Anatomy & Physiology Revealed: The ultimate virtual cadaver dissection experience

Luciana Dambra

Acquisition Editor Medicine & Nursing - McGraw-Hill Education Italy, leading provider company of customized and adaptive digital learning solutions

Anatomy & Physiology Revealed is an interactive cadaver dissection tool to enhance lecture and lab, which teachers can use in lecture room, and student can use anytime anywhere. This program uses cadaver photos combined with a layering technique that allows the student to peel away layers of the human body to reveal structures beneath the surface. Anatomy & Physiology Revealed also offers animations, histologic and radiologic imaging, and a comprehensive quizzing tool. It can be used as part of any one or two semester undergraduate anatomy & physiology or human anatomy course; it is available as a stand-alone or can be combined with any Anatomy & Physiology textbooks.
