Insecta Mundi is a journal primarily devoted to insect systematics, but articles can be published on any non-marine arthropod. Topics considered for publication include systematics, taxonomy, nomenclature, checklists, faunal works, and natural history. *Insecta Mundi* will not consider works in the applied sciences (i.e. medical entomology, pest control research, etc.), and no longer publishes book reviews or editorials. *Insecta Mundi* publishes original research or discoveries in an inexpensive and timely manner, distributing them free via open access on the internet on the date of publication.

Insecta Mundi is referenced or abstracted by several sources, including the Zoological Record and CAB Abstracts. *Insecta Mundi* is published irregularly throughout the year, with completed manuscripts assigned an individual number. Manuscripts must be peer reviewed prior to submission, after which they are reviewed by the editorial board to ensure quality. One author of each submitted manuscript must be a current member of the Center for Systematic Entomology.

Guidelines and requirements for the preparation of manuscripts are available on the *Insecta Mundi* website at <http://centerforsystematicentomology.org/insectamundi/>

Abstract. The primary types of Onciderini Thomson, 1860 (Coleoptera: Cerambycidae: Lamiinae) of the Museum für Naturkunde - Leibniz Institute for Evolution and Biodiversity Science, Berlin (ZMHB), Germany, are catalogued and illustrated. Data on the original combination, current name, gender, and type locality are verified and presented. There are 16 primary types of Onciderini including four in *Oncideres* Lacordaire, 1830 and three in *Trestonia* Buquet, 1859. Of the 16 primary types, seven were described by Ubirajara R. Martins, four by Wilhelm Ferdinand Erichson, and three by Ernst Friedrich Germar.

Key words. Catalog, holotypes, Neotropical.

Introduction

The tribe Onciderini Thomson, 1860 (Cerambycidae) is one of the largest tribes of the subfamily Lamiinae Latreille, 1825, with 82 genera and nearly 520 described species widely distributed in the New World from North America to southern South America (Monné 2019; Tavakilian and Chevillotte 2019). Nearns and Swift (2011) provided a brief overview of the tribe and recent work by Nearns and collaborators has resulted in the description of five new genera and 36 new species, several synonymies, and dozens of new country records (e.g., Nearns and Tavakilian 2015).

In this work, we present the 16 primary types of Onciderini deposited at the Museum für Naturkunde - Leibniz Institute for Evolution and Biodiversity Science, Berlin (ZMHB), Germany (Fig. 17–18). Among these are four in *Oncideres* Lacordaire, 1830 and three in *Trestonia* Buquet, 1859. Nearly half (7 of 16) of the primary types were described by Ubirajara R. Martins (1932–2015), four by Wilhelm Ferdinand Erichson (1809–1848), and another three by Ernst Friedrich Germar (1786–1853). A brief history of the ZMHB Coleoptera collection was provided by Müller et al. (2001) and Jaeger and Uhlig (2010).

Materials and Methods

Type specimens are listed in alphabetical order by original combination. The text for each primary type is arranged as follows: the first line contains the original combination, author, year, and page number. This is followed by the figure number of the dorsal habitus and label images if available. The second line is the kind of type (holotype, lectotype, or neotype) and gender if known. The third line is the type locality to the most specific level possible based on the label data, literature, and other data. Country and province/state are listed in most cases, even if these data are not present on the label or in the original literature. The fourth line is the current name, if different from the original combination, based on Bezark (2019), Monné (2019), and Tavakilian and Chevillotte (2019). In some instances, there is a “Remarks” section where additional information such as inconsistencies with the label(s), or other

applicable historical information is presented. Details concerning specimens and label data can be seen in Fig. 1–16. Many of the photographs were taken with Visionary Digital's Passport Storm imaging system fitted with a Canon EOS 4D or 5D.

