# Why is resource sharing important?

- Not everything is online. Not everything is free.
- Increase in number of publications.
- Increase in subscription costs.

**No library can own or license everything their users might want.**

# Why is international resource sharing important?

- The libraries of each country cannot own or license every publication from every country.
- To spread knowledge of your country's literature and culture beyond your borders.
- To create scholars and advocates around the world.

# Why is international resource sharing important?

A scientist from Liberia said after the Ebola outbreak...

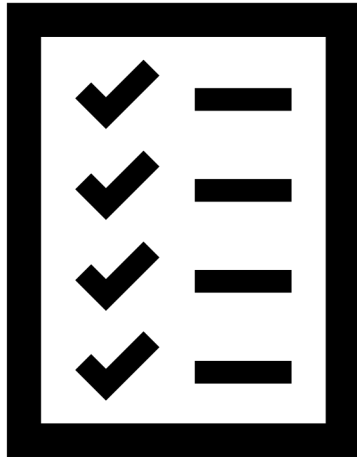

*“Part of the problem is that none of these articles were co-written by a Liberian scientist. The investigators collected their samples, returned home and published the startling results in European medical journals. Few Liberians were then trained in laboratory or epidemiological methods. Even today, downloading one of the papers would cost a physician here \$45, about half a week’s salary.”*

*“Yes, We Were Warned About Ebola.” New York Times, 17 April 2015.*

The study of gender differences began in earnest in the 1970s and has since increased dramatically to infiltrate virtually all fields of study in the social and behavioral sciences. Along the way, it was discovered that while women very often think and behave differently than do men, industrialized societies cater to masculine perspectives. The "Psychology of Women" emerged as a field of study focusing on just those areas in which women most often butted against assumed roles. And similarly, in the 1990s, the "Psychology of Men" emerged to focus on the same issues for men. The **Encyclopedia of Gender** covers all three areas under one cover, discussing psychological differences in personality, cognition, and behavior, as well as biologically based differences and how those differences impact behavior. Coverage includes studies of these differences in applied settings
