and heat for physics majors and students in other departments. Three classroom hours, one hour discussion, and two hours of laboratory per week.

PHYSICS 2112 Physics: Electricity, Magnetism, and Optics: 5 semester hours

Prerequisites: PHYSICS 2111 and MATH 2000 (MATH 2000 may be taken concurrently). A phenomenological introduction to the concepts and laws of electricity and magnetism, electromagnetic waves, optics and electrical circuits for physics majors and students in other departments. Three hours of lecture, one hour of discussion, and two hours of laboratory per week.

PHYSICS 3200 Mathematical Methods of Theoretical Physics: 3 semester hours

Prerequisites: PHYSICS 2112 and MATH 2000. Mathematical techniques specifically used in the study of mechanics, electricity, magnetism, and quantum physics are developed in the context of various physical problems. Course includes the topics of vector calculus, coordinate systems, the Laplace equation and its solutions, elementary Fourier analysis, & complex variables. Applications to electrostatics, mechanics, and fluid dynamics are emphasized. Three hours of lecture per week.

PHYSICS 3221 Mechanics: 3 semester hours

Prerequisites: PHYSICS 3200 and MATH 2020 (MATH 2020 may be taken concurrently). Advanced course covering single and many particle dynamics, rigid-body dynamics, and oscillations. Variational principles and Hamiltonian formulations of mechanics are covered. Three hours of lecture per week.

PHYSICS 3223 Electricity and Magnetism: 3 semester hours

Prerequisites: PHYSICS 3200 and MATH 2020 (MATH 2020 may be taken concurrently). Advanced course covering the rigorous development, from basic laws, of Maxwell's equations for electromagnetic fields along with applications of these equations. Topics covered are electrostatics and electrodynamics including currents, magnetic fields, motion of charged particles in fields and an introduction to electromagnetic waves. Three hours of lecture per week.

PHYSICS 3231 Introduction to Modern Physics I: 3 semester hours

Prerequisites: PHYSICS 2111, PHYSICS 2112, and MATH 2020 (may be taken concurrently) and PHYSICS 3200 strongly recommended. Photons and the wave nature of particles, wave mechanics, Schrodinger equation, with applications to atomic physics; and radiation; the physics of solids; elementary particles; special relativity; health physics. Three hours of lecture per week.

PHYSICS 3281 Directed Readings in Physics: 1-5 semester hours

Prerequisite: Consent of instructor. An independent study of special topics in physics. A paper may be required on an approved topic. Topics must be substantially different. Hours arranged.

PHYSICS 3390 Research: 1-10 semester hours

Prerequisite: Consent of department. Independent physics research projects arranged between student and instructor. Hours arranged.

PHYSICS 4304 Introduction to Nanotechnology: 3 semester hours

Prerequisites: PHYSICS 3231. This course presents a broad overview of the field of nanotechnology with an emphasis on physical phenomena involved with three main parts: Nanoscale Fabrication and Characterization (nano-lithography, self-assembly and self-organization, scanning probe microscopes); Nanomaterials and Nanostructures (low-dimensional materials, graphene, carbon nanotubes, quantum dots, nano-composites, etc); Select Applications (nanoscale and molecular electronics, nano-magnetism, nano-photonics, bio-inspired nano-materials). The goal is to lay a foundation for a research career in the rapidly growing area of nanotechnology and to enhance student's competitiveness in the job market.

PHYSICS 4305 Bayesian Data Analysis for the Sciences: 3 semester hours

Prerequisites: Consent of instructor. This is a cross-disciplinary course in two parts. Part one covers Bayesian inference as applied to data analysis in general, with a special focus on the mathematics of model-selection in the physical and life sciences. Part two concentrates specifically on the Bayesian use of log-probability (i.e. information) measures to track order-disorder transitions in thermodynamics, and to track the evolution of sub-system correlations (via both digital and analog means) in a wide variety of complex systems. Expect weekly empirical observation exercises, and opportunities for asynchronous as well as synchronous collaboration.

PHYSICS 4306 Nanoscience Practicals: 1-3 semester hours

Studies of Nanoscience characterization, synthesis, modeling techniques designed for clients of these tools, as well as for technical users interested in a current overview. Course consists of a set of 1/3 semester modules. Check with the instructor on more specialized modules, (e.g. on materials microscopy), if interested. Each module will cover instrumentation, current applications, weaknesses, and will involve lab visits for hands-on experience, weekly web interaction and classroom hours.

PHYSICS 4310 Modern Electronics: 3 semester hours

An integrated recitation/laboratory study of modern analog and digital electronics with emphasis on integrated circuits. Topics include circuit elements, operational amplifiers, logic gates, counters, ac/dc converters, noise reduction, microprocessors, embedded microcontrollers, and digital processing. Three hours of lecture/laboratory per week.

PHYSICS 4311 Advanced Physics Laboratory I: 3 semester hours

Prerequisite: Advanced standing with at least nine completed hours of Physics at or above the 3000 level. Physics majors are introduced to the experimental techniques used in research. A student will choose and do several special problems during the semester. Six hours laboratory per week.

PHYSICS 4323 Modern Optics: 3 semester hours

Prerequisite: PHYSICS 3223. A study of modern optics including diffraction theory, polarization, light propagation in solids, quantum optics, and coherence.

PHYSICS 4331 Intro to Quantum Mechanics: 3 semester hours

Prerequisites: PHYSICS 3200 and PHYSICS 3231. Photons and the wave nature of particles; wave mechanics, Schrodinger equation, operator and matrix formulations, and Dirac notation; applications to single particle systems, atomic physics, and spectroscopy.

PHYSICS 4341 Thermal and Statistical Physics: 3 semester hours

Prerequisites: MATH 2000 and PHYSICS 3231. Introduction to statistical mechanics, classical thermodynamics, and kinetic theory.

PHYSICS 4343 Selected Topics in Physics I: 3 semester hours

Prerequisites: PHYSICS 3221, PHYSICS 3223, PHYSICS 3231, PHYSICS 4341. Topics include special phenomena for research areas such as physics of waves, biophysics, nonlinear physics, geophysical fluid dynamics and the atmospheric sciences treated by methods of advanced mechanics, electromagnetism, statistical mechanics, thermodynamics and quantum mechanics. Three hours of lecture per week.

PHYSICS 4347 Introduction to Biophysics: 4 semester hours

Prerequisites: PHYSICS 3231, BIOL 1821, and BIOL 1831; or permission of instructor. Introduction to the application of physical principles to problems in biology. The course will cover topics such as ion transport, protein folding, molecular motors, collective dynamics and self-assembly of biological systems, x-ray crystallography and NMR, a survey of medical imaging techniques, the relation between nonlinear dynamics and electrophysiology in the heart and brain, and physics-based approaches to modeling gene networks and evolutionary dynamics.

PHYSICS 4350 Computational Physics: 3 semester hours

Prerequisite: PHYSICS 3221, PHYSICS 3223, and PHYSICS 3231. Computer analysis in physics; solutions of Eigenvalue problems; coupled differential equations; and writing of Fortran programs.

PHYSICS 4351 Elementary Solid State Physics: 3 semester hours

Prerequisites: PHYSICS 4331. Theoretical and experimental aspects of solid state physics, including one-dimensional band theory of solids; electron emission from metals and semiconductors; electrical and thermal conductivity of solids.

PHYSICS 4353 Physics of Fluids: 3 semester hours

Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 4341, or consent of instructor. Dynamical theory of gases and liquids. Course covers the mathematical development of physical fluid dynamics with contemporary applications.

PHYSICS 4358 Introduction to Global Geodynamics: 3 semester hours

Prerequisites: PHYSICS 3221 and PHYSICS 3223. This advanced course covers the development, from basic laws, of equations describing the many geodynamic processes underpinning geological modeling and geological data. Topics covered are paleomagnetism, plate tectonics, viscoelastic media, heat transfer, gravity, fluid mechanics, rheology, faulting, and geochronology.

PHYSICS 4370 Relativity and Cosmology: 3 semester hours

Prerequisites: PHYSICS 3221, PHYSICS 3223 and PHYSICS 3231. An introduction to Einstein's general theory of relativity. Topics will include special relativity in the formalism of Minkowski's four dimensional space-time, Principle of Equivalence, metric description of curved space, geodesic equation, Einstein Field Equation, black holes, and cosmology.

PHYSICS 4381 Directed Readings in Physics: 1-10 semester hours

Prerequisite: Consent of instructor. An independent study of special topics in physics for senior undergraduates or graduate students.

PHYSICS 5306 Advanced Nanoscience Practicals: 1-3 semester hours

Prerequisites: Graduate standing in physics or consent of instructor. Advanced studies of Nanoscience characterization, synthesis, and modeling techniques designed for clients of these tools, as well as for technical users interested in a current overview. The course consists of a set of 1/3 semester modules. Check with the instructor on more specialized modules, (e.g. on materials microscopy), if interested. Each module will cover instrumentation, current applications, and weaknesses and will involve lab visits for hands-on experience, weekly web interaction and classroom hours.

PHYSICS 5345 Nonlinear Dynamics and Stochastic Processes: 3 semester hours

Prerequisites: PHYSICS 3221 and PHYSICS 4341 and consent of instructor. Dynamical systems; theory of oscillations; introduction to bifurcation theory and chaos in dissipative systems with applications in physics and biology; introduction to stochastic processes with applications in physics, chemistry and biology; dynamics of nonlinear systems perturbed by noise; noise-induced phase transitions; linear and nonlinear time series analysis. Three classroom hours per week.

PHYSICS 5347 Introduction to Biophysics: 4 semester hours

Prerequisites: Graduate standing, PHYSICS 3231, BIOL 1821 and BIOL 1831 or permission of instructor. Graduate-level introduction to the application of physical principles to problems in biology. The course will cover such topics as ion transport, protein folding, molecular motors, collective dynamics and self-assembly of biological systems, x-ray crystallography and NMR, a survey of medical imaging techniques, the relation between nonlinear dynamics and electrophysiology in the heart and the brain, and physics-based approaches to modeling gene networks and evolutionary dynamics. Students may not receive credit for both PHYSICS 4347 and PHYSICS 5347.

PHYSICS 5357 Fundamental Particles and Forces: 3 semester hours

Prerequisites: PHYSICS 3223, PHYSICS 3231, and PHYSICS 4331, may be taken concurrently Introduction to nuclear and particle physics. Nuclear phenomenology and models; high energy particle accelerators and detectors; phenomenology of strong, electromagnetic and weak interactions; symmetry principles; quark compositions of strongly interacting baryons and mesons; gauge theories and the standard model of particle interactions; grand unification.

PHYSICS 5370 Intermediate Relativity and Cosmology: 3 semester hours

Prerequisites: PHYSICS 3221, PHYSICS 3223, and PHYSICS 3231; or graduate standing. Topics will include special relativity in the formalism of Minkowski's four dimensional space-time, Principle of Equivalence, geodesic equation, Einstein Field Equation, black holes, and cosmology. Differential geometry from metric description to Riemann curvature tensor will be studied.

PHYSICS 5402 Introduction to Mathematical Physics: 3 semester hours

Prerequisites: Graduate standing in physics or consent of instructor. A course covering mathematical techniques as applied in advanced theoretical physics including generalized vector spaces and their dual spaces, linear operators and functionals, generalized functions, spectral decomposition of operators, tensor analysis, and complex variables. Three hours of lecture per week.

PHYSICS 5403 Principles of Mathematical Physics: 3 semester hours

Prerequisites: Graduate standing in physics or consent of instructor. Boundary value problems; Strum-Liouville theory and orthogonal functions; Green's function techniques; and introduction to group theory with emphasis on representations of Lie Algebras. Three hours of lecture per week.

PHYSICS 6300 Master's Thesis: 3 semester hours

Prerequisite: Consent of instructor. Thesis work under the supervision of a faculty member. The course is designed for those students intending to present a thesis as part of their M.S. program. Students who do not write a thesis cannot apply PHYSICS 6300 to a degree. This course transfers to the Cooperative Ph.D. program as three research credits.

PHYSICS 6400 Special Problems: 1-5 semester hours

Must have faculty mentor and approval of Department Chairperson. A study of special topics in physics for graduate students.

PHYSICS 6401 Special Topics: 1-4 semester hours

Prerequisite: Consent of instructor. This course is designed to give the department an opportunity to test a new course.

PHYSICS 6409 Theoretical Mechanics I: 3 semester hours

Prerequisite: PHYSICS 3221. Classical mechanics, methods of Newton, Lagrange, and Hamilton applied to motion of particles and rigid bodies, elasticity, hydrodynamics.

PHYSICS 6410 Seminar: 1-3 semester hours

Prerequisite: Approval of Department Chair. Discussion of current topics.

PHYSICS 6411 Electrodynamics I: 3 semester hours

Prerequisite: PHYSICS 3223. A rigorous development of the fundamentals of electromagnetic fields and waves. Electrostatics, magnetostatics, Maxwell's equations, Green's functions, boundary value problems, multipoles, conservation laws.

PHYSICS 6413 Statistical Mechanics: 3 semester hours

Prerequisite: PHYSICS 4331, PHYSICS 4341. A study of statistical ensembles; Maxwell-Boltzmann, Fermi-Dirac and Einstein-Bose distribution laws, application to some physical systems.

PHYSICS 6423 Electrodynamics II: 3 semester hours

Prerequisite: PHYSICS 6411. A continuation of PHYSICS 6411. Applications of time-dependent Maxwell's equations to such topics as plasmas, wave guides, cavities, radiation: fields of simple systems and multiples. Relativity: covariant formulation of Maxwell's equations and conservation laws, fields of uniformly moving and accelerated charges.

PHYSICS 6461 Quantum Mechanics I: 3 semester hours

Prerequisite: PHYSICS 4331. A study of the Schroedinger wave equation, operators and matrices, perturbation theory, collision and scattering problems.

PHYSICS 6463 Quantum Mechanics II: 3 semester hours

Prerequisite: PHYSICS 6461. Continuation of PHYSICS 6461. To include such topics as Pauli Spin-Operator Theory, classification of atomic states, introduction to field quantization, and Dirac Electron Theory.

PHYSICS 6481 Physics of Solid State: 3 semester hours

Prerequisite: PHYSICS 6461. Crystal symmetry, point and space groups, lattice vibrations, phonons, one-electron model, Hartee-Fock approximation, elementary energy band theory, transport properties, the Boltzmann equation, introduction to superconductivity, semiconductors and magnetism.

PHYSICS 6490 Research: 1-10 semester hours

Prerequisite: Must have a faculty mentor and approval of the department chair. Investigations of an advanced nature leading to the preparation of a thesis or dissertation.

PHYSICS 6495 Continuous Registration: 1-6 semester hours

Doctoral candidates who have completed all requirements for the degree except the dissertation, and are away from the campus must continue to enroll for at least one hour of credit each registration period until the degree is completed. Failure to do so may invalidate the candidacy.

Political Science

General Information

Undergraduate Degrees and Areas of Concentration

The political science department offers undergraduate work leading to the B.A. degree in political science, B.A. degree in international relations, B.S. degree in public policy and administration, and, in cooperation with the College of Education, the B.A. in political science with teacher certification and the B.S. in education with an emphasis in social studies. (See College of Education section in this Bulletin for details.) Minors in political science are available to students who are majoring in another discipline and who have a special interest in law, government, politics, nonprofit, international relations, and public policy.

Principal areas of concentration include urban politics, American politics and behavior, international politics, comparative politics, public policy and administration, public law, and political theory. In many courses, emphasis is placed on the ways in which public policies are developed and administered. In addition to formal course work, internships are available in which the student can relate classroom learning to practical field experience.

Graduate Degrees

The political science department also offers graduate courses leading to the M.A. and Ph.D. in political science. The M.A. program in political science offers advanced education for those seeking careers in government, business, secondary education, community, or not-for-profit agencies. The principal foci of the 33-hour program are public administration and public policy analysis/evaluation in the local, state, national, and international areas. The flexibility of the general master's degree allows for individualized programs in urban politics, prelegal education, American national government, comparative politics, international relations, and political theory.

The Ph.D. in political science emphasizes the study of theoretic, analytic, and substantive approaches to public policy. Core courses include research methods, normative and empirical theory, and policy processes and institutions. Doctoral candidates, in consultation with the faculty, develop a policy concentration, which can be interdisciplinary. Internships, when appropriate, may be a component. All successful doctoral candidates must complete a dissertation, which makes a significant contribution to knowledge in the field.

Most graduate classes are scheduled so those employed outside the university can participate in the programs on a part-time basis.

Special Interdisciplinary Degree

The Department of Political Science also cooperates with the Department of Economics in the College of Arts and Sciences and the College of Business Administration in offering a master's degree in public policy administration (MPPA). For information on the MPPA degree program, see that section in this Bulletin.

Cooperative Programs

Political science students may also study abroad, or obtain a Certificate in International Studies, European Studies, African Studies, East Asian Studies, Latin American Studies, Gender Studies, or Writing, in conjunction with their political science major. See Certificate Programs in this Bulletin.

Research in political science is encouraged for students at all levels. Assistance is available at UMSL's Public Policy Research Centers, International Studies and Programs. The department's membership in the Interuniversity Consortium for Political and Social Research provides access to a wide range of survey data on local-state-national, comparative, and international politics. In addition, extensive research opportunities are available within the metropolitan St. Louis area. Scholarships are available for qualified students; details can be obtained from the department office.

Faculty

Political science faculty are nationally known scholars in their respective fields, dedicated to high-quality teaching and education. Department faculty members have received distinctions such as the Curators' Research Award, Curators' Distinguished Teaching Professor Award, Presidential Award for Research and Creativity, Chancellor's Award for Research and Creativity, Chancellor's Award for Excellence in Teaching, Governor's Teaching Awards, Burlington Northern Faculty Achievement Award, Emerson Electric Excellence in Teaching Award and E. Desmond Lee Endowed Professor Award. They have received research grants from such prestigious agencies as the John F. Kennedy Library, the Ford Foundation, the MacArthur Foundation, the National Science Foundation, the German Marshall Fund, the United States Department of Education, the Fulbright Program, and the United States Institute for Peace. The faculty has published its research in more than 80 books and 400 articles in scholarly journals and is devoted to using its research findings to improve teaching.

In addition to helping students become more knowledgeable about politics and public policy, political science course work provides rich opportunities for students to develop a variety of practical skills--such as information-gathering and processing, analysis, research, decision making and oral and written communication--that are transferable to many career paths and job settings after graduation.

Undergraduate Studies

General Education Requirements

Majors must satisfy the university and college general education requirements (p. 41). Political science courses may be used to satisfy the social sciences requirement. The foreign language requirement for the B.A. degree may be satisfied in any language.

Departmental Honors

The department awards honors to students having a grade point average (GPA) of 3.2 in the major, an overall GPA of 3.2 (except in extraordinary circumstances), and successfully completed an honors thesis, project, or report.

Degree Requirements

Bachelor of Arts in Political Science

All majors must complete at least 36, but no more than 51, hours of political science. All students are required to take the following core curriculum:

Political Science		
POL SCI 1100	Introduction To American Politics	3
POL SCI 1500	Introduction To Comparative Politics	3
POL SCI 1800	World Politics	3
POL SCI 2000	Political Analysis	3
POL SCI 3950	Senior Seminar In Political Science	3
Total Hours		15

Majors are urged to take POL SCI 1100, POL SCI 1500, and POL SCI 1800 as early as possible since these courses are designed to provide a substantive foundation as well as conceptual and analytical tools for subsequent course work. Because the seminar topics in POL SCI 3950 change from semester to semester, the course can be repeated as an elective. All majors must take at least one Seminar in Political Science.

Students also must complete at least one course in four of the following political science areas:

- Public Law (chosen from among courses listed in bulletin at the 1000, 2000, or 3000 or 4000 level)
- American Politics (chosen from among courses listed in bulletin at the 1000, 2000, or 3000 or 4000 level).
- Public Policy and Administration (chosen from among courses listed in bulletin at the 1000, 2000, or 3000 or 4000 level).
- Comparative Politics (chosen from among courses listed in bulletin at the 1000, 2000, or 3000 or 4000 level).
- Political Theory (chosen from among courses listed in bulletin at the 1000, 2000, or 3000 or 4000 level).
- International Relations (chosen from among courses listed in bulletin at the 1000, 2000, or 3000 or 4000 level).
- Methodology (chosen from among courses listed in bulletin at the 1000, 2000, or 3000 or 4000 level).

At least 15 hours of political science course work must be at the 3000 or 4000 level, including POL SCI 3950 Senior Seminar. B.A. degree students may take a maximum of 3 hours of political science on a satisfactory/unsatisfactory basis; this can include any course except the required courses in the core curriculum.

Note: As early as possible, students should determine their educational objectives and consult with an adviser regarding a plan of study. Those students who are uncertain of their future plans are urged to include in their 36-45 hours of political science a broad set of courses in American politics, public policy and administration, public law, comparative politics, international politics, political theory, and methodology. In addition to this general course of study in political science, the department offers B.A. degree students several specialized programs of study in political science geared to various student academic and career interests.

B.S. Ed. in Secondary Education with Emphasis in Political Science

The B.S. Ed. is a professional education degree designed for students who wish to pursue a teaching career in secondary schools. Much of the

discipline-specific coursework parallels the B.A. degree in the discipline; however, the Missouri Department of Elementary and Secondary Education (DESE) requires specific coursework for teacher certification.

Therefore, students interested in the B.S. Ed. should contact the advising office (OASIS) 314-516-5937 in the College of Education for discipline-specific requirements. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

B.A. in Political Science with Master’s Level Coursework for Secondary Teacher Certification

In addition to the B.S. Ed., students may opt to complete a B.A. degree in their discipline as an undergraduate, followed by admission to the Graduate School for Master’s level teaching certification. The College of Education has a one-year accelerated program for post-graduate certification called Teach in 12, or students can choose a traditional path to certification. Graduate coursework for certification can apply towards a Master’s Degree in Secondary Education, with additional coursework. Students interested in Master’s Level teacher certification should contact the advising office (OASIS) 314-516-5937 in the College of Education. *Note: To obtain teaching certification, DESE requires a 3.0 GPA in the discipline and professional education coursework, as well as a 2.75 GPA overall.*

Graduate School Preparation

This program is designed for students planning to pursue graduate studies in political science, particularly the Ph.D. degree, with the aim of a career as either an academic or practitioner (working as a researcher, policy analyst, or in some other capacity calling for advanced knowledge and skills). In addition to the core curriculum and common requirements for all political science majors, students are advised to:

1. take as many political science courses at the 2000 and 3000 or 4000 level as possible in a variety of areas (public law, American politics, comparative and international politics, etc.),
2. complete a departmental honors project based on independent research and writing in POL SCI 3900, Special Readings, and
3. give special consideration to courses in normative political theory (such as POL SCI 2620, Modern Political Thought) and research methods (such as , Introduction to Policy Research, which is a graduate course open to undergraduates with Graduate School approval).

Students are also encouraged to take course work outside the department in microeconomics, macroeconomics, and statistics.

Legal Studies

This is an ideal program of study for double majors in political science and criminal justice or for any student interested in law school and a career in the law. In addition to the core curriculum and common requirements for all political science majors, students are advised to take:

POL SCI 1200	Foundations of Law: an Introduction to Legal Studies	3
Select at least four of the following:		12
POL SCI 2260	Law, Politics and Society	
POL SCI 2280	Judicial Politics	
POL SCI 2290	Gender and the Law	

POL SCI 2650	American Political Thought	
POL SCI 2900	Studies in Political Science (when appropriate)	
POL SCI 3200	Constitutional Law	
POL SCI 3210	Civil Liberties	
POL SCI 3260	The Supreme Court	
POL SCI 3900	Special Readings (when appropriate)	
POL SCI 3940	Public Affairs Internship (when appropriate)	
POL SCI 4850	International Law	
Total Hours		15

Students are also advised to take political science course work that gives them a strong background in American political institutions and processes. Those students considering practicing law in the international arena should take course work in comparative and international politics. Political science course work may be supplemented by course work in criminal justice and criminology.

American Politics

Designed for those students interested in careers in communications, education, business, social work, political consulting, and other fields requiring knowledge of American urban, state, and national politics and institutions. Education majors planning to teach in the social studies field, communications majors planning on a career in journalism, or business majors thinking about working in corporate relations may especially wish to consider a double major in political science with a focus in this area. In addition to the core curriculum and common requirements for all majors, students are advised to take:

Select at least five of the following:		15
POL SCI 2280	Judicial Politics	
POL SCI 2300	State Politics	
POL SCI 2320	African Americans and the Political System	
POL SCI 2350	Introduction to Urban Politics	
POL SCI 2380	The Politics of Gender in the United States	
POL SCI 2420	Introduction to Public Policy	
POL SCI 2650	American Political Thought	
POL SCI 2820	United States Foreign Policy	
POL SCI 2900	Studies in Political Science (when appropriate)	
POL SCI 3300	The American Presidency	
POL SCI 3330	Public Opinion and Political Participation	
POL SCI 3331	Congressional Politics	
POL SCI 3340	Politics And The Media	
POL SCI 3350	Political Parties and Elections	
POL SCI 3390	Studies in American Politics	
POL SCI 3480	Environmental Policy	
POL SCI 3900	Special Readings (when appropriate)	

POL SCI 3940	Public Affairs Internship (when appropriate)
<hr/>	
Total Hours	15

In addition, students may wish to choose other political science courses listed below under the public policy and administration program of study. Given the growing reality of international interdependence, students should not restrict their studies completely to American politics but should take some course work in comparative and international politics as well. Depending on their specific career interest, students may wish to round out their program with course work in other social science departments such as criminal justice, communications, economics, or social work.

Public Policy and Administration

Designed for students interested in working inside or outside government, in a career requiring familiarity with how public policies are formulated and implemented. (Students alternatively may wish to consider the B.S. in public policy and administration degree offered by the political science department.) In addition to the core curriculum and common requirements for all majors, students are advised to take:

POL SCI 2420	Introduction to Public Policy	3
Select four of the following:		12
POL SCI 2400	Public Administration	
POL SCI 2820	United States Foreign Policy	
POL SCI 2900	Studies in Political Science (when appropriate)	
POL SCI 3420	Public and NonProfit Personnel Management	
POL SCI 3440	Public and NonProfit Budgeting	
POL SCI 3450	Urban Administration	
POL SCI 3460	The Politics Of Poverty And Welfare	
POL SCI 3480	Environmental Policy	
POL SCI 3570	Gender, Ethnicity and Public Policy	
POL SCI 3900	Special Readings (when appropriate)	
POL SCI 3940	Public Affairs Internship (when appropriate)	
POL SCI 4510	Comparative Public Policy and Administration	
Total Hours		15

Depending on career interests, students should add course work in American, comparative, or international politics. Students are encouraged to develop a policy concentration in a particular policy area, such as urban, labor, health, education, and business studies, with multidisciplinary course work taken in political science and other departments.

International and Comparative Studies

Designed for students interested in international careers in government service (not only the U.S. State Department but also other federal government agencies), intergovernmental and non-governmental organizations, business, education, and other areas of employment. In addition to the core curriculum and common requirements for all political science majors, students are advised to take:

POL SCI 1800	World Politics (MOTR POSC 201)	3
POL SCI 2350	Introduction to Urban Politics	3

Select at least four of the following:¹

12

POL SCI 1600	Contemporary Political Ideologies
POL SCI 2510	The Politics of European Union
POL SCI 2530	Political Systems of South America
POL SCI 2540	Political Systems of Mexico, Central America and the Caribbean
POL SCI 2580	African Politics
POL SCI 2820	United States Foreign Policy
POL SCI 2900	Studies in Political Science (when appropriate)
POL SCI 3570	Gender, Ethnicity and Public Policy
POL SCI 3595	Studies in Comparative Politics
POL SCI 3690	The Marxist Heritage
POL SCI 3830	International Political Economy
POL SCI 3850	International Organizations and Global Problem-Solving
POL SCI 3860	Studies in War and Peace
POL SCI 3890	Studies in International Relations
POL SCI 3900	Special Readings (when appropriate)
POL SCI 3940	Public Affairs Internship (when appropriate)
POL SCI 4510	Comparative Public Policy and Administration
POL SCI 4850	International Law

Total Hours

18

¹ Some of which are international politics courses that focus on conflict and cooperation between countries, and some of which are comparative politics courses that focus on political, economic, and social change within countries.

Students interested in working for the U.S. Foreign Service, American-based multinational companies, and nonprofit organizations should also take course work that familiarizes them with the American political system and how public policy is made. Students should explore the various interdisciplinary area studies and international studies certificate programs offered through the Center for International Studies.

Bachelor of Arts in International Relations

General Education Requirements

Majors must satisfy the university and college general education requirements (<http://bulletin.umsl.edu/generaleducationrequirements>). Political science courses may be used to satisfy the social sciences requirement. The foreign language requirement for the B.A. degree may be satisfied in any language.

Departmental Honors

The department awards honors to students having a minimum grade point average (GPA) of 3.2 in the major, a minimum overall GPA of 3.2 (except in extraordinary circumstances), and successfully completed an honors thesis, project, or report.

Degree Requirements

All majors must complete at least 15 hours in Political Science at the 3000 level or above.

Core Courses

POL SCI 1800	World Politics (MOTR POSC 201)	3
POL SCI 1500	Introduction to Comparative Politics (MOTR POSC 202)	3
POL SCI 1820	Contemporary International Relations: Challenges and Opportunities of the 21st Century	3
POL SCI 2000	Political Analysis	3
POL SCI 3950	Senior Seminar in Political Science	3

International Relations

12

Select four of the following:

POL SCI 2820	United States Foreign Policy
POL SCI 2510	The Politics of European Union
POL SCI 2850	Gender, Power and International Politics
POL SCI 3800	Media, Film, and International Politics
POL SCI 3830	International Political Economy
POL SCI 3850	International Organizations and Global Problem-Solving
POL SCI 3860	Studies in War and Peace
POL SCI 3880	Diaspora Politics, Transnational Remittances, and Global Citizenship
POL SCI 3890	Studies in International Relations
POL SCI 3900	Special Readings (with consent of instructor and advisor)
POL SCI 4850	International Law

Comparative Politics

9

Select three of the following:

POL SCI 2500	Comparing Different Worlds
POL SCI 2530	Political Systems of South America
POL SCI 2540	Political Systems of Mexico, Central America and the Caribbean
POL SCI 2550	East Asian Politics
POL SCI 2580	African Politics
POL SCI 2590	Globalization: Prospects and Problems
POL SCI 3500	The Politics of the Middle East: International and National Dynamics
POL SCI 3570	Gender, Ethnicity and Public Policy
POL SCI 3590	Women and Leadership World-Wide: Breaking the Glass Ceiling
POL SCI 4510	Comparative Public Policy and Administration
POL SCI 4520	Mega-Cities and Diasporas: Understanding Global Migration

Total Hours

36

It is recommended that majors take POL SCI 1500, (<http://bulletin.umsl.edu/artsandsciences/politicalscience>)POL SCI 1800, POL SCI 1820, and POL SCI 2000 as early as possible since these

courses are designed to provide a substantive foundation as well as conceptual and analytical tools for subsequent course work.

Majors are strongly encouraged to broaden their academic experience by including relevant curricular experiences including study abroad, and minors or certificates in areas such as economics and foreign languages.

B.A. degree students may take a maximum of 3 hours of political science on a satisfactory/ unsatisfactory basis; this can include any course except the four required courses in the core curriculum.

Bachelor of Science in Public Policy and Administration

The BSPPA degree has three emphasis areas. The first is a public administration track, which emphasizes management in both the public and nonprofit sectors; it may produce a terminal degree or be a precursor to graduate training. The second is a public policy track in which a student may focus on a particular policy area and also acquire specialized analytic training and research skills, in preparation for relevant entry-level jobs in the public or the voluntary sector as well as in certain parts of the private sector. The third emphasis area focuses explicitly on the administrative and leadership concerns of organizations in the nonprofit sector, which constitutes a growing field of research and employment opportunities.

All BSPPA majors must complete at least 33 but no more than 51, hours in political science. The following core curriculum is required of all BSPPA majors:

Political Science

POL SCI 1100	Introduction To American Politics	3
POL SCI 1500	Introduction To Comparative Politics	3
POL SCI 2000	Political Analysis	3
POL SCI 2400	Public Administration	3
POL SCI 2420	Introduction To Public Policy	3
POL SCI 3940	Public Affairs Internship	1-6
POL SCI 3950	Senior Seminar In Political Science	3
ECON 1001	Principles Of Microeconomics	3
ECON 1002	Principles Of Macroeconomics	3
CRIMIN 2220	Statistical Analysis In Criminology And Criminal Justice	4
or SOC 3220	Social Statistics	
or ECON 3100	Economic Statistics	
Total Hours		29-34

In addition, students must provide a demonstration of computer proficiency through one of the following:

- INFSYS 1800 Computers and Information Systems, extension courses, or other study approved by the BSPPA coordinator.
- BSPPA students may take a maximum of 3 hours of political science on a satisfactory/ unsatisfactory basis, except for the following (which may not be taken on a satisfactory/unsatisfactory basis):

POL SCI 1100	Introduction To American Politics	3
POL SCI 1500	Introduction To Comparative Politics	3
POL SCI 2400	Public Administration	3
POL SCI 2000	Political Analysis	3
POL SCI 2420	Introduction To Public Policy	3

POL SCI 3940	Public Affairs Internship	1-6
POL SCI 3950	Senior Seminar In Political Science	3
POL SCI 1100	Introduction to American Politics (MOTR POSC 101)	3
POL SCI 1500	Introduction to Comparative Politics (MOTR POSC 202)	3
POL SCI 2400	Public Administration	3
POL SCI 2000	Political Analysis	3
POL SCI 2420	Introduction to Public Policy	3
POL SCI 3940	Public Affairs Internship	1-6
POL SCI 3950	Senior Seminar in Political Science	3

Public Administration Emphasis Area

In addition to the core curriculum requirements for all BSPPA majors, students in the public administration emphasis area are required to complete the following courses:

POL SCI 3420	Public and NonProfit Personnel Management	3
POL SCI 3440	Public and NonProfit Budgeting	3
ACCTNG 2400	Fundamentals Of Financial Accounting	3
Select two of the political science courses listed under policy and institutions courses below.		6
Select at least two additional elective courses chosen from among that list or any other political science offerings.		6
Total Hours		21

Public Policy Emphasis Area

In addition to the core curriculum requirements for all BSPA majors, students in the public policy emphasis area must take four political science courses, preferably selected from the policy and institutions courses listed below but which may include other political science course offerings as well.

Policy and Institutions Courses

Select four of the following:		12
POL SCI 1450	Introduction To Labor Studies	
POL SCI 2280	Judicial Politics And Policy	
POL SCI 2300	State Politics	
POL SCI 2350	Introduction To Urban Politics	
POL SCI 3300	The American Presidency	
POL SCI 3331	Congressional Politics	
POL SCI 3430	Union Leadership And Administration	
POL SCI 3450	Urban Administration	
POL SCI 3460	The Politics Of Poverty And Welfare	
POL SCI 3480	Environmental Politics	
POL SCI 4460	Urban Planning And Politics	
POL SCI 4510	Comparative Public Policy And Administration	
Other political science course offerings.		
Total Hours		12

Students will adopt a policy concentration of at least 15 credit hours. Possible areas of specialization include, but are not limited to, environmental policy, government and business, society and the legal system, urban policy, labor studies, health care, human services, and nonprofit service provision. In fulfilling the concentration requirement, students, in consultation with the BSPA coordinator, will select courses from related disciplines in addition to taking two more political science courses related to the policy area.

Nonprofit Emphasis Area

In addition to the core curriculum requirements for all BSPPA majors, students in the nonprofit emphasis area are required to complete the following courses:

POL SCI 3420	Public and NonProfit Personnel Management	3
POL SCI 3440 or POL SCI 2400	Public and NonProfit Budgeting Public Administration	3
POL SCI 3700	NonProfit Organizations and Public Policy	3
POL SCI 3710	NonProfits, Civil Society and Volunteerism	3
Total Hours		12

In addition, the Public Affairs Internship (POL SCI 3940) required for the BSPPA must be conducted through a nonprofit organization.

Note: Students considering the B.S. in public policy and administration should see a political science adviser as early as possible to plan their program.

Requirements for the Minors

A general minor in political science can be arranged, as well as specialized minors in eight different subfields of the discipline. Interested students should see a faculty adviser to plan a coherent program of study as a minor field.

Students must achieve a cumulative 2.0 GPA in the political science courses chosen to qualify for the minor. Students may count no more than 3 hours in political science taken on a satisfactory/unsatisfactory basis toward the minor. Students taking an internship POL SCI 3940 may count no more than three hours of the internship toward the minor.

Minor in Political Science, General

Fifteen hours, chosen from among all political science courses.

Minor in American Politics

Select five of the following:		15
POL SCI 1100	Introduction To American Politics	
POL SCI 2280	Judicial Politics And Policy	
POL SCI 2300	State Politics	
POL SCI 2320	African Americans And The Political System	
POL SCI 2350	Introduction To Urban Politics	
POL SCI 2380	The Politics of Gender in the United States	
POL SCI 2420	Introduction To Public Policy	
POL SCI 2650	American Political Thought	

POL SCI 2820	United States Foreign Policy
POL SCI 3260	The Supreme Court
POL SCI 3300	The American Presidency
POL SCI 3331	Congressional Politics
POL SCI 3330	Introduction To Political Behavior
POL SCI 3340	Politics And The Media
POL SCI 3350	Political Parties And Elections
POL SCI 3390	Studies In American Politics
POL SCI 3900	Special Readings (when appropriate)
POL SCI 3940	Public Affairs Internship (when appropriate)

Total Hours	15
-------------	----

Minor in Comparative Politics

POL SCI 1500	Introduction To Comparative Politics	3
Select four of the following:		12
POL SCI 2500	Comparing Different Worlds	
POL SCI 2510	The Politics of European Union	
POL SCI 2530	Political Systems Of South America	
POL SCI 2540	Political Systems Of Mexico, Central America And The Caribbean	
POL SCI 2580	African Politics	
POL SCI 3570	Gender, Ethnicity and Public Policy	
POL SCI 3595	Studies In Comparative Politics	
POL SCI 3900	Special Readings (when appropriate)	
POL SCI 4510	Comparative Public Policy And Administration	

Total Hours	15
-------------	----

Minor in International Relations

Select five of the following:		15
POL SCI 1800	World Politics	
POL SCI 1820	Global Issues	
POL SCI 2520	Middle Eastern Politics	
POL SCI 2820	United States Foreign Policy	
POL SCI 3830	International Political Economy	
POL SCI 3850	International Organizations And Global Problem-Solving	
POL SCI 3860	Studies In War And Peace	
POL SCI 3890	Studies In International Relations	
POL SCI 3900	Special Readings (when appropriate)	
POL SCI 3940	Public Affairs Internship (when appropriate)	
POL SCI 4850	International Law	

Total Hours	15
-------------	----

Minor in Nonprofit Administration

Select five of the following:		15
POL SCI 3420	Public and NonProfit Personnel Management	

POL SCI 3440	Public and NonProfit Budgeting	
POL SCI 2400	Public Administration	
POL SCI 3700	NonProfit Organizations and Public Policy	
POL SCI 3710	NonProfits, Civil Society and Volunteerism	
POL SCI 3940	Public Affairs Internship (must be conducted through a nonprofit organization)	
Total Hours		15

Minor in Political Theory

Select five of the following:		15
POL SCI 1600	Contemporary Political Ideologies	
POL SCI 2610	Ancient And Medieval Political Thought	
POL SCI 2620	Modern Political Thought	
POL SCI 2650	American Political Thought	
POL SCI 3690	The Marxist Heritage	
POL SCI 3900	Special Readings (when appropriate)	
Total Hours		15

Minor in Public Administration

POL SCI 2400	Public Administration	3
Select four of the following:		12
POL SCI 2420	Introduction To Public Policy	
POL SCI 3420	Public and NonProfit Personnel Management	
POL SCI 3440	Public and NonProfit Budgeting	
POL SCI 3450	Urban Administration	
POL SCI 3900	Special Readings (when appropriate)	
POL SCI 3940	Public Affairs Internship (when appropriate)	
POL SCI 4460	Urban Planning And Politics	
POL SCI 4510	Comparative Public Policy And Administration	
Total Hours		15

Minor in Public Law

Select five of the following:		15
POL SCI 1200	Foundations Of Law: An Introduction To Legal Studies	
POL SCI 2260	Law, Politics and Society	
POL SCI 2280	Judicial Politics And Policy	
POL SCI 2290	Gender And The Law	
POL SCI 3200	Constitutional Law	
POL SCI 3210	Civil Liberties	
POL SCI 3260	The Supreme Court	
POL SCI 3900	Special Readings (when appropriate)	

POL SCI 4850	International Law	
Total Hours		15

Minor in Public Policy

POL SCI 2420	Introduction To Public Policy	3
Select four of the following:		12
POL SCI 2300	State Politics	
POL SCI 2350	Introduction To Urban Politics	
POL SCI 2400	Public Administration	
POL SCI 3300	The American Presidency	
POL SCI 3440	Public and NonProfit Budgeting	
POL SCI 3450	Urban Administration	
POL SCI 3460	The Politics Of Poverty And Welfare	
POL SCI 3480	Environmental Politics	
POL SCI 3570	Gender, Ethnicity and Public Policy	
POL SCI 3900	Special Readings (when appropriate)	
POL SCI 3940	Public Affairs Internship (when appropriate)	
POL SCI 4460	Urban Planning And Politics	
POL SCI 4510	Comparative Public Policy And Administration	
Total Hours		15

Minor in Urban Politics

POL SCI 2350	Introduction To Urban Politics	3
Select four of the following:		12
POL SCI 2320	African Americans And The Political System	
POL SCI 3450	Urban Administration	
POL SCI 3460	The Politics Of Poverty And Welfare	
POL SCI 3900	Special Readings (when appropriate)	
POL SCI 3940	Public Affairs Internship (when appropriate)	
POL SCI 4460	Urban Planning And Politics	
Total Hours		15

Minor in Women and Politics

POL SCI 1550	Women And Politics In The Developing World	3
Select four of the following:		12
POL SCI 2290	Gender And The Law	
POL SCI 2380	The Politics of Gender in the United States	
POL SCI 3460	The Politics Of Poverty And Welfare	
POL SCI 3570	Gender, Ethnicity and Public Policy (Comparative)	
POL SCI 3590	Women and Leadership World-Wide: Breaking the Glass Ceiling	

POL SCI 3900	Special Readings (consent of instructor required)	
Total Hours		15

Outstanding BSPPA students may want to consider the BSPPA/MPPA 2+3 program (p. 604). This accelerated program allows students to complete a BS degree and Master of Public Policy Administration (MPPA) degree in five years. The program allows students to apply 12 of the MPPA credit hours towards the BS, reducing the overall required hours for the two degrees to 148 credit hours from the 160 credit hours required when taking the programs separately (120 are required for the BS and 40 for the MPPA). Please see the PPA section of the Bulletin for specific information.

Undergraduate Certificate in Women, Political Leadership and Public Policy

5 courses from among the following course options: 15

POL SCI 1550	Women And Politics In The Developing World
POL SCI 2290	Gender And The Law
POL SCI 2380	The Politics of Gender in the United States
ECON 2410	Work, Families, And Public Policy
POL SCI 2510	The Politics of European Union
POL SCI 3460	The Politics Of Poverty And Welfare
POL SCI 3570	Gender, Ethnicity and Public Policy
POL SCI 3590	Women and Leadership World-Wide: Breaking the Glass Ceiling
POL SCI 3950	Senior Seminar In Political Science (topic specific, with consent)

Capstone Option 3

POL SCI 2900	Studies In Political Science
POL SCI 3900	Special Readings
POL SCI 3940	Public Affairs Internship

Total Hours 18

Bachelor of Arts with Teacher Certification

For information, refer to the Secondary Education section in this Bulletin.

Bachelor of Science in Education: Emphasis in Social Studies

The Political Science requirements are the same as for the B.A. degree except students fulfill the College of Education general education requirements rather than those of the College of Arts and Sciences. For information, refer to the College of Education section in this Bulletin.

Career Overview

Bachelor of Arts, Bachelor of Science, and Master of Arts in Political Science

Political science graduates have done well in obtaining appropriate employment and in pursuing graduate education. Majors develop communications and decision-making skills, learn to analyze complex policy issues, both domestic and international in scope, and have a thorough understanding of government and politics. Political science is a particularly good undergraduate major for pre-law students. Many other majors pursue graduate education in business, education, public

administration, public policy administration, journalism, public relations, non-profit organizations, and many other fields.

Graduate Studies

The department offers the MA and PhD in Political Science. Qualified students may enter the MA through two different routes, either as graduates with a baccalaureate degree or as exceptional undergraduates in the program via a 2 + 3 program.

Master of Arts in Political Science

Admission Requirements: For admission, a student should have a baccalaureate degree with a minimum grade point average of 2.75 and an undergraduate background in the social sciences. The GRE is required, and scores should be submitted at the time of application. Two letters of recommendation are also requested for each student applying to the program. Students who do not meet these requirements may be admitted upon approval of the department and the dean of the Graduate School. Application materials may be obtained from and should be returned to the office of the director of admissions.

Deadlines are July 1 for the fall semester; December 1 for the winter semester; and May 1 for the summer term.

Degree Requirements

Beyond the general requirements of the Graduate School, the department requires a minimum of 27 semester hours of course work, of which 18 hours must be at the 6400 level and 12 hours must be in core courses in political science, including:

POL SCI 6401	Introduction To Policy Research	3
Select three of the following:		9
POL SCI 6410	Introduction To Policy Analysis	
POL SCI 6420	Proseminar In Public Law	
POL SCI 6430	Proseminar In American Politics	
POL SCI 6440	Proseminar In Public Policy Administration	
POL SCI 6450	Proseminar In Comparative Politics	
POL SCI 6470	Proseminar In Urban Politics	
POL SCI 6480	Proseminar In International Relations	

Total Hours 12

Students can plan their degree program to reflect the following six emphasis areas:

- American Politics
- Comparative Politics
- International Politics
- Political Process and Behavior
- Public Administration and Public Policy
- Urban and Regional Politics

Students must also select one of the following exit projects: a six-hour thesis, a six-hour internship, or six hours of additional course work and an approved paper. Students will have a mid-program review at the end of 12-15 hours of course work, at which time they will discuss their academic performance and program with a faculty committee and determine the most appropriate exit project. Each candidate is given a final oral review

conducted by a faculty committee and focused on the course work completed and the student's chosen exit project.

2+3 B.A. and M.A. in Political Science

The 2+3 Combined BA/MA program in Political Science provides an opportunity for students of recognized academic ability and educational maturity to complete the requirements for both degrees in 5 years of full-time study.

The combined program requires a minimum of 140 credit hours of which at least 33 must be at the graduate level in political science. In qualifying for the BA, students must meet all University and College requirements. Students in the combined 2+3 who successfully complete the requirements for the MA degree will be awarded a BA degree simultaneously upon completion of at least 107 hours of undergraduate credit.

Student should apply to the Department for admission to the 2+3 combined degree program in Political Science during the semester they will complete 60 undergraduate credit hours. A cumulative grade point average of 3.0 or higher and two letters of recommendation from faculty are required. Students will be admitted to the 2+3 program under provisional status until they have completed 30 hours in that program with a grade point of 3.0 or higher. After completion of the provisional period, with the recommendation of the Graduate Director, students can be granted full admission into the 2+3 program.

Students must maintain a grade point average of 3.0 or higher throughout the combined program. Students who officially withdraw from the 2+3 combined degree program, who have successfully completed all the regular requirements for the BA degree (120 hours) will be awarded their BA degree.

Undergraduate Requirements for Student in the 2+3 Program

A. The following must be completed prior to enrolling in the 2+3 program

POL SCI 1100	Introduction To American Politics	3
POL SCI 1500	Introduction To Comparative Politics	3
Select two of the following:		6
POL SCI 1600	Contemporary Political Ideologies	
POL SCI 1800	World Politics	
POL SCI 2300	State Politics	
POL SCI 2350	Introduction To Urban Politics	
POL SCI 2400	Public Administration	
POL SCI 2650	American Political Thought	
Total Hours		12

B. Undergraduate Requirements Within the 2+3 Program

Select two of the following:		6
POL SCI 2280	Judicial Politics And Policy	
POL SCI 2620	Modern Political Thought	
POL SCI 3200	Constitutional Law	
POL SCI 3210	Civil Liberties	
POL SCI 3300	The American Presidency	
POL SCI 3331	Congressional Politics	

POL SCI 3350	Political Parties And Elections	
POL SCI 3470	Collective Bargaining	
POL SCI 3480	Environmental Politics	
Select two of the following:		6
POL SCI 2510	The Politics of European Union	
POL SCI 2520	Middle Eastern Politics	
POL SCI 2530	Political Systems Of South America	
POL SCI 2540	Political Systems Of Mexico, Central America And The Caribbean	
POL SCI 2580	African Politics	
POL SCI 3690	The Marxist Heritage (PHIL 3369; INTDSC 3690)	
POL SCI 3830	International Political Economy	
POL SCI 3850	International Organizations And Global Problem-Solving	
POL SCI 4850	International Law	
Select one additional course from B-1 or B-2 .		3
Total Hours		15

C. Graduate Requirements

POL SCI 6401	Introduction To Policy Research	3
Select three of the following:		9
POL SCI 6420	Proseminar In Public Law	
POL SCI 6430	Proseminar In American Politics	
POL SCI 6440	Proseminar In Public Policy Administration	
POL SCI 6450	Proseminar In Comparative Politics	
POL SCI 6470	Proseminar In Urban Politics	
POL SCI 6480	Proseminar In International Relations	
Select five additional graduate Political Science classes. ¹		15
Select Exit Project or Internship or Thesis		6
Total Hours		33

¹ Students should select an emphasis in American Politics, Public Policy, Comparative Politics, Political Theory, or International Relations.

Summary of Credits in Political Science:

- BA: 27 hours
(12 completed in lower division courses before admission to the 2+3 program)
- MA: 33 hours at the graduate level
- TOTAL: 60 hours in Political Science classes

Ph.D. in Political Science

The doctoral program emphasizes theoretical, analytic, and substantive approaches to public policy analysis and administration. Students are provided an opportunity to link core skills in policy analysis and political science with substantive emphasis in specific policy areas. The program is designed to prepare pre-career and mid-career students for advanced positions in policy research and administration, as well as for academic research and teaching.

Admission Requirements

Admission and financial aid decisions are made on the basis of past academic record, intellectual ability, and career commitment and performance. Applications are accepted from students who have either baccalaureate or master’s degrees. Past graduate work will be credited toward degree requirements as appropriate. Applicants must submit:

- 1. complete academic transcripts,
- 2. three letters of recommendation,
- 3. aptitude tests of the GRE and
- 4. a statement of objectives for the course of study.

Application materials may be obtained from and should be returned to the office of the director of admissions. Applications for fall semester should be submitted by February 15 and for winter semester by October 15.

Graduate Assistantships Stipends for teaching and research assistantships (nine month/20 hours per week) are awarded on a competitive basis. Out-of-state educational fees are waived for graduate assistants.

Degree Requirements

The department requires 60 credit hours beyond the baccalaureate degree for completion of the Ph.D. To ensure sufficient background for doctoral-level policy courses, students must demonstrate appropriate competence in computing and data analysis during their course of study. Course requirements are as follows:

Core courses

(18 credit hours)

- 18 credit hours will be required in the areas of research methods, and policy process and institutions. Contact the department for specific courses.
- Additional Requirements (12 credit hours)
- In addition, students will select a minimum of 12 credit hours in public policy, theory, or process as they apply to major subfields in political science.

Policy Concentration

(24 credit hours)

Students, in consultation with the program director, will develop expertise in a substantive policy area. Policy concentrations (many interdisciplinary) include but are not limited to:

- American National Policy
- Urban Politics and Planning
- Comparative/International Policy
- Policy Analysis and Research Social Welfare

Internship

(6 credit hours) optional

The Ph.D. intern program offers an opportunity to gain first-hand experience in select research and administrative positions.

General Examination and Dissertation

Upon completion of course work, students are advanced to candidacy by successfully completing three general examinations,

- 1. public policy institutions, processes, and analysis,
- 2. methodology, and
- 3. the student's chosen subfield and area of policy concentration.

The degree is awarded upon completion and defense of the Ph.D. dissertation.

Career Outlook

Ph.D. in Political Science

The Ph.D. in political science prepares students for three career areas:

- 1. government leadership and management positions at the local, state, and federal levels (both for new employees and in-service employees);
- 2. careers in the private sector, particularly positions in public affairs, policy research, and governmental relations departments of corporations, as well as consulting firms and nonprofit organizations; and
- 3. research and teaching careers in academic institutions.

Requests for further information about the M.A. or Ph.D. program should be sent to the Director of Graduate Studies, Department of Political Science, University of Missouri-St. Louis, One University Blvd, 347 SSB, St. Louis, MO 63121-4499 or by e-mail: umslpolisci@umsl.edu.

Courses

POL SCI 1100 Introduction to American Politics (MOTR POSC 101): 3 semester hours

Introduction to basic concepts of government and politics with special reference to the United States, but including comparative material from other systems. Course fulfills the state requirement.

POL SCI 1200 Foundations of Law: an Introduction to Legal Studies: 3 semester hours

Same as CRIMIN 1200. As a broad liberal-arts approach to the study of law, this course is designed to familiarize students with legal ideas, legal reasoning, and legal processes. It also provides comparative and historical perspectives on law that will help explain legal diversity and legal change. Finally, it offers opportunities to explore some of the persistent issues in law and legal theory: for example, issues about the sources of law, the responsibilities of the legal profession, or the relative merits of the adversary system.

POL SCI 1450 Introduction to Labor Studies: 3 semester hours

This course covers many topics important to the role of unions in the American political system and American society from a labor perspective. Topics include the role of workers in current and future times, unions' institutional structure, collective bargaining strategies and obstacles for union organizing, recent union campaigns, labor's political role, and the relationship between labor and the media.

POL SCI 1500 Introduction to Comparative Politics (MOTR POSC 202): 3 semester hours

This course introduces students to western and non-western systems. It examines similarities and differences in the basic political ideologies, structures, economies, social institutions and governmental processes of developed and developing countries. It also provides frameworks for understanding the cultures of the world that are the basis for formal economic and political institutions. In addition, the course examines the role of non-state institutions, including trans-national ones, in shaping national policies. It uses case studies from Africa, Asia, Latin America, as well as Europe, to enhance student understanding of comparative politics. This course fulfills the cultural diversity requirement.

POL SCI 1600 Contemporary Political Ideologies: 3 semester hours

An introduction to the major political ideologies of the world today. Emphasis is placed on democracy, feminism, Marxism, and nationalism.

POL SCI 1800 World Politics (MOTR POSC 201): 3 semester hours

An introduction to the field of international relations, covering such topics as nationalism, power, foreign policymaking, diplomacy, war, terrorism, arms control and disarmament, economic interdependence, the regulation of conflict, and other aspects of politics among nations.

POL SCI 2000 Political Analysis: 3 semester hours

Prerequisites: Math proficiency of MATH 1020 or higher. An introduction to political analysis, emphasizing both the logic of inquiry and practical methods. Students learn about the construction and evaluation of theories that relate to real-world politics. They also have an opportunity for hands-on experience with qualitative and quantitative methods including graphics, descriptive statistics, cross-tabular and correlational analysis, hypothesis testing, and computer applications.

POL SCI 2102 Introduction to Gender Studies: 3 semester hours

Same as SOC WK 2102, SOC 2102, GS 2102, HIST 2102. This core class is required for all Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

POL SCI 2260 Law, Politics and Society: 3 semester hours

Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor.

