# DESIGNED TO SUCCEED

The achievements of our design teams bring honor and international recognition to Missouri S&T. Cheered on by the collective generosity of their loyal supporters, student design team members gain confidence, learn teamwork, and develop crucial project management and fundraising skills.

Help build a strong financial foundation for the success of our design teams currently and in the future. Designate a gift to the design teams.

To learn more about ways to give, or how your gifts could support the design teams and the center, contact Greg Harris at 800-392-4112, email [gfharris@mst.edu](mailto:gfharris@mst.edu) or go to [giving.mst.edu](http://giving.mst.edu).

### A new look and feel

Notice anything different? Yes, this is still your alumni magazine — with a few changes. This spring, we introduce you to the updated *Missouri S&T Magazine*. The look is fresh, and so is the content. We have designed it to be more interactive and to add value that will better serve our readers.

Our new order begins with *Around the Puck*, a section that keeps you informed about the people and research happening at your alma mater. We move next to the feature section, which won't always have a theme. There will be a cover story, but you can expect other interesting stories to be in the mix. In the final section, we move *Beyond the Puck* to profile alumni, tell you about upcoming section events and give you updates about your friends in the class notes section.

For those of you who are really busy, we've pulled out a few fast facts and given you new entry points leading you into the magazine. Bigger photos and more links to the internet will give you the details when you want them, and an opportunity to move on when you don't. We think you will find the font type and size easier to read, too. Give this a couple of issues to get used to and we think you'll love the new look and feel.

### Experience that counts

The rental car's "max air" and highest fan speed could not keep pace with the sweltering heat during the last solar car race. The interior hovered around "tolerably cooler than the exterior," but never reached cool enough. Oh, how I wanted to complain, but as I exited the car onto the asphalt pavement in Topeka, Kan., I caught a glimpse of our solar car driver. He'd just endured four hours in the driver's seat with only a tiny fan to combat interior temperatures in excess of 105 degrees. And, he wasn't complaining. He was strategizing with teammates about his next run.

Why do students spend hours tweaking their design of the Formula car, testing the concrete formulas for the latest canoe, retooling the electrical systems on the solar car, recalibrating the best gear ratio for the human-powered vehicle, or making other upgrades into the wee hours of the night?

It's not the pay — they don't get any. Few even receive course credit for their countless hours. So what drives them?

I'm convinced that hands-on engineering produces a sense of pride and a buzz — a high of its own sort — through a combination of "I built this with my own hands," and the powerful bond between the machine and the teammates. When everything works (and the duct tape sticks), the air electrifies with a spirit of achievement like no other. To witness an event that is part rock concert, part first-one-across-the-finish-line, part rocket launch, come out to a student design competition and see for yourself. Inside, you'll find a handy list of section events timed to coincide with team competitions. We hope to see you there!

**Marianne Ward**  
alumni editor

## EDITOR'S TOP FIVE PICKS

- 1 } The campus is excited to welcome our new chancellor, **Cheryl B. Schrader**, to Rolla next month. Check out the back cover to learn more about the announcement.
- 2 } Cheer on the design teams and catch up with fellow alumni at several upcoming section events. Flip to pages 26, 28 and 31 for details.
- 3 } As a Rolla grad, you know what it means to have hands-on opportunities. We're proud to share three pieces that demonstrate the strength of our donors, who are helping students go beyond books and classes to gain real-world experiences. See pages 6, 28 and 48.
- 4 } The past presidents of the Miner Alumni Association are an outstanding group of leaders who have been influential in shaping both the university and the association. Turn to page 32 to read the story.
- 5 } St. Louis Cardinals fans won't soon forget the drama of last fall's World Series Game 6 and David Freese. Neither will his dad, **Guy Freese**, CE'75, as you'll find out on page 38.

## Which Best Ever was the best ever?

In 1908, a tradition was born — the annual St. Pat's celebration at Missouri S&T. Each year, the celebration becomes larger than life. However, everyone seems to have a favorite, or most memorable year, for a variety of reasons.

Watch for the next question in your Miner Alumni Association eNewsletter.

The best ever is, by definition, the preceding year! #bestever #n+1

**Mike Hunter**, Math'99  
submitted via Twitter (@diabolical\_mdog)

I have some inside knowledge that this year will truly be the #bestbestever.

**Nick Baum**, CE, senior  
submitted via Twitter (@DSPcashcab)

I will say 1988, first of all, because my hubby, Smoky (**Michael Gross**, MetE'88), was St. Pat. Secondly, their court was able to convince the administration to continue on with St. Pat's despite the negative events that had happened.

**Karen Davis Gross**  
submitted via Facebook

The 100th was the Best Ever! It was *Animal House* in real life!

**Michael Wuest**, Bus'07, MBA'08  
submitted via Twitter (@MichaelWuest)

The 100th Best Ever St. Pat's was the BEST EVER. My fiancé surprised me and proposed during a Zeta Tau Alpha candlelight.

**Katie Aiken**, EE'06  
submitted via Facebook

The 103rd annual best ever St. Pat's, my court year. I haven't painted the street yet though.

**Matt Mitchell**, CSci'10, Math'11  
submitted via Twitter (@MeowMaster)

Since I'm in (heart) with St. Pat 1991, I guess I'd have to say ... 2009, when we reconnected.

**Jana Schaefer**, NDD'94  
submitted via Facebook

That's easy — St. Pat's 1993. I started dating my wife (**Rebecca Dunkmann**, CE'97) during that St. Pat's. I know what you're thinking, and the answer is yes, there was alcohol involved. We've been married for 13 years now and have two future Miners.

**Brian Repke**, GGph'96, MS GGph'98  
submitted via email

1978. Seventy years of St. Pat's. **Rusty Goldammer**, CE'78, was St. Pat. **John Eash**, AE'79, MS EMgt'90, won the novelty beard contest at Dave's Barber Shop on Pine Street. Triangle fraternity members were the "Cone Heads" as a non-float entry in the parade. Many organizations made floats and cudgels that required engineering solutions to complete. Missouri Secretary of State James Kirkpatrick took part in the celebration and then-Governor Kit Bond walked in the parade and was an Honorary Knight. We made an impact on the community by providing events that drew outside people to town so sales were boosted.

**Richard Koch**, CE'79  
submitted via email

The next Best Ever.

**Jeremy Chaney**, EE, junior  
submitted via Facebook

Email your answers to [alumni@mst.edu](mailto:alumni@mst.edu), or via Facebook or Twitter, by May 1, 2012.

As usual I enjoyed the latest issue of Missouri S&T Magazine. Item No. 125 (Ramey's) of the "140 things we love" reminded me of Bear Tracks. As I recall, it was downtown above a bowling alley. You could have your own beer stein with your name on it and it was always available from a rack of steins on the wall. You walked in, grabbed your stein, and it was filled at a discount price. I still have my stein from the place. How about doing a bit of research on Bear Tracks and include the information in a future issue of the magazine? I think us older alumni would enjoy it. (I did, on rare occasion of course, visit Ramey's.)

Keep up the good work.

**Gary W. Davis**, EE'57  
Onyx, Calif.

The list of 140 things was a welcome and inspired idea for the Fall magazine. Having attended UMR in the late '60s, I kept looking for mention of the "Green Sheet" (I think that was the name). This several-green-page publication would appear around campus about the time of St. Pat's and would be a kind of "roast" for professors, graduate assistants and others who deserved a bit of mention — mostly negative, often bawdy, mainly off-color remarks and description. No one knew where this paper originated, but I remember looking forward to it year after year. I wonder if someone has a copy tucked away in the attic somewhere.

