NERVOUS AND HALF-SICK WOMEN

These Letters Recommending Lydia E. Pinkham's Vegetable Compound Will Interest You

For Your Own Good Please Read Them

Youngtown, Ohio.—"Last fall I began to feel mean and my back hurt me and I could hardly do my little bit of housework. I was played out when I would just sweep one room and would have to rest. I would have to put a cushion behind me when I would sit down and at night I could not sleep unless I had something under my back. I had awful cramps every month and was just nearly all in. Finally my husband said to me one day, 'Why don't you try Lydia E. Pinkham's medicine?' and I said, 'I am willing to take anything if I could get well again.' So I took one bottle and a second one and felt better and the neighbors asked me what I was doing and said, 'Surely it must be doing you good all right.' I have just finished my eighth bottle and I cannot express to you how I feel, the way I would like to. If you can use this letter you are welcome to it and if any woman does not believe what I have written to be true, she can write to me and I will describe my condition to her as I have to you."—Mrs. ELMER HEASLEY, 141 S. Jackson St., Youngtown, Ohio.

"I was very nervous and run-down," writes Mrs. L. E. Wiese of 706 Louis St., New Orleans, La. "Lydia E. Pinkham's Private Text-Book upon 'Ailments Peculiar to Women' will be sent out free upon request. Write to the Lydia E. Pinkham Medicine Co., Lynn, Massachusetts.

Honestly, do you like a fancy pipe?

You know the kind we mean. It comes in a beautiful velvet-lined leather case and arrives on your birthday or Christmas. And when you have company, and they talk pipes, you go to the drawer, pull out your fancy pipe, polish it with the palm of your hand and perhaps fill it up and smoke with your best company manners.

And then, when all the folks have gone—or before they have gone, if they stay too long—you reach for your favorite briar, fill her up just right, and then the world is pretty good again. The people who seemed terrible bores a few minutes ago look like regular human beings as you see them through a transparent blue haze of curling smoke. In the meantime, the fancy pipe has been relegated to its glorious case for another period of oblivion.

It's the same with tobacco, too. Somebody smoking a fancy brand, offers you his pouch and just to be a good fellow you take a pipeful (feeling a little pang of conscience as you push the unfamiliar tobacco into your pet pipe). And you smoke it. It may be very good tobacco. Perhaps you can't even decide what, if anything, is the matter with it.

But it isn't your brand, and when you get near the end, perhaps just a little hastily, you knock out the fancy tobacco and pull out your own, fearful lest the too-friendly pouch appear again and you may have to refuse gently but firmly.

Have you had such an experience? And isn't it almost worth it to know how much you really like your Edgeworth?

We don't claim that Edgeworth pleases every man. But we do want every pipe-smoker to try Edgeworth—to find out for himself if it isn't just the taste and strength to suit him.

We gladly take the burden of proof on our own shoulders. So we will send generous samples of Edgeworth, both Ready-Rubbed and Plug Slice, to any pipe-smoker who will ask for it.

Send us a postcard with your name and address, and we'll put the samples into the hands of Uncle Sam's messengers just as quick as we can. Then, when you get them, light up your pipe, puff away to your heart's content and you can be the whole jury and the judge. If you'll add the name and address of your tobacco dealer, we'd appreciate the courtesy.

Address your card for free samples to Larus & Brother Co., 44 South 21st Street, Richmond, Virginia.

To Retail Tobacco Merchants: If your jobber cannot supply you with Edgeworth, Larus & Brother Company will gladly send you prepaid by parcel post a one- or two-dozen carton of any size of Plug Slice or Ready-Rubbed for the same price you would pay the jobber.

Badly Behaved Garment. Anita had a new dress which continued to pull up and show her petticoats.

Annoyed by this, the child said: "Mother, can't you fix this dress; it certainly doesn't behave well."

would often sit down and cry, and was always blue and had no ambition. I was this way for over a year and had allowed myself to get into quite a serious condition. One day I saw your advertisement in the daily paper and began to take Lydia E. Pinkham's Vegetable Compound at once. I have improved ever since taking the third bottle and find it is the best medicine I have ever taken."