This course examines the ways in which law in America connects with politics and society. The course will cover the litigation process, access to the courts, how and why individuals and groups bring litigation to pursue political and policy goals, and how lawyers, judges and other political actors use law to solve policy problems. Attention will be placed on current legal policy issues facing American society.

POL SCI 2280 Judicial Politics: 3 semester hours

Prerequisites: POL SCI 1100 or POL SCI 1200 or consent of instructor.

This course is an examination of the American state and federal legal systems. Topics examined in this course include an analysis of the structure, organization and foundation of courts. Emphasis will be placed on the role of juries, judges, attorneys, litigants, and interest groups in the judicial system. The objective of the course is to evaluate courts as political institutions and analyze the policy-making role of judges.

POL SCI 2290 Gender and the Law: 3 semester hours

Same as GS 2290. This course examines the ways in which laws and interpretations of the laws affect gender equality in the United States. Emphasizing how traditional roles impact both women and men historically and currently, the course highlights major pieces of legislation and court rulings related to employment, economics, education, sexual harassment, pornography, rape, reproductive rights, and domestic relations. The course stresses the impact of federal and state institutions and non-governmental influences on equality. It also addresses gender representation in the legal profession and its effect on judicial decisions. (This course satisfies State requirements in American History and Government).

POL SCI 2300 State Politics: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. An examination of contemporary state politics in the U.S. Covers social, economic and political determinants of policies; federal-state-local relations, elections, interest groups and participation; executive legislative and judicial institutions and processes, policies and their impact. Course fulfills the state requirement.

POL SCI 2320 African Americans and the Political System: 3 semester hours

Prerequisites: POL SCI 1100 or consent of instructor. Examination of the status of African Americans in the context of the American political system. The course will focus on a number of issues, including: attitudes of various publics toward racial concerns; nature of problems in specific policy areas (e.g., unemployment, school desegregation, housing, poverty); representation of African Americans in governmental institutions and the private sector; and the role of African American leadership and civil rights groups in the political process. Course fulfills the state requirement.

POL SCI 2350 Introduction to Urban Politics: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. Examination of structure and process of politics in the urban community, with emphasis on their relationships to community power structures.

POL SCI 2370 The Politics of Identity and Social Justice: 3 semester hours

Examines the meaning of social justice at the intersections of identities linked to race, ethnicity, class, gender, sexuality, age, ability, religion, and citizenship in the United States. We will dissect how the social construction of "difference" within systems of power has resulted in social policies that marginalize some groups more than others. We will also discuss how oppression linked to delineations of difference can be challenged and socially reconstructed, and ultimately used as a source of political empowerment.

POL SCI 2380 The Politics of Gender in the United States: 3 semester hours

Same As GS 2380. Prerequisites: POL SCI 1100 or consent of instructor. This course examines the role of gender in political institutions, practices and policy in the United States, past for political equality, the relationship between gender and political participation, vote choice, and public opinion, and how legislative, executive, and judicial offices are gendered at the national, state, and local levels.

POL SCI 2400 Public Administration: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. Survey of Public Administration, with reference to organization, financial administration, personnel management, judicial control of the administrative process.

POL SCI 2420 Introduction to Public Policy: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. Study of differing approaches to understanding the public policy process. Course surveys the application of social science to public issues and problems.

POL SCI 2430 Public and Nonprofit Organizational Behavior: 3 semester hours

This course examines behavior in public and nonprofit organizations, including theory about how organizations work and how groups and individuals behave within organizations. Theories will be applied in an attempt to explain and predict behavior in an organizational context. Topics include motivation, leadership, goal complexity and ambiguity, organizational structure, culture, and communication in public and nonprofit organizations, as well as the relationship between public and private organizations.

POL SCI 2500 Comparing Different Worlds: 3 semester hours

This course focuses on the role of political institutions, economic structures and social groups in explaining differences in forms of government and levels of socio-economic development. It explores in detail one or more of these themes in cases drawn from developing and developed nations.

POL SCI 2510 The Politics of European Union: 3 semester hours

Prerequisite: POL SCI 1500 or consent of instructor. The European Union has become the driving force in European economic and social development. This course assesses the changing nature of national identity and national sovereignty in Europe. It compares and contrasts key public policies, (single market, welfare, migration, gender mainstreaming, "democratic deficits"), along with core EU actors and institutions, and includes participation in the annual Midwest Model EU.

POL SCI 2530 Political Systems of South America: 3 semester hours

Prerequisites: POL SCI 1500 or consent of instructor. An introduction to the study of the political systems of South America. Examination of the cultural context that has shaped the political, economic, and social development of states in the region. This course satisfies the Cultural Diversity requirement.

POL SCI 2540 Political Systems of Mexico, Central America and the Caribbean: 3 semester hours

Prerequisites: POL SCI 1500 or consent of instructor. An introduction to the study of the political systems of Mexico, Central America, and the Caribbean. Examination of the cultural context that has shaped the political, economic, and social development of these countries. This course satisfies the Cultural Diversity requirement.

POL SCI 2551 National Security Policy and Practice: 3 semester hours

Same as MVS 2850. This simulation-driven course focuses on national security policies and the processes that put these policies into practice. It examines the elements that underpin national security policy and the processes employed by the US government for integrating and synchronizing those instruments in the pursuit of national security objectives.

POL SCI 2580 African Politics: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. An introduction to the nature of societies, governments, and international relations in Africa. The course deals with forms of governance on the continent, regional groupings of states, and persistent conflicts within and among states. Problems of economic underdevelopment, food supplies, health and population trends, and cultural change are analyzed, along with the role of outside major power intervention. Fulfills the Cultural Diversity requirement.

POL SCI 2590 Globalization: Prospects and Problems: 3 semester hours

Globalization is a multidimensional construct, which calls for its study from a multidisciplinary perspective: i.e., economics, political science, history, and anthropology. The course will explore the forces undergirding economic globalization, as well as the factors that are giving rise to a global democratic dispensation. It will also examine previous forms of globalization including archaic globalization, proto-globalization, and modern globalization as well as so-called deviant globalization - the trade in illicit goods and services, which are also highly lucrative: e.g., human trafficking, prostitution, endangered species, narcotics, organ transplants, small arms, etc. Finally, the course will explore cultural globalization and the rise of a global 'pop culture.' The course will include a comparative analysis of the impacts of globalization in all of its manifestations on social groups (e.g., men and women, ethnic and racial minorities, young and old, classes), countries, and regions.

POL SCI 2610 Ancient and Medieval Political Thought: 3 semester hours

Study of political thought from Plato to Machiavelli.

POL SCI 2620 Modern Political Thought: 3 semester hours

Study of political thought from Machiavelli to the present.

POL SCI 2650 American Political Thought: 3 semester hours

History of political thought in the United States from Colonial times to the present.

POL SCI 2800 21st Century International Relations: 3 semester hours

This course will provide a foundation for an informed discourse on theoretical perspectives that shape rapidly changing relations among nations in the 21st century. Students will utilize international political theory to examine methodologies of conflict resolution, peacekeeping, diplomacy, foreign policymaking, international security, global trade and immigration, and also consider current and future impacts of digital technology and cyber security.

POL SCI 2820 United States Foreign Policy: 3 semester hours

Prerequisite: POL SCI 1100 or POL SCI 1500, or consent of Instructor. Examination of the factors influencing the formation and the execution of American foreign policy, with a focus on specific contemporary foreign policy issues.

POL SCI 2850 Gender, Power and International Politics: 3 semester hours

This course provides an overview of key topics on the intersection of gender and international politics, including the emergence of international norms, and laws associated with gendered rights, sexuality, masculinity, and intersectionality. In particular, the course examines: 1) the influence of global social media activism and transnational migrations on international policy-making; 2) transnational advocacy movements and the emergence of new international laws guaranteeing a spectrum of gender rights.

POL SCI 2860 Understanding Terrorism in the 21st Century: 3 semester hours

Same as MVS 2860. This course seeks to provide insight into the use of terrorism, as a means to achieve a political end, in our current globalized environment. It will review various facets of terrorism including societal disturbances that allow terrorist organizations to flourish, various types of domestic and international non-state actors that use terrorism, terrorism as the next generation of warfare, and the global response to the threat of terrorism. Students will exit the course with a more complete understanding of the multi-faceted threat terrorism poses to our increasingly globalized society.

POL SCI 2900 Studies in Political Science: 1-6 semester hours

Selected topics in political science.

POL SCI 3200 Constitutional Law: 3 semester hours

Prerequisites: POL SCI 1100, or POL SCI 1200, or consent of the instructor. Study of leading American constitutional principles regarding legislative, executive, and judicial power, federalism, the commerce clause, and economic due process as they have evolved through the important decisions of the U.S. Supreme Court.

POL SCI 3210 Civil Liberties: 3 semester hours

Prerequisite: POL SCI 1100 or POL SCI 1200 or POL SCI 3200 or consent of instructor. Civil rights in the American constitutional context, emphasizing freedom of religion, freedom of expression, minority discrimination, and rights of defendants.

POL SCI 3220 Labor Law: 3 semester hours

Prerequisites: Consent of instructor. In this course, participants will examine the role of government in the regulation of labor-management relations in the United States. While the focus of the course will be on federal laws regulating private sector labor relations, parallel issues addressed in the Railway Labor Act and state public sector labor relations law will also be covered. Specific topics include the legal framework for the organization of workers, definition of prohibited or unfair labor practices of employers and unions, legal regulation of the collective bargaining process, regulation of the use of economic weapons in labor disputes, enforcement of collective bargaining agreements and the regulation of internal trade union activities.

POL SCI 3260 The Supreme Court: 3 semester hours

Prerequisites: POL SCI 1100, or POL SCI 1200 or consent of the instructor. An examination of the role, function and assertion of power by the U.S. Supreme Court in our constitutional democracy. Topics include an historical overview of the Supreme court, the process of selecting Supreme Court Justices, life in the Court, Supreme Court decision making, Supreme Court policymaking, implementation and impact of Court decisions and the role of the Supreme Court as a national policymaker.

POL SCI 3300 The American Presidency: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. Study of constitutional, political, legislative, and administrative roles played by the American chief executive in the development of public policy.

POL SCI 3330 Public Opinion and Political Participation: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. This course links Americans' political attitudes to their political participation (defined broadly) and explores how governmental institutions, the media, and social group affiliations affect political behavior. It also connects trends in public opinion and participation to the state of American democracy.

POL SCI 3331 Congressional Politics: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. An examination of the Congress of the United States, its history and evolution, its contemporary politics, and its role in the national policy-making process. Topics include candidate recruitment, campaigns and elections, representation, committees, legislative leadership, roles and norms, voting alignments, lobbyists and interest groups, oversight of administration, and House-Senate comparisons, the role of Congress in foreign policy, economic policy, social-welfare policy will be examined.

POL SCI 3340 Politics And The Media: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. This course examines how the political news media operate, the interplay between journalists, politicians, and the public, and media's role in promoting American democracy. Emphasis is placed on understanding the media's impact on various political institutions and actors and how these, in turn, affect the media.

POL SCI 3350 Political Parties and Elections: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. Development, organization, functions, activities of major and minor political parties, pressure groups, election administration, especially in the United States.

POL SCI 3390 Studies in American Politics: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. Selected topics in American politics. May be repeated.

POL SCI 3420 Public and NonProfit Personnel Management: 3 semester hours

Prerequisite: POL SCI 1100, POL SCI 2400 or consent of instructor. A study of personnel practices in the public and nonprofit sectors, including recruitment, job development, labor relations, and administration of equal employment/ affirmative action programs.

POL SCI 3430 Union Leadership and Administration: 3 semester hours

Prerequisites: Consent of instructor. This course will focus on the roles and challenges of union leadership in a changing environment. Topics will include the union leader's roles as representative, organizer and educator as well as administrative responsibilities within the union and the relationship with enterprise management in both adversarial and participatory situations. Options for leadership style and organizational models will be discussed and explored in both theory and practice. Leaders will develop their skills of motivation, speaking strategic planning and managing complex campaigns and diverse organizations.

POL SCI 3440 Public and NonProfit Budgeting: 3 semester hours

Prerequisite: POL SCI 1100, POL SCI 2400; or consent of instructor. Budgeting is the study of "who gets what" and who pays for it. This course examines the administration and politics of federal, state, and local government budgets. Students gain experience in interpreting budget documents and making budget choices, using electronic and other resources.

POL SCI 3450 Urban Administration: 3 semester hours

Prerequisites: POL SCI 1100 or consent of instructor. Study of administrative machinery and practices of metropolitan government, how metropolitan areas organize themselves to provide services, how urban policies are made and implemented, how budgeting and personnel recruitment processes operate, and how these relate to urban policies.

POL SCI 3455 Metropolitan Planning: 3 semester hours

Prerequisites: POL SCI 1100, POL SCI 2400, or consent of instructor. Why do metropolitan areas look the way they do? How much of this was "planned?" Can/should metropolitan development be planned? Who should decide, and how? This course will examine the political processes in metropolitan areas as they relate to planning. We will look at a series of urban plans and see what they have (and have not) accomplished, and look at a range of alternative views of how planning might be done.

POL SCI 3460 The Politics Of Poverty And Welfare: 3 semester hours

Prerequisite: POL SCI 1100 or consent of instructor. An examination of the structure of income inequality in the U.S. and public policies designed to redistribute wealth and to treat poverty. The history of welfare programs, the growth of the welfare state, and attempts to cut social spending are closely examined.

POL SCI 3470 Collective Bargaining: 3 semester hours

This course involves a study of collective bargaining processes including contract negotiations, contract administration, and methods for the resolution of bargaining disputes. Both theoretical and applied issues in collective bargaining will be addressed. Specific topics include the economic determination of bargaining power, legal constraints on the bargaining process, negotiation strategies and techniques, and the use of mediation and arbitration in the resolution of bargaining disputes.

POL SCI 3480 Environmental Policy: 3 semester hours

Prerequisites: POL SCI 1100 or consent of instructor. This course examines the process of environmental policy-making and key environmental issues. Topics include national and international policies toward land, air, and water pollution; energy use; solid and toxic waste disposal; climate change; population; biodiversity; conservation; and sustainability.

POL SCI 3500 The Politics of the Middle East: International and National Dynamics: 3 semester hours

Prerequisite: POL SCI 1100, POL SCI 1500 or consent of instructor. Survey of political movements, governments, and international conflicts in the Middle East. Islam, nationalism, ideologies and economic systems will be studied. The effect of oil and the military will also be considered. This course fulfills the cultural diversity requirement.

POL SCI 3570 Gender, Ethnicity and Public Policy: 3 semester hours

Prerequisite: POL SCI 1100, or POL SCI 1500, or consent of instructor. Raises the question as to whether "more women in politics," stemming from diverse economic, racial, ethnic backgrounds and age groups, will necessarily result in better policies for women and men. Compares gendered and racialized impacts of a wide array of public policies (in the areas of education, employment health care, welfare, and reproductive technologies) across a broad sample of advanced industrial societies. Analyzes the "empowerment" potential of new equality policies being generated at the international and supranational levels (e.g., in the UN and the European Union).

POL SCI 3590 Women and Leadership World-Wide: Breaking the Glass Ceiling: 3 semester hours

Same as GS 3590. Prerequisites: POL SCI 1500 or consent of instructor. Compares women's day-to-day leadership and participation patterns across a wide variety of political-economic contexts, emphasizing their performance as elective and executive office holders. It examines the experiences of individual female leaders, the effect of country-specific nomination and recruitment strategies, party dynamics, and the larger political opportunity structure hindering or promoting the balanced participation of women and men in national leadership. Understanding how gender (the socially constructed meanings related to biological sex) operates within these specific contexts is a major concern.

POL SCI 3595 Studies in Comparative Politics: 3 semester hours

Prerequisites: POL SCI 1500 or consent of instructor. Selected topics in comparative politics. May be repeated.

POL SCI 3690 The Marxist Heritage: 3 semester hours

Same as PHIL 3369. An interdisciplinary study of Marx and leading Marxists, designed to evaluate their influence on recent political, economic, and social thought and institutions.

POL SCI 3700 NonProfit Organizations and Public Policy: 3 semester hours

Prerequisites: POL SCI 1100; Recommended: POL SCI 2420. This course explores the roles of nonprofit organizations in public policy issues through citizen advocacy and political participation. The course begins with an overview of the scope of the nonprofit sector and then examines its political and legal foundations in the U.S. Theories about civic engagement and the rights of association are considered. Students will gain practical knowledge about direct and grassroots lobbying by nonprofit organizations. Discussion and analysis of actual advocacy campaigns carried out through nonprofit effort will be included. The course also investigates the formation of nonprofit political action committees (PACs) and other so-called 527 organizations, as well as ethical abuses of the nonprofit form for political purposes.

POL SCI 3710 NonProfits, Civil Society and Volunteerism: 3 semester hours

Prerequisites: POL SCI 1100 and junior standing. This course introduces basic concepts about the role of voluntary action in democratic society, especially in the context of organizations in the nonprofit sector. Theories of civil society and social capital are explored. Selected approaches to leadership are considered, in addition to the variety of motivations for giving time and resources to the pursuit of social and political change. Students will gain practical skill development in the recruitment, training and utilization of volunteers. Through study of recent case examples, students will develop an appreciation for the characteristics of effective leadership and strategic use of volunteers. In addition, the course includes an overview of new technologies that are being used by voluntary organizations to enlist participation and strengthen commitment of supporters.

POL SCI 3800 Media, Film, and International Politics: 3 semester hours

Prerequisites: Junior level standing or consent of instructor. This course engages students in critical analysis of the role of media, film, and popular culture in shaping international public opinion and policy. Using digital media, film, and interdisciplinary texts, students will analyze how international politics is an integral part of popular culture in shaping norms of wars of intervention, digital violence, and global migration. This course fulfills the cultural diversity requirement.

POL SCI 3830 International Political Economy: 3 semester hours

Prerequisite: POL SCI 1100 or POL SCI 1500, or consent of instructor. This course provides an introduction to international political economy. In particular, it will focus on the politics of international trade, finance, and investment. It will analyze the relationships between developed and developing countries and it will assess the relative usefulness of alternative frameworks for studying international political economy.

POL SCI 3850 International Organizations and Global Problem-Solving: 3 semester hours

Prerequisites: POL SCI 1100, POL SCI 1200; or consent of the instructor. An introduction to the study of international organizations, this course focuses on relationships between nation-states and "nonstate" actors in world politics, including global intergovernmental organizations such as the United Nations and non-governmental organizations such as multinational corporations. Students examine the roles of international institutions in economic development, resource management, and control of violence across national boundaries.

POL SCI 3860 Studies in War and Peace: 3 semester hours

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Exploration, development, and testing of theories about the causes and consequences of war, peace, and conflict among nations. A broad range of literature on war and peace will be reviewed, and applied to crisis situations in the international system.

POL SCI 3880 Diaspora Politics, Transnational Remittances, and Global Citizenship: 3 semester hours

Prerequisites: Instructor consent. This course examines how new and old global diaspora(s) from Europe, Asia, Africa and Latin America shape international relations and global commerce and will examine the impact of evolving international laws dealing with immigration, global remittances, trans-border commerce and citizenship.

POL SCI 3890 Studies in International Relations: 3 semester hours

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Selected topics in international relations. May be repeated.

POL SCI 3900 Special Readings: 1-10 semester hours

Prerequisite: Consent of instructor. Independent study through readings, reports, and conferences. May be repeated.

POL SCI 3940 Public Affairs Internship: 1-6 semester hours

Prerequisite: Junior standing and consent of instructor. Independent study involving work with an appropriate public or private agency. A maximum of six credit hours may be earned.

POL SCI 3950 Senior Seminar in Political Science: 3 semester hours

Prerequisite: POL SCI 2000, senior standing and consent of instructor. Required of all political science majors in their last year of coursework as an integrative, capstone experience. Emphasis is on student-faculty interaction in a seminar format designed to engage upper-level students in a critical examination of a broad theme in political science, leading to the production of a major research paper. Topics vary. May be repeated. This course is not available for graduate student credit.

POL SCI 4040 Survey Research Practicum in Political Science: 3 semester hours

Prerequisite: Junior standing and consent of the instructor. The execution of a sample survey, including establishing study objectives, sampling, questionnaire construction, interviewing, coding, data analysis, and presentation of results.

POL SCI 4060 Theory of Decisions and Games: 3 semester hours

Same as PHIL 4465. Prerequisites: Six hours of Philosophy and junior standing, or POL SCI 6401 (or the equivalent, or consent of the instructor). A study of rational decision-making, including games against nature, zero-sum games, and social choices. Topics will include the following: expected utility maximization, the Prisoner's Dilemma, Nash equilibria, and Arrow's theorem on the impossibility of a social welfare function. Parts of the course are technical in nature; a prior course in mathematics (e.g., finite mathematics, calculus, statistics or an economics course with a mathematical component), symbolic logic, or some other course with comparable mathematical content.

POL SCI 4090 American Government for the Secondary Classroom: 3 semester hours

Same as: SEC ED 4090. Prerequisites: Admission to the Teacher Education Program. TCH ED 3310 or the consent of the instructor. Adapts the themes and subject matter of American Government to the secondary classroom and trains teachers in techniques particularly designed to maximize the use of primary sources, foster critical inquiry, and encourage knowledge of subject matter. Particular emphasis will be placed on defining the broad and connecting methods of inquiry for use in an interactive classroom. Can be counted towards the Political Science major requirement, but not the American Politics subgroup. Counts towards Social Studies certification. Not available for graduate credit.

POL SCI 4345 War Crimes, Genocide, and Justice in the 20th and 21st Centuries: 3 semester hours

Same as SOC 4345, CRIMIN 4345, and MVS 4345. Prerequisite: ENGL 3100. This course provides advanced undergraduate and Master's level students a comprehensive overview of the subject of war crimes, crimes against humanity, genocide and legal responses to these crimes in the modern era. The goal of this course is to engage students in sustained, critical thought about these issues and to foster a deeper understanding of both the causes and consequences—legal, social and human—of these egregious crimes.

POL SCI 4510 Comparative Public Policy and Administration: 3 semester hours

Prerequisite: POL SCI 1500 or consent of instructor. A comparative study of the characteristics of public administrators, their institutions and environments in western democratic, developing nations and communist political systems.

POL SCI 4520 Mega-Cities and Diasporas: Understanding Global Migration: 3 semester hours

Prerequisites: POL SCI 1500 or consent of instructor. This course examines the causes, dynamics and effects of mega-city development and migrating diasporas in a variety of national settings. Case studies include cities based in Europe, South America, China, India, Turkey, and parts of Africa, fostering global awareness, as well as an understanding of the "interconnectedness" of politics, economics and climate change across the planet. This course fulfills the cultural diversity requirement.

POL SCI 4850 International Law: 3 semester hours

Prerequisite: POL SCI 1100, POL SCI 1500, or consent of instructor. Study of the international legal system, including the content and operation of the laws of war and peace, how law is created and enforced with regard to the oceans and other parts of the globe, and the relationship between international law and international politics.

POL SCI 4900 Topics in Political Science: 3 semester hours

Prerequisites: POL SCI 1100 or consent of instructor. Selected topics in Political Science.

POL SCI 6300 Leadership and Management in NonProfit Organizations: 3 semester hours

Same as P P ADM 6300 and SOC WK 6300. Prerequisites: Graduate standing required. Addresses the role and scope of the independent sector in the United States, as well as the leadership and management of nonprofit organizations within that sector. Topics include the economic and political scope of the independent sector, the role of volunteerism in a democratic society, and the role and scope of philanthropy. Topics in voluntary organization management and leadership include the dynamics, functions and membership structure of NPOs, especially staff-board and other volunteer relations; governance and management of NPOs; resource mobilization; and program development management and evaluation.

POL SCI 6401 Introduction to Policy Research: 3 semester hours

Procedures for testing explanations, including research design, principles of measurement, probability sampling, methods of data collection, and techniques for analyzing data.

POL SCI 6402 Intermediate Techniques in Policy Research: 3 semester hours

Prerequisite: Graduate standing and POL SCI 6401. Elementary distribution theory, statistical inference, and introduction to multiple regression. Emphasis on practical applications.

POL SCI 6403 Advanced Techniques in Policy Research: 3 semester hours

Prerequisite: Graduate standing and POL SCI 6402. Selected topics in policy research emphasizing forecasting, modeling and estimation.

POL SCI 6404 Multi-Method Research Design: 3 semester hours

Prerequisite: POL SCI 6403 or consent of instructor. Develops policy research skills that combine qualitative and quantitative social science tools and applies an appropriate mix of these tools to specific policy problems. Topics include alternative approaches to causal analysis, levels of analysis, triangulation from a variety of qualitative and quantitative research techniques, building contextual effects into multiple research projects, techniques for assessing alternative program theories and clarifying implicit assumptions, and meta-analysis of secondary data sources.

POL SCI 6405 Directed Readings in Research Methods: 1-10 semester hours

Independent study through readings, reports, research projects, and conferences.

POL SCI 6410 Introduction to Policy Analysis: 3 semester hours

Same as P P ADM 6000. Systematic development of a critical/analytic base for dealing with public policy.

POL SCI 6415 Directed Readings and Research in Public Policy: 1-10 semester hours

Same as P P ADM 6150. Prerequisite: Consent of instructor. Independent study through readings, reports, research projects, and conferences. May be repeated for credit, provided the subject matter is different.

POL SCI 6418 Social and Economic Development Policy: 3 semester hours

Same as SOC WK 6250. Prerequisites: SOC WK 5200 or equivalent or consent of instructor and graduate standing. Examines major trends and alternatives in social and economic development policy and practice in state, national, and international perspectives. Students will develop skills in policy analysis and development.

POL SCI 6420 Proseminar in Public Law: 3 semester hours

Study of judicial systems and processes (judges, courts, litigants, and juries) and evaluation of legal policies (Compliance, impact and deterrence).

POL SCI 6422 Law, Courts and Public Policy: 3 semester hours

Same as CRIMIN 6422. Prerequisites: Graduate Standing. An analysis of the role of courts as policymaking institutions and the law as policy. We will explore the role of judges as policymakers, consider the attributes of courts, (both trial and appellate) that make them appropriate yet limited targets for advocates of reform, and the implementation and impact of court decisions. We will consider recent examples of judicial involvement in state and national policymaking. In addition, we will examine the role of lawyers and interest groups in selecting litigation rather than alternative political processes for policy change.

POL SCI 6425 Directed Readings and Research in Public Law: 1-10 semester hours

Independent study through readings, reports, research projects, and conferences.

POL SCI 6430 Proseminar in American Politics: 3 semester hours

Study of individual and group political behavior including socialization, participation, consensus formation, representation, legislative and judicial behavior.

POL SCI 6431 Seminar in American Politics: 3 semester hours

Research problems and design in American political process and behavior. May be repeated for credit when the subject matter is different.

POL SCI 6435 Directed Readings and Research in American Politics: 1-10 semester hours

Independent study through readings, reports, research projects, and conferences.

POL SCI 6440 Proseminar in Public Policy Administration: 3 semester hours

Examination of major approaches to analyzing public policies and their administration. Emphasis is on the effects of administrative organization and procedures on policy decisions and their impacts. Specific topics may include administrative accountability, inter-governmental relations, public-private interaction, implementation of processes, bureaucratic expertise, the legal environment of public service and merit issues.

POL SCI 6442 The Policy Process: 3 semester hours

Prerequisite: Graduate standing. This course will examine how public policies are made in the United States. It will cover different theories of the policy process, including how political actors get the government to focus on certain problems, form coalitions to enact policies, and generate support for their implementation. Finally, the course will examine how well various policy models apply to different policy domains.

POL SCI 6443 Health Care Policy: 3 semester hours

Same as P P ADM 6430, GERON 6443, and SOC WK 6443.

Prerequisites: Graduate Standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

POL SCI 6444 Seminar in Public Policy and Aging: 3 semester hours

Same as GERON 6444 and P P ADM 6444. Prerequisites: Consent of instructor. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include: housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

POL SCI 6445 Directed Readings and Research in Public Administration: 1-10 semester hours

Independent study through readings, reports, research projects, and conferences.

POL SCI 6446 Selected Topics in Health Care Policy: 3 semester hours

Same as P P ADM 6460. Prerequisite: Consent of Instructor. The study of specialized issues and methods relating to health care policy. May be repeated for credit, provided the subject matter is different.

POL SCI 6448 Political Economy and Public Policy: 3 semester hours

Prerequisite: Graduate standing. This course examines political economy in its contemporary manifestations as public choice and as the study of the ways in which institutional power shapes economic policies and performance. The course explores the origins and major concepts of political economy, the institutions of economic policymaking and economic policies in the U. S. It emphasizes the consequences of budget constraints inflation, unemployment and sectoral decline on the design and administration of public programs at all levels of government.

POL SCI 6449 Human Resources in the Public Sector: 3 semester hours

Same as SOC WK 6449 and P P ADM 6490. Prerequisites: P P ADM 6600 or consent of Instructor. Presents an overview of personnel and labor relations in the public sector. Particular emphasis placed on issues which are unique to the public sector such as the merit system, the questions of representative bureaucracy and the constraints of personnel in the nonprofit sector. The topics include: personnel reforms in the federal sector, equal employment and affirmative action policies, testing, selection, hiring, comparable worth, job evaluation and labor relations including grievance arbitration and collective bargaining.

POL SCI 6450 Proseminar in Comparative Politics: 3 semester hours

Classification and typology of political systems; structural-functional analysis; political culture, ideology, affiliation and participation; decision-making processes; political roles; organization of authority.

POL SCI 6451 Seminar in Comparative Politics: 3 semester hours

Research problems and design in comparative politics. May be repeated for credit when the subject matter is different.

POL SCI 6452 Public Policy of Conservation and Sustainable Development: 3 semester hours

Same as BIOL 6250. Prerequisites: Graduate standing in Political Science or Biology and consent of instructor. Prior course in ecology is recommended. This course will introduce the student to concepts and techniques for formulating, implementing, and analyzing public policy with an emphasis on environmental concerns, conservation, and sustainable development. The course will be team taught by a political scientist and a biologist. Course materials will include case studies that demonstrate the special problems of environmental policymaking in developing and developed economies.

POL SCI 6455 Directed Readings and Research in Comparative Politics: 1-10 semester hours

Independent study through readings, reports, research projects, and conferences.

POL SCI 6465 Directed Readings and Research in Political Theory: 1-10 semester hours

Independent study through readings, reports, research projects, and conferences.

POL SCI 6470 Proseminar in Urban Politics: 3 semester hours

Examination of the relationship between the social, economic and political systems of urban areas. Urban political structure, patterns of influence, political participation and communication and political change. Special attention to problems of access to and control of urban political systems.

POL SCI 6471 Seminar in Urban Politics: 3 semester hours

Research problems and design in urban and regional politics. May be repeated for credit when the subject matter is different.

POL SCI 6475 Directed Readings and Research in Urban Politics: 1-10 semester hours

Independent study through readings, reports and conferences.

POL SCI 6480 Proseminar in International Relations: 3 semester hours

Examination of various approaches to the study of international politics and foreign policy, focusing on studies of conflict, decision-making, international political economy, and related topics. Included are realist, idealist, and Marxist perspectives.

POL SCI 6481 Seminar in International Relations: 3 semester hours

Research problems and design in international politics. May be repeated for credit when the subject matter is different.

POL SCI 6482 International Political Economy: 3 semester hours

Prerequisite: Graduate standing. This course will examine the theoretical and policy issues of international political economy. In particular, it will focus on the politics of international trade, finance and investment. It will also analyze the themes of interdependence, hegemony, and dependency, as well as consider relations between developed and developing countries. Finally, the relative usefulness of liberal, Realist and Marxist approaches to the study of international political economy will be weighed.

POL SCI 6485 Directed Readings and Research in International Relations: 1-10 semester hours

Independent study through readings, reports, research projects, and conferences.

POL SCI 6488 Studies In International Relations: 1-6 semester hours

Prerequisites: Graduate standing or permission of instructor. Selected topics in international studies. May be repeated for credit provided the topic of the course is different each time.

POL SCI 6490 Strategic and Program Planning for Nonprofit Organizations: 3 semester hours

Same as P P ADM 6550 and SOC WK 6491. Prerequisites: Graduate standing or consent of instructor. Strategic and program planning enable an organization to concentrate on efforts and set priorities guided by a mission, a vision, and an understanding of its environment. Focus is on preparing a strategic plan and a program plan for a nonprofit organization and analyzing an organization's ability to deliver goods and/or services to its constituents in today's economic, social and political climate.

POL SCI 6494 Thesis Research: 1-10 semester hours

.

POL SCI 6495 Internship: 1-6 semester hours

Independent study involving work with an appropriate public or private agency.

POL SCI 6499 Directed Dissertation Proposal Research: 3 semester hours

Prerequisites: Consent of instructor. Supervised study through readings and research leading to the preparation of a dissertation proposal plan. Open to doctoral students who have completed at least 42 hours of course work. The proposal plan will indicate the following: statement of research question, importance of the problem, literature review and research design.

POL SCI 7499 Dissertation Research: 1-10 semester hours

.

Pre-professional Programs

Students at the University of Missouri-St. Louis may develop pre-professional study programs in either law or the health professions. With early and careful advising, students may develop an appropriate program to prepare for the intended professional study.

Students should seek pre-professional advisors in their interest area early in their academic careers to ensure development of sound, comprehensive study programs that fulfill the admission requirements of the professional program to which they wish to apply.

The following information on pre-professional study at UMSL is provided to give students minimal guidelines and assistance in planning a program.

For advisement and information, contact the Marcus Allen Advising Center in the College of Arts and Sciences, 303 Lucas Hall, 314-516-5501

Pre-Law

Pre-law students at UMSL come from a variety of majors, including Art History, Criminal Justice, Economics, English, History, Philosophy, Political Science, and many more. Many of these majors offer pre-law tracks or minors, and you can identify yourself as a pre-law student at any time during your career at UMSL. The Pre-Law Committee of the American Bar Association (ABA) advises that a wide range of undergraduate majors can serve as a path to law school:

The ABA does not recommend any undergraduate majors or group of courses to prepare for a legal education. Students are admitted to law school from almost every academic discipline. You may choose to major in subjects that are considered to be traditional preparation for law school, such as history, English, philosophy, political science, economics or business, or you may focus your undergraduate studies in areas as diverse as art, music, science and mathematics, computer science, engineering, nursing or education. Whatever major you select, you are encouraged to pursue an area of study that interests and challenges you, while taking advantage of opportunities to develop your research and writing skills. Taking a broad range of difficult courses from demanding instructors is excellent preparation for legal education. (Source: the American Bar Association (http://www.americanbar.org/groups/legal_education/resources/pre_law.html))

After graduating from UMSL, students have gone on to attend law school locally at Saint Louis University, Washington University in St. Louis, as well as at the University of Missouri-Columbia and University of Missouri-Kansas City. Graduates attend prestigious law schools outside the St. Louis area as well.

There are hundreds of UMSL graduates who have gone to law school and now work as lawyers, judges, or in other careers in the legal profession. Many of them remain in the St. Louis area, and the pre-law program at UMSL regularly brings them to campus to interact and share advice with students. By declaring yourself to be pre-law, you will receive updates about upcoming events and opportunities to meet and connect with alumni in the legal profession.

The pre-law advisor can assist you in selecting courses that will best meet your interests while also allowing you to develop the skills that are important for a successful law school application. For more information, please refer to the UMSL pre-law advising website (<http://www.umsi.edu/divisions/artscience/student-resources/prelaw.html>).

Pre-Health Sciences

The University of Missouri - St. Louis provides advising for students planning to continue their studies to become healthcare professionals. While there are no pre-health majors, the prerequisite classes necessary for entry into health professions schools are offered in both the Fall and Spring Semesters with some being offered in the Summer as well. This allows students to choose any major offered by UMSL to be completed while pursuing their desired pre-health track. While some professional programs might not require a baccalaureate degree, it is strongly recommended to complete one in order to be as competitive as possible when applying.

There are no requirements to declaring a pre-health track, but students that have attended UMSL for two semesters and whose GPA is below a 2.7 will no longer be considered on a pre-health track. Students are able to appeal to be reinstated on a pre-health track after one semester.

Programs that are covered by UMSL's pre-health advising include but are not limited to: medicine, dentistry, optometry, pharmacy, veterinary science, physician assistant, occupational therapy, physical therapy, chiropractic, and clinical lab science. For pre-health advising please contact 314-516-5501 for an appointment.

In addition to the courses listed below, students should actively seek out extracurricular opportunities. Such activities can include volunteering, shadowing, research, and organizational leadership. Students are encouraged to join some of the many on-campus organizations including one of the pre-health societies. Information about student organizations can be found at the Office of Student Life (<http://www.umsi.edu/studentlife/osl>).

Since admission requirements may vary between schools, students should consult the catalogs¹ of the programs to which they intend to apply. Updated information may be found on the pre-health website: <http://www.umsi.edu/divisions/artscience/student-resources/prehealth/index.html>.

Suggested Courses

Many health professions schools require or recommend the following undergraduate courses²:

Biology

BIOL 1831	Introductory Biology: From Molecules to Organisms (MOTR BIOL 150L)	5
BIOL 1821	Introductory Biology: Organisms and the Environment (MOTR BIOL 150L)	5
BIOL 2012	Genetics	3
BIOL 2482	Microbiology	3
BIOL 3622	Cell Biology	3
BIOL 1131	Human Physiology and Anatomy I	4
BIOL 1141	Human Physiology and Anatomy II	4

Chemistry

CHEM 1111	Introductory Chemistry I (MOTR CHEM 150L)	5
CHEM 1121	Introductory Chemistry II	5
CHEM 2612	Organic Chemistry I	3
CHEM 2622	Organic Chemistry II	3

CHEM 2633	Organic Chemistry Laboratory	2
CHEM 4712	Biochemistry	3

Mathematics

Select courses at least through calculus, as appropriate for the major degree.²

MATH 1100 or MATH 1800	Basic Calculus Analytic Geometry and Calculus I	3-5
MATH 1320	Introduction to Probability and Statistics	3

Physics

As appropriate for the degree chosen:² 8-10

PHYSICS 1011 & PHYSICS 1012	Basic Physics I (MOTR PHYS 150L) and Basic Physics II	8
or		
PHYSICS 2111 & PHYSICS 2112	Physics: Mechanics and Heat (MOTR PHYS 200L) and Physics: Electricity, Magnetism, and Optics	10

¹ The campus health professions advisor has copies of these catalogs. Call 314-516-5501 for an appointment.

² Consult with the health professions advisor to determine the appropriate course(s).

Since students are not confirmed for admission to professional schools until the science requirements for admission are fulfilled, students should meet the science requirements before the end of the junior year. To complete these requirements in time, BIOL 1831 and BIOL 1821, Introductory Biology I and II as well as CHEM 1111 and CHEM 1121, Introductory Chemistry I and II should be taken during their first three semesters.

Successful completion of these recommended courses also helps students prepare for required standardized exams.

Students should take the required national standardized examination early in their junior year as is appropriate for the exam: The Medical College Admission Test (MCAT) for Pre-Med students; the Dental Aptitude Test (DAT) for Pre-Dental students; the Optometry Admission Test (OAT) for Pre-Optometry students; and the Pharmacy College Admission Test (PCAT), (if required) for Pre-Pharmacy students; and the Graduate Record Exam (GRE) is generally sufficient for other professional healthcare school. (Students should consult with their intended professional school for appropriate test information.)

Each year the number of applicants to health profession schools exceeds the number of available places. Students should meet with Career Services (<http://www.ums1.edu/depts/career>) and the various campus advising resources are available to students to explore alternative plans should they not be accepted.

Pre-Optometry

The University of Missouri-St. Louis offers a four-year program of study leading to the Doctor of Optometry degree; this professional degree is administered by the College of Optometry. It is one of only 20 schools or colleges of optometry in the United States and the only one in the state of Missouri. This program, as a result, makes UMSL an ideal institution for Pre-Optometry education. Various programs are available for Pre-Optometry students as noted below.

Students may pursue a traditional 4 + 4 program, which is a bachelor's degree followed by the four-year graduate optometry program. In this case, students may pursue any bachelor's degree, as long as the pre-optometry requirements are met in biology, chemistry, math, physics, psychology and English.

Alternatively, the College of Arts & Sciences sponsors a 3+4 program in which the undergraduate degree is granted when the student satisfactorily completes the first semester of the professional program and has met all of the conditions for the specific undergraduate degree for which the student has applied. Most commonly, the degree awarded will be a Bachelors of Interdisciplinary Studies or a B.S. in Biology.

Students interested in this program must apply with the campus pre-health advisor and maintain a G.P.A. of 3.2. Some summer classes may be expected, and the student should be prepared to take the OAT by the end of their sophomore year.

For more information on admission requirements for the College of Optometry, please refer to the Optometry section of this Bulletin.

The recommend course schedule can be found below, any changes would need to be approved of by both the Pre-Health Advisor, and the College of Optometry:

Freshman			
Fall	Hours Spring	Hours Summer	Hours
ENGL 1100	3 CHEM 1111	5 BIOL 1131	4
MATH 1030	3 BIOL 1821	5 BIOL 1141	4
MATH 1035	2 MATH 1800	5	
PSYCH 1003	3		
General Education: Humanities	3		
INTDSC 1003	1		
	15	15	8

Sophomore			
Fall	Hours Spring	Hours Summer	Hours
PHYSICS 1011	4 PHYSICS 1012	4 Take the OAT

Psychological Sciences

General Information

Psychology Academic Advising Office

Undergraduate psychology majors and other students interested in majoring or minoring in Psychological Sciences should visit an Academic Advisor in the Psychology Academic Advising Office (Stadler 322) to receive specific information on degree requirements and course offerings, discuss questions about career options, and receive information about graduate work in Psychology. All students are encouraged to see a Psychology Academic Advisor regularly throughout their collegiate careers. It is especially important for all students who are within one calendar year of graduation to meet with a Psychology Academic Advisor. Students will minimize waiting time and will be assured one-to-one attention from an Academic Advisor by calling (314) 516-4561 to schedule an appointment. Office hours for Psychology Academic Advising can be obtained by e-mailing: psy_advising@umsl.edu.

Career Outlook

The undergraduate major in Psychological Sciences can provide the foundation for further training in psychology at the graduate level, the background necessary for graduate training in other fields such as the health professions, social work or counseling, or the liberal arts background necessary for entry level positions in many fields such as business, communication, and human services and mental health positions. To function specifically as a psychologist, a graduate degree is required. For more career information please schedule an appointment with an Academic Advisor in the Psychology Academic Advising Office (Stadler 322; 314-516-4561; psy_advising@umsl.edu). For additional information, visit the American Psychological Association website at www.apa.org (<http://www.apa.org>).

Facilities

The department has several animal and human experimental laboratories furnished with a wide range of psychophysiological equipment. The department also operates four facilities (Community Psychological Services (CPS), the Center for Trauma Recovery (CTR), the Center for Behavioral Health (CBH), and Children's Advocacy Services of Greater St. Louis (CASGSL)) which provide training opportunities for students in Psychology, as well as providing psychological treatment and assessment services for citizens of the region.

Program Overview

The Psychological Sciences department offers a broad-based curricular plan leading to the Bachelor of Arts (B.A.) or the Bachelor of Science (B.S.) degree in Psychology as well as a minor in the field. The minor is available through online course work. There are several certificates that can be earned through the department including an undergraduate certificate in Workplace and Organizational Science (WOS) and an undergraduate and a graduate certificate in Trauma Studies. The department also participates in two interdisciplinary certificates with one in Neuroscience and a second in Child Advocacy Studies (CAST). The

department also offers a terminal Master of Arts in Psychology, with a specialization in Behavioral Neuroscience. The department offers two options within its Ph.D. Program: Clinical Psychology or Behavioral Neuroscience.

Undergraduate Programs

General Education Requirements

Majors must satisfy the university and college General Education curricular requirements (p. 41). Selected courses in Psychology may be used to meet General Education Social and Behavioral Sciences and/or Valuing requirements. The courses are listed here in the Bulletin and can be found on the Degree Audit Report System.

Undergraduate Requirements

Majors in Psychology can choose between a track toward the Bachelor of Arts (B.A.) degree or a Bachelor of Science (B.S.) degree. The below courses are required for both B.A. and B.S. degrees. However, other requirements for the B.A. and B.S. degrees differ. Please see descriptions below for each degree and plan your coursework accordingly.

PSYCH 1000	Choosing A Career In Psychology	1
PSYCH 1003	General Psychology	3
PSYCH 2201	Psychological Statistics	4
PSYCH 2219	Research Methods	3
PSYCH 2211	Introduction To Biological Psychology	3
PSYCH 2245	Abnormal Psychology	3
PSYCH 2160 or PSYCH 2270	Social Psychology Developmental Psychology: Infancy, Childhood And Adolescence	3
PSYCH 4999	Integrated Psychology	2
Total Hours		22

Additional Notes

Psychology majors must not take courses in excess of 50 hours in Psychology. Credits completed in Psychology in excess of 50 will not count toward graduation. For example, students earning 53 hours in Psychology will consequently be required to earn a minimum of 123 hours to graduate.

The three course sequence of Math, Psychological Statistics (PSYCH 2201), and Research Methods (PSYCH 2219) require a minimum of three semesters to complete. Students must satisfy the current University mathematical skills requirement before taking PSYCH 2201, Psychological Statistics. PSYCH 2201 is a prerequisite for PSYCH 2219, and hence, PSYCH 2201 must be completed with a grade of C- or higher PRIOR to enrollment in PSYCH 2219.

PSYCH 2201 and PSYCH 2219 cannot be taken concurrently. Students are advised to plan accordingly and to seek assistance from Psychology Academic Advising whenever needed.

Bachelor of Arts in Psychology

Candidates for the B.A. must complete at least 34, but no more than 50, hours of courses taught by or cross-listed with the Department of Psychological Sciences. In addition to the above courses, students must complete four courses numbered 3000 to 4998. No more than 3 hours can be PSYCH 3295 or PSYCH 3390.

Candidates must have a cumulative grade point average of 2.0 or higher in the major overall, and must earn a C- or above in each of the courses comprising the 34 credits applied to the B.A. degree in Psychology. Failure to earn a C- or above in the required courses will necessitate re-taking them for a satisfactory completion of the C- requirement. No Psychology courses taken on a satisfactory/unsatisfactory basis may be applied to the major.

In addition, candidates for the B.A. are required to satisfactorily complete 13 credit hours in one foreign language.

Bachelor of Science in Psychology

General Education Course Requirements

Bachelor of Science in Psychology majors must complete all general education requirements (p. 41) of the university as outlined in this Bulletin. Candidates must take MATH 1030 or MATH 1040 as part of their general education coursework.

Additional Requirements

Candidates for the B.S. in Psychology must complete at least 37, but no more than 50, hours of courses taught by or cross-listed with the Department of Psychological Sciences. In addition to the above courses, students must complete the following:

Select four Psychology courses numbered 3000 to 4998 ¹	12
In addition, select at least one of the following Psychology courses	3

Neuroscience

PSYCH 4300	Introduction to Psychopharmacology: Drugs and Mental Illness
PSYCH 4314	Behavioral Neuroscience
PSYCH 4330	Hormones, The Brain and Behavior
PSYCH 4340	Introduction to Human Neuroanatomy
PSYCH 4349	Human Learning and Memory
PSYCH 4350	Emotions and the Brain
PSYCH 4372	Introduction to Social Neuroscience

Clinical

PSYCH 3340	Clinical Problems of Childhood
PSYCH 3500	Health Psychology
PSYCH 3820	Cross-Cultural Psychology
PSYCH 4374	Introduction to Clinical Neuropsychology

Applied

PSYCH 3316	Leadership: Theory and Practice
PSYCH 3318	Industrial and Organizational Psychology
PSYCH 4250	Stereotyping, Prejudice, and Discrimination
PSYCH 4365	Psychological Testing and Assessment

Math and Natural Science ^{2,3}

Choose one of the following:	4-5
BIOL 1141	Human Physiology And Anatomy II
BIOL 1821	Introductory Biology: Organisms And The Environment

BIOL 1831	Introductory Biology: From Molecules To Organisms	
CHEM 1111	Introductory Chemistry I	
CHEM 1121	Introductory Chemistry II	
MATH 1800	Analytic Geometry And Calculus I	
MATH 1900	Analytic Geometry And Calculus II	
PHYSICS 1011	Basic Physics I	
PHYSICS 1012	Basic Physics II	
Choose one additional course in Biology, Chemistry, Mathematics, or Physics of at least 3 credit hours.		3
Social Science ^{2,3}		3
Select one course from Anthropology, Criminology & Criminal Justice, Economics, Political Science, and Sociology		
Total Hours		25-26

- 1 No more than 3 hours can be PSYCH 3295 or PSYCH 3390.
- 2 These courses must be above and beyond the General Education requirements.
- 3 Pre-requisite Biology courses for PSYCH 2211 Biological Psychology may not be used to meet the Natural Science requirement.

Candidates must have a cumulative grade point average of 2.0 or higher in the major overall, and must earn a C- or above in each of the courses comprising the 37 credits applied to the B.S. degree in Psychology. Failure to earn a C- or above in the these required courses will necessitate re-taking them for a satisfactory completion of the C- requirement in all 37 hours. No Psychology courses taken on a satisfactory/unsatisfactory basis may be applied to the major.

Requirements for the Minor

Candidates must complete a minimum of 15 hours of courses taught by or cross-listed with the Psychology Department, including at least 6 hours at the 3000 or 4000 level (no more than 3 of these can be PSYCH 3390). Candidates must have a cumulative grade point average of 2.0 or higher in the minor. Psychology courses taken on a satisfactory/unsatisfactory basis may not be applied to the minor.

Undergraduate Certificate in Trauma Studies

The trauma studies certificate is designed for students who are interested in a focused specialty in trauma studies or victim services in addition to their own major. It is appropriate for students in the College of Arts and Sciences or any of the schools of the university. It is particularly appropriate for students wishing to pursue careers in psychology, social work, sociology, criminology, law, public health, or nursing.

Requirements

A student may earn a trauma studies certificate by completing 18 hours with a GPA of 2.0 or better from at least three departments from the following courses:

Select at least four of the following:	12
Criminology and Criminal Justice	
CRIMIN 1120	Criminal Law
CRIMIN 4300	Communities And Crime
CRIMIN 4350	Victimology
Psychology	

PSYCH 2232	Psychology Of Trauma	
PSYCH 3390	Directed Studies (for three credits only toward certificate) ¹	
Social Work		
SOC WK 3100	Introduction To Strategies for Social Work Practice	
SOC WK 4601	Abused And Neglected Children	
SOC WK 4602	Child Welfare Practicum Seminar	
Sociology		
SOC 3250	Sociology Of Victimization	
Select up to two of the following:		6
Criminology and Criminal Justice		
CRIMIN 3230	Crime Prevention	
CRIMIN 2240	Policing	
CRIMIN/SOC 4340	Race, Crime, And Justice	
Political Science		
POL SCI 2400	Public Administration	
POL SCI 2420	Introduction To Public Policy	
Psychology		
PSYCH/SOC 2160	Social Psychology	
PSYCH 2230	Psychology Of Gender	
PSYCH 2245	Abnormal Psychology	
Social Work		
SOC WK 4630	Gender Issues in Social Work	
Sociology		
SOC 2102	Introduction To Gender Studies	
SOC/PSYCH 2160	Social Psychology	
SOC 3268	The Sociology Of Conflict	
SOC/CRIMIN 4340	Race, Crime, And Justice	
Total Hours		18

¹ Please seek approval of the Coordinator of the Trauma Studies Certificate in advance

Special Topics courses relevant to trauma studies may be included in the certificate when approved in advance by the coordinator of the trauma studies certificate.

Certificate in Workplace and Organizational Science

This certificate can prepare individuals for graduate studies in industrial-organizational psychology, management, or other areas with a focus on behavior in organizations. It also provides training relevant to managing individuals in organizations that can be applied broadly to business, military, non-profit, health care, law enforcement, and other settings.

Note: **No more than 6 credit hours may be applied from the student's major.**

Required Courses

MGMT/SOC 3600	Management And Organizational Behavior	3
PSYCH 3318/MGMT 3623	Industrial And Organizational Psychology	3

Goal 1: Breadth of Study 9

Choose three courses from the following:

AERO 2001	The Air Force Way
COMM 2231	Communication In The Organization
COMM 2232	Effective Communication In The Organization: Tools For Leadership
MIL SCI 1101	Introduction to Leadership I
MIL SCI 2201	Innovative Team Leadership
MVS 2100	Veterans in America
MGMT 3611	Advanced Management And Organizational Behavior
MGMT 3621	Human Resource Management
MGMT 3622	Industrial And Labor Relations
MGMT 3624	Employee Training And Development
MGMT 3625	Leadership in Organization
PSYCH 2222	Group Processes In Organizations
PSYCH 3316	Fundamentals Of Leadership
PSYCH 3320	Personnel Assessment
PSYCH 4321	The Dark Side of Organizational Behavior
PSYCH 4365	Psychological Testing and Assessment
POL SCI 4060	Theory Of Decisions And Games
SOC 3260	Social Interaction In Small Groups
SOC 4336	Sociology of Organizations
SOC 4354	Sociology Of Business And Work Settings

Goal 2: Cultural Competency 3

Choose one course from the following:

COMM 3332	Intercultural Communication
COMM 3337	Male/Female Communication
MGMT/INTL BUS 3680	International Management
PSYCH 3820	Cross-Cultural Psychology
PSYCH 4250	Stereotyping, Prejudice, and Discrimination
SOC 1241	Globalization and Social Change

Total Hours 18

Graduate School Preparation

In addition to the required courses listed above, students interested in applying to graduate school in Psychology are strongly encouraged to become involved in a research project with a Psychology faculty member by securing enrollment in PSYCH 3390, Directed Studies. These positions are available on a limited and competitive basis. No enrollments in PSYCH 3390 are possible without special Instructor permission. Those invited to participate must obtain a special consent form from the instructor in order to enroll. Contact the Psychology Academic Advising office for more information on such positions (psy_advising@umsl.edu).

Undergraduate Learning Outcomes

The Undergraduate Psychology Learning Goals and Outcomes represent reasonable departmental expectations for the psychology major at the University of Missouri-St Louis. They have been modified from the undergraduate learning goals recommended by the American Psychological Association.

Outcome 1. Recommended Courses for General Knowledge Base of Psychology

- Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
- PSYCH 1003 introduces these concepts; all other psychology courses expand on these issues in more depth.

Goal 2. Research Methods in Psychology

- Students will understand basic research methods in psychology, including the development and refinement of theory, hypothesis generation and testing, research design, data analysis and interpretation.
- All courses touch on these issues, but two required courses, PSYCH 2201 and PSYCH 2219 specifically address these issues in depth. In addition, students may take elective courses to strengthen their skills in this area.

Goal 3. Biological and Cognitive Approaches to Understanding Behavior

- Students will have a basic understanding of the biological basis of behavior and cognitive theory and research in psychology.
 - The following courses specifically address this goal:
- | | | |
|------------|---------------------------------------|---|
| PSYCH 2211 | Introduction to Biological Psychology | 3 |
| PSYCH 4349 | Human Learning and Memory | 3 |
| PSYCH 4356 | Cognitive Processes | 3 |

Goal 4. Application of Psychology to Personal Development and Mental Health.

