

<b>CRUISE SUMMARY REPORT</b>	<i>FOR COLLATING CENTRE USE</i>
	Centre: Ref. no: Is data exchange restricted? <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> In part No Yes
SHIP enter the full name and international radio call sign of the ship from which the data were collected, and indicate the type of ship, for example, research ship; ship of opportunity, naval survey vessel; etc.  Name: TRIDENS Call Sign: PBVO  Type of ship: FISHERIES RESEARCH VESSEL	
CRUISE NO./NAME ~cruiseNo~ enter the unique number, name or ~cruiseName~ acronym assigned to the cruise (or cruise let, if appropriate).	
CRUISE PERIOD start 20 08 2007 to 14 09 2007 (set sail) day month year day month year	
PORT OF DEPARTURE (enter name and country) SCHEVENINGEN, THE NETHERLANDS	
PORT OF RETURN (enter name and country) SCHEVENINGEN, THE NETHERLANDS	
RESPONSIBLE LABORATORY enter name and address of the laboratory responsible for coordinating the scientific planning of the cruise. Name: IMARES, Institute for Marine research and Ecosystem studies Address: P.O. BOX 68 1970 AB IJMUIDEN HARINGKADE 1  Country: THE NETHERLANDS	
CHIEF SCIENTIST(S) enter name and laboratory of the person(s) in charge of the scientific work (chief of mission) during the cruise. Ingeborg de Boois, Wageningen IMARES	
OBJECTIVES AND BRIEF NARRATIVE OF CRUISE enter sufficient information about the purpose and nature of the cruise so as to provide the context in which the reported data were collected. Collecting data on demersal fish and epifauna. The results will be reported to ICES WGNSK (plaice, sole length and age distribution) and ICES WGBEAM (fish and epifauna).	
PROJECT (IF APPLICABLE) if the cruise is designated as part of a larger scale cooperative project (or expedition or programme), then enter the name of the project, and of the organisation responsible for coordinating the project. Project name: ICES Beam Trawl Survey  Coordinating body: IMARES, Institute for Marine research and Ecosystem studies	

**PRINCIPAL INVESTIGATORS:** Enter the name and address of the Principal Investigators responsible for the data collected on the cruise, and who may be contacted for further information about the data (The letter assigned below against each Principal Investigator is used on pages 2 and 3, under the column heading 'PI', to identify the data sets for which he/she is responsible)

A. Ingeborg de Boois

**MOORINGS, BOTTOM MOUNTED GEAR AND DRIFTING SYSTEMS**

PI	APPROXIMATE POSITION		DATA TYPE	DESCRIPTION
see top	LATITUDE		enter code(s) from list on cover page	identify, as appropriate, the nature of the instrumentation, the parameters (to be) measured, the number of instruments and their depths, whether deployed and/or recovered, dates of deployment and/or recovery, and any identifiers given to the site.
of page	deg min N/S	deg min E/W		

**SUMMARY OF MEASURED AND SAMPLES TAKEN**

Except for the data already described on page 2 under "Moored, Bottom Mounted Gear and Drifting Systems", this section should include a summary of all data collected on the cruise, whether they be measurements (e.g. temperature, salinity values) or samples (e.g. cores, net hauls).

Separate entries should be made for each distinct and coherent set of measurements of samples. Different modes of data collection (e.g. vertical profiles as opposed to underway measurements) should be clearly distinguished, as should measurement/sampling techniques that imply distinctly different accuracy's or spatial/temporal resolutions. Thus, for example, separate entries would be created for i) BT drops, ii) water bottle stations, iii) CTD casts, iv) towed CTD, v) towed undulating CTD profiler, vi) surface water intake measurements, etc.

Each data set entry should start on a new line - its description may extend over several lines if necessary.

**NO, UNITS:** for each data set, enter the estimated amount of data collected expressed in terms of the number of: 'stations'; 'miles' of track; 'days' of recording; 'cores' taken; net 'hauls'; balloon 'ascents'; or whatever unit is most appropriate to the data. The amount should be entered under NO and the counting unit should be identified in plain text under 'UNITS'.

PI	NO	UNITS	DATA TYPE	DESCRIPTION
see page 2	see above	see above	enter code(s) from list on cover page	identify, as appropriate, the nature of the data and of the instrumentation/ sampling gear and list the parameters measured. Include the supplementary information that may be appropriate, e.g. vertical or horizontal profiles, depth horizons, continuous recording or discrete samples, etc. For samples taken for later analysis on shore, an indication should be given of the type of analysis planned, i.e. the purpose for which the samples were taken.
A	See map			On each location a 8 meter beam trawl haul has been carried out, the catch was sorted and length frequencies per fish species recorded. Also a vertical CTD measurement has been done

Map of sampling locations.

<p><b>TRACK CHART:</b> You are strongly encouraged to submit with the completed report, an annotated track chart illustrating the route followed and the points where measurements were taken.</p>	<p><input type="checkbox"/> Insert a tick (✓) in this box if a track chart is supplied.</p>
--	---

<p><b>GENERAL OCEAN AREA(S):</b> Enter the names of the oceans and/or seas in which data were collected during the cruise - please use commonly recognised names (see, for example, International Hydrographic Bureau Special Publication No. 23, 'Limits of Oceans and Seas')</p> <p>NORTH SEA</p>
---

<p><b>SPECIFIC AREAS:</b> If the cruise activities were concentrated in a specific area(s) of an ocean or sea, then enter a description of the area(s). Such descriptions may include references to local geographic areas, to sea floor features, or to geographic coordinates.</p>
--

<p><b>GEOGRAPHIC COVERAGE - INSERT 'X' IN EACH SQUARE IN WHICH DATA WERE COLLECTED</b></p>
--