Benefited by First Bottle
"I was completely run down and not able to do my housework. I just dragged myself around and did not have energy to get up when once I sat down. I read advertisements of Lydia E. Pinkham's Vegetable Compound in our paper 'The Indiana Daily Times,' and learned all about it. I received results from the very first bottle and now I am doing all my own work, even washing and ironing, and I never felt better in my life. I tell all my friends it is due to you."—Mrs. ELIZABETH REINHOLD, 403 N. Pine St., Indianapolis, Indiana.

You should pay heed to the experiences of these women. They know how they felt before taking the Vegetable Compound, and afterwards, too. Their words are true.

RETURNS BILL TO CONGRESS

PRESIDENT STATES COUNTRY CANNOT PAY MORE TAXES.

HARDING VETOES BONUS

EXECUTIVE'S ACTION REGARDED AS DEATH BLOW TO MEASURE.

Washington.—President Harding vetoed the soldiers' bonus bill, informing Congress in a written message that while he was in accord with "the avowed purpose" of the measure, he did not subscribe to its provisions.

The executive's action was regarded generally in Washington as making impossible a bonus for the World War veterans, at least for some time to come.

Mr. Harding set forth a number of reasons for returning the bill to the House without his approval. These included:

Failure of Congress to provide a means of financing.

That inevitably the bonus would mean increased taxation.

That the legislation would wipe out everything thus far accomplished to reduce government expenditures wherever possible.

That a peace bestowal on the ex-servicemen was "a perversion of public funds," and suggested "that future defense is to be inspired by compensation rather than consciousness of duty to flag and country."

That to add one-sixth of the total sum of the public debt for distribution among less than five million of 110,000,000 people would undermine confidence on which the nation's credit was built and "establish the precedent of distributing public funds whenever the proposal and the numbers affected make it seem politically appealing to do so."

That the \$10,000,000,000 of maturing public debt in the next six years would be difficult to meet without adding the complication of added borrowings on account of a bonus.

That the adjusted service certificate plan of payment, with its bank and government loan provisions, was little less than a certified inability of the government to pay and invited a "practice of sacrificial barter," by the veterans.

That the bonus would not diminish the later obligation in the way of pensions to the World War veterans.

Asserting that this obligation would "cost more billions than I venture to suggest," the President declared that a rational financial policy to-day is necessary to make the nation ready for the expenditure which is certain to be required in the coming years.

Only once did the President refer to the interest on the foreign debt out of which proponents of the bill have contended it could be paid.

The Congress that the government was facing a deficit of \$650,000,000 during the current fiscal year and a further deficit for the year succeeding, "even after counting upon all interest collections on foreign indebtedness which the government is likely to receive."

Mr. Harding also called attention to the sums now being expended for the care of the diseased, disabled or dependent and asserted that the total of this work, with insurance liability added, probably would exceed \$25,000,000,000.

Ohio Can Vote on Wine and Beer.
Columbus, Ohio.—Ohio at the November election will vote on a state constitutional amendment to legalize the manufacture and sale of light wine and beer. The State Supreme Court has ordered Secretary of State Smith to place the proposal on the ballot in a plain language action brought by the Association Opposed to Prohibition, sponsors of the amendment, after the secretary had refused to certify the amendment for a vote. The Anti-Saloon League will appeal to the United State Supreme Court.

Victims of Turks Flee Smyrna.
Smyrna.—Fire has accomplished for the Turks what the sword failed to do. Asia Minor, the cradle of Christianity, soon will be depopulated by Christians. Many of those in Smyrna, who were not snatched from death by American and other rescuers, are disappearing into the hills, some voluntarily, many by force. Others are dying of exhaustion, fright or exposure on the shattered stone water front of the beleaguered city.