**Lyle Hill**, ME'73  
Rhineland, Mo.

Regarding No. 129 of the 140 things we love about S&T in the Fall 2011 issue, before it was the Grotto, the Cavern, Brewster's, or the Mine Shaft, it was Hiram and Mortimers. I know; I was a bartender there in 1975, just before I graduated. That was the first that I know of that basement being a bar. It was during the foosball days. We had six foosball tables and free barrels of peanuts; eat the peanuts and throw the shells on the floor. Good times!

**Roger Keller**, MinE'75, MS MinE'82  
Las Vegas

In the Fall 2011 issue, you missed the football team's unbeaten season in 1980. You also missed the 1949 football team, which was undefeated in the MIAA Conference. They lost the first two games, both non-conference games. The 1950 football team played in tennis shoes on ice and snow. They were the MIAA Conference champions, losing one non-conference game and one conference game.

The 1914 and 1980 football teams were the only unbeaten teams, and 1949 was the only other undefeated football team in the MIAA conference.

Since the 1980 unbeaten team, Missouri S&T has changed to a weaker conference and still is unable to have a winning championship season.

I still enjoyed the Missouri S&T Magazine.

**Arthur L. Schmidt**, ChE'50  
Lake St. Louis, Mo.

Regarding the 140 things we love about S&T, No. 102 Schuman Pond? As both a townie and proud 1977 graduate, I always heard it referred to as Frisco Pond, named after the Frisco railroad. Has my memory finally gone or has the name changed? And yes, No. 126 Tim's Pizza did have the best pizza and salads in town. There was nothing wrong with the pitchers of beer, either.

I lived in Rolla from 1955, when my dad was assigned to the ROTC department after we returned from Japan, until I graduated in 1977, with time out for the Navy (1970-74). Back then, the ROTC department was in a wooden two story WWI-era building behind the gym. My dad's office was on the second floor and I remember a rifle range on the ground floor. I pretty much grew up on campus and have fond memories of both the university and Rolla.

**John Walker**, Econ'77  
La Porte, Texas

The 141st thing we love about Missouri S&T is amateur radio station W0EEE.

**Douglas Hughes**, EE'63  
Ann Arbor, Mich.

**@scottperdue**  
Scott Perdue, Engl'09

Wow, a 1-10 team beats a ranked 10-0 team// @MissouriSandT: S&T Miners men's basketball shocks No. 2 Southern Indiana.

Eric Showalter's students used iPads to track construction projects in his Cost Estimating and Scheduling course.

## ERIC SHOWALTER: COURSE UNDER CONSTRUCTION

**Old class:** Eric Showalter, associate teaching professor of civil, architectural and environmental engineering, has taught a construction management course called Cost Estimating and Scheduling for more than a decade. One semester-long assignment requires students to pick a construction site and keep a diary of everything that happens — from weather conditions to which subcontractors are on site and what work is being done. It gets them in the habit of observing and writing.

**New twist:** Last fall, instead of keeping a paper diary, his students tracked their progress on iPads using an app called Construction Superintendent.

**The gift:** Robert “Bob” Brinkmann, CE’71, CEO of Brinkmann Constructors, believed that S&T students should be exposed to

new, high-tech approaches to project management. He brought together a group of alumni and corporations with construction-based interests (see list at right) to donate 30 iPads to the S&T civil, architectural and environmental engineering department.

**Up next:** Showalter is using the iPads and Construction Superintendent in his senior design course. He’s teaching 70 students, 11 of whom are on the Missouri State University campus in Springfield. Each team of students is designing a water treatment plant from the ground up.

**In his words:** “I really appreciate this donation. It has great potential. We can do some really neat things in coming semesters, as I learn more. There is so much to explore.” ■

### iPad Donors

Brinkmann Constructors  
Bradley Hornburg, CE’69  
Landmark Contract Management Inc.  
Richard “Dick” Arnoldy, CE’69  
ARCO Construction Co.  
John Mathes, CE’67, MS CE’68  
William Clarke, CE’74, MS CE’79  
Raymond Betz, CE’66

### About the App

Robert “Bob” Brinkmann, CE’71, Bob Wacker, CSci’77, and Bryan Baehr created the iPad app through their joint venture, Construction Centrics, and donated 30 apps.

# POWERED

## BY CHEMISTRY

A group of chemical engineering students took third place in the nation in a competition that required them to design and construct a shoebox-sized car capable of carrying a specified load over a given distance and then stop. Sounds easy, but there's a twist.

The car — dubbed the ChemE Car — was powered, and braked, purely by chemical reactions.

Powered by a custom-built lead-acid battery, the car's braking system was controlled by an iodine clock reaction that caused a change in colors. To get the car to stop, varying amounts of sulfuric acid, potassium iodide, hydrogen peroxide and sodium thiosulfate were used with a starch solution. Changing the ratio of reactants changes the color of the solution. A fiber-optic photo sensor detects that color change, and trips a relay to cut power to the car's motor.

This year's car had to carry 350 milliliters of water a distance of 68 feet. S&T's entry stopped 5½ inches from the finish line — just behind the University of Puerto Rico Mayaguez and the University of California-Davis, says team advisor **Daniel Forciniti**, professor of chemical and biological engineering.

The competition was part of the annual meeting of the American Institute of Chemical Engineers, held in Minneapolis in October. ■

The ChemE Car placed third in a national competition for vehicles powered solely by chemical reactions.

## DYE SCHOLARS ▶

Three mining engineering students received Robert Dye (MinE 1912) Mining Engineering Scholarships.

They are (left to right): senior **Michael Allen**, junior **Joseph Cook** and senior **Joshua Cole**. Department chair **Samuel Frimpong**, the Robert H. Quenon Chair of Mining Engineering, is second from the right.

## HAPPY 140TH BIRTHDAY, S&T

On Nov. 4, faculty, staff and students of Missouri S&T joined the Miner Alumni Association in the Havener Center to celebrate Founders Day in recognition of the first day of classes held on Nov. 6, 1871. A timeline of historic S&T accomplishments as well as memorabilia were on display. Interim Chancellor **Warren K. Wray** got to cut the cake.

## THE FIRST RULE OF FIGHT CLUB IS ...

*According to Olivia Burgess, assistant teaching professor of English and technical communication, the first rule of Fight Club is that we are driven by our own personal utopian ideas, regardless if they end up creating dystopia.*

For those who are discontent, the easiest way to change reality might be to change personal appearances. Think of tattoos, hair styles and plastic surgery. That's where *Fight Club* comes in. "When you get punched in the face and you're bleeding, life gets real pretty fast," says Burgess, whose article, "Revolutionary Bodies in Chuck Palahniuk's *Fight Club*," has been accepted for publication in the journal *Utopian Studies*.

Burgess says a real or at least updated utopia isn't a "perfect" state where change is no longer possible. In many ways, if you subscribe to her theories, anarchy is the new utopia.

All of this might be part of what is driving various revolutions, including the Arab Spring, the Tea Party and the Occupy movements. Those "revolutions" might start out as utopian in theory, but dystopia is always a lurking companion, moving constantly like a shark. In the film version of the novel, the story takes a turn from the personal struggles of *Fight Club* to something called Project Mayhem, a structured attempt to destroy entire financial districts.

"We live in a world where change doesn't seem very possible," Burgess says. "A lot of people feel that frustration." ■

# FARM LIVING IS THE LIFE FOR THEM

Illustration by Brandan Deason

Every day millions of Facebook users log onto their computers to plow land, plant and harvest crops, and raise livestock. Most play the farming simulation game Farmville purely for entertainment, but for a group of engineering students at S&T, it was all for a grade — and the chance to learn new approaches to solving complex engineering problems.

