County Agent's Column

By R. A. Mabry

This column this week was prepared by Miss Wilma Vanover, Home Demonstration Agent.

Controlling Pantry Pests. Storing grain products in the home from destruction by insects and pests that destroy food is both food and money. It is estimated in the United States that only 50 cents worth of food is lost because it had become infested with insects, the loss would be about 15 million dollars.

Control "pantry pests" just as you would control insects.

Clean your pantry shelves thoroughly. Particles of food left on packages, insects can live on this food. Cleaning shelves removes this source of infestation.

Remove all packages of food from a 5-percent DDT solution on the interior surfaces of the cupboard. A deposit of DDT will remain after the solution has dried. These crystals will be effective for several months. Wait until the spray has dried before putting packages on the shelves. The dry deposit will not harm food on the package.

Inspect all packages of food

FFA Camp Has New Soft Drink Fountain

Future Farmers who attended the State Camp at Harrisburg this year will be surprised with additions to the equipment. The J. J. Newberry Company presented a 50-foot soda fountain, valued at several thousand dollars. This will enable the camp to serve ice cream and soft drinks, which it has not been able to do in the past.

The camp, located on a 100-acre tract at Hardinsburg, is opened yearly for Future Farmer members all over Kentucky. The tract is heavily wooded and has a large lake for fishing and swimming. It was formerly a C. C. C. camp and was purchased by the Kentucky Association of Future Farmers.

for insects. Food is not ruined just because a few beetles have crawled into it. Heavily infested products may have to be fed to pets, chickens, or livestock.

4. Most dry food products can be freed of insect life by heating them in the oven at 140°F for about one-half hour. Small packages can be heated just as they are. The contents of larger packages may be spread on cake or pie pans so the heat can penetrate more easily.

5. Store such food in clean metal or glass containers with tight fitting lids. Note: Cleaning and spraying pantry shelves with 5 percent solution of DDT also will prove effective in helping control other pantry pest such as ants and cockroaches.

AMERICAN COMMANDER - Col. Frank Howley (above) - American commander for Berlin, discussing Soviet boycott of the city government, said "The Kommandatura is not finished, the Russians just left it. There is no legal reason why it can't continue on a three-power basis." (AP Wirephoto)

Farmers of America about 12 years ago. Since that time, thousands of farm boys have enjoyed weeks of recreation and education there.

Everybody reads The Leader!

News From The Past

News representing lives, hopes, dreams and ambitions of those who made up the populace of Princeton and Caldwell county almost 40 years ago recorded nowhere but in the yellowed files of Twice-A-Week Leader of those years will be published as a regular Leader feature. The articles are reproduced just as the Princeton reporters, shortly after the turn of the century, wrote them.

July 13, 1926. Hon. R. I. Rice Eblen has gone to Washington, D. C., for an extended visit to her sister, Miss Mary Lee Eblen. While in the East, Miss Mildred will visit New York, Baltimore, Boston, Philadelphia and Pittsburgh.

July 13, 1926. Misses Mildred Norman Greer and Elouise Martin spent the week-end quite pleasantly with Miss Evelyn P'Pool at Hopson.

July 13, 1926. Mrs. Paul Cunningham returned from Eddyville Saturday afternoon, where she attended the teachers' examination conducted by County Superintendent Martin.

July 13, 1926. Mrs. Shelley Eldred and daughter, Miss Louise, left last Friday on an auto trip to Louisville, Lexington and Covington. They were accompanied as far as Louisville by Mrs. Georgia Sacrey.

July 16, 1926. Mr. and Mrs. J. Finkel, of Nashville, after a pleasant visit to Mr. and Mrs. Saul Pogrosky, returned home Tuesday afternoon, accompanied by Misses Dorothy and Gertrude Finkel, who were also Mr. and Mrs. Pogrosky's guests.

July 16, 1926. Miss Mildred

July 16, 1926. Mr. and Mrs. Gerard Kevil and baby, of St. Louis, are here for a visit to relatives.

July 30, 1926. Mr. and Mrs. Runsey Taylor are the proud parents of a fine boy baby, Runsey, Jr., born yesterday at noon, July 29.

August 3, 1928. Claude Koltinsky and sister, Miss Rose Emma, have returned from a two weeks' motor trip to Toledo, Cleveland, Dayton, Ohio, and other points east. They report a delightful trip.

