Profile of Georgia Southern University

Georgia Southern University, classified as a doctoral/research institution by the Carnegie Foundation for the Advancement of Teaching, is a member of the University System of Georgia. As the largest and most comprehensive research institution in the central coastal Southeast, the University is a residential campus of more than 19,000 students and a premier choice for the state's HOPE Scholars. Students representing almost every U.S. state and 86 nations bring a diverse spectrum of backgrounds, interests and talents to the University community. Rated by Kiplinger Personal Finance as one of the Top 100 Best Values in Public Colleges and Universities, Georgia Southern strives to keep the personalized attention and feel of a small college.

Georgia Southern was founded in 1906, and lays claim to being the most beautiful campus in the state. Comprising over 700 acres, the University grounds are an arboretum-like treasure featuring gently rolling lawns, scenic ponds and soaring pines. The historic core of campus is the quintessential college portrait – Georgian-style red brick buildings with white columns around a sweeping, tree-lined circular drive. Beyond this circle, classic and contemporary lines blend to showcase continuing growth and expansion of facilities. Campus amenities include the Center for Wildlife Education and Lamar Q Ball, Jr. Raptor Center, the world-class Recreation Arts Center, a beautiful Botanical Garden, the Georgia Southern Museum, and the state-of-the-art Performing Arts Center.

Located in Statesboro, a safe and classic Main Street community of approximately 30,000 residents an hour northwest of Savannah, Hilton Head Island, and the Atlantic coast, Georgia Southern provides enriching opportunities for people of all ages while also maintaining a reasonable cost-of-living. The University benefits the region and state by engaging in research and providing public services that proffer creative solutions to regional challenges. Georgia Southern also extends educational opportunities to citizens throughout the state via off-campus centers located in Savannah and Dublin as well as through distance learning technologies at other remote sites. The economic impact of the University in the region is over \$750 million dollars.

Georgia Southern University offers more than 100 degree programs at the baccalaureate, master's and doctoral levels through eight colleges: College of Business Administration, College of Education, College of Health and Human Sciences, Allen E. Paulson College of Science and Technology, College of Liberal Arts and Social Sciences, College of Information Technology, Jiann-Ping Hsu College of Public Health, and the Jack N. Averitt College of Graduate Studies. The University is accredited by the Southern Association of Colleges and Schools and has earned special accreditation from professional and academic associations that set standards in their fields.

Georgia Southern University's hallmark is a superior undergraduate experience emphasizing academic distinction, excellent teaching, research and student success. Georgia Southern focuses on students and what they value: a well-rounded collegiate atmosphere; a faculty whose first priority is teaching; and a safe, attractive campus environment that encourages knowledge, discovery and personal growth. Despite increasing enrollment each year, the University has a faculty/student ratio of 1:23. The University continues to expand graduate offerings to meet the demands of its region.

In addition to its academic credentials, Georgia Southern is also recognized for a nationally competitive athletics program. The University's 15 Division I teams compete in the Southern Conference. Across-the-board commitment to excellence has resulted in an unprecedented six NCAA I FCS (formerly Division I-AA) football national championships and NCAA tournament participation in men's and women's basketball, baseball, golf, women's tennis and volleyball.

Mission Statement

March 31, 2009

Georgia Southern University is a public, Carnegie Doctoral/Research university devoted to academic distinction in teaching, scholarship, and service. The University's hallmark is a culture of engagement that bridges theory with practice, extends the learning environment beyond the classroom, and promotes student growth and life success. Georgia Southern's nationally accredited academic programs in the liberal arts, sciences, and professional studies prepare a diverse and select undergraduate and graduate student population for leadership and service as world citizens. Faculty, staff, and students embrace core values expressed through integrity, civility, kindness, collaboration, and a commitment to lifelong learning, wellness, and social responsibility.

Central to the University's mission is the faculty's dedication to excellence in teaching and the development of a fertile learning environment exemplified by a free exchange of ideas, high academic expectations, and individual responsibility for academic achievement. Georgia Southern faculty are teacher-scholars whose primary responsibility is the creation of learning experiences of the highest quality, informed by scholarly practice, research, and creative activities. The University offers a student-centered environment enhanced by technology, transcultural experiences, private and public partnerships, and stewardship of a safe residential campus recognized for its natural beauty.