Students in **Ivan Guardiola's** Introduction to Operations Research course spent a week last semester playing the game. Farmville rewards players for tending to their virtual crops and cattle, but these students were also learning how to make better decisions in business and engineering. Through Guardiola's challenge, students competed to see who could earn the most money and gain the most experience.

At the start of the game, students developed plans, based on mathematical models, to achieve their goals. But many had to adjust their plans throughout the game as conditions and situations changed.

"It is up to the player to determine how much land to plow, which seeds to plant, how many seeds to plant, and when to harvest the plants," says Guardiola, an assistant professor of engineering management and systems engineering. "Decisions were completely up to the player."

Guardiola says the game helps students develop critical thinking and decision-making abilities because it forces them to deal with ambiguous situations.

"In engineering, we use data to make decisions, but that approach has limitations because situations are constantly changing," he says. "So you have to assess your situation continuously and adjust accordingly." ■

## RESEARCH ACCOLADES

Ivan Guardiola's research paper about his classroom project, "Using a Social Networking Game to Teach Operations Research and Management Science Fundamental Concepts," was named co-winner of the 2011 Best Young Faculty Paper Award in the Industrial Engineering Division of the American Society for Engineering Education. His co-authors are **Susan Murray**, professor of engineering management and systems engineering, and **Elizabeth Cudney**, PhD EMgt'06, assistant professor of engineering management and systems engineering.

Using equipment that captures and measures exhaust, the researchers tested biofuels in the same type of engine used by a Boeing 737.

## CLEARING THE AIR

*Mixing alternative fuels with conventional jet fuel can cut aircraft emissions by nearly 40 percent, says Prem Lobo, MS ChE'03, MS EMgt'05. And it doesn't affect engine performance.*

In a study published in the journal *Environmental Science and Technology*, Lobo and his fellow Missouri S&T researchers tested two types of alternative jet fuels: biofuels made from vegetable oils, and fuels made with the Fischer-Tropsch process, which creates liquid hydrocarbons from coal, natural gas or biomass. Using equipment that captures and measures exhaust, the researchers tested the fuels in the same type of engine used by a Boeing 737, measuring at different power levels to simulate an airplane's taxi, takeoff, climb and descent.

They found that the more alternative fuel they blended with the jet fuel, the lower the particulate matter emissions. But they also discovered that the only fuel that was a viable alternative was a 50-50 blend of Fischer-Tropsch fuel and jet fuel. It maintained adequate engine power for commercial or military use and it reduced particulate matter mass emissions by 39 percent.

Lobo, assistant director of the S&T Center of Excellence for Aerospace Particulate Emissions Reduction Research, was the lead author of the *Environmental Science and Technology* paper. Co-authors were **Philip Whitefield**, interim vice provost for academic affairs, professor of chemistry and director of the center, and **Donald Hagen**, professor of physics and a researcher at the center.

## PROFESSIONAL DEGREES

During commencement in December, Missouri S&T conferred professional degrees on the following alumni:

- **Nola Rebecca Johnson**, CerE'83, MS EMgt'92, PhD EMgt'99, deputy to the commanding general, Maneuver Support Center of Excellence at Fort Leonard Wood, Mo.
- **Dale M. Pitt**, AE'72, MS AE'75, Boeing Technical Fellow in the field of aeroelasticity, unsteady aerodynamics and adaptive structures
- **Gary D. Pennell**, MetE'97, chief metallurgist at Nucor-Yamato Steel Co.
- **William A. "Bill" Rehm**, GGph'51, a consultant working with the IADC to develop texts on drilling technology
- **George E. Uding**, ME'59, retired resident and chief operating officer of Medusa Corp.

## CONGRATS GRADUATES

A record number of students celebrated their graduation at the Grad Finale on Dec 8. At the event, hosted by the Miner Alumni Association, 136 grads enjoyed food, games and door prizes. **Susan Watson-Hajjar**, CSci'83, donated multiple gift cards and an LG 32-inch HDTV for the grand prize. **Michael Pendergrass**, ME'11, was the lucky winner.

## SCHOLARSHIP BANQUET

Alumni association scholarship endowment donors and their scholarship recipients will meet during the association's Scholarship Banquet on Friday, April 20. More than 400 students who receive scholarships will be honored at the banquet. Donors who provide named scholarships through the association will sit with the students who benefit directly from the donors' generosity.

BACK TO SCHOOL,  
PURSUING A

# DREAM

“THEY KNEW GOING  
BACK TO SCHOOL  
WAS IMPORTANT  
TO ME ...”

— Laura Warren

In 2005, metallurgical engineering major **Laura Warren** was riding in a vehicle that got hit by a train. The driver, her friend's father, was killed in the accident.

Warren spent two years in hospitals with life-threatening injuries, then underwent years of intense physical and speech therapy. This fall, she walked back into the classroom to achieve her goal — earning a degree from S&T.

Warren was a senior when the accident happened. She had already completed an internship with U.S. Steel and was looking forward to graduating and landing a job. It took a while, but now she's back in class and expects to graduate soon. She says her mom and dad were her biggest supporters during her recovery.

“They knew going back to school was important to me and wanted me to be happy and to follow my dreams,” Warren says. ■

## ◀ WELCOME, MR. PRESIDENT

Former computer software executive and University of Missouri-Columbia graduate **Tim Wolfe** was named the 23rd president of the University of Missouri System on Tuesday, Dec. 13, 2011. He began his duties in February. He succeeds **Gary Forsee**, CE'72. For more information about Wolfe, visit [umsystem.edu/president](http://umsystem.edu/president). (Photo courtesy of University of Missouri System)

## FALL 2011 CAREER FAIR

Career opportunities and employer relations hosted the Fall Career Fair on Sept. 27 with 210 employers and about 135 alumni returning to recruit graduates of their alma mater. Prior to the career fair, the Miner Alumni Association, along with Students Today, Alumni Tomorrow (STAT) and Engineers Without Borders, hosted a continental breakfast for the recruiters. For a list of alumni in attendance, visit [magazine.mst.edu](http://magazine.mst.edu).

# SPORTS

## BY THE NUMBERS

Final career point total for women's soccer player **Melissa Young**, the eighth player in school history to reach that milestone.

50

141.2

Per-game rushing yardage by the Miner football team in 2011, the highest by an S&T team since 2008.

7

Highest ranking in the history of the men's soccer program; reached by the Miners on Sept. 26 after beating No. 1-ranked Northern Kentucky.

11 & 8

Longest winning streaks in the five-year history of the Lady Miner volleyball program that were recorded during the season; the team had never won more than three straight matches prior to 2011.

Miner football players who earned all-conference honors from the Great Lakes Football Conference.

18

5

Finish by S&T senior cross country runner **Colleen Conrad** at the Great Lakes Valley Conference Championships to earn all-league honors.

School-record wins by the Lady Miner volleyball team in its historic 2011 season that ended at the NCAA Midwest Regional.

**DESTINATION: ROLLA**  
Make plans to attend Homecoming 2012 on Oct. 12-13. Watch for more details in the Summer issue of Missouri S&T Magazine.

**ROAD TRIP**

TAYLOR KEAL:

# IN THE GAME

*Taylor Keal has been a softball pitcher since she was 10 years old. But she cannot remember being a part of anything like what she experienced on April 10, 2011.*

On that day, she was a part of the longest home game in Missouri S&T history as the Lady Miners defeated Quincy 4-3 in 17 innings in the second game of a doubleheader. The game was also the second-longest in school history, and Keal tied the record for most innings pitched in a single contest with 13.