August 6, 1926. Hewlett Morgan, James Waddington, James and Charles Catlett returned last night from a few days' camping at the Hammond Lake in Trigg county. They report a good time, but lots of mud.

August 6, 1926. Miss Norine McGough has returned from a pleasant visit to the Misses Brooks at Sturgis.

Money was first milled (stamped with raised borders and fluted or grooved edges) to prevent the fraudulent removal of metal and to protect coins from wear.

THE GARDEN

By JOHN S. GARDNER, Kentucky College of Agriculture and Home Economics

TIMELY TOPICS

European Cornborer: This insect has invaded many plantings of sweet corn and although the early planting may escape serious loss, plantings made later may not fare so well. In fact, egg-masses have been seen on sweet corn not two feet tall. A good general recommendation would be to spray with DDT (2 tablespoons of 50% Wettable a gallon of water) using the bean beetle nozzle pointed down over the stalks so that the spray may lodge at the bases of the leaves, where for the most part the borers feed awhile before entering the stalk itself. The spray should be used at the rate of 1 gallon to 150 feet of row.

Beans: Although Mexican beetle numbers so far have been smaller than usual, the "general feeder" damage, the roundish holes eaten clear through the leaves, keep being serious. Ordinarily, one might wait, hoping that these insects would finally leave, but now it would seem the part of wisdom to consider them seriously enough to dust with rotenone.

Tomato Blight: To date no late blight, the kind that made such short shift of tomatoes last year and the year before, has been found. However, as the spraying for the severe form of blight controls also the milder form that always comes, and in fact is here, any spraying that is done will pay back in dividends of more tomatoes, and sweeter tomatoes, because of the leaves having been held intact.

Cultivation: Dry weather has come to some parts of the state and more may be in the offing. Accordingly, from now on, shallow cultivation should be the rule, deep enough only to upset weeds. One-half inch is all right. While earlier in the season there may be virtue in deep stirring, especially in the middles, it should be remembered that as the vegetables grow their roots spread wider, and even "busting" the middles may do harm. All that working soil can do is to kill weeds and "break the crust", and both can be perfectly done with only shallow stirring high enough never to encounter vegetable roots. "Shaving" and "scalping" should be the rule from now on.

THE GOLF SHOT THAT COST \$50,000

A "Sunday golfer" hooked. The ball hit a woman driving a car and the car turned over. The occupants, permanently disabled and disfigured, sued for \$50,000.

If you play golf, you need our Comprehensive Personal Liability Insurance.

MARK CUNNINGHAM

TO SCHOOL BY PLANE - Deborah Conklin, 11, who lives in North Bend, Ore., leaves airliner in Eugene, Ore., for 40 r classroom after 120-mile flight. Parents believe \$6 fare is cheaper than board and room in Eugene. (AP Wirephoto)

should notify VA immediately of their new permanent address.

VA officials said a veteran's government insurance records are kept in the VA branch office supervising the area in which he maintains his permanent address.

The sooner the veteran notifies VA of his change in residence, the sooner VA can transfer his insurance records to the VA branch office having jurisdiction over the area in which he will reside.

When advising VA of his new address, the veteran should identify himself fully, indicating his government insurance certificate number, former address and new address. Changes in address may be noted on the space provided for such changes on the flap of the regular VA remittance envelopes.

Correspondence courses at government expense are available to World War II veterans under education and training provisions of the G. I. Bill, Veterans Administration officials have announced.

Although no subsistence allowance is paid by VA, eligible veterans may take correspondence courses through approved institutions, with one-fourth of the enrollment time charged against their period of eligibility. Cost of the courses is limited to \$500.

QUESTIONS AND ANSWERS Q. Have I any recourse to civil courts if I do not like VA's decision on my claim for disability compensation?

A. No, the law specifically provides that the decision of the Administrator of Veterans Affairs in such matters is final and conclusive.

Q. I am a World War II veteran and receive disability compensation. If I take a three hour a day job, will my compensation be discontinued?

A. So long as your disability remains compensable, it will be continued. The fact that you are

employed does not bar payment of compensation if you are disabled as result of a service-connected condition.

Q. I lost the use of my legs in line of duty during World War I and would like to know if I can get a car from the government?

A. Under existing law, the authority to furnish automobiles to eligible amputees is limited to World War II veterans.

No species of birds or fowls now existing have teeth.