Georgia Southern University is committed to advancing the State of Georgia and the region through the benefits of higher education, offering baccalaureate through doctoral degrees and a variety of outreach programs. The University fosters access to its educational programs, provides a comprehensive and fulfilling university experience, and enhances quality of life in the region through collaborative relationships supporting education, health care and human services, cultural experiences, scientific and technological advancement, athletics, and regional development.

Vision Statement

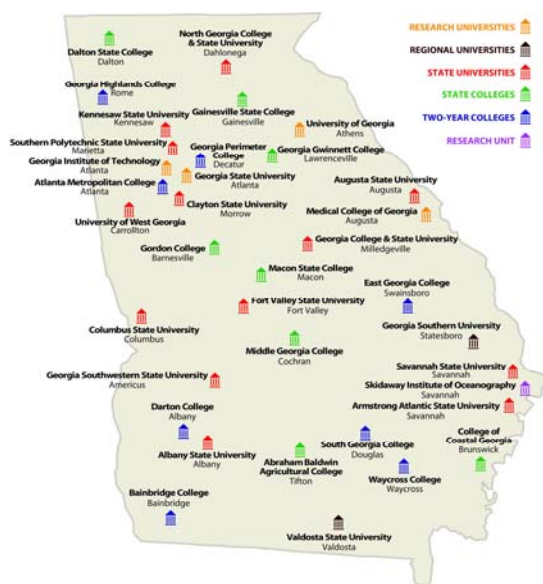

Georgia Southern University will be recognized as one of the best public doctoral-research universities in the country within the next ten years.

Source: Georgia Southern University Strategic Plan, Spring 2009, (see Appendix).

The University System of Georgia

The University System of Georgia's Board of Regents was created in 1931 as part of a reorganization of Georgia's state government. With this act, public higher education in Georgia was unified for the first time under a single governing and management authority. The Board oversees 35 institutions: 4 research universities, 2 regional universities, 13 state universities, 8 state colleges, and 8 two-year colleges. These institutions enroll more than 283,000 students and employ more than 40,000 faculty and staff to provide teaching and related services to students and the communities in which they are located.

The governor appoints members to the Board, who each serves seven years. Today the Board of Regents is composed of 18 members, five of whom are appointed from the state-at-large, and one from each of the 13 congressional districts. The Board elects a chancellor who serves as its chief executive officer and the chief administrative officer of the University System, but is not a member of the Board. The Chair, the Vice Chair, and other officers of the Board are elected by the members of the Board. The System's programs and services are offered through three major components: Instruction, Public Service/Continuing Education, and Research.

INSTRUCTION consists of programs of study leading toward degrees, ranging from the associate (two-year) level to the doctoral level, and certificates. Instruction is conducted by all institutions. Requirements for admission of students to instructional programs at each institution are determined, pursuant to policies of the Board of Regents, by the institution. The Board establishes minimum academic standards and leaves to each institution the prerogative to establish higher standards. Applications for admission should be addressed in all cases to the institutions.

A core curriculum, consisting of freshman and sophomore years of study for students whose educational goal is a degree beyond the associate level, is in effect at the universities and two-year colleges. This curriculum requires 60 semester credit hours, including 42 in general education--humanities and fine arts, mathematics and natural sciences, and social sciences--and 18 in the student's chosen major area of study. It facilitates the transfer of freshman and sophomore degree credits within the University System.

