

## TRANSITION FROM POWERPOINT TO PREZI:

### LEAVE THE LINEAR BEHIND

DR. RYAN MURPHY & DR. DENÉ WILLIAMSON

## Faculty Perspectives

### Faculty Who Have Never Used Prezi

17% have, or would have, concerns with Prezi because it is a web based program

37% feel that creating a Prezi is more work and more overwhelming than PowerPoint

"Why Use Prezi when PowerPoint does everything"

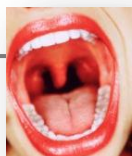

**81% did not know that you could import a PPT directly into Prezi...**

44% believed that having the ability to utilize Prezi makes, or would make, them a better instructor

"Every time that I have used Prezi I really enjoyed it and felt as if it was more interesting than PowerPoint"

## Student Perspectives

**"I feel that it is great for formal presentations, but I have never experienced Prezi in a learning environment."**

**"I think Prezi is more engaging because they are new to students... but I don't think that any more information regarding the lecture is retained"**

**"The Professor's teaching style and quality of presentation style is much more important than the technology used."**

### RESULTS FROM STUDENTS

40% of students had professors use Prezi in their classes to deliver material

67% feel learning how to use Prezi would make them more marketable when entering the workforce

45% of students who have had professors use Prezi in the classroom believe they remember more from the lecture

93% of those students feel more engaged during a Prezi, and only 18% find it difficult to take notes
