FOREWORD

This guide to the serial resources of the ICLARM library was prepared to improve information services to staff and other users, i.e., researchers, students, librarians and information scientists around the world. Since it was established in 1978, ICLARM's special library has focused on tropical, developing-country fisheries research. In 1986, the library's focus expanded to include coastal resources management.

Unless otherwise stated, serials are arranged alphabetically by title in this list and likewise on the shelves. Some monographic series titles are catalogued and filed in the book collection. Serials with nondistinctive titles are followed immediately by the names of issuing bodies responsible for their publication. Geographic, institutional and subject indexes are provided to facilitate access. Cross references for alternative serial titles and issuing corporate bodies are included when necessary.

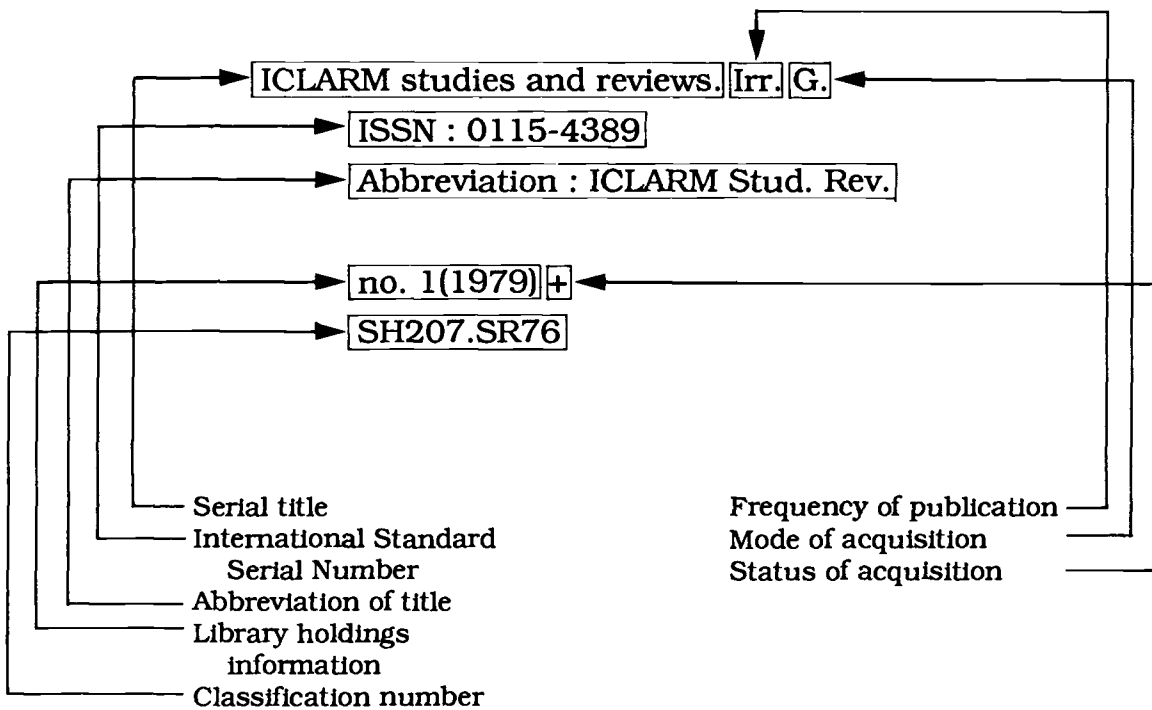

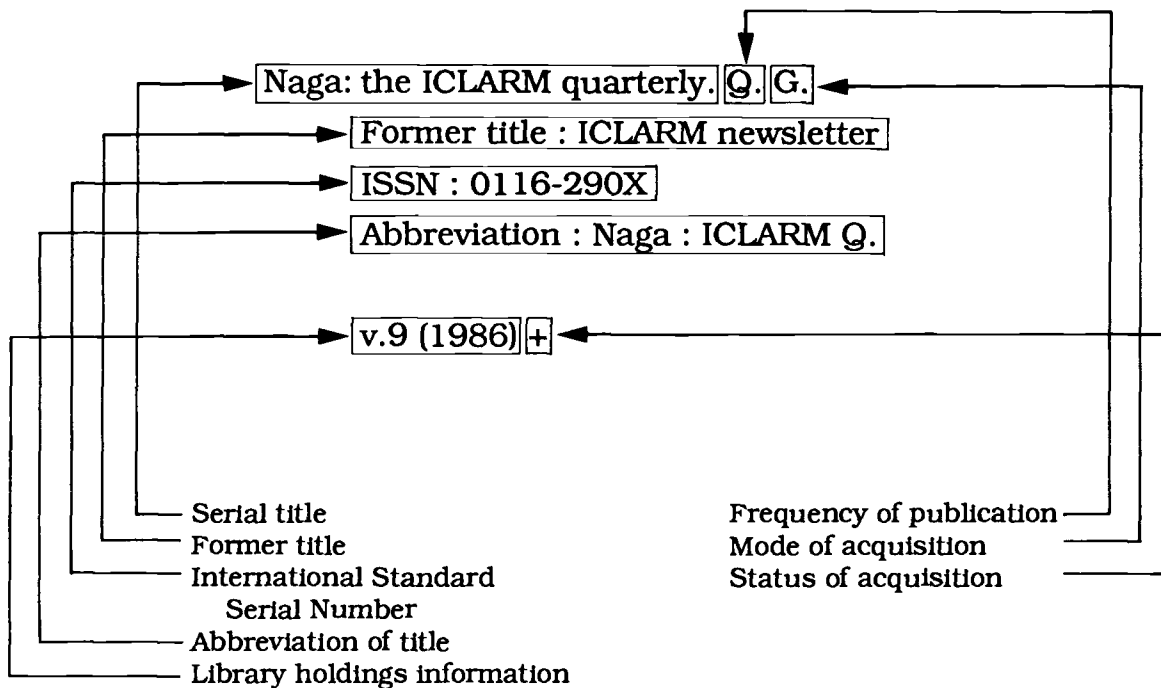

The reference materials used in compiling the list are: *World List of Aquatic Sciences and Fisheries Serial Titles* by FAO; *Irregular Serials & Annuals* compiled by R.R. Bowker Company; *Ulrich's International Periodicals Directory*; *The Serials Directory* by EBSCO Publishing; *Aquatic Sciences and Fisheries Thesaurus*; descriptors used in FAO's Aquatic Sciences and Fisheries Information System; *Aquaculture Thesaurus*; descriptors used in the USA National Aquaculture Information System; *Library of Congress Subject Headings*; and the FAO *List of Serials Monitored for the ASFIS Bibliographic Database* for abbreviations of journal titles.

This serial holdings list was produced using the microISIS system software package developed by Unesco. The library's serial worksheet is available upon request.