- Students will understand and apply psychological principles to personal development and mental health.
- Many psychology courses have a specific application to the personal development and mental health of students and their families, including:

PSYCH 2232	Psychology of Trauma	3
PSYCH 2245	Abnormal Psychology	3
PSYCH 2270	Developmental Psychology: Infancy, Childhood and Adolescence	3
PSYCH 3280	Psychology of Death and Dying	3
PSYCH 3340	Clinical Problems of Childhood	3
PSYCH 3346	Introduction to Clinical Psychology	3
PSYCH 4305	Developmental Psychology: Cognitive Development of Children	3
PSYCH 4316	Developmental Psychology: Social Development of Children and Adolescents	3
PSYCH 4376	Mental Health and Aging	3

Goal 5. Application of Psychology to Social and Organizational Issues

- Students will understand and apply psychology principles of social and organizational issues, including understanding and respect for cultural diversity.
- The following courses address this goal:

PSYCH 2160	Social Psychology	3
PSYCH 2222	Group Processes in Organizations	3
PSYCH 2230	Psychology of Gender	3
PSYCH 3318	Industrial and Organizational Psychology	3
PSYCH 4311	Psychology of Nonverbal Behavior	3

Goal 6. Values in Psychology and Critical Thinking

- Students will be able to weigh evidence, tolerate ambiguity, act ethically, and reflect other values that are the underpinnings of psychology as a discipline. Students will also learn to use critical thinking in evaluating research and other types of information.
- All courses are relevant to this goal.

Goal 7. Information and Technological Literacy

- Students will demonstrate information competence and the ability to use computers and other technology for many purposes.
- PSYCH 2201 and PSYCH 2219 addresses these topics in considerable detail.

Goal 8. Communication Skills

- Students will be able to communicate effectively in a variety of formats.
- All courses provide some training in communication skills, with initial skills reinforced in upper division courses.

Goal 9. Career Planning and Development

- Students will emerge from the major with realistic ideas about how to implement their psychological knowledge, skills, and values in occupational pursuits in a variety of settings.
- PSYCH 1000 and PSYCH 1003 addresses this goal directly.

Graduate Programs

Admission Requirements

In addition to meeting the general admission requirements of the Graduate School, applicants should have completed undergraduate courses at minimum in general psychology, psychological statistics, and research methods. Each doctoral program has additional admission requirements specific to that program.

Applications

Each program has independent deadlines for completed applications. They are as follows:

Ph.D. in Psychology:

- Clinical Psychology--December 1
- Behavioral Neuroscience --January 15

Teaching and Research Assistantships

Stipends for teaching and research assistantships are available for the doctoral programs only.

Master of Arts in Psychology

The psychology department at the University of Missouri-St. Louis offers a program of studies leading to the Master of Arts degree

with a specialization in either Behavioral Neuroscience or Industrial/Organizational Psychology. The M.A. degree is a terminal degree and is separate from the Ph.D. program in Psychology. There is no thesis or language requirement. The M.A. degree does not constitute a license to practice in Missouri or elsewhere as a professional Psychologist. The M.A. program does not offer course work in Counseling or Clinical Psychology.

The M.A. in Psychology requires a total of 32 semester hours of graduate course work in Behavioral Neuroscience or 45 semester hours of course work in Industrial/Organizational Psychology. All students in the Master's program must take the course work prescribed by their emphasis area. All programs of study for M.A. students require the approval of the Director of the Behavioral Neuroscience program or Director of the Industrial/Organization program.

Emphasis in Behavioral Neuroscience Psychology

The University of Missouri-St. Louis offers a program of studies leading to a Master of Arts Degree in Psychology with a specialization in Behavioral Neuroscience. Masters students take classes with Doctoral level students and conduct research in a core area of study including hormones and behavior, psychophysiology of trauma, neuropsychology and neuroimaging of aging and HIV, brain dysregulation in language disorders, social neuroscience of bias and stigma or neurobiology of emotion.

Students are enrolled into a research group headed by a faculty member with research interests in one of the six areas identified above. That professor serves as the student's primary mentor throughout their graduate training, though communication and collaboration with other laboratories are encouraged.

Research Facilities: Research facilities include a variety of resources to support animal models of learning and memory, sociosexual behaviors, neuroendocrinology, and neuropharmacology; assessment of human cognition and neuropsychology; electrophysiology labs and psychophysiology labs to measure electrocardiogram, electrodermal activity, respiration, electromyogram, electrooculogram and infrared video-based equipment for tracking eye movements and pupillary response.

Degree Requirements

A total of 32 credit hours is required for the MA degree with an emphasis in the behavioral neuroscience field of experimental psychology. There is no thesis requirement for the Masters degree.

Required Coursework

The following graduate courses are currently required of all Masters students in the Behavioral Neuroscience emphasis area:

PSYCH 7421	Quantitative Methods I	4
PSYCH 7422	Quantitative Methods II	4
PSYCH 5465	Seminar: Behavioral Neuroscience	3
PSYCH 5407	Psychopharmacology	3
PSYCH 5468	Seminar: Cognitive Processes	3
PSYCH 5001	Neuropsychological Assessment	3
PSYCH 7483	Directed Research	3
or PSYCH 7484	Directed Readings	

Electives

Choose from among the following or courses approved by graduate director:

PSYCH 4330	Hormones, The Brain And Behavior
------------	----------------------------------

PSYCH 7403	Psychopathology
PSYCH 7412	Social Psychology
PSYCH 7423	Quantitative Methods III
PSYCH 7429	Psychometric Theory
PSYCH 7483	Directed Research
or PSYCH 7484	Directed Readings

Total Hours 32

Students should develop, in collaboration with their graduate faculty advisor/mentor in the Department of Psychology, a useful and compatible set of elective courses fitting their individual career goals and preferences.

Emphasis in Industrial/Organizational Psychology

Effective Fall 2018, the Industrial Organizational Psychology program will no longer be accepting applications.

The University of Missouri-St. Louis offers a program of studies leading to a Masters of Arts degree in Psychology with an emphasis in Industrial/Organizational Psychology. This program embraces the scientist-practitioner model and provides a balanced training in I/O. This emphasis provides "industrial" training in areas such as personnel selection, training, and test development/validation, as well as "organizational" training in areas such as work motivation, leadership, mentoring, and group processes. Conducting research with faculty and other training experiences are also incorporated. Masters students take 45 hours of courses. Completion of the Masters program does not qualify one for admittance to the doctoral program. Masters students must reapply for consideration to the doctoral program. Additionally, Masters students are not required to complete an empirical research thesis.

PSYCH 5468	Seminar: Cognitive Processes	3
PSYCH 7412	Social Psychology	3
PSYCH 7421	Quantitative Methods I	4
PSYCH 7422	Quantitative Methods II	4
PSYCH 7449	Research Methods and Project Development In Applied Psychology	3
PSYCH 7454	Seminar: Personnel Psychology	3
PSYCH 7455	Seminar: Organizational Psychology	3
PSYCH 7457	Seminar: Special Topics in Industrial Psychology	3
PSYCH 7458	Seminar: Special Topics in Organizational Psychology	3
PSYCH 7466	Seminar Series in Industrial/Organizational Psychology	4
MGMT 5611	Advanced Organizational Behavior and Administrative Processes	3
MGMT 5621	Managing Human Resources	3
MGMT 5625	Selected Topics in Human Resource Management	3
Electives		3

Choose one of the following:

PSYCH 7429	Psychometric Theory
PSYCH 7469	I/O Professional Issues and Ethics
PSYCH 7423	Quantitative Methods III
PSYCH 7465	Applied Issues in Organizational Psychology

PSYCH 7472	Special Topics in Psychology
Total Hours	45

Description of Ph.D. Programs/Options

There are two distinct programs:

- Clinical Psychology; and
- Behavioral Neuroscience;
- Industrial/Organizational Psychology

Effective Fall 2018, the Industrial Organizational Psychology program will no longer be accepting applications.

Details on each program can be found on the Psychology Department webpage. Each has its own specific curricular and research requirements. The following briefly describes each program.

Clinical Psychology

The Clinical Psychology program has been fully accredited by the American Psychological Association since 1977 and is patterned upon the scientist-practitioner model of clinical training. Students are not considered for admission on a part-time basis. Through the medium of courses, practicums, and research experiences, this emphasis area prepares Clinical Psychologists for careers in research, teaching, and clinical practice.

Students in the Clinical Psychology program participate for three years in the Psychology Department's Community Psychological Services clinic. This facility provides psychological services to the public and consultation to outside agencies. Students also receive clinical experience in clerkships and during a full-time, year-long internship. Research requirements include an initial independent research project, a major critical review of research in a specialty area, and a dissertation.

The Clinical Psychology graduate program is accredited by the American Psychological Association and the course offerings fulfill specific training domains associated with APA accreditation.

I. Broad-based foundation of knowledge and conceptual skills necessary for psychological research and practice.

The following courses address this goal:

PSYCH 5465	Seminar: Behavioral Neuroscience	3
PSYCH 5468	Seminar: Cognitive Processes	3
PSYCH 6466	Seminar: Developmental Psychology	3
PSYCH 7403	Psychopathology	3
PSYCH 7412	Social Psychology	3
PSYCH 7405	History And Systems In Psychology	3

II. Trained to evaluate and conduct methodologically sound research of potential benefit to the practice of psychology.

PSYCH 7421	Quantitative Methods I	4
PSYCH 7422	Quantitative Methods II	4
PSYCH 7474	Clinical Research In Applied Settings	3
PSYCH 7485	Research Team (2 semesters)	6
PSYCH 7487	Thesis Research Project (5 semesters)	5

PSYCH 7488	Specialty Examination Research (3 semesters)	3
PSYCH 7492	Ph D Thesis Research (per semester)	1

III. Training in multiple approaches to assessment and treatment that is theory-based and research-supported.

PSYCH 7404	Introduction To Clinical Assessment I	4
PSYCH 7406	Introduction To Clinical Assessment II	4
PSYCH 7430	Introduction To Clinical Skills	1
PSYCH 7434	Foundations of Clinical Interventions	3
PSYCH 7442	Seminar: Cognitive And Behavioral Interventions	3
PSYCH 7439	Summer Supervision (3 semesters)	3
PSYCH 7433	Clerkship in Clinical Psychology (6 semesters)	6
PSYCH 7431	Clinical Supervision (7 semesters)	19
PSYCH 7450	Clinical Internship I (2 semesters)	2
PSYCH 7451	Clinical Internship II	1
Choose 3 courses from offerings that may include:		9
PSYCH 7447	Trauma And Recovery	
PSYCH 6415	Seminar in Health Psychology & Behavioral Medicine	
PSYCH 6410	Gender, Sexuality, and Mental Health	
PSYCH 7419	Existential Issues In Clinical Psychology	
PSYCH 5407	Psychopharmacology	
PSYCH 5001	Neuropsychological Assessment	

IV. Develop a firm basis for ethical decision-making and adherence to professional standards of conduct in research and practice.

PSYCH 7432	Ethics And Professional Issues	3
------------	--------------------------------	---

V. Develop and display sensitivity and adaptability in the applications of research, assessment and treatment approaches to diverse populations.

PSYCH 6448	Multicultural Issues In Clinical Psychology	3
------------	---	---

Behavioral Neuroscience

The Behavioral Neuroscience program provides opportunities for study, research, and training in various areas including psychophysiology, psychopharmacology, neuroendocrinology, cognitive neuroscience, and neuropsychology. This program prepares students for research careers in academia or industries, such as pharmaceutical firms and medical schools. Full-time enrollment is required.

Learning Outcomes for the Ph.D. in Behavioral Neuroscience

The graduate program in Behavioral Neuroscience has the following goals. Outcome measures for each goal allow the faculty to assess the students.

Goal 1. Students will gain a broad-based foundation of terminology and basic and conceptual knowledge necessary for teaching and research in

the Behavioral Neuroscience field. Outcome measures include grades in coursework, performance on both the written and oral segments of the qualifying exam, as well as active participation in our journal reading groups.

Goal 2. Beginning early in their studies, students will learn the basic skills to conduct research in a variety of different paradigms. Outcome measures include successful accomplishments in the laboratories of mentor professors.

Goal 3. Beginning early in their studies, students will come to recognize the key to success in the Behavioral Neuroscience field is publishing and seeking grant support. Outcome measures include an easily observable mindset that assesses all scholarly activities in regard to possible publication and/ or a suitable idea for submission to a grant agency. Also, regular attendance is expected at all relevant colloquia on campus and at the grant writing seminars offered by the Behavioral Neuroscience faculty.

Goal 4. Students will come to recognize the importance of writing and will be constantly developing their writing skills as applied to manuscript preparations and grant applications. Outcome measures are the numbers of manuscripts written and submitted to journals or grant agencies each year.

Goal 5. As they progress through the program, students will show increasing self-reliance to initiate a research project and carry it to its completion. Outcome measures are numbers and quality of self-initiated research projects.

Goal 6. At the end of their graduate studies, the students will have grown into full colleagues of the faculty and be ready for careers in research and teaching. Outcome measures are a quality dissertation that is successfully defended before peers and being hired for a suitable position (post-doc, assistant professor, junior-level researcher) in the field.

Graduate Certificate Programs

Clinical Psychology Respecialization-Advanced Graduate Certificate Program

This program is designed for graduates of accredited doctoral programs in psychology who wish to receive training in the specialty field of clinical psychology. Respecialization students are trained within the context of the UMSL Clinical Psychology Doctoral Program, which is accredited by the American Psychological Association. The program provides an integrated sequence of training experiences, including didactic course work and practicum placements. Core graduate-level psychology educational requirements not completed elsewhere are included in the respecialization student's course of study.

For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website: <http://umsl.edu/go/BoH>.

Graduate Certificate in Trauma Studies

The graduate certificate is awarded upon the completion of 18 credit hours of graduate coursework on the topic of trauma studies. No more than nine hours of graduate level independent research or fieldwork may be used for the certificate. The coursework for the certificate must be taken in at least two departments and may include no more than three hours at the undergraduate 3000 or 4000 level.

For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website: <http://umsl.edu/go/Brl>.

Child Advocacy Studies Courses

CAST 3290 Traumatic Stress in Childhood and Adolescence: 3 semester hours

Same as PSYCH 3290. Prerequisites: PSYCH 2270 (majors), PSYCH 1268, or consent of instructor. Exploration of the impact of stressors experienced during infancy, childhood and adolescence. Integrates how theoretical frameworks, cultural considerations and policy implications apply to child development research and practice.

CAST 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours

Same as PSYCH 4398 and SOC WK 4398. Prerequisites: PSYCH 2270 (majors), PSYCH 1268, child development course equivalents in other disciplines, or approval from the instructor. This course focuses on clinical aspects of child abuse with attention to identification, reporting, intervention and prevention. Perspectives from the disciplines of psychology, social work, and other child advocacy fields are provided.

CAST 4498 Forensic Investigation of Child Abuse: 3 semester hours

Prerequisites: CAST 4398/PSYCH 4398/SOC WK 4398. Designed for students across multiple disciplines where knowledge of child abuse investigation and advocacy are necessary. Focuses on the investigative and prosecutorial responses of professionals involved with child abuse cases to expand the student's knowledge and skills in the most effective response to child abuse investigations. Includes competency-based skills training such as conducting a cursory interview, participating in peer review, doing case presentations, and producing investigative documentation.

CAST 4598 Child Abuse Assessment and Intervention: 3 semester hours

Prerequisites: CAST 4398/PSYCH 4398/SOC WK 4398. Provides students with knowledge and skills to intervene effectively and empathically with families that experience child abuse and neglect. Uses experiential learning to develop skills in trauma-focused screening, assessment, and crisis intervention for vulnerable children and their families who are involved with child serving systems such as law enforcement, child protective services, prosecution, and physical and mental health.

CAST 4698 Internship in Child Advocacy Studies: 3 semester hours

Prerequisites: PSYCH 4398, completion of or concurrent enrollment in PSYCH 4498 and PSYCH 4598, and approval from the CAST director. Internship under CAST staff supervision in child or youth-serving setting. Approval from the CAST director is required prior to enrolling. This course must be taken concurrently with the CAST field education seminar (CAST 4700).

CAST 4700 Field Education Seminar in Child Advocacy Studies: 1 semester hour

Prerequisites: Consent of CAST director and concurrent enrollment in an approved CAST field education course. In this course, students will synthesize their learning from the Child Advocacy Studies (CAST) certificate courses with their field experiences.

Psychology Courses

PSYCH 1000 Choosing A Career In Psychology: 1 semester hour

Prerequisite: Psychology Major or consent of instructor. This course is an orientation to the field of psychology for majors and for students who are considering declaring the major. This course is to be completed by native and transfer Psychology majors during their first semester of study at UMSL. Students will be engaged in activities that will help them to develop and identify their professional goals, learn about the various specialties and careers available within the field of psychology, understand the education and skills necessary for various careers, learn the requirements for a psychology major, become familiar with minors that are available at UMSL, think about a possible choice of minor or certificate, and become acquainted with the interest areas of UMSL faculty in Psychology and related fields. All Psychology majors must complete this course during the first semester at UMSL with a grade of C- or higher.

PSYCH 1003 General Psychology (MOTR PSYC 100): 3 semester hours

A survey of the basic concepts, theories, and pivotal findings over the past 100 years in the science of Psychology, with special emphasis on contemporary concepts and findings that focus on the relation of the brain to normal and pathological behaviors. All Psychology majors must complete this course with a grade of C- or higher.

PSYCH 1268 Human Growth and Development (MOTR PSYC 200): 3 semester hours

Prerequisites: PSYCH 1003. A survey course, designed for non-majors. This course examines development over the lifespan with an emphasis on the developmental tasks and hazards of each age period. Majors in Psychology and students planning to pursue a career in psychology research, teaching, or practice are strongly encouraged to take PSYCH 2270 instead of this course.

PSYCH 2040 Attraction: An Evolutionary Approach: 3 semester hours

Prerequisites: PSYCH 1003. This course examines the topics of interpersonal and sexual attraction in a scientific context through the milieu of popular media outlets as well as published empirical literature from the fields of Psychology, Anthropology, Ecology, Economics, and Gender Studies. Specific topics include attraction cues, jealousy, monogamy, infidelity, the economics of sex, and the long-term and short-term mating strategies of men and women. We will also investigate the technological and media manipulation of sexual cues, as well as conflicts between the sexes, religion and sex, the peopling of the earth, the fundamentals of evolved psychological mechanisms, identifying adaptive problems and potential solutions, gender roles, parental investment, issues of kinship, and inter- and intra-sexual competition.

PSYCH 2160 Social Psychology: 3 semester hours

Same as SOC 2160. Prerequisite: PSYCH 1003 or SOC 1010. This course examines the behavior, thoughts, and feelings of individuals in their social environments. The content focuses not only on how people relate to one another, but also on the processes affecting their interactions with others. Specific topics include the self, social judgments, attitudes and persuasion, helping behavior, prejudice, aggression, attraction, conformity and obedience, and group processes. All Psychology majors taking this course instead of PSYCH 2270 must complete it with a grade of C- or higher.

PSYCH 2200 Drugs and Behavior: 3 semester hours

Prerequisite: PSYCH 1003. The course is an introduction to psychopharmacology and the relationship among drugs, and how these impact the brain and behavior. The emphasis is on physiological mechanisms underlying the behavioral responses to psychotherapeutic substances, illicit psychoactive drugs, commonly used substances (alcohol, nicotine, caffeine), and drug-like substances produced naturally in the body.

PSYCH 2201 Psychological Statistics: 4 semester hours

Prerequisites: PSYCH 1003 and satisfaction of the University's mathematical skills requirement. (With Laboratory) This course serves as an introduction to statistical concepts and methods used in Psychological measurement and the analysis and interpretation of social sciences data. Topics include descriptive statistics, frequency distributions centrality, variability, and correlational measures; as well as an introduction to statistical inference, sampling fundamentals, significance testing and effect size, t-test, and analysis of variance. All Psychology majors must complete this course with a grade of C- or higher before registering for PSYCH 2219.

PSYCH 2205 Human Sexuality: Psychological Perspectives: 3 semester hours

Prerequisites: PSYCH 1003. This course is a comprehensive overview of human sexuality from the standpoint of the behavioral science of Psychology. This course includes a study of sexual anatomy and physiology, intersex classifications, sex and gender differences, sexual orientation, interpersonal and interpersonal aspects of human sexuality, classification and treatment of sexual dysfunction and sexual disorders, sexual victimization, and the methods employed for the scientific examination of human sexual behavior.

PSYCH 2211 Introduction to Biological Psychology: 3 semester hours

Prerequisites: PSYCH 1003 and 3 hours of BIOL chosen from either BIOL 1012, or BIOL 1102, or BIOL 1831. Students with career goals that include graduate study in Psychology are urged to complete the BIOL 1831 prerequisite for this course. This course introduces psychology students to behavioral neuroscience and neuropsychology. Course topics include basic neuroanatomy and neurophysiology, neurodevelopment, sensory and motor systems, and the integration of subcortical and cortical networks. All are covered with an emphasis on behavioral outcomes of normal and pathological functioning of the brain. All psychology majors must complete this course with a grade of C- or higher.

PSYCH 2219 Research Methods: 3 semester hours

Prerequisite: Completion of PSYCH 2201 with a final grade of C- or higher is required prior to enrolling in this course. This course is a comprehensive overview of research methods in the social sciences. Topics include technical scientific writing in current APA format, critical evaluation of research literature, the application of statistical methods, and mastery of the ethical principles guiding social sciences research. Course and laboratory work involve designing and evaluating research questions, formulating research hypotheses, designing and conducting original research studies, and presenting research results. All psychology majors must complete this course with a grade of C- or higher.

PSYCH 2222 Group Processes in Organizations: 3 semester hours

Prerequisite: PSYCH 1003 or MGMT 3600. Topics include theory, research and practice in coordination, conflict and decision-making in groups and organizations, as well as the role of influence, power, and leadership effectiveness in understanding interpersonal and group relations.

PSYCH 2230 Psychology of Gender: 3 semester hours

Same as GS 2230. Prerequisite: PSYCH 1003. Evaluation of psychological theories and research regarding physiological, cognitive, and personality gender differences and similarities, gender related problems in adjustment, and gender specific clinical interventions.

PSYCH 2232 Psychology of Trauma: 3 semester hours

Same as GS 2232. Prerequisites: PSYCH 1003. This course is designed to review the psychological effects of crime, violence, war, natural disasters, and other traumas. Particular attention is paid to the development of specific psychopathology and other negative consequences of traumatic events. The process of recovery from distress following psychological events is further emphasized. The role of gender and its relationship to victimization and the development of psychopathology and recovery are considered throughout the course.

PSYCH 2245 Abnormal Psychology: 3 semester hours

Prerequisite: PSYCH 1003. This course examines the historical views and current perspectives on the possible antecedents, symptoms, and treatments of major psychological disorders, including anxiety, dissociative, mood, somatoform, eating, schizophrenia and substance-related disorders. Major diagnostic categories and criteria, individual and social factors of maladaptive behavior, methods of clinical assessment, research strategies, and types of therapy will also be covered. All psychology majors must complete this course with a grade of C- or higher.

PSYCH 2270 Developmental Psychology: Infancy, Childhood and Adolescence: 3 semester hours

Prerequisites: PSYCH 1003. This course systematically examines theories and research concerning the physical, social, emotional, and cognitive development of children from conception through adolescence. It will provide students with a basic knowledge of infant, child, and adolescent development; its subject matter; its approaches to gathering and evaluating evidence about the causes of behavior; and the ways in which our knowledge is applied to enhance the development and the quality of life of children. It is intended for Psychology majors and students with career interests in research, education, and/or the treatment of children. All Psychology majors taking this course instead of PSYCH 2160, must complete it with a grade of C- or higher.

PSYCH 2285 American Culture and Minority Mental Health: 3 semester hours

Prerequisites: PSYCH 1003. Provides an examination of the relationship between American culture and mental health. The focus is on the lives of American minority groups, with specific attention given to how racism, prejudice, and minority status currently reveal themselves within a mental health framework. An eclectic, multidisciplinary approach that draws from clinical and social psychology will be utilized.

PSYCH 2295 Undergraduate Teaching Internship in Psychology: 1 semester hour

Prerequisites: PSYCH 1003 and 6 additional credits in Psychological Sciences (9 credits minimum), and instructor consent. This course prepares students to work as learning assistants, tutors, or peer mentors for courses within the Department of Psychological Sciences. Students will develop general pedagogical skills. Specific teaching assistant duties will be determined by the instructor of record for the associated course. This course may be repeated for up to 3 total credit hours.

PSYCH 2299 Directed Readings in Psychology: 3 semester hours

Prerequisites: PSYCH 1003 or SOC 1010, or consent of instructor. This course will provide an intellectual forum for discussing classic and contemporary theories and research in psychology on a selected topic. Students can retake the course as long as the topic is different.

PSYCH 2500 Theories of Motivation: 3 semester hours

Prerequisite: PSYCH 1003. This course approaches human motivation through a biopsychosocial perspective, including theories of motivation, individual motivation, and how motivation differs. Application will include real-life workplace and educational psychology contexts.

PSYCH 3205 Evolutionary Psychology: 3 semester hours

Prerequisites: PSYCH 2211. Evolutionary Psychology refers to a fundamentally unique approach to studying and thinking about human and animal behavior through considerations of 1. The challenges and stressors encountered in ancestral environments, 2. The proximate physical, psychological, and anatomical methods that evolved to meet these adaptive problems, and 3. How adaptive or maladaptive these mechanisms are in current environments. Special emphasis will be placed on the evolution of brain structures, cognitive processes, and social behaviors. The content for this course is not new; Evolutionary Psychology involves looking at the science of Psychology through a unique lens, shaped by its tenets. Although appreciation for this approach to psychological research is increasing, it remains controversial in psychology circles. We will discuss the state of this aspect of Psychology as well.

PSYCH 3280 Psychology of Death and Dying: 3 semester hours

Same as GERON 3280. Prerequisite: PSYCH 1003 or consent of the instructor. An exploration of end-of-life issues integrating the scholarly, social, and individual dimensions of death and dying. This course provides a solid grounding in theory and research, as well as practical application to students' lives.

PSYCH 3290 Traumatic Stress in Childhood and Adolescence: 3 semester hours

Same as CAST 3290. Prerequisites: PSYCH 2270 (majors), PSYCH 1268, or approval from the instructor. Exploration of the impact of stressors experienced during infancy, childhood and adolescence. Integrates how theoretical frameworks, cultural considerations and policy implications apply to child development research and practice.

PSYCH 3295 Selected Projects In Field Placement: 3 semester hours

Prerequisite: Junior standing, fifteen hours of psychology, or consent of instructor. Selected options in field work placement experiences in various local agencies with training and supervision by faculty. (May be repeated once for credit).

PSYCH 3316 Leadership: Theory and Practice: 3 semester hours

Same as GS 3361. Prerequisites: Junior standing and 9 hours of psychology courses or permission of instructor. This course will cover both classic and contemporary perspectives on leadership through the lens of psychology and management theory. Course content is relevant to the wide range of leadership opportunities that arise in work and daily life. It addresses concepts behind influence processes and methods for developing leadership skills from various perspectives.

PSYCH 3318 Industrial and Organizational Psychology: 3 semester hours

Same as MGMT 3623. Prerequisite: PSYCH 2201 or MGMT 3600. This course introduces the student to psychological research and theories pertaining to human behavior in the work setting. Topics covered include: selection, performance appraisal, training, leadership, motivation, job satisfaction, and organizational design.

PSYCH 3340 Clinical Problems of Childhood: 3 semester hours

Prerequisite: PSYCH 1003 and six additional hours of Psychology, or consent of instructor. This course will address the clinical disorders and difficulties of children, as well as the causes and the treatment of these disorders. Topics addressed include autism, childhood schizophrenia, conduct disorders, learning disabilities, ADHD, mood disorders, health-related disorders, anxiety disorders, and child maltreatment. Treatments designed for specific use with children, including behavioral, drug and community mental health approaches will be addressed. This course is recommended for those going on to graduate work in psychology.

PSYCH 3346 Introduction to Clinical Psychology: 3 semester hours

Prerequisite: PSYCH 1003, PSYCH 2245; and three additional hours of Psychology. This course provides a conceptual framework for research, description and understanding of clinical phenomena. Assessment, interviewing, the clinical use of tests and psychological approaches to treatment are also addressed.

PSYCH 3390 Directed Studies: 1-6 semester hours

Prerequisite: Consent of instructor. Directed reading and research. May be repeated for a maximum total of ten hours.

PSYCH 3400 Conceptual and Historical Foundations of Psychology: 3 semester hours

Prerequisite: PSYCH 1003 and three additional hours of Psychology. This course addresses basic questions about human life debated throughout the history of the West that are present in contemporary Psychology. These include the relation between mind and body, how we know about the world, the nature of morality, and how we think and feel. Greek and Judeo-Christian traditions, and science and religion, have provided distinct, fundamental approaches to how these questions have been asked and answered. This course examines these and related historical, conceptual, and theoretical foundations underlying contemporary Psychology.

PSYCH 3500 Health Psychology: 3 semester hours

Prerequisite: PSYCH 1003 and three additional hours of Psychology. Health Psychology involves the discipline and principles of psychology and behavior in understanding how the mind, body, and behavior interact in health and disease. Class topics include theoretical foundations of health and illness, health promotion and primary prevention of illness, health enhancing and health damaging behaviors, psychosomatic illness, stress and coping, pain management, and a variety of specific behavior-related medical illnesses (e.g., heart disease, eating disorders, cancer, AIDS).

PSYCH 3820 Cross-Cultural Psychology: 3 semester hours

Prerequisites: PSYCH 1003 and 9 hours of Psychology. The purpose of this course is to present students with a broad theoretical and applied overview of cross-cultural psychology. To this end, the course presents an orientation to the definitions, concepts, theories, and methodologies of crosscultural psychology. Included is an examination of cultural and ecological factors and their influences on perceptual and cognitive processes, personality, language, and other psychological variables.

PSYCH 4250 Stereotyping, Prejudice, and Discrimination: 3 semester hours

Prerequisites: PSYCH 1003, PSYCH 2160/SOC 2160/GS 2150; or consent of instructor. This course will provide an intellectual forum for discussing classic and contemporary theories and methodologies focused on understanding stereotyping, prejudice, and discrimination. Using a social psychological framework, we will assess psychology's current understanding of why people use and apply stereotypes in their everyday thinking and behavior. We will explore such topics as social categorization, stereotype activation, contemporary forms of prejudice, the social context of prejudice, the consequences of prejudice and discrimination, the stigmatized target's perspective, coping with prejudice, and techniques for reducing prejudice and discrimination. After completing the course, you will be able to describe the social and cultural influences on stereotyping, prejudice, and discrimination and how they influence our thoughts, feelings, and behaviors. You will have a better understanding of why "isms" in society persist and how we can work to reduce them.

PSYCH 4300 Introduction to Psychopharmacology: Drugs and Mental Illness: 3 semester hours

Prerequisites: PSYCH 1003, PSYCH 2211 or PSYCH 2200; PSYCH 2245. The course is designed to provide an introduction to drugs used to treat anxiety disorders, major depression, schizophrenia, and other psychopathologies. The emphasis will be on understanding neural mechanisms related to psychological disorders and to the effectiveness of current drug treatments.

PSYCH 4305 Developmental Psychology: Cognitive Development of Children: 3 semester hours

Prerequisites: PSYCH 1003, PSYCH 2270, and Junior standing, or consent of instructor. Data and theory concerned with how children's thinking changes over time. Discussion will include domain-general versus domain-specific theories, social and cultural influences on cognition, gains in memory, attention, problem solving, and metacognition, conceptual development, children's naive theories, schooling, and various definitions and measures of intelligence.

PSYCH 4311 Psychology of Nonverbal Behavior: 3 semester hours

Prerequisite: PSYCH 2160 or SOC 2160. This course examines the psychological perspective on the role of nonverbal behavior in social settings. Primary concerns of the course will include an analysis of the functions of nonverbal behavior (e.g., providing information, regulating interaction, expressing intimacy, exercising influence, and managing impressions), factors influencing nonverbal expression (e.g., culture, personality, relationships), and various theoretical views on nonverbal communication. Applications to various problems and settings in everyday life will also be pursued.

PSYCH 4314 Behavioral Neuroscience: 3 semester hours

Prerequisites: 9 hours of Psych and/or Biology; PSYCH 2211 is recommended but not required. A neuroscience course focusing on behavioral outcomes of brain function and dysfunction. Emphasis will be on modern research methods with animal models and humans. Topics discussed will include the classic findings in the field, but the emphasis will be on recent findings from human neuropsychology, neuroimaging, cognitive neuroscience, neuropharmacology, and neuroendocrinology.

PSYCH 4316 Developmental Psychology: Social Development of Children and Adolescents: 3 semester hours

Prerequisites: PSYCH 1003, PSYCH 2270, and junior standing, or consent of instructor. This course examines data and theory concerned with social behavior in infants, preschoolers, and school-aged children. Discussion will include emotional regulation; measurement and nature of temperament; the formation and maintenance of attachment relationships; sex-role development; and theories of aggression and the effects of socializing agents such as family, peers, media, and culture on development.

PSYCH 4321 The Dark Side of Organizational Behavior: 3 semester hours

Prerequisites: Junior standing, and at least one of the following courses: PSYCH 3316, PSYCH 3318, or MGMT 3600, or permission of instructor. This course focuses on understanding the antecedents, processes, and outcomes associated with dysfunctional organizational behavior. Specific topics covered in the course include forms of counterproductive work behavior, workplace aggression and violence, organizational politics, toxic leadership, group and individual-level antecedents, and managing dysfunctional organizational behavior. Emphasis is given to findings from Psychology and Management research studies, as well as the application of course material to everyday work settings.

PSYCH 4330 Hormones, The Brain and Behavior: 3 semester hours

Prerequisites: 9 hours of psychology or biology, including at least one of the following: PSYCH 2200, PSYCH 2211, or PSYCH 4300 or consent of instructor. Historically, hormones have been studied for their role in reproduction, including reproductive physiology and sexual behaviors. It is now clear, however, that the endocrine system actively interacts with brain regions unrelated to reproduction with the result that sex hormones and neuropeptide hormones influence a wide range of behaviors including mood, anxiety, stress responses, cognition, memory, violence, attachment, aging, weight control and athletic prowess. Emphasis of the class is on hormonal contribution both to reproductive and non-reproductive behaviors with special attention paid to gender behavioral differences. This course may be taken for graduate credit with permission of the instructor.

PSYCH 4340 Introduction to Human Neuroanatomy: 3 semester hours

Prerequisites: Grade of B- or above in PSYCH 2211, and nine hours of psychology or biology or consent of instructor. This course is an intensive introduction to brain anatomy. It will explore the structure and function of the human nervous system with the goal of preparing students for advanced study in neuroscience-related fields. Topics will include a review of core concepts from cellular neuroscience, neuroimaging and neuroanatomical techniques, sensory and motor systems, and the anatomical basis of cognitive functions. Based on an understanding of typical brain structure and function, the anatomical and physiological basis of various neurological disorders is explored.

PSYCH 4349 Human Learning and Memory: 3 semester hours

Prerequisites: PSYCH 2211 and six additional hours of psychology; or consent of instructor. Is it bad to stay up all night studying for an exam? Can you buy groceries without a shopping list? Why is exposure therapy effective in reducing anxiety? What is your earliest memory? Is your grandmother just forgetful or does she have dementia? Can you explain how to tie shoelaces? Why do victims sometimes only remember the gun and not the perpetrator? Learning and memory happen all day, every day. No matter what you plan to do with your psychology degree (e.g., become a therapist, social worker, lawyer, scientist, teacher, stay-at-home dad/mom) knowledge of learning and memory will be extremely relevant. In this course we will discuss basic forms of learning and memory such as habituation, sensitization, conditioning, and skill/procedural memory, as well as more complex forms of learning and memory such as semantic memory, episodic/autobiographical memory, short-term and working memory, and social learning. Because learning and memory happen in the brain we will also discuss the neurobiological basis of learning and memory on cellular (e.g., long-term potentiation) and system (e.g., hippocampus) levels. In addition, we will discuss how factors such as emotion, aging, sleep, and stress affect memory and learning. Finally, we will look at the relevance of learning and memory for clinical and legal environments.

PSYCH 4350 Emotions and the Brain: 3 semester hours

Prerequisites: PSYCH 2211 and six additional hours of psychology; or consent of instructor. Emotions play an important role in everyday life. But what exactly is an emotion? And what happens in your body when you experience an emotion? More specifically, what happens in your brain? Doesn't the limbic system have something to do with emotions? What are the differences and similarities between emotions (such as anger) and motivations (such as hunger)? What happens in your body and brain when you fall in love? And how do emotions influence cognition, such as attention and memory? Conversely, does cognition influence our emotions as well? These are some of the questions that we will answer in this course. Given that many mental disorders involve emotional disturbances, this course is not only relevant for students who are interested in the fundamental knowledge of emotions, but also for students who are interested in clinical psychology.

PSYCH 4356 Cognitive Processes: 3 semester hours

Prerequisite: Nine hours of psychology or consent of instructor. This course is an overview of the major topics in cognitive psychology, including perception, visual imagery, attention, memory, knowledge representation and retrieval, language, problem solving, reasoning, judgment, decision making, and intelligence.

PSYCH 4365 Psychological Testing and Assessment: 3 semester hours

Prerequisites: Grade of C- or above in PSYCH 2201, or consent of instructor. This course covers the uses, construction, and evaluation of psychological tests and assessments. Students will learn about tests designed to measure personality, intelligence, and other individual differences, including issues related to test use in specific settings. Examination of professionally-developed tests and hands-on learning exercises will be key aspects of the course.

PSYCH 4372 Introduction to Social Neuroscience: 3 semester hours

Prerequisites: PSYCH 2160 and PSYCH 2211. An introduction to current theory and research in social neuroscience with a focus on mechanisms underlying mind and behavior interactions using a multi-level integrative analysis. This course will examine how organismic processes are shaped, modulated, and modified by social factors and vice versa. This course may be taken for graduate credit with permission of the instructor.

PSYCH 4374 Introduction to Clinical Neuropsychology: 3 semester hours

Prerequisites: Nine hours of Psychology. An introduction to current theory and practice of clinical neuropsychology with a focus on neuropsychological findings concerning relationships between the brain and behavior. Particular attention is devoted to function, neuroanatomy, neurological syndromes, patterns of brain impairment associated with various medical diseases, and methods of neuropsychological assessment and intervention.

PSYCH 4376 Mental Health and Aging: 3 semester hours

Same GERON 4376 and SOC WK 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor or program director. This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

PSYCH 4392 Selected Topics in Psychology: 1-3 semester hours

Prerequisite: Twelve hours of psychology and consent of instructor. A seminar of selected issues and methods in psychology. May be repeated once for credit.

PSYCH 4398 Child Maltreatment: A Multidisciplinary Approach: 3 semester hours

Same as SOC WK 4398 and CAST 4398. Prerequisites: PSYCH 2270 (majors), PSYCH 1268, child development course equivalents in other disciplines, or approval from the instructor. This course focuses on clinical aspects of child abuse with attention to identification, reporting, intervention and prevention. Perspectives from the disciplines of psychology, social work, and other child advocacy fields are provided.

PSYCH 4500 Physiology & Pharmacology of Aging: 3 semester hours

Same as GERON 4500. Prerequisites: Junior/senior undergraduate or graduate standing, or consent of the instructor or program director. This course examines functional health in advancing age and the impacts of common disease processes on the aging body. Symptom presentations, diagnostic considerations, treatment and management issues are discussed. A special emphasis is placed on pharmacology, especially how the aging body responds to different medication types, risks for drug-drug interactions, and challenges associated with polypharmacy. The course emphasizes a "whole person" approach to health and well-being, and targets the learning needs of those wishing to work with older adults in health, social and community service settings.

PSYCH 4698 Internship in Child Advocacy Studies: 3 semester hours

Same as CAST 4698. Prerequisites: PSYCH 4398, completion of or concurrent enrollment in PSYCH 4498 and PSYCH 4598, and approval from the CAST director. Internship under CAST staff supervision in child or youth-serving setting. Monthly seminar participation required. Approval from the CAST director is required prior to enrolling.

PSYCH 4999 Integrated Psychology: 2 semester hours

Prerequisites: This course is restricted to Psychology majors and must be taken during majors' final semester of study. This capstone course serves as a review of the primary sub-fields of psychology. An advanced general psychology textbook will guide the class through important contemporary topics in behavioral neuroscience, learning and memory, cognition, psychopathologies and their treatments, and developmental and social psychology. The Major Field Aptitude Test in Psychology will serve as the final exam for the course. All Psychology majors must complete this course with a grade of C- or higher.

PSYCH 5001 Neuropsychological Assessment: 3 semester hours

Prerequisites: Admission to Psychology graduate program, or consent of instructor. This graduate level course will review neuroanatomical systems that mediate primary cognitive networks and methods of assessments and interpretation of data. The course will also review common neurological and psychiatric conditions that result in neuropsychological compromise.

PSYCH 5340 Human Neuroanatomy: 3 semester hours

Prerequisites: Admission to graduate program in psychology or consent of instructor. This course provides an overview of brain anatomy for graduate students in psychology and related disciplines. It explores the structure and function of the human nervous system both in health and disease. The course will cover core concepts from cellular neuroscience, neuroimaging and neuroanatomical techniques, sensory and motor systems, and the anatomical basis of cognitive functions.

PSYCH 5400 Seminar: Special Topics in Behavioral Neuroscience: 1 semester hour

Prerequisites: Admission to the graduate program in behavioral neuroscience or consent of the instructor. A seminar of selected contemporary topics in behavioral neuroscience. The class will meet weekly to discuss a journal article in the field with special focus on the methodologies used in neuroscience research. May be repeated for a total of 3 credit hours, provided the subject matter is different.

PSYCH 5407 Psychopharmacology: 3 semester hours

Prerequisite: 12 units of graduate-level. An examination of the effects of drugs on the brain and on behavior. Primary emphasis is on those drugs used in the treatment of affective disorders, schizophrenia and anxiety.

PSYCH 5465 Seminar: Behavioral Neuroscience: 3 semester hours

Prerequisites: Graduate standing or permission of instructor. Behavioral neuroscience is the study of the relation of the brain to behavior. The field has emerged as the new face of psychology; there are few subfields in psychology that have not been influenced by findings from animal labs, and from human studies employing physiological recordings, neuroimaging and psychotherapeutic drugs. This course will serve as an introduction for graduate students in psychology of brain morphology and function with an emphasis on normal and pathological behaviors.

PSYCH 5468 Seminar: Cognitive Processes: 3 semester hours

Prerequisites: Admission to the Graduate Program in Psychology or consent of instructor. This course is an introduction to classic and contemporary theories, methodologies, and theoretical perspectives used in the field of cognitive psychology. The emphasis is on basic research in the field of cognitive psychology but some applications of these experiments are discussed as well. The class will read and discuss chapters from cognitive psychology textbooks as well as classic and contemporary empirical journal articles in cognitive Psychology.

PSYCH 6410 Gender, Sexuality, and Mental Health: 3 semester hours

Same as GS 6410. Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. This course will focus on contemporary theory and research on gender and sexuality as they pertain to mental health issues. Gender differences and similarities in the presentation, etiology, and treatment of sexual health problems and other mental illnesses will be discussed.

PSYCH 6415 Seminar in Health Psychology & Behavioral Medicine: 3 semester hours

Prerequisites: Consent of instructor. This course analyzes research, theory, and clinical applications in the interrelationships of behavior, psychological states, physical health and disease. Discussion includes theoretical foundations of health and illness, biopsychosocial factors affecting health and illness, diagnostic issues, prevention, interdisciplinary treatment applications, health and public policy, and research issues. Critical evaluation of theory and empirical support for clinical applications will be discussed.

PSYCH 6441 Aging and Health Behavior: 3 semester hours

Same as GERON 6441. Prerequisite: Graduate standing. This course examines sociocultural influences on health care practices of older adults. The role of social support and other social resources in the health behavior of older adults is emphasized. Topics include self care decisions, formal service utilization, family caregiving, and planned interventions for older adults.

PSYCH 6448 Multicultural Issues in Clinical Psychology: 3 semester hours

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. A survey of theoretical perspectives utilized in the treatment of various cultural groups. Their relationship to and implications for the treatment of members of various cultural groups will be explored. Strategies and ethical concerns in diagnosis, test interpretation, and treatment are considered.

PSYCH 6466 Seminar: Developmental Psychology: 1-3 semester hours

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. A critical examination of contemporary problems in developmental psychology.

PSYCH 7403 Psychopathology: 3 semester hours

Prerequisite: Admission to clinical psychology program or permission of instructor. A critical examination of the clinical-experimental literature in psychopathology. Etiologies of cognitive/affective functions and dysfunctions are explored, and implications for therapeutic interventions are considered.

PSYCH 7404 Introduction to Clinical Assessment I: 4 semester hours

Prerequisites: Admission to Clinical Psychology program. Fundamentals of clinical assessment with emphasis on interviewing and the measurement of cognitive functioning. This course includes a laboratory.

PSYCH 7405 History and Systems in Psychology: 3 semester hours

Prerequisites: Admission to Clinical Psychology program or consent of instructor. A comprehensive overview of the history of psychology with emphasis on the systems of thought that have shaped contemporary psychological theory and research.

PSYCH 7406 Introduction to Clinical Assessment II: 4 semester hours

Prerequisites: PSYCH 7404. This course addresses theory and techniques of personality assessment including clinical interviewing, objective and projective assessment, and integrative report writing.

PSYCH 7412 Social Psychology: 3 semester hours

Prerequisites: Admittance to psychology doctoral program or consent of instructor. A review of key areas in contemporary theory and research in social psychology.

PSYCH 7419 Existential Issues in Clinical Psychology: 3 semester hours

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. This course will review existential thought in psychology and its application to understanding clinical problems and treatment. Particular attention will be given to how psychotherapy can be understood within an existential framework that focuses on the issues of death, freedom, responsibility, and isolation.

PSYCH 7421 Quantitative Methods I: 4 semester hours

Prerequisites: Admission to the Graduate Program in Psychology or consent of instructor. A comprehensive study of univariate statistical concepts and analyses used in psychological research. Topics include descriptive statistics, normal distributions, z , t , F , chi-square statistics, and distributions. Correlation, simple and multiple regression, factorial and repeated measures analysis of variance, significance testing and effect size are also examined.

PSYCH 7422 Quantitative Methods II: 4 semester hours

Prerequisites: PSYCH 7421 and consent of instructor. (With laboratory) A comprehensive study of the use of multivariate statistics in data analysis. Topics include the general linear model, multiple regression, factor analysis, and multivariate analysis of variance.

PSYCH 7423 Quantitative Methods III: 3 semester hours

Prerequisites: PSYCH 7422 and PSYCH 7429 and consent of instructor. A selective study of the use of multivariate statistics in data analysis. Topics include structural equation modeling, multilevel modeling, and analysis of longitudinal data.

PSYCH 7429 Psychometric Theory: 3 semester hours

Prerequisites: PSYCH 7421, PSYCH 7422 and consent of instructor. A consideration of classical and modern theories of psychological testing. Topics include test reliability, validity and construction.

PSYCH 7430 Introduction to Clinical Skills: 1 semester hour

Prerequisites: Admission to doctoral program in clinical psychology. An introduction to processes and procedures involved in psychotherapy.

PSYCH 7431 Clinical Supervision: 1-3 semester hours

Prerequisite: Admission to Clinical Psychology Program. Supervised experience in clinical practice. May be repeated six times for credit.

PSYCH 7432 Ethics and Professional Issues: 3 semester hours

Prerequisites: Admission to Clinical Psychology program. A study of issues in professional development, clinical supervision, risk management, and ethical standards as they relate to teaching, research, and professional practice.

PSYCH 7433 Clerkship in Clinical Psychology: 1 semester hour

Prerequisites: Admission to the doctoral program in Clinical Psychology. Supervised training in an affiliated agency or organization following completion of two years of course work. (May be repeated 3 times).

PSYCH 7434 Foundations of Clinical Interventions: 3 semester hours

Prerequisites: Admittance to Clinical Psychology program. This course focuses on conceptual and methodological issues that are central to the development, evaluation and application of interventions in clinical psychology. Topics include efficacy and effectiveness research, introduction to theories of behavior change, and applications with specific populations.

PSYCH 7439 Summer Supervision: 1 semester hour

Prerequisites: PSYCH 7431. Supervised experience in clinical practice at all graduate year levels during the summer months. Can be repeated for credit.

PSYCH 7442 Seminar: Cognitive and Behavioral Interventions: 3 semester hours

Prerequisites: PSYCH 7434. This course focuses on the theory and practice of cognitive-behavioral interventions in the field of clinical psychology.

PSYCH 7447 Trauma and Recovery: 3 semester hours

Prerequisites: Graduate Trauma Studies Certificate. A comprehensive seminar on the psychological effects associated with exposure to potentially traumatic events. The course will include information on the history of trauma studies; definitions of stressful and traumatic events; common responses to these events; theoretical models for conceptualizing traumatic responses; information on specific types of traumatic events; and issues in treatment.

PSYCH 7449 Research Methods and Project Development In Applied Psychology: 1-3 semester hours

Prerequisite: Admission to the Graduate Program in Psychology or consent of instructor. This course focuses on the basics of conducting research in Industrial-Organizational Psychology. Topics include: philosophy of science; reliability and validity; experimental, quasi-experimental, and non-experimental designs; power; meta-analysis; survey/item analyses; and cross-cultural methods. In addition, the course includes group supervision of initial research that leads to thesis or dissertation proposals. Can be taken up to three times for a total of 6 credit hours.

PSYCH 7450 Clinical Internship I: 1-9 semester hours

Prerequisite: Consent of advisor. Formal, one year, full-time internship providing student with in-depth supervised training within a site approved by the American Psychological Association. This course is repeated in the fall and spring semesters of the internship year.

PSYCH 7451 Clinical Internship II: 1-9 semester hours

Prerequisite: PSYCH 7450 and consent of advisor. Formal, one-year, full-time internship providing student with in-depth supervised training within a site approved by the American Psychological Association. (Taken in the final summer of the internship).

PSYCH 7454 Seminar: Personnel Psychology: 3 semester hours

An analysis of theories and research in personnel and industrial psychology. Topics include testing, assessment centers, performance appraisal, and interviewing.

PSYCH 7455 Seminar: Organizational Psychology: 3 semester hours

An analysis of theories and research in organizational psychology. Topics include theories of motivation, leadership, job design, group process decision-making, organizational effectiveness, and the relation between organizations and their environment.

PSYCH 7457 Seminar: Special Topics in Industrial Psychology: 3 semester hours

A seminar of selected issues and methods in personnel psychology.

PSYCH 7458 Seminar: Special Topics in Organizational Psychology: 3 semester hours

A seminar of selected issues and methods in organizational psychology.

PSYCH 7459 Practicum in Industrial/Organizational Psychology: 1-4 semester hours

Supervised experience in personnel or human resource management.

PSYCH 7461 Summer Research in I/O Psychology: 1 semester hour

Prerequisites: Admission to I/O program. Supervised experience on research topics in I/O psychology at all graduate year levels during the summer months. Can be repeated for credit.

PSYCH 7464 Field Experiences in Industrial-Organizational Psychology: 3 semester hours

Prerequisites: PSYCH 7454 and PSYCH 7455 or consent of instructor.

The course focuses on the innovative application of psychological theory and principles to solving some pressing human resources issues, including actual organizational projects. Through readings, discussions and projects, students obtain hands-on experience with applied psychological issues, striking the needed balance between the theoretical and applied components of Industrial-Organizational psychology.

PSYCH 7465 Applied Issues in Organizational Psychology: 3 semester hours

Prerequisites: PSYCH 7455 or consent of instructor. Course focuses on the application of psychological theory and principles to organizational development consulting. While such consulting is ultimately intended to enhance organizational level functioning, applications of this approach begin with learning at the individual and small group levels. In this course, students work through real-world cases that address real organizational problems. In addition to this casework, the readings and class discussions will address the theoretical and practical links between individual/team learning and organizational development.

PSYCH 7466 Seminar Series in Industrial/Organizational Psychology: 1 semester hour

Prerequisites: Open only to students in the I/O Psychology Graduate Program. A seminar series involving speakers, presentations, and discussions focusing on applied and theoretical perspectives, techniques, and research in the field of Industrial/Organizational Psychology. May be taken up to 6 times for credit.

PSYCH 7469 I/O Professional Issues and Ethics: 3 semester hours

Prerequisite: Consent of Instructor. In this course students learn the ethical standards as they relate to teaching, research and professional practice in industrial organizational psychology. Other professional and career issues are also discussed.

PSYCH 7472 Special Topics in Psychology: 1-3 semester hours**PSYCH 7474 Clinical Research in Applied Settings: 3 semester hours**

Prerequisites: PSYCH 7421 and PSYCH 7422. This course provides information on the design and implementation of research in applied settings (e.g., human service agencies). Topics include program evaluation, consultation models, risk factor analysis, presentation and health promotion, and quality control.

PSYCH 7476 Seminar in Developmental Psychopathology: 2 semester hours

Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of instructor. Introduction to principles, theory, and methods of study in the field of clinical child psychology. Emotional and behavioral dysfunctions are considered from developmental and socialization perspectives.

PSYCH 7478 Directed Research in Industrial/Organizational Psychology: 1-4 semester hours

Independent study of an issue in industrial/organizational psychology through the application of research techniques.

PSYCH 7479 Directed Readings in Industrial/Organizational Psychology: 1-4 semester hours

Independent literature review of a topic in industrial/organizational psychology.

PSYCH 7483 Directed Research: 1-10 semester hours**PSYCH 7484 Directed Readings: 1-10 semester hours****PSYCH 7485 Research Team: 3 semester hours**

Prerequisites: Doctoral standing. Group supervision of research leading to the Independent Research Project.

PSYCH 7486 Research Team II: 2 semester hours

Prerequisites: Completion of Independent Research Project or third year standing in doctoral program in clinical psychology. Group supervision of advanced research related to dissertation proposal and program's comprehensive examination required for doctoral candidacy.

PSYCH 7487 Thesis Research Project: 1-6 semester hours

Prerequisites: Admission to the doctoral program in clinical psychology. Supervised original research project of a clinically-related topic.

PSYCH 7488 Specialty Examination Research: 1-6 semester hours

Prerequisites: Admission to the doctoral program in Clinical Psychology. Supervised original review and analysis of a clinicallyrelated topic.

PSYCH 7491 MA Thesis Research: 1-10 semester hours

Prerequisite: Graduate standing and consent of instructor.

PSYCH 7492 Ph D Thesis Research: 1-10 semester hours

Prerequisite: Graduate standing and consent of instructor.

Sociology, Gerontology and Gender

The Department of Sociology, Gerontology, and Gender

Campus Address: 574 Clark Hall

Web Site: <http://umsl.edu/~sgg/>

Sociology Program: <http://www.umsl.edu/divisions/artscience/sociology/>

Gerontology Program: <http://www.umsl.edu/gerontology/>

Gender Studies program: <http://www.umsl.edu/~genderstudies/>

Main Number: 314-516-6366

Sociology: 314-516-6052

Gerontology: 314-516-5421

Gender Studies: 314-516-5265

Fax Number: 314-516-7235

Three integral programs in the social sciences with long histories of cooperation and collaboration merged to form the Department of Sociology, Gerontology, and Gender (SGG) in the fall of 2015. SGG provides new opportunities for student learning, community engagement, and research.

At a basic level, sociology is the study of social behavior, groups, and institutions. We explore these topics across the full spectrum of the human experience. Our newly integrated department allows us to offer focused explorations of the issues of aging, veteran status, and gender on both individual identity and the structure of the wider society.

Our standard degrees are in Sociology (p. 286) (BS, BA and a minor). Gerontology (p. 295) (undergraduate minor and certificate), and Gender Studies (p. 301) (undergraduate and graduate certificates, and a minor) create the ability within the same department, to focus your education on a variety of important issues that affect individuals, groups and major social institutions.