Shopmen Return on N. Y. Central.
New York.—Officials of the New York Central lines have announced that a settlement on the basis of the Baltimore agreement had been reached with the striking shopmen throughout the entire system. The statement issued from the executive offices of the New York Central lines declared: "The employees now on strike will return to work as rapidly as positions can be arranged for them, all within thirty days of the date of this agreement (today)."

New Mexico's school bill this year will be from \$700,000 to \$800,000 under last year's, according to State School Auditor John Joerns.

Roy Calvin, 18, of Lavena, wounded by a ricochet bullet when Policeman George Harding shot at the tire of the automobile he was driving, died at Phoenix.

One of the most disastrous fires in Des Moines for many years occurred recently when the two large store-houses belonging to E. E. Cory were destroyed.

The new oil well of the Midwest Refining Company between Farmington and Shiprock, is now down to the depth of 500 feet. The drilling is progressing rapidly.

Nestor Candelaria, a railway shop striker, died at his home in Albuquerque from injuries sustained in a fight. Officers are searching for a shop-worker who is said to have struck Candelaria.

At work in earnest on the proposed railroad from Fort Worth to Tucuman, Col. C. H. Powell of Chicago is now sending out questionnaires to farmers and business men along the right-of-way. No recent work has been done on the road.

The first "Home Rodeo" to be held in Clayton took place recently when one of the largest crowds ever seen in Clayton was present. Some of the best riders and ropers in Union, Harding and Colfax counties participated in the many events and special prizes were awarded to the winners.

Harvey Burkett was found guilty of second degree murder in his trial at Fort Sumner, charged with the killing of Ora Hall, near Ricardo, Feb. 6, and sentenced to forty to fifty years in the penitentiary. His attorney gave notice of appeal. The men were ranchers, and the killing followed a dispute over range land.

The tippie at the Weaver coal mine at Gallup was burned recently. Indications are the fire was of incendiary origin. Authorities are investigating. The loss of the tippie caused a complete suspension of operations at the mine, throwing 172 miners out of work temporarily. The damage was estimated at \$40,000.

Committees are hard at work on the plans for the big Indian fair which is to be held in Gallup, Sept. 28-29 and 30 in the City park. Ray Arlich and Mike Kirk, Indian traders, have lined up Indian dances as follows: The fire dance of the Navajos, the Comanche war dance of the Ajetas, the Eagle and the Butterfly dance of the Hopis.

The nude body of Guy Derner, well-known in Phoenix and throughout Arizona, was found floating in the Arizona canal, near Black Cañon road, about eight miles from Phoenix. On the throat was found a deep abrasion and the chest was bruised in a number of places. About half a mile up stream from where the body was discovered Derner's automobile was found standing on the banks of the canal. On the seat his clothes had been neatly arranged.

Two brides in a double elopement who are being detained in Albuquerque following the arrests of their husbands on a charge of having stolen the two automobiles in which they came here on their honeymoon, requested officers to allow them to obtain work in Albuquerque and not be returned to their homes in Laramie, Wyo. Authorities received advices to hold Leo E. Groat and James A. Holday, the bridegrooms, for authorities at Cheyenne, Wyo., where the automobiles are alleged to have been stolen.

Effective Oct. 4, the wages of all employes of the Ray Consolidated Copper Company who are paid by the day will be increased 10 per cent.

Officials of the coal mines in the vicinity of Ratsa report that the 1921 wage scale went into effect the first of September. The step was made to make the wage scale the same as that of competing fields.

Preliminary statistics by the Department of Commerce reveal a decrease of 38.8 per cent in the lumber cut of Arizona and New Mexico mills during 1921 over the preceding year. These figures are the result of a careful census of the lumber industries in these states conducted by the bureau of the census, Department of Commerce, acting in co-operation with the forest service, United States Department of Agriculture. New Mexico's output fell off 14 per cent, while that of Arizona has shrunk to almost one-third of its 1920 production estimate. The falling off in lumber production in the two states during 1921 is attributed by the forest service to the general slump in business conditions. Some thirty-seven mills were idle in the two states through the year.