We hope that the information herein will contribute to resource and information sharing among fisheries libraries. ICLARM librarians will be happy to assist those of other libraries whenever possible.

J.L. Maclean
Acting Director General
12 August 1989

**INTERNATIONAL CENTER FOR LIVING
AQUATIC RESOURCES MANAGEMENT**

The International Center for Living Aquatic Resources Management (ICLARM) is an autonomous, nonprofit, international scientific and technical center which has been organized to conduct, stimulate and accelerate research on all aspects of fisheries and other living aquatic resources.

The Center was incorporated in Manila on 20 January 1977 and its operational base was established in Manila in March 1977.

ICLARM is an operational organization, not a granting entity. Its program of work is aimed to resolve critical technical and socioeconomic constraints to increased production, improved resource management and equitable distribution of benefits in economically developing countries. It pursues these objectives in the fields of aquaculture, capture fisheries management, coastal area management and information through cooperative research with institutions in developing and developed countries. ICLARM's work is international. The programs of ICLARM are supported by a number of private foundations and governments.

Policies are set by a Board of Trustees with members drawn from the international community. Direction of ICLARM, under the policies set by the Board, is the responsibility of the Director General. Advice on programs is received by the Director General from *ad-hoc* Program Advisory panels composed of scientists drawn from the international community.