When Your Back Hurts - And Your Strength and Energy Is Below Par. It may be caused by disorder of kidney function that permits poisonous waste to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove excess acids and other waste matter from the blood. You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up nights, leg pains, swelling, sometimes frequent and scanty urination with smarting and burning is another sign that something is wrong with the kidneys or bladder. There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has won countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.

Mr. and Mrs. Hampton Carner and sons, Phillip and John H. Morganfield, were visitors during the weekend of Mr. and Mrs. Arlie Vinson.

Mr. and Mrs. Charles Young, Evansville, spent the weekend with her sister, Mrs. Veldin Yandell, and Mr. Yandell.

Mr. and Mrs. John Phelps and daughter, Suzanne, Lexington, spent the weekend as guests of his father, F. M. Phelps and other relatives.

Miss Dorothy Brasher is visiting Miss Jodie Wakeland in Greenville, for a few days.

Mr. and Mrs. Seldon McElroy, Alton, Ill., spent the weekend with her parents, Mr. and Mrs. Coy Moore.

Mr. and Mrs. Virgil DeBoe, Colorado Springs, Colo., are visiting his parents, Mr. and Mrs. M. R. DeBoe.

Mr. and Mrs. George Johnson, Paducah, visited her parents, Mr. and Mrs. C. T. Henson, Sunday.

Rev. Donald Deane, Mr. and Mrs. Virgil Fuller and little daughter, Sharon, and Mr. and Mrs. Ivan H. Bennett, enjoyed picnic dinner at Kuttawa Springs.

Mr. Howard Rice, Princeton, was the dinner guest of Mr. and Mrs. W. M. Young Sunday.

Mr. Roy Rucker, who is a patient at the Outwood Hospital, Dawson Springs, spent several days with his mother, Mrs. Essie Rucker. We are glad to report his condition is much improved.

Mr. and Mrs. Byron Parr and Mrs. Reg. Hubbard and children, left Monday for Lincoln Park, Mich., after spending last week with Mrs. Florence Parr and other relatives.

Mr. and Mrs. Caleb Oliver, Gary, Ind., spent the holidays

**HAPPY AFTER NO HITTER** — Bob Lemon (center), Cleveland Indians pitcher, is congratulated in the locker room at Briggs Stadium in Detroit (June 30) after he hurled a no hitter against the Detroit Tigers. At left is Catcher Jim Hegan and Outfielder Dale Mitchell is at right. Mitchell saved the no hitter in fourth inning of the night game, when he made a fine catch of George Kells smash against the right field wall. Indians won, 2 to 0. (AP Wirephoto)

## State To Start School For New Police Recruits

### Officers Will Be Court-ous To Public But Not Lax On Law, Says Chief

Frankfort, July 6 — Commissioner of State Police Guthrie F. Crowne has announced a training school will be conducted during the month for State police recruits. The new police setup took effect last Thursday.

Arrangements are being made with trained police authorities for the school, including Federal Bureau of Investigation representatives.

Crowne said qualifications for new patrolmen include: Age, 21 to 35 years; education: high school graduate or its equivalent in police experience; good physical condition as determined by Board of Health standards.

All police are subject to intensive screening and are required to pass a mental test along police lines.

Crowne announced appointment of two captains to head major divisions in the police setup. They were:

George Helm, 38, Austin, former school teacher and high school principal in Barren county schools. Helm attended Western State Teachers' College and McKinney High School. In addition to teaching he coached basketball. He will be captain of training and Personnel.

Field operations and traffic section will be headed by Estill Jones, 36, Madisonville for 5 1/2 years member of the State Highway Patrol, and 4 1/2 years military experience with the military police unit in India and the South Pacific. He also served as chief of the security section at Wright Field, Dayton, O.

Jones attended Madisonville grade schools, Sturgis High school and the University of Kentucky. He was lieutenant in charge of safety with the highway patrol during his previous service with that organization.

"It will be our duty and chief aim to build an efficient police organization with courtesy as its watchword," said Crowne. "We, of course, do not intend to be lax with law enforcement activities. Law officers don't have to be brutes. They can be courteous to the public and should be."

An ostrich egg weighs about three pounds. The empty shell can hold the contents of 18 eggs of domesticated fowl.

## Cook with Kerosene!

- Save Time
- Save Work
- Save Money

## Cook with PERFECTION!

For efficient, thrifty and convenient cooking, the Perfection Kerosene Range is the first choice of thousands of good cooks.

That's because Perfection has the built-in qualities that every good cook demands: instant heat at any time... complete combustion of all the fuel... wide range of heat output for slow simmering or rapid boiling... clean and odorless... porcelain enamel finish... safety.