Sociology and Gerontology have cross listed classes that work together to enhance scholarly understanding of the opportunities and challenges of human aging. Whether you seek a career in health care, social services, policy, business, or criminology, aging will impact your efforts. The Minor in Gerontology adds a formal credential for future work with and for older adults. Students pursuing a BA or BS in Sociology might consider a minor in Gerontology (15 credits) including Aging in America: Concepts & Controversies (GERON/SOC 2170) and 12 additional credits (6 credits at the 4000 level), chosen from classes that are cross listed with Sociology. An 18 credit Undergraduate Certificate in Gerontology is also available

Sociology and Gender Studies have cross listed classes that work together to enhance the scholarly understanding of how society and its institutions regulate and dispense power. The focus of Gender Studies scholarship is on how what we call "race," gender, and socioeconomic status intersect to form not only personal identities but also social values and structures. Students who plan a career in business, human resources, medicine, education, social work, or the many facets of the justice system will find themselves better prepared for the job market as well as with a developed sense of how institutions function both nationally and globally. This understanding is an invaluable tool for the workplace and for personal growth. Students pursuing a BA or BS in Sociology might consider a minor in Gender Studies including 12 credits chosen from classes that are cross listed with Sociology. Nursing and Pre-Med students might also consider the minor since it is designed to fit into their curriculum.

Please visit our Programs' bulletin listings to learn more: Sociology (p. 286), Gerontology (p. 295), and Gender Studies (p. 301).

Jim Craig

Associate Teaching Professor and Interim Chair
Department of Sociology, Gerontology, and Gender
314-516-6037
craigjr@umsl.edu

Sociology

General Information

Degrees and Areas of Concentration

Sociology is the discipline that addresses the most pressing and controversial social issues of our times. The Sociology program is committed to undergraduate education in the techniques and insights of sociological inquiry. Through research and scholarship, the department contributes to informed public policy and stimulates discussion about the challenges of urban life and globalization. Our commitment to these ends advances the University's mission to meet the diverse needs of the state's largest metropolitan area.

The Sociology program offers courses leading to the B.A. in Sociology and the B.S. in Sociology, and a minor. The Sociology minor is an excellent choice to combine with a second minor to create a Bachelor of Liberal Studies B.A., which can be completed on-campus or online. Students may choose to supplement their core education in Sociology with coursework in other areas of their choice. We have "tracks" that allow students earning a Sociology degree to explore Gender Studies and/or Gerontology—even earning minors in these programs. Other areas that may be of interest include African and Africana studies, American Studies, Anthropology, Criminology and Criminal Justice, East Asian Studies, International Studies, and Trauma Studies.

Degree with Distinction in Sociology

A degree with distinction in research, scholarship or creativity in the arts is an honor that recognizes a student for outstanding accomplishments in research and/or other creative endeavors. Students majoring in Sociology who meet the criteria may apply for candidacy for a Degree with Distinction during their final year before graduation. The criteria and guidelines for applying for a Sociology Degree with Distinction can be found on our website (http://www.umsl.edu/divisions/artscience/sociology/files/pdfs/Degree%20with%20Distinction%20in%20Sociology_letterhead.pdf).

Student Experience

Students receive training in a variety of social research methods, including questionnaire survey research, social statistical analysis, qualitative methods, and ethnographic fieldwork. They also have the opportunity to gain hands-on experience in urban community-based research.

Sociology students work with faculty who conduct research in Japan, the St. Louis area, and on the internet. They research topics such as urbanization and globalization, Japanese business and society, new media and the role of technology in society. We also encourage our Sociology students to take advantage of opportunities to study with faculty in the Gerontology and Gender Studies Programs exploring of the issues of aging and gender on both individual identity and the structure of the wider society.

The Sociology program is a leader of the University of Missouri system in innovative online education. Several courses offer the flexibility of attending an in-class lecture or accessing the lecture and course material online, according to the individual's schedule.

Department Awards and Honors

The Ray Collins Alumni Award is given annually by the Sociology Alumni Association to the top graduating senior. The awardee is selected by the faculty on the basis of GPA.

The Sociology Alumni Awards are awarded by faculty annually on the basis of merit. In addition, one outstanding senior, junior, and freshman are recognized annually based on merit. The Outstanding Sociology Minor Award is presented to the graduating student with the most outstanding minor GPA record.

Department Honors in Sociology are awarded to B.A. and B.S. degree candidates in sociology with an overall grade point average of 3.2 or better.

Sociology Program Scholarship

The Sociology Program offers scholarships to majors in Sociology. Click the link below for more information.

[Sociology Major Scholarship](https://umsl.academicworks.com/opportunities/4008) (<https://umsl.academicworks.com/opportunities/4008>)

Go to the Financial Aid page to [Apply for a Scholarship](http://www.umsl.edu/services/finaid/scholarships/apply.html) (<http://www.umsl.edu/services/finaid/scholarships/apply.html>) and see more information on how to apply.

Career Outlook

The Sociology Program teaches the transferable job skills that enable students to rationally analyze social issues and arrive at effective solutions. These skills are valuable for careers in health and social services; human resources; community planning; non-profit leadership; consumer marketing research and consulting; and jobs involving social research in corporate, non-profit, and government settings. Sociology also provides a solid foundation for graduate school in any of the social sciences, and for professional training in fields such as law, medicine, and social work.

Undergraduate Studies

General Education Requirements

Students must satisfy the university and college General Education requirements (p. 41). Courses in sociology may be used to meet the social science requirement. The foreign language requirement for the B.A. degree may be satisfied in any language. No course in which a grade below a C- is received will count toward satisfying the core requirement.

Learning Goals and Outcomes

At the end of the program, students should have these competencies:

1. Graduates will understand the discipline of sociology and demonstrate an ability to think critically about society. They will understand the contemporary relevance of basic sociological concepts, including culture, socialization, stratification, social structure, institutions, social change, and globalization.
2. Graduates will understand the role of theory in sociology and be able to distinguish micro and macro theory. They will demonstrate an understanding of the role of race, ethnicity, gender, age, and class in social differentiation.
3. Graduates will demonstrate an understanding of the reciprocal relationships between individuals and society, and be able to

demonstrate how societal and structural factors influence individual behavior and the development of the self.

4. Graduates will be able to explain the sources of urban inequality. They will be able to utilize sociological evidence to analyze social policy and make policy recommendations.
5. Graduates will master the application of qualitative and quantitative methods to social phenomena, demonstrate mastery of relevant computer and digital research skills, know how to design a community-based research study, and know how to convey data findings in a research report.
6. Graduates will be able to describe and apply the principles of ethical practice as a sociologist. They will value the internal diversity of American society and appreciate the role of the U.S. in globalization.

Degree Requirements

Bachelor of Arts in Sociology

General Education Requirements

Majors must satisfy the university and college general education requirements. Any foreign language may be used to meet the language requirement for the B.A. degree.

All required courses for the major must be completed with a grade of C- or better. Courses counting toward the major requirements may not be taken on a satisfactory/unsatisfactory basis.

The following **six core courses (18 credit hours)** are required:

- 1 Students who enroll in SOC 4307 must take a section approved by the department.

The total number of hours required for the B.A. degree is a minimum of 33. Students may elect to take up to, but not to exceed, 12 additional hours in sociology courses of their choice.

SOC 1010	Introduction To Sociology	3
SOC 2160	Social Psychology	3
SOC 3210	Sociological Theory	3
SOC 3230	Research Methods	3
SOC 4307	Community-Based Research in Sociology ¹	3
or SOC 4040	Survey Research Practicum for Sociology	
One college level statistics course from the following list, or another course approved by a department advisor:		3-4
CRIMIN 2220	Statistical Analysis In Criminology And Criminal Justice	
MATH 1105	Basic Probability And Statistics	
MATH 1310	Elementary Statistical Methods	
MATH 1320	Applied Statistics I	
PSYCH 2201	Psychological Statistics	
SOC 3220	Social Statistics	

In addition to the core courses, five courses at the following levels are required, of which a minimum of three must have the SOC designation (and two may have an ANTHRO designation).

In addition to SOC 1010, 3 credit hours or one course in Sociology numbered 1000-1999 or from the following list of Anthropology courses: 3

ANTHRO 1011	Introduction To Cultural Anthropology	
ANTHRO 1021	The Body In Culture	
ANTHRO 1025	World Cultures	
ANTHRO 1041	Sex And Gender Across Cultures	
ANTHRO 1163	Disagreement, Difference, Diversity	
In addition to SOC 2160, 3 credit hours or one course in Sociology numbered 2000-2999; or from the following list of Anthropology courses:		3
ANTHRO 2105	Human Variation	
ANTHRO 2111	Cultures Of East Asia	
ANTHRO 2114	Cultures Of The Near And Middle East	
ANTHRO 2120	Native Peoples Of North America	
ANTHRO 2121	Native American Spirituality	
ANTHRO 2123	Cultures Of Oceania	
ANTHRO 2124	Cultures Of Africa	
ANTHRO 2192	Anthropological Perspectives on Western Culture	
In addition to SOC 3210, SOC 3220, and SOC 3230, 3 credit hours or one course in Sociology 3000-3999; or from the following list of Anthropology courses:		3
ANTHRO 3211	Language and Society	
ANTHRO 3212	Medical Anthropology	
ANTHRO 3215	Aging Across Cultures	
ANTHRO 3216	Cognition Across Cultures	
ANTHRO 3235	Women In Subsaharan Africa: A Contemporary Perspective	
ANTHRO 3236	Sex Trafficking in Cross-Cultural Perspective	
ANTHRO 3237	Japanese Popular Culture	
ANTHRO 3270	Human Ecology, Cultural Collapse, and Sustainable Developments	
ANTHRO 3291	Current Issues In Anthropology	
In addition to SOC 4040 or SOC 4307, 6 credit hours or two courses in Sociology numbered 4000-4999,		6
Total Hours		33-34

Residency Requirement

Bachelor of Arts majors must complete a minimum of 12 hours of upper-level (3000-4000) Sociology courses in residence, including SOC 3230 and either SOC 4040 or SOC 4307

Bachelor of Science in Sociology

General Education Requirements

Majors must satisfy the university and college general education requirements. Foreign language proficiency is not required, although students are encouraged to take foreign language courses.

All required courses for the major must be completed with a grade of C- or better. Courses counting toward the major requirements may not be taken on a satisfactory/unsatisfactory basis.

The following **six core courses (18 credit hours)** are required:

Core Courses

SOC 1010	Introduction To Sociology	3
SOC 2160	Social Psychology	3
SOC 3210	Sociological Theory	3
SOC 3230	Research Methods	3
SOC 4307	Community-Based Research in Sociology ¹	3
or SOC 4040	Survey Research Practicum for Sociology	
One college-level statistics course from the following list, or another course approved by a department advisor:		3-4
CRIMIN 2220	Statistical Analysis In Criminology And Criminal Justice	
MATH 1105	Basic Probability And Statistics	
MATH 1310	Elementary Statistical Methods	
MATH 1320	Applied Statistics I	
PSYCH 2201	Psychological Statistics	
SOC 3220	Social Statistics	
In addition to the core courses, seven courses at the following levels are required, of which a minimum of five must have the SOC designation (and two may have an ANTH designation).		
In addition to SOC 1010, 6 credit hours or two courses in Sociology numbered 1000-1999 or from the following list of Anthropology courses:		6
ANTHRO 1011	Introduction To Cultural Anthropology	
ANTHRO 1021	The Body In Culture	
ANTHRO 1025	World Cultures	
ANTHRO 1041	Sex And Gender Across Cultures	
ANTHRO 1163	Disagreement, Difference, Diversity	
In addition to SOC 2160, 3 credit hours or one course in Sociology numbered 2000-2999; or from the following list of Anthropology courses:		3

ANTHRO 3236	Sex Trafficking in Cross-Cultural Perspective	

ANTHRO 3237	Japanese Popular Culture
ANTHRO 3255	Oral History And Urban Culture In St. Louis ²
ANTHRO 3270	Human Ecology, Cultural Collapse, and Sustainable Developments
ANTHRO 3291	Current Issues In Anthropology
In addition to SOC 4040 or SOC 4307, 9 credit hours or three courses in Sociology numbered 4000-4999.	
Total Hours	39-40

¹ Students who enroll in SOC 4307 must take a section approved by the department.

² This course will not be offered in 2014-2015. Please contact the department for more information.

The total number of hours required for the B.S. degree is a minimum of 39. Students may elect to take up to, but not to exceed, 12 additional hours in sociology courses of their choice.

Residency Requirement

Bachelor of Science majors must complete a minimum of 15 hours of upper-level (3000-4000) Sociology courses in residence, including SOC 3230 and either SOC 4040 or SOC 4307.

B.A. or B.S. in Sociology with Teacher Certification

Students must complete the B.A. or B.S. in sociology requirements, as well as the requirements for teacher certification. (See the College of Education section of this Bulletin.)

Requirements for the Minor

A minimum of 15 credit hours is required, of which a minimum of 12 hours must be in sociology. Three credit hours may be counted toward the minor from among the list of UMSL anthropology courses that are allowed for the sociology BA and BS majors. Candidates must have a cumulative grade point average of 2.0 or better in all courses pertaining to the minor. Department courses taken on a satisfactory/unsatisfactory basis may not be applied to the minor.

A minimum of 6 hours must be at the 4000 level (no more than 3 hours of either SOC 4350, Special Study, or SOC 4385, Internship, may be applied to this 4000 level requirement).

At least 9 credit hours must be courses offered by UMSL's Sociology program and must be beyond those applied to the candidate's major.

Candidates are encouraged to take some or all of the core requirements for the major.

For the capstone course requirement, students in the Bachelor of Liberal Studies program must take one additional 4000 level course in Sociology not used in the minor, excluding SOC 4350 (Special Study) or SOC 4385 (Internship).

Total Hours: 120-121

- ¹ INTDSC 1003 is required only for first-time freshmen and transfer students with less than 26 college credits.
- ² The general education courses listed assumes the U.S. History/ Government requirement and the Cultural Diversity requirement are fulfilled with Social/Behavioral Science or Humanities general education courses.

Please Note: This plan is an example of what a four year plan could look like for a typical student. Placement exam scores in math as well as the completion of coursework may change the plan. It should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor each semester. All requirements are subject to change.

Courses

SOC 1010 Introduction to Sociology (MOTR SOCI 101): 3 semester hours

An introduction to sociological approaches to human behavior including types of social organizations, patterns of social interaction, and social influences on individual conduct.

SOC 1040 Social Problems: 3 semester hours

Conditions defined by society as social problems, as well as potential solutions, are examined from various sociological perspectives. Emphasis is given to problem issues prevalent in metropolitan settings. Analyses focus on victims and beneficiaries of both problem conditions and alternative solutions.

SOC 1051 Sport, Culture, and Society: 3 semester hours

Same as ANTHRO 1051. What is the relationship between sport, culture, and society? This course takes a critical and analytical approach to the relationship between sport and socio-cultural issues and institutions: values, education, socialization, deviance, violence, inequality, the mass media, and economics. Students will investigate the functions of sport in various cultures and societies, analyze the relationship between sport and social problems, and develop policy recommendations that address these issues.

SOC 1091 Introductory Topics in Sociology: 3 semester hours

This course features special and current topics at the introductory level in the field of sociology. Examines the basic concepts and provides an understanding of the development of new trends and areas of study. May be repeated provided topic is different.

SOC 1241 Globalization and Social Change: 3 semester hours

Introduces sociological approaches to globalization. Covers sociological concepts such as modernization, Westernization, global capitalism, and the information society. Themes include global governance and transnational society, the global diffusion of American popular culture and consumer culture, and the role of new media. Also discusses the anti-globalization movement and forms of social resistance.

SOC 1999 The City: 3 semester hours

This course explores the central role of cities in the modern world. Covers processes of urbanization such as immigration, segregation and ghettoization, suburbanization, and sprawl. Explores the consequences of urban inequality and issues related to race and ethnicity, class, and gender in an urban context. Also covers urban landscapes, demographics, and lifestyles; and cities as centers of music and other forms of popular culture.

SOC 2003 Careers in Health and Medicine: 1 semester hour

Same as ANTHRO 2003, GERON 2003, INTDSC 2003. In this course, students will learn about occupations in such fields as medicine, the allied health professions, health non-profit organizations, and global healthcare delivery. Students will understand the education and skills necessary for various careers and for application to medical, professional, and graduate schools, and will become familiar with majors, certificates and minors that are available at UMSL. They will learn about employment opportunities in the healthcare industry in the St. Louis metropolitan area, and will be introduced to members of the local community who give guest lectures. Students will gain practical experience by shadowing a healthcare professional in their job.

SOC 2102 Introduction to Gender Studies: 3 semester hours

Same as GS 2102, SOC WK 2102, POL SCI 2102, and HIST 2102. This core class is required for all Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

SOC 2103 Gender Roles in Society: 3 semester hours

Prerequisite: SOC 1010. The study of social processes through which gender roles are developed and acquired; the impact of gender roles on personal identity and social conduct; the relationship between gender roles and social inequality; and individual and social consequences of changing gender roles in contemporary society.

SOC 2160 Social Psychology: 3 semester hours

Same as PSYCH 2160. Prerequisite: PSYCH 1003 or SOC 1010. This course examines the behavior, thoughts, and feelings of individuals in their social environments. The content focuses not only on how people relate to one another, but also on the processes affecting their interactions with others. Specific topics include the self, social judgments, attitudes and persuasion, helping behavior, prejudice, aggression, attraction, conformity and obedience, and group processes. All Psychology majors taking this course instead of PSYCH 2270 must complete it with a grade of C- or higher.

SOC 2170 Aging in America: Concepts & Controversies: 3 semester hours

Same as GERON 2170. This course examines the major theoretical and service issues connected to the study of older adults and their families, using multidisciplinary perspectives. Students are provided with an introduction to the field of aging through an examination of current social issues and controversies. This course emphasizes student involvement through class discussion and applied activities, and is appropriate for students in the arts and sciences, business, communication, education, and nursing.

SOC 2180 Alcohol, Drugs and Society: 3 semester hours

Same as CRIMIN 2180. Prerequisite: SOC 1010 or PSYCH 1003. This course examines the medical, legal and social aspects of alcohol and drug use. Medical aspects considered include treatment approaches and the role of physicians in controlling such behavior. In the legal realm, past and present alcohol and drug laws are explored. Cultural and social influences on alcohol and drug use are discussed.

SOC 2192 Special Topics in Sociology: 3 semester hours

This course focuses on a specific society or group of societies utilizing sociological approaches. Examines environmental, economic, social, political, ethnic, religious, linguistic and/or cultural domains. Students are exposed to basic sociological concepts for understanding diverse societies in their historical and/or contemporary contexts. May be repeated provided topic is different.

SOC 2200 Languages and World View: 3 semester hours

Same as FGN LANG 2100 and ANTHRO 2100. Prerequisites: Completion of two semesters of one foreign language at the college level. This course investigates the extent to which peoples' linguistic and cultural background informs their understanding of the world. Experts on a variety of major Western and non-Western languages will introduce students to differences in ideas about time, space, human relationships, and other issues based on language. The course will also analyze common cultural misunderstandings among native speakers of English and speakers of other languages.

SOC 2201 Deviance and Society: 3 semester hours

The study of traits and behaviors that violate social norms and elicit negative reactions. Explores the establishment of categories of deviance; the motivations behind deviant behavior; the identification of individuals and groups as deviant; the effects of institutionalization and social control upon the deviant; and the efforts of deviants to eradicate the label society has placed upon them.

SOC 2202 Urban Sociology: 3 semester hours

Covers classical works and contemporary theories in urban sociology from the nineteenth to the twenty-first centuries. Examines urbanism and community, forms and functions of cities, inequality and social difference, gender and sexuality, globalization and urban change, immigration and its impact on cities, and urban exclusion/social resistance. Includes reading well-known ethnographic works on such topics as sex work, homelessness, drug users and crackhouses, life in corner bars, gang members, and other alternative subcultures.

SOC 2224 Marriage and The Family: 3 semester hours

Same as GS 3224. The study of patterns of close relationships, and how these relationships are influenced by larger social forces. Topics include love, dating, mate selection, cohabitation, alternative lifestyles, working families, parenting, single mothers, families in crisis, domestic violence, and divorce. Universal and variable aspects of family organization, family role systems, and changes in family social structure are considered.

SOC 2280 Technology and Society: 3 semester hours

Examines the role of technology in the development of today's industrial and post-industrial societies. Topics include the social and cultural origins of technological innovation; the connection between technology and urbanization; and the impact of technological change on beliefs and values. Outlines the transition from industrial society to the post-industrial "information society," and the role of technology in globalization.

SOC 2300 Social and Community Services for an Aging Population: 3 semester hours

Same as GERON 2300. This service-learning course is designed for students interested in working with and for the benefit of older adults in various settings. Students attend classes on campus and participate in defined volunteer placements with local agencies (e.g., St. Louis County Older Residents Program). The course introduces the range of social and community services available to seniors and their families today, while also exploring trends and technologies for the future. Public, for-profit and not-for-profit service models are examined, including common organizational, management, and staffing approaches. The important roles of volunteers – including peer to peer supports – are discussed. Attention is also given to how limited resources are allocated and the importance of program evaluation to ensure service quality and efficacy.

SOC 2316 Power, Ideology and Social Movements: 3 semester hours

This course explores how power and ideology operate in the advanced modern world. It investigates the historical and institutional contexts that help explain uprisings and discontents in the twentieth and twenty-first centuries, such as the Occupy Wall Street movement, the political struggles in the Middle East, and the uprisings and social movements throughout Latin America. Topics include an overview of the key works of Marxist theory and major radical social thinkers. Among the issues examined is the potential for social movements to produce revolutionary action resulting in new social systems.

SOC 2338 Health and Society: 3 semester hours

Exploration of social dimensions and issues related to health and illness such as access to the health care delivery system; factors influencing prevention, utilization and compliance; changing relationships among health care providers and consumers; health care costs, trends, and cross-cultural variations.

SOC 3210 Sociological Theory: 3 semester hours

Prerequisite: SOC 1010 or consent of instructor. The nature of sociological theory. An investigation of theory from Comte through contemporary developments. Contributions made by theorists in related disciplines.

SOC 3211 Language and Society: 3 semester hours

Same as ANTHRO 3211. Prerequisites: ANTHRO 1011 or SOC 1010 or consent of instructor. Variable topics in the subfield of linguistic anthropology will be explored. The focus of the course may include study of communication as part of our evolutionary heritage, the use of language as an index of social and cultural change, language and gender, or other topics.

SOC 3212 Medical Anthropology: 3 semester hours

Same as ANTHRO 3212 and GERON 3212. Prerequisites: ANTHRO 1011 or GERON 2170 or PSYCH 1003 or SOC 1010 or consent of instructor or program director. An examination of the growing interaction between anthropology and medicine, and the increasing use of anthropologists in medical and health-care settings. In addition to teaching current theory in medical anthropology, the course focuses on anthropologically-based skills essential to those working in health-related fields.

SOC 3220 Social Statistics: 3 semester hours

Same as ANTHRO 3220. Prerequisite: SOC 1010 or ANTHRO 1011 and MATH 1020 or MATH 1030. Issues and techniques of statistical analysis relevant to quantitative sociological research e.g. elementary probability, measurements of central tendency and dispersion, measures of relationships including linear regression and correlation, inferential and nonparametric statistics. The course includes an introduction to computer-based statistical analysis.

SOC 3224 Families in Global Perspective: 3 semester hours

Same as GS 3224. Prerequisites: SOC 1010 or consent of instructor. This course presents research from the fields of demography, sociology, economics, and public policy in order to develop a broader understanding of the causes and consequences of population aging, one of the major demographic changes faced by social institutions worldwide. Attention to the global diversity of human experiences by age, gender, socioeconomic status, and health.

SOC 3230 Research Methods: 3 semester hours

Prerequisites: SOC 1010 and satisfaction of mathematics proficiency requirement or consent of instructor. Research planning and interpretation, principles of research design, measurement, and sampling. Techniques for the collection, analysis, and presentation of data. The course also includes an introduction to the Statistical Package for the Social Sciences (SPSS) and lab exercises.

SOC 3237 Contemporary Japanese Culture: 3 semester hours

Same as ANTHRO 3237. Prerequisites: Junior Level Standing. Through ethnographies, biographies, fiction, films, anime, manga, television, music, magazines, and other media, the course investigates a range of topics related to Japanese history, social diversity, subcultural identity, gender, demographic change, and media. The study of Japanese culture is ideal for understanding theoretical issues such as the construction of gender and sexuality, identity formation, nationalism, emerging youth cultures, and the processes of globalization and localization. Satisfies University cultural diversity requirements.

SOC 3250 Sociology of Victimization: 3 semester hours

Same as GS 3250. Prerequisite: SOC 1010. This course examines the role of social factors in a wide range of kinds of victimization--crime, violence, natural disasters, accidents, disease, etc. The topic of social reactions to various kinds of victimization is also covered. Sociological theories of victimization are emphasized.

SOC 3260 Social Interaction in Small Groups: 3 semester hours

Prerequisites: SOC 2160 or PSYCH 2160 or consent of instructor. Analysis of human interaction with emphasis on group problem solving, group structure, and group process.

SOC 3268 The Sociology of Conflict: 3 semester hours

Prerequisite: SOC 1010 or consent of instructor. The conditions under which social conflicts arise, develop, and are terminated (or in some cases resolved) are examined. The functions of different levels of conflict are studied to determine the potential effects and outcomes of planned intervention.

SOC 3280 The Networked Society: 3 semester hours

Prerequisites: SOC 1010, ANTHRO 1011, or introductory course in another social science, or consent of instructor. Explores the effects of modern information technology on societies worldwide. Covers the ways in which new technologies of communication have created increasingly networked local and global societies, as well as to the ways in which they have created new social problems.

SOC 3291 Current Issues in Sociology: 3 semester hours

Prerequisite: SOC 1010 or ANTHRO 1011; or consent of instructor. Selected topics in sociology, with emphasis on current issues and trends in the field. May be repeated provided topic is different.

SOC 3300 The Social Construction of Aging and Ageism: 3 semester hours

Same as GERON 3300 and GS 3300. This course examines perspectives of age, aging, and ageism using several perspectives: the theory of social construction and the frameworks of essentialism and intersectionality. The materials, discussions, and assignments in this course will familiarize and provide students with tools to investigate age and ageism in a complex, multidimensional manner. The overarching focus of this course is located in the tension with the "nature versus nurture" debate, paralleling nature with essentialist ideas and nurture with social constructionism. Ideas, conceptions, attitudes, and understandings of age within the media, family, medical community, and other institutions will be investigated as biological and/or a development of society in effort to perpetuate social control, organization, and power dynamics. Through research, fiction and non-fiction work, creative assignments, and theoretical texts, students will approach the following questions: How do we value lived-experiences? How might situated knowledge affect social constructions of aging and ageism? What evidence is provided toward age and/or ageism as an essential or socially constructed outline within society? How are socially constructed ideas developed and perpetuated? How might one affect change in an essentialist and/or socially constructed society?.

SOC 3344 Problems of Urban Community: 3 semester hours

Prerequisite: SOC 1010, junior standing or consent of instructor. Issues of inequality and identity in cities, with emphasis on the consequences of urban growth; processes of class, racial, and ethnic group formation; and urban poverty. Also covers local community organization and politics, and the role of popular culture and religion in community identities.

SOC 3400 Environment, Society, and Aging: 3 semester hours

Same as GERON 3400. This course examines the intersection of the environment and human society with an emphasis on aging. Drawing from research in environmental sociology, medical sociology, and gerontology, this course will address the following topics: climate change, natural disasters, community development, food production and distribution, waste and pollution, illness and disease epidemiology, and health and well-being.

SOC 3600 Management and Organizational Behavior: 3 semester hours

Same as MGMT 3600. Prerequisites: Junior standing and a 2.0 campus GPA. This course involves the study of the behavior of individuals and groups in an organizational setting. Specific topics examined include: motivation, leadership, organizational design, and conflict resolution, as well as basic coverage of management principles. In covering these topics, both classic and current perspectives are provided.

SOC 4040 Survey Research Practicum for Sociology: 3 semester hours

Prerequisite: Junior standing, SOC 3230, college-level statistics course, and consent of instructor. The execution of a sample survey, including establishing study objectives, sampling, questionnaire construction, interviewing, coding, data analysis, and presentation of results. May be repeated provided the course topic is different.

SOC 4050 Narrative Experiences in Aging and Health Care: 3 semester hours

Same as GERON 4050, COMM 4050, and GS 4050. Prerequisites: Junior, senior or graduate student status, or permission of the instructor. This course examines the experiences of older adults and their families in the navigation and receipt of primary and specialized health care services. Challenges associated with bias, ageism, ethical dilemmas, miscommunication, patient-provider dynamics, and family systems are addressed. Patient experiences are highlighted across the continuum of care with emphasis on improving current systems.

SOC 4100 Introduction to Feminist and Gender Theory: 3 semester hours

Same as GS 4100. Prerequisites: GS 2102. This class serves as an initial intellectual investigation into gendered ideologies (such as the effects of race, ethnicity, nationality, socioeconomic class, sexuality, and religion) and functions as a bridge to later advanced gender theory and methods courses. Topics include interdisciplinary feminist theories (with a focus on gender equality), including masculinity theory, queer theory, muted group theory, and other evolving frameworks.

SOC 4130 Interviewing Older Adults and Life Review: 3 semester hours

Same as GERON 4130. Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course combines training in interviewing techniques with video editing/production. Students will learn how to conduct life review interviews with older adults, and then take these skills into the community by interviewing older adults living in various settings. Students will learn how to use a digital video camera and edit video clips on the computer. Student-conducted interviews will be viewed by the instructor and classmates, issues associated with aging will be discussed, and constructive feedback provided. Some of the video clips developed in the course will become part of an educational video clip library.

SOC 4150 Feminist Theory and Social Research: 3 semester hours

Same as GS 4150. Prerequisites: GS 2102 and Junior Standing or consent of instructor. This course provides an in-depth examination of feminist theoretical contributions to social science research. We begin by examining the 20th century roots of contemporary feminist theories. With these foundations in place, we then shift to an investigation of how feminist theory has informed sociological research by examining current feminist understandings of gender, race, class and sexual inequalities across a range of contemporary social problems. Fulfills WGS feminist theory requirement.

SOC 4160 Geographic Information Systems in Anthropology & Sociology: 4 semester hours

Same as ANTHRO 4160. Prerequisites: ANTHRO 1005 or ANTHRO 1011 or ANTHRO 1019 or SOC 1010 or consent of instructor. Instruction in use of GIS software to record and analyze findings in archaeology, biological anthropology, cultural anthropology, and sociology. Emphasis is placed upon research design, development of data collection methodologies, and the use of GIS in describing and explaining human behavior and its relationship to the physical environment.

SOC 4280 Social Informatics: 3 semester hours

Prerequisites: Junior standing or consent of instructor. This course reviews the key social issues related to information and communication technology (ICT) design, development, and use. It analyzes the way social forces and social practices interact with information and communication technologies (ICTs), focusing specifically on social, cultural, and organizational change. This course is for students interested in the way information and communication technologies (ICTs) relate to patterns of interaction in the human context, including cultural milieu, professional concerns, community dynamics, and social inequities.

SOC 4300 Communities and Crime: 3 semester hours

Same as CRIMIN 4300. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the sources, consequences, and control of crime within communities. Emphasis on social and ecological theories of crime, and on population instability, family structure, and the concentration of poverty as causes of crime.

SOC 4307 Community-Based Research in Sociology: 3 semester hours

Prerequisites: Junior standing, SOC 3210, SOC 3230, and completion of junior-level writing requirement. An advanced course in qualitative/ethnographic modes of inquiry, building on research and analytical skills learned in previous courses. Some quantitative methods may supplement the research when appropriate. Students experience the process of discovery, representation, presentation, and justification based on fieldwork and/or archival research. The focus is on applying sociological knowledge to practical issues faced by communities and institutions in the St. Louis area. May be repeated provided the topic is different.

SOC 4312 Sociology of Wealth and Poverty: 3 semester hours

Prerequisite: SOC 1010, junior standing or consent of instructor. Theory and research on social stratification and inequality in contemporary societies.

SOC 4320 Forms of Criminal Behavior: 3 semester hours

Same as CRIMIN 4320. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Examination of major types of criminal behavior including violent, property, public order, and organizational offenses. Emphasis on theories of and responses to these crimes.

SOC 4325 Gender, Crime and Justice: 3 semester hours

Same as CRIMIN 4325 and GS 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills Criminology diversity requirement.

SOC 4331 Qualitative Methods in Social Research: 3 semester hours

Prerequisites: SOC 3230, college-level statistics course, junior standing; or consent of instructor. This course is devoted to qualitative methods including participant observation, ethnographic fieldwork, intensive interview, content analysis, and oral history. Considers the place of these kinds of techniques in social research, as well as the issues raised by them. Involves participation in individual or group research projects using one or more of the methods learned.

SOC 4336 Sociology of Organizations: 3 semester hours

Prerequisite: SOC 1010 and junior standing or consent of instructor.

This course examines the internal and external forces that influence the structures, adaptive flexibility, and actions of public and private organizations and agencies. Specific foci include: organizational responses to opportunities, constraints, and contingencies in their surrounding environments; sources of conflict and impediments to organizational goal attainment; and strategies for increasing organizational effectiveness, efficiency, and chances for survival.

SOC 4340 Race, Crime, and Justice: 3 semester hours

Same as CRIMIN 4340. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the involvement of racial minorities in crime and the criminal justice system. Emphasis on group differences in offending, processing, victimization, and employment in criminal justice agencies. Fulfills CCJ diversity requirement.

SOC 4345 War Crimes, Genocide, and Justice in the 20th and 21st Centuries: 3 semester hours

Same as CRIMIN 4345, POL SCI 4345, and MVS 4345. Prerequisite: ENGL 3100. This course provides advanced undergraduate and Master's level students a comprehensive overview of the subject of war crimes, crimes against humanity, genocide and legal responses to these crimes in the modern era. The goal of this course is to engage students in sustained, critical thought about these issues and to foster a deeper understanding of both the causes and consequences—legal, social and human—of these egregious crimes.

SOC 4350 Special Study: 1-10 semester hours

Prerequisite: Consent of instructor. Independent study through readings, reports, and field work.

SOC 4354 Sociology of Business and Work Settings: 3 semester hours

Prerequisite: SOC 1010, junior standing or consent of instructor. The sociology of work and occupations in America, Europe, and Asia; organization structures and worker participation; worker attitude, behaviors, and commitment; the socialization of the worker; determinants of worker behavior; social problems of work and business; and the impact of community on the work place and business behavior.

SOC 4356 Sociology of Education: 3 semester hours

Prerequisite: SOC 1010 and junior standing, or consent of instructor. Education as a social institution, its role as an agent of socialization, and its effect upon the processes of social change and social mobility. The relationship between the school and its community.

SOC 4360 Sociology of Minority Groups: 3 semester hours

Same as GS 4360. Prerequisites: SOC 1010 and junior standing or consent of instructor. The study of dominant-subordinate group relations. Religion, ethnicity, race, and gender as factors in the unequal distribution of power.

SOC 4361 Social Gerontology: 3 semester hours

Same as GERON 4361. Prerequisites: SOC 1010 and junior standing or consent of instructor. Topics include sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

SOC 4362 Sociology of Law: 3 semester hours

Same as CRIMIN 4360. Prerequisites: CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. The interaction of legal, political and social forces in the US is explored. Course examines historical developments in law and politics in the US, including law and economics, crime policy, socioeconomic inequality, race relations, and state sanctioned punishment. The course considers how America's federalist structure shapes law, politics and social relations. Examines how legal and political institutions establish and shape power relations between social groups.

SOC 4365 Sociological Writing: 3 semester hours

Prerequisites: SOC 1010, ENGL 3100 and Junior standing, or consent of instructor. This course offers directed practice in the interpretation and reporting of sociological research in a wide range of styles, including those appropriate for research reports, journal articles, policy papers, non-technical magazines, books and monographs, as well as oral reports to diverse consumers.

SOC 4378 Selected Topics in Social Psychology: 1-3 semester hours

Prerequisite: PSYCH 2160 or SOC 2160 or consent of instructor. Focused examination of selected issues, concepts and methods in the study of social interaction. May be taken twice for credit.

SOC 4380 Advanced Topics in Sociology: 1-3 semester hours

Prerequisites: SOC 1010 and junior standing or consent of instructor. Examination of a specific sociological topic of current relevance in the community. May be repeated provided the topic is different.

SOC 4385 Internship in Sociology: 1-6 semester hours

Prerequisites: Junior standing and consent of instructor. Students participate in supervised placements in positions related to the profession of Sociology.

SOC 4430 Ethnicity, Dementia and Caregiving: 3 semester hours

Same as GERON 4430. Prerequisites: GERON 2170 or SOC 2170 or 3000 level GERON, SOC, PSYCH or ANTHRO course or consent of instructor. This course examines the interaction between sociocultural factors and the experience of dementia, both for the person who has dementia and their family caregivers. Students will focus on the importance of cultural competence in the provision of health and social services to dementia patients and family caregivers from diverse national and ethnic backgrounds.

SOC 4600 Masculinities: 3 semester hours

Same as GS 4600. Prerequisites: SOC 2102 or consent of instructor. This course examines men and masculinities through a critical lens, looking carefully at an institutionalized system of gender relations and practices that is assumed to be a natural phenomenon that is culturally universal. The course explores various masculine behaviors, myths, ideologies, and experiences so that students can consider the relationship between masculine practice and social power and delineate choices for future directions. The course is necessarily interdisciplinary and may utilize tools and methods from the social sciences and the humanities. Satisfies WGS gender theory requirement.

SOC 4720 Ageless Arts: Creativity in Later Life: 3 semester hours

Same as GERON 4720. Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course examines how the lives of older adults are enriched through engagement in artistic, creative activities. Key approaches to creative aging are explored, with emphasis on benefits to physical health, emotional well-being, and interpersonal connection. Influencing factors are examined, including ageism, generativity, family and personal networks, environmental resources, sensory and cognitive deficits, and other health and physical changes of aging. The works of historical and current artists — painters, novelists, filmmakers, playwrights, musicians and others — are surveyed with an emphasis on products from later in the life course. Finally, the therapeutic benefits of creativity are examined through evidence-based research and the personal narratives of successful senior artists.

Gerontology

Overview

Effective Fall 2018 Semester, the Graduate programs in Gerontology will no longer be accepting applications.

Gerontology is the study of aging from perspectives of the individual, family, community and collective bodies (e.g., governments). Gerontologists understand key social, psychological, biological, medical and functional aspects of the aging process, and they apply this knowledge in various professional settings from direct service to public policy.

Degree Options

- Master of Science in Gerontology (36 credit hours; minimum 4 consecutive semesters full-time) 2018
- Graduate Certificate in Gerontology (18; 2)
- Undergraduate Certificate in Gerontological Studies (18; 2)
- Minor in Gerontology (15; 2)

Career Outlook

Americans are living longer and maintaining high quality of life and productive engagement are top priorities for most aging adults today. The post WWII "baby boom" population are now moving into older age and bringing new perspectives and vigor on what it means to be old. The career outlook for gerontology is strong and will continue to be for decades to come.

All of our degree options have applicability to entry level and up to higher level positions. Our graduates work in various direct service, program coordination, administrative, public policy, analytic and education roles with respect to aging. Well trained professionals are always needed in social services and community development. Many local governments now employ Gerontologists to address the needs of their senior residents. This is also true for corporations and banks who serve and target those in the aging marketplace.

Faculty Overview

Gerontology is a multi-disciplinary field of study and professional practice. No single professional can cover all aspects of aging, so teamwork and coordination are keys to success in this field. Gerontologists are trained to see the "big picture" for aging adults and navigate the system to address their unique needs and highlight their many current and potential contributions. Our regular and adjunct faculty have backgrounds

in psychology, social work, optometry, health economics, sociology, hospice, anthropology, nursing, geriatric care management, business, and other relevant fields and professional disciplines.

Minor in Gerontology

Students have many courses to choose from to create a personalized plan of study. All students must take a 3-credit introductory course – Aging in America: Concepts & Controversies (GERON 2170). At least 6 of the remaining 12 credits must be from courses at the 4000 level (see below).

Students wishing to designate a course for capstone for the BLS must coordinate this with Program Director for Gerontology prior to starting the course.

Required Course

GERON 2170	Aging in America: Concepts & Controversies	3
------------	--	---

Electives

Choose Four Courses (with at least 6 credits at 4000 level):		12
PSYCH 1268	Human Growth and Development	
GERON 2220	Special Topics in Gerontology	
PHIL/GERON 2256	Bioethics	
PHIL 2258	Medicine, Values, and Society	
GERON 2300	Social & Community Services for an Aging Population	
GERON/PSYCH 3280	Psychology of Death and Dying	
GERON/ANTHRO 3212	Medical Anthropology	
GERON/ANTHRO 3215	Aging, Culture & Globalization	
SOC 3224	Families in Global Perspective	
GERON 4130	Interviewing Older Adults and Life Review	
GERON/SOC WK 4200	Gerontological Practice with Aging Veterans	
GERON 4320	Gender, Sexuality & Aging	
PSYCH 4349	Human Learning and Memory	
GERON/SOC 4361	Social Gerontology	
GERON/PSYCH/SOC WK 4376	Mental Health and Aging	
GERON 4445	Aging, Chronic Illness & Disability	
GERON 4490	Directed Readings	
GERON 4500	Physiology & Pharmacology of Aging	
GERON 4620	Dying, Grief & Death in Older Adulthood	
GERON 4700	Successful Aging: Individual & Societal Perspectives	
GERON 4720	Ageless Arts: Creativity in Later Life	
GERON/SOC WK 4680	Introduction to Gerontological Practice	

Total Hours

15

Undergraduate Certificate in Gerontological Studies

Opportunities and challenges of human aging intersect with most academic and professional disciplines. Older adults receive a range of health, social, economic and other support services (e.g. through

government programs, medical centers, senior centers, long-term care facilities, not-for-profit agencies) in order to age successfully at home or elsewhere.

The proportion of older adults in the US population will grow substantially in coming decades. The 18 credit hour Undergraduate Certificate in Gerontological Studies (UCGS) is designed to prepare students for entry level, service-oriented positions in this growing marketplace.

The UCGS adds a tangible credential for future work with and for older adults, and it can be pursued with any major area of study with proper planning. Please contact the Director of the Gerontology Program to learn more and for an advising appointment.

Required

GERON 2170	Aging in America: Concepts & Controversies	3
GERON/SOC 2300	Social & Community Services for an Aging Population	3

Choose Four Courses:

GERON/ANTHRO 3212	Medical Anthropology	12
GERON/ANTHRO 3215	Aging, Culture & Globalization	
GERON 4130	Interviewing Older Adults And Life Review	
GERON/SOC WK 4200	Gerontological Practice with Aging Veterans	
GERON/GS/SOC 4320	Gender, Sexuality & Aging	
GERON/SOC 4361	Social Gerontology	
GERON/PSYCH 4376	Mental Health And Aging	
GERON 4445	Aging, Chronic Illness & Disability	
GERON 4500	Physiology & Pharmacology of Aging	
GERON 4620	Dying, Grief & Death in Older Adulthood	
GERON/SOC WK 4680	Introduction to Gerontological Practice	
GERON 4700	Successful Aging: Individual & Societal Perspectives	
GERON 4720	Ageless Arts: Creativity in Later Life	

Total Hours 18

Master of Science in Gerontology

Effective Fall 2018 Semester, the MS in Gerontology will no longer be accepting applications.

The Master of Science degree in gerontology (MSG) is a multidisciplinary program of study and hands-on/service learning designed to prepare students for program management or direct service positions working with, and on behalf of, older adults and their family members.

Learning Outcomes

- A detailed appreciation for the aging process with respect to successful aging, health status, physical functioning, cognition and capacity, psychosocial involvement, diversity, cultural influences and competence, and public policy;
- An ability to integrate theoretical perspectives on aging with the practical needs and concerns of individuals in various living environments;

- An ability to interpret and appropriately utilize research findings to inform daily practice, especially with respect to screening, assessment, intervention, and referral activities;
- Professional competence in the areas of ethical practice, participation in multidisciplinary teams, communication with clients and families, assessment and intervention.

Admission Requirements

Program applicants must have the following:

- Baccalaureate degree.
- 3.0 or B average (students with exceptions should contact the director of the gerontology program).
- Official transcripts of all previous undergraduate/graduate work.
- Three letters of recommendation (from former instructors preferred; from professional associates acceptable).

In addition, students must meet the other general requirements for admission to the Graduate School as explained in the Graduate Study (p. 28) section of the Bulletin.

Admission Requirements

Program applicants must have the following:

- Baccalaureate degree.
- 3.0 or B average (students with exceptions should contact the director of the gerontology program).
- Official transcripts of all previous undergraduate/graduate work.
- Three letters of recommendation (from former instructors preferred; from professional associates acceptable).

In addition, students must meet the other general requirements for admission to the Graduate School as explained in the Graduate Study section of the Bulletin.

Degree Requirements

The students are required to complete 36 credit hours, including 30 hours in gerontology and related courses and 6 hours of statistics/research courses. The required core courses and elective options are listed below. Limited course substitutions may acceptable to meet degree requirements. Substitution decisions are made at the discretion of the Program Director.

Gerontology Distribution Requirements

Core

GERON/ANTHRO 5440	Sociocultural Aspects of Aging	3
GERON 5376	Psychopathology And Aging	3
GERON 6441	Aging And Health Behavior	3
GERON/SOC WK/P P ADM/ POL SCI 6444	Seminar In Public Policy And Aging	3
GERON/SOC WK 6450	Gerontological Assessment	3

Practica in Gerontology

GERON 6495	Practicum In Gerontology	3
Select one of the following:		
GERON 6496	Advanced Practicum In Gerontology	
GERON 6500	Practicum in Gerontological Research	

Research and Statistics

GERON 5420	Research Methods and Analysis I	3
GERON 5450	Research Methods and Analysis II	3
Electives		9
Select three courses (9 credit hours) offered in Gerontology at the 4000 level or higher. Students should consult with the Program Director for approved courses.		
Total Hours		36

Program Administration Option

Students interested in emphasizing program administration qualifications as part of the MSG may request to apply their 9 elective credits towards earning a Certificate in Nonprofit Management & Leadership offered through Public Policy Administration. Students interested in this option must meet with the Certificate Director and request admission by the end of their second semester in the MSG Program. If admitted, the Director of Gerontology and the Certificate Director will work cooperatively to arrange a joint plan of study to meet objectives of both degrees within the 36 credits required for the MSG. Both practicum courses (GERON 6495 & GERON 6496) must emphasize program administration as part of this plan.

Graduate Certificate in Gerontology

Effective Fall 2018 Semester, the MS in Gerontology will no longer be accepting applications.

The graduate certificate in gerontology is designed for students who wish to receive post-baccalaureate training in gerontology. The certificate can be taken by itself or in conjunction with pursuit of a graduate degree in another field. Eighteen credit hours are required.

For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website: <http://umsl.edu/go/Bo3>.

Admission Requirements

Program applicants must have the following:

- Baccalaureate degree.
- 3.0 grade point average (students with exceptions should contact the director of the gerontology program).
- Official transcripts of all previous undergraduate/ graduate work.
- Two letters of recommendation.

Students already enrolled and in good standing in another masters or doctoral degree program at the University of Missouri – St. Louis should consult with the director of the gerontology program concerning streamlined admission options. Limited course substitutions may be acceptable to meet degree requirements. Substitution decisions are made at the discretion of the Program Director.

Core Curriculum

GERON 5376	Psychopathology And Aging	3
GERON/ANTHRO 5440	Sociocultural Aspects of Aging	3
GERON 6441/ SOC WK 6443/ P P ADM 6444/POL SCI 6444	Aging And Health Behavior	3

GERON 6444/ SOC WK 6443/ P P ADM 6444/POL SCI 6444	Seminar In Public Policy And Aging	3
GERON/SOC WK 6450	Gerontological Assessment	3
Practicum		
GERON 6495	Practicum In Gerontology	3
Total Hours		18

Courses

GERON 2003 Careers in Health and Medicine: 1 semester hour

Same as ANTHRO 2003, INTDSC 2003, SOC 2003. In this course, students will learn about occupations in such fields as medicine, the allied health professions, health non-profit organizations, and global healthcare delivery. Students will understand the education and skills necessary for various careers and for application to medical, professional, and graduate schools, and will become familiar with majors, certificates and minors that are available at UMSL. They will learn about employment opportunities in the healthcare industry in the St. Louis metropolitan area, and will be introduced to members of the local community who give guest lectures. Students will gain practical experience by shadowing a healthcare professional in their job.

GERON 2170 Aging in America: Concepts & Controversies: 3 semester hours

Same as SOC 2170. This course examines the major theoretical and service issues connected to the study of older adults and their families, using multidisciplinary perspectives. Students are provided with an introduction to the field of aging through an examination of current social issues and controversies. This course emphasizes student involvement through class discussion and applied activities, and is appropriate for students in the arts and sciences, business, communication, education, and nursing.

GERON 2220 Special Topics in Gerontology: 3 semester hours

Selected topics dealing with various aspects of gerontology. The specific contents of this course will vary from semester to semester. The course may be repeated with permission from the Gerontology director.

GERON 2256 Bioethics: 3 semester hours

Same as PHIL 2256. An examination of ethical issues in health care practice and clinical research and in public policies affecting health care. Topics include: abortion, euthanasia, health care, experimentation, informed consent and the right to health care.

GERON 2300 Social & Community Services for an Aging Population: 3 semester hours

Same as SOC 2300. This service-learning course is designed for students interested in working with and for the benefit of older adults in various settings. Students attend classes on campus and participate in defined volunteer placements with local agencies (e.g., St. Louis County Older Residents Program). The course introduces the range of social and community services available to seniors and their families today, while also exploring trends and technologies for the future. Public, for-profit and not-for-profit service models are examined, including common organizational, management, and staffing approaches. The important roles of volunteers-including peer to peer supports-are discussed. Attention is also given to how limited resources are allocated and the importance of program evaluation to ensure service quality and efficacy.

GERON 3212 Medical Anthropology: 3 semester hours

Same as ANTHRO 3212. Prerequisites: ANTHRO 1011 or GERON 2170 or PSYCH 1003 or SOC 1010 or consent of instructor or program director. An examination of the growing interaction between anthropology and medicine, and the increasing use of anthropologists in medical and health-care settings. In addition to teaching current theory in medical anthropology, the course focuses on anthropologically-based skills essential to those working in health-related fields.

GERON 3215 Aging, Culture & Globalization: 3 semester hours

Same as ANTHRO 3215 and SOC 3215. Prerequisites: ANTHRO 1011 or GERON 2170 or PSYCH 1003 or SOC 1010 or consent of instructor or program director. This course examines the wide-ranging variability in the roles of older people across different cultures and the effects these have on older people, their families, and their societies.

GERON 3280 Psychology of Death and Dying: 3 semester hours

Same as PSYCH 3280. Prerequisite: PSYCH 1003 or consent of the instructor. An exploration of end-of-life issues integrating the scholarly, social, and individual dimensions of death and dying. This course provides a solid grounding in theory and research, as well as practical application to students' lives.

GERON 3300 The Social Construction of Aging and Ageism: 3 semester hours

Same as SOC 3300 and GS 3300. This course examines perspectives of age, aging, and ageism using several perspectives: the theory of social construction and the frameworks of essentialism and intersectionality. The materials, discussions, and assignments in this course will familiarize and provide students with tools to investigate age and ageism in a complex, multidimensional manner. The overarching focus of this course is located in the tension with the "nature versus nurture" debate, paralleling nature with essentialist ideas and nurture with social constructionism. Ideas, conceptions, attitudes, and understandings of age within the media, family, medical community, and other institutions will be investigated as biological and/or a development of society in effort to perpetuate social control, organization, and power dynamics. Through research, fiction and non-fiction work, creative assignments, and theoretical texts, students will approach the following questions: How do we value lived-experiences? How might situated knowledge affect social constructions of aging and ageism? What evidence is provided toward age and/or ageism as an essential or socially constructed outline within society? How are socially constructed ideas developed and perpetuated? How might one affect change in an essentialist and/or socially constructed society?.

GERON 3400 Environment, Society, and Aging: 3 semester hours

Same as SOC 3400. This course examines the intersection of the environment and human society with an emphasis on aging. Drawing from research in environmental sociology, medical sociology, and gerontology, this course will address the following topics: climate change, natural disasters, community development, food production and distribution, waste and pollution, illness and disease epidemiology, and health and well-being.

GERON 4050 Narrative Experiences in Aging and Health Care: 3 semester hours

Same as SOC 4050, COMM 4050, and GS 4050. Prerequisites: Junior, senior or graduate student status, or permission of the instructor. This course examines the experiences of older adults and their families in the navigation and receipt of primary and specialized health care services. Challenges associated with bias, ageism, ethical dilemmas, miscommunication, patient-provider dynamics, and family systems are addressed. Patient experiences are highlighted across the continuum of care with emphasis on improving current systems.

GERON 4130 Interviewing Older Adults and Life Review: 3 semester hours

Same as SOC 4130. Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course combines training in interviewing techniques with video editing/production. Students will learn how to conduct life review interviews with older adults, and then take these skills into the community by interviewing older adults living in various settings. Students will learn how to use a digital video camera and edit video clips on the computer. Student-conducted interviews will be viewed by the instructor and classmates, issues associated with aging will be discussed, and constructive feedback provided. Some of the video clips developed in the course will become part of an educational video clip library.

GERON 4170 Aging in America: Life Course, Health Care and Socioeconomic Perspectives: 3 semester hours

Prerequisites: Junior standing or consent of the instructor. This advanced course focuses on aging in North America from three primary perspectives: (1) the life course and trajectories of personal aging; (2) systems and policies associated with health care; and (3) socioeconomic aspects, including workforce issues and retirement. Human aging is relevant to most professional disciplines and areas of study; thus the course emphasizes a multidisciplinary understanding and encourages integrative thinking, discussion and writing.

GERON 4200 Gerontological Practice with Aging Veterans: 3 semester hours

Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. Aging veterans often demonstrate different social, health and psychological support needs. This practice-oriented course reviews and frames gerontological interventions for different veteran subpopulations, including those residing at home, in senior housing, and under Veterans Administration (VA) care. The impacts of age cohort, gender, service during war or peacetime, post-traumatic stress status, substance abuse and addiction, military culture, and pension and service-connected compensation are studied. Special opportunities and challenges for social service providers in the VA health system are also reviewed.

GERON 4320 Gender, Sexuality & Aging: 3 semester hours

Same as GS 4320. Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course examines advancing age through a gender lens. Men and women experience aging differently based on a host of genetic, biological, psychological, sociocultural and personal identity factors. This course challenges students to consider aging from various perspectives, including cultural expectations and norms, couple and family relationships, health and function, work life and retirement, sexuality, sexual orientation, gender identity, concerns of LGBT elders, and veterans' issues.

GERON 4361 Social Gerontology: 3 semester hours

Same as SOC 4361. Prerequisites: SOC 1010 and junior standing or consent of instructor. Topics include sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

GERON 4376 Mental Health and Aging: 3 semester hours

Same as PSYCH 4376 and SOC WK 4376. Prerequisites: 9 hours of psychology, graduate standing, or consent of instructor or program director. This course provides a survey of theory and research in mental health issues for older populations, focusing on psychological and social aspects of mental health and impairment. The course details approaches to understanding prevalence, etiology, assessment, and treatment of the psychological disorders most commonly experienced by older adults, including anxiety, depression, delirium, and dementia, among others.

GERON 4430 Ethnicity, Dementia and Caregiving: 3 semester hours

Same as SOC 4430. Prerequisites: GERON 2170 or SOC 2170 or 3000 level GERON, SOC, PSYCH or ANTHRO course or consent of instructor. This course examines the interaction between sociocultural factors and the experience of dementia, both for the person who has dementia and their family caregivers. Students will focus on the importance of cultural competence in the provision of health and social services to dementia patients and family caregivers from diverse national and ethnic backgrounds.

