- Assessment

TITLE I: OVERVIEW & IMPLICATIONS

- The purpose of this title is to ensure that all children have a fair, equal, and significant opportunity to obtain a high-quality education and reach, at a minimum, proficiency on challenging State academic achievement standards and state academic assessments (No Child Left Behind Act of 2001).
- Reading and writing – specifically a critical analysis of these skills – are crucial activities required in civic engagement (Behizadeh & Winn, 2011).
- Meiners (as cited in Behizadeh & Winn, 2011) recognized reading and writing as essential tools for surviving a current educational system where students of color are placed disproportionately in special education, suspensions, and expulsions. These disproportionalities all contribute to a higher likelihood of incarceration.

SCHOOL TO PRISON PIPELINE

- The hidden curriculum is essentially the process of socialization that takes place in the school as students are exposed to the routines and rituals that structure classroom culture. This culminates in the school's resemblance to prison time, imposing repetitive schedules and routines under increased surveillance and accountability. Freedom of choice is void (De Lissovoy & Garcia, 2013).
- Zero-tolerance policies are contributors to this phenomenon.

DISCIPLINE GAP

- At the elementary level, the increases in the number of days a student is suspended from school are significantly correlated with African Americans (Butler, Lewis, Moore III, & Scott, 2012).
- Black students are suspended and expelled at a rate three times greater than White students (U.S. Department of Education Office for Civil Rights, 2014).
- While black students represent 16% of student enrollment, they represent 27% of students referred to law enforcement and 31% of students subjected to a school-related arrest. In comparison, white students represent 51% of enrollment, 41% of students referred to law enforcement, and 39% of those arrested (U.S. Department of Education Office for Civil Rights, 2014).

POSITIVE BEHAVIOR SUPPORTS

A Research-Based Overview

PBS: DEFINITIONS

- Positive behavior supports (PBS) serve as a practical approach for decreasing problem behavior and improving quality of life (QOL) for individuals, regardless of age and/or ability. It is an overt technology that incorporate value-based components into the art of decision-making skills (Carr, Dunlap, Horner, Schwartz, & Zarcone, 2008).
- PBS relies heavily on ecological and/or social validity, emphasizing the following components as guiding principles: instruction of desired behaviors, organization of consequence systems, redesign of environmental settings, and use of functional behavioral assessments (Dunlap, Horner, Sailor, & Sugai, 2009).
- The PBS framework is a multi-component process guided by the values collected from a three-side interaction: individual, family, and organizational community. It allows individuals and communities the opportunity to develop adaptive and prosocial behaviors conducive to a higher quality of life (Bradshaw, Dunlap, Horner, Kincaid, & Knoster, 2014).

PBS: FEATURES

Albin et al. (2002) identify the following components conducive to PBS:

- Comprehensive Lifestyle Change/Quality of Life
- Life-Span Perspective
- Ecological Validity
- Stakeholder Participation
- Social Validity
- Systems Changes and Multicomponent Intervention
- Prevention Emphasis
- Flexibility with Scientific Practices
- Multiple Theoretical Perspectives

SWPBS: DEFINITIONS

- Braaksma and McKeivitt (2008) identify school-wide positive behavior supports (SWPBS) as a structured way to promote positive relationships in school while simultaneously providing students with social and behavior skills needed for successful learning.
- Horner and Sugai (2009) define SWPBS as a systems approach in establishing social culture and individualized behavior supports.

THEORETICAL INFLUENCES

MASLOW'S THEORY OF HIERARCHICAL NEEDS

ECOLOGICAL SYSTEMS THEORY

- Microsystem - School
 - What relationships are present in the immediate setting?
 - What is the nature of these relationships?
 - What is the indirect influence on the developing person?
- Mesosystem - Home
 - How does the individual participate in another setting with a learned concept?

TEACHING BEHAVIORS & THE CLASSROOM

- The Second Step Curriculum (Committee for Children, 2011) is a classroom-based, universal intervention designed for the following:
 - Decrease problem behaviors
 - Increase students' school success
 - Promote social-emotional competence and self-regulation
- Lessons address the following units:
 - Skills for Learning
 - Empathy
 - Emotion Management
 - Problem Solving
- Second Step allows for family and home-based activities, with materials available in English and Spanish.

TEACHING BEHAVIORS & MODELING EXERCISES

- Faculty and staff employ social learning theories to influence behavioral choices. This involves modeling and corrective feedback.
- Hula Hoop Technique (Personal Space)
 - Adults introduce concept of personal space
 - Adults place hula hoops on floor in cafeteria line
 - Adults models correct and incorrect techniques
 - Students emulate the correct behavior
 - Adults provide feedback

An aerial photograph of a snowy mountain landscape. The scene is dominated by white snow covering the ground and the tops of evergreen trees. The trees are dark green and stand out against the white snow. In the lower right quadrant, a small, dark-colored cabin with a light-colored roof is visible. The sky is a clear, pale blue. The overall composition is serene and natural.