Keal shut down the Hawks and their three-time All-American Torie Bunzell in the first game that day, winning 3-0 behind a pair of home runs by **Maggie Schroeder**. During the second game she was sitting on the bench watching as the game was tied 1-1 headed into the fourth.

"I started getting the sense I was going to be needed, judging by the way the game was going," she says. "Coach (**Don Kennedy**) came up to me and asked if I had anything left and I said I had about two or three innings in me. I didn't dream of pitching 13 innings but the adrenaline took over and I kept putting up zeroes. The only pitches I had command of were my fastball and changeup."

In the top of the 17th Quincy scored a pair of runs to take a 3-1 lead, but S&T scored three in the bottom half to win the game.

"I was happy we won the game. I don't know if I ever pitched that many innings in a day and I once played five games in a day," she says. "It's something I'll never forget and it was neat to be part of a game like that." ■

◀ When she is not on the field, Keal, a native of Blue Springs, Mo., is preparing for a career as a lawyer. She is currently a junior majoring in business.

# LEARN,

SUCCEED, HAVE FUN

**NEW KUMMER STUDENT DESIGN CENTER  
MAKES A BIG DIFFERENCE**

The previous student design facility, located on campus between the Havener Center and the Campus Support Facility, was cramped and lacked essential equipment. Students had to cross a busy highway just to use the bathroom.

Opened in spring 2011, the Kummer Student Design Center is a 21,400-square-foot facility with retail space and room for most of the university's design teams.

**IN THE PREFABRICATED METAL STRUCTURE THAT USED TO HOUSE S&T'S DESIGN TEAMS, SPACE HEATERS KEPT THINGS RELATIVELY WARM IN THE WINTER. BIG FANS HELPED VENTILATE IT IN THE SUMMER. THE PLACE FAMOUSLY HAD NO RESTROOM FACILITIES.**

Huge model airplanes hung from the rafters. A sense of claustrophobia was pervasive. During any given part of the year, the Solar Car Team was working on an electrical problem, the Human-Powered Vehicle Team was having design issues with its windshield and the Steel Bridge Team was welding beams.

"The steel bridge guys would be welding and we'd have to dodge these molten blobs to keep from getting burned," says **Ross Jensen**, a junior in mechanical engineering on the Human-Powered Vehicle Team.

The teams, of course, made the most of what they had. National championships

from the Solar Car Team and the Human-Powered Vehicle Team have been well documented, and the Formula Car Team has been very competitive at the international level. But in recent years, some of the successes — at least as defined by performance in competitions — began to diminish as the teams outgrew their main working facility.

Last year, for instance, the Human-Powered Vehicle Team finished second in both of its competitions. That is impressive — except for the fact that they were used to winning. "Our vehicle was light years ahead of the others in 2011, but we didn't finish it until eight hours before the competition," says Jensen. Competing with other teams on campus for space and time in the crowded facility meant fewer opportunities to test vehicles before a competition.

Meanwhile, the Advanced Aero Vehicle Group crashed its plane and the concrete canoe cracked. Lots of duct tape was used. Most team leaders agree that the amount of time spent on testing S&T's various design team contraptions correlates directly with the chances of performing well in a competition — and there wasn't enough time for some of the teams. Or enough space.

This year things are different. Very different. A sparkling 21,400-square-foot facility is now home to S&T's student design teams. The Kummer Student Design Center has offices, meeting rooms for all the teams and staff, lots of technology and equipment, and, of course, clean restrooms, as well as modern heating and cooling systems. There's even space for retail businesses — including a Jimmy John's and a Spoon Me yogurt shop — in the front of the facility, which is located where the old Holsum Bread Bakery and then the Student Rec Center used to be. In the main part of the building, there are plenty of spacious, well-lit areas for the students to work. **(continued on page 21)**

## ADVANCED AERO VEHICLE GROUP

No 1

DESIGN TEAM

- After last year's plane crashed, the team used Popsicle sticks to temporarily bolster the landing gear.
- AAVG also designs and builds high-powered rockets.  
[To watch the practice launch, scan the QR code above with your smart phone or visit \[magazine.mst.edu\]\(http://magazine.mst.edu\).](#) (Wait for it. It's about 30 seconds in).
- The team must notify the FAA before launches.

## BAJA SAE

No 2

DESIGN TEAM

- One year, the team built a vehicle that could go more than 40 mph in addition to handling rugged terrestrial landscapes.
- Back in the UMR days, the team built a vehicle that could drive on water. Watch it plunge into Little Prairie Lake and then across it.  
[To see the video, scan the QR code above with your smart phone or visit \[magazine.mst.edu\]\(http://magazine.mst.edu\).](#)

## CONCRETE CANOE

No 3

DESIGN TEAM

- For normal construction, concrete weighs about 150 pounds per cubic foot. But to float these boats, lighter aggregate mixtures of concrete are used.
- To qualify for competitions, the canoe has to pass a swamp test every year; it is submerged in water and, if seaworthy, floats back to the surface.
- If you're one of the team's paddlers, expect to get wet on occasion.

## ENGINEERS WITHOUT BORDERS

No 4

DESIGN TEAM

- S&T has one of the largest student EWB chapters in the U.S.
- More than 330 of our EWB students have traveled to Bolivia, Guatemala, Haiti and Honduras, so far.
- S&T helped start the EWB chapter at the University of Kansas.

To see videos about EWB, scan the QR code above with your smart phone or visit [magazine.mst.edu](http://magazine.mst.edu).

Suddenly, the teams are rejuvenated. The Concrete Canoe Team, for example, was two months ahead of last year's pace at the time of this writing.

S&T's student design teams were officially organized in April of 2000 after some of the teams had already built strong programs. Recognizing the need to help, a group of graduates led by **Richard "Dick" Arnoldy**, CE'69, **Robert "Bob" Brinkmann**, CE'71, and **Barry Koenemann**, CE'70, started raising money for a new facility. **Fred**, CE'55, and **June Kummer** made a naming gift that made it possible to go ahead with the \$2.5 million renovation of the building on the corner of Bishop Avenue (U.S. Highway 63) and 10th Street. The new facility was dedicated on May 20, 2011.

"With the new facility, we've been able to acquire equipment we never had space for," says **Paul Hirtz**, EMgt'95, MS EMgt'97, PhD EMgt'02, associate director of the center.

A tall rocket, two human-powered vehicles and two dune buggies belonging to the Baja Team stand in one of the main working areas of the Kummer Student Design Center, along with other projects in the works. Yet there's plenty of room to move around.

Of course, there are still costly logistical challenges. The Baja Team, for instance, is traveling to competitions in Oregon, Wisconsin and Alabama this spring. And the only place the Formula Car Team could find that is big enough and accessible enough to test their vehicle is the parking lot of the Hearnes Center in Columbia Mo., an hour and a half away.

But for most of the students, who also have a lot of class work, all of the time and effort on design team projects pay off.

## 12 DESIGN TEAMS

AN EVEN DOZEN

The Hydrogen Design Solutions (**H2**) and International Genetically Engineered Machines (**iGEM**) teams are the latest to join the Kummer Student Design Center, bringing the total number of groups to 12.

***H2 studies challenges facing the hydrogen community, such as how local resources could be used to make biogas for power generation on campus.***

***iGEM designs synthetic biological systems that can operate in living cells. Their latest project used segments of DNA embedded in bacteria to detect glucose.***

Design center students work with high-tech equipment and computer models. But they are also familiar with some of the more conventional trade tools and other stuff associated with making machines. These are just some of the items we found scattered about. Note that it's nearly impossible to find a full roll of duct tape ...