George Langford, game warden at Chamberino, N. M., was shot in the back with a pistol the other day while driving on the New Mexico state highway near the Deck farm at Chamberino. He is in a serious condition in Providence hospital in El Paso. Deputy Sheriff Felipe Lucero of La Cueva, who investigated the case, arrested three men. Mystery surrounds the shooting. Two men are said to have been riding in the automobile with Langford. When Langford was shot his car turned over and he was badly injured.

ENTOMBED MEN KILLED BY GAS

TRAPPED MEN MET DEATH WITHIN FIVE HOURS AFTER FIRE.

47 MINERS ARE DEAD

ARGONAUT VICTIMS DIED AFTER HEROIC FIGHT FOR LIFE.

Jackson, Calif.—All forty-seven miners, entombed in the Argonaut mine Aug. 27, are dead. A note found on one of the bodies indicated that all the men had died within five hours of the beginning of the fire, Aug. 27, officials said.

All the miners were found behind the second of two bulkheads they had built in a crosscut, 4,350 feet down in the Argonaut mine. Byron O. Pickard, chief of the federal bureau of mines for this district, was the first man to go behind the bulkhead and discover the bodies.

The note which was found read: "3 a. m., gas bad."

The same note bore a scrawled figure "4," apparently indicating the same man had attempted to leave a word of the condition of the mine at that hour for those who might come after.

Mine officials declared that the condition of the crosscut behind the bulkhead was such that life could not have been sustained there by the entombed men for more than five hours.

The bodies were found piled one on top of another and decomposition had progressed so far that identification would be impossible, Pickard reported.

The officials declared the mute evidence of the men's struggles showed they were forty-seven of the most cool-headed men imaginable.

Sixteen of the entrapped miners removed their clothes to provide material for stuffing the cracks in the wooden barrier, hastily constructed, which was found only this evening.

The barrier was built of earth, rock and debris. However, the gas and fumes from the fire apparently seeped through the first bulkhead and the men fled the site where they were building the second to start a third, farther on.

This third attempt to wall off the death-dealing gas was made at the end of the 4,350-foot crosscut in the Argonaut, but the fact that only a bare start was made at it proved, the mine officials said, that the deadly carbon monoxide and the suffocating carbon dioxide had reached it and performed their fatal office before the forty-seven unfortunates could raise even an excuse for a barrier.

Mine officials said that death had come to the entombed men painlessly. The gases, they said, would produce first a lethargy, then a coma and finally death.

After the discovery of the fire, Aug. 27, government and state mining experts joined with mine officials in forming an official rescue committee and it was decided to cut through to the Argonaut from the adjoining Kennedy mine by means of two abandoned tunnels which were closed up in a fire in the Argonaut two years ago. These constituted extensions of the 3,000 and 3,900-foot levels of the Kennedy. Their progress at times was fairly rapid, at others handicapped by loose and sticky muck.

Jackson Takes Tragedy in Silence.

Jackson, Calif.—Jackson took its greatest tragedy in silence. After the first hasty news that forty-seven men had been found dead in the Argonaut mine, crowds flowed from homes, stores and hotels. Relatives of some of the dead could be seen walking slowly, calmly, to the telegraph office to send word to other relatives in distant cities that there no longer was any hope. Jackson's long period of bitter anxiety, desperate struggle and suspense was over.

British Plan to Prevent War.

London.—The declaration that Great Britain does not intend to engage in any new war, obtained from authoritative sources, coupled with other statements of a modified policy, is taken to mean that the series of cabinet meetings and ministerial conferences in the last few days has been partly in preparation for possible attacks on the British forces by the Kemalists, and partly as a plain preparation for the contemplated general conference for the settlement of the Turkish question.

Unions Win Injunction Tilt.