Primary Types of Onciderini Thomson, 1860

Bucoides erichsoni Martins, 1979: 150 (Fig. 1a, b)

Holotype, female

Type locality. Ecuador, Bolívar: Balzapamba

Bucoides exotica Martins and Galileo, 1990: 66 (Fig. 2a, b)

Holotype, female

Type locality. Brazil, Rio de Janeiro: Nova Friburgo

Carenesycha crenata Martins and Galileo, 1990: 79 (Fig. 3a, b)

Holotype, female

Type locality. Ecuador, Santa Inés

Euthima wendtae Martins, 1979: 151 (Fig. 4a, b)

Holotype, female

Type locality. Peru, Pasco: Oxapampa (Pozuzo)

Current name. *Euthima variegata* (Aurivillius, 1921)

Hesychotypa punctata Martins, 1979: 153 (Fig. 5a, b)

Holotype, male

Type locality. Ecuador, Bolívar: Balzapamba

Remarks. A second (larger, green) label states "Bras." indicating Brazil. Martins (1979) stated that the type was from Ecuador, and currently this species is known only from Ecuador and Peru, so it is suspected that the extra label indicating "Bras." was incorrectly affixed.

Hypselomus crudus Erichson, 1847: 148 (Fig. 7a, b)

Holotype, female

Type locality. Peru

Current name. *Tulcus crudus* (Erichson, 1847)

Remarks. Erichson (1847) indicated that the type locality is in the area of Peru east of the Andes.

Hypselomus egens Erichson, 1847: 148 (Fig. 6a, b)

Holotype, female

Type locality. Peru

Current name. *Furona egens* (Erichson, 1847)

Remarks. Erichson (1847) indicated that the type locality is in the area of Peru east of the Andes.

Lamia albisparsa Germar, 1823: 477 (Fig. 8a, b)

Lectotype, male

Type locality. Brazil

Current name. *Neodillonnia albisparsa* (Germar, 1823)

Remarks. Lectotype designated by Nearns and Tavakilian (2015).

Lamia impluviata Germar, 1823: 483 (Fig. 9a, b)

Lectotype, female

Type locality. Brazil

Current name. *Oncideres impluviata* (Germar, 1823)