"Take out sleep and you're good to go," says mechanical engineering senior **Miriah Anderson**, a member of the Robotics Team who has already landed a job with National Instruments in Austin, Texas, even though she won't graduate until May.

According to Jensen, students who don't join design teams are missing out on opportunities to demonstrate the viability of new technologies by "learning how to manufacture what they design."

Students on design teams learn leadership and problem-solving skills "on the job" as they plan, finance, design and implement real-world projects. In addition to competing against their peers from universities across the nation, design team members gain technical expertise and learn critical business skills.

The students who participate also learn valuable lessons associated with teamwork. "With a test in class, it's your responsibility," says **David Conradi**, a senior on the Formula Car Team. "When working with a design team, if you fail, you are letting others down."

(continued on page 25)

## FORMULA CAR TEAM

No 5

### DESIGN TEAM

- The Indy-style Formula cars go from 0 to 60 mph in about 3 seconds.
- The team is competing in Germany this summer. No word on whether they'll hit the autobahn.
- The team sold the 2002 vehicle on eBay.

To see a video, scan the QR code above with your smart phone or visit [magazine.mst.edu](http://magazine.mst.edu).

## HUMAN-POWERED VEHICLE TEAM

No 6

### DESIGN TEAM

- The team previously won six straight championships.
- In 2007, **Jerrod Bouchard**, EMgt'08, ME'08, became the second-fastest college student to ever be propelled by his own power. He was encased in the "bullet bike," which was engineered by S&T students. To see a video, scan the QR code above with your smart phone or visit [magazine.mst.edu](http://magazine.mst.edu).
- **Whitney Joseph**, EMgt'08, and **Whittney Metcalf**, PetE'11, were both female champions in human-powered vehicle racing.

- ◀ Students in Missouri S&T's Engineers Without Borders chapter work on sustainable engineering projects like helping bring fresh water to small communities in developing nations.

Two of the teams that officially belong to the center conduct their business off-site (three if you count the Formula Car Team, which usually works on its vehicle elsewhere). The Solar House Team, of course, needs open space to build its homes. S&T's Solar Village is located on land just west of the new Kummer Student Design Center. And then there's the S&T chapter of Engineers Without Borders (EWB), the largest group and the only team in the center that isn't involved in any kind of formal competition. EWB students travel to countries in Central and South America to assist with water problems.

**Grace Harper**, a senior in geological engineering, has been to Honduras twice with EWB, and she wants to go again. "It becomes more about the personal connections — the people — than the project," she says.

While most of the students on design teams concentrate on learning and trying to make the world a better place in some way, it's important to have fun as well. "We could build the thing out of hemp or something, but it's nice to just be able to make a car that goes fast," says **Thomas Fears**, senior in mechanical engineering, of the Baja Team.

That sentiment fits the motto of the center's director, **Roger LaBoube**, CE'70, MS CE'73, PhD CE'77: "Learn, succeed, have fun."

And the enhanced ability for many students to learn, succeed and have fun in a positive environment was largely made possible by the Kummers.

"Missouri S&T's student design teams have an incredible record of success, and our students deserve to work and conduct business in a facility that provides the best laboratory and work space possible," says Fred Kummer. "June and I are very pleased to be able to provide this support for such a world-class student operation." ■

**"WE COULD BUILD THE THING  
OUT OF HEMP OR SOMETHING,  
BUT IT'S NICE TO JUST BE ABLE  
TO MAKE A CAR THAT GOES FAST"**

Thomas Fears  
Baja SAE

*Mingle with fellow alumni and cheer on the design teams as they face-off against tough rivals. See pages 26-28 for a complete list of upcoming competitions to find out when we'll be in your area. Please visit competition websites for the most current information on page 28.*

# 2012 STUDENT DESIGN TEAM COMPETITIONS AND ALUMNI EVENTS

Race times are subject to change. Please visit competition websites for the most current information. All times ending with “\*” are approximate.

The Kummer Student Design Center was dedicated on May 20, 2011.

The members of the Missouri S&T family extend their deepest gratitude to:

Fred, CE'55, and June Kummer

whose gift named the

Kummer Student Design Center

and

Richard "Dick," CE'69, and Nancy Arnoldy

Robert "Bob," CE'71, and Kim Brinkmann

Michael, ME'68, and Joyce Bytnar

Kenneth and Marian Clark

Billy Gerhart, EE'61

Barry, CE'70, and Deborah Koenemann

Jerry L. Rich, EE'74

whose gifts named the facility's labs and offices

and

Caterpillar Foundation

ConocoPhillips

Roger, ME'65, and Sandra Dorf

Douglas, ME'87, and Pamela Duchardt

David, EE'90, and Lisa Enke

Gerald, ME'65, and Miriam Kettler

The late Vernon McGhee, PetE'42

John Thomas Modlin, ME'85

Robert, ME'55, and Tommie Oetting

David and Ruth Robertson

The late Dr. Robert Russell

Paul, ME'71, and Nancy Scherrer

The Sunderland Foundation

whose gifts helped us reach our goal to make this dream a reality.

## SOLAR HOUSE TEAM

No 9

### DESIGN TEAM

- Anna Osborne, CE'11, spent her last semester at S&T living in one of the 800-square-foot houses in the Solar Village. She traveled to Bolivia three times with EWB as an undergraduate.
- Dan Oerther, the John and Susan Mathes Chair of Environmental Engineering, has been living in one of the other houses with his family.
- During the summer, S&T sells power generated from the village back to the utility company.

## STEEL BRIDGE TEAM

No 10

### DESIGN TEAM

- Cautionary tale: During one past competition, another team was putting the final piece of its bridge in place, using a rubber mallet, when the structure collapsed.
- Teams are judged on how efficiently their bridges are constructed.
- The bridges are approximately  $\frac{1}{10}$  the size of a real bridge.

## MISSION, GOALS AND BENEFITS

### MISSION

The association proactively strives to create an environment — embodying communication with and participation by Miner alumni and friends — to foster strong loyalty to the university and growth of the association. The association increases its financial strength and provides aid and support to deserving students, faculty and alumni.

### GOALS

- Increase alumni pride in their association with Missouri S&T and the Miner Alumni Association
- Increase alumni involvement, especially that of young alumni
- Increase alumni contributions, both in the number of alumni making a financial commitment and in the dollars raised to benefit Missouri S&T and the Miner Alumni Association
- Strengthen relationships with faculty, staff and students on behalf of the alumni association.

The officers and other members of the association's board of directors provide leadership and personal participation to achieve these goals and fulfill this mission. For their efforts to be a success, they need YOUR active participation as well, in whatever alumni activities you choose.

### BENEFITS

#### CAREER ASSISTANCE

Missouri S&T's career opportunities and employer relations will help you in your job search. For information, call 573-341-4343.

#### SERVICES

##### Online Community

including searchable directory at mineralumni.com

##### Access to alumni office

via email (alumni@mst.edu)

##### Address update service

so you don't miss your Missouri S&T mail

##### Insurance discounts

##### Travel opportunities

#### MINER MERCHANDISE

Chairs, lamps, watches, pendants, Joe Miner credit card, license plates for Missouri residents and the official Missouri S&T ring.

## POLICY FOR SUBMISSIONS

- We are happy to announce weddings, births and promotions, after they have occurred
- We will mention a spouse's name if it is specifically mentioned in the information provided by the alumnus/alumna
- We will print addresses if specifically requested to do so by the alumnus/alumna submitting the note
- We reserve the right to edit alumni notes to meet space requirements
- We will use submitted photos as space permits
- Due to the production time required for each issue, submissions may take up to six months to appear.

