Description	Short name
An assessment of the true prevalence of open data initiatives around the world.	ODB
The readiness of states, citizens and entrepreneurs to secure the benefits of open data.	Readiness
Existence of policies and protocols in place for ensuring open data can be made available.	Policies
Groundwork that needs to be laid for the benefits of open data to be used at all levels.	Action
Empowerment of citizens and civil society to participate in government decision-making.	Civil
The extent to which businesses and entrepreneurs are able to take advantage of the economy.	Business
The extent to which accessible, timely, and open data is published by each country.	Implementation
Data commonly used in open data applications by entrepreneurs, or with significant impact.	Innovation
Data useful in planning, delivering and critiquing social policies & with the potential to improve.	Social
Data central to holding governments and corporations to account.	Accountability
The extent to which there is any evidence that open data release by the country government.	Impact
Including transparency & accountability, and improved government efficiency and effectiveness.	Political
Including environmental impacts, and contributions to greater inclusion for marginalized groups.	Social
Through supporting start-up entrepreneurs and existing businesses.	Economic