GERON 4445 Aging, Chronic Illness & Disability: 3 semester hours

Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course will examine the consequences of chronic illness and disability in aging for individual well-being, social roles, family dynamics, and the functioning of society. Chronic illness and disability are presented as medical concerns that have psychosocial and functional impacts for both individuals with these conditions and their caregivers. These impacts are shaped by the changing age structure of society. This course also reviews typologies of chronic illness and relevant state and federal policies intended to support both adults with chronic illness and disability and caregivers. Although the main focus of the course is on aging in the US, population aging is a worldwide phenomenon and global comparisons will be included.

GERON 4490 Directed Readings: 1-3 semester hours

Prerequisites: Consent of instructor. Directed reading and research or field work. May be repeated for a maximum of three hours.

GERON 4500 Physiology & Pharmacology of Aging: 3 semester hours

Same As PSYCH 4500. Prerequisites: Junior/senior undergraduate or graduate standing, or consent of the instructor or program director. This course examines functional health in advancing age and the impacts of common disease processes on the aging body. Symptom presentations, diagnostic considerations, treatment and management issues are discussed. A special emphasis is placed on pharmacology, especially how the aging body responds to different medication types, risks for drug-drug interactions, and challenges associated with polypharmacy. The course emphasizes a "whole person" approach to health and well-being, and targets the learning needs of those wishing to work with older adults in health, social and community service settings.

GERON 4520 The Aging Body: 3 semester hours

Same as GS 4520. Prerequisites: GERON 2170 or SOC 2170 or another introductory course (2000 or higher) in Gerontology, Sociology, Psychology, Social Work, or Nursing; or consent of the instructor. This course focuses on the aging body with respect to health and function. Physiologic and cognitive concerns of older men and women are reviewed. Contextual factors (e.g., relationships, socio-cultural, spiritual, environmental) and issues in service delivery are also addressed.

GERON 4620 Dying, Grief & Death in Older Adulthood: 3 semester hours

Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course examines trajectories to death in older age, the dying process, influences of medical and aging-related conditions, euthanasia and suicide, life extension and longevity, personal beliefs and existential responses, how individuals and families cope, ethical concerns, and strategies for supportive intervention. Topics are addressed from clinical, supportive care, and interdisciplinary perspectives. Ideal for those planning to work with older adults in counseling, health care, hospice, and/or community support settings.

GERON 4680 Introduction to Gerontological Practice: 3 semester hours

Same as SOC WK 4680. Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course introduces key concepts and practices in the evaluation and care of older adults. It is intended for students considering aging-focused careers in the social service or healthcare fields. Topics include developmental and health-related theories of aging, functional and psychosocial aspects of aging, working with older adults in various service settings, multi and interdisciplinary team approaches, and basic standards of professional conduct that apply across professions.

GERON 4700 Successful Aging: Individual & Societal Perspectives: 3 semester hours

Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course addresses key components of successful aging, including avoidance of disease, maintenance of good mental and physical function, and sustained engagement in life. Students become familiar with the different intra- and extra-personal determinants of successful aging and learn to distinguish between the concepts of successful and productive aging. Also discussed is the impact of societal, economic and political context on success in aging (e.g. health care delivery, entitlement programs, technology, globalization, volunteerism, and culture).

GERON 4720 Ageless Arts: Creativity in Later Life: 3 semester hours

Same as SOC 4720. Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course examines how the lives of older adults are enriched through engagement in artistic, creative activities. Key approaches to creative aging are explored, with emphasis on benefits to physical health, emotional well-being, and interpersonal connection. Influencing factors are examined, including ageism, generativity, family and personal networks, environmental resources, sensory and cognitive deficits, and other health and physical changes of aging. The works of historical and current artists - painters, novelists, filmmakers, playwrights, musicians and others - are surveyed with an emphasis on products from later in the life course. Finally, the therapeutic benefits of creativity are examined through evidence-based research and the personal narratives of successful senior artists.

GERON 5361 Advanced Social Gerontology: 3 semester hours

Prerequisites: Graduate standing. An examination of sociological theories of aging, technological and social change and its effects on the environment of older people, and prejudice and discrimination against the elderly.

GERON 5376 Psychopathology and Aging: 3 semester hours

Prerequisites: Graduate standing. Recent theory and research in mental health issues for older populations. The primary focus is on major psychological disorders prevalent among older adults and in assessment and treatment approaches for aging populations.

GERON 5400 Aging and Environmental Change: 3 semester hours

Prerequisites: Graduate standing. This course examines how changes in the natural environment affect aging and the life course. This course will draw from research in gerontology and related disciplines to explore how changes in the climate, urban and rural landscapes, food production and consumption, and waste and pollution impact health and illness in later life with a focus on the implications of a changing environment for gerontological policy, industry, and clinical practice.

GERON 5420 Research Methods and Analysis I: 3 semester hours

Prerequisites: Admission to the MSG Program or graduate standing.

The first of a two-course sequence designed to provide students with the knowledge base and skills for using the scientific method to advance gerontological knowledge, theory and evidence-based practice. Focuses on research methods employed in aging-related studies, with a special emphasis on the critical evaluation of academic studies and the evidentiary basis of key findings. Covers quantitative and qualitative approaches, research design, sampling procedures, measurement, use of results, impact of research, and ethical considerations.

GERON 5440 Sociocultural Aspects of Aging: 3 semester hours

Same as ANTHRO 5440. Prerequisites: Graduate status or consent of the instructor or program director. Focuses on the variety of solutions encountered in different sociocultural contexts for dealing with the problems, challenges and opportunities of growing old. It is organized around topics that are of concern to both anthropology and social gerontology: the status of the aged, intergenerational relations, aging in modernizing societies, ethnic dimensions of aging in complex societies, health in later life, death and dying. Both in-depth case studies and cross-cultural comparisons are examined in an effort to arrive at a culturally informed assessment of factors affecting aging and the aged in the United States.

GERON 5450 Research Methods and Analysis II: 3 semester hours

Prerequisites: GERON 5420 or equivalent. An advanced course focused on the framing and analysis of qualitative and quantitative data to advance gerontological knowledge, theory, and evidence-based practice. Students learn to use and interpret various statistical procedures for analyzing qualitative and quantitative data (including bivariate and multivariate analyses). Students apply various analytic techniques using computer software applications.

GERON 6120 Theory and Practice with Older Adults: 3 semester hours

Same as SOC WK 6120. Prerequisites: Graduate standing. Examines theory and empirically-based assessment and intervention models for work with the elderly. It includes the life circumstances of older adults and how that differs from younger adult populations; how ethnicity, gender, social class, and sexual orientation interact with age and create special intervention issues; discussion of ethical and value issues (e.g. client autonomy, rationing of health care); examination of family and community resources in providing care; and interventions with physically or mentally disabled elders and elders in residential settings.

GERON 6441 Aging and Health Behavior: 3 semester hours

Prerequisite: Graduate standing. This course examines sociocultural influences on health care practices of older adults. The role of social support and other social resources in the health behavior of older adults is emphasized. Topics include self care decisions, formal service utilization, family caregiving, and planned interventions for older adults.

GERON 6443 Health Care Policy: 3 semester hours

Same as P P ADM 6430, POL SCI 6443, and SOC WK 6443.

Prerequisites: Graduate standing or consent of instructor. Survey course examining current issues in health policy that face the nation. Policies are placed in a historical context to show how issues have been influenced by different political and economic conditions. Secondary consequences and limitations of current trends in health policy are explored.

GERON 6444 Seminar in Public Policy and Aging: 3 semester hours

Same as P P ADM 6444, and POL SCI 6444. The study of specialized issues and methods related to federal, state, and local policies that affect the elderly. Potential policy areas to be covered include: housing, taxation, mental health, transportation, etc. May be repeated for credit, provided the subject matter is different.

GERON 6449 Issues In Retirement: 3 semester hours

Prerequisites: Graduate standing. This course examines macro and micro issues of retirement in the United States--its processes, causes, and consequences--in relation to economic market conditions, demographic changes, and programs and policies that are targeted to support the elderly (e.g., Social Security). It also examines issues relating to older women and retirement.

GERON 6450 Gerontological Assessment: 3 semester hours

Same as SOC WK 6450. Prerequisite: Graduate standing. This course provides an overview of psychosocial assessment with older adults and their family caregivers. Major areas of gerontological assessment practice are considered, including dementia, mood disorders, suicide, grief, alcoholism, elder abuse/neglect, family caregiving, and interdisciplinary team issues.

GERON 6490 Directed Study: 1-3 semester hours

Prerequisite: Consent of instructor. Designed to give the student an opportunity to pursue a more in-depth study of a problem area in gerontology than is normally covered in more formal courses. May be repeated for a total of six credit hours.

GERON 6495 Practicum in Gerontology: 3 semester hours

This course provides supervised work experience in an agency that serves older adults. Students are required to complete a minimum of 150 clock hours at the practicum site.

GERON 6496 Advanced Practicum in Gerontology: 3 semester hours

Prerequisites: GERON 6495 and consent of instructor. This course provides advanced practicum experience beyond GERON 6495. Students must complete a minimum of 150 clock hours of supervised field work (service or research) with older adults.

GERON 6497 Interdisciplinary Geriatric Care: 3 semester hours

Prerequisites: Consent of instructor. Same as VIS SCI 6497. Interdisciplinary approaches that address the medical, social, instrumental and functional needs of older adults will be examined. Information about geriatric care management and social issues affecting the well-being of older adults will be provided. Clinical, theoretical, and educational perspectives will be presented.

GERON 6498 Advanced Seminar In Gerontology: 3 semester hours

Prerequisite: Graduate standing. This course will provide in-depth analysis of specialized topics in gerontology which are not covered in required courses. (Course may be repeated for a maximum of nine credits, assuming topics are different.).

GERON 6500 Practicum in Gerontological Research: 3 semester hours

Prerequisites: GERON 6495 and consent of the instructor. A supervised social science research experience involving a combination of two or more of the following activities: literature review, hypothesis generation, study design and proposal, IRB application, participant recruitment, data collection, data management, data analysis, and report/article generation.

GERON 6510 Directed Research in Aging: 1-3 semester hours

Prerequisites: Consent of the instructor. Designed to give the student an opportunity to explore a question of interest from a qualitative and/or quantitative research perspective. This supervised experience may include one or more of the following activities (depending on enrolled hours): literature review, hypothesis generation, study design and proposal, IRB application, participant recruitment, data collection, data management, data analysis, and report/article generation.

Gender Studies

The Gender Studies Program has several central missions: to provide a comprehensive undergraduate and graduate gender studies curriculum, to support research on gender issues, to sponsor events and provide community outreach for social equity. Faculty engage in disciplinary and interdisciplinary scholarship to enhance our understanding of the ways in which gender, sex and sexuality, notions of race, and socioeconomic class have structured human society and experience across time and cultures. Faculty and students draw upon the rich body of interdisciplinary scholarship to investigate emerging theories and research on gender as well as constructions of femininity and masculinity. Our courses encourage a reassessment of gender roles in society and facilitate students' career goals. Gender Studies classes promote the exchange of knowledge among people of different races, genders, classes, ethnicities, sexualities and cultural conditions. Gender Studies courses enable students to broaden their educational experiences and develop new insights into their own lives and aspirations.

The Gender Studies Major

Undergraduate students may design their own major through the Bachelor's in Interdisciplinary Studies. The Bachelor of Interdisciplinary Studies (BIS) provides a flexible, individualized program of study for the self-directed learner. It is intended for students who have unique educational goals that cannot be met by any other UMSL degree program. Each degree program is developed by the student, with advising by faculty and a professional Student Services Coordinator. It is open to all students, including those enrolled in the Pierre Laclède Honors College. The BIS degree enables a student to combine courses from at least three different disciplines, taken at the intermediate or advanced level. This allows students to study a subject from multiple academic perspectives (for example, Gender Studies, including History, English, Criminology and Criminal Justice, Sociology, and/or Social Work), or to combine courses for a specific career goal (for example, leadership or non-profit management). Student may also receive credit for professional internships, research internships, or community service, under the supervision of a UMSL faculty member. Some BIS degree programs may be completed entirely with evening courses.

The BIS requires the student to define a personalized Area of Study of at least 36 credit hours, no more than 15 hours of which can be in one department. All courses in the Area of Study must be at the 2000-level or above, and 18 credits must be earned at UM-St. Louis after the student is admitted to the BIS program. Up to six hours may be taken as faculty-supervised professional internship, research internship, or community service, which must be approved by the faculty member in advance. In order to be admitted to the BIS, students must also have a campus grade point average of 2.0 or above. Please contact Dr. Kathleen Nigro, Gender Studies Advisor, at nigrok@umsl.edu for more information.

Gender Studies Minor

For a Minor in Gender Studies, students must take at least 12 hours of Gender Studies courses. 9 hours must include 3 core courses:

1. GS 2102 Introduction to Gender Studies
2. GS 3033 Sexuality and Gender Theory or other 3000-5000 level course in feminist or gender theory.
3. Capstone experience: Students must complete a final research project or practicum. The Capstone requirement may be satisfied by GS 4352 Independent Study in Gender Studies, GS 4353 Internship in Gender Studies, or by a 4000-level Gender Studies course or other 4000-level seminar where student completes a final research and writing project that focuses on gender studies.

The remaining 3 hours may be cross-listed courses with the student's major department or Gender Studies electives from various disciplines.

Undergraduate Certificates

Gender Studies Certificate

Requirements For Admission

Undergraduate certificate candidates must meet the University's general education requirements. Applicants must have a cumulative G.P.A. of at least 2.5 and must maintain a minimum 2.5 G.P.A. in Gender Studies courses. Candidates for undergraduate certificates are asked to register with Gender Studies after taking one or two courses. Students will then be enrolled in the program and will be placed on our mailing list for class information and announcements of upcoming events.

Certificate Requirements

Students must take at least 18 hours in Gender Studies courses. 9 hours must include 3 core courses:

1. GS 2102 Introduction to Gender Studies
2. GS 3033 Sexuality and Gender Theory or other 3000-5000 level course in feminist or gender theory
3. Capstone Experience: Students must complete a final research project or practicum. The Capstone requirement may be satisfied by GS 4352 Independent Study in Gender Studies, GS 4353 Internship in Gender Studies, or by a 4000-level Gender Studies course or other 4000-level seminar where student completes a final research and writing project that focuses on gender studies.

9 hours may be cross-listed courses with student's major department or Gender Studies electives from various disciplines.

Gender Studies Certificate in Women's Leadership

For the Gender Studies Certificate in Women's Leadership, students must take at least 18 hours of Gender Studies courses. 6 hours must include 2 core components:

1. GS 2102 Introduction to Gender Studies
2. Capstone Experience: The capstone requirement may be satisfied by GS 4352, Independent Study in Gender Studies, or GS 4353, Internship in Gender Studies (which includes the Sue Shear Institute for Women in Public Life, the Women's University Mentoring Program,

the Women's Executive Leadership Institute, or a comparable program approved by the GS director).

The remaining 12 hours may be selected from the following choices; take no more than two courses per curricular designation.

COMM 3337	Male/Female Communication	3
COMM 2232	Effective Communication In The Organization: Tools For Leadership	3
GS 2150	Special Topics In Gender Studies	3
MGMT/SOC 3600	Management And Organizational Behavior	3
MGMT 3611	Advanced Management And Organizational Behavior	3
MGMT 3623/PSYCH 3318	Industrial And Organizational Psychology	3
MGMT 3625	Leadership in Organization	3
MKTG 3785	Women in International Entrepreneurship ¹	3
PHIL/GS 2253	Philosophy And Feminism	3
POL SCI 2380	The Politics of Gender in the United States	3
POL SCI 3590	Women and Leadership World-Wide: Breaking the Glass Ceiling	3
PSYCH 2230	Psychology Of Gender	3
PSYCH 3316/MGMT 3623	Fundamentals Of Leadership	3
SOC/MGMT 3600	Management and Organizational Behavior	3

¹ Prerequisites: MKTG 3700 (Basic Marketing) and MKTG 3780 (International Marketing)

Gender and the Military Undergraduate Certificate

Core Courses

GS 2102	Introduction To Gender Studies	3
GS 2130	Gender and the Military	3

Electives

Choose three of the following courses:

ANTHRO 1041	Sex And Gender Across Cultures
COMM 3337	Male/Female Communication
CRIMIN 4325	Gender, Crime, And Justice
CRIMIN 4330	Violence Against Women
ECON 2410	Work, Families, And Public Policy
ENGL 2120	Topics In Writing (Life Writing)
MVS 2100	Veterans in America
MVS 3100	Current Issues in Military and Veterans Studies
PHIL 2251	Sexual Ethics
POL SCI 2290	Gender And The Law
POL SCI 2380	The Politics of Gender in the United States
PSYCH 2230	Psychology Of Gender
PSYCH 2232	Psychology Of Trauma
PSYCH 3820	Cross-Cultural Psychology

SOC 3224	Families in Global Perspective
SOC 4600	Masculinities
SOC WK 4630	Gender Issues in Social Work

Capstone Requirement

GS 4352	Independent Study In Gender Studies	3
or GS 4353	Internship In Gender Studies	
or MVS 4200	Independent Study in Military and Veterans Issues	

Total Hours 18

Graduate Certificate

The graduate certificate in Gender Studies is designed for students who wish to receive post-baccalaureate training in gender studies.

For more information about our graduation rates, the median debt of students who completed this graduate certificate program, and other important information, please visit our Gainful Employment Disclosure website: <http://umsl.edu/go/BoV>.

Requirements For Admission

- Baccalaureate degree 2.75 G.P.A.
- Official transcripts of all previous undergraduate/graduate work
- Two letters of recommendation

If you are not currently enrolled at UMSL, you must apply through the Graduate School. This certificate is available to students with Bachelor's or Master's degrees and students enrolled in graduate degree programs. A student need not be enrolled in a degree program to earn the Gender Studies graduate certificate. Post B.A./B.S. students may enroll in the undergraduate or graduate certificate program.

Certificate Requirements

At least 18 hours of Gender Studies courses at the 4000, 5000, and/or 6000 level

1. 3 hours must include a graduate feminist or gender theory course, which may be GS 5033 , Advanced Sexuality and Gender Theory, GS 5040 Feminist Critical Theory, or other theory course.
2. 3 hours must include either a graduate internship or practicum, or final writing project, which may be an independent study GS 6452 Special Readings in Gender Studies, or a substantial research and writing project for a GS graduate seminar, which may be GS 6450 Seminar in Gender Studies, or other cross-listed, 5000 or 6000-level seminar
3. 12 hours must be at the 5000 level or above, while up to 6 hours of 4000-level courses may be taken for graduate credit, as long as student completes graduate level work for the course.
4. No more than 6 hours may be taken as Directed or Independent Study credit.

Most Gender Studies courses are cross-listed with other departments and count toward a department's degree requirements as well as toward the certificate.

Courses

GS 2020 History of Women and Social Movements: 3 semester hours

Same as HIST 2020. Prerequisites: Sophomore standing or consent of the instructor. This course explores the history of women and social movements in the nineteenth and twentieth century United States. It considers social and political movements such as abolitionism, women's suffrage, progressivism, the labor movement, the civil rights movement, and second wave feminism.

GS 2066 Women and Gender in African History: 3 semester hours

Same as HIST 2066. This course will explore the history of Africa, highlighting African women's lives, experiences, and agency, and questioning the application of Western concepts of gender to an African setting.

GS 2102 Introduction to Gender Studies: 3 semester hours

Same as SOC WK 2102, HIST 2102, POL SCI 2102, and SOC 2102. This core class is required for all Gender Studies Certificate earners. This class introduces students to cultural, political and historical issues that shape gender. Through a variety of disciplinary perspectives in the humanities, social sciences, and natural sciences, the course familiarizes students with diverse female and male experiences and gendered power relationships.

GS 2130 Gender and the Military: 3 semester hours

Same as MVS 2130. This course examines the treatment of gender difference in the military and focuses on the complex intersection between military culture and social constructs of gender in the civilian world.

GS 2150 Special Topics In Gender Studies: 3 semester hours

An introduction to a particular topic area in women's and gender studies (topics will be announced prior to registration) drawing on the theories and methods of such disciplines as sociology, psychology, political science, history, philosophy, art history, and others to examine particular aspects of gender in social and cultural life. Course may satisfy the distribution requirement for humanities or social sciences depending on the topic.

GS 2230 Psychology Of Gender: 3 semester hours

Same as PSYCH 2230. Prerequisites: PSYCH 1003. Evaluation of psychological theories and research regarding physiological, cognitive, and personality gender differences and similarities, gender related problems in adjustment, and gender specific clinical interventions.

GS 2232 Psychology of Trauma: 3 semester hours

Same as PSYCH 2232. Prerequisites: PSYCH 1003. This course is designed to review the psychological effects of crime, violence, war, natural disasters, and other traumas. Particular attention is paid to the development of specific psychopathology and other negative consequences of traumatic events. The process of recovery from distress following psychological events is further emphasized. The role of gender and its relationship to victimization and the development of psychopathology and recovery are considered throughout the course.

GS 2253 Philosophy And Feminism: 3 semester hours

Same as PHIL 2253. A critical examination of what various philosophers have said about issues of concern to women. Sample topics include oppression, racism, women's nature, femininity, marriage, motherhood, sexuality, pornography, the ethics of care.

GS 2290 Gender and the Law: 3 semester hours

Same as POL SCI 2290. This course examines the ways in which laws and interpretations of laws affect gender equality in the United States. Emphasizing how traditional roles impact both women and men historically and currently, the course highlights major pieces of legislation and court rulings related to employment, economics, education, sexual harassment, pornography, rape, reproductive rights, and domestic relations. The course stresses the impact of federal and state institutions and non-governmental influences on equality. It also addresses gender representation in the legal profession admits effect on judicial decisions. This course satisfies State requirements in American History and Government.

GS 2380 Politics of Gender in the United States: 3 semester hours

Same as POL SCI 2380. Prerequisites: POL SCI 1100 or consent of instructor. This course examines the role of gender in political institutions, practices and policy in the United States, past and present. It focuses on various movements for political equality, the relationship between gender and political participation, vote choice, and public opinion, and how legislative, executive, and judicial offices are gendered at the national, state, and local levels.

GS 2410 Work, Families, and Public Policy: 3 semester hours

Same as ECON 2410. Prerequisites: ECON 1000 or ECON 1001. This course compares the economic behavior of women and men in both the labor market and the household. Topics include: the family as an economic (production) unit, gender differences in labor force participation, occupations and earnings; the effectiveness of human capital theory and labor market discrimination in explaining the male-female wage gap; remedies for reducing the wage gap; family structure and economic well-being; and alternative policies to alleviate poverty. Students who have completed ECON 3400 may not take 2410 for credit.

GS 3031 History Of Women In The United States: 3 semester hours

Same as HIST 3031. Prerequisites: Junior standing or consent of the instructor. Development of women's economic, political, and social role in the United States with special emphasis on the nineteenth and twentieth centuries; women and work; women and the family; women and reform movements; women and education; feminist theories and activists; images of women.

GS 3224 Families in Global Perspective: 3 semester hours

Same as SOC 3224. Prerequisites: SOC 1010 or consent of instructor. This course presents research from the fields of demography, sociology, economics, and public policy in order to develop a broader understanding of the causes and consequences of population aging, one of the major demographic changes faced by social institutions worldwide. Attention to the global diversity of human experiences by age, gender, socioeconomic status.

GS 3300 The Social Construction of Aging and Ageism: 3 semester hours

Same as SOC 3300 and GERON 3300. This course examines perspectives of age, aging, and ageism using several perspectives: the theory of social construction and the frameworks of essentialism and intersectionality. The materials, discussions, and assignments in this course will familiarize and provide students with tools to investigate age and ageism in a complex, multidimensional manner. The overarching focus of this course is located in the tension with the "nature versus nurture" debate, paralleling nature with essentialist ideas and nurture with social constructionism. Ideas, conceptions, attitudes, and understandings of age within the media, family, medical community, and other institutions will be investigated as biological and/or a development of society in effort to perpetuate social control, organization, and power dynamics. Through research, fiction and non-fiction work, creative assignments, and theoretical texts, students will approach the following questions: How do we value lived-experiences? How might situated knowledge affect social constructions of aging and ageism? What evidence is provided toward age and/or ageism as an essential or socially constructed outline within society? How are socially constructed ideas developed and perpetuated? How might one affect change in an essentialist and/or socially constructed society?.

GS 3350 Special Topics in Gender Studies: 3 semester hours

Prerequisite: GS 2102 or consent of instructor. Special topics in women's and Gender Studies. Topics vary by semester.

GS 3352 Independent Studies In Gender Studies: 1-3 semester hours

Prerequisites: Junior standing; two courses in Women's and Gender Studies, including GS 2102; and consent of the instructor and the Institute. Directed independent work in selected women's and gender studies topics through readings, research, reports and/or conferences. Course may satisfy the distribution requirement for the humanities, social sciences, or math/science depending on topic.

GS 3361 Leadership: Theory and Practice: 3 semester hours

Same as PSYCH 3316. Prerequisites: Junior standing and 9 hours of psychology courses or permission of instructor. This course will cover both classic and contemporary perspectives on leadership through the lens of psychology and management theory. Course content is relevant to the wide range of leadership opportunities that arise in work and daily life. It addresses concepts behind influence processes and methods for developing leadership skills from various perspectives.

GS 3376 Gender In The Visual Arts: 3 semester hours

Same as ART HS 3376. Prerequisites: Minimum of one 2000-level course in ART HIST and ENGL 3100, or consent of instructor. Selected topics in the role of gender difference in the production and reception of works of visual art and culture. This course will consider examples of historical and contemporary works through gender theories and the analysis of cultural and social factors that contribute to the construction of sexualities and genders.

GS 3590 Women and Leadership World-Wide: Breaking the Glass Ceiling: 3 semester hours

Same as POL SCI 3590. Prerequisites: POL SCI 1500 or consent of instructor. Compares women's day-to-day leadership and participation patterns across a wide variety of political-economic contexts, emphasizing their performance as elective and executive office holders. It examines the experiences of individual female leaders, the effect of country-specific nomination and recruitment strategies, party dynamics, and the larger political opportunity structure hindering or promoting the balanced participation of women and men in national leadership. Understanding how gender (the socially constructed meanings related to biological sex) operates within these specific contexts is a major concern.

GS 3700 Diversity And Social Justice: 3 semester hours

Same as SOC WK 3700. Prerequisites: PSYCH 2160 or SOC 2160; and SOC WK 3100 taken prior or concurrently. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

GS 4050 Narrative Experiences in Aging and Health Care: 3 semester hours

Same as SOC 4050, COMM 4050, and GERON 4050. Prerequisites: Junior, senior or graduate student status, or permission of the instructor. This course examines the experiences of older adults and their families in the navigation and receipt of primary and specialized health care services. Challenges associated with bias, ageism, ethical dilemmas, miscommunication, patient-provider dynamics, and family systems are addressed. Patient experiences are highlighted across the continuum of care with emphasis on improving current systems.

GS 4100 Introduction to Feminist and Gender Theory: 3 semester hours

Same as SOC 4100. Prerequisites: GS 2102. This class serves as an initial intellectual investigation into gendered ideologies (such as the effects of race, ethnicity, nationality, socioeconomic class, sexuality, and religion) and functions as a bridge to later advanced gender theory and methods courses. Topics include interdisciplinary feminist theories (with a focus on gender equality), including masculinity theory, queer theory, muted group theory, and other evolving frameworks.

GS 4320 Gender, Sexuality & Aging: 3 semester hours

Same as GERON 4320. Prerequisites: Junior/senior undergraduate or graduate standing, or permission of the instructor or program director. This course examines advancing age through a gender lens. Men and women experience aging differently based on a host of genetic, biological, psychological, sociocultural and personal identity factors. This course challenges students to consider aging from various perspectives, including cultural expectations and norms, couple and family relationships, health and function, work life and retirement, sexuality, sexual orientation, gender identity, concerns of LGBT elders, and veterans' issues.

GS 4325 Gender, Crime And Justice: 3 semester hours

Same as CRIMIN 4325 and SOC 4325. Prerequisites: CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, ENGL 3100 or consent of instructor. Analysis of the role of gender in crime and in the justice system. Emphasis on gender differences in crime commission, criminal processing, and the employment of women in criminal justice agencies. Fulfills criminology diversity requirement.

GS 4330 Violence Against Women: 3 semester hours

Same as CRIMIN 4330. Prerequisites: Junior Standing, CRIMIN 1110, CRIMIN 1120, CRIMIN 2130, CRIMIN 2210, CRIMIN 2220, and ENGL 3100, or consent of instructor. This course examines the nature, extent, causes and consequences of various types of violence against women, including rape, sexual assault, stalking, and intimate partner violence. Criminal justice policy and practice regarding violence against women are also examined.

GS 4335 Gender and Body Image in Media and Culture: 3 semester hours

Prerequisites: GS 2102, GS 4100, and six additional hours of GS courses. Through the lens of feminist and gender theory, this course engages students in conversations pertaining to gender, media, body image, and culture. Students will read and analyze fiction and non-fiction texts in order to realize the multidisciplinary of gender and body image as themes and motifs. Students are required to participate in Service-Learning in order to deepen their understanding of how these issues affect day-to-day lives within their communities.

GS 4350 Special Topics in Gender Studies: 3 semester hours

Prerequisites: GS 2102 or consent of instructor. Special topics examined from a gender perspective in the fields of anthropology, art history, criminology, economics, English, foreign language, history, philosophy, political science, psychology, social work, sociology, business, or others. Topics and departments vary by semester. Course may be repeated by permission of Director of the Center.

GS 4352 Independent Study In Gender Studies: 1-3 semester hours

Prerequisites: GS 2102 or consent of instructor. Independent, directed readings and research in a women's gender related topic, to be determined in consultation with instructor.

GS 4353 Internship In Gender Studies: 3 semester hours**GS 4360 Sociology Of Minority Groups: 3 semester hours**

Same as SOC 4360. Prerequisites: SOC 1010 and junior standing or consent of instructor. The study of dominant-subordinate group relations. Religion, ethnicity, race, and gender as factors in the unequal distribution of power.

GS 4452 Feminism And Science: 3 semester hours

Same as GS 4452. Prerequisites: Six hours of philosophy, graduate standing, or consent of instructor. This course will explore major themes and issues in feminist science scholarship, a body of research that focuses on the relationship between science and gender. Feminist research in the philosophy and history of science, and in the biological sciences, are emphasized. Issues include: the nature of objectivity, evidence, and truth; the factors that contribute to the acceptance or rejection of research hypothesis and theories; the nature and consequences of science's cognitive authority; and the relationship between science and values.

GS 4520 The Aging Body: 3 semester hours

Same as GERON 4520. Prerequisites: GERON 2170 or SOC 2170 or another introductory course (2000 or higher) in Gerontology, Sociology, Psychology, Social Work, or Nursing; or consent of the instructor. This course focuses on the aging body with respect to health and function. Physiologic and cognitive concerns of older men and women are reviewed. Contextual factors (e.g., relationships, socio-cultural, spiritual, environmental) and issues in service delivery are also addressed.

GS 4600 Masculinities: 3 semester hours

Same as SOC 4600. Prerequisites: GS 2102 or consent of instructor. This course examines men and masculinities through a critical lens, looking carefully at an institutionalized system of gender relations and practices that is assumed to be a natural phenomenon that is culturally universal. The course explores various masculine behaviors, myths, ideologies, and experiences so that students can consider the relationship between masculine practice and social power and delineate choices for future directions. The course is necessarily interdisciplinary and may utilize tools and methods from the social sciences and the humanities. Satisfies GS gender theory requirement.

GS 4610 Intimate Partner Violence: 3 semester hours

Same as SOC WK 4610. Prerequisites: SOC WK 3510. Focuses on theoretical and empirical understanding of domestic violence in US society and social work practice with battered women and their families. Addresses direct services, community organizing, and public policy changes to help end violence against women. Relationships between violence against women and other forms of oppression (e.g., racism, economic exploitation, heterosexism and social class) are explored.

GS 4630 Gender and Social Issues: 3 semester hours

Same as SOC WK 4630. Prerequisites: SOC WK 3700, GS 2102 or graduate standing. This course will help students become more sensitive to social and welfare concerns based on gender. Topics may include work, education, family responsibilities, violence against women, and special health and mental health service needs. Emphasis will be placed on understanding how social action can be used to bring about positive change.

GS 4920 Gender, Power, and the Environment: 3 semester hours

Prerequisites: GS 2102, or consent of instructor. This course will examine how gendered observations about nature create, support, and/or dispute particular cultural and social attitudes toward the environment. Students will consider debates in feminist pedagogy, ecofeminism, and social constructivism about the relationship of gender to nature.

GS 4925 Feminism and Witchcraft: 3 semester hours

Prerequisites: GS 2102, or consent of instructor. This class will examine literary and historical treatments of witchcraft through a cross-cultural, feminist theoretical framework. Students will read primary historical documents as well as fictional, dramatic, and poetic representations of witches and witchcraft. The course will consider changing perspectives toward witches in contemporary gender theory, spiritualist discourse and popular media.

GS 4930 Studies In Gender And Literature: 3 semester hours

Same as ENGL 4930. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course examines the role of gender in literature, including the transformation of literary genres by women writers, writings by women during a particular historical period, and gender relations in literature. Specific topics vary from semester to semester. The course may be repeated for credit with departmental approval.

GS 4931 English Women Writers, 1300-1750: 3 semester hours

Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. Works will be read ranging in scope from closet drama and romance to lyrics to personal, political, and religious writing by women, such as Margery Kempe, Mary Sidney, and Amelia Lanyer who wrote during a period when reading and writing were not the female norm.

GS 4932 Female Gothic: 3 semester hours

Same as ENGL 4932. Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course examines the historical development of the female gothic, a genre which employs narrative strategies for expressing fears and desires associated with female experience. From the late 18th century to the present, we will trace the persistence of the Gothic vision in fiction and film.

GS 4933 Female Novel Of Development: 3 semester hours

Prerequisites: Students must satisfy English prerequisites for 4000-level courses or obtain permission of instructor. The course covers the development of the female Bildungsroman from the late 18th century to the present. We will consider how temporary and current theories of female development help us read these novels within their particular cultural contexts.

GS 5320 Gender and Aging: 3 semester hours

Same as: GERON 5320. Prerequisites: Graduate standing or permission of instructor. This course examines advancing age through a gender lens. Men and women experience aging differently based on a host of genetic, biological, psychological, sociocultural and personal identity factors. This course challenges students to consider aging from various perspectives, including cultural expectations and norms, couple and family relationships, health and function, work life and retirement, sexual orientation, gender identity, concerns of LGBT elders, and veteran's issues.

GS 5350 Topics In Women's And Gender Studies: 3 semester hours

Prerequisites: Graduate standing and at least one Women's and Gender Studies course. This course will focus on a particular aspect of gender (to be announced prior to registration) and will draw upon recent theoretical and methodological work from a variety of disciplines.

GS 5450 Special Topics In Gender Studies: 3 semester hours

Prerequisites: Graduate standing or consent of instructor. Special topics at the Graduate level examined from a gender perspective in the field of anthropology, art history, criminology, economics, English, foreign language, history philosophy, political science, psychology, social work, sociology, business, or others. Topics and departments vary by semester.

GS 5500 Foundations Of Human Behavior In The Social Environment: 3 semester hours

Same as SOC WK 5500. Prerequisites: SOC WK 3150 or equivalent or admission to the MSW program. Focuses on theoretical and empirical understanding of human behavior in the social environment using a life-span perspective. Introduces biological, behavioral, cognitive, and sociocultural theories of individuals, families, and small groups, and their implications for the professional social worker's understanding of socioeconomic status, gender, disability, ethnicity, race, and sexual orientation.

GS 5635 Social Work Practice With Gay, Lesbian, Bisexual and Transgender Populations: 3 semester hours

Same as SOC WK 5635. Prerequisites: SOC WK 5100 and SOC WK 5500. This advanced practice course focuses on developing the theoretical and empirical knowledge and practice skills necessary for effective social work practice with lesbian, gay male, bisexual, and transgender (LGBT) persons and their families. This course aims to explore deeper understanding of LGBT identities, families, health and mental health challenges, and issues of political advocacy.

GS 5700 Diversity, Social Justice And Social Practice: 3 semester hours

Same as SOC WK 5700. Prerequisites: Graduate Standing. Analyzes the structure, dynamics, and consequences of social and economic injustice, and the impact on diverse groups in American society. Examines theoretical models and practice principles for work with diverse groups.

GS 5940 Seminar In Gender And Literature: 3 semester hours

Same as ENGL 5940. Gender studies in literature of different periods, types, and genres; satisfies area requirement (1-6) appropriate to its period, national literature, and genre.

GS 6350 Gender, Language and Identity: 3 semester hours

Same as TCH ED 6350. Prerequisites: Graduate Standing. An interdisciplinary look at the ways gendered and racial identities get developed and shaped through language and culture. Readings will address the complex, yet sometimes invisible, ways that identity, language and gender intersect, creating and assigning roles, responsibilities, and possible selves to individuals and groups in a global world.

GS 6353 Graduate Internship In Gender Studies: 1-6 semester hours

Prerequisites: Graduate standing and consent of director. Provides an opportunity for the Graduate Women's and Gender Studies student to acquire "real world" experience working in a non-profit, political, economic, or social service organization with a gender focus.

GS 6410 Gender, Sexuality, and Mental Health: 3 semester hours

Same as PSYCH 6410. Prerequisites: Admission to the doctoral program in Clinical Psychology or consent of the instructor. This course will focus on contemporary theory and research on gender and sexuality as they pertain to mental health issues. Gender differences and similarities in the presentation, etiology, and treatment of sexual health problems and other mental illnesses will be discussed.

GS 6450 Seminar In Gender Studies: 3 semester hours**GS 6452 Special Readings In Gender Studies: 3 semester hours**

School of Fine and Performing Arts

General Information

The School of Fine and Performing Arts in the College of Arts and Sciences at UMSL houses the departments of Art and Design, Music, and Theatre and Cinema Arts. The departments and disciplines are all closely linked by their core values to build and facilitate access to information, communication, and connection; elevate the human spirit; provide understanding and historical context; enhance critical thinking; and entertain with imagination, originality, and unique interpretation. Collectively, we celebrate discovery and the pursuit of excellence, with the aim of preparing students with the academic foundation and professional skills needed to accomplish their career and life goals.

The faculty and alumni of the School of Fine and Performing Arts have distinguished themselves as scholars, visual artists, teachers, and performers. Students in the School pursue their activities in a variety of campus locations including the Arts Administration Building, the Fine Arts Building, Lucas Hall, the Music Building, UMSL at Grand Center, and the Touhill Performing Arts Center, which affords two world-class venues for performances by university students and faculty, campus ensembles, and visiting artists. In addition, Gallery 210 and Gallery FAB offer visual arts programming of regional, national and international importance. Gallery VISIO in the Millennium Student Center showcases work by students and faculty.

Endowed professorships in the School of Fine and Performing Arts link the University to the Saint Louis Symphony, the Saint Louis Art Museum, Opera Theatre of Saint Louis, Laumeier Sculpture Park, and other local cultural institutions. The Des Lee Fine Arts Education Collaborative connects the University and a variety of partner cultural institutions to local school districts.

Art and Design

General Information

Degrees and Areas of Concentration

The department offers course work leading toward the Bachelor of Arts in Art History and the Bachelor of Fine Arts in Studio Art. Effective in the Fall of 2017, the Department will no longer accept applicants for the Bachelor of Arts in Art History.

Courses included in the B.A. in Art History cover the arts of Asia, Africa, Europe, and North America, including Native American arts, from ancient times to the present. Courses examine the entire range of human visual expression from painting, sculpture, architecture, and photography to performance and festival arts. In each case the arts are examined within their historical, aesthetic, and cultural contexts.

The B.A. in Art History has the following learning outcomes:

- to write clearly and coherently about works of art and art historical literature;
- to possess the ability to conduct independent research on works of art and visual culture;
- to recognize and be able to apply different methodologies, recognizing that each incorporates a specific valuing system;
- to demonstrate understanding of the ethical issues surrounding cultural property;
- to analyze critically and interpret works of visual art and art historical texts;
- to demonstrate familiarity with and basic knowledge of diverse historical artworks.

The B.F.A. in Studio Art consists of a foundation art program and an emphasis area in the following: art education, drawing, graphic design, painting, photography, printmaking, and general fine arts. UMSL has transfer agreements with many local and regional community colleges.

For information regarding our agreements, please contact the Office of Transfer Services & Off-Campus Sites at transferservices@umsl.edu or 314-516-5162.

The Bachelor of Fine Arts Degree in Studio Art has the following learning outcomes:

- to develop visual and verbal responses to visual phenomena, and organize perceptions and conceptualizations both rationally and intuitively;
- to become familiar with the major achievements in the history of art and design, including the works and intentions of leading artists and designers in the past and present;
- to develop the capacity to identify and/or solve problems within a variety of physical, technological, social, and cultural contexts;
- to understand and evaluate contemporary thinking about art or design;
- to become familiar with and develop competence in a number of art or design techniques;
- to make valid assessments of quality and effectiveness in design projects and works of art, especially their own.

To support its teaching and research objectives, the department maintains an extensive and expanding collection of digital images. The collection includes examples of painting, sculpture, architecture, photography and decorative arts, and is under the supervision of a professional visual

resource curator, who is available for special assistance to staff and students.

Gallery 210

Gallery 210, located in Building 7, 44 East Drive, offers visual arts programming of regional, national, and international importance. The gallery's exhibitions and related arts programming have enjoyed a long and distinguished history of service to the university and to the St. Louis community. Gallery activities are supervised by a professional gallery director.

Gallery FAB

Located in the Fine Arts Building, Gallery FAB exhibits a range of work by artists of regional and national significance. The exhibitions are curated by members of the Studio Art Faculty and complement the teaching emphases of the Fine Arts program.

Gallery Visio

Gallery Visio is located in room 170 Millennium Student Center. It showcases work by students and faculty, and hosts exhibitions that address cultural and contemporary issues. Students may curate shows at Gallery Visio as part of their professional practice development in both art and art history courses.

Scholarships/Internships

Several scholarships are available on a competitive basis within the department, including the Art Department/Barbara St Cyr Scholarship, the William T. Isbell Jr. Scholarship, the Aronson Scholarship, the Marie Larkin Scholarship in Art Education, and the Hilda and Roy Bergmann Scholarship for Art. The department also sponsors a variety of internships with local arts institutions, including the Saint Louis Art Museum, Contemporary Art Museum St. Louis, Paul ArtSpace, and Laumeier Sculpture Park.

Ferring Travel Study Program

Each year, student majors in their junior and senior year may apply for the competitive Ferring Travel Study Program, which allows students to travel for free to major art centers in the US, including New York, Chicago, and Los Angeles.

Career Outlook

Study in art history broadens and enriches a general education, offering insight into the visual, architectural, and cultural artifacts left by earlier, as well as modern, civilizations. Art history graduates have found career opportunities in teaching, museums, galleries, libraries, historical societies, sales and auction houses, the legal professions, historic preservation, and arts administration.

Students with degrees in studio art find careers in teaching, advertising, public relations, graphic design, illustration, film and video production, arts administration, art restoration, product and industrial design, framing, and commercial photography.

With over 300 art teachers in the greater St. Louis region alone, there is a demand for art teachers statewide each year.

Students in each major receive professional practice development with a new attention paid to entrepreneurial skills.

Faculty Overview

The Department of Art and Design has a diverse faculty actively engaged in the production of art, its historical and critical evaluation, and the training of art educators. The department prides itself on its commitments to high standards of teaching and sound research achievements. Individual faculty have been cited for their teaching excellence. Art history faculty members have written books, articles, and critical reviews, and regularly participate in national and international conferences. Studio art faculty exhibit nationally and internationally in group and solo, juried and invited exhibitions.

Undergraduate Studies

General Education Requirements

Majors in art history must meet the college and university general education requirements (p. 41). A foreign language is required; French or German is recommended. Art history courses required for the degree may not be taken on a satisfactory/ unsatisfactory (S/U) basis.

Art history courses can be applied toward minors in Anthropology, American Studies, Classical Studies, Philosophy, and Urban Studies, or certificates in Studies in Religions, Women's and Gender Studies, Photographic Studies and African Studies.

Majors in studio art must meet the college and university general education requirements (p. 41). A foreign language is not required. Studio art courses required for the degree may not be taken on a satisfactory/ unsatisfactory (S/U) basis. A minimum of 120 hours is required for graduation. Certain studio art courses fulfill the humanities and fine arts general education requirement.

Degree Requirements

Bachelor of Arts in Art History

Art history majors must complete a minimum of 36, but no more than 45, hours in art history with no grade below C.

Required Courses

ART HS 1100	Introduction To Western Art	3
ART HS 3395	Sophomore/Junior Seminar: Research in Art History	3
ART HS 4495	Senior Seminar: Methods of Art History	3

Select a minimum of four lower-division courses, one from each of the following categories: 12

Global		
ART HS 1103	Pre-Columbian Art and Architecture of Meso-and South America	
ART HS 1104	Indigenous Arts Of North America	
ART HS 1105	Introduction To The Arts Of Africa	
ART HS 1108	Introduction To The Arts Of Asia	
Ancient and Medieval		
ART HS 2211	Art And Archaeology Of The Ancient World	
ART HS 2212	Greek Art And Archaeology	
ART HS 2225	Medieval Art	
Early Modern		
ART HS 2235	Italian And Northern European Renaissance Art	

ART HS 2238	Italian Renaissance Art
ART HS 2240	French Art And Architecture 1400-1715
ART HS 2245	Baroque Art And Architecture
ART HS 2248	Eighteenth Century European Art
Modern and American	
ART HS 2250	Nineteenth Century European Art
ART HS 2255	Modern Art
ART HS 2265	History Of Photography
ART HS 2270	American Art To 1876
ART HS 2272	American Art Since 1876
ART HS 2279	American Architecture
ART HS 2281	Art Since 1960

Students must take a minimum of three upper-division courses. 9
One course must be from Advanced Studies in Art History; no more than one Internship may be applied toward this three-course minimum.

Studies in Art History	
ART HS 3303	Media And Technique In Art History
ART HS 3350	Studies in Design
ART HS 3365	The Artist And The City
ART HS 3374	Philosophy Of Art
ART HS 3376	Gender in the Visual Arts
ART HS 3385	Studies In Architectural History
ART HS 3391	Selected Themes In Art History
ART HS 3396	The Nude In Art
ART HS 3397	Landscape Perspectives In Art
ART HS 3398	The Portrait

Professional Studies in Art History	
ART HS 3387	Professional Internship
ART HS 3388	St. Louis Art Museum Internship
ART HS 3389	Visual Resources Management
ART HS 3393	Art Museum And Gallery Management

Advanced Studies in Art History	
ART HS 4408	Topics In The Arts Of Asia
ART HS 4411	Topics In Ancient Art And Archaeology
ART HS 4425	Topics In Medieval Art
ART HS 4435	Topics In Renaissance Art
ART HS 4445	Topics In 17Th And 18Th Century European Art
ART HS 4455	Topics In Modern Art
ART HS 4475	Topics In American Art
ART HS 4481	Topics In Contemporary Art

Additional Courses		6
Students must also take one course in ST ART. Up to nine hours in ST ART may be applied toward the B.A. in Art History.		
Additional hours in art history, up to the maximum of 45, may be completed with electives at the 2000 level or above.		

Total Hours	36
-------------	----

Bachelor of Fine Arts in Studio Art

Candidates for the B.F.A. degree must complete a Foundation Art Program (which is largely satisfied by the A.F.A. degree) and an emphasis area in one of the following: art education, drawing, graphic design, painting, photography, printmaking or general fine arts. Studio art majors are required to take 75 hours in studio art (this includes 30 hours in the foundation art program) and 15 hours in Art History. The final 30 hours must be completed in residence at UMSL. Graduating students must also pass a faculty portfolio review.

Advanced Placement in Studio Art Classes: Studio Art Majors who have professional Graphic Design or Photographic experience may wish to submit a portfolio to a committee of studio art faculty. Depending on the nature and the quality of the student's portfolio, they may be able to obtain exemptions from selected lower level studio art courses. Students applying for these exemptions must submit their portfolios prior to the first day of class of their first semester in the BFA Program. Students will be notified in writing if an exemption is granted. Students informed of these waivers will be advised of their requirements in the studio art major. All decisions of the portfolio reviews are final.

Foundation Art Program

The following courses are required for the Foundation Art Program:

ST ART 1020	Expanded Artforms	3
ST ART 1140	Drawing I	3
ST ART 1141	Drawing II	3
ST ART 1142	Figure Drawing I	3
ST ART 1150	Design I	3
ST ART 1151	Design II	3
ST ART 2240	Drawing III ¹	3
or ST ART 1143	Figure Drawing II	
Select one of the following:		3
ST ART 1030	Ceramics I	
ST ART 1132	Sculpture I	
ST ART 2251	Design III	
Studio Art Electives		6
Total Hours		30

¹ Those planning an emphasis in drawing or painting must take ST ART 1143.

Students must complete 45 hours in one of the following emphasis areas:

Drawing

ST ART 2240	Drawing III	3
ST ART 2241	Drawing IV	3
ST ART 2242	Figure Drawing III	3
ST ART 2243	Figure Drawing IV	3
ST ART 2250	Composition	3
ST ART 3340	Advanced Problems In Drawing I	3
ST ART 3341	Advanced Problems In Drawing II	3
ST ART 4495	Senior Studio Seminar	3
ST ART 4496	Senior Studio Seminar	3
Painting or Printmaking Electives		6
Studio Art Electives		12

Graphic Design

ST ART 1210	Graphic Design I	3
ST ART 1220	Graphic Design II	3
ST ART 2210	Typography	3
ST ART 2212	Image Making for Graphic Design	3
ST ART 2220	Computer Design I	3
ST ART 2221	Computer Design II	3
ST ART 3310	Graphic Design III	3
ST ART 3311	Graphic Design IV	3
ST ART 3383	Advanced Problems In Graphic Design I	3
ST ART 3384	Advanced Problems In Graphic Design II	3
ST ART 4497	Senior Seminar In Graphic Design I	3
ST ART 4498	Senior Seminar In Graphic Design II	3
Graphic Design Electives		9

Painting

ST ART 1180	Painting I	3
ST ART 1181	Painting II	3
ST ART 2250	Composition	3
ST ART 2280	Painting III	3
ST ART 2281	Painting IV	3
ST ART 3380	Advanced Problems In Painting I	3
ST ART 3381	Advanced Problems In Painting II	3
ST ART 4495	Senior Studio Seminar	3
ST ART 4496	Senior Studio Seminar	3
Select two of the following:		6
ST ART 2240	Drawing III	
ST ART 2241	Drawing IV	
ST ART 2242	Figure Drawing III	
ST ART 2243	Figure Drawing IV	

Studio Art Electives		12
----------------------	--	----

Photography

ST ART 1060	Photography I	3
ST ART 2160	Photography II	3
ST ART 2250	Composition	3
ST ART 2263	Digital Color Process	3
ST ART 2265	Commercial Applications In Photography: Portrait Photography	3
ST ART 2267	The Constructed Photograph	3
ST ART 3260	Photography III	3
ST ART 3391	Advanced Problems In Photography I	3

ST ART 4491	Senior Seminar In Photography II	3
Studio Art Electives		6
Photography Electives		6

Printmaking

ST ART 1170	Printmaking I	3
ST ART 2241	Drawing IV	3
ST ART 2243	Figure Drawing IV	3
ST ART 2250	Composition	3

ST ART 2271	Printmaking II	3
ST ART 2274	Printmaking And Relief	3
ST ART 3370	Advanced Problems In Printmaking I	3
ST ART 3371	Advanced Problems In Printmaking II	3
ST ART 4495	Senior Studio Seminar	3
ST ART 4496	Senior Studio Seminar	3
Select two of the following:		6
ST ART 1173	Printmaking: Screenprinting I	
ST ART 2272	Printmaking: Lithography I	
ST ART 2273	Printmaking: Etching	
ST ART 3372	Advanced Lithography	
Studio Art Electives. Include one course in photography		9
General Fine Arts		
Studio Art Electives. Must be taken at the 2000 level or above.		30
The following courses are required:		9
ST ART 2250	Composition	3
ST ART 4495	Senior Studio Seminar	3
ST ART 4496	Senior Studio Seminar	3
Select two of the following:		6
ST ART 3340	Advanced Problems In Drawing I	
ST ART 3341	Advanced Problems In Drawing II	
ST ART 3370	Advanced Problems In Printmaking I	
ST ART 3371	Advanced Problems In Printmaking II	
ST ART 3380	Advanced Problems In Painting I	
ST ART 3381	Advanced Problems In Painting II	
ST ART 3391	Advanced Problems In Photography I	
ST ART 3392	Advanced Problems In Photography II	

Students must complete 15 hours of Art History, with at least 9 hours taken in residence at UMSL.

Students choosing a double major in two studio art emphasis areas must complete all the requirements for each emphasis area. If the double major includes Graphic Design, students must take four semesters of Senior Studio Seminar. This includes:

ST ART 4490	Senior Seminar In Photography I	3
ST ART 4491	Senior Seminar In Photography II	3
ST ART 4495	Senior Studio Seminar	3
ST ART 4496	Senior Studio Seminar	3
ST ART 4497	Senior Seminar In Graphic Design I	3
ST ART 4498	Senior Seminar In Graphic Design II	3

Art Education

An art education emphasis leading toward K-12 Art teacher certification is available. Students choosing this option must complete degree requirements for the B.F.A. Students must complete ENGL 3100 (Advanced Expository Writing) and the general education requirements of the College of Education. A foreign language is not required.

Students will take a specialized program of Foundation Art (30 hours) that includes courses required for certification to teach art. They will also take

studio art electives, including a minimum of three courses in one of the studio emphasis areas: drawing, graphic design, painting, photography, or printmaking. A minimum of 50 credit hours must be completed in studio art. In addition, students must complete 15 hours of art history. The final 30 hours of coursework must be completed in residence at UMSL. Major area courses, including studio art, art history, art education, teacher education, and secondary education, must be completed with a minimum grade point average of 2.5; no grade lower than a C is acceptable in major area coursework.

Beginning with those students graduating in May, 2017 and receiving teacher certification, the Missouri Department of Elementary and Secondary Education requires a 3.0 GPA in professional education courses, a 3.0 GPA in the teaching content field, and a 2.75 overall GPA.

I. Foundation Art for Art Education

(10 courses; 30 hours if taken at UMSL):

ST ART 1030	Ceramics I	3
ST ART 1133	Introduction To Fibers And Textiles	3
ST ART 1140	Drawing I	3
ST ART 1141	Drawing II	3
ST ART 1142	Figure Drawing I	3
ST ART 2240	Drawing III	3
or ST ART 1143	Figure Drawing II	
ST ART 1150	Design I	3
ST ART 1151	Design II	3
ST ART 1170	Printmaking I	3
or ST ART 1173	Printmaking: Screenprinting I	
ST ART 1180	Painting I	3
Total Hours		30

II. Studio Art for Art Education (7 courses; 21 hours if taken at UMSL):

ST ART 1020	Expanded Artforms	3
ST ART 1060	Photography I	3
or ST ART 1061	Introduction to Digital Photography	
or ST ART 1210	Graphic Design I	
or ST ART 2100	Advertising Art Fundamentals	

Students planning on a Photography emphasis must take ST ART 1060. Students planning on a Graphic Design emphasis must take ST ART 1210.

ST ART 1132	Sculpture I	3
Studio Art Electives		3
Studio Art Emphasis		9

Students must complete at least nine hours in one of the following areas: drawing, graphic design, painting, photography, or printmaking.