Your patience is appreciated.

## UPCOMING EVENTS IN TEXAS: MEET THE CHANCELLOR

Don't miss the opportunity to meet Missouri S&T's new chancellor, Cheryl B. Schrader. She will meet with the following sections: **Houston** on May 17 and **Austin-San Antonio** on May 19.

For more information on these and other upcoming events, visit [mineralumni.com](http://mineralumni.com) or call the Miner Alumni Association at 573-341-4145.

## UPCOMING SECTION EVENTS

### Austin-San Antonio

*New Chancellor Introduction*  
Saturday, May 19  
Time TBD

Home of Roger, ME'65,  
and Sandy Dorf  
13226 Shore Vista Drive  
Austin, Texas

### Cincinnati-Dayton

*St. Pat's Party*  
2-5 p.m., Sunday, March 25

Trinity Pub  
8953 Princeton-Glendale Road  
West Chester Township, Ohio

### Falls of the Ohio

*St. Pat's Party*  
6 p.m., Friday, March 23

Patrick O'Shea's  
956 Baxter Ave.  
Louisville, Ky.  
502-589-7373  
[osheaslouisville.net](http://osheaslouisville.net)

### Georgia

*St. Pat's Party*  
5 p.m., Saturday, March 24

Johnnie MacCracken's Irish Pub  
15 Atlanta St. SE  
Marietta, Ga.  
678-290-6641  
[johnniemaccrackens.com](http://johnniemaccrackens.com)

*Advanced Aero Vehicle  
Group Competition*  
(See story page 26)

### Houston

*New Chancellor Introduction*  
Thursday, May 17  
6-8 p.m.

H.E.S.S. Club  
Houston Engineering &  
Scientific Society  
San Jacinto Room  
5430 Westheimer Road  
Houston, Texas  
713-627-2283

### Indianapolis

*St. Pat's Party*  
6-9 p.m., Saturday, March 22

Claddagh Irish Pub  
3835 E. 96th St.  
Indianapolis, Ind.  
317-569-3663

### Las Vegas

*St. Pat's Party*  
6 p.m., Friday, March 23

Landry's Seafood House  
2610 W. Sahara Ave.  
702-251-0101  
[landrysrestaurants.com](http://landrysrestaurants.com)

### Lincolnland

*Annual Golf Tournament*  
Tuesday, May 22

11:15 a.m. Registration  
11:30 a.m. Tee time  
5 p.m. Social hour  
6 p.m. Dinner

Piper Glen Golf Course  
7112 Piper Glen Drive  
Springfield, Ill.  
217-483-6537  
[piperglen.com](http://piperglen.com)

### Madison, Wis., Area

*Baja SAE Competition*  
(See story page 26)

### Mid-South Tennessee

*St. Pat's Party*  
6-8 p.m., Thursday, March 22

The Brass Door  
152 Madison Ave.  
Memphis, Tenn.  
901-572-1813  
[thebrassdoor.com](http://thebrassdoor.com)

### Mid-Tennessee

*St. Pat's Party*  
6-8 p.m., Friday, March 23

Blackstone  
Restaurant & Brewery  
1918 West End Ave.  
Nashville, Tenn.  
615-327-9969  
[blackstonebrewery.com](http://blackstonebrewery.com)

### Motor City

*Formula SAE Competition*  
(See story page 26)

*Robotics Competition*  
(See story page 26)

### NE-IA

*Concrete Canoe Competition*  
(See story page 26)

*Steel Bridge Competition*  
(See story page 26)

### Northern Alabama

*Advanced Aero Vehicle  
Group Competition*  
(See story page 26)

*Baja SAE Competition*  
(See story page 28)

### Pennsylvania

*Human-Powered Vehicle Competition*  
(See story page 26)

### Portland

*Baja SAE Competition*  
(See story page 26)

### Salt Lake City

*Human-Powered Vehicle Competition*  
(See story page 31)

### St. Louis

*Annual Golf Tournament*  
Time TBD, Saturday, June 23

Wolf Hollow Golf Club  
4504 Mo. Highway 100  
Labadie, Mo.  
636-390-8100

## ROCKY MOUNTAIN SECTION: RACING IN THE MOUNTAINS

Inside the 60,000-square-foot climate-controlled Speed Raceway in Englewood, Colo., Rocky Mountain Section alumni felt the wind in their hair and the thrill of flying past fellow alumni for the title of "King/Queen of the Road."

During the Oct. 29 event, alumni raced electric carts around the track, flew into walls and came out to compare their statistics from the state-of-the-art timing system. This family-friendly event encouraged dad, mom and the kids to race, watch in suspense, and play pool or arcade games. During one race, a daughter was heard yelling, "Come on Dad, you can go faster than that!"

"It was a great opportunity to have a friendly race and see a little competition among the 'Rolla' gang," says Kurt Haslag, CE'07, president of the Rocky Mountain Section.

## SEE WHO ELSE IS COMING

Want to know who else is planning to attend a section event in your area? Just click on the link at [mineralumni.com](http://mineralumni.com) and register online to see a list of other attendees in the online community. The attendee list is also available by clicking on the events tab.

## HAIL TO THE (PAST) CHIEFS

*It's pretty easy to pick out the past presidents at any meeting of the Miner Alumni Association board of directors. They're the ones seated together in the back corner of the Havener Center meeting room, where the directors gather for their spring and fall meetings.*

That ritual dates back to the mid-1970s, says **Robert M. Brackbill**, MinE'42, who served as association president from 1974 to 1976. During his tenure only two former presidents — **James J. Murphy**, CE'35, and **Peter F. Mattei**, CE'37 — routinely attended the meetings. But they made their presence known.

“Those two guys sat back there and kibitzed me all the time,” Brackbill says. “Back in those days, we would listen to them. These days, the board couldn't care less about our opinions, and I don't blame them, for we elderly Miners have a habit of embellishing the good old days.”

Brackbill is exaggerating, of course. The collective voice of the association's past presidents remains influential, and their advice is welcomed. “The institutional knowledge the past presidents bring is very helpful to the board and executive committee,” says **Larry L. Hendren**, MinE'73, who was association president from 2004 to 2006.

Current president **Susan Hadley Rothschild**, CSci'74, agrees. “There are no other people who care more about the Miner Alumni Association and S&T than the past presidents,” she says. “They are an inspiration to me, and I hope to others on the board.”

Like the association itself, the role of past president has changed through the years. No longer mere “kibitzers,” former presidents remain active on alumni board committees and as advocates for Missouri S&T. Many have also served on the S&T Board of Trustees, which advises the chancellor on university matters.

“The past presidents are here to help the current board and to give advice in the proper way to the new crop of officers,” says **Gerald L. Stevenson**, ChE'59, who served the association as president from 1994 to 1996. Even more important, he says, is their role as ambassadors for the university. “We should also promote the very good things that the university is doing” to those outside the campus, Stevenson says.

Under Brackbill's leadership, the alumni association evolved into a more professional organization with an expanded purpose. Newer leaders, like Stevenson and Hendren, took on new challenges to help the university thrive and keep alumni connected. Under Stevenson's leadership, the association developed its mission and vision statement as part of a quality improvement process he helped initiate. Hendren focused on improving legislative relations during a time when state funding for higher education was declining. He also served on the search committee that brought former Chancellor John F. Carney III to campus.

What keeps the circle of past leaders connected to the alumni association through the years? Brackbill, now the elder statesman of the group, sums it up in one word: friendship.

