This presentation (open access) is brought to you for free and open access by the Conferences & Events at Digital Commons@Georgia Southern. It has been accepted for inclusion in Georgia International Conference on Information Literacy by an authorized administrator of Digital Commons@Georgia Southern. For more information, please contact digitalcommons@georgiasouthern.edu.

Libtube team:

Creating tutorials together, on a dime, and in no time.

The Goal:

- To answer common questions about Library processes…
  - In a way that did not intimidate students
  - That was readily accessible 24/7
  - From the perspective of their peers
  - That was inexpensive in terms of…
    - Money
    - Staff time
  - That was sustainable

The Process: Scripting

Finding Journal Articles – Part 1

<Start screen - PowerPoint 1st slide> "Welcome to North Georgia College and State University's Library Technology Center. Our topic here is how to find journal articles in the library. To start, go to the university website, www.northgeorgia.edu *<Pause; go to university website>*

<On university website; Resume> "From here, to access the library's website, go to the lower right group of links and click Library" *<click; screen changes>*
"On the library's homepage, in the main menu on the left, click Articles, Databases, Etc." *<click>*

<On database landing page> "This is where you can access the article databases available to you through the library. Most of the articles in these collections are not available on the open Internet, so you need to go through the library to get to them. On this page, you can find databases by subject area, by the first letter of the database name, or starting with the databases in the Quick Start section: Academic Search Complete and ProQuest Research Library. Let's go into Academic Search Complete." *<click link> <pause while screen loads>*

<At Academic Search Complete start screen; Resume>
"Start by typing words related to your topic into these boxes. To start, you can keep 'Select a Field' here on the right; later, to narrow the search a bit, you can select 'Subject Terms'. Let's try a search here using the words ***college study skills*** *<type these into the top box>* and then click the green Search button."

<Screen changes to results list> "It looks like we have 27 results for this search and the top results is this article "Study Habits, Skills, and Attitudes: The Third Pillar Supporting Academic Performance." The authors are Marcus Credé and Nathan Kuncel, and the journal name is Perspectives on Psychological Science. This article is from 2008. To access the text of this article, you would click on the 'PDF Full Text' link" *<circle with pointer, don't click to open>*.

<Scroll down to article with Find It button and circle with pointer> Some articles are not available full-text in a particular database, so if you see a "Find It" button, click it to search all of the library's databases to see if we have full-text access to that journal someplace else.