You save time, work and money when you cook with a Perfection Kerosene Range.

with her mother, Mrs. Mattie Rice.

Mr. and Mrs. L. E. Harper, Lincoln Park, visited during the holidays with her mother, Mrs. Florence Parr.

Mr. Byrd Hughes, Evansville, spent the weekend at his home here.

Rev. Donald Deane spent Monday in Paducah.

Mr. and Mrs. Arnold Burklew and sons, Steve and Donnie, Princeton, Mr. and Mrs. Paul Moore and daughter, Bonita, Princeton, Mr. and Mrs. Seldon McElroy, Alton, Ill., Mrs. Lee Burklow, and Mr. and Mrs. Coy Moore and son, Junior, enjoyed picnic dinner at Kuttawa Springs Sunday.

Guests Sunday of Mrs. Florence Parr and Miss Dorothy Parr were: Mr. and Mrs. L. E. Harper, Mrs. Reg Hubbard and children, and Mr. Byron Parr, all of Lincoln Park, Mich., and Mr. and Mrs. Herbert Cochran, and son John, Marion.

Mr. and Mrs. Mitchell Lowry and sons, Wayne and Donald, Evansville, spent the weekend with his mother, Mrs. Belle Lowry. Wayne and Donald remained over for a week's visit their grandmother.

Mrs. Essie Rucker left Monday for Nashville, where she will consult an eye specialist.

Mr. and Mrs. L. E. Harper, Mr. and Mrs. Herbert Cochran and son, John, Mrs. Florence Parr and Miss Dorothy Parr were Monday night dinner guests of Mr. and Mrs. Hugh Hunsaker in Princeton.

Mr. and Mrs. Everett Rowe and son, Everett, Jr., Johnson City, Tenn., Mr. and Mrs. Mitchell Lowry and sons, Wayne and Donald, Evansville, Mr. Leaman Lowry, Evansville, Mr. and Mrs. Herman Lowry, Princeton, Mr. Virgil Lowry and Kermit Lowry.

Dinner guests of Mrs. Mattie Rice Sunday were: Mr. and Mrs. Caleb Oliver, Gary, Ind., Mr. and Mrs. Bill Smith and children, Mrs. W. B. Conway and children, and Mr. and Mrs. George Milroy.

Mr. and Mrs. Mark Crider, and Mr. Ted Crider, Chicago, spent several days with Mr. and

Mrs. Veldin Yandell, returning to their home in Chicago Monday.

Miss Carol B. Quertermous, Murray, spent last week with her father, J. B. Quertermous.

The Young People of the First Presbyterian church joined the Young People's groups of the Marion, Crayne and Frances church in a hay ride, Thursday night. Attending were: Jane Belt, Betty York, Joan York, Marcella Holloman, Barber Holloman, James York; Donald Gibbs and Billy Travis.

### Book Review

By W. G. Rogers

**ISABEL AND THE SEA**, by George Millar (Doubleday; \$3.50)

When Millar was a boy, he sailed a little hired boat around the pond in London's Regent Park. With that training, plus a little book-learning, he bought the "Truant," a 31-ton (yacht measurement) auxiliary ketch, and he and his wife Isabel sailed her from England to Greece.

This book tells their experiences... across the Channel, down the Seine, Loire, Saone and Rhine valleys to Marseilles, along the Cote d'Or and the Italian shore and finally over to Athens... a pair of landlubbers getting their sea legs.

Some one told them how to tie a few special knots, and to navigate; and armed with a barometer, kitchen and dining-room utensils, buckets, ropes, a dinghy and the spirit of adventure, they took their 49-foot rolypoly tub across the continent.

Aside from a couple of bad storms and the need to guard their possessions in some of the seamier Italian ports, they had no 'breathtaking' experiences. It was a hard job at times, but a good job if you liked it. If the voyage was the answer to Millar's wanderlust, the book may prove to be the answer to yours.

The word "tobacco" is derived from the early West Indian name of the pronged stick, "tobago".

### It Means: Tropical Disease Among Veterans

By Vern Haugland  
 Washington — An authority on tropical diseases says a million Americans who don't really know they are suffering from some of the most common tropical diseases picked up during military service in the tropics.