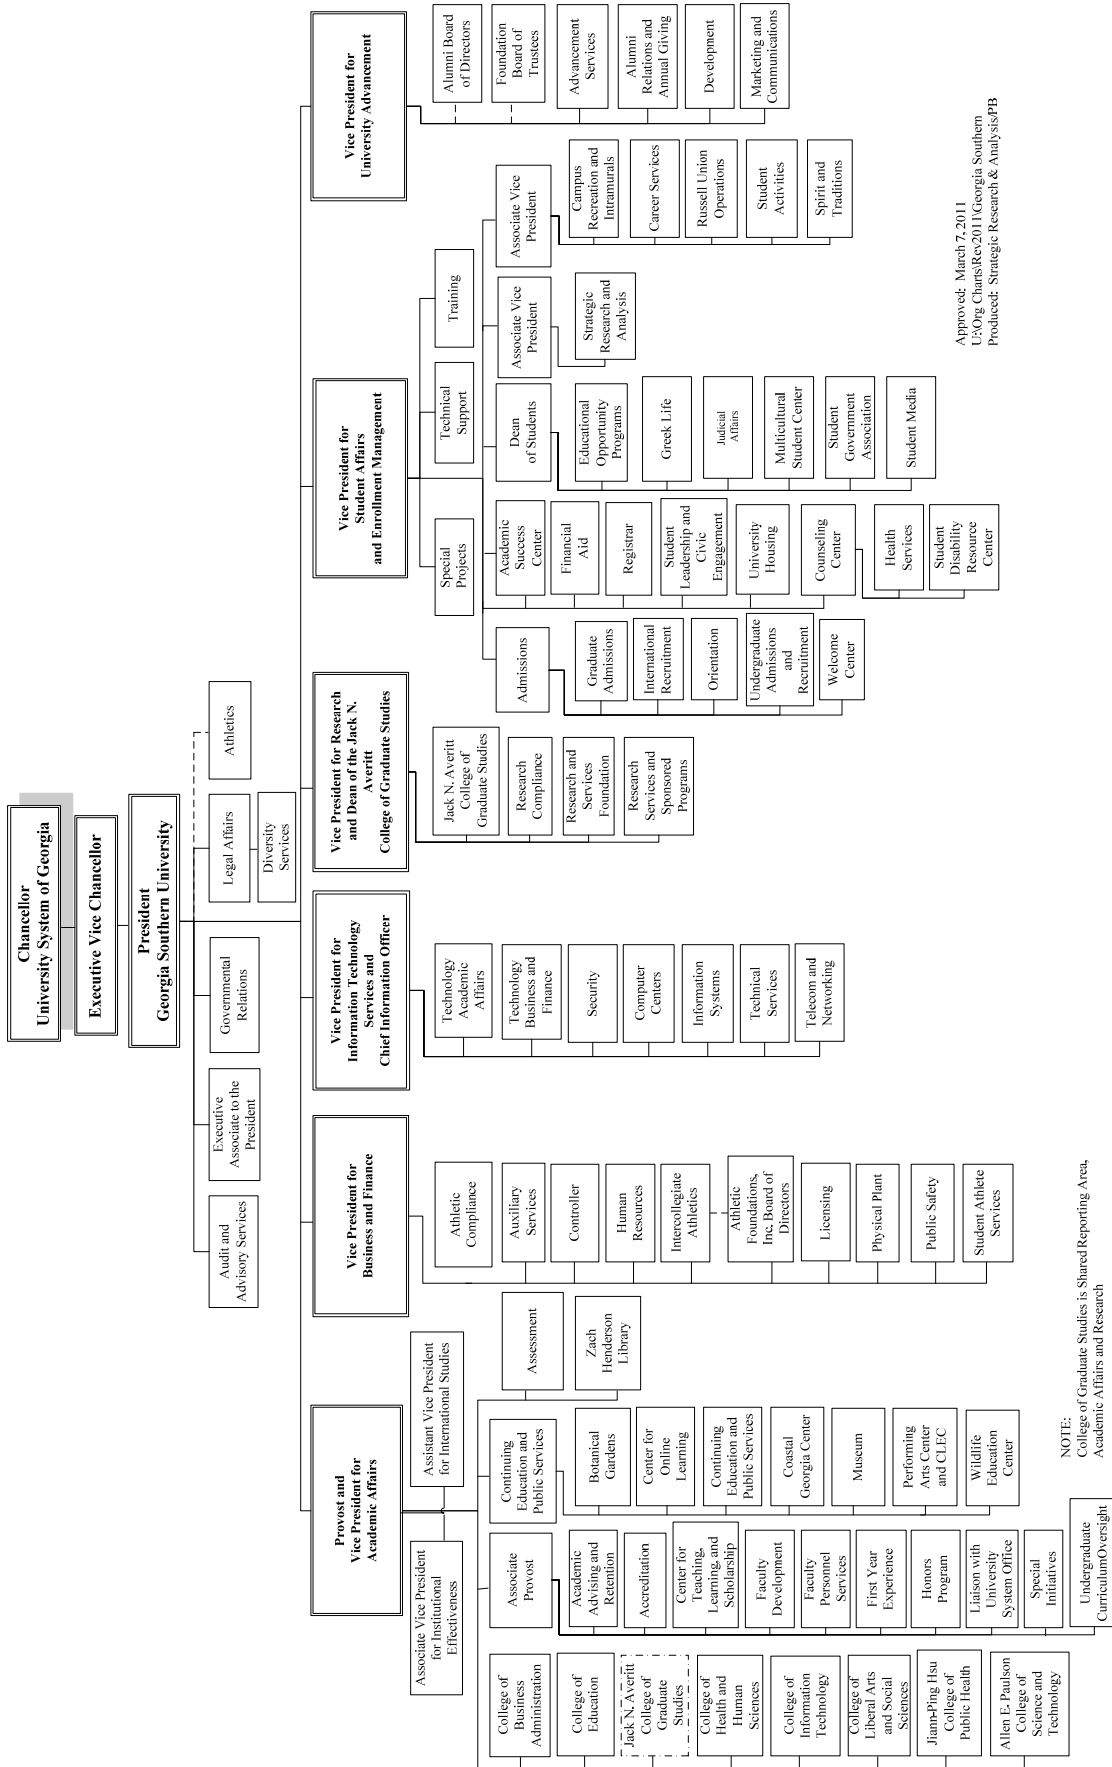

PUBLIC SERVICE/CONTINUING EDUCATION consists primarily of non-degree activities and special types of college-degree-credit courses. Non-degree activities may include short courses, seminars, conferences, lectures, consultative, and advisory services in many areas of interest. Non-degree public service/continuing education is conducted by all institutions. Typical college-degree-credit public service/continuing education courses are those offered through extension center programs and teacher education consortia.

RESEARCH encompasses investigations conducted primarily for discovery and application of knowledge. These investigations include clearly-defined projects in some cases, non-programmatic activities in other cases. Research is conducted both on and off campus and explores a variety of matters related to the educational objectives of the institutions and to general societal needs.

The policies of the Board of Regents for the government, management, and control of the University System and the administrative actions of the Chancellor provide autonomy for each institution. The executive head of each institution is the President, whose election is recommended by the Chancellor and approved by the Board.

Beginning first-time Graduate Student - A degree-seeking student who is entering graduate school in the fall. Regents definition.

¹Count redacted where $n < 10$. Please contact the Office of Strategic Research and Analysis if questions.