“Friends have made my life beautiful,” he says. “A lot of those friendships were made in college, and I made a lot of friends through my alumni work.”

Hendren agrees. “We enjoy the interaction” with newer board members, he says. “We just have a passion for the institution and the alumni association.”

For Stevenson, the greatest satisfaction comes from getting younger alumni involved in leadership positions. “It's one of the very best things that has happened to me in my life,” he says. “I'm very pleased to have helped in some small way by serving as president, and involving other alumni in the organization.” ■

“WE JUST HAVE  
A PASSION  
FOR THE  
INSTITUTION  
AND THE ALUMNI  
ASSOCIATION.”

— **Larry L. Hendren**, MinE'73

Stevenson, ChE'59, MS ChE'63; Perrin Roller, GeoE'80; Darlene (Meloy) Ramsay, MetE'84; Larry L. Hendren, MinE'73; Robert T. Berry, CE'72; Robert M. Brackbill, MinE'42; Zebulun “Zeb” Nash, ChE'72; Marianne Ward, executive vice president of the Miner Alumni Association; and James E. Bertelsmeyer, ChE'66. Not pictured: Robert Bay, CE'49; James R. Patterson, CE'54; and John B. Toomey, ME'49, MS ME'51. (Photo by B.A. Rupert)

## BOLD AND FRESH BEATS ODDS FOR BARTLING

The horse Bold and Fresh, owned by **Donald Bartling**, EE'63, MS EE'67, won the \$750,000 Hambletonian Oaks for 3-year-old trotting fillies last August at the Meadowlands in New Jersey. The horse was a 24-to-1 longshot in the race. It was the first Hambletonian Oaks win for Bartling, who lives in Timonium, Md.

## LABOUBE NAMED TO 'POWER LIST'

*Structural Engineering and Design* magazine named **Roger LaBoube**, CE'70, MS CE'73, PhD CE'77, to its 2011 "Power List." Each year, the magazine recognizes 10 leaders in the structural engineering sector for developing solutions to some of the world's toughest problems. LaBoube, an expert in cold-formed structural steel, is a Curators' Teaching Professor emeritus at Missouri S&T. He is also director of the Wei-Wen Yu Center for Cold-Formed Steel and director of the Kummer Student Design Center at Missouri S&T.

### 1949

**Robert C. Hansen**, EE, recently authored *Small Antenna Handbook*, published by John Wiley & Sons Inc.

### 1950

**Eugene A. Bartels**, CE: "My wife, Marilyn, and I observed our 60th anniversary on Aug. 12, 2011. I was 86 on Aug. 27, and our daughter was 55 on Aug. 20. I recently had my 39th surgery."

**Delmar Wallace Breuer**, CE: "I live in Bethany Village Retirement Center. Good food, good love, lots of activities. Former schoolmate lives in the same building as I do."

**Beryl Corrie**, PetE: "I retired after 35 years with Marathon Oil on Jan. 1, 1987. My last position was operation superintendent for California in Bakersfield. My wife, Nevada, passed away in 2004. I live in Rosewood Retirement Community in Bakersfield."

### 1951

**Earl E. Jackson**, MinE: "Paid a visit to campus in October and enjoyed meeting some mining students, the department secretary and alumni staff. I was impressed with all the construction done since my last visit in 2001. Looks great. Many changes since I graduated. I believe

the school needs more visitor parking, though."

### 1952

**William M. Penney Jr.**, CE: "This year I took my French friend on a tour of eight western states for three weeks. After taking her home to California, I came to Thermopolis, Wyo., where I helped recover and prepare dinosaur bones for study and display — much fun and interest. Two of my granddaughters recently presented me with great-granddaughters."

### 1953

**Nick Schurick**, CE: "I retired as city engineer. I'm active on the golf

### Sid Duerr

PetE'50

Jackling Jocks from various championship Miner football teams reunited in San Antonio last year. From left are Duerr, **Don Dowling**, ChE'51, and **George Bock**, NDD'52.

course and enjoy watching my granddaughters, Jacqueline and Elizabeth, play volleyball and basketball. I'm hoping they will become engineers at Rolla."

## 1954

**Daniel E. Groteke**, MetE: "I continue to manage and direct Q.C. Designs Inc. in local and export activities and received my 17th U.S. patent in May 2011. I'm actively involved in AFS and NADCA."

## 1955

**Campbell C. Barnds III**, EE: "I enjoy the quarterly publication — Joe Miner lives!"

**Howard M. Brown**, MS ME: "Traveled to Wisconsin for vacation: Phillips, Tomahawk and Columbus."

**Delmar "Bud" Picker**, CE, retired in 1993 after 30 years with Groner & Picker Consulting Engineers. He's been married to Rita for 58 years and has one son, one daughter and two grandsons. An avid golfer, he enjoys travel, fishing and hunting.

## 1957

**Jack L. Fester**, CE: "Gwen, my wife of 49 years, passed away in 2006. I am remarried to my lovely wife and am quite happy. This is my 20th year of retirement from AT&T."

**Wallace R. Saunders**, EE, is retired in O'Fallon, Mo., where he spends time golfing and traveling.

**Charles A. Wentz Jr.**, ChE, MS ChE'59, was appointed to the School of Engineering Advisory Board at Southern Illinois University Edwardsville. He and his wife, Joan, hosted the ninth annual Pi Kappa Alpha Grains and Grapes Barbecue on Sept. 24, 2011. "Mark your calendars for this year's event on Sept. 22, 2012, in Edwardsville, Ill. All Pi Kappa Alpha alumni are invited."

## 1958

**John F. Kirse Jr.**, CE: "Finally enjoying full retirement and sharing hunting, fishing and shooting with my lovely wife. We are getting very serious about archery practice and hunting."

## 1959

**Valgene Hart**, ME: "Visited our son and family in Albania where he works as program manager and U.S. marshal for the U.S. Department of Justice. Our twin daughters both live in Colorado Springs, Colo. We attended a fundraising dinner there for our grandson's school where he played in a jazz band and George W. Bush was the speaker. We also attended our granddaughter's graduation from law

# FUTURE MINERS A – H

Andrews

Braatz

Campbell-Duey

Clark

Hand

**Dan Andrews**, MS SysE'09, and his wife, Ella, had a boy, Ereka Noah, on Sept. 20, 2011.

**Benjamin Braatz**, AE'02, MS AE'05, MS SysE'08, and **Emilie (Els) Braatz**, Arche'08, had a boy, Caleb Robert, on May 17, 2011. He joins sister Anna Louise, born March 18, 2009.

**Kerri Campbell-Duey**, BSci, Psyc'01, and her husband, Joe, had a girl, Madelyn Kierra, on June 14, 2011. She joins brother Gavin, 20 months.

**Tony Clark**, ME'01, and **Jen Sigman**, EE'00, CerE'00, had a boy, Maximillian Anthony Clark, on Aug. 29, 2011. He joins sister Lily, 3.

**Karen (Thenhaus) Hand**, CE'93, and her husband, Brian, had a boy, Silas Gage, on Sept. 15, 2010.

Hawley

FUTURE  
MINERS  
H – K

Hunter

Italiano

Jeffries

Kulifay

**Scott Hawley**, PetE'98, MS CSci'00, and **Jennifer Hawley**, CSci'01, had a girl, Kahlán Elizabeth, on Oct. 1, 2011.

**Mike Hunter**, Math'99, and his wife, Sheila, had a girl, Claudia Ilene, on July 23, 2011. She joins sister Miriam Celia.

**Karla (Niehaus) Italiano**, EMgt'00, MS EMgt'02, and her husband, Pasquale, had twin girls, Clara Jo and Gloria May, on June 1, 2011. They join sister Louisa Grace, 2.