Total Hours	21
-------------	----

III. Art History for Art Education (5 courses; 15 hours if taken at UMSL):

At least 9 hours must be taken in residence at UMSL.

ART HS 1100	Introduction To Western Art	3
Art History Electives		12
Total Hours		15

IV. Professional Preparation for Art Education

Required art education, Level II and III teacher education, and secondary education courses must be taken in residence at UMSL. Students must be admitted to the Teacher Education program of the College of Education. Students should check with the Office of Advising and Student Services (<http://coe.umsi.edu/advising>) (OASIS) for the most complete and current admission information.

Art Education certification candidates must complete the following courses:

Introduction to Education

EDUC 1000	Building Community, Culture, and Learning in Education	1
EDUC 1001	Early Clinical Experience: Community Agency	1

Level I: Exploring Education as a Profession

TCH ED 2000	Becoming a Professional Educator	1
TCH ED 2001	Early Clinical Experience: Schools	1
TCH ED 2209	Foundations of Teaching in American Schools	2

Level II: Teaching and Learning Across Context and Clinical Experiences

ART ED 3328	Art Education: Theory to Practice	3
ART ED 4260	Art Museum as Teaching Resource	3
ED PSY 3312	Psychology of Learning, Instruction, and Assessment	3
SPEC ED 3318	Inclusive Classrooms	3
TCH ED 3001	Mid-Level Clinical Experience: Diverse Learners	1
TCH ED 3310	Introduction to Methods of Teaching	2
TCH ED 4391	Literacy for Adolescent Learners in Content Areas	3

Level III: Instructional Application

ART ED 4273	Curriculum and Methods of Teaching Art	3
SEC ED 4995	Practicum I: Site-Based Experience in Art	3
SEC ED 4996	Practicum II: 12-week Site Based Experience in Art	9
SEC ED 4997	Practicum II: 4-Week Site-Based Experience in Art	3

Total Hours		42
-------------	--	----

Minors

Minor in Art History

A minor in art history requires the completion of at least 18 hours of art history courses with a GPA of 2.0 or better. Students must take ART HS 1100 and at least one course in non-Western art. They must also take at least 2 courses at the 2000 level and 2 courses at the 3000 level or above in Art History. A maximum of 3 hours of internship can be applied toward a minor in art history. At least nine of the 18 hours must be taken

in residence at UMSL. All courses in the minor must receive a grade of C or above.

Minor in Studio Art

Students who wish to minor in studio art must take a minimum of 18 hours with a grade point average of 2.0 or better. Six hours must be taken at the 2000 level or above, in residence at UMSL. The requirements for the minor are as follows:

ST ART 1140	Drawing I	3
ST ART 1141	Drawing II	3
ST ART 1150	Design I	3
Select two consecutive courses in any single area from the following: ¹		6
Painting		
Printmaking (any one subfield)		
Photography		
Graphic Design		
Advanced Drawing		
Studio art elective		3
Total Hours		18

Photographic Studies Certificate

UMSL students, graduates, and post-baccalaureate candidates may obtain a certificate in photographic studies by coordinating courses in and related to photography. To be eligible for the certificate, undergraduates must complete a degree in a chosen major field. A faculty member of the Interdisciplinary Photographic Studies Committee will act as adviser to all students and will consult with the faculty adviser in the student's major to plan appropriate credits.

Requirements

The following courses are required:

ST ART 1060	Photography I	3
ST ART 2160	Photography II	3
ART HS 2265	History Of Photography	3
ST ART 3260	Photography III	3
ART HS 3360	Photography And Society	3
Select one of the following:		3
ART HS 1100	Introduction To Western Art	
ST ART 2262	Color Photography I	
ST ART 2263	Digital Color Process	
ST ART 2264	Non-Silver Photography	
ST ART 3260	Photography III	
ST ART 3263	Digital Color Portfolio	
ST ART 3363	Special Topics In Photography	
ST ART 3390	Special Study	
ST ART 3391	Advanced Problems In Photography I	
ST ART 3392	Advanced Problems In Photography II	
COMM 1050	Introduction To Mass Communication	
ENGL 3140/ MEDIA ST 3214	News Writing	

ENGL 3150	Feature Writing
Total Hours	18

Art Education Courses

ART ED 2179 Visual Art Activities for Elementary School: 3 semester hours

Students will explore the purpose of visual arts in school settings and will encounter various media and materials through hands-on art experiences. Discussion of social, cultural, and historical influences on creative works will be encountered. Course content highlights the integration of visual art in teaching elementary subjects and emphasizes the role of art-making and imaginative experiences in child development. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ART ED 3328 Art Education: Theory to Practice: 3 semester hours

Prerequisites: Completion of Level I requirements and Foundation Art Program; concurrent enrollment in ART ED 4260 is required. Development and application of concepts related to comprehensive art education and standards-based curriculum in art education, with an examination of current theories, trends, publications, and on-line resources in the field.

ART ED 4260 Art Museum as Teaching Resource: 3 semester hours

Prerequisites: Completion of Level I requirements, 9 hours of ART HS, and completion of Foundation Art Program; concurrent enrollment in ART ED 3328 is required. Students will learn how to strengthen K-12 Art Education by utilizing the collections and resources of the St. Louis Art Museum. A variety of teaching approaches and learning activities for galleries and classrooms will be employed, focusing on art from around the world and throughout history.

ART ED 4273 Curriculum and Methods of Teaching Art: 3 semester hours

Prerequisites: ART ED 3328 and completion of, or concurrent enrollment in, ED PSY 3312, SPEC ED 3318, or TCH ED 4391. A study of the scope and sequence of art education in the school curriculum, with emphasis on the preparation, selection, organization and application of materials and methods of instruction and assessment. Attention is also given to learning the research tools of the scholar in the field of art education. Not available for graduate credit.

ART ED 4290 Special Study in Art Education: 1-6 semester hours

Prerequisites: Junior, senior, or graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit, up to a maximum of 6 credit hours.

ART ED 5228 Foundation and Classroom Application of Art Education: 2 semester hours

Prerequisites: Graduate standing, admission to the Teacher Education Program, a passing score on the Missouri Content Exam (MoCA) in Art on file, and consent of instructor; concurrent enrollment in ART ED 5260 is required. Development, application, and research of concepts related to comprehensive art education and standards-based curriculum in art education, with an in-depth examination of current theories, trends, publications, and on-line resources in the field.

ART ED 5260 Museum Collections in the K-12 Curriculum: 2 semester hours

Prerequisites: Graduate standing. Students will research the value and application of utilizing the collections and resources of the St. Louis Art Museum to strengthen K-12 education. A variety of research-based teaching strategies and learning activities for galleries and classrooms will be employed; a broad cultural perspective and historical understanding of art will be used.

ART ED 5273 Advanced Methods and Curriculum Development of Teaching Art: 2 semester hours

Prerequisites: ART ED 5260 and ART ED 5228. An in-depth study of the scope and sequence of art education in the school curriculum, highlighting the preparation, selection, organization and application of materials and methods of instruction and assessment. Emphasis is placed on learning the research tools of the scholar in the field of art education and the role of the teacher as researcher on curriculum development.

ART ED 5334 Topics in Contemporary Art Education: 3 semester hours

Prerequisites: Graduate standing or permission of instructor. Intensive study for advanced students and art teachers, emphasizing specialized techniques and innovative concepts. Topics to be announced. May be repeated for credit, up to a maximum of 12 credit hours.

ART ED 5588 Museum Education and Visitor Research: 3 semester hours

Prerequisites: Consent of Director of Museum Studies Program. Development and operation of museum educational programs: learning theory; program design; relationships with exhibit development; programming for children and adults. Visitor research: theoretical foundations; research design; impact on programming and strategic planning.

ART ED 5590 Special Study in Art Education: 1-6 semester hours

Prerequisite: Graduate standing and consent of instructor. Independent study through readings, reports, field research, or special projects. May be repeated for credit.

Art History Courses

ART HS 1100 Introduction to Western Art (MOTR ARTS 100): 3 semester hours

An introduction to major historical movements in Western art.

ART HS 1101 Ideas in Art History: 3 semester hours

Prerequisites: ART HS 1100 or consent of instructor. Studies of selected works of art, with attention to the social and cultural factors surrounding their creation. May not count for a major or minor in art history.

ART HS 1102 Art of Egypt and the Ancient Near and Middle East: 3 semester hours

A survey of art in Egypt, the Ancient Near East, and the Middle East. A variety of artistic genres will be studied in relation to their social, political, and religious contexts. This course satisfies the cultural diversity requirement.

ART HS 1103 Pre-Columbian Art and Architecture of Meso-and South America: 3 semester hours

An overview of Pre-Columbian art and architecture that examines the contributions of Olmec, Toltec, Maya, Aztec, Inca, Andean and other Meso-American and South American cultures from prehistoric times until the Spanish intervention in the early 1500s.

ART HS 1104 Indigenous Arts of North America: 3 semester hours

A survey of the indigenous arts of North America from precontact through the present. Cultures to be covered include Iroquois and Ojibway of the Northeast; Navajo and Pueblo of the Southwest; Kwagwath and Gitksan of the Northwest Coast; and Inuit from the Arctic. The relationship of art to religion, philosophy, politics, and social life will be explored.

ART HS 1105 Introduction to the Arts of Africa: 3 semester hours

A survey of the major art forms of Africa and the African Diaspora. The course addresses traditional media, such as architecture, masquerade, regalia, sculpture, metalwork, ceramics, and textiles, as well as contemporary sculpture, painting, photography, and performance. This course satisfies the cultural diversity requirement.

ART HS 1108 Introduction to the Arts of Asia: 3 semester hours

A survey of the major achievements in architecture, sculpture, and painting of India, China, Japan, and Southeast Asia, with an emphasis on religious, historical, and social context of the arts. This course satisfies the cultural diversity requirement.

ART HS 1120 Global Art History (MOTR ARTS 101): 3 semester hours

This class explores transcultural perspectives in Art History. Students will be introduced to creative visual traditions from across the globe. The class will examine themes such as death and the afterlife, religious practice, visual persuasion, and design aesthetic in historical Europe, Africa, Asia, the Indigenous Americas and Oceania.

ART HS 2211 Art and Archaeology of The Ancient World: 3 semester hours

Prerequisite: ART HS 1100. A survey of art in Egypt, the ancient Near East, Greece, and Rome, beginning in the Neolithic era (8000-4000 BC) and ending with the Barbarian invasions of Italy in the fifth century A.D. The major highlights of architecture and city planning, sculpture, painting, pottery, and the minor arts will be covered.

ART HS 2212 Greek Art and Archaeology: 3 semester hours

General survey of material culture in the Aegean basin, beginning with the Bronze Age (Third Millennium B.C.) and terminating in the late Hellenistic period (Second Century B.C.). For the Hellenistic period the course will trace Greek developments and influences outside of the Aegean, for example in Italy and in Egypt.

ART HS 2225 Medieval Art: 3 semester hours

A survey of the art and architecture of the Mediterranean World and northern Europe from late antiquity to the late Gothic period (300-1300 A.D.). Focus on new styles and subject matter in painting, sculpture and architecture.

ART HS 2235 Italian and Northern European Renaissance Art: 3 semester hours

Prerequisites: ART HS 1100 or permission of instructor. An introduction to selected artworks, artists and patrons in Italy and Northern Europe throughout the fifteenth and sixteenth centuries, beginning with Ghiberti and Van Eyck and ending with Michelangelo and Brueghel.

ART HS 2238 Italian Renaissance Art: 3 semester hours

Prerequisites: ART HS 1100 or permission of instructor. Study of sculpture, paintings, and architecture in Florence, Rome, and Venice during the fourteenth, fifteenth, & sixteenth centuries as reflections of cultural, religious, philosophical, and political beliefs.

ART HS 2240 French Art and Architecture 1400-1715: 3 semester hours

Prerequisite: ART HS 1100. A survey of art and architecture in France from the late medieval period to the late baroque. Topics will include the development of French chateaux and gardens, the rise of the Academy, and the influence of royal patronage on the arts.

ART HS 2245 Baroque Art and Architecture: 3 semester hours

Prerequisites: ART HS 1100 or permission of instructor. A survey of the major paintings, statues, buildings, and their artists and patrons in seventeenth-century Italy, France, Flanders, Holland, and Spain. Special attention will be given to the study of the city of Rome.

ART HS 2248 Eighteenth Century European Art: 3 semester hours

Prerequisites: ART HS 1100 or permission of the instructor. A survey of European art and architecture from 1700 to 1800, primarily in England, France, and Italy. Topics will include the Rococo and Georgian styles; the Classical and Gothic revivals; the impact of the Enlightenment; the Grand Tour and admiration of antiquity; and decorative arts, including ceramics, interior design, and gardens.

ART HS 2250 Nineteenth Century European Art: 3 semester hours

Prerequisites: ART HS 1100 or consent of the instructor. A survey of European art from 1780 to 1880, focusing on developments in England, France, Germany, and Scandinavia. Topics to be addressed include Neoclassicism, Romanticism, Realism, and Impressionism.

ART HS 2255 Modern Art: 3 semester hours

Prerequisite: ART HS 1100 or consent of the instructor. A survey of art from 1880 to 1960. Topics to be addressed include Post-Impressionism, Cubism, Surrealism, Abstract Expressionism, and non-representational art.

ART HS 2265 History of Photography: 3 semester hours

Prerequisite: ART HS 1100 or consent of instructor. A study of photography: its historical development, an examination of it as an art medium, and its influence on the development of modern art.

ART HS 2270 American Art to 1876: 3 semester hours

Prerequisites: ART HS 1100 or consent of the instructor. An overview of the major developments in painting, sculpture, and the decorative arts in the United States to 1876.

ART HS 2272 American Art Since 1876: 3 semester hours

Prerequisites: ART HS 1100 or consent of the instructor. Major developments in American painting, sculpture, and the decorative arts since 1876.

ART HS 2279 American Architecture: 3 semester hours

Prerequisites: ART HS 1100 or consent of the instructor. An overview of American Architectural practice from 1600 to the present.

ART HS 2281 Art Since 1960: 3 semester hours

Prerequisite: ART HS 1100 or consent of the instructor. A survey of art from 1960 to present. Topics to be addressed include Pop Art, Conceptual Art, Minimalism, Performance Art, and other recent art forms and movements.

ART HS 2291 Issues and Ideas in Art History: 3 semester hours

Prerequisites: ART HS 1100 or permission of instructor. Intensive studies of a few selected works from various eras and cultures, with special attention to the particular social and cultural factors surrounding their creation. May be repeated for credit with a change of topic and permission of advisor.

ART HS 3303 Media and Technique in Art History: 3 semester hours

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. Technical demonstration of and research into various materials and media used by artists. In addition to ancient media such as egg tempera and fresco, it will include modern media such as photography and video.

ART HS 3350 Studies in Design: 3 semester hours

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected topics in the history of design, and may include genres such as architecture, material culture, or graphic design. May be repeated for credit with a different topic, for a maximum of 6 credit hours.

ART HS 3360 Photography and Society: 3 semester hours

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. A study of photography as a means of information and expression, as an influence on culture, and as a reflection of concepts in politics, science, morality, and art. This course counts toward the major.

ART HS 3365 The Artist and The City: 3 semester hours

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. Examines the role of urban centers as a locus for significant artistic activity, as a recurring theme in art, and as spatial and physical architectural realities. Aspects of urban planning, urban imagery in art and the social, political, and personal networks artists develop as a result of living in particular urban centers at particular moments in history will be among the topics discussed.

ART HS 3374 Philosophy of Art: 3 semester hours

Same as PHIL 3374. A critical study of issues as the definition of art, the nature of aesthetic experience, meaning and interpretation in the arts, art and emotion, value in art.

ART HS 3376 Gender in the Visual Arts: 3 semester hours

Same as GS 3376. Prerequisites: Minimum of one 2000-level course in art history and ENGL 3100, or consent of instructor. Selected topics in the role of gender difference in the production and reception of works of visual art and culture. This course will consider examples of historical and contemporary works through gender theories and the analysis of cultural and social factors that contribute to the construction of sexualities and genders.

ART HS 3385 Studies in Architectural History: 3 semester hours

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. A study of selected topics in architectural history. The content of the course will vary, and the course may be repeated for credit with permission of the instructor and departmental advisor. Possible topics include the history of the castle, factory architecture, the evolution of the Gothic cathedral, and domestic and vernacular architecture.

ART HS 3387 Professional Internship: 1-6 semester hours

Prerequisites: Minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. The internship provides experience in museums, historical societies, galleries, design firms, or visual resource collections. Students will assist in the diverse duties associated with the day-to-day functions of the institution, under the joint direction of a faculty advisor and a supervisor at the institution. Course requirements may include readings, research assignments, and/or a paper. This course may be counted for art history or studio art credit with the department's consent.

ART HS 3388 St. Louis Art Museum Internship: 3 semester hours

Prerequisites: Art & Art History or Anthropology major, minimum of two 2000-level courses in art history and ENGL 3100 and consent of instructor. Students selected by the Internship Committee will work 15-20 hours per week under the direction of staff at the St. Louis Art Museum. Projects may include research on the collection, exhibitions, and programs.

ART HS 3389 Visual Resources Management: 1-3 semester hours

Prerequisites: Minimum of two 2000-level courses in Art History, ENGL 3100, and consent of instructor. A hands-on course in the Department of Art and Art History's media center that will cover collection development and management as well as technical and theoretical issues in the visual resources profession.

ART HS 3390 Special Study: 1-4 semester hours

Prerequisite: Junior or senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

ART HS 3391 Selected Themes in Art History: 3 semester hours

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. The course examines selected themes in art history. Course content will vary; the course may be repeated for credit with a different theme, for a maximum of 6 credit hours.

ART HS 3393 Art Museum and Gallery Management: 3 semester hours

Prerequisites: Minimum of two 2000-level courses in Art History and ENGL 3100 or consent of instructor. This course will consider the practical application of professional training in art history as it applies to not-for-profit gallery management. Topics covered will include: grant writing in the arts, the development of art exhibits, the role of the art curator, and the operation of a gallery.

ART HS 3395 Sophomore/Junior Seminar: Research in Art History: 3 semester hours

Prerequisite: Minimum of two 2000-level courses in Art Hist and ENGL 3100, or consent of instructor. An introduction to research and writing techniques in art history, organized around a topic to be announced. Course includes directed readings, research and writing.

ART HS 3396 The Nude in Art: 3 semester hours

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. An exploration of the various meanings of nudity in art. The cultural, social and psychological contexts of nudity and geographic regions, both western and non-western. Representations of both males and females will be analyzed in terms of gender construction, political authority, and personal identity.

ART HS 3397 Landscape Perspectives in Art: 3 semester hours

Prerequisite: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. This seminar considers the various conventions for representing landscape and nature, and human relationships to landscape, throughout history and across cultures. Issues to be considered may include: landscape as metaphor in European painting; contemporary earthworks; landscape photography; and the relationship of artist to landscape in the non-western world.

ART HS 3398 The Portrait: 3 semester hours

Prerequisites: Minimum of one 2000-level course in Art History and ENGL 3100, or consent of instructor. An examination of portraiture in its social, economic and political contexts. Group and individual portraits will be analyzed in terms of gender construction, social status, family history and personal and public identity throughout selected periods of western and non-Western culture.

ART HS 4408 Topics in the Arts of Asia: 3 semester hours

Prerequisites: ART HS 1108 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in the arts of Asia. The content of the course will vary. May be repeated for credit with permission of instructor and advisor. This course satisfies the cultural diversity requirement.

ART HS 4411 Topics in Ancient Art and Archaeology: 3 semester hours

Prerequisites: ART HS 2211, ART HS 2212, or ART HS 2213, and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of some aspect of ancient art and archaeology, with emphasis prior to the common era. May be repeated for credit with permission of instructor and advisor.

ART HS 4425 Topics In Medieval Art: 3 semester hours

Prerequisite: ART HS 2225 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. A study of the selected topics in Medieval art. The content of the course will vary, focusing on single topics such as manuscript painting, the Gothic cathedral and its sculptural decoration, or the art of pilgrimage churches. May be repeated for credit with permission of instructor.

ART HS 4435 Topics in Renaissance Art: 3 semester hours

Prerequisites: ART HS 2235, and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Studies of selected topics, which will vary. Subjects to be considered may include the art of Florence, the role of patronage in Renaissance Italy and Papal art. May be repeated for credit with a different topic.

ART HS 4445 Topics in 17th and 18th Century European Art: 3 semester hours

Prerequisite: ART HS 2245 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. A study of selected topics in Baroque and Rococo art. The content of the course will vary, focusing on single areas, such as the Baroque in Rome, or on major artists; such as Bernini, Rubens and Rembrandt. May be repeated for credit with permission of instructor and advisor.

ART HS 4455 Topics in Modern Art: 3 semester hours

Prerequisites: ART HS 2255 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art of the nineteenth and/or twentieth centuries. May be repeated for credit with permission of instructor and advisor.

ART HS 4475 Topics in American Art: 3 semester hours

Prerequisites: ART HS 2270 or ART HS 2272 or ART HS 2279 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in American art. May be repeated for credit with permission of instructor and advisor.

ART HS 4481 Topics in Contemporary Art: 3 semester hours

Prerequisites: ART HS 2281 and ENGL 3100, or one 3000-level course in Art History, or consent of instructor. Intensive study of selected topics in art since 1960. May be repeated for credit with permission of instructor and advisor.

ART HS 4490 Special Study: 1-4 semester hours

Prerequisite: Junior/Senior standing. Consent of instructor and Art History advisor. Independent study through readings, reports, or field research. May be repeated one time with consent of Art History advisor. May not be used for internship credit.

ART HS 4495 Senior Seminar: Methods of Art History: 3 semester hours

Prerequisite: ART HS 3395, ENGL 3100 and Senior standing in art history or consent of instructor. An advanced class in the methods of art historical analysis. Theoretical perspectives will include connoisseurship, style, iconography, social history, and others.

ART HS 5590 Special Study in Art History: 1-6 semester hours

Prerequisites: Graduate standing and consent of instructor. Independent study through readings, reports, discussions, and/or special projects. May be repeated for credit with consent of instructor.

ART HS 5592 The History of The Visual Arts in American Museums: 3 semester hours

Same as ANTHRO 5592 and HIST 5592. Prerequisites: Graduate standing and consent of instructor. This course is an introduction to selected topics in the history of museology, focusing on art and anthropology museums as sites for the interpretations of art and culture, and as contested meeting grounds for various views of history and culture.

ART HS 5593 Museum Management and Curatorial Practice: 3 semester hours

Prerequisites: Consent of the instructor and graduate standing. Museum Management and Curatorial Practice is designed to give students overlapping theoretical and practical experience that will be useful after entry into the museum profession. While exhibitions are at the core of the museum mission, it takes a broad range of skills from different team members to bring shows to fruition. The course provides students with grounded knowledge on how to curate an exhibition for their museum and understand all the elements that serve the mission-driven goals for that institution, and the obligation to uphold best practices as established by the American Alliance of Museums [AAM] and the Association of Art Museum Directors [AAMD] that provide guidance for the field. Students will become familiar with the different types of roles and functions that make museums run (although staffing levels will vary based on the size and budget of the organization), including: executive management, advancement, marketing, curatorial, collections management, education, and others (e.g., archivist, librarian, security, maintenance, groundskeeping, restaurant staff, parking).

ART HS 6036 Foundations of Museology II: 3 semester hours

Same as ANTHRO 6136 and HIST 6136. Prerequisites: ART HS 6035 consent of Director of Museum Studies Program Audience-centered approaches to museology; visitor research and learning theory; philosophical and practical considerations in museum planning; the physical design of museums; creativity; exhibit and program development; collections and curation; the challenge of diversity; the future of museums.

ART HS 6037 Museum Organization and Operations: 3 semester hours

Same as ANTHRO 6137 and HIST 6137. Prerequisites: Consent of Director of Museum Studies Program. This course looks at museum organization and operations in the 21st century. As museums become more focused on visitors, communities, and private donors, their structures, staffing, and practices have changed. This course introduces students to the wide range of museum professions, the evolving function of museums, the effects of new technologies, and the challenges of administration and funding in constrained economic circumstances. The course includes scrutiny of ethical issues such as disputed collections, intellectual property rights, organizational conflicts, and community collaboration and planning.

ART HS 6038 Museum Studies Master's Project: 5 semester hours

Sames as ANTHRO 6138 and HIST 6138. Prerequisites: Consent of Director of Museum Studies Program. Research and writing/exhibit development on a selected topic.

Studio Art Courses

ST ART 1020 Expanded Artforms: 3 semester hours

A practical and theoretical exploration of contemporary art practices organized around structured assignments that will explore various modes of working in art. This course is designed to assist studio students in developing a personal, non-medium specific approach to art making and problem solving. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1025 Art of 3D Animation I: 3 semester hours

This course will explore the principles of animation and the mechanics of spatial graphics software such as *Maya*, as well as the storytelling and visual techniques central to creating a successful animated presentation. Students will produce an animated video presentation. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1026 Art of 3D Animation II: 3 semester hours

Prerequisites: ST ART 1025. In this production course, students will work on advanced techniques of animation and the mechanics of spatial graphics software such as *Maya*, and will study the storytelling and visual techniques central to creating a successful animated presentation. Each student will produce an animated video presentation during the class. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1030 Ceramics I: 3 semester hours

An introduction to basic methods and theory of ceramics including work with hand-built construction, wheel techniques and glazing. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1060 Photography I: 3 semester hours

An introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1061 Introduction to Digital Photography: 3 semester hours

An introduction to the techniques and aesthetics of digital photography, along with photo editing software and printing techniques. Students must provide a digital camera. Lab fee required. Basic computer lab equipment will be provided, though students will need to supply some personal equipment and supplies. Students who plan to pursue a career in art should enroll in ST ART 1060 rather than ST ART 1061. ST ART 1061 does not satisfy the prerequisite requirement for other courses in Photography beyond the 2000 level, but may count towards Photography electives.

ST ART 1080 Comics & Cartoon Illustration: 3 semester hours

A course in creating and appreciating the world of comics and cartoons. This course will investigate the tools and techniques for creating cartoons, cartoon illustrations and the world of comics. Students will create their own cartoons with traditional media and also with computers. While designed for beginners, experienced artists will be encouraged to perfect their personal styles. The class will create and print its own comic book. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1130 Ceramics II: 3 semester hours

Prerequisite: ST ART 1030. A continuation of ST ART 1030. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1132 Sculpture I: 3 semester hours

An introduction to traditional and contemporary materials, aesthetics, and theories of three-dimensional art. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1133 Introduction to Fibers and Textiles: 3 semester hours

Prerequisites: ST ART 1150. Exploration of a variety of on- and off-loom weaving and other fiber and textile media and techniques. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1140 Drawing I (MOTR PERF 105D): 3 semester hours

An introduction to drawing through the study of figure, object, and environment. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1141 Drawing II: 3 semester hours

Prerequisite: ST ART 1140. The development of drawing skills through continued observation and problems of invention. A further exploration of varied drawing materials and techniques including graphite, charcoal, conte crayon, and inks. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1142 Figure Drawing I: 3 semester hours

Basic studies of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1143 Figure Drawing II: 3 semester hours

Prerequisite: ST ART 1142. Continuation of Figure Drawing I. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1150 Design I: 3 semester hours

Studio problems in the creative use and integration of the elements of two-dimensional design: line, form, space, texture. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1151 Design II: 3 semester hours

Prerequisite: ST ART 1150. A continuation of ST ART 1150, two-dimensional design, with introduction to color theory. Some application of mixed media problems. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1170 Printmaking I: 3 semester hours

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking techniques, materials, and theories. The course will include work in a variety of print materials. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1173 Printmaking: Screenprinting I: 3 semester hours

Prerequisite: ST ART 1170. An introduction into the techniques, methods, and aesthetics of screenprinting. Studio problems involving uses and approaches will be emphasized. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1180 Painting I: 3 semester hours

Prerequisite: ST ART 1140, ST ART 1150 or consent of instructor. An introduction to the use of oil and/or acrylic painting media. Studio problems to develop technical and expressive skills on various surfaces. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1181 Painting II: 3 semester hours

Prerequisite: ST ART 1180 or consent of instructor. Continuation of basic studio problems in painting media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 1210 Graphic Design I: 3 semester hours

Prerequisite: None. Introduction to graphic design with an emphasis on fundamentals of space, emotion, shape, form, and concept. Projects in design, layout and typography will be addressed. The course is recommended to be taken concurrently with ST ART 1150, Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 1220 Graphic Design II: 3 semester hours

Prerequisites: ST ART 1150 and ST ART 1210. Continuing introduction to graphic design, focusing on developing concepts and design process, typographic systems and layout systems. The course is recommended to be taken concurrently with ST ART 2220, Computer Design I. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2100 Advertising Art Fundamentals: 3 semester hours

Prerequisites: MEDIA ST 2090 or consent of the Coordinator for the Certificate in Advertising. This course introduces students to basic principles of production, including layout, type, color, readability, and image selection. The course is intended for students pursuing a Certificate in Advertising, and does not count towards a degree in Graphic Design.

ST ART 2160 Photography II: 3 semester hours

Prerequisite: ST ART 1060. An introduction to the techniques and aesthetics of black and white photography and the darkroom. Students must provide a film camera with adjustable speeds and aperture. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2201 Fundamentals of User Experience Design: 3 semester hours

Prerequisites: ENGL 1100 or equivalent, or consent of instructor. Through lecture and presentation, students will explore fundamental concepts of User Experience (UX) Design and specific tools and methods used throughout the process. Coursework will involve research and writing, allowing students to implement these methods. Lab fee required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2202 Fundamentals of Researching User Experience: 3 semester hours

Prerequisite: ST ART 2201. In this course, students will discover in greater detail the methods for researching user experiences within interactive systems. This will include basic tools like interviews, surveys and usability studies. The course will demonstrate how to translate user research into personas, use-case scenarios, and functional requirements for software and other uses such as implementation in marketing and product design. Course work will include readings, research papers and user research. Lab fee required. Basic equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2210 Typography: 3 semester hours

Prerequisites: ST ART 1220 or consent of instructor. Course intends to instill a sense of responsibility relative to typographic and production design, while developing the student's capacity for critical thinking and general typographic rules, visual hierarchy of typographic elements, classical typographic tradition, book design, awareness of typographic aesthetic.

ST ART 2212 Image Making for Graphic Design: 3 semester hours

Prerequisites: ST ART 1220 or consent of instructor. This course teaches skills of making images and custom type for use in visual communication. Topics covered include a survey of traditional and experimental illustration techniques with an emphasis on creation of original imagery. The class will discuss how hand images are further developed and combined on the computer for use in design. Creativity, discovery, and craft are highly emphasized. Lab fee required.

ST ART 2220 Computer Design I: 3 semester hours

Prerequisite: ST ART 1150 and ST ART 1210. An introduction to the use of computer graphics for the creation of artwork applicable to the graphic design industry. The course is recommended to be taken concurrently with ST ART 1220, Graphic Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2221 Computer Design II: 3 semester hours

Prerequisite: ST ART 2220. Designed to familiarize students with the methods processes, software, and computer functions used in graphic design and illustration. The course is recommended to be taken concurrently with ST ART 3310, Graphic Design III. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2240 Drawing III: 3 semester hours

Prerequisites: ST ART 1140 and ST ART 1141. This course offers studio problems designed to further the development of drawing skills in various media. Limited color will also be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2241 Drawing IV: 3 semester hours

Prerequisite: ST ART 2240. Studio problems with emphasis on color and multi-material approach to drawing. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2242 Figure Drawing III: 3 semester hours

Prerequisites: ST ART 1142 and ST ART 1143. Advanced study of the human form and anatomy from the model in a variety of drawing media. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2243 Figure Drawing IV: 3 semester hours

Prerequisite: ST ART 2242. Continuation of ST ART 2242. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2251 Design III: 3 semester hours

Prerequisites: ST ART 1150 and ST ART 1151. Advanced studio problems in design materials. Use of two-dimensional and three-dimensional mixed media. Experimental use of materials and media will be introduced. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2263 Digital Color Process: 3 semester hours

Prerequisites: ST ART 1060. An extended study in the process of digital printing. The class will help students refine their techniques using digital color management and explore various techniques to assure the closest relationship between the image on the monitor and the resulting print. Hands-on training with different digital printers, digital media and scanning techniques will be offered. This class will involve both learning exercises and the creation of original computer-aided photographic art. Lab fee required. Students must provide a digital camera. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2264 Non-Silver Photography: 3 semester hours

Prerequisites: ST ART 1060 and ST ART 2160. An introduction to the aesthetics and techniques of nontraditional photographic processes. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2265 Commercial Applications In Photography: Portrait Photography: 3 semester hours

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of portrait photography. Techniques of lighting, posing, and studios equipment will be explored. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2266 Commercial Applications in Photography: Product Photography: 3 semester hours

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of product Photography. Techniques of lighting, posing and studio equipment will be explored. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee is required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2267 The Constructed Photograph: 3 semester hours

Prerequisites: ST ART 2263. An exploration of the constructed photograph through the art of digital collage. The class will survey the history of hand-created photographs. In addition, students will learn advanced Photoshop techniques in order to create original computer-aided photographic art. Lab fee required. Basic computer equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2268 Commercial Applications in Photography: Event Photography: 3 semester hours

Prerequisites: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of event photography. The class will focus on a variety of event photography types, including weddings, corporate and non-profit events, photobooths, concerts, etc. Special emphasis will be placed on photographing for the client. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2269 Commercial Appl in Photo: Photojournalism, Documentary, & Publ Relations Photography: 3 semester hours

Prerequisite: ST ART 2263 or consent of instructor. Exploration of issues and applications within the field of photojournalism, documentary, and public relations photography. The class will concentrate on a variety of photographic applications focusing on news and editorial imagemaking, as well as training the student in public relations assignments. This class will involve both learning exercises and the creation of original computer-aided photographic art. Students must provide a digital camera. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2271 Printmaking II: 3 semester hours

Prerequisite: ST ART 1170 or consent of instructor. A continuation of ST ART 1170. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2272 Printmaking:Lithography I: 3 semester hours

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory in stone and plate lithography. Studio problems in the use of materials and equipment. Attention will be given to individual development. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2273 Printmaking: Etching: 3 semester hours

Prerequisites: ST ART 1150 and ST ART 1141 or consent of instructor. An introduction to printmaking skills and theory of contemporary etching practices. Development of skills and aesthetic judgments in the media using non-toxic etching processes. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 2274 Printmaking And Relief: 3 semester hours

Prerequisites: ST ART 1170 and ST ART 2271. Advanced problems in relief printmaking. Work in wood and mixed materials. Development of skills and aesthetic judgments in the media. May be repeated for credit with consent of instructor. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2277 Printmaking: Photo Lithography I: 3 semester hours

Prerequisite: ST ART 1060 or departmental consent. An introduction to printmaking skills and theory in stone and plate lithography with particular emphasis on the photographic applications of the process. Some attention will also be given to commercial printmaking applications while studio problems in the use of materials and equipment will be stressed. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2280 Painting III: 3 semester hours

Prerequisite: ST ART 1181 or consent of instructor. Advanced studio problems in painting media. Attention paid to individual development of theory, expression, and technique. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2281 Painting IV: 3 semester hours

Prerequisite: ST ART 2280. A continuation of ST ART 2280. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2283 Watercolor Painting: 3 semester hours

Prerequisites: ST ART 1150 and ST ART 1141. Beginning problems in watercolor painting. Includes the study of traditional and contemporary approaches to color, color techniques, and treatment of papers. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 2290 Special Study: 1-10 semester hours

Prerequisites: Junior/Senior standing and consent of department and instructor. Independent study through readings, reports or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3074 Special Topics in Studio Art: 3 semester hours

Prerequisites: Minimum completion of 18 hours in Studio Art. Selected topics in studio studies. May be repeated for credit with a change of topic. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3260 Photography III: 3 semester hours

Prerequisite: ST ART 2160. An exploration into contemporary theories and trends in photography. Advanced projects, portfolios and techniques will be expected from those enrolled. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3310 Graphic Design III: 3 semester hours

Prerequisite: ST ART 1220 and ST ART 2220. Advanced studio problems to further the understanding of design and its relationship to typographic elements, illustration, and communication. The course will encourage both conceptual and technical development of the designer. The course is recommended to be taken concurrently with ST ART 2221, Computer Design II. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3311 Graphic Design IV: 3 semester hours

Prerequisite: ST ART 3310 and ST ART 2221. Further studio problems in the graphic arts. The course is recommended to be taken concurrently with ST ART 2210, Typography. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3312 Advanced Topics in Graphic Design: 3 semester hours

Prerequisites: ST ART 3311 or permission of instructor. Studies of selected topics, which will vary. May be repeated for credit with a different topic, for a maximum of 9 credit hours. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3340 Advanced Problems in Drawing I: 3 semester hours

Prerequisite: ST ART 2241. This course is focused on professional-level art and portfolio production. It offers studio problems designed to further the development of drawing skills. Emphasis will be given to the study of drawing as an independent art form. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3341 Advanced Problems in Drawing II: 3 semester hours

Prerequisite: ST ART 3340. A continuation of ST ART 3340. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3350 Studio Art Internship: 1-6 semester hours

Prerequisites: Junior/Senior standing in studio art and consent of the faculty advisor. The internship provides experience in design firms, professional art studios, or comparable settings. Students will assist professionals in the diverse duties associated with studio art activities. Course assignments may include research assignments and/or reports to be reviewed by the faculty advisor and/or supervisor. May be repeated for credit, up to a maximum of 6 credit hours.

ST ART 3363 Special Topics in Photography: 3 semester hours

Prerequisites: ST ART 2160. Photography II & permission of advisor. Selected topics in photographic practice. May be repeated for credit with permission of advisor. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3370 Advanced Problems in Printmaking I: 3 semester hours

Prerequisite: ST ART 2274. This course is focused upon professional-level art and portfolio production. After completion of this and the preceding course, students should be ready to meet the artistic and intellectual demands of today's visual art world. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3371 Advanced Problems in Printmaking II: 3 semester hours

Prerequisite: ST ART 3370. A continuation of ST ART 3370. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3372 Advanced Lithography: 3 semester hours

Prerequisite: ST ART 1173. Continuing problems in lithography with problems in black and white, photolithography, and/or color. May be repeated for credit. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3380 Advanced Problems in Painting I: 3 semester hours

Prerequisite: ST ART 2281. This course is focused on professional-level art and portfolio production. Non-traditional materials might be explored. Attention is focused on individual development of painting theory, self-expression, and advanced techniques. The student is expected to assume a substantial responsibility with regard to direction, motivation, and content. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3381 Advanced Problems in Painting II: 3 semester hours

Prerequisite: ST ART 3380. A continuation of portfolio production in ST ART 3380. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3383 Advanced Problems in Graphic Design I: 3 semester hours

Prerequisite: ST ART 3311 and ST ART 2210. This course is focused on professional-level art and portfolio production. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3384 Advanced Problems in Graphic Design II: 3 semester hours

Prerequisite: ST ART 3383. A continuation of ST ART 3383. The course includes the preparation of a faculty-reviewed portfolio. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 3390 Special Study: 1-10 semester hours

Prerequisite: Junior/senior standing and consent of department chairperson and instructor. Independent study through readings, reports, or field research. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3391 Advanced Problems in Photography I: 3 semester hours

Prerequisites: ST ART 2263 and ST ART 3260. This course is focused on professional-level art and portfolio production. Students may employ black and white, color, nonsilver, or other traditional or non-traditional press for projects in this course. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 3392 Advanced Problems in Photography II: 3 semester hours

Prerequisite: ST ART 3391. A continuation of ST ART 3391. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 4389 Graphic Design Studio: 3 semester hours

Prerequisites: ST ART 3384 or permission of instructor. Students will work on actual client projects in a studio setting from creative concept through client presentation. Studies will include client interviews, project planning, studio operations, project budget and estimating, vendor selection, prepress preparation, working in creative groups and professional presentations.

ST ART 4490 Senior Seminar in Photography I: 3 semester hours

Prerequisite: Senior Standing and ST ART 3392. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall semester.

ST ART 4491 Senior Seminar in Photography II: 3 semester hours

Prerequisites: Senior standing and ST ART 4490. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Spring semester.

ST ART 4495 Senior Studio Seminar: 3 semester hours

Prerequisites: Senior standing and ST ART 3381, ST ART 3341, ST ART 3392 or ST ART 3371. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Fall Semester.

ST ART 4496 Senior Studio Seminar: 3 semester hours

Prerequisites: Senior standing and ST ART 4495. Weekly critiques and discussions of technical and professional issues. Will instruct students in methods of portfolio display, documentation, gallery representation, grant writing, and professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies. Offered only during Winter Semester.

ST ART 4497 Senior Seminar in Graphic Design I: 3 semester hours

Prerequisites: Senior standing and ST ART 3384. Students must pass the junior portfolio review. Weekly critiques and discussions of technical and professional issues. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies.

ST ART 4498 Senior Seminar in Graphic Design II: 3 semester hours

Prerequisites: ST ART 4497. Continuation of ST ART 4497. Will instruct students in the methods of professional preparation. Lab fee required. Basic studio equipment will be provided though students will need to supply some personal equipment and supplies.

ST ART 5590 Special Study: 1-6 semester hours

Prerequisites: Graduate standing and consent of instructor. Independent study through art making, readings, reports, or field research. Studio Art fee required. Basic studio equipment will be provided, though students will need to supply some personal equipment and supplies. May be retaken for credit with consent of instructor.

Music

Performing Ensembles

Membership in Music Department performing ensembles (choral, orchestral, concert and pep band, jazz, chamber, etc.) is open to UMSL students in all majors and minors. Admission to most ensembles is by audition (consent of the instructor). EN PER 1400, University Chorus, is open to all university students without audition.

General Information

Degrees and Areas of Concentration

The Department of Music offers programs of study leading to the B.M. degree in music education (and state teaching certification in grades K-12); the B.M. degree with an emphasis in performance; the B.M. degree with an emphasis in theory/composition; the B.M. degree with elective studies in business; and the B.A. degree in music.

Instruction in piano, organ, voice, and all band and orchestral instruments is given by full-time faculty and adjunct faculty who are also professional musicians. Some are members of the St. Louis Symphony Orchestra. Faculty recitals are regularly scheduled.

Music Minors

A minor in music and jazz is available.

Facilities

The Department's facilities, classrooms, studios, practice rooms, and listening labs are located in the Music Building and the Arts Administration Building. Performance spaces are in the Touhill Performing Arts Center.

Ensembles

Fourteen performing ensembles are open to all by audition with credit optional:

EN PER 1400	University Chorus (MOTR PERF 102C)	1
EN PER 1410	The University Singers (MOTR PERF 102C)	1

EN PER 1500	University Orchestra (MOTR PERF 102O)	1
EN PER 1520	University Symphonic Band (MOTR PERF 102B)	1
EN PER 1530	University Wind Ensemble	1
EN PER 1541	Chamber Ensemble Brass	1
EN PER 1542	Jazz Combo	1
EN PER 1543	Chamber Ensemble Percussion	1
EN PER 1544	Chamber Ensemble Strings	1
EN PER 1545	Chamber Ensemble Voice	1
EN PER 1546	Chamber Ensemble Woodwinds	1
EN PER 1550	Jazz Ensemble	1
EN PER 1560	Opera Workshop	1

Each year more than 100 student recitals and concerts are presented.

Additional information may be obtained by contacting the Department of Music: (314) 516-5980.

Career Outlook

A music degree builds the foundation for a career in professional performance, music education or composition and music theory. A music degree also prepares you for positions in the music industry (recording, publishing, radio programming, manufacturing, music retail) or as a church music director. Employers in many fields take notice of applicants with music degrees; music study requires a high level of discipline, musicians are creative and positive and musical aptitude is known to be correlated with other desirable skills.

UMSL music graduates have been readily accepted into outstanding graduate programs, including our own Master of Music Education degree program. Many are pursuing successful careers in music education, business, and industry, or as professional performers.

Faculty Overview

Music faculty members have received recognition for distinguished achievements in conducting, composition, and performance. The faculty is also recognized for research in musicology, music theory, and music education. Part-time applied music lecturers are professional musicians.

The Department of Music is accredited by the National Association of Schools of Music.

Undergraduate Studies

General Education Requirements

General education requirements (p. 41) apply to all majors, except that students in the B.M. with elective studies in business and B.M. in music education degree programs are not required to take a foreign language. Courses required for degree programs may not be taken on a satisfactory/unsatisfactory basis. Students must receive at least a C in each music course and maintain a cumulative GPA of 2.5 (music education 2.7) in all music courses to meet degree requirements.

Non-music majors may complete no more than 8 hours in music-performing organizations (EN PER 1400, University Chorus; EN PER 1410, University Singers; EN PER 1420, University Concert Band; EN PER 1500, University Orchestra; EN PER 1520, University Symphonic Band, et. seq.) toward graduation, including credit transferred. Courses in applied music (private lessons and performing organizations)

do not fulfill the humanities general education requirement. M H L T 1150, Drumming Cultures of the World; M H L T 1160, Musical Journey through Latin America; M H L T 1170, Musical Journey through the Far East; or M H L T 1180, Musical Journey through Africa will meet the non-Euro-American study requirement.

General Education Learning Outcomes for Music Students

- Students will demonstrate enhanced aesthetic appreciation and musical discrimination.
- Students will demonstrate knowledge of a wide range of world music.
- Students will demonstrate knowledge of relationships among the arts, societal influences on music and musical influences on society.

Degree Requirements

Admission to all music degree programs is by audition and interview to demonstrate musical aptitude and potential, moderate technical proficiency, and seriousness in selecting music as a four-year course of study. In addition to the applied music audition, placement examinations in music theory and music history may be required to confirm students' prior experience in these areas. Auditions are scheduled from January to May for the fall semester; a limited number are held in December for the spring/winter semester. Students in applied music must pass a junior-standing examination to confirm their level of performance skills for enrollment in AP MUS 3440 – AP MUS 3459 or AP MUS 4440 – AP MUS 4459. This examination is usually taken at the same time as the applied music jury for the fourth semester of enrollment in AP MUS 1440 - AP MUS 1459.

Declaring the Music Major

Upon admission to the University, a student seeking to major in music is first designated as a "pre-music major." At the end of the student's first semester, a panel of music faculty convenes to evaluate that student's efforts and accomplishments (both musical and academic) during the semester. Following this evaluation, the student receives written notification about his or her status. At this time, the student may be (a) allowed to officially declare music as his or her major, (b) asked to continue studies and a pre-music major for another semester, or (c) instructed to seek a major outside the Department of Music. If the student is asked to continue as a pre-music major, the process will repeat during the following semester. This policy applies equally to first-time college students as well as students transferring from other institutions.

Evidence of sound musicianship, a close acquaintance with an appropriate portion of musical literature, and the ability to bring it to actual performance are required for graduation in all music degree programs. Students in the bachelor of music-performance emphasis fulfill this requirement with junior and senior recitals. Students in all other degree programs fulfill this requirement with a senior recital. In some cases, upon the recommendation of the student's applied teacher, the senior recital (for non-performance majors only) may be replaced by participating in three regularly scheduled student recitals during the last two semesters of applied music study, or by performing for a special panel of faculty members.

Other Requirements

Music majors are required to enroll in an approved ensemble (University Symphonic Band, University Wind Ensemble, University Singers, University Chorus, or University Orchestra) each semester, to study one applied area progressively each semester, and to enroll in the appropriate pedagogy and literature seminar each semester of the degree program.

Music education majors are exempt from these requirements during the student teaching semester. The following specific ensemble enrollments, depending upon the applied music area, are required:

- Wind and percussion students—University Symphonic Band or University Wind Ensemble;
- string students--University Orchestra;
- voice students--University Singers (or by special permission, University Chorus);
- keyboard and guitar students--any approved ensemble, but those in the bachelor of music in music education program must successfully audition for and enroll in an ensemble compatible with the teaching certification they are pursuing.
- Instrumental students may be required to participate in additional ensembles to enhance their musical development.

Majors are required to appear in performance at the department's discretion and to attend a prescribed number of departmental recitals. Non-keyboard players are required to pass an exam in piano proficiency: PRACTM 2180, Piano Proficiency IV, or equivalent for instrumentalists; or PRACTM 3290, Piano Proficiency VI, or equivalent for vocalists.

The music department may require students to pass a placement test to enroll in the next level course, provided this or an equivalent test is administered to all students seeking to enroll in that course.

Core Curriculum

The following core courses are required for all music majors:

Music Theory

THRY COM 1300	Introduction to Music Theory	1
THRY COM 1301	Theory Of Music I	3
THRY COM 1302	Aural Training I	1
THRY COM 1311	Theory Of Music II	3
THRY COM 1312	Aural Training II	1
THRY COM 2301	Theory Of Music III	3
THRY COM 2302	Aural Training III	1
THRY COM 2311	Theory Of Music IV	3
THRY COM 2312	Aural Training IV	1
THRY COM 3410	Orchestration	3

Piano Proficiency

PRACTM 1140	Piano Proficiency I	1
PRACTM 1150	Piano Proficiency II	1
PRACTM 2160	Piano Proficiency III	1
PRACTM 2180	Piano Proficiency IV	1

Conducting

PRACTM 2510	Conducting I	2
-------------	--------------	---

Music History and Literature

M H L T 1010	History Of Western Music I	3
M H L T 1020	History Of Western Music II	3

Choose one of the following: 3

M H L T 1150	Drumming Cultures of the World	
M H L T 1160	Musical Journey through Latin America	
M H L T 1170	Musical Journey through the Far East	
M H L T 1180	Musical Journal Through Africa	

Select at least one upper level history course 4000 – 4280. 3

Applied Music		
AP MUS 1460	Seminar In Pedagogy And Literature	0
AP MUS 3460	Seminar In Pedagogy And Literature	0
AP MUS 4460	Seminar In Pedagogy And Literature	0
Total Hours		38

In addition to the core curriculum, students must fulfill the requirements for the specific degree program or emphasis area as listed below:

Learning Outcomes for All Music Degrees

- Students will demonstrate performance skills at a professional level as a soloists, ensemble members, and chamber musicians or at appropriate levels for entering graduate music study and for public school and studio teaching. (Perform)
- Students will demonstrate knowledge in music theory, music history and music literature to be able to create, analyze, and synthesize music as a means of supporting developing careers in music teaching and/or performance. (Create)
- Students will demonstrate the ability to recognize, classify, and interpret a common body of western literature and to speak and write clearly and effectively about music literature. (Respond)
- Students will demonstrate the understanding and use of public performance and outreach as a means for engaging communities and creating cultural awareness. (Connecting)

Bachelor of Arts in Music

In addition to the required core curriculum, candidates must complete the following:

PRACTM 3920	Senior Research	2-4
Applied Area		
One hour every semester in progress toward degree with a minimum of 8 credit hours		8
Ensemble		
Must be enrolled every semester in progress toward degree. However only 4 credit hours count toward degree		4
Foreign Language		13
Candidates for the B.A. degree in Music are required to complete 13 credit hours or the equivalent in proficiency in one foreign language. ¹		13
Total Hours		40-42

¹ Please see the College of Fine Arts and Communication's Baccalaureate Degree Requirements for additional information about the foreign language requirement.

Bachelor of Music with an emphasis in Music Education

In addition to the requirement for a successful audition on their primary instrument, piano and guitar students applying for the BM: Music Education program must also successfully audition for the full participation in (1) Applied Music (seven hours) and University Singers (for those seeking vocal/choral certification), or (2) Symphonic Band, Wind Ensemble or Orchestra (for those seeking instrumental certification).

In addition to the required music core curriculum, candidates must complete the following:

Other General Education Requirements ¹

All undergraduate economics majors must meet the university and college general education requirements.

GPA Requirement

Students enrolled in B.M. in music education must maintain minimum GPAs (2.75 cumulative; 3.0 music; and 3.0 professional education).

Proficiency Exam

Students working toward certification in choral/vocal or instrumental music K-12 are required to pass a keyboard proficiency examination before admission to student teaching in music, usually before or during the sixth semester of their program.

- ¹ All of the courses in the General Education Requirement Area must be a minimum of two semester hours.

Instrumental Track

AP MUS 1410 - 3459 7

One hour every semester in progress toward degree with a minimum of 7 credit hours

EN PER 1500	University Orchestra ¹	4
or EN PER 1520	University Symphonic Band	
or EN PER 1530	University Wind Ensemble

Learning Outcomes for Music Education Students

Students will:

- Demonstrate content and skill knowledge of advanced musicianship through personal music performance.
- Demonstrate knowledge in music theory, music history, and music literature.
- Demonstrate a fundamental knowledge in the teaching of instrumental music, vocal/choral music and general music with specialized knowledge in one or more of these areas.
- Apply pedagogical knowledge and skills appropriate to the teaching of music.
- Demonstrate an understanding of child development.

- Demonstrate an understanding of the needs of diverse and urban populations.
- Possess a basic understanding of current music education issues and their impact on music teaching and learning at the PreK-12 levels.

Bachelor of Music with an Emphasis in Performance

In addition to the required music core curriculum, candidates must complete the following:

PDGOY 1560	Piano Pedagogy (keyboard students only)	2
PRACTM 1250	Singer's Diction: English, Italian and German (voice majors only)	1
PRACTM 1260	Singer's Diction: Latin, French, and Spanish (voice majors only)	1
PRACTM 3190	Piano Proficiency V (voice majors only)	1
PRACTM 3290	Piano Proficiency VI (voice majors only)	1
PRACTM 3521 or PRACTM 3522	Conducting II - Instrumental Conducting II - Choral	2
PRACTM 3920	Senior Research	2-4

Music Theory

Select two (2) of the following courses: 4

THRY COM 3110	Analysis of Music from 1900 to Present
THRY COM 3120	Tonal Counterpoint
THRY COM 3130	Advanced Analytical Techniques
THRY COM 3140	Readings in Music Theory

Music History and Literature

Select an additional upper level course M H L T 4000-4280. 3

Applied Area ¹

Must enroll every semester in progress toward degree with a minimum of 12 credit hours of applied music, 8 credit hours of which must be AP MUS 4440-4459 level. Junior and senior recital required. 12

Ensemble

Must be enrolled every semester in progress toward degree with a minimum of 4 credit hours 4

Chamber Ensemble/Accompanying 6

Foreign Language

Candidates pursuing this emphasis area with an applied area in voice must complete two semesters of one foreign language selected from French, German, or Italian

Total Hours 39-41

¹ Students in Applied Music must pass a junior-standing exam to confirm their level of performance skills for enrollment in AP MUS 4440 - AP MUS 4459.

Bachelor of Music with an Emphasis in Composition

In addition to the required music core curriculum, all candidates must complete the following:

Theory and Composition

THRY COM 3110	Analysis Of Music from 1900 to Present	2
THRY COM 3120	Tonal Counterpoint	2
THRY COM 3300	Seminar In Composition (two semesters)	2
THRY COM 3310	Studio Composition	1
THRY COM 3420	Choral Arranging	2

Music History and Literature

An additional upper level course MHLT 4000- MHLT 4280 is required. 3

Practicum

PRACTM 3521 or PRACTM 3522	Conducting II - Instrumental Conducting II - Choral	2
PRACTM 3190	Piano Proficiency V	1
PRACTM 4100	Senior Project in Theory/ Composition	2-4

Applied Area

1 hour every semester in progress toward degree with a minimum of 8 credit hours 8

Ensemble

Must be enrolled every semester in progress toward degree. However only 4 credit hours count toward degree. 4

Total Hours 29-31

Bachelor of Music with an Emphasis in Theory

In addition to the required music core curriculum, all candidates must complete the following:

Theory and Composition

THRY COM 3110	Analysis Of Music from 1900 to Present	2
THRY COM 3120	Tonal Counterpoint	2
THRY COM 3130	Advanced Analytical Techniques	2
THRY COM 3140	Readings in Music Theory	2
THRY COM 3420	Choral Arranging	2

Music History and Literature

An additional upper level course MHLT 4000-MHLT 4280 is required. 3

Practicum

PRACTM 3521 or PRACTM 3522	Conducting II - Instrumental Conducting II - Choral	2
PRACTM 3190	Piano Proficiency V	1
PRACTM 3280	Score Reading at the Keyboard	1
PRACTM 4100	Senior Project in Theory/ Composition	2-4

Applied Area

1 hour every semester in progress toward degree with a minimum of 8 credit hours. 8

Ensemble

Must be enrolled every semester in progress toward degree.
However only 4 credit hours count toward degree.