²Beginning Fall 2005, Georgia Southern began accepting the new Millers Analogies Test (MAT) scores that changed from 0 through 100 to 200 through 600. The changes in the MAT scores became effective Spring 2004 (Source: <http://www.usg.edu/sra/datasys/sirs/2006/sdedfall06.pdf>).

Miller Analogies Test (MAT). The MAT is a high-level mental ability test requiring the solution of problems stated as analogies. Performance on the MAT is designed to reflect candidates' analytical thinking, an ability that is critical for success in both graduate school and professional life. The MAT scaled scores currently range from 200 to 600 with a mean (average) of 400.

Note. Totals above are a subset of all first-time graduate students. They include only students with valid GMAT Scores.
Beginning first-time Graduate Student - A degree-seeking student who is entering graduate school in the fall. Regents definition.

The Graduate Management Admission Test® (GMAT®) examination is a standardized test designed to measure basic verbal, mathematical, and analytical writing skills that have been developed over a long period of time through education and work.

Guidelines for GMAT® Score Usage: Use multiple criteria. The GMAT® examination does not measure every discipline-related skill necessary for academic work, nor does it measure subjective factors important to academic and career success, such as motivation, creativity, and interpersonal skills. Therefore, GMAT® scores should be used as only one of several criteria when an applicant is being considered for admission (Source: <http://www.gmac.com/gmac/TheGMAT/GMATScores/UsingScorestoAssessIndividuals.htm>).