Dr. D. Mackie, Winston-Salem, N. C., says he has been told by his colleagues that they have been told by their doctors that they have some of these diseases or are psychoneurotic. On the other hand, he says that a large number of veterans are wrong in collecting compensation for tropical diseases. He says that malaria really is a simple, domestic disease and no more troublesome than a cold.

Most of the ailments the GI's brought home from the Pacific, the C-B-I theater and the Middle East—amoebic dysentery and hookworm—are a threat to U. S. Public Health, Mackie said in an interview. Of veterans treated at his hospital, 36 percent had parasitic infections, of which 36 percent had amoebic dysentery and 10 percent had hookworm.

Mackie said the southern states, popularly believed to have virtually rid themselves of their more notorious diseases, still

**FIRES ADD HAVOC OF JAPANESE QUAKE** — Fires, some still burning as this aerial photograph was taken by Associated Press Photographer C. P. Gorry, completed the destruction wrought in Fukui, Japan June 28, by an earthquake. In this area, the only buildings left standing were a few of modern construction and a cluster of frame structures. (left foreground) along the waterfront. (AP Wirephoto)

have far to go. Among 1,000 patients examined at North Carolina Baptist Hospital last year—few of them charity patients—6 percent had hookworm and 12 percent amoebic infection. As for malaria:

"I have yet to see, in a year of treating veterans at Winston-Salem, a single individual showing any valid evidence of disability from malarial infection. The hazards of malaria have been terrifically exaggerated, especially as regards late relapses. The dangerous type that kills in the tropics very rarely relapses more than once or twice. The malaria cases without exception have proved to be the simple vivax malaria that we have in the United States, with no more than two or three days of illness a couple of times a year."

### Largest Budget For University

A budget of \$6,888,377.26, largest in the 83-year history of the University of Kentucky, has been adopted for the 1948-49 fiscal year. Of this amount, a little less than two and one half million dollars came from state funds while the remainder is made up of federal grants, auxiliary enterprises of the University such as dormitory rentals and student fees, and U. K. sales and services.

Provided for the Division of Colleges is \$4,526,750. Frank D. Peterson, University comptroller, pointed out that the remaining \$2,361,627 is returned directly to the people of the state through adult education off the campus and for other services.

Capital outlay for buildings not now under construction is not included in the budget. Among the buildings needed are two residence halls for women, a new residence hall for men, a science building, a journalism-publications building, and a building for the College of Pharmacy. The newly-created State Building Commission controls state funds for building purposes.

"The 1948-49 budget is based on an estimated enrollment of 4,000 in the summer session and 7,000 during the regular semesters of the school year."

### College Radio Schedule

"Keep Your Pullets Growing" is the advice which W. M. Insko, Jr., of the poultry department of the College of Agriculture and Home Economics, University of Kentucky, will give over radio station WHAS on July 12 at 12:45 p.m. On succeeding days at that same hour, the following will be heard: July 13, C. E. Bishop, "The Importance of Live-stock Production;" July 14, Robert Ford, "Farm News-casts;" July 15, P. E. Karraker, "Cover crops;" and July 16, "Questions from Farm People." On July 17 at 12:15 p.m., Miss Helen Wilmore, home economist, will discuss "Pointers in Selecting Kitchen Utensils."

### Franklin Women Hold Dress Show

More than 150 women's dresses and suits and several children's garments were modeled in a style revue presented by the Franklin County Homemakers Clubs. Although dresses and suits of cotton and rayon predominated, several suits were shown. In many instances, hats and bags had been made to complete the costumes. Mrs. Bronston Kenney, county clothing leader, reported that the cost of the garments was estimated at \$384, representing a saving of \$6.15. Flat Creek Club took first place in attendance, every member being on hand to exhibit a garment.

*Now its proved quality becomes more impressive than ever*

**...AND CHEVROLET'S LOW PRICES**

*are even more attractive than in the past!*

**FIRST in Value . . .**  
**FIRST in Big-Car Quality at Lowest Prices . . .**  
**FIRST in Registrations**

NOT only does Chevrolet stand out as the first and only low-priced car with all the following major advances which comprise the soundest and best in modern motoring . . . not only does it offer all these major advantages of Big-Car quality at lowest prices . . . but it offers them at prices that are now definitely and decisively lower than those of any other car that even remotely approaches it in quality!

It's the first and only low-priced car with the original and outstanding Unitized Knee-Action Ride. It's the first and only low-priced car with a world's champion Valve-in-Head Engine. It's the first and only low-priced car with the enviable Body by Fisher. It's the first and only low-priced car with the triple safety-protection of Fisher Unisteel Body-Construction, the Unitized Knee-Action Ride and Positive-Action Hydraulic Brakes.

