Household Matters

Maple Frosting: Cook one cup of maple syrup and one-fourth a pint (two ounces) of butter to 248 on the syrup gauge, or until a thick will form a pretty consistent "soft ball" center in cold water. Just before the syrup and butter are cooked enough add three or four tablespoons of boiling water to half a pound of marshmallows, and set them over hot water. When the marshmallows are partly melted, beat them into the syrup mixture, and continue beating until the whole is smooth and cool enough to remain upon the cake. This will make a thick icing for a large sheet of cake. It will be found soft and creamy, and will cut without cracking.—Boston Cooking School Magazine.

Outing Lunches: For the outing lunch cheese sandwiches are very appealing and easily made. Grate the cheese fine and rub it to a paste with melted butter, seasoned as liked with salt and pepper, and spread on the slices of bread. A lettuce leaf between the slices of bread makes a nice addition to the filling. Brown bread, cut in very thin slices, makes delicious sandwiches with a filling of lettuce and ham. Meats chopped fine and used for filling sandwiches are much more convenient than sliced meats. Cold meats, and chicken, boned and pressed, then sliced, makes much more dainty handling for the consumer.

Old-Fashioned Indian Pudding: Scald a quart of milk. Beat a scant cup of cornmeal with a cup of molasses and a teaspoonful of salt and stir into the boiling milk. Let it cook ten or fifteen minutes, then set aside to cool. Add half a pint of cold milk, a teaspoonful of butter, a little allspice or clove and cinnamon and two well beaten eggs. Pour this mixture into a well buttered baking dish and cook in a steady oven three or four hours—the longer the better. When the pudding has baked nearly an hour pour over it half a pint of cold milk, which must not be stirred, but allowed to soak in gradually. The pudding requires in all three cups of molasses, and it is essential to stand nearby half an hour after it is taken from the oven before it is served. In baking, if it should become too brown, cover with a pan of thick paper.—Boston's Foodways.

HINTS FOR THE HOUSEKEEPER

Hot water, and it must be hot instead of lukewarm, sipped quickly, will banish nausea.

Overeating, overheat and insufficiently ventilated rooms and lack of exercise in the open air is very productive of colds.

A cup of hot water sipped before breakfast will seem make you feel like waiting for breakfast, if you have no appetite.

If cocks are too large for the mouth of the bottle used in boiling water, a narrow neck will do the work.

After using a scrubbing brush in water it should be laid back down, otherwise the wood will soon crack and rot from the water standing in it. Do not wash tinware or cloth in hot soap-suds. Wash them in tepid water and wipe with a cloth dampened in equal parts of cold milk and water.

If the layer cake burns on the bottom, try setting the plate which contains the dough mixture in another plate exactly the same size; this will prevent the bottom from burning.

If you have a dull headache from indigestion, refrain from eating one meal at least, and take a teaspoonful of table salt and drink water copiously. Either hot or cold, but preferably hot.