Chicago.—More than one-third in volume of the government's evidence in its injunction suit against the striking railway shopcrafts was ruled out when Judge James H. Wilkerson upheld the contention of the defense that 283 affidavits recounting violence at the hands of supposed strikers failed to show the persons making them knew they were to be used in court. The strike leaders thus disposed of a large part of the slightly less than 700 affidavits.

Relief Is Found From Stomach Trouble

Hope for the millions of unfortunate men and women who are victims of stomach trouble is sounded by William Hoyle, of 16 Spring St., Bristol, Conn. Mr. Hoyle was a victim of stomach trouble in its worst form, but was completely restored to health by taking Tanlac. He says:

"For fifteen years I had attacks of stomach trouble, and had been in bed for three weeks when I got Tanlac, but three bottles built me up fifteen pounds, and made a well man of me. I am now eating steak and oysters and feel just fine in every way."

Undigested food ferments in the stomach and soon the entire system is filled with poisons. Tanlac was designed to restore the stomach to a healthy condition and build up the whole body. Millions everywhere have acclaimed its wonderful power. Get a bottle today.

Tanlac is sold by all good druggists.—Advertisement.

Leaving South Front Unpacked on Theory That Sun Will Furnish Necessary Warmth Erroneous—Sawdust Not Expensive.

(Prepared by the United States Department of Agriculture.)

Contrary to the usual belief of beekeepers, the loss of heat through the bottom of beehives otherwise insulated is very rapid, so that the insulation on the top and sides is never used to its full capacity, as so much of the heat escapes below. On the supposition that "heat rises," it has been the practice for beekeepers not to insulate the bottoms of hives in which bees are wintered. This is a serious neglect which should be remedied in all commercial insulated hives, according to United States Department of Agriculture circular 222, The Insulating Value of Commercial Double-Walled Beehives, by E. F. Phillips, apiculturist.

Insulating Value.

Tests have been made of the insulating value of eight different types of hives. It is clear from the results of these tests that leaving any part of the hive without insulation renders the escape of heat at that point easy. Some beekeepers, in addition to leaving the bottoms of their hives unprotected, also leave the fronts, facing the south, unpacked, on the erroneous theory that the warming of the hive by the sun will overcome the loss of heat at this point.

Space for Insulating.

The insulating value of all ordinary insulating materials depends on the air spaces confined in the material, and the insulating value is increased by increasing the number and decreasing the size of these air spaces. In

Four inches of insulating material in bottom of winter packing case below bottom of hive.

the so-called dead-air spaces in hive construction there are doubtless convection currents within each cavity which tend to dissipate the heat. Since sawdust or other insulating material costs so little, it would seem advisable to increase the thickness of the space for insulation in cold climates to four or even six inches, allowing the beekeeper to fill this space with cheap insulating materials.

A comparison of these is given in the circular, together with the results of tests made in the form of a temperature table. The circular is available upon application to the United States Department of Agriculture, Washington, D. C.

TO ESTABLISH HONEY GRADES

Beekeepers From Various Parts of Country Send Samples to Agricultural Department.

Samples of honey are being received by the United States Department of Agriculture from beekeepers in all parts of the country in connection with the work of establishing reliable color grades for extracted honey. A new type of spectrophotometer will be used in this work, which will be done by agriculturists of the department in cooperation with the division of grades and standards of the bureau of agricultural economics. It is also planned to use the honey examined in other investigations. The pollen content of the honeys will be identified by the microchemical laboratory of the bureau of chemistry.

SOW RAPE IN FALL FOR HOGS

By Turning Animals on Crop Month or Six Weeks They May Be Cheaply Finished.

Dwarf Essex rape may be sown in late summer or early fall and the hogs given a few start toward fattening. By turning pigs on rape a month or six weeks they may be easily and cheaply finished. According to Minnesota authorities an acre of rape will carry from twenty to thirty pigs for several weeks.

Dwarf Essex rape should be sown on rich land. Five pounds of seed broadcast will sow an acre. The soil should be prepared well and sowing done in late summer or very early fall.