And yet, despite the fact that CHEVROLET AND ONLY CHEVROLET IS FIRST to offer all these major advancements of low-cost motoring, it holds an even greater price-advantage and gives you even more value for your dollars in comparison with other automobiles today than at any previous time in Chevrolet history!

*Compare Values!... Compare Prices!...*

**CHEVROLET — and Only CHEVROLET — IS FIRST!**

**Stevens Chevrolet Company**

### THIS ROBBER WORKS THE YEAR ROUND

Rainwater is a soil robber. As it seeps down through your farm land it dissolves and carries with it hundreds of pounds of lime from each acre each year.

Soil experts call it leaching and have found that this process which goes on winter and summer, day and night—the year around—is robbing each acre of your farm land of lime equal to from 200 to 500 pounds of limestone every year.

You can't keep cashing checks at your bank unless you also make some deposits. Neither will your farm stay productive and profitable unless you replace the lime that has been robbed from your soil by leaching.

### It Means: Tropical Disease Among Veterans

By Vern Haugland  
 An authority on tropical diseases says a million Americans who don't really know they are suffering from some of the most common diseases picked up during military service in the tropics.

Dr. D. Mackie, Winston-Salem, N. C., has been told by their doctors that they have malaria or are psychoneurotic. On the other hand, he says many of the veterans are wrong in collecting compensation for malaria attacks. He says that little malaria they really get is a simple, domestic disease and no more troublesome than a cold.

Of the ailments the GI's brought home from the Pacific theater, the C-B-I theater and the Middle East—amoebic dysentery and hookworm—are a threat to U. S. Public Health, Mackie said in an interview with veterans treated at his hospital in Princeton, N. J. Of tropical medicine he said that 36 percent of the veterans had parasitic infections, of which 36 percent had amoebic dysentery and 10 1/2 percent had hookworm.

Amoebic dysentery is very common, and there is never a

**FIRES ADD HAVOC OF JAPANESE QUAKE** — Fires, some still burning as this aerial photograph was taken by Associated Press Photographer C. P. Gorry, completed the destruction wrought in Fukui, Japan June 28, by an earthquake. In this area, the only buildings left standing were a few of modern construction and a cluster of frame structures. (left foreground) along the waterfront. (AP Wirephoto)

have far to go. Among 1,000 patients examined at North Carolina Baptist Hospital last year—few of them charity patients—6 percent had hookworm and 12 percent amoebic infection. As for malaria:

"I have yet to see, in a year of treating veterans at Winston-Salem, a single individual showing any valid evidence of disability from malarial infection. The hazards of malaria have been terrifically exaggerated, especially as regards late relapses. The dangerous type that kills in the tropics very rarely relapses more than once or twice. The malaria cases without exception have proved to be the simple vivax malaria that we have in the United States, with no more than two or three days of illness a couple of times a year."

For the future, Mackie recommends:

1. A survey to determine the true incidence of tropical diseases. He estimates infected veterans at about 1,000,000.
2. Training of doctors and laboratory specialists in tropical medicine. At present, he says, the U. S. has only 12 doctors in this field, most of them with the VA.
3. Meanwhile admit proven cases of tropical diseases to the VA hospital most convenient to the physician qualified to give treatment.
4. Offer "common decency and fairness to the boys who had too much character and guts to insist on being evacuated" when

ill in the tropics. Many of these men have no military hospital record and can not get free veterans medical assistance.

### Largest Budget For University

A budget of \$6,888,377.26, largest in the 83-year history of the University of Kentucky, has been adopted for the 1948-49 fiscal year. Of this amount, a little less than two and one half million dollars came from state funds while the remainder is made up of federal grants, auxiliary enterprises of the University such as dormitory rentals and student fees, and U. K. sales and services.

Provided for the Division of Colleges is \$4,526,750. Frank D. Peterson, University comptroller, pointed out that the remaining \$2,361,627 is returned directly to the people of the state through adult education off the campus and for other services.

Capital outlay for buildings not now under construction is not included in the budget. Among the buildings needed are two residence halls for women, a new residence hall for men, a science building, a journalism-publications building, and a building for the College of Pharmacy. The newly-created State Building Commission controls state funds for building purposes.

The 1948-49 budget is based on an estimated enrollment of 4,000 in the summer session and 7,000 during the regular semesters of the school year.