Total Hours 31-33

Bachelor of Music with Elective Studies in Business

In addition to the required music core curriculum, candidates must complete the following:

Additional General Education Requirements ¹

PSYCH 1003	General Psychology	3
or SOC 1010	Introduction To Sociology	
ECON 1001	Principles Of Microeconomics	3

Applied Area

One hour every semester in progress toward degree with a minimum of 8 credit hours. 8

Music History and Literature

Select one additional course from MHLT 4000 – 4459.

Ensemble

Must be enrolled every semester in progress toward degree.
However only 4 credit hours count toward degree. 4

Internship

PRACTM 4920	Internship (replaces PRACTM 3920 Senior Research in Core Curriculum)	1-3
-------------	--	-----

English

Select one of the following: 3

ENGL 3100	Junior-Level Writing
ENGL 3120	Business Writing
ENGL 3130	Technical Writing

Business Administration

ACCTNG 2400	Fundamentals Of Financial Accounting	3
ACCTNG 2410	Managerial Accounting	3
MGMT 3600	Management And Organizational Behavior	3
MKTG 3700	Basic Marketing	3

Select two of the following: 6

ACCTNG 3441	Income Taxes
BUS AD 3900	Business Law: Contracts, Sales, Secured Transactions, Bankruptcy
BUS AD 2900	Legal Environment Of Business
FINANCE 3500	Financial Management
INFSYS 1800	Computers And Information Systems
MGMT 3611	Advanced Management And Organizational Behavior
MGMT 3621	Human Resource Management
MGMT 3622	Industrial And Labor Relations
MKTG 3710	Consumer Behavior

Total Hours 40-42

¹ Prerequisites to the required business administration courses.

Curricula for Minors

Minor in Music

Candidates must complete the following courses (27 hours):

Music Theory

THRY COM 1301	Theory Of Music I	3
THRY COM 1302	Aural Training I	1
THRY COM 1311	Theory Of Music II	3
THRY COM 1312	Aural Training II	1

Music History and Literature

M H L T 1010	History Of Western Music I	3
or M H L T 1020	History Of Western Music II	
Select any M H L T course 4220-4280		3

Total Hours		23
-------------	--	----

Graduate Study

Effective Fall of 2018, the Department will no longer accept applicants for the Master of Music Education.

Master of Music Education

The master of music education degree is designed to enable music specialists in grades K-12 to pursue continued professional growth in an emphasis area of their choice.

Admission Requirements

Admission to the program requires a bachelor of music in music education (or equivalent) degree, admission to the Graduate School, and two letters of recommendation. Student should also submit a resume, a statement of purpose, and a 20 - 30 minute video of their teaching directly to the Director of the MME program.

The program requires completion of 30 hours of graduate credit, 20 of which must be earned in residence.

Required Courses and Options:

The minimum 30-hour program includes the following requirements.

Music Education Core (12 credit hours)

MUS ED 5810	Foundations Of Music Education	3
MUS ED 5830	Contemporary Music Education	3
MUS ED 5910	Music Education Research	3
MUS ED 5990	Master's Project In Music Education	3

Music Education Electives (6 credits from following)

MUS ED 5060	Graduate Workshop In Music Education	1-5
MUS ED 5510	Graduate Instrumental Methods	3
MUS ED 5610	Graduate Choral Methods	3
MUS ED 5620	Guitar In The Classroom	3
MUS ED 5710	General Music: A Model For Multi-Faceted Learning	3
MUS ED 5840	Problems Of Urban Music Education	3

MUS ED 5920	Psychology Of Music	3
PDGOGY 5110	Graduate Jazz Pedagogy	3
PRACTM 5020	Choral Literature	3
PRACTM 5035	Instrumental Literature	3
PRACTM 5210	Graduate Conducting	3
THRY COM 5110	Scoring And Arranging	3

Education Electives (6 credits from the following) ¹

ED TECH 5301	Introduction To Computers And The Internet In Education	3
ED TECH 5340	Selection And Utilization Of Educational Multimedia	3
ED PSY 6030	Instruction, Learning And Assessment	3
ED PSY 6109	Learning And Development In Secondary School Settings	4
ED PSY 6111	Psychology Of Education	3
ED REM 6707	Classroom Measurement And Evaluation	3
ED REM 6710	Educational Research Methods and Design	3
ED REM 6716	Academic Assessment and Intervention	3
SPEC ED 6345	Characteristics and Education of Students with High-Incidence Disabilities	3
SPEC ED 6412	Psychology Of Exceptional Children	3
SEC ED 6415	Curriculum Leadership in Education	3
TCH ED 5312	Differentiated Instruction	4
TCH ED 6010	Examining History, Community And Social Justice In Education	3
TCH ED 6020	Teacher Action, Advocacy And Leadership	3

Free Electives (6 credits from the following) ²

AP MUS 5430	Special Applied Studies ³	1
AP MUS 5440	Graduate Applied Music ³	1
EN PER 5310	Graduate Chamber Ensemble ³	1
EN PER 5490	Graduate Ensemble ³	1
MUS ED 5750	Computer Applications in Music Education	3
MUS ED 5760	Multimedia in Music Education	3
MUS ED 5770	Music Notation Software for Music Educators	3
MUS ED 5800	Musical Acoustics	3

¹ Other options may be available with permission of the Director of the Master of Music Education program.

² May choose from electives listed under Music Education and Education (above). Other graduate courses may be applied to degree program with written permission from the Director of the Master of Music Education program.

³ May be repeated for up to 3 credits.

Career Outlook

Many graduate students in music education will already hold full-time music teaching positions. A graduate degree in music education allows for

continued professional growth. Music specialists may refine their teaching expertise, add to their understanding and knowledge about music and educational processes, become more specialized in a specific emphasis area of music education (choral, instrumental, general music or music technology), or any combination of these professional growth areas.

Graduate-level work in music education is often required to renew a teacher's certificate or to satisfy professional growth requirements specified by an employing school or school district or to advance to new positions within the field of music education.

Sample Four Year Plans

Bachelor of Arts in Music (p. 330)

Bachelor of Music:

- Music Education, (p. 330)Voca (p. 330)l
- Music Education, Instrumental (p. 331)

Applied Music Courses

AP MUS 1418 Secondary Applied Music: Organ: 1 semester hour
Prerequisites: By audition and consent of department. Individual instruction in performance and literature of the designated instrument. May be repeated for credit. Not applicable to the applied music requirement for music major or music minor degrees.

AP MUS 1459 Voice: 1 semester hour

Prerequisite: By audition and consent of department. May be repeated, up to 4 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 1460.

AP MUS 1460 Seminar In Pedagogy And Literature: 0 semester hours

Prerequisites: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

AP MUS 3440 Bassoon: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3441 Clarinet: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3442 Classical Guitar: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3443 Euphonium: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3444 Flute: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3445 French Horn: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3446 Harp: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3447 Oboe: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3448 Organ: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3449 Percussion: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3450 Piano: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3451 Saxophone: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3452 Trombone: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3453 Trumpet: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3454 Tuba: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3455 Violin: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3456 Viola: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3457 Violoncello: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3458 String Bass: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3459 Voice: 1 semester hour

Prerequisites: Completion of the Junior Standing. Exam in major applied area. May be repeated, up to 6 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 3460.

AP MUS 3460 Seminar In Pedagogy And Literature: 0 semester hours

Prerequisites: Concurrent registration with a parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory basis.

AP MUS 3500 Junior Recital: 0 semester hours

Prerequisites: Consent of instructor; concurrent registration in a 4000-level AP MUS course. Preparation and presentation of a Junior Recital. The student's preparation will be evaluated by means of a pre-recital hearing at least 5 weeks before the recital.

AP MUS 3510 Senior Recital: 0 semester hours

Prerequisites: Consent of instructor; concurrent registration in a 3000-level AP MUS course (for non-performance majors) or a 4000-level AP MUS course (for Music Performance majors). Preparation and presentation of a Senior Recital. The student's preparation will be evaluated by means of a pre-recital hearing at least 5 weeks before the recital.

AP MUS 4440 Bassoon: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4441 Clarinet: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4442 Classical Guitar: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4443 Euphonium: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4444 Flute: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4445 French Horn: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4446 Harp: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4447 Oboe: 2 semester hours

Prerequisites: Completion of Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4448 Organ: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4449 Percussion: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4450 Piano: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4451 Saxophone: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4452 Trombone: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4453 Trumpet: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4454 Tuba: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4455 Violin: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar Music 4460.

AP MUS 4456 Viola: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4457 Violoncello: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4458 String Bass: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4459 Voice: 2 semester hours

Prerequisites: Completion of the Junior Standing. Exam in major applied area and admission to Performance Degree Program. May be repeated up to 12 credit hours. Applied Music registration requires concurrent registration in a large ensemble and seminar AP MUS 4460.

AP MUS 4460 Seminar in Pedagogy and Literature: 0 semester hours

Prerequisite: Concurrent registration with parallel Applied Music course is required. Seminars in pedagogy and literature are offered for all areas of Applied Music. May be taken on a satisfactory/unsatisfactory grading basis.

AP MUS 5001 Graduate Performers Certificate Recital I: 1 semester hour

Prerequisites: Consent of department; concurrent registration in AP MUS 5440 is required. Preparation and presentation of a public recital at UMSL. Repertoire will be chosen with the approval of the applied instructor, and should include music from varying styles and eras. Recital should be 70-90 minutes in length.

AP MUS 5002 Graduate Performers Certificate Recital II: 1 semester hour

Prerequisites: AP MUS 5001; concurrent registration in AP MUS 5440 is required. Preparation and presentation of a public recital at UMSL. Repertoire will be chosen with the approval of the applied instructor, and should include music from varying styles and eras. Recital should be 70-90 minutes in length. Building on the skills gained through completion of AP MUS 5001, AP MUS 5002 should demonstrate a higher level of musical accomplishment.

AP MUS 5003 Graduate Performers Certificate Lecture Recital: 1 semester hour

Prerequisites: Concurrent registration in AP MUS 5440 is required. Preparation and presentation of a public lecture recital at UMSL. The presentation should consist of a balance between verbal and musical content, and convey a high quality of both intellectual understanding and musical performance. Designed in consultation with the applied instructor, the lecture recital should focus in detail on one work, topic, or genre, and last approximately 60 minutes, with a brief intermission.

AP MUS 5430 Special Applied Studies: 1 semester hour

Prerequisites: Graduate standing in music and consent of department. Individual instruction in the performance and literature of an applied area other than the student's primary performance study. No jury examination is required. May be repeated for credit.

AP MUS 5440 Graduate Applied Music: 1 semester hour

Prerequisites: Graduate standing in music and consent of department. Concurrent registration in EN PER 5490 is required for students enrolled in the Graduate Certificate in Music Performance. Instruction is offered in the following areas: bassoon, clarinet, classical guitar, euphonium, flute, French horn, harp oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, violin, viola, violoncello, string bass and voice. May be repeated for credit.

Ensemble Performance Courses

EN PER 1400 University Chorus (MOTR PERF 102C): 1 semester hour

Prerequisite: Consent of instructor. Preparation and performance of choral literature.

EN PER 1410 The University Singers (MOTR PERF 102C): 1 semester hour

Prerequisite: Consent of instructor. The study and performance of music for vocal chamber ensemble.

EN PER 1420 University Concert Band (MOTR PERF 102B): 1 semester hour

Prerequisites: Consent of Instructor. Study, preparation, and performance of Music for Concert Band. This course is not intended to fulfill the ensemble requirement for music majors/minors.

EN PER 1430 Women's Choral: 1 semester hour

Prerequisites: Consent of department. Prepare a variety of choral music to be performed publicly during the semester. Singers will learn choral-style SSAA vocal music and principles of music performance. A wide variety of styles, eras, and genres of women's choral music will be performed by the singers, e.g., madrigals, contemporary and traditional classical music, multi-cultural and foreign language repertoire, jazz and popular selections. Members of the chorale may audition for solos, and smaller ensembles from the group may be featured within the concerts.

EN PER 1500 University Orchestra (MOTR PERF 102O): 1 semester hour

Prerequisite: Consent of instructor. Study, preparation and performance of orchestral repertoire.

EN PER 1520 University Symphonic Band (MOTR PERF 102B): 1 semester hour

Prerequisite: Consent of instructor. Study preparation and performance of music for the winds and percussion.

EN PER 1530 University Wind Ensemble: 1 semester hour

Prerequisite: Consent of instructor. Study, preparation, and performance of music for winds and percussion including the preparation and performance of various chamber ensembles for woodwinds and brass.

EN PER 1532 University Pep Band: 1 semester hour

Prerequisites: Consent of Department/Instructor. Study, preparation, and performance of music in diverse contemporary styles. Performances of the University Pep Band are primarily in conjunction with campus activities and athletic events.

EN PER 1541 Chamber Ensemble Brass: 1 semester hour

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

EN PER 1542 Jazz Combo: 1 semester hour

Prerequisite: Consent of instructor. Study, preparation and performance of music for small ensembles.

EN PER 1543 Chamber Ensemble Percussion: 1 semester hour

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

EN PER 1544 Chamber Ensemble Strings: 1 semester hour

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles: a) brass; b) jazz; c) percussion; d) string; e) voice; f) woodwinds.

EN PER 1545 Chamber Ensemble Voice: 1 semester hour

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

EN PER 1546 Chamber Ensemble Woodwinds: 1 semester hour

Prerequisite: Consent of department. Study, preparation and performance of music for small ensembles.

EN PER 1547 Chamber Ensemble New Music: 1 semester hour

The New Music Ensemble is an undergraduate ensemble that promotes and presents a broad range of new and contemporary music. Repertoire will feature solo, chamber and large ensemble works by living composers and those of the recent past. Part of the mission of this ensemble is to offer an outlet for composition majors to have their music performed.

EN PER 1550 Jazz Ensemble: 1 semester hour

Prerequisite: Consent of instructor. Study, preparation, and performance of jazz music for big band.

EN PER 1560 Opera Workshop: 1 semester hour

Prerequisite: Consent of instructor. Instruction in movement, basic stage techniques, technical theater, repertory and performance techniques and preparation. May be repeated for credit.

EN PER 2700 Seminar in Performance and Outreach: 1 semester hour

Prerequisites: Acceptance as a music major/minor and two semesters of applied music study or by consent on instructor. Instruction in developing performance repertoire and skills for community and educational outreach programming. Student presentations of these programs in community and educational venues required. Course may be repeated.

EN PER 4560 Advanced Opera Workshop: 1 semester hour

Prerequisite: Consent of instructor. Instruction in movement stage technique, technical theater, repertory and performance based on advanced vocal skills. May be repeated for credit.

EN PER 5310 Graduate Chamber Ensemble: 1 semester hour

Prerequisites: Graduate standing in music and consent of department. Study and performance of traditional and nontraditional chamber literature.

EN PER 5490 Graduate Ensemble: 1 semester hour

Prerequisites: Graduate standing in music or consent of department. Study, preparation, and performance of ensemble literature from the choral, orchestral, or band/wind ensemble repertory. May be repeated for a total of four hours of credit.

Music Education Courses

MUS ED 2770 An Introduction To Music For The Elementary School Teacher: 3 semester hours

Through hands-on experiences and classroom lessons, students will develop an understanding and appreciation of the basics of music in order to create and present lesson plans that utilize music as a tool for teaching elementary subjects. Students will also learn basic music instrumentation, comprehension of musical elements and terminology, and the ability to play simple treble clef melodies on classroom instruments, e.g., soprano recorders and xylophones.

MUS ED 3570 Curriculum and Methods of Teaching Elementary and Secondary General Music: 3 semester hours

Prerequisites: THRY COM 2311 and THRY COM 2312 and completion of Level I Education courses for the music education major. This course provides a study of the elementary and secondary school music curriculum emphasizing the objectives, methods of teaching and staffing music classes, and analysis of instructional materials and resources. Must be completed in residence.

MUS ED 3680 Curriculum and Methods of Teaching Instrumental Music: 3 semester hours

Prerequisites: THRY COM 2311, THRY COM 2312, PRACTM 2510, and MUS ED 3570. A study of the teaching techniques, materials, curriculum, and organization of the beginning instrumental music education program. Topics include student recruitment, the elementary band/orchestra, small group instruction, jazz ensemble, and marching band. This course must be completed in residence. Concurrent enrollment in MUS ED 3570 is required.

MUS ED 3700 Curriculum And Methods Of Teaching Instrumental Music II: 2 semester hours

Prerequisites: THRY COM 2311, THRY COM 2312, PRACTM 3521, MUS ED 3570, MUS ED 3680, Level I Education courses; (in addition, for brass, wind, and percussion students) PDGOGY 1250 and PDGOGY 1260; (in addition, for string students) PDGOGY 1270. A continuation of MUS ED 3680. Topics include large group rehearsal techniques, program development, administrative procedures, and evaluation. This course must be completed in residence.

MUS ED 3710 Curriculum and Methods of Teaching Choral Music: 3 semester hours

Prerequisites: THRY COM 2311, THRY COM 2312, MUS ED 3570, PRACTM 2180, and completion of Level I Education courses. A study of the following topics pertinent to an elementary and middle school choral music program: curriculum, methods of teaching techniques, organization, and administrative procedures for choral performance classes. This course must be completed in residence. Limited to music education majors.

MUS ED 4060 Advanced Workshop in Music Education: 1-5 semester hours

Prerequisites: Junior standing and consent of instructor. An intensive variable-topic workshop in Music Education presenting knowledge and skills to supplement specific areas in existing courses.

MUS ED 5060 Graduate Workshop in Music Education: 1-5 semester hours

Prerequisites: Graduate standing and consent of instructor. Intensive workshop in Music Education. Variable topics. To gain skills and knowledge in specific areas not readily available in existing courses.

MUS ED 5510 Graduate Instrumental Methods: 3 semester hours

Prerequisites: Graduate standing in music. Development of objectives for instrumental programs and methods of achieving those objectives. Comprehensive musicianship through instrumental performance, analysis of instrumental literature, instrumental philosophies and methodologies, rehearsal organization, and recent research in instrumental music education will be discussed.

MUS ED 5610 Graduate Choral Methods: 3 semester hours

Prerequisites: Graduate standing in music. Development of objectives for choral programs and methods of achieving those objectives. Comprehensive musicianship through choral performance, analysis of choral literature, the changing voice, choral philosophies and methodologies, rehearsal organization, and recent research in choral music education will be discussed.

MUS ED 5620 Guitar in the Classroom: 3 semester hours

Prerequisites: Graduate standing in music. A study of guitar instruction in grades 5-12 with a focus on curricular sequence that includes chords, strums and picking patterns essential for song accompaniment skill development. Current materials, suitable for upper elementary and secondary students will be explored.

MUS ED 5710 General Music: A Model for Multi-Faceted Learning: 3 semester hours

Prerequisite: Graduate standing in music. An exploration of the general music class as a learning laboratory model designed to actively engage the learner in a series of comprehensive music learning experiences. Emphasizes techniques and materials that will motivate the "non-performance oriented" student.

MUS ED 5750 Computer Applications in Music Education: 3 semester hours

Prerequisites: Graduate standing in music. An examination of the potential of computers in the music education field. Experiences with available hardware and software suitable for applications that include inventory, budget, music library cataloging, digital music synthesis, digital music recording and editing, music-related graphics and basic animation with music soundtracks.

MUS ED 5810 Foundations of Music Education: 3 semester hours

Prerequisite: Graduate standing in music. A study of the historical, philosophical, and psychological foundations of music education, includes principles necessary for development, implementation, and evaluation of total school music program.

MUS ED 5830 Contemporary Music Education: 3 semester hours

Prerequisite: Graduate standing in music. A study of recent trends and issues in music education.

MUS ED 5840 Teaching Music in an Urban Setting: 3 semester hours

Prerequisite: Graduate standing in music. An analysis of current practices, problems, trends, and research involved in developing strategies for the improvement of music programs in inner-city schools.

MUS ED 5910 Music Education Research: 3 semester hours

Prerequisite: Graduate standing in music. Applications of various approaches in defining and analyzing research problems in music education. Historical, experimental, descriptive, and philosophical research will be included.

MUS ED 5920 Psychology of Music: 3 semester hours

Prerequisite: MUS ED 5810 and MUS ED 5910. Identify and discuss important trends within the field of psychology of music focusing specifically on applying Cognitive Psychology to music learning, perception, and performance.

MUS ED 5950 Special Problems in Music Education: 1-3 semester hours

Prerequisite: Graduate Standing in music. Selected Problems to meet the needs of the individual student.

MUS ED 5990 Master's Project in Music Education: 3 semester hours

Prerequisite: Graduate standing in music. A project utilizing historical, experimental, philosophical, descriptive, or analytical research techniques. The project will include a written report.

Music History Courses

M H L T 1001 Introduction To Music (MOTR MUSC 100): 3 semester hours

An historically oriented study of art music, its styles and forms from the Baroque period to the present day. This course will not apply toward requirements for a music major.

M H L T 1003 History of Rock Music (MOTR MUSC 100RP): 3 semester hours

This course is a year-by-year review of the music, artists, composers, record producers, and others associated with rock 'n' roll from 1954 to the present with emphasis on the controversies surrounding this genre. The course will examine the artistry of rock music as well as its historical contexts and social implications.

M H L T 1010 History of Western Music I (MOTR MUSC 103): 3 semester hours

Prerequisite: THRY COM 1301/ THRY COM 1302 or consent of department. A general survey of the history of western music. Includes the evolution and development of styles, forms and their social setting. This course meets the General Education requirement for Humanities and Fine Arts Knowledge and Valuing Skills.

M H L T 1020 History of Western Music II (MOTR MUSC 104): 3 semester hours

Prerequisite: THRY COM 1301/THRY COM 1302 or consent of department. A continuation of M H L T 1010. This course meets the General Education requirements for the Humanities and Fine Arts Knowledge and Valuing Skills.

M H L T 1060 Introduction to African-American Music: 3 semester hours

This course will survey African-American musical heritage from its African origins through its role and development in twentieth century American Society. All genres will be discussed, including African-American composers who wrote in the European tradition. This course will not apply toward requirements for music major or minor.

M H L T 1070 Introduction to Jazz (MOTR MUSC 100J): 3 semester hours

A survey course which examines the musical, historical and social aspects of the subject. This course will not count toward requirements for a music major.

M H L T 1080 Introduction to Irish Traditional Music: 3 semester hours

Will survey the rich tapestry of Irish traditional music, song and dance. Particular attention will be given to the cultural history of the traditional music maker in Irish society, as well as among the constituent communities of the Irish diaspora in Europe and North America. Will introduce students to the instruments, performance settings and regional styles of Irish traditional music. Using field recordings and archive materials collected in Ireland and North America, will focus on celebrated folk performers of the past and present, and evaluate the impact of contemporary media on their ancient, yet evolving, musical genre. No prior experience of Irish traditional music is necessary to pursue this course.

M H L T 1090 Non-Western Music I: 3 semester hours

The music of Oceania; folk and classical music and dance of East Asia, Tibet and Southeast Asia, the influence of Buddhism, Islam and western acculturation on the functions of music in these societies.

M H L T 1120 The American Musical Film: 3 semester hours

This course is a survey of the American film genre. Emphasis on themes, conventions, audience relationships, cultural values, and the synthesis of film form, music and dance. Examination of films such as Top Hat, West Side Story, Chicago, An American in Paris.

M H L T 1130 Introduction to Music Theatre: 3 semester hours

A study of music theatre as an art form emphasizing the contributions of the playwright, composer, lyricist, actor, musician, dancer, choreographer, director, designer, and technicians. Major stylistic periods and dramatic forms will be covered. Students will learn about how music theatre functions as an art and an industry in today's world. Attendance at live theatrical performances and/or rehearsals will be required.

M H L T 1140 Popular Music in America: 3 semester hours

This course is designed as a survey of major genres of American popular music - Tin Pan Alley, musical theater, ragtime, blues, early and more popular phases of jazz, country, rock, pop, hip-hop, rap, etc. Included will be a broad spectrum of cultural and historical contexts, insight into the development of the music industry, study of significant artists, and understandings of the formal and stylistic components of the music.

M H L T 1150 Drumming Cultures of the World (MOTR MUSC 102): 3 semester hours

Drumming is one of the oldest forms of expression in the world and is prevalent on every continent. This course is designed as a survey of drumming throughout the world and the significance to the cultures therein. Included will be a broad spectrum of cultural and historical contexts, performance practices and hands on instruction. The major focus in this course will be the drumming practices of Africa, Asia, South America and the Caribbean. This course satisfies the cultural diversity requirement for the University.

M H L T 1160 Musical Journey through Latin America: 3 semester hours

Explore the diversity of this contagious music of the past and present, from the tango of Argentina, to salsa and meringue of the Caribbean, and from huayno of Amerindian cultures, to the marimba of Middle Latin America! This introduction to musical cultures of Latin America reveals the rich and wide range of musical forms, instruments, and styles that has influenced music on almost all parts of the globe today.

M H L T 1170 Musical Journey through the Far East: 3 semester hours

This class will explore the musical traditions and instruments of the countries of East Asia - China, Japan, and Korea. Much of the legendary founding of music and musical instruments originated on the Asian continent and transplanted along the Silk Road (trade routes from India, Persia and the Mediterranean) to the Far East. We will examine some of the world's most amazing sounds of the Orient.

M H L T 1180 Musical Journey Through Africa: 3 semester hours

This introduction to musical cultures of Africa provides a snapshot of African music south of the Sahara, or sub-Saharan Africa. We will explore the extraordinary rich and diverse musical traditions through the sounds and rhythms of its people. Highlights of the course include the introduction to a wide range of authentic musical instruments from Africa.

M H L T 1190 Musical Journey of the Native North American: 3 semester hours

This introduction to musical cultures of the Native American provides a snapshot of the aboriginal and modern day Native American in North America. We will explore the extraordinary rich and diverse musical traditions through the sounds and cultural practices of its people. Highlights of the course include the introduction to a wide range of authentic musical instruments of the Native American.

M H L T 4000 Directed Studies: 1-5 semester hours

Prerequisites: Consent of instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

M H L T 4220 Music of The Renaissance: 3 semester hours

Prerequisite: M H L T 1010 or consent of department. A study of the theoretical and practical impact of humanism on music, musicians, and musical thought from 1450 to 1600. Sacred and secular music; the rise of an instrumental idiom.

M H L T 4230 Music of The Baroque: 3 semester hours

Prerequisite: M H L T 1010 or consent of department. A detailed study of music from 1600 to 1750. The rise of the new style, national styles in the seventeenth century and the culmination of the Baroque period.

M H L T 4240 Music of The Classic Period: 3 semester hours

Prerequisite: M H L T 1020 or consent of department. A study of the growth of classical style; Galant and expressive styles; Mozart, Haydn and Beethoven.

M H L T 4250 Music of the Romantic Period: 3 semester hours

Prerequisite: M H L T 1020 or consent of department. Composers, forms and styles in nineteenth century music. The literary and social background of musical romanticism.

M H L T 4260 Music from 1900 to the Present: 3 semester hours

Prerequisite: M H L T 1020 or consent of department. A detailed study of trends in modern music and of influential composers; impressionism, serial composition, electronic music and other recent techniques.

M H L T 4270 A History of Byzantine Music and Hymnography: 3 semester hours

Prerequisite: M H L T 1020 or consent of department. A study of the liturgical and secular music of the Byzantine Empire and post-Byzantine period during the Ottoman occupation; a historical investigation of the Oriental and Ancient Greek origins of the music along with an evolution of the types of music and poetical forms. A study of the types of notation and transcription analyses from the Medieval neumes into Western staff notation is included.

M H L T 4280 American Music: 3 semester hours

Prerequisites: M H L T 1010 or M H L T 1020 or consent of department. A study of the history and literature of American music, its composers, performers and influences on American and world culture. Compositions studied include classical compositions from the colonial era through contemporary times as well as literature from the gospel, blues, jazz and popular music genres.

Music: Pedagogy Courses

PDGOGY 1250 Brass Techniques: 2 semester hours

Prerequisites: Consent of the department. The objective of this course is to familiarize students with materials and techniques for teaching all brass instruments including trumpet, horn, trombone, euphonium, and tuba in the school setting.

PDGOGY 1260 Woodwind Techniques: 2 semester hours

Prerequisites: Consent of the department. The objective of this course is to familiarize students with materials and techniques for teaching all woodwind instruments including flute, clarinet, oboe, bassoon, and saxophone in the school setting.

PDGOGY 1270 String Techniques: 2 semester hours

Prerequisites: Consent of the department. The objective of this course is to familiarize students with materials and techniques for teaching all string instruments including violin, viola, cello, and bass in the school setting.

PDGOGY 1280 Percussion Instrumental Techniques: 2 semester hours

Prerequisites: Consent of the department. The objective of this course is to familiarize students with materials and techniques for teaching all percussion instruments including snare drum, tom-tom, bass drum, cymbals, drumset, timpani, mallet instruments and miscellaneous percussion instruments in the school setting.

PDGOGY 1560 Piano Pedagogy: 2 semester hours

Prerequisite: Equivalent of AP MUS 1450 or permission of instructor. A study of methods, repertoire, and technical problems pertaining to private studio teaching for all levels of performance ability.

PDGOGY 2220 Jazz Pedagogy: 3 semester hours

Students will participate in interactive sessions that will "boost the jazz teaching chops" whether students are seasoned teachers or novices in the field of jazz education. A wide range of jazz teaching methods will be studied, including those that have been successful in the instructor's nationally recognized jazz camps. Lab groups will be formed for "hands on-minds on" teaching and learning. Students will experience jazz teaching techniques, examine jazz method series, listen to a variety of jazz styles, and examine and perform jazz literature from different styles.

PDGOGY 4000 Directed Study: Variable Topic: 1-5 semester hours

Prerequisites: Consent of instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

PDGOGY 5001 Studio Pedagogy: 1 semester hour

Prerequisites: Consent of the instructor and graduate standing required. In this class, typically supervised by the student's applied instructor, the student will focus on research of teaching techniques that apply specifically to the student's instrument or voice.

PDGOGY 5110 Graduate Jazz Pedagogy: 3 semester hours

Students will participate in interactive sessions that will dramatically strengthen jazz teaching strategies, introduce new jazz rehearsal techniques, and examine the best in jazz education literature and materials. A wide range of jazz-teaching methods will be studied, including those that have been successful in the instructor's nationally recognized jazz camps. Lab groups will be formed for "hands on-minds on" teaching and learning. Students will experience jazz teaching techniques, examine jazz method series, listen to a variety of jazz styles and examine and perform jazz literature from different styles. The course is for students who are seasoned teachers or novices in the field of jazz education. Student will complete a research paper or a big band arrangement.

Music: Practicum Courses

PRACTM 1140 Piano Proficiency I: 1 semester hour

Prerequisite: Permission of department. Group instruction for music majors who do not meet beginning keyboard requirements.

PRACTM 1150 Piano Proficiency II: 1 semester hour

Prerequisite: PRACTM 1140 or Consent of department. Group instruction for music majors who do not meet beginning keyboard requirements.

PRACTM 1250 Singer's Diction: English, Italian and German: 1 semester hour

Prerequisites: AP MUS 1459. A study of English, Italian and German pronunciation using the International Phonetic Alphabet.

PRACTM 1260 Singer's Diction: Latin, French, and Spanish: 1 semester hour

Prerequisites: AP MUS 1459. A study of Latin, French, and Spanish pronunciation using the International Phonetic Alphabet.

PRACTM 1530 Accompanying I: 1 semester hour

Prerequisite: Consent of department. Accompanying and ensemble practices, including rehearsal techniques, for keyboard majors. Public performance of works studied is required.

PRACTM 1540 Accompanying II: 1 semester hour

Prerequisite: Consent of department. A continuation of PRACTM 1530.

PRACTM 1550 Accompanying III: 1 semester hour

Prerequisite: Consent of department. A continuation of PRACTM 1540.

PRACTM 1570 Piano Performance Class: 2 semester hours

Prerequisites: Two semesters of AP MUS 1450: Piano. This class allows for additional study of repertoire, giving students greater opportunities to perform and receive critiques from instructor, adjudicators, and peers. Course may be repeated for credit.

PRACTM 2160 Piano Proficiency III: 1 semester hour

Prerequisite: PRACTM 1150 or permission of department. Continuation of piano proficiency study.

PRACTM 2170 Jazz Keyboard Harmony: 1 semester hour

Prerequisite: PRACTM 1150 or consent of department. Group keyboard instruction in the application of chordal structures and harmonic functions commonly used in mainstream jazz performance.

PRACTM 2180 Piano Proficiency IV: 1 semester hour

Prerequisite: PRACTM 2160 or consent of department. Continuation of piano proficiency study.

PRACTM 2190 Piano Jazz: 1 semester hour

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registrations in Jazz Ensemble (by audition) or Jazz Combo required.

PRACTM 2191 Brass Jazz: 1 semester hour

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

PRACTM 2192 Woodwind Jazz: 1 semester hour

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

PRACTM 2193 Rhythm Section Jazz: 1 semester hour

Prerequisites: By audition and consent of department. Class lessons emphasizing improvisation and jazz styles. Applicable to the minor in jazz studies only. May be repeated for credit. Concurrent registration in Jazz Ensemble (by audition) or Jazz Combo required.

PRACTM 2510 Conducting I: 2 semester hours

Prerequisite: THRY COM 2301. Concurrent registration in PRACTM 2610 required for Bachelor of Music in Music Education program. Techniques and problems in conducting.

PRACTM 2610 Instrumental Literature Laboratory: 1 semester hour

Prerequisites: THRY COM 2301 and THRY COM 2302. Analysis and evaluation of selected instructional and concert materials for elementary, junior and senior high school groups.

PRACTM 2611 Choral Literature Laboratory: 1 semester hour

Prerequisites: THRY COM 2301 and THRY COM 2302. This course focuses on the analysis and evaluation of selected instructional and concert materials for elementary and secondary grades.

PRACTM 3190 Piano Proficiency V: 1 semester hour

Prerequisite: PRACTM 2180 or consent of department. Continuation of piano proficiency study.

PRACTM 3280 Score Reading at the Keyboard: 1 semester hour

Prerequisites: PRACTM 3190, or consent of department. Practical experience in the keyboard realization of figured bass and score reading with emphasis on C-clefs, transposition, and modulation.

PRACTM 3290 Piano Proficiency VI: 1 semester hour

Prerequisite: PRACTM 3190 or consent of department. Continuation of piano proficiency study.

PRACTM 3521 Conducting II - Instrumental: 2 semester hours

Prerequisite: PRACTM 2510. Advanced study of instrumental conducting and rehearsal techniques, score reading and interpretation.

PRACTM 3522 Conducting II - Choral: 2 semester hours

Prerequisite: PRACTM 2510. Concurrent registration in PRACTM 3620 required for Bachelor of Music in Music Education program. Advanced study of choral conducting and rehearsal techniques, score reading and interpretation.

PRACTM 3920 Senior Research: 2-4 semester hours

Prerequisite: Consent of department. Required of all senior music majors. Directed readings and research in an area mutually acceptable to the student and instructor.

PRACTM 4000 Directed Studies: Variable Topic: 1-5 semester hours

Prerequisites: Consent of department. Directed independent study of selected topics in music. May be repeated, if topic is substantially different, but no more than 5 hours may be applied toward a degree.

PRACTM 4100 Senior Project in Theory/Composition: 2-4 semester hours

Prerequisites: Consent of department. Required of all students in the BM in Theory/Composition program. This project could take any number of forms, dependent upon mutual agreement between student and instructor. For example, a student with a focus in music theory would write a thesis of substantial depth on a theoretical/analytical topic, and a student with a focus in composition would either write a large-scale work (for orchestra, wind ensemble, etc.) or prepare and lead a recital of several of his or her own compositions.

PRACTM 4920 Internship: 1-3 semester hours

Prerequisite: Senior standing in B.M. Business emphasis and permission of the instructor. Supervised experience in the area of the student's career objective, as music or instrument merchandising, arts management, mass communication, publishing, manufacturing or other, as available. May be repeated once for credit in different area.

PRACTM 5001 Interacting with an Audience: 1 semester hour

Prerequisites: Consent of the instructor. This course provides students with techniques of addressing a general classical music audience in ways that are engaging, casual, informative, and that will ultimately enhance the audience's concert experience. The curriculum will include analysis of both live and video presentations, techniques to overcome fear and anxiety, and methodology to select and balance appropriate subject matter from a vast array of available information.

PRACTM 5002 Interdisciplinary Studies in Music: 1 semester hour

Prerequisites: Consent of the instructor. In this course, the student will learn to give effective presentations in interdisciplinary educational settings, based on their study of potential connections between aspects of music and the subject in question. The non-musical subjects involved will be chosen by the student in consultation with the instructor. The course will culminate in an interdisciplinary presentation in a collegiate non-music class on the UMSL campus.

PRACTM 5210 Graduate Conducting: 3 semester hours

Prerequisites: Graduate standing in music. Conducting techniques, score reading, and interpretation of choral, orchestral, and band literature.

Theory and Composition Courses

THRY COM 1190 Fundamentals of Music: 3 semester hours

This course provides basic music vocabulary: scales, intervals, and chords, and systematic instruction in the melodic, rhythmic, and harmonic aspects of music. This course will not apply toward requirements for a music major.

THRY COM 1300 Introduction to Music Theory: 1 semester hour

This course introduces the basic vocabulary of music notation and theory and rudimentary skills of ear training and sight singing. This course must be taken concurrently with THRY COM 1301, but may be waived on the basis of a successful score on the Theory Placement Exam.

THRY COM 1301 Theory of Music I: 3 semester hours

Prerequisite: Consent of department. This course introduces the basic materials of music as well as species counterpoint and diatonic harmony. Concurrent registration in THRY COM 1300 is required unless waived on the basis of a successful score on the Theory Placement Exam. Concurrent registration in THRY COM 1302 is required for music majors and minors.

THRY COM 1302 Aural Training I: 2 semester hours

Prerequisites: Consent of instructor. Systematic instruction in ear training and sight singing of all material covered in THRY COM 1301. Includes diatonic melodic and rhythmic dictation, chord quality recognition, sight singing of diatonic melodies, and the reading of units and divisions of units in simple and compound meters. Concurrent registration in THRY COM 1301 is required for music majors and minors.

THRY COM 1311 Theory of Music II: 3 semester hours

Prerequisite: THRY COM 1300, THRY COM 1301, and THRY COM 1302 or consent of department. This course continues the study of diatonic harmony begun in THRY COM 1301. Harmonic function, phrase structure, harmonic sequences, secondary dominants, and simple modulation. Concurrent registration in THRY COM 1312 is required for music majors and minors.

THRY COM 1312 Aural Training II: 2 semester hours

Prerequisite: THRY COM 1301 and THRY COM 1302 or consent of instructor. The systematic instruction in ear training and sight singing begun in THRY COM 1302 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 1311. Concurrent registration in THRY COM 1311 is required for music majors and minors.

THRY COM 2301 Theory of Music III: 3 semester hours

Prerequisite: THRY COM 1311 and THRY COM 1312 or consent of department. This course begins the study of chromatic harmony and form in music of the eighteenth and nineteenth centuries. Concurrent registration in THRY COM 2302 is required for music majors and minors.

THRY COM 2302 Aural Training III: 2 semester hours

Prerequisites: THRY COM 1311 and THRY COM 1312 or consent of instructor. Systematic instruction in ear training and sight singing of THRY COM 1312 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 2301. Concurrent registration in THRY COM 2301 is required for music majors and minors.

THRY COM 2311 Theory of Music IV: 3 semester hours

Prerequisites: THRY COM 2301 and THRY COM 2302 or consent of department. This course continues the study of chromatic harmony of late nineteenth-century music, as well as the analysis of larger musical forms. Additionally, this course focuses on developing the ability to communicate analytical observations effectively in both written and spoken formats. Concurrent enrollment in THRY COM 2312 is required for all music majors and minors.

THRY COM 2312 Aural Training IV: 2 semester hours

Prerequisite: THRY COM 2301 and THRY COM 2302 or consent of instructor. The systematic instruction in ear training and sight singing of THRY COM 2302 is continued. This course provides instruction in the performance and aural recognition of all musical devices introduced in THRY COM 2311. Concurrent enrollment in THRY COM 2311 is required for all music majors and minors.

THRY COM 3110 Analysis of Music from 1900 to Present: 2 semester hours

Prerequisite: THRY COM 2311 and THRY COM 2312 or consent of department. This course primarily provides a study of compositional devices in atonal and serial music since 1900.

THRY COM 3120 Tonal Counterpoint: 2 semester hours

Prerequisite: THRY COM 2311 and THRY COM 2312; or consent of department. Study of tonal counterpoint with emphasis on the eighteenth century style. Composition in two and three parts.

THRY COM 3130 Advanced Analytical Techniques: 2 semester hours

Prerequisites: THRY COM 2311 and THRY COM 2312. Close analysis, seminar discussion, and focused theoretical/analytical study of selected compositions. Repertoire studied changes from year to year at discretion of instructor.

THRY COM 3140 Readings in Music Theory: 2 semester hours

Prerequisites: THRY COM 2311 and THRY COM 2312. An introduction to the primary areas of research in the field of music theory. This seminar-style course will include readings and discussion of a number of important writings in music theoretical areas including, but not limited to the following: tonal theory, post-tonal theory, mathematics and music, music cognition, and the history of music theory.

THRY COM 3300 Seminar in Composition: 2 semester hours

Prerequisite: THRY COM 3110 or consent of instructor. The study of composition in theory and practice.

THRY COM 3310 Studio Composition: 1 semester hour

Prerequisites: THRY COM 2311 and THRY COM 2312, or consent of department. Individual lessons in music composition. Course may be repeated for credit.

THRY COM 3410 Orchestration: 3 semester hours

Prerequisite: THRY COM 2311 or consent of instructor. Study of the instruments of the brass, woodwind, percussion, and string families; scoring, transcription, and arranging for various instrumental ensembles.

THRY COM 3420 Choral Arranging: 2 semester hours

Prerequisites: THRY COM 2311 or consent of department. Study of vocal ranges, characteristics and capabilities at various ages and scoring for choral ensembles comprised of singers in these varying stages of vocal development.

THRY COM 4000 Directed Studies: Variable Topic: 1-5 semester hours

Prerequisites: Consent of instructor. Directed independent study of selected topics in music. May be repeated, but no more than 5 hours may be applied toward a degree.

THRY COM 5110 Scoring and Arranging: 3 semester hours

Prerequisite: Graduate Standing In Music. Experience in scoring and arranging music for a variety of ensembles.

Theatre and Cinema Arts

Effective Fall 2018, the Bachelor of Arts in Theatre Arts will no longer be accepting applications.

The Department of Theatre and Cinema Arts offers the Bachelor of Arts in Theatre Arts with four emphasis areas: Acting/Directing, Design, Playwriting/Screenwriting, and Cinema. UMSL Theatre and Cinema students have the opportunity to experience various performance and workshop spaces. Majors in our department progress through a comprehensive curriculum that embraces all the arts and crafts of theatre and cinema. The Department produces three to four main stage performances each year, including a full-length musical or opera. The Blanche M. Touhill Performing Arts Center is a state of the art performance facility on campus, built to provide a home for campus events, academic programs, and regional art organizations. The Departments newest performance space is the Kranzberg Arts Center located in the Theatre District of Grand Center, offering additional opportunities and exposure within St. Louis. Non-majors are welcome to enroll in Theatre courses; several of the courses satisfy general education requirements. Students in other disciplines may also elect to pursue a Minor in Theatre Arts. Auditions for each production are open to all majors at the University of Missouri - St. Louis.

For further information concerning the Department of Theatre and Cinema Arts, call 314-516-4572.

Effective Fall 2018, the Bachelor of Arts in Theatre Arts will no longer be accepting applications.

Bachelor of Arts in Theatre Arts

General Education Requirements

All Theatre Arts majors must satisfy the University and College of Arts and Sciences' 42-hour General Education (p. 41) core requirements, which include ENGL 1100 and the Math proficiency requirement.

Junior-level writing class is required.

The Cultural Diversity requirements may be satisfied by General Education (p. 41) courses or lower-or upper-level courses in various departments.

State Government/History graduation requirements may be satisfied by General Education (p. 41) courses or by other lower-or upper-level courses in various departments.

13 hours of a foreign language.

Degree Requirements

Theatre Arts majors must choose an emphasis area within the Department of Theatre and Cinema Arts. They may choose from the following options:

Acting/Directing, Design, Playwriting/Screenwriting, and Cinema. Each student must complete the required core courses as well as the requirements for each emphasis area. At least 24 hours in the major must be taken at UMSL and must include 6 hours at the 2000 or higher level and 9 hours at the 3000 or higher level. All courses required for the major must be completed with a minimum grade of C- to be accepted, and the overall total grade point average must be at least 2.0 to graduate. To be

eligible to participate in Internship classes, each student must have a minimum overall grade point average of 3.0

In addition to the major's required core curriculum and emphasis area requirements, all students must participate in the Department's productions through their required credit hours in practicum each semester.

Required Core Courses for all Theatre Arts Majors

THEATR 1070	Introduction to Cinema	3
THEATR 1210	Fundamentals Of Acting	3
THEATR 1800	Introduction To Theatre	3
THEATR 1900	Introduction To Theatre Technology	3
THEATR 1910	Introduction To Theatrical Design	3
Total Hours		15

Emphasis in Acting/Directing

In addition to the required Theatre Arts core curriculum, students must complete the following:

THEATR 1600	Voice Ad Diction/Vocal Performance	3
THEATR 2300	Stage Management	3
THEATR 2810	History Of World Theatre And Drama Through The Restoration	3
THEATR 2820	History Of World Theatre & Drama From 18Th C To Contemporary Time	3
THEATR 3257	Makeup For Theatrical Productions	2
THEATR 3399	Stage Combat	3
THEATR 4900	Senior Project	3
Select one of the following:		3
THEATR 2244	Introduction to Directing	
THEATR 2210	Ensemble Acting	
Select four of the following:		12
THEATR 2020	Acting for the Camera	
THEATR 2112	Scene Study	
THEATR 3210	Ensemble Acting	
THEATR 3211	Period Styles of Acting	
THEATR 3218	Shakespeare and Verse Acting	
THEATR 4020	Directing for the Camera	
THEATR 4220	Directing For The Theatre	
ENGL 4370	Shakespeare: Tragedies And Romances	
ENGL 4380	Shakespeare: Comedies And Histories	
Practicum ¹		16
THEATR 2195	Practicum In Performance Studies	
THEATR 3195	Advanced Practicum In Performance Studies	
Total Hours		51

¹ At least 8 hours must be at the 3000-level.

Emphasis in Design

In addition to required Theatre Arts core curriculum, students must complete the following:

THEATR 2810	History Of World Theatre And Drama Through The Restoration	3
THEATR 2820	History Of World Theatre & Drama From 18Th C To Contemporary Time	3
THEATR 2300	Stage Management	3
THEATR 4900	Senior Project	3
Select one of the following:		3
THEATR 2252	Costume Design I	
THEATR 3260	Digital Scenography	
THEATR 3261	Digital Lighting Design	
Select six of the following:		18
THEATR 2250	Scenic Fabrication	
THEATR 2260	Introduction To Theatrical Costume Production	
THEATR 2290	2D and 3D CAD for Live Performance	
THEATR 2800	History of Costumes	
THEATR 3250	Costume Crafts	
THEATR 3252	Costume Design II	
THEATR 3257	Makeup For Theatrical Productions	
THEATR 3263	Techniques in Scenic Finishes	
ST ART 1140	Drawing I	
ST ART 1142	Figure Drawing I	
ST ART 1180	Painting I	
Practicum ¹		16
THEATR 2196	Practicum In Scenery/Lighting/ Sound In Theatre Production	
THEATR 2197	Practicum In Costume	
THEATR 3196	Adv Theatre Practicum: Scenery/ Lighting/Sound In Theatre Produc	
THEATR 3197	Advanced Practicum In Costume	
Total Hours		49

¹ At least 8 hours must be at the 3000-level.

Emphasis in Playwriting/Screenwriting

In addition to the required Theatre Arts core curriculum, students must complete the following:

THEATR 3305	Writing For Performance	3
THEATR 2214	Screenwriting	3
THEATR 3362	Storytelling	3
THEATR 3380	Feature Film Screenwriting	
THEATR 4270	Feature Film Writing	3
THEATR 2112	Scene Study	3
THEATR 2244	Introduction to Directing	3
THEATR 2810	History Of World Theatre And Drama Through The Restoration	3

THEATR 2820	History Of World Theatre & Drama From 18Th C To Contemporary Time	3
THEATR 4900	Senior Project	3
Select two of the following:		6
ENGL 2040	Beginning Fiction Writing	
ENGL 3150	Feature Writing	
ENGL 4550	Novels into Films: The Nineteenth Century	
THEATR 2300	Stage Management	
Practicum ¹		10
THEATR 2195	Practicum In Performance Studies	
THEATR 3195	Advanced Practicum In Performance Studies	
Total Hours		43

¹ At least 5 hours must be completed at the 3000-level.

Emphasis in Cinema

In addition to required Theatre Arts core curriculum, students must complete the following:

THEATR 1080	Introduction to World Cinema	3
THEATR 2271	History Of American Film	3
THEATR 3070	International Cinema	3
Select two of the following:		6
THEATR 2272	Contemporary Cinema	
THEATR 2273	Survey of Film Genres	
THEATR 2274	African-American Cinema	
THEATR 3370	Documentary Film	
THEATR 4900	Senior Project	
Select five of the following:		15
MEDIA ST 1500	Entertainment Economics: The Movie Industry	
MEDIA ST 2113	Media Production I	
MEDIA ST 2210	Video Production I	
MEDIA ST 2211	Introduction To Digital Multimedia Production	
MEDIA ST 2225	Live Events Media	
THEATR 2270	Audio Recording for Live Production	
THEATR 2020	Acting for the Camera	
THEATR 4020	Directing for the Camera	
THEATR 4271	Feature Film Production	
THEATR 4272	Feature Film Post Production	
Practicum ¹		10
THEATR 2195	Practicum In Performance Studies	
THEATR 3195	Advanced Practicum In Performance Studies	
THEATR 4390	Theatre Internship	
Total Hours		40

¹ At least 5 hours must be completed at or above the 3000-level.

Minor in Theatre Arts

Students with other majors may choose to minor in Theatre Arts to complement their academic and career goals. The minor requires 21 hours of Theatre Arts courses, nine of which must be taken at UMSL. A minimum GPA of 2.0 is required in the minor.

A Minor in Theatre Arts consists of the following:

Select two of the following Performance related courses:		6
THEATR 1210	Fundamentals Of Acting	
THEATR 2112	Scene Study	
THEATR 2210	Ensemble Acting	
THEATR 3305	Writing For Performance	
THEATR 3211	Period Styles of Acting	
THEATR 4220	Directing For The Theatre	
Select one of the following Design/Technology related courses:		3
THEATR 2260	Introduction To Theatrical Costume Production	
THEATR 3260	Digital Scenography	
THEATR 2252	Costume Design I	
THEATR 3261	Digital Lighting Design	
Select one of the following Production related courses:		3
THEATR 1060	Theatre Workshop	
THEATR 1900	Introduction To Theatre Technology	
THEATR 2260	Introduction To Theatrical Costume Production	
THEATR 3060	Advanced Theatre Workshop	
Select one of the following Practicum courses:		3
THEATR 2195	Practicum In Performance Studies	
THEATR 2196	Practicum In Scenery/Lighting/Sound In Theatre Production	
THEATR 2197	Practicum In Costume	
THEATR 3195	Advanced Practicum In Performance Studies	
THEATR 3196	Adv Theatre Practicum: Scenery/Lighting/Sound In Theatre Produc	
Production:		
THEATR 3197	Advanced Practicum In Costume	
Select two from the following:		6
THEATR 1080	Introduction to World Cinema	
THEATR/MEDIA ST 1070	Introduction to Cinema	
THEATR 2214	Screenwriting	
THEATR 2271	History Of American Film	
THEATR 3305	Writing For Performance	
Total Hours		21

The On-line Certificate Program in Film Studies

The On-line Certificate Program in Film Studies is open to all St. Louis campus undergraduate and graduate students, as well as to graduates of UM-St. Louis and other colleges and universities.

To receive a Film Studies Certificate, a student must complete the required courses (18 credit hours) with an average grade of C or better.

None of the courses may be taken on a satisfactory/unsatisfactory basis. Up to six credit hours of course work may be transferred from other institutions.

Required

THEATR 1080	Introduction to World Cinema	3
THEATR 2271	History Of American Film	3
THEATR 2273	Survey of Film Genres	3

Electives

Select three of the following:		9
THEATR/MEDIA ST 1070	Introduction to Cinema	
THEATR 2214	Screenwriting	
THEATR 2272	Contemporary Cinema	
THEATR 2275	Introduction To International Cinema	
THEATR 3070	International Cinema	
THEATR 3370	Documentary Film

Courses

THEATR 1010 Hip Hop Dance: 3 semester hours
This course will focus on the foundations and techniques of Hip Hop dance styles. Through the introduction of foundational vocabularies of specific dances and their social and cultural contexts, students will develop proficiency in a few core techniques.

THEATR 1023 Fundamentals of Dance: 3 semester hours
This course provides an introductory exploration of movement through various styles of dance, emphasizing movement vocabulary, stretching, strengthening, body alignment, and creative expression. Prior dance experience is not required. Dance attire and shoes will be required.

THEATR 1060 Theatre Workshop: 1-2 semester hours
Prerequisites: THEATR 1900 and Consent of Instructor. Course provides practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

THEATR 1070 Introduction to Cinema: 3 semester hours
Same As MEDIA ST 1070. This course provides an overview of American cinema from the early beginnings of D.W. Griffith and his contemporaries to the present day. The course will discuss both the Hollywood studio system and today's independent movement. Genre, film theory, criticism, and aesthetics are also covered.

THEATR 1080 Introduction to World Cinema: 3 semester hours
An introduction to the history, rhetoric, and aesthetics of world cinema. International film theory and criticism will be studied as well as major genres, authors, and artists.

THEATR 1210 Fundamentals Of Acting: 3 semester hours

This course explores oral and physical communication skills through the development of vocal, physical, and emotional techniques for the beginning actor, including relaxation, concentration, improvisation, analysis, characterization, and scene work.

THEATR 1600 Voice Ad Diction/Vocal Performance: 3 semester hours

This course promotes development of clear, distinct enunciation and correct pronunciation for mass media communication, public address, theatre, and oral interpretation. It also includes development of oral-presentational and self promotional skills for voice acting/voice-over in contemporary theatre and media.

THEATR 1800 Introduction to Theatre (MOTR THEA 100A): 3 semester hours

A study of Theatre as an art form, emphasizing the audience's appreciation of the art of the playwright, actor, director, designers, and technicians. Major periods, genres, and dramatic forms from classical to modern to the avant garde as well as performance art will be covered. Students will attend performances and learn about how theatre functions as an art and an industry in today's world. Attendance at several live theatrical (theatre, play, musical, opera, and dance) performances, will be required.