													3.6	4.0	

Note. Totals above are a subset of all first-time graduate students. They include only students with valid GRE Scores for each category. Beginning first-time Graduate Student - A degree-seeking student who is entering graduate school in the fall.

The Graduate Record Examinations® (GRE®) General Test measures verbal reasoning, quantitative reasoning, critical thinking, and analytical writing skills that have been acquired over a long period of time and that are not related to any specific field of study.

General Test: Any GRE test has two primary limitations: (1) it does not and cannot measure all the qualities that are important in predicting success in graduate study or in confirming undergraduate achievement and (2) it is an inexact measure; that is, only score differences that exceed the standard error of measurement of a given score can serve as reliable indications of real differences in academic knowledge and developed abilities.

Three scores are reported on the General Test:

1. a verbal reasoning score reported on a 200-800 score scale, in 10-point increments
2. a quantitative reasoning score reported on a 200-800 score scale, in 10-point increments
3. an analytical writing score reported on a 0 to 6 score scale in half-point increments.

Source: <http://www.ets.org/portal/site/ets/>

¹Count redacted where *n* < 10. Please contact the Office of Strategic Research and Analysis if questions.

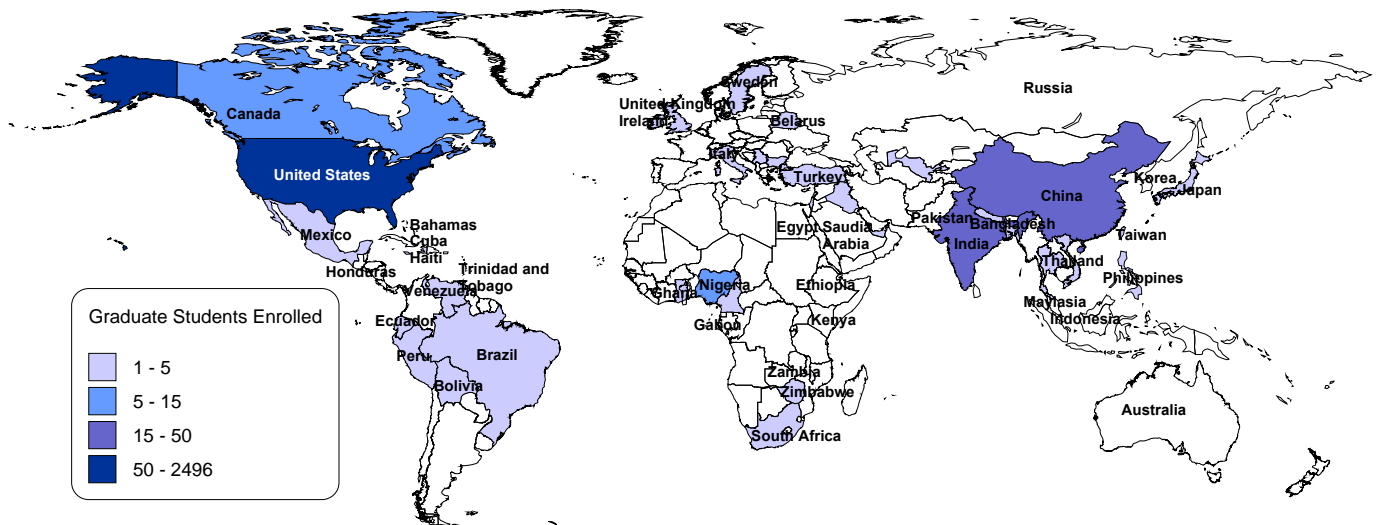

²Beginning Fall 2003, Georgia Southern began accepting new GRE Analytical Writing scores that changed from 200 through 800 to 0 through 6. Effective October 2002, GRE classified subscores into these categories: Verbal Reasoning, Quantitative Reasoning, Analytical Writing. The writing test component is similar to the Writing Assessment in use since 1999, although the scoring is dramatically different (Source: <http://www.usg.edu/sra/datasys/sirs/2006/sdedfall06.pdf>).