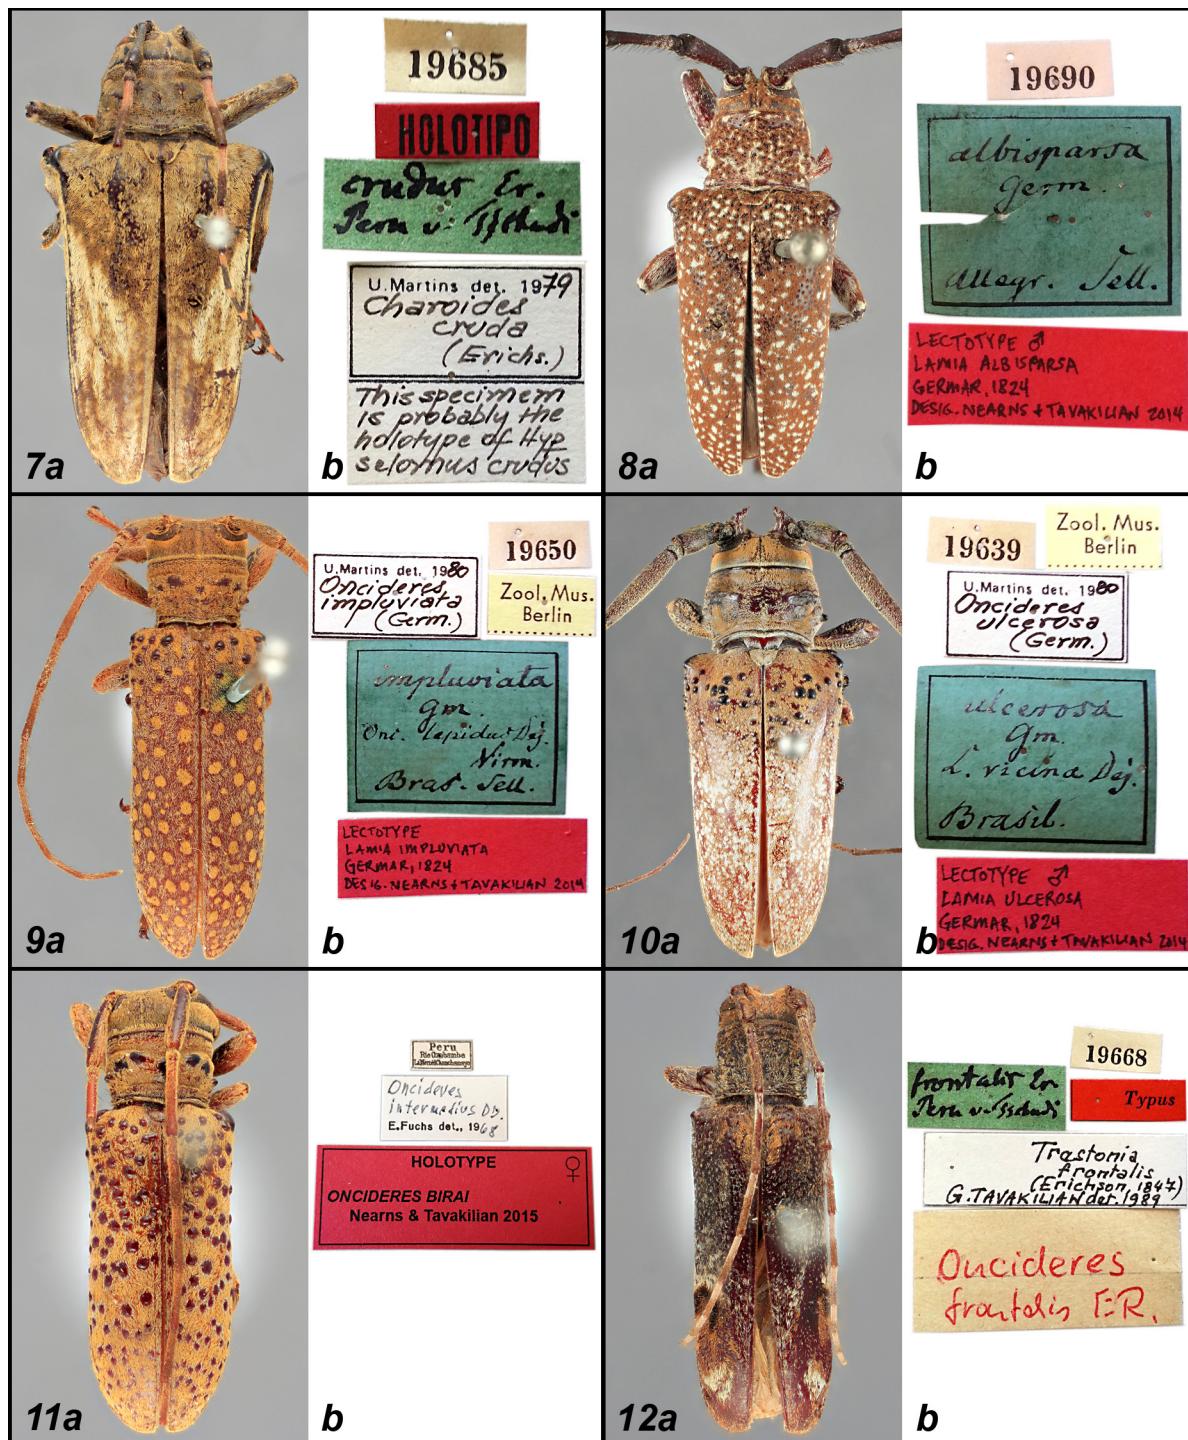

Remarks. Lectotype designated by Nearns and Tavakilian (2015).

