## Explanation of Stimulus Labeling

Experimental stimuli can be viewed as .mp4 videos in the “Exp 1a Stimuli” and “Exp 1b Stimuli” folders. These videos are labelled by experiment section (1a, 1b), visual stimulus (male face/“Mal”, female face/“Fem”, fixation cross/“Fix”), and which gender (male/“M”, female/“F”) is voicing which of the six word lists (L1-L6). Thus the video labelled “1a-FemF1M2” corresponds to the female face (Fem) on screen with a female voicing list 1 (F1) and a male voicing list 2 (M2) in experiment 1a. There are 36 videos in total; 18 in each of the two folders, with six male face, six female face, and six fixation cross variations each.