### Coal Research At UK

A scholarship fund amounting to \$2,500 annually has been established in the College of Engineering at the University of Kentucky for research of value to the coal industry. Presented by the Consolidation Coal Company, Jenkins, the grant will be used for graduate scholarships.

### Franklin Women Hold Dress Show

More than 150 women's dresses and suits and several children's garments were modeled in a style revue presented by the Franklin County Homemakers Clubs. Although dresses and suits of cotton and rayon predominated, several suits were shown. In many instances, hats and bags had been made to complete the costumes. Mrs. Bronston Kenney, county clothing leader, reported that the cost of the garments was estimated at \$384, representing a saving of \$6.15. Flat Creek Club took first place in attendance, every member being on hand to exhibit a garment.

### THIS ROBBER WORKS THE YEAR ROUND

Rainwater is a soil robber. As it seeps down through your farm land it dissolves and carries with it hundreds of pounds of lime from each acre each year.

Soil experts call it leaching and have found that this process which goes on winter and summer, day and night—the year around—is robbing each acre of your farm land of lime equal to from 200 to 500 pounds of limestone every year.

You can't keep cashing checks at your bank unless you also make some deposits. Neither will your farm stay productive and profitable unless you replace the lime that has been robbed from your soil by leaching.

## 2 New Projects To Aid Marketing Of Crops Launched

State Program Will Help Stabilize Agricultural Production And Farm Income

Frankfort, July 6. — Two projects designed to help stabilize agricultural production and income in Kentucky, and to provide a thorough analysis of market supplies and facilities have been launched under supervision of Commissioner of Agriculture Harry F. Walters and Director of Markets J. Dan Baldwin.

The projects, which got under way last Thursday, will cost \$30,000, half of which will be financed with federal matching funds supplied by the Hope-Flannagan Agricultural Act.

Purpose of the first project, that of increasing marketing efficiency through development and dissemination of special market information on the supply, demand, location, transportation and price of agricultural commodities, has as its main object to help stabilize agricultural production and income in Kentucky.

The second calls for obtaining and analyzing of new basic data pertaining to market supplies, facilities, movement and prices to aid in improving distribution methods and the expansion of market outlets for Kentucky farm products.

The latter goal was one specifically advocated and promised to Kentucky farmers by Gov. Earle C. Clements when he was a candidate for Governor in 1947, and reiterated by Commissioner Walters as a prime aim of the administration.

Objective of the latter program is to "make available to those engaged in developing more efficiency marketing systems in Kentucky and to the public the basic data on supplies, utilization

**LOST GIRL FOUND** — Five-year-old Sandray Nyphen hungrily munches a sandwich at Spokane, Wash., and crowds back tears after spending night (July 2) lost in hills. Her mother, Mrs. Esther Nyphen, comforts her. The child said she spent the night "under a big tree." (AP Wirephoto)

facilities and other pertinent information so that a definite long-time marketing program can be developed.

The first project calls for installation of a Market News Service with dissemination of daily news concerning market trends, supplies, location, transportation facilities and prices furnished by the Department of Agriculture.

Vocational Agriculture teachers will co-operate in assembling market information on various agricultural commodities at local points throughout the state, through co-operation with the Department of Education's Division of Vocation Education.

"Kentucky is an important producer of perishable as well as staple farm products," said Baldwin. "Marketing seasons for these products varies from year to year. Lack of adequate mar-

keting information frequently causes a glut to develop on certain markets at the same time a temporary scarcity exists on markets not far away.

"Much of this can be avoided . . . if local markets were assisted in channeling commodities into markets where they are needed and away from those that are oversupplied."

The Market News Service will install a teletype machine which will give terminal markets on fruits, vegetables, dairy and poultry products.

The Division plans to assemble prices on livestock, various auction markets, fruits and vegetables, dairy products and other commodities at strategic points throughout the State.

Commissioner Walters, as Chairman of the Agricultural Production and Marketing Commission, (soon to be appointed by the Governor) has authority to gather data on agricultural matters from any other agency of government or private sources.

## Ladino Clover Is New Favorite On Kentucky Farms

Reports of county agents indicate that ladino clover is being grown by more Kentucky farmers every year, as its desirable qualities become known over the state.

The experience of A. S. Wason, Spencer county dairyman, is told by County Agent Nevin L. Goebel. Mr. Wason turned 25 Holsteins on five acres of ladino clover and orchard grass in late March. In 30 days he was shipping 120 gallons of milk daily. The cows did so well he reduced their grain ration.