Lamia ulcerosa Germar, 1823: 482 (Fig. 10a, b)

Lectotype, male

Figures 1–6. Six species of Onciderini. **Fig. 1.** *Bucoides erichsoni* Martins (a, dorsal habitus; b, labels). **Fig. 2.** *Bucoides exotica* Martins and Galileo (a, dorsal habitus; b, labels). **Fig. 3.** *Carenesycha carenata* Martins and Galileo (a, dorsal habitus; b, labels). **Fig. 4.** *Euthima wendtiae* Martins (a, dorsal habitus; b, labels). **Fig. 5.** *Hesychotypa punctata* Martins (a, dorsal habitus; b, labels). **Fig. 6.** *Hypselomus egens* Erichson (a, dorsal habitus; b, labels).

Figures 7–12. Six species of Onciderini. **Fig. 7.** *Hypselomus crudus* Erichson (a, dorsal habitus; b, labels). **Fig. 8.** *Lamia albisparsa* Germar (a, dorsal habitus; b, labels). **Fig. 9.** *Lamia impluviata* Germar (a, dorsal habitus; b, labels). **Fig. 10.** *Lamia ulcerosa* Germar (a, dorsal habitus; b, labels). **Fig. 11.** *Oncideres birai* Nearn and Tavakilian (a, dorsal habitus; b, labels). **Fig. 12.** *Oncideres frontalis* Erichson (a, dorsal habitus; b, labels).

Type locality. Brazil

Current name. *Oncideres ulcerosa* (Germar, 1823)

Remarks. Lectotype designated by Nearns and Tavakilian (2015).

Oncideres birai Nearns and Tavakilian, 2015: 94 (Fig. 11a, b)

Holotype, female

Type locality. Peru, Rio Urubamba, La Merced, Chanchamayo

Oncideres frontalis Erichson, 1847: 148 (Fig. 12a, b)

Holotype, female

Type locality. Peru

Current name. *Trestonia frontalis* (Erichson, 1847)

Remarks. Gender confirmed for first time via examination of holotype specimen by EHN.

Paraclytemnestra gigantea Breuning, 1974: 240 (Fig. 13a, b)

Holotype, female

Type locality. Antilles

Current name. *Jamesia lineata* Fisher, 1926

Remarks. Gender confirmed for first time via examination of holotype specimen by EHN.

Proplerodia goyana Martins and Galileo, 1990: 67 (Fig. 14a, b)

Holotype, male

Type locality. Brazil, Goiás: Jataí

Trachysomus faunus Erichson, 1847: 148 (Fig. 15a, b)

Holotype, male

Type locality. Peru

Current name. *Ecthoea quadricornis* (Olivier, 1795)

Remarks. Gender confirmed for first time via examination of holotype specimen by EHN.

Trestonia fasciata Martins and Galileo, 1990: 87 (Fig. 16a, b)

Holotype, female

Type locality. Colombia, Magdalena

Note on an additional Onciderini Thomson, 1860

Saperda capreola Germar, 1823: 492

Holotype, gender unknown

Type locality. Brazil

Current name. *Trestonia capreola* (Germar, 1823)

Remarks. This specimen is not found in the ZMHB collection.

Acknowledgments

We are grateful to Johannes Frisch, Joachim Willers, and Bernd Jaeger for assistance in studying the ZMHB collection. Bernd Jaeger also provided valuable historical information regarding the ZMHB Coleoptera collection and assistance regarding the location of the holotype of *Saperda capreola*. We are also grateful to Antonio Santos-Silva and Juan Pablo Botero (Museu de Zoologia, Universidade de São Paulo, SP, Brazil) for photographs of type specimens and for providing helpful comments to a previous version of this manuscript. FELN is thankful for grant 2017 / 15283-9 from the São Paulo Research Foundation (FAPESP). Opinions expressed in this article do not necessarily represent the policies of the U.S. Department of Agriculture.