TRACTOR RESPONSIVE TO GOOD TREATMENT

If Not Just Right It Falls Short in Producing Power.

Operator Should Carefully Examine His Machine Every Week or Ten Days and Tighten Up Loose Bolts and Nuts.

The tractor is as responsive to good treatment as an animal or any other machine. In the case of a great many machines the response to good treatment is not so noticeable. This is true because the tractor is a power-furnishing machine, while the average farm machine consumes power, says E. R. Gross of the Colorado experiment station. If the tractor is not just right in every way, it falls short in the production of power. This is sure to be very noticeable, as it is usually pulling a full load and only a

One Man and Tractor Doing the Work of Two Men and Four Horses.

small loss in power cuts down the amount of work done.

In the case of the power-driven machine, any disorder calls for greater power to operate it. The horses or the machine furnishing the power work harder and approximately the same results are accomplished. Hence it is much easier to overlook a slight indisposition on the part of a power-consuming machine than on the part of the power producer.

If any part of which power is transmitted to the wheels, it may cause a reduction of power. The tractor operator should examine his machine thoroughly every week or ten days to prevent such a loss. A bolt in the crank case is loose, the valve stem loosens, the valve is out of proper time and the cylinder does not give full power. The clutch is not adjusted to take hold evenly, the slipper here causes loss of power. Similar leaks may develop in the fuel system and the ignition system. Any of these cause heavy drains on the power. Usually they can be quickly repaired if attended to early. If not, they may result in a breakdown involving a larger repair bill and loss of much valuable time.

The three-beat rhythm of the tractor should be a part of the operator so that he detects the trouble in its earliest stage.

SELF-FEEDER FOR CHICKENS

Home-Made Contrivance Reported to Department of Agriculture From Indiana Agent.

A good home-made self-feeder for poultry reported to the United States Department of Agriculture by the county extension agent of Knox county, Indiana, is one made of an old mower wheel, a barrel with both ends knocked out, an old washtub, and a small platform of rough boards. The wheel is first laid on the platform. The barrel is then placed on the wheel, filled with dry mash, and the tub turned over the top of it for a cover. A barrel should be used which leaves just enough space between its edge and the rim of the mower wheel to allow room to feed. This prevents the feed from being scratched outside the rim.

SILO IS HANDY IN EMERGENCY

In Seasons of Drought Farmer Has Supply of Feed for Stock Stored in Years of Plenty.

In seasons of drought, when the pastures are "burnt up" and the crops partially or totally ruined, the farmer having live stock must dispose of a large part of his herd—usually at a sacrifice, or buy high-priced feed. Here the farmer with the silo is ahead of the man who has none. He can keep his stock in good shape by giving them the silage he has stored from years of plenty. Corn properly ensiled will keep for many years.

HAVE COLLAR FIT PROPERLY

One That Sets Perfectly in Spring May Be Too Large for Fall—Pads Are Necessary.

A properly fitted collar is one that lies snugly along the sides of the neck with room enough at the bottom to allow a hand to be passed through. Scent pads are necessary to adjust the collar to different horses and are also made necessary by the loss of flesh; a collar that fits perfectly in the spring may be too large by fall.

DYED HER BABY'S COAT, A SKIRT AND CURTAINS WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old, worn, faded things new. Even if she has never dyed before, she can put a new, rich color into shabby skirts, dresses, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade or run.—Advertisement.

Ungallant.

The car was crowded, for it was the time of day when workmen were returning home from their work. Among the stragglers was a woman who, not being pleased with the service she was receiving, was trying in a roundabout way to induce a certain man to give up his seat. Finding her efforts useless she said in despair, "He would not get up for his grandmother."

The man referred to, feeling that forbearance had ceased to be a virtue, turned to his tormentor: "Do you think a woman should vote like a man?" he asked.

"I surely do," she answered. "Then stand like a man," was his reply.—Indianapolis News.

A FEELING OF SECURITY

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit-producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything. It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

HAD TO MAKE FULL ROUND

Clergyman Who Wanted to Test Virtues of the Treadmill Given Full Opportunity.

