SAT

PREP CLASSES

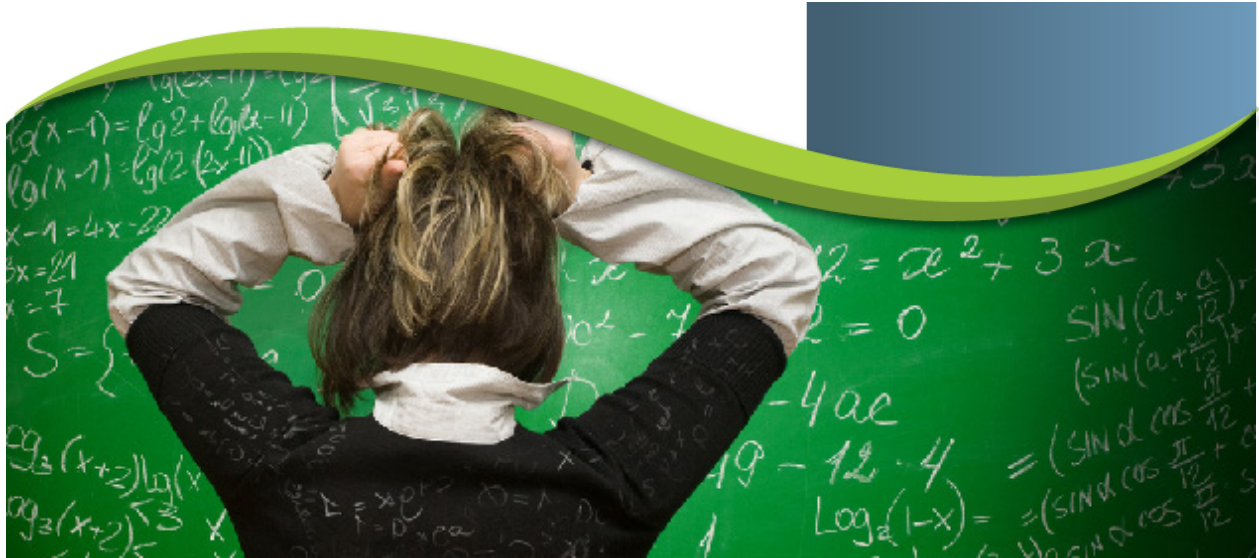

CRITICAL READING AND VOCABULARY

This one-week (five day) series focuses on strategies used in active reading that pertain to the SAT, and addresses writing strategies used during the writing portion. While improving their vocabulary (roots, prefixes, word in context), students will learn to identify key words, recognize main ideas/themes, draw conclusions and make inferences. Students will practice timed writing sessions to prepare for the reading and writing portions of the SAT. By improving these skills, students will be able to approach the SAT with confidence.

NOTE: The Official SAT Study Guide, Second Edition by College Board, is required for this class. The guide is available at Barnes & Noble or Amazon.

Monday to Friday
6/1/2015 to 6/5/2015

Cost: \$160 per person

Enjoy.

MATH PREP

This one-week (five day) series focuses on thinking strategies and skill development needed for maximizing scores on the math portion of the SAT. We will review the use of various formulas essential to solving problems and students will receive information on effective strategies for increasing the likelihood of answering problems correctly. There will be practice tests in class, as well as learning exercises for relieving test anxiety.

NOTE: The Official SAT Study Guide, Second Edition by College Board, is required for this class. The guide is available at Barnes & Noble or Amazon.

Monday to Friday
6/1/2015 to 6/5/2015
3 to 5 p.m.
Cost: \$160 per person

WRITING CLASSES

CREATIVE WRITING 2

YOUTH PROGRAMS

Continuing Education at Georgia Southern University presents Youth Programs for K-12 students that utilize the university's resources in order to provide an experience which is an engaging combination of learning and social development for the youth of Bulloch County. We are committed to providing an opportunity that will allow our youth to explore their creativity, challenge their minds, and build new and lasting relationships in a university setting.

LEGO ROBOTICS CAMP

This extremely fun and educational course will teach the building and programming techniques of the NXT Lego Educational Series, the simple laws of motion/balance through tight rope walking and drag racing, all the while experimenting with different parts to find out why the wonderful creations can do what they do! Young students will be creating, building, programming, and competing with robotic arms that really reach out to touch someone, gear up spinning tops, drag racers that zoom with the push of a button, and experimenting with different designs to see which team can build the longest distance Balloon Car! Students will be paired into groups of two. A laptop for creating/programming will be provided for each team! No experience needed with NXT or Legos to be a part of this course! Everyone will have fun!

Enjoy.
