Runge-Kutta Methods and Applications

**A thesis Submitted in Partial fulfillment of the Requirements for the
degree of M.Sc. in mathematics**

Prepared By:

Tasneem Yasen Mohammed Alameen

Supervisor:

Dr.Mohsin Hassan Abdullah

قال تعالى

(يَرْفَعِ اللَّهُ الَّذِينَ آمَنُوا مِنْكُمْ وَالَّذِينَ أُوتُوا الْعِلْمَ دَرَجَاتٍ)

صدق الله العظيم
سورة المجادلة: الآية (11)

Dedication

My Parents and Family To
Who love and support me.

And

To my teachers and friends
Who enriched my knowledge.

Acknowledgment

First of all I thank Allah for all those blessings I have day by day. I would like to thank Dr. Mohsin Hassan for his supporting and providing necessary guidance concerning project implementation. Without his superior knowledge and experience, the project would like in quality of outcomes, and thus his support has been essential.

Nevertheless, I express my gratitude toward my families and colleagues for their kind co-operation and encouragement which help me in completion of this project.

Abstract

The Initial value problems, IVPs are very important in modeling some real life problems. There are many analytical methods designed to solve IVPs. In practice these methods do not cover all types of problems. Thus, numerical methods are used.

In this study a detailed description, with implementation, is given for the class of numerical methods known as Runge-Kutta methods. Both explicit and implicit methods are discussed. Full derivations of the methods are made. Different orders are used.

Practical implementation of the methods are made using Matlab computational environment. These methods are used to solve some practical problems in Civil, Chemistry, Computer Engineering and physics.

Table of Contents

Item	No. Page
الاستهلال	I
Dedication	II
Acknowledge	III
Abstract	IV
List of Contents	V
List of figures	VII
List of Table	VIII
List of Abbreviations	IX
Chapter one: Introduction	1
1. Introduction	1
1.1 Problem Statement	2
1.2 Objectives	2
1.3 Methodology	2
1.4 Thesis Organization	3
Chapter two: Literature Review	4
2.1 Initial Value Problems	4
2 .1.1 Definition	4
2 .1.2 Example	5
2.2 Runge-Kutta Methods	6
2.2.1 Definition	9
2.2.2 Second order Runge-Kutta methods	9
2.2.3 Algorithm Calculate Runge-Kutta 2	14
2.2.4 Example	17
2.2.5 Fourth order of Runge-Kutta methods	20
2.2.6 Algorithm Calculate Runge-Kutta 4	25
2.2.7 Example	28
Chapter Three: The implicit Runge-Kutta methods	31
3.1 Definition	31
3.1.1 Second order implicit Runge-Kutta methods	34
3.1.2 Fourth order implicit Runge-Kutta methods	36
Chapter four: Applications	38
4.1 Civil Engineering	38
4.2 Chemical Engineering	42
4.3 Physics	46

4.4 Computer Engineering	47
Chapter five :Conclusion	54
5.1 Conclusion	54
References	55
Appendix	57
A1 %% illustrate the example (2.2.4) in Matlab	57
A2 %% illustrate the example (2.2.7) in Matlab	59

List of figures

Name of Figure	No. Figure
Fig. (2.1): Illustration of Runge-Kutta method	8
Fig. (2.2) the flow chart of RK2	15
Fig. (2.3) the flow chart of RK4	26

List of table

Name of Table	No. Table
Table 2.1.1: Comparison of RK2 and Exact solution for example (2.2.4)	19
Table 2.2.2: Comparison of RK4 and Exact solution for example (2.2.7)	30
Table 4.1.1: Comparison of RK4 and Exact solution for example (4.1)	41
Table 4.1.2: Comparison of RK4 and Exact solution for example (4.2)	45
Table 4.1.3: Comparison of RK4 and Exact solution for example (4.3)	46
Table 4.1.4: Comparison of RK4 and Exact solution for example (4.4)	52

List of Abbreviations

Runge-Kutta method.....	RK
First order of Runge-Kutta method.....	RK1
Second order of Runge-Kutta method.....	RK2
Fourth order of Runge-Kutta method.....	RK4
Initial value problems	IVPs
Ordinary differential equations.....	ODEs
Truncation error.....	Tn
Explicit Runge-Kutta.....	ERK
Implicit Runge-Kutta	IMRK
