Titre de la revue	Journal of Stomatology, Oral and Maxillofacial Surgery
ISSN	2468-7855
Mots-clés	Adipose tissue [6], Benign oral neoplasm [7], Lingual tumor [8], Tongue lipoma [9]
Résumé en anglais	Lipomas are the most common benign tumors in human body but their occurrence in the oral cavity is very rare. They present as a slow growing, yellowish submucosal and painless mass. The treatment consists of a simple surgical excision. The histopathologic examination confirms the diagnosis. We present a case of tongue lipoma.