After transferring the cows to bluegrass and timothy pasture, milk production fell off around 10 gallons a day, he told the county agent. When he switched back to the ladino clover, milk production almost immediately increased, he said.

Roy Herndon of Spencer county cut 20 acres of ladino clover for hay, and Edward Reinle put 20 acres of ladino hay in the silo, using no preservative.

E. G. Barker of Oldham county informed County Agent Chester L. Brown that he kept 55 cows and 40 calves on about 25 acres of ladino clover and grass from April 27 to May 26. They then looked as if they had been fed grain, he declared. The mixture he sowed included two pounds of each ladino clover and redtop and eight pounds of orchard grass an acre.

County Agent H. M. Williams said ladino clover made out-

standing pasture in Owsley county this season. Two acres on Henry Campbell's farm provided pasture for 10 cattle and three sows and pigs. Twenty-seven farmers attended a meeting at the Campbell field to see the clover and discuss its merits.

Shad is the most valuable fish of the Atlantic Coast and next to the Pacific salmon, the most important species of North America.

## Bad Money's Good

Bangkok — AP — Counterfeiters are so good in Siam that experts have trouble detecting forgeries. So said a criminal court judge, dismissing a charge that a village medicine man had 49 false notes for the purchase of roots, bark and leaves he used for doctoring.

Since Bank of Siam experts had difficulty telling a counterfeit note from a real one, said the judge, you couldn't expect villagers to spot the bad ones.

## Sandlick Road

By Mrs. T. A. Ladd  
Mr. and Mrs. Dolph Tyrre, of Paducah, spent Monday at the home of Mr. and Mrs. L. A. Ladd.

Mrs. Geo. Markoff has returned from Mansfield, O., having spent a month there with her husband, who is employed there.

Those going from here to the Mesker park zoo at Evansville last Sunday were: Mrs. Tillie Pickering, Mrs. Howard Pickering and children, Sue and Johnnie, Neil and Michael Ladd, Mr. and Mrs. M. C. Cartwright, Mr. and Mrs. Pollard Thompson, Mr. and Mrs. Cash Grey, Mr. and Mrs. Virgil Phelps and Buddy, Miss Dot Felkner and of course the crowd wouldn't be complete without Carmel.

Mrs. Jack Rodman and children spent last week with her parents, Mr. and Mrs. T. A. Ladd, Saturday night.

Mr. Herman Wolfe returned to his home in Pekin, Ill., after a ten-day visit with his mother, Mrs. Sallie Wolfe.

Sunday, July 11th, is regular church day at Lebanon, so everybody come and enjoy a fine sermon.

Mr. and Mrs. Clinton Perry took Sunday dinner with her parents, Mr. and Mrs. T. A. Ladd. Lebanon Homemakers are having an ice cream supper at Scottsburg school house, Saturday night, July 17. Every one is invited and there will be lots to eat and drink, Bingo games, chewing gum, popcorn, peanuts and candy.

Mrs. Frank French called on Mrs. T. A. Ladd Saturday night.

## Sees First Auto

Grenoble, France — AP — Montfort, a tiny Alpine village near the Italian border, saw its first automobile recently when a contractor from the town of Aiguebelle took a priest and a rural policeman up the mule-tracks in a jeep.

A small heater composed of a six-inch stirrer and a cartridge like charge is handy for those who want to heat a can of food or liquid without benefit of the home range. The charge is placed in a chrome-plated cooper heat cup.

The male bowfin fish has the fulltime job of guarding the nest of eggs.

Some kinds of male catfish carry eggs of the young in their mouths until they hatch.

Because news was late in arriving, fighting was still going on in Louisiana 59 days after the signing of the treaty which ended the war of 1812 between the United States and England.

Little Bo-Peep had lost much sleep.  
And could hardly see to drive;  
When lights came at her.  
There was a terrible clatter,  
Now she's lucky to be alive!

Yes—night-driving Bo-Peep is lucky! Drowsy driving can be fatal. Fatigue—lack of sleep—too many hours behind the wheel will dull any driver's senses. And three out of every five highway deaths happen after dark.

When you drive at night, be alert—always able to stop within your headlight range. Keep your windshield clear—never look directly into blinding headlight glare.

If you are over-tired, pull off the road and rest. Spare a few seconds to save your life!