THEATR 1850 Introduction to Non-Western Theatre: 3 semester hours

Survey of theatre forms of the non-European world in which primary attention is concentrated on analysis of traditional dance drama and puppet theatres of East Asia, South Asia, the Middle East and Africa. Similiar forms of European theatre will be included for comparative purposes. Focus on the development of world theatre from a visual point of view, from earliest storytelling rituals through international stage development to contemporary theatrical forms, with a view to understanding the global perspective. Course will survey visual media and writings on dance and theatre traditions found around the non-Western World. (Satisfies the Cultural Diversity requirement).

THEATR 1900 Introduction to Theatre Technology: 3 semester hours

Introductory course covering the basic theories and techniques of theatre technology including stage equipment and safety, scenery, lighting, costuming, properties, sound and box office. Course includes practical application through a minimum of 25 hours of lab work in conjunction with a departmental production.

THEATR 1910 Introduction to Theatrical Design: 3 semester hours

Prerequisites: THEATR 1900 or consent of instructor. Introductory course covering the elements and principles of design in the areas of scenery, lighting, and costumes. Course will include various creative projects in two and three dimensions. Some graphic materials will be required.

THEATR 2020 Acting for the Camera: 3 semester hours

An acting course that prepares the actor for work in front of a camera. Working with broadcast quality cameras, students will learn the art of language and expression. Students will learn the art and skill of communicating to an audience. Students also acquire the skills for working with other actors on camera, close-ups, working with props, continuity and hitting your mark.

THEATR 2112 Scene Study: 3 semester hours

This course focuses on actor-training methodologies of Stanislavsky and other text-based approaches. Increases understanding of psychological motivation, concentration, focus of attention and clarity of physical expressiveness. Students prepare and present a minimum of three scenes.

THEATR 2195 Practicum in Performance Studies: 1-3 semester hours

Prerequisite: Consent of instructor. Provides practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

THEATR 2196 Practicum in Scenery/Lighting/Sound in Theatre Production: 1-3 semester hours

Prerequisites: THEATR 1900 and Consent of Instructor. Course provides practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions or other approved independent study projects. Running crew work will involve evening, weekend and daytime hours according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

THEATR 2197 Practicum in Costume: 1-3 semester hours

Practicum in costume construction, cutting, draping, millinery, fabric dyeing/painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime lab hours, occasional weekend and/or evening laboratory time will be required. Appropriate clothing, personal safety and sewing equipment will be required. Course may be repeated for up to 8 credit hours.

THEATR 2210 Ensemble Acting: 3 semester hours

Prerequisites: THEATR 1210. A Laboratory acting course providing an "outside-in" starting point for theatrical creation and study, balancing and countering the "inside-out" approach of Stanislavsky-based actor training. Emphasis is paid to ensemble creations, physical characterization, cooperative methods and object performance. May involve practices and theories of Jerzy Grotowski, Augusto Boal, Jacques Lecoq, and/or Tadashi Suzuki.

THEATR 2214 Screenwriting: 3 semester hours

Prerequisites: THEATR 1070 or consent of the department. Writing fiction film narratives with particular emphasis on plot structure, theme, and character development.

THEATR 2241 Argumentation and Debate: 3 semester hours

Prerequisite: COMM 1040, or COMM 1041, or consent of instructor. Principles of argumentation and debate with practice in preparing briefs and in delivering spoken arguments in formal debate. Emphasis on analysis of issues, logical reasoning, and audience analysis.

THEATR 2244 Introduction to Directing: 3 semester hours

Prerequisite: TH DAN 2105. An overview of the analytical and creative processes that inform the director's work. Students engage in a close examination of texts, key concepts, and directorial choices in staged performances, opera, films, and video. Students will learn how to articulate responses to theatrical/film work, create and present projects, understand the history and role of the director, and unlock the imagination as an interpretive artist.

THEATR 2250 Scenic Fabrication: 3 semester hours

Prerequisites: THEATR 1900 or consent of instructor. A survey of the theories, terminology, and practices of professional methods and equipment of scenic and properties fabrication, painting, and rigging. Students will learn current professional techniques in wood, metal, and plastic fabrication including the operation and programming of CNC production machinery. Course includes practical application through 45 hours of lab work in conjunction with department productions. Personal safety equipment will be required.

THEATR 2252 Costume Design I: 3 semester hours

Prerequisites: THEATR 1910 or consent of the instructor. Introduces students to the costume design process including researching costumes, techniques in rendering and painting for costume design, required paperwork for the costume designer, and the understanding of fabrics. Students will use introductory skills to create practical costume design projects.

THEATR 2260 Introduction to Theatrical Costume Production: 3 semester hours

A survey of the theory, practices and vocabulary of theatrical costuming; the visualization and realization of the costume through the arts of pattern cutting; the construction techniques; draping; dyeing, painting, and distressing. Course includes practical application of techniques through required 45 hours of lab work in conjunction with current department productions.

THEATR 2270 Audio Recording for Live Production: 3 semester hours

Prerequisites: THEATR 1900 or consent of instructor. This course is intended to provide an introduction to audio systems. It will include exposure to waveforms and the physical qualities of sound, as well as audio signal flow in analog and digital systems. The course is also an introduction to acoustics, both indoors and out, microphone theory and proper use, design and placement of speakers, microphones and audio recording equipment.

THEATR 2271 History of American Film: 3 semester hours

Prerequisites: THEATR 1070 or MEDIA ST 1070; or consent of the instructor. This course explores the history of American film from the late nineteenth century to the present.

THEATR 2272 Contemporary Cinema: 3 semester hours

Prerequisites: THEATR 1070 or MEDIA ST 1070; or consent of instructor. This course explores the history of World Cinema from the 1940s to the present day.

THEATR 2273 Survey of Film Genres: 3 semester hours

Prerequisites: THEATR 1080 or MEDIA ST 1070; or consent of instructor. This course explores the historical and aesthetic significance of film varieties. Analysis of genres may include the western, horror, science fiction, musical, detective, war, romantic comedy, and other films by type.

THEATR 2274 African-American Cinema: 3 semester hours

Prerequisites: THEATR 1070 or MEDIA ST 1070; or equivalent. This course studies the impact of cinema and the entertainment industry on the social perceptions of African-Americans and on African-American culture. The history of African-American films from Oscar Micheaux in the 1920's through 1970's Blaxploitation to present directors and producers will be examined. African-American experiences and roles in films will also be discussed.

THEATR 2290 2D and 3D CAD for Live Performance: 3 semester hours

Prerequisites: THEATR 1900 or consent of instructor. Survey course covering the fundamental techniques of two- and three-dimensional computer aided drafting and rendering.

THEATR 2300 Stage Management: 3 semester hours

Prerequisite: Consent of instructor. Course develops fundamental stage management skills needed to supervise all operative aspects of play production from auditions through performance. These skills include: interpersonal and leadership skills, conflict resolution techniques, venue and staff management/scheduling, and technical script analysis. Course includes production experience.

THEATR 2800 History of Costumes: 3 semester hours

Prerequisites: THEATR 1800 or consent of instructor. Survey of the Western history of costumes through the cultural, historical, and political influences on fashion from primitive times to the present.

THEATR 2810 History of World Theatre and Drama Through the Restoration: 3 semester hours

Prerequisites: THEATR 1800 or consent of instructor. Survey of the history of influence of different cultures, traditions, and technologies on development of theatre as a social institution. History of Theatre and drama from ancient cultures to the Restoration period. Ritual and religious drama. Study of the origins of theatre and drama from oral tradition, myth, storytelling, Shamanism and collective ritual, Greek festival drama, and cloister drama of different cultures. Rise of secular drama, the traditions of classical Greek theatre. Study of the Renaissance, and drama in Europe, Asia, Africa, and the New World.

THEATR 2820 History Of World Theatre & Drama from 18Th C To Contemporary Time: 3 semester hours

Prerequisites: THEATR 1800 or consent of instructor. History of theatre from 18th century to contemporary times. Survey of history of influence of different cultures, traditions, and technologies on the development of theatre as a social institution. Study of realism and subsequent departures from realism in theatre, drama and performance.

THEATR 3060 Advanced Theatre Workshop: 1-2 semester hours

Prerequisites: THEATR 1060, THEATR 1900 and Consent of instructor. Practical application of technical theatre practices through 45 hours of lab work within the areas of scenery, lighting, properties, and sound in conjunction with departmental productions. Personal safety equipment and basic tools will be required. Course may be repeated for up to 8 credit hours.

THEATR 3070 International Cinema: 3 semester hours

Prerequisites: THEATR 1070 or MEDIA ST 1070. This course promotes an understanding of the art and history of international cinema and helps students to better understand film and filmmakers' intentions as well as the culture in which the film was produced. Films from Europe, Asia, South America, Africa and Australia will be examined. The artistic, technical, historical and social significance of these films, as well as their impact upon American cinema, will also be studied.

THEATR 3195 Advanced Practicum in Performance Studies: 1-3 semester hours

Prerequisite: Consent of instructor. Course provides advanced practical experience in acting, directing, or dramaturgy through rehearsal and performance in conjunction with department productions, or other approved independent study projects. Laboratory time will be scheduled and may include evening and weekend rehearsals and performances. Course may be repeated for up to 8 credit hours.

THEATR 3196 Adv Theatre Practicum: Scenery/Lighting/Sound in Theatre Produc: 1-3 semester hours

Prerequisite: Consent of instructor. Course provides advanced practical experience in scenery, lighting, sound, and properties implementation and/or running crew work in conjunction with departmental productions, or other approved independent study projects. Running crew work may involve evening and weekend assigned times. Additional daytime hours will vary according to assignment. Credit hours are determined based on the scope of the project. Course may be repeated for up to 6 credit hours.

THEATR 3197 Advanced Practicum in Costume: 1-3 semester hours

This course provides advanced practical experience in costume construction, cutting, draping, millinery, fabric dyeing/ painting, distressing, crafts including wardrobe and makeup running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects. In addition to daytime Lab hours, occasional weekend and/or evening laboratory time may be required. Appropriate clothing and personal safety equipment will be required. Personal equipment will be required. Course may be repeated for up to 8 credit hours.

THEATR 3211 Period Styles of Acting: 3 semester hours

Prerequisites: THEATR 1210, THEATR 2210. The course will expose students to the rigorous analytical, physical, intellectual, and vocal demands of acting within a specific historical period. Students will focus on monologue and scene study from the following: Greek Tragedy, Spanish Golden Age, Elizabethan Theatre, Restoration Comedy, Italian Commedia, French Farce, and British comedy of Manners with a special focus on style distinctions between each.

THEATR 3218 Shakespeare and Verse Acting: 3 semester hours

Prerequisites: THEATR 1210, THEATR 2210. An intermediate acting course designed to engage students in Shakespeare's dramatic works from the point of view of the actor. Through text analysis, scene study, vocal work, and acting exercises, students explore the meaning, music and theatrical power of Shakespeare and other playwrights. Topics explored include: blank verse acting, line breath support, scansion, phrasing, word emphasis, antithesis, and imagery.

THEATR 3230 Aesthetics of Theatrical Styles: 3 semester hours

Prerequisite: THEATR 1230. Analysis of the development of dramatic and artistic styles as they affect the visual presentation of ideas in theatre.

THEATR 3240 Movement For Musical Theatre: 3 semester hours

Prerequisite: THEATR 2240 or consent of instructor. Specialized training in movement and dance techniques for musical theatre.

THEATR 3250 Costume Crafts: 3 semester hours

Prerequisites: THEATR 2260 or Consent of the Instructor. Develop the skills and techniques needed to execute crafts used in costume design including millinery, mask making, fabric painting and dyeing, wig manipulation, armor, and other craft work. Course may be repeated for up to 6 credit hours.

THEATR 3252 Costume Design II: 3 semester hours

Prerequisites: THEATR 2252 and THEATR 2260, or consent of instructor. Content of course includes study of theories, styles, visualization of ideas, and techniques of costume design; discussion of principles of design, script analysis, the collaborative roles of designers in the theatrical production; research, and exploration of character representation; study of the human figure, drawing, and rendering techniques.

THEATR 3254 Costume Production and Construction Techniques: 3 semester hours

Prerequisites: TH DAN 1900, TH DAN 2260 or Consent of instructor. Study of theory and application of pattern making, fitting, construction techniques for costumes and undergarments to achieve authentic-appearing costumes using contemporary methods. Provides practical experience in costume construction, as well as wardrobe and makeup. Participation in running crews, in conjunction with the theatre and dance department productions, or other approved independent study projects may be required. Personal equipment will be required. Weekend and evenings may be required. Appropriate clothing and personal safety equipment required. Course may be repeated for up to 8 credit hours.

THEATR 3257 Makeup for Theatrical Productions: 2 semester hours

Prerequisites: THEATR 1800, THEATR 1910, or consent of instructor. The art of makeup and its relation to production. Overview of European history and tradition of makeup. Theory, history and the practice of makeup traditions for theatre, dance and performance will be included.

THEATR 3260 Digital Scenography: 3 semester hours

Prerequisites: THEATR 1900, THEATR 1910, THEATR 2250, THEATR 2290, or consent of instructor. Survey of the professional theories and practices of scenography for live performances. This course emphasizes a digital creative process including digital sketches, CAD, three-dimensional modeling, digital rendering, and collaboration.

THEATR 3261 Digital Lighting Design: 3 semester hours

Prerequisites: THEATR 1900, THEATR 1910, THEATR 2280, or consent of instructor. Survey of the theories and techniques of digital lighting design and 3D visualization for live performance. This course will emphasize current and emerging digital design practices used by professional lighting designers including 3D visualization, CAD, software-based paperwork creation and management, and collaboration in the digital age.

THEATR 3263 Techniques in Scenic Finishes: 3 semester hours

Prerequisites: THEATR 1900, THEATR 1910, or consent of instructor. Survey of theories, materials, and professional techniques used in finishing fabricated scenery. This course will focus on traditional scenic painting, faux finishing techniques, digital graphics production and application, and design and production of digitally printed and cut drops. Course includes practical application through 45 hours of lab work in conjunction with departmental productions and class projects.

THEATR 3305 Writing for Performance: 3 semester hours

Prerequisite: Consent of instructor. Introduction to writing for performance, including playwriting and dramatic adaptation. Students' particular interests will determine course content: ranging from sketch comedy or adaptation of literature for the stage, to full-length comic or dramatic plays. This course is writing intensive and may require additional laboratory hours.

THEATR 3362 Storytelling: 3 semester hours

Prerequisites: Junior standing or consent of instructor. This course gives an overview of the history of storytelling, types of tales, and appropriate uses for storytelling. The primary emphasis of the course is in developing storytelling skills through preparation, performances, and evaluation.

THEATR 3370 Documentary Film: 3 semester hours

Prerequisites: THEATR 1070 or MEDIA ST 1070. This course considers the history, theory, and criticism of nonfiction film and includes screening of representative documentary films.

THEATR 3380 Feature Film Screenwriting: 3 semester hours

This course involves a careful examination and execution of the art and craft of feature film screenwriting from concept through completion and marketing. Students will learn aspects of proper screenplay format, developing dramatic characters, theme, and plot, with emphasis on visual storytelling.

THEATR 3399 Stage Combat: 3 semester hours

Prerequisites: Junior or Senior standing, or consent of instructor. This is a movement course designed to expand the acting student's awareness of the body as a vehicle for the communication of emotion, action, and drama on the stage. It will introduce the skills and techniques necessary for the creation of safe and effective illusions of violence for the stage.

THEATR 3610 Readers Theatre: 3 semester hours

Prerequisite: COMM 1160. Study of the oral interpretation of literature as a theatrical experience. Study of theory, techniques, and performance.

THEATR 3810 Theatre from Tte Ancient Greeks to the Restoration: 3 semester hours

Prerequisite: THEATR 1800 or consent of instructor. History of theatre and drama from Classical Greek to the Restoration period.

THEATR 4020 Directing for the Camera: 3 semester hours

Prerequisites: THEATR 2020. This directing course prepares the student director to work with both the actors and the cinematographer to achieve the directorial concept. The director will work with actors and a cinematographer to produce a short-length film/video from a prepared script. The creation of shooting scripts, story boards, and a shooting schedule are covered in the course.

THEATR 4040 Special Topics in Theatre: 1-6 semester hours

Prerequisites: Junior, Senior, or consent of instructor. Special topics with subject matter dealing with current issues (theoretical or applied) in the discipline of Theatre. Course may be repeated for up to 12 credit hours, provided the topic is different.

THEATR 4220 Directing for the Theatre: 3 semester hours

Prerequisites: THEATR 1210 or consent of instructor. A survey of the theories and practices of theatrical directing, beginning with the theories and techniques of accomplished directors. The stage director's role in performance development will be studied through script analysis, production planning, and the rehearsal process, culminating with a live performance. Final projects are laboratory scenes or a short one-act play.

THEATR 4261 Advanced Projects in Design and Technology: 1-3 semester hours

Prerequisites: THEATR 1910 and consent of instructor. Provides opportunities for supervised advanced projects in theatre design or technology in conjunction with departmental productions, or other independent study projects. Credit assigned based on scope of project. Course may be repeated for up to 6 credit hours.

THEATR 4270 Feature Film Writing: 3 semester hours

Prerequisites: THEATR 1070 or MEDIA ST 1070; or consent of instructor. This course will include story conceptualization, development, and drafting a feature film script ready for production. Characterization, dramatic structure, thematic subtext, and visual storytelling will be emphasized.

THEATR 4271 Feature Film Production: 3 semester hours

Prerequisites: MEDIA ST 2210 or consent of Instructor. This course will emphasize production techniques applicable to a wide variety of audio, film, and video-based media. Students will be involved in feature film production assignments on location in addition to regularly scheduled classes.

THEATR 4272 Feature Film Post Production: 3 semester hours

Prerequisites: MEDIA ST 2210 or consent of instructor. This course will provide instruction in editing techniques and motivation, as well as continuity, rhythmic, graphic, and temporal editing principles. Students will work on feature film segments in addition to regularly scheduled classes.

THEATR 4390 Theatre Internship: 1-3 semester hours

Prerequisites: Junior level with consent of instructor. Provides opportunities for supervised projects in conjunction with off-campus professional theatre and/or dance companies in performance, management, design or technology. Credit based on scope of assignment. Course may be repeated for up to 6 credit hours.

THEATR 4392 Administration of Co-Curricular Activities: 3 semester hours

Prerequisites: Junior Standing or consent of instructor. A survey of skills required to administer the various co-curricular activities associated with teachers in the secondary schools, such as theatre performances and mass media centers.

THEATR 4886 The Curriculum and Methods of Teaching Speech and Theatre: 3 semester hours

Same as SEC ED 4886. Prerequisites: TCH ED 3310 or TCH ED 5310; students must be within three hours of completing a major in either Communication or Theatre, with 15-18 hours completed in the other subject area. A study in the scope and sequence of the Speech and Theatre courses in the school curriculum with emphasis on the selection and organization of materials and methods of instruction and evaluation. The course prepares students for reflective teaching by relating course readings to field experience and theory to practice. To be taken prior to student teaching and concurrently with SEC ED 4989: Secondary Professional Internship. This course must be completed in residence. Not available for graduate credit.

THEATR 4900 Senior Project: 3 semester hours

The capstone experience requires seniors to produce an original research project, a representative portfolio, or an intrinsic case study, which exemplifies their undergraduate study. Students will present their work to the instructor supervising the course, as well as program related-faculty.

College of Business Administration

College of Business Administration Home Page (<http://www.umsi.edu/divisions/business>)

History

The University of Missouri-St. Louis College of Business Administration was established in 1967 and earned accreditation by the Association to Advance Collegiate Schools of Business (AACSB) six years later, the shortest time on record for any school. Nearly 50 years since the inception of our College, UMSL Business is proud to remain accredited in both business and accounting by AACSB, the only internationally recognized accrediting agency for business and accounting programs.

Vision

The College of Business Administration at UMSL provides research- and practice-based programs that prepare students to enter and succeed locally and globally across a wide range of business professions. We offer quality, value, and access.

Mission

- Prepare undergraduate and graduate business students for professional success in technically sophisticated local and global organizations.
- Incorporate best-business-practice and current academic theory into all of our educational programs (certificates and degrees).
- Explore, develop, and adopt new and better teaching methods.
- Perform basic and applied research that advances knowledge and supports the understanding and efficiency of business activities, addresses needs of our business community, and promotes learning of our students.
- Fully engage with the St. Louis business community in order to meet their workforce needs, support the professional development of their employees, exploit the talent and experience of their managers, and develop mutually beneficial partnerships that serve our college's instructional and research goals (guest speaker, internships, scholarships, sponsored research, and endowed chairs).
- Help our university fulfill its strategic plan by increasing retention, reducing time to graduation, increasing the number of graduates, garnering more financial and non-financial aid of our alumni, expanding online offerings, and pursuing more interdisciplinary collaborations.

Values

Opportunity: We are committed to providing students an opportunity to excel in a rigorous academic business program.

Knowledge: We value the creation, application, and communication of knowledge to advance business disciplines and improve management practices.

Access: We strive to ensure that our programs are accessible and consistent with the land-grant mission of the University of Missouri.

Integrity: We value high standards of professional and ethical conduct.

Excellence: We strive for excellence in our own endeavors and expect it of those with whom we work.

Community: We value our ties with the business and not-for-profit communities, and work to create opportunities of mutual benefits.

Respect: We endeavor to treat all people with dignity and respect, and to maintain fairness in our interactions with all students, employees and the community.

Diversity: We seek to maintain a diverse and involved community of students, faculty, and staff.

Collegiality: We seek to provide a collegial climate that fosters positive relationships among students, faculty and staff.

College of Business Administration Programs

Undergraduate Degrees

- Bachelor of Science in Accounting
- Bachelor of Science in Business Administration (with emphasis areas available in)
 - Finance
 - International Business
 - Supply Chain Management
 - Management
 - Marketing
- Bachelor of Science in Information Systems

Undergraduate Minors

- Accounting
- Cybersecurity
- Digital Marketing Communications
- Finance
- General Business
- Information Systems
- International Business
- Supply Chain Management
- Management
- Marketing
- Transportation Studies

Undergraduate Certificate

- Cybersecurity Certificate
- International Business Certificate (see International Studies)
- Post-Baccalaureate Certificate in Accounting

Graduate Degrees

- Master of Accounting
- Master of Business Administration
 - Accounting
 - Finance
 - Information Systems
 - International Business
 - Logistics and Supply Chain Management
 - Management

- Marketing
- Operations Management
- Master of Science in Information Systems
- Ph.D. in Business Administration
 - Logistics and Supply Chain Management

Graduate Certificates

- Graduate Certificate Program in Business Administration
- Graduate Certificate in Business Intelligence
- Graduate Certificate in Cybersecurity
- Graduate Certificate in Digital and Social Media Marketing
- Graduate Certificate in Human Resources Management
- Graduate Certificate in Logistics and Supply Chain Management
- Graduate Certificate in Marketing Management

Undergraduate Study

Detailed information concerning all degree requirements can be found by visiting The College of Business Undergraduate Advising web site (http://www.umsl.edu/divisions/business/undergrad_advising).

Admission Requirements

Students entering UMSL may declare themselves as business majors in the College of Business Administration (COBA). They are advised by business and may take business courses as long as they maintain “good standing” status (see General Degree Requirements listed below) and have satisfied the prerequisites for the courses they propose to take.

General Degree Requirements-all degrees-all students

- Students must complete a minimum of 120 credit hours for any baccalaureate degree from the College of Business Administration.
- Students must complete a minimum of 60 non-business hours.
- Students must complete a minimum of 48 hours in business courses.
- Students must complete a minimum of 36 hours of upper division business courses.
- Students are limited to a maximum of 24 credit hours in any single business discipline beyond core courses.
- Students are limited to a maximum of 78 credit hours in business and economics combined within 120 hours.
- Students must attain a minimum campus grade point average of 2.3. Grade modification may be used in calculating this grade point average.
- Students must attain a minimum business grade point average of 2.3. Grade modification may be used in calculating this grade point average.
- Students seeking an emphasis area or major within the Bachelor of Science in Business Administration degree, Bachelor of Science in Accounting degree, and/or Bachelor of Science in Information Systems degree must attain a minimum grade point average of 2.3 in the emphasis/major. Grade modification may be used in calculating this grade point average.
- A minimum grade of C- is required for each course in the business core (except MGMT 4219); for each course which serves as a prerequisite for another course; and for each course in an emphasis area and/or major.

- Of the maximum of 18 hours which may be taken on a satisfactory/unsatisfactory graded basis, only 9 hours can be in business, and those are restricted to electives—courses beyond the required business core courses.
- Business course prerequisites are enforced by the College of Business Administration and include a minimum campus grade point average of 2.0 as a condition for taking any upper division business course.
- Emphasis areas may be added for up to two years following degree completion. Each additional degree from the College of Business Administration requires 15 unique hours taken at UMSL subsequent to completion of the prior business degree.
- Students are allowed to take a maximum of 9 hours of upper-division business classes before a “good standing” evaluation is applied to their academic records. In order to remain in good standing and continue to enroll in upper division business courses, students must maintain a 2.3 campus and business grade point average and must have completed the following cluster of courses (with a grade of C- or higher):

ACCTNG 2400	Fundamentals of Financial Accounting	3
ACCTNG 2410	Managerial Accounting	3
BUS AD 2900	Legal Environment Of Business	3
ECON 1001	Principles of Microeconomics	3
ECON 1002	Principles of Macroeconomics	3
INFSYS 2800	Information Systems Concepts and Applications	3
MATH 1030	College Algebra	3
MATH 1100	Basic Calculus	3
MATH 1105	Basic Probability And Statistics	3

Lower Division Requirements-all degrees-all students

Each student must complete a 42-hour block of general education coursework (p. 41) fulfilling eight areas, five core areas, and three explore areas. The core areas include one course in First Year Writing, Mathematics Proficiency, Communication Proficiency, Information Literacy, and American History or Government. The Explore Areas include three courses in the Humanities and Fine Arts, three courses in the Social Sciences, and three courses in Math and Life/Natural Science area.

All courses must be selected from a list (p. 41) approved by the Faculty Senate of the campus. In many instances courses required by the College of Business Administration for each of its degree programs will satisfy a segment of the general education requirements. A list of courses which fulfill the humanities, social science, and math/science knowledge goals can be obtained in the Office of Undergraduate Academic Advising in the College of Business Administration, 487 Social Sciences and Business (SSB) building; or by visiting our web site (<http://www.umsl.edu/divisions/business>).

Lower Division Non-Business Course Requirements

Students pursuing any undergraduate business degree must complete the following non-business courses:

ECON 1001	Principles of Microeconomics	3
ECON 1002	Principles of Macroeconomics	3

ENGL 1100	First-Year Writing	3
Core area course in Communication Proficiency		
MATH 1030	College Algebra	3
MATH 1100	Basic Calculus	3
MATH 1105	Basic Probability And Statistics	3
A science lecture course (Math/Life Sciences Explore area)		
A cultural diversity course		
A course required by the state of Missouri for the American History or Government Core area		
Three humanities courses for the Humanities and Fine Arts Explore area.		
Two social science courses, in addition to those above for the Social Sciences Explore Area. ¹		

¹ At least one of the courses must be in a discipline other than Economics.

Lower Division Business Course Requirements

ACCTNG 2400	Fundamentals of Financial Accounting	3
ACCTNG 2410	Managerial Accounting	3
BUS AD 2900	Legal Environment Of Business	3
INFSYS 2800	Information Systems Concepts and Applications	3
Total Hours		12

Upper Division Requirements-all degrees-all students

Upper Division Non-Business Requirement

ENGL 3120	Business Writing (with a minimum grade of C-)	3
-----------	---	---

Upper Division Non-Business or Business Requirement

Two global awareness courses selected from an approved list maintained in the Office of Undergraduate Academic Advising in the College of Business Administration; also available on our web site (http://www.umsml.edu/divisions/business/undergrad_advising/Undergraduate%20Programs/requirements.html#global). (<http://www.umsml.edu/divisions/business>)

Upper Division Business Requirements

FINANCE 3500	Financial Management	3
SCMA 3300	Business Analytics and Statistics	3
SCMA 3301	Introduction to Supply Chain Management	3
MGMT 3600	Management and Organizational Behavior	3
MGMT 4219	Strategic Management	3
MKTG 3700	Basic Marketing	3
A minimum of 18 additional hours of upper division approved business electives		18
Total Hours		36

Assessment-all degrees-all students

MGMT 4220	Business Assessment Testing (A "Satisfactory" grade is required for graduation.)	0
-----------	--	---

Transfer Issues

Students must complete a minimum of 60 hours from four year, baccalaureate degree granting colleges/universities.

A minimum of 50% of all business course work must be completed at UMSL.

Students must complete a minimum of 21 graded hours in business courses.

Individuals must complete their last 30 hours in residence at UMSL.

A minimum of 56 graded hours at UMSL are required to qualify for consideration for Latin Honors.

Students seeking to use a lower division course to satisfy an upper division business requirement must validate the course being transferred. If successfully validated, the transfer course will waive the need to take the upper division equivalent course at UMSL, but the course transferred will be counted as lower division; it will not count toward the 36 upper division hours required in business.

Completion of a 42-hour general education block, which is certified by the sending institution as fulfilling its general education requirement, will be viewed as fulfilling UMSL's general education requirement. However, all lower division courses required as part of a degree program at UMSL must be completed.

Latin Honors Requirements

In accordance with the University's Latin Honors policy (p. 20), candidates graduating from the College of Business in the 2018-2019 Academic Year must meet the following GPA qualifications:

Summa Cum Laude	3.919
Magna Cum Laude	3.804
Cum Laude	3.528

Bachelor of Science in Accounting Degree

Lower or Upper Division Courses Required 6

One of:	
ACCTNG 3460	Accounting Career Strategies
or COMM 1040	Introduction To Public Speaking
PHIL 1130	Approaches To Ethics
or PHIL 2254	Business Ethics

Upper Division Accounting Courses Required:¹

ACCTNG 3401	Financial Accounting And Reporting I	3
ACCTNG 3402	Financial Accounting And Reporting II	3
ACCTNG 3411	Cost Accounting	3
ACCTNG 3441	Income Taxes	3
ACCTNG 3421	Accounting Information Systems	3
or INFSYS 3810	Information Systems Analysis	

ACCTNG 4435	Auditing	3
Total Hours		24

¹ The prerequisite for enrollment in ACCTNG 3402, ACCTNG 3411, ACCTNG 3441, ACCTNG 3451, ACCTNG 3460 and all 4000-level accounting courses is an upper-level accounting grade point average of 2.3 or higher.

See the Office of Undergraduate Academic Advising for alternatives to satisfy the State of Missouri's requirement of 150 hours for eligibility to take the Uniform Certified Public Accounting Examination.

Post-Baccalaureate Certificate in Accounting

Prerequisite

Bachelor's degree (in any subject)

Prerequisite Courses

MATH 1030	College Algebra ¹	3
ACCTNG 2400	Fundamentals Of Financial Accounting ²	3
ACCTNG 2410	Managerial Accounting ²	3

¹ MATH 1030 College Algebra is a prerequisite for the required accounting courses. It may be taken concurrently with ACCTNG 2400 Fundamentals Of Financial Accounting, but must be completed prior to enrollment in ACCTNG 2410 Managerial Accounting.

² ACCTNG 2400 Fundamentals Of Financial Accounting and ACCTNG 2410 Managerial Accounting are also prerequisites for the 3000-level accounting courses.

Required

Complete 27 hours of accounting courses at the 3000-level or above, at least 15 hours of which are completed at UMSL. The accounting courses must include the six required courses listed below and three accounting electives. Courses previously completed can be waived upon presentation of appropriate documentation. Waived courses will not count toward the 15-hour residency requirement.

Courses must be completed with a grade of C- or higher. The grade point average for all courses counting toward the Post-Baccalaureate Certificate in Accounting must be 2.3 or higher. The prerequisite for enrollment in ACCTNG 3402, ACCTNG 3411, ACCTNG 3441, ACCTNG 3451 and all 4000-level accounting courses is an upper-level accounting grade point average of 2.3 or higher.

Required Courses

ACCTNG 3401	Financial Accounting And Reporting I	3
ACCTNG 3402	Financial Accounting And Reporting II	3
ACCTNG 3411	Cost Accounting	3
ACCTNG 3421	Accounting Information Systems	3
ACCTNG 3441	Income Taxes	3
ACCTNG 4435	Auditing	3

Electives

Select three of the following: ¹		9
ACCTNG 3451	Accounting For Governmental And Not-For-Profit Entities	

ACCTNG 4401	Financial Accounting And Reporting III	
ACCTNG 4402	Financial Accounting And Reporting IV	
ACCTNG 4405	Professional Accounting Research	
ACCTNG 4441	Advanced Federal Income Tax: Business Taxation	
Total Hours		27

¹ Most of these are offered only once a year.

Notes on qualifying for the CPA exam in Missouri

Successful completion of the Post-Baccalaureate Certificate in Accounting includes all the accounting courses needed to qualify for the CPA exam in Missouri. However, Missouri law also requires a total of 60 credit hours in business (including the accounting courses). Many students with undergraduate degrees in business have satisfied this requirement. A student who has not satisfied this requirement must take additional business classes in order to qualify for the CPA exam.

In addition, Missouri requires 150 credit hours of college level coursework in order to qualify for the CPA exam. A student who has completed a 120-hour undergraduate business degree and the Post-Baccalaureate Certificate in Accounting will need additional coursework in order to satisfy the 150-hour requirement.

Bachelor of Science in Business Administration Degree

General Business

For those undecided regarding a specific emphasis area, a general business degree option is available. Students must complete a minimum of 18 hours of upper division approved business electives (see comprehensive list of business courses in the course descriptions section of this publication)

Emphasis in Finance

Finance is a multidisciplinary field that combines various concepts from management, economics and accounting with financial techniques to make sound business decisions and solve problems.

A minimum of 18 hours of upper division finance electives must be selected from the following:

FINANCE 3501	Financial Policies	3
FINANCE 3503	Computer Applications in Finance	3
FINANCE 3520	Investments	3
FINANCE 3521	Financial Engineering: Applying Derivatives	3
FINANCE 3523	Fixed Income Analysis	3
FINANCE 3525	Practicum in Investments	1
FINANCE 3540	Introduction to Financial Institutions and Financial Markets	3
FINANCE 3541	Commercial Bank Management	3
FINANCE 3542	Principles of Real Estate	3
FINANCE 3560	Practice of Personal Financial Planning	3
FINANCE 3561	Principles of Insurance	3

FINANCE 3562	Life Insurance and Employee Benefits	3
FINANCE 3563	Retirement Planning and Employee Benefits	3
FINANCE 3564	Estate Planning and Trusts	3
FINANCE/INTL BUS 3580	International Corporate Finance	3
FINANCE/INTL BUS 3582	International Investments	3
FINANCE 3585/ INTL BUS 3281	Business in China	3
FINANCE 3590	Internship in Finance	1-3
FINANCE 3598	Seminar in Finance	1-3
FINANCE 3599	Independent Study in Finance (approved)	1-3

Track Certification

Students may combine selected courses from the list above, and other specified upper division business electives, to fulfill a designated track with dual objectives of acquiring in depth knowledge, and to prepare and be eligible for various professional certification examinations. Detailed information is available in the Office of Undergraduate Academic Advising. The specific tracks available include:

- Corporate Finance
- Financial Institutions and Services
- Investment and Portfolio Management
- Financial Planning
- Insurance

Emphasis in International Business

National markets are becoming increasingly integrated. The study of international business focuses on understanding the forces behind this globalization of markets and production.

Twelve (12) hours are required of all individuals seeking an emphasis in International Business:

Select two of the following courses: 6

INTL BUS/MGMT 3680	International Management
INTL BUS/FINANCE 3580	International Corporate Finance
INTL BUS/MKTG 3780	International Marketing

Select two additional approved international business courses from the following: ¹ 6

INTL BUS 3280	The Law Of International Business Transactions
INTL BUS 3281	Business In China
INTL BUS 3282	Managing The Global Workforce
INTL BUS 3283	International Business And Society
INTL BUS 3284	The Japanese Management System
INTL BUS 3285	Role Of The Global Corporation
INTL BUS 3289	Practicum In International Business
INTL BUS 3290	Internship In International Business
INTL BUS 3299	Independent Study In International Business
INTL BUS/FINANCE 3580	International Corporate Finance
INTL BUS/FINANCE 3582	International Investments
INTL BUS/MGMT 3680	International Management

INTL BUS/MKTG 3780	International Marketing
INTL BUS/MKTG 3787	Marketing in the European Union
INTL BUS 4281	Entrepreneurship in the Global Environment
INTL BUS 4289	International Strategic Management
INTL BUS/LOG OM 4381	Global Supply Chain Management

Total Hours 12

¹ Other than INTL BUS 3289.

Proficiency in a foreign language of international commerce (determined by the College of Business Administration) must be demonstrated - 13 credit hours in one approved language or satisfactory performance on the UMSL foreign language placement test.

Students must complete one of the following International Experience Requirements:

INTL BUS 4280 International Business Experience 0

1. Study abroad for three or more credits hours.¹
2. Complete an international internship approved by the International Business Institute (maximum of 3 credit hours).
3. Complete a minimum of one year international experience within 5 years of entering the program in any of the following areas: Peace Corps, volunteer work with an organization, an international posting by a company or government agency and/or approved, significant international experience. Documentation is required for approval.

¹ International students in the IB Emphasis will meet their International Experience requirement through their study in the United States.

Emphasis in Management

The study of management focuses on the behavior of individuals and groups in an organizational setting.

MGMT 3611 Advanced Management And Organizational Behavior 3

Select five of the following: 15

MGMT 3612	Professional Skills Development
MGMT 3621	Human Resource Management
MGMT 3622	Industrial And Labor Relations
MGMT 3623/ PSYCH 3318	Industrial And Organizational Psychology
MGMT 3624	Employee Training And Development
MGMT 3625	Leadership in Organization
MGMT/INTL BUS 3680	International Management
MGMT 3690 or MGMT 3699	Internship In Management Independent Study In Management
MGMT 4614	Entrepreneurship/Small Business Management

Total Hours 18

Emphasis in Marketing

Marketing involves the activities needed to facilitate an exchange. This includes selling products, services, or ideas to both individual consumers and business buyers.

MKTG 3740	Marketing Analysis	3
MKTG 4700	Marketing Management	3
Select four additional upper division courses from the following:		12
MKTG 3710	Consumer Behavior	
MKTG 3720	Management Of Promotion	
MKTG 3721	Introduction to Digital Marketing Strategies	
MKTG 3722	Introduction to Social Media Marketing	
MKTG 3750	Sales Management	
MKTG 3760	Business To Business Marketing	
MKTG 3770	Introduction To Transportation	
MKTG 3771	Traffic And Transportation Management	
MKTG 3776	Transportation Security, Safety and Disaster Preparedness	
MKTG 3777	Aviation in American Life	
MKTG/INTL BUS 3780	International Marketing	
MKTG 3785	Women in International Entrepreneurship	
MKTG/INTL BUS 3787	Marketing in the European Union	
MKTG 3790	Internship In Marketing	
MKTG 3798	Seminar in Marketing	
MKTG 3799	Independent Study In Marketing	
MEDIA ST 3338	Advertising Technique	
Total Hours		18

Emphasis in Supply Chain Management

The study of supply chain management focuses on the whole supply chain from the acquisition of raw materials, through production or service delivery, to the point of consumption.

Twelve (12) credit hours are required of all individuals seeking an emphasis in Supply Chain Management:

SCMA 3320	Advanced Supply Chain and Operations Management	3
Select three of the following courses:		9
SCMA 3321	Procurement	
SCMA 3345	Predictive Analytics and Data Mining	
SCMA 3370/MKTG 3770	Introduction to Transportation	
SCMA 3371/MKTG 3771	Traffic and Transportation Management	
SCMA 3376/MKTG 3776	Transportation Security and Risk	
SCMA 3390	Internship in Supply Chain and Analytics ¹	
SCMA 3398	Seminar in Supply Chain Management and Analytics	
SCMA 3399	Independent Study in Supply Chain and Analytics	
SCMA 4322	Lean Production in Manufacturing and Service Operations	
SCMA 4325	Environmental Sustainability in Business Operations	
SCMA 4330	Business Logistics	

SCMA 4331	Applied Supply Chain Modeling	
SCMA 4347	Introduction to Project Management	
SCMA 4350	Prescriptive Analytics and Optimization	
SCMA/INTL BUS 4381	Global Supply Chain Management	
SCMA 4389	Supply Chain Management Practicum ¹	
SCMA 4398	Advanced Topics in Supply Chain and Analytics	
Total Hours		12

¹ At most, only one of SCMA 3390 and SCMA 4389 may be counted towards the Supply Chain Management emphasis area.

Tracks

Students may combine selected courses from the list above, and other specified upper division business electives, to fulfill a designated track and acquire in-depth knowledge. Detailed information is available in the Office of Undergraduate Academic Advising. The specific tracks available include:

- Supply Chain Management
- Transportation
- Business Analytics

Bachelor of Science in Information Systems Degree

Mission

The Information Systems (IS) area endeavors to prepare high-potential students of diverse backgrounds for successful careers in the IS profession. Careers in IS may include programming, systems analysis and design, database administration, end-user support, network administration, and management consulting. The goal is to provide students with the skills to deal with the challenges confronting IS through teaching, research, and service to the profession.

Students are required to complete a minimum of 7 courses beyond required business core courses:

Programming:		6
INFSYS 3816	Managerial Application Of Object-Oriented Programming II	
INFSYS 3806	Managerial Applications Of Object-Oriented Programming I	
Analysis and Design:		
INFSYS 3810	Information Systems Analysis	
INFSYS 4850	Information Systems Design	
Database:		3
INFSYS 3845	Database Management Systems	3
Select 2 courses (at least 1 3800-level Information Systems course) from the following:		6
ACCTNG 3421	Accounting Information Systems	
FINANCE 3503	Computer Applications In Finance	
INFSYS 3807	Legacy Systems	
INFSYS 3815	Object Oriented Applications In Business	

INFSYS 3841	Enterprise Information Systems
INFSYS 3842	Management Of Telecommunications
INFSYS 3843	Decision Support Systems for Business Intelligence
INFSYS 3844	Developing Business Applications In NET
INFSYS 3846	E-Commerce
INFSYS 3847	Web Design
INFSYS 3848	Security And Information Systems
A pre-approved Computer Science class	
INFSYS 3898	Seminar in Information Systems Management ¹
INFSYS 3899	Independent Study In Information Systems ¹

¹ Seminars and Independent Studies are restricted to those offered by and approved by the Area faculty and approved by the Area Coordinator.

Minors in Business Administration

General Requirements

- All minors are 15 credit hours or 5 courses, including business core courses.
- Students must attain a 2.0 grade point average for all courses in the minor.
- Students must attain a minimum grade of C- in each course included in the minor.
- All courses in the minor must be on a graded basis.
- A minimum of 9 credit hours of coursework included in the minor must be taken in residence at UMSL.
- One must complete a baccalaureate degree at UMSL in order for a minor to be conferred.
- A minor may be added for up to two years following completion of the baccalaureate degree

Minor in General Business

This minor is available only to students seeking a baccalaureate degree outside the College of Business Administration.

Select five of the following:	15
ACCTNG 2400	Fundamentals of Financial Accounting
BUS AD 2900	Legal Environment Of Business
FINANCE 3500	Financial Management
INFSYS 1800	Computers and Information Systems
SCMA 3301	Introduction to Supply Chain Management
MGMT 3600	Management and Organizational Behavior
MKTG 3700	Basic Marketing
Total Hours	15

Minor in Accounting

Available to all students except those pursuing the Bachelor of Science in Accounting degree. Students must complete:

ACCTNG 2400	Fundamentals Of Financial Accounting	3
ACCTNG 2410	Managerial Accounting	3
Plus any three upper division accounting electives		9
Total Hours		15

Minor in Finance

Available to all students except those pursuing the Bachelor of Science in Business Administration degree. Students must complete:

FINANCE 3500	Financial Management	3
Select any four upper division finance electives		12
Total Hours		15

Minor in Cybersecurity

The Undergraduate Minor in Cybersecurity is a five-course (15 credit hours) program. It is designed to help students from all backgrounds achieve a foundation in Cybersecurity. It provides students the flexibility to focus on technical and/or managerial aspects of Cybersecurity. The program also allows students to choose from a range of electives based on student interests. This minor serves a broad group of managers, technical specialists, and professionals enrolled in any baccalaureate degree at UMSL. A prior background in information security is not required to enter this program. This minor may be added for up to two years following completion of the baccalaureate degree.

Requirements: All students must take four required courses and one elective.

Required

INFSYS 3842	Data Networks and Security	3
INFSYS 3848	Introduction to Information Security	3
INFSYS 3858	Advanced Security and Information Systems	3
INFSYS 3878	Information Security Risk Management and Business Continuity	3

Elective

Choose one of the following:

INFSYS 3868	Secure Software Development	
CMP SCI 4700	Computer Forensics	
CMP SCI 4780	Computer and Network Security	3
Total Hours		15

Students may substitute the above courses with other courses upon approval by the Chair of the Information Systems department. In all cases, 15 hours are needed to complete the Undergraduate Minor in Cybersecurity. A minimum of four courses must be taken in residence at UMSL.

Minor in Digital Marketing Communications

This minor in Digital Marketing Communications is a **15-hour** program designed to provide a focused, intensive study of the applications of digital and social media marketing communications, advertising and branding

within organizations. This program serves marketing managers who want to understand a true integrated marketing and communication approach to sales, brand management, promotion, and consumer behavior.

To obtain this minor, students must successfully complete the following four “core” marketing courses.

Required Courses:

MKTG 3700	Basic Marketing	3
MKTG 3720	Management Of Promotion	3
MKTG 3721	Introduction to Digital Marketing Strategies	3
MKTG 3722	Introduction to Social Media Marketing	3

Electives: 3

Choose one of the following courses:

MKTG 3731	Digital and Social Media Marketing Lab (Internship)	
MKTG 3740	Marketing Analysis	
MKTG 3790	Internship In Marketing	

Total Hours 15

Minor in Information Systems

Available to all students except those pursuing the Bachelor of Science in Information Systems degree. Students must complete:

INFSYS 2800	Information Systems Concepts And Applications	3
-------------	---	---

Select four of the following: 12

At least three of the courses must be 3800-level IS courses.

ACCTNG 3421	Accounting Information Systems	
FINANCE 3503	Computer Applications In Finance	
INFSYS 3806	Managerial Applications Of Object-Oriented Programming I	
INFSYS 3807	Legacy Systems	
INFSYS 3810	Information Systems Analysis	
INFSYS 3815	Object Oriented Applications In Business	
INFSYS 3816	Managerial Application Of Object-Oriented Programming II	
INFSYS 3841	Enterprise Information Systems	
INFSYS 3842	Data Networks and Security	
INFSYS 3843	Decision Support Systems for Business Intelligence	
INFSYS 3844	Developing Business Applications In .NET	
INFSYS 3845	Database Management Systems	
INFSYS 3846	E-Commerce	
INFSYS 3847	Web Design	
INFSYS 4850	Information Systems Design	
INFSYS 3899	Independent Study In Information Systems ¹	
MKTG 3721	Introduction to Digital Marketing Strategies	

MKTG 3722	Introduction to Social Media Marketing	
Total Hours		15

¹ Seminars and Independent Studies are restricted to those offered by and approved by the Department faculty and approved by the Department Chair.

Minor in International Business

Available to all students except those pursuing the Bachelor of Science in Business Administration degree with an emphasis in International Business. Students must complete any 5 courses in International Business.

Minor in Supply Chain Management

Available to all students except those pursuing the Bachelor of Science in Business Administration degree. Students must complete:

SCMA 3301	Introduction to Supply Chain Management	3
-----------	---	---

Select any four additional 3000 level and higher Supply Chain Management and Analytics courses. 12

Total Hours 15

Minor in Management

Available to all students except those pursuing the Bachelor of Science in Business Administration degree. Students must complete:

MGMT 3600	Management And Organizational Behavior	3
-----------	--	---

MGMT 3611	Advanced Management And Organizational Behavior	3
-----------	---	---

Select any three upper division management and organizational behavior electives. 9

Total Hours 15

Minor in Marketing

Available to all students except those pursuing the Bachelor of Science in Business Administration degree. Students must complete:

MKTG 3700	Basic Marketing	3
-----------	-----------------	---

Select any four additional upper division marketing electives. 12

Minor in Transportation Studies

Available to all students.

SCMA 3370/MKTG 3770	Introduction to Transportation	3
---------------------	--------------------------------	---

SCMA 3371/MKTG 3771	Traffic and Transportation Management	3
---------------------	---------------------------------------	---

Select three of the following: 9

SCMA 3301	Introduction to Supply Chain Management	
-----------	---	--

SCMA 3320	Advanced Supply Chain and Operations Management	
-----------	---	--

SCMA 3376	Transportation Security and Risk	
-----------	----------------------------------	--

SCMA 3390	Internship in Supply Chain and Analytics ¹	
-----------	---	--

SCMA 3398	Seminar in Supply Chain Management and Analytics ¹	
SCMA 3399	Independent Study in Supply Chain and Analytics ¹	
SCMA 4330	Business Logistics	
SCMA/INTL BUS 4381	Global Supply Chain Management	
SCMA 4398	Advanced Topics in Supply Chain and Analytics ¹	
MKTG 3700	Basic Marketing	
MKTG 3790	Internship in Marketing ²	
MKTG 3798	Seminar in Marketing ²	
MKTG 3799	Independent Study in Marketing ^{2, 3}	
Total Hours		15

¹ With approval of the Department chair of Supply Chain & Analytics.

² With approval of the Department chair of Marketing.

³ No more than one approved independent study course may count towards the minor.

Cybersecurity Certificate

The Undergraduate Certificate in Cybersecurity is a six-course (18 credit hours) interdisciplinary studies program. It is designed to help students from all backgrounds achieve a foundation in information security. It provides students the flexibility to focus on technical and/or managerial aspects of computer, software, network, and information security. With primary courses offered by Computer Science and Information Systems departments, the program also allows students to choose from a range of electives based on student interests. This certificate serves a broad group of managers, technical specialists, and professionals with or without a bachelor's degree. A prior background in information security is not required to enter this program. A minimum GPA of 2.5 is required for admission.

Requirements

All students must take three required courses and three electives (at least one elective must be in Computer Science)

Required Courses

INFSYS 3848	Introduction to Information Security	3
CMP SCI 4730	Computer Networks and Communications	3
or INFSYS 3842	Data Networks and Security	
CMP SCI 4782	Information Security	3
or INFSYS 3858	Advanced Security and Information Systems	

Electives

Choose three of the following (at least one must be a CMP SCI course):

CMP SCI 4020	Introduction to Android Apps: Android Fundamentals	
CMP SCI 4222	iOS Apps	
CMP SCI 4700	Computer Forensics	
CMP SCI 4750	Introduction to Cloud Computing	
CMP SCI 4780	Computer and Network Security	
INFSYS 3868	Secure Software Development	

INFSYS 3878	Information Security Risk Management and Business Continuity	
Total Hours		18

Students may substitute the above courses with other courses upon approval by the program adviser in either the Computer Science or Information Systems department. In all cases, 18 hours are needed to complete the Undergraduate Certificate in Cybersecurity. A minimum of four courses must be taken in residence at UMSL. Students may not receive both the Undergraduate and the Graduate Certificate in Cybersecurity.

For more information, students can contact the program directors at cybersecurityUMSL@umsl.edu.

Interdisciplinary Entrepreneurship Certificate

This 18-credit hour certificate, which includes 9 hours of required coursework, will allow students from different majors and with different professional interests to investigate the foundations of entrepreneurial practice. This certificate is appropriate for any student who has an interest in advancing his or her knowledge, creativity, and skills necessary to become or work with entrepreneurs, bring entrepreneurial thinking to his or her workplace, and who seeks a competitive edge in the job market.

Required Courses

BUS AD 1001		
BUS AD 4001	Accelerate Capstone	
In addition, students must take at least one of the following classes:		3
BUS AD 3040		
EDUC 2002	Social Entrepreneurship	
Total Hours		3

Elective Courses

Students must complete a minimum of nine hours, chosen from any of the following lists. The groupings are suggestions that would provide a concentrated focus in a specific area.

Additional courses that may meet this requirement:

1. a course designated as Entrepreneurship in transfer;
2. future courses, as approved by the director of entrepreneurship certificate.

Entrepreneurship in the Arts

BUS AD 2030

Entrepreneurship with Digital Marketing

CMP SCI 3010	Web Programming	3
CMP SCI 4010	Advanced Web Development with Java	3
INFSYS 3847	Web Design	3
MGMT 4614	Entrepreneurship/Small Business Management	3
MKTG 3710	Consumer Behavior	3
MKTG 3720	Management of Promotion	3

MKTG 3721	Introduction to Digital Marketing Strategies	3
MKTG 3722	Introduction to Social Media Marketing	3
MKTG 5720	Marketing Communications	3

Education Entrepreneurship

ED FND 3251	Black Americans in Education	3
ED FND 4330	History of American Education through the Lens of Social Justice	3
ED PSY 2212 or PSYCH 2272	Child and Adolescent Development Developmental Psychology: Adulthood And Aging	3
ED REM 4730	Program Assessment and Evaluation	3
ED TECH 4302 or ED TECH 4436	Educational Technology Instruction in Educational Agencies Computer-Mediated Teaching and Learning in Education	3
EDUC 2222	Interpretation: Connecting Audiences and Meaning	3
EDUC 3170	Grant Proposal Writing for Educators	3
MKTG 3721	Introduction to Digital Marketing Strategies	3
THEATR 3362	Storytelling	3

Focus on Entrepreneurship

ACCTNG 2410	Managerial Accounting	3
BUS AD 2900	Legal Environment Of Business	3
COMM 2232	Effective Communication in the Organization: Tools for Leadership	3
MGMT 4614	Entrepreneurship/Small Business Management	3
NURSE 3808	Management And Leadership In Nursing	3
PSYCH 2222	Group Processes in Organizations	3
PSYCH 3316	Leadership: Theory and Practice	3
SOC WK 4350	Human Service Organizations	3

Social Entrepreneurship

ACCTNG 3451	Accounting for Governmental and Not-For-Profit Entities	3
ANTHRO 3229	Economic Archaeology And Anthropology	3
EDUC 2222	Interpretation: Connecting Audiences and Meaning	3
MGMT 4614	Entrepreneurship/Small Business Management	3
MKTG 3721	Introduction to Digital Marketing Strategies	3
SOC WK 2000	Social Work and Social Issues	3
SOC WK 2200	Social Welfare as a Social Institution	3
SOC WK 3100	Introduction to Strategies for Social Work Practice	3

SOC WK 3410	Research Design in Social Work	3
SOC WK 3700	Diversity and Social Justice	3

Technology Entrepreneurship

BIOL 4614	Biotechnology Laboratory I	4
BIOL 4905	Research	3
CHEM 4772	Physical Biochemistry	3
CMP SCI 2250	Programming and Data Structures	3
CMP SCI 2750	System Programming and Tools	3
CMP SCI 3010	Web Programming	3
CMP SCI 4020	Introduction to Android Apps: Android Fundamentals	3
CMP SCI 4220	Introduction to iOS Programming and Apps	3
CMP SCI 4710	Mobile and Ubiquitous Computing	3
ED TECH 4558	Computer Ethics for Educators	3
INFSYS 3810	Information Systems Analysis	3
INFSYS 3844	Developing Business Applications in .NET	3
INFSYS 3845	Database Management Systems	3
INFSYS 3847	Web Design	3
INFSYS 4850	Information Systems Design	3
INFSYS 3848	Introduction to Information Security	3
J E ENGR 4050	Reliability and Quality Control	3
J M ENGR 4900	Engineering Project Management	3