A Britisher tells a story of a member of the clergy who took too large a mouthful on one occasion.

He was visiting the county jail and expiated to a friend who was with him on the virtues of the treadmill. Warming up with his theme, he declared that he often wished he had one at home to give him the gentle exercise he required, and to remove his friend's skepticism, he asked the warden to give him a turn.

Round went the wheel, the clergyman declaring that the movement was delightful; but after two minutes he had had enough and desired the officer to stop the mill. To his horror the officer answered: "Very sorry, sir, but I can't. It's timed to go 15 minutes and won't stop."

SAM SURELY MISJUDGED MULE MODERN DANCE SUMMED UP

Libelous to Call Animal Blind When Its Only Fault Was Absolute Lack of Fear.

Mose was trying to sell Sambo a mule. The mule was lying on the floor of the barn. "I don't want no daid mule," said Sambo.

"He ain't daid," said Mose; and with his whip he forced the mule to a standing posture. But Sambo remained cold on the proposition.

"Ah see he ain't daid," said Sambo. "But he kin't run, an' Ah done wants a mule as runs."

Mose, thus challenged, with a vigorous kick so energized the mule that away it went, running down the street, with marvelous speed.

But Sam's delight at the activity of the mule was short-lived, for bang, the mule ran head-on into a tree.

"Fo' de lord," exclaimed Sam, "he ain't daid; he kin run, but he's blind. Ah, doan' wan no blind mule."

"What's dat you say?" cried Mose. "You all calls a mule like dat blind? Why, lordy, lordy, boy, dat mule ain't blind. He jes doan' give a whoop!"—Judge.

Two With a Single Thought. While hunting deer in northern Wisconsin I hid in the grass near a river. Soon I saw something move across the stream back of a log; a bear, I decided, and moved into position to get a good shot. El Sr. R. F. Asplund bino ante el cuerpo representando a la comision de tasacion, con respecto al presupuesto del condado para gastos en los diferentes fondos por el año 1923, despues de mucha deliberacion un presupuesto tentativo fue preparado por el cuerpo y el Sr. Asplund; y el escribano fue instruido de entregar el mismo a la comision de tasaciones del estado para su aprobacion y consideracion.

Una carta de la comision de tasaciones fue presentada al cuerpo en la cual la dicha comision pedia que uno de los miembros del cuerpo estuviera presente en Santa Fe, en el día 7 y 8 de Agosto, siguiente, para discutir valuaciones puestas en ganaderia y terrenos de pasto dentro del estado por asesores y cuerpos de comisionados. El cuerpo instruyo al escribano de mandar una copia de las valuaciones como puestas por el asesor y aprobadas por el cuerpo de la alacion a la comision de tasaciones del estado.

No habiendo otro negocio ante el cuerpo, el mismo se prorrogo para juntarse el día 7 de Agosto, 1922 para hacer un aporcionamiento de los fondos de caminos y puentes del condado, para los diferentes caminos, de ser gastos al año venidero.

One Solid Year of Achievement

Republican Administration's Program of Construction Being Fulfilled

Congress Is Industrious

Record of Accomplishments Not Excelled in Annals of Legislation

(By Rep. Simon D. Fess (Ohio), Chairman Republican Congressional Committee.)

The World War bequeathed to the United States, in common with every other nation gigantic debts, tremendous expenditures, burdensome taxes, dis-jointed economic conditions and general unrest. No previous administration since the establishment of our Government came into power with greater domestic problems demanding solution at its hands than confronted the Republican administration on March 4, 1921.

Immediately upon the inauguration of the President and his call of the special session of the Congress a program of rehabilitation was outlined and work immediately commenced to combat the unemployment problem.

Under the leadership of the President, the character of many of the immigrants was a menace to our social and political institutions. To protect American labor and American institutions against this invasion a law was enacted limiting further immigration to but three per cent of the normal supply in America.
