Check Out the Library's New Data Management Services Guide

by Jeffrey M. Mortimore, Discovery Services and Data Curation Librarian

More and more, research funders like the National Science Foundation and its directorates require that the research they fund be made publicly available, including research data. For researchers, these requirements may include submitting a data management plan with grant proposals, or archiving and publicly sharing publications and data through open-access repositories like PubMed Central or Digital Commons @ Georgia Southern. Many peer-reviewed journals also now require that authors make their data publicly available, including *Nature*, *PLoS One*, and *Science*.

Recent studies show that archiving and publicly sharing research data increases the value and impact of your research. To get the most out of your data, it's important to plan early how you intend to collect, analyze, preserve, and share it. The library is excited to partner with you in this process, from preparing data management plans to publicly archiving your data. In support of this, we have created a new Data Management Services guide, available through the library website or directly at this address: <http://georgiasouthern.libguides.com/data>

This guide provides a range of resources to support data management throughout the research lifecycle, including writing data management plans, managing data during active research, preparing data for preservation and sharing, and depositing your data in an open-access repository like Digital Commons @ Georgia Southern. Most importantly, this guide will connect you with library faculty and staff to support you with data management consultations, data management plan reviews, and preparing your data and publications for public archiving.

Questions, or ready to get started? Contact Jeff Mortimore, Discovery Services and Data Curation Librarian, at jmortimore@georgiasouthern.edu or 912-478-0102 to discuss how we can help with your next grant proposal and take your data public.

Upcoming Digital Commons Event

Curious about Digital Commons@Georgia Southern?
You supply the questions, we supply the refreshments and answers.

When: Drop by anytime between 10 am—2 pm on January 27
Where: Library Conference Room (3rd Floor in Office of the Dean)

Here's what the Georgia Southern community is saying about
SelectedWorks Profiles

The Jiann-Ping Hsu College of Public Health faculty members have all submitted material to SelectedWorks over the past two years. The site hosts web pages for our faculty, which are profiles that highlight faculty publications and achievements. This is an **excellent means of providing information on faculty member's research and service activities to the University community and to a wider national audience.**

Gregory Evans
Dean of Jiann-Ping Hsu College of Public Health

Access the Center for Research Libraries through Henderson Library

by Paolo P. Gujilde, Coordinator of Collection Development

Zach S. Henderson Library is a member of the Center for Research Libraries (CRL), an international consortium of academic and research libraries. CRL extends Henderson Library's collection in the humanities, social sciences, and science, engineering, and technology through online access and inter-library loan (ILL) requests.

Center for Research Libraries

GLOBAL RESOURCES NETWORK

Henderson Library provides online access to CRL digital holdings of newspapers, journals, documents, and other specialized resources on the United States and other regions of the world. Physical materials including microform of foreign-language newspapers and historical newspapers can be requested through ILL. Additionally, as a CRL member, the library can borrow materials through ILL requests from Linda Hall Library of Science, Engineering & Technology in Kansas City, Missouri.

To access CRL's library collection, visit the Henderson Library website at <http://library.georgiasouthern.edu/> or Ask a Librarian.