**Jason Jeffries**, CE'02, MS CE'04, and **Shannon (Foil) Jeffries**, CE'02, MS CE'03, had a girl, Harper Rene', on Jan. 29, 2011. She joins brother Jack. Grandpa is **Jim Foil**, CE'74, MS CE'75.

**Chris Kulifay**, ME'00, and his wife, Mandy, had a girl, Kelsey Noelle, on June 21, 2011.

(continued on page 41)

school in St. Petersburg, Fla., and another granddaughter's program at Wheaton College in Illinois."

## 1960

**Ralph G. Angle**, CE, has been retired for 24 years and plays golf frequently.

**Edgar L. Morris**, CE: "Keep up good works. I got the message that Rolla will be in next year's U.S. News and World Report for best engineering schools."

## 1961

**Melvin A. Ingram**, ME: "My wife, Sharon, and I enjoy retirement. We went on a wonderful trip to Alaska in August. I still work parttime April to October at the St. Louis County Museum of Transportation, driving the miniature train."

## 1962

**Golden Alumni Reunion**  
*The Class of 1962 will celebrate its 50th anniversary at the Golden Alumni Reunion May 21–22 at Missouri S&T and the Comfort Suites in Rolla. Alumni will tour their departments and learn about what is happening on campus today. The Miner Alumni Association will host and present programs on world and MSM events 50 years ago. The highlight of the event is a recognition ceremony, where class members receive their 50-year pins and certificates. Invitations to the class of*

*1962 are in the mail. If you are from another class and would prefer to celebrate your Golden Alumni Reunion with the class of 1962, please contact the alumni office at alumni@mst.edu or call 573-341-4145 for more information.*

**Baldev K. Bhatia**, MS ChE: "I retired in 1999 and in May 2011 we traveled to Russia, Israel and Turkey. I published a travel book, *Memories of Russia*, on blurb.com. It covers historical facts about significant places we visited. I have one daughter, Anita, and grandchildren Andrew, Ellie and Caroline."

**Donald N. Overall**, MetE, is retired and lives at Rehoboth Beach, Del. He authored a published book titled *A Logical God: Exploring a Spiritual and Physical Life*.

**Aaron "Mike" Reuck**, CE, retired as faculty manager and engineer from William Jewell College in 2001. He and his wife, Karel, live at Bennett Springs State Park in Lebanon, Mo. Their daughter, **Tonya (Reuck) Lohman**, CE'97, graduated from William Jewell College and S&T. She is a professional engineer and works for the Missouri Department of Transportation. She has three children with husband, **Brian Lohman**, NDD'97, who earned a metallurgical engineering degree from Georgia Institute of Technology in 2002.

## 1963

**Maurice L. Northcutt**, CE, MS CE'64: "My best wishes to all in the civil department, especially the old timers."

**Harrel Timmons**, CE, was inducted into the Illinois Aviation Hall of Fame. In 1969, he established a fixed-base operation in Galesburg, Ill., which is now called Jet Air Inc. A Cessna aircraft dealer, he flew a Cessna Citation 500 in 2009 over the Arctic Circle to deliver it to Sweden.

## 1964

**James P. Odendahl**, CE: "Still retired here in Indian Land, S.C."

**Bill Stine**, EE, of Jefferson City, Mo., won the Civil War history category of the Missouri State Archives 2011 Great

Missouri Treasure Hunt contest. His submission told about Union Army Pvt. Fredrick Buehrle, who marched in the battles of Carthage and Wilson's Creek and served in both the Missouri House and Senate.

## 1965

**Richard Gentile**, PhD GGph, retired in 1999 after teaching geology at the University of Missouri-Kansas City for 33 years. "Still active in departmental affairs, writing papers, advising graduate students and as curator of the Geosciences Museum. No grass grows under my feet."

**Don Stainbrook**, GGph, MS GGph'66, credits his S&T education for a lifelong career with Newmont Mining Co. Now retired in Cape Cod, he has designed

and built 50 miniature steam-powered engines.

**Roger H. Stickler**, CE, and his wife, Karen, celebrated their 50th wedding anniversary in August. Their three children and seven grandchildren joined them for a vacation on the Olympic Peninsula in Washington.

**Alfred J. Thiede**, CE, MS CE'72, MS EMgt'72: "Chris and I continue to enjoy retirement in lovely Port Ludlow, Wash. We joyfully welcomed our 14th grandchild, Laurel, in July. Life is wonderful."

## 1966

**John V. Andesilich**, CE: "I'm still working. Enjoying a short assignment in Fernice, British Columbia, with my wife, Laura. It's a new experience for both of us. It is beautiful here and the people are

## ANNUAL ALUMNI RECEPTION AT BOEING

Alumni of Missouri S&T who work at Boeing in St. Louis gathered at the company headquarters on Nov. 29 to meet interim Chancellor **Warren K. Wray** and other campus representatives as part of the Miner Alumni Association's annual alumni reception. During his remarks to the group, Wray highlighted the importance of the collaborative relationship between S&T and Boeing.

In addition to being one of the top hiring corporate partners, Boeing provides consistent scholarship, program and research support to S&T. Many of the alumni in attendance also make personal commitments of their resources and time by serving on the alumni association board, advisory boards, academies and assisting with student-centered projects.

### ◀ **Raymond "Randy" Freeman** ChE'72, MS ChE'73, PhD ChE'80

Freeman received the 2011 Norton H. Walton/Russell L. Miller Award in Safety/Loss Prevention by the American Institute of Chemical Engineers. He is retired from Monsanto Co. and continues to serve as a consultant and process safety expert.

### ◀ **Karen Aldridge Crawford** EMgt'74, MS EMgt'75

Crawford was selected as the Best Lawyers' 2012 Columbia, S.C., Litigation - Environmental Lawyer of the Year. She was also selected by her peers for inclusion in the *Greater Columbia Business Monthly* "Legal Elite" for her environmental practice. She is a partner in Nelson, Mullins, Riley & Scarborough LLP's Columbia office.

## CARDINALS CONNECTIONS

St. Louis Cardinals' David Freese reacts after hitting a solo home run off a pitch by Texas Rangers' Mark Lowe in the 11th inning of Game 6 of baseball's World Series Thursday, Oct. 27, 2011, in St. Louis. The Cardinals won the game 10-9. (AP Photo/Jeff Roberson)

### GO CRAZY!

In Game 6 of the 2011 World Series, David Freese of the St. Louis Cardinals came to bat in the bottom of the ninth inning. You probably know the story. Trailing by a game to the Texas Rangers, the Cardinals were facing elimination. There were two outs and two men on base. Down to his last strike, Freese hit a two-run triple to send the game into extra innings. In the 11th, again with two strikes, Freese hit a game-winning home run. The rest is history.

One fan who was going especially crazy over Freese's heroics was, predictably, **Guy Freese**, David's dad. Guy, CE'75, is executive vice president for Professional Service Industries Inc. in St. Louis.

David Freese, of course, was named MVP of the World Series.

### RALLY SQUIRREL HITS HOME

The Rally Squirrel became instantly famous during the 2011 playoffs when he ran across home plate while Skip Schumaker was at bat, solidifying himself as a sidekick mascot in the eyes of St. Louis Cardinals' fans.

**Joe Abernathy**, ME'77, vice president of stadium operations, said his staff successfully captured and released four squirrels into the wild — or at least a good distance from Busch Stadium.

But Abernathy couldn't confirm that the real Rally Squirrel was actually caught. The squirrel was such a hit with fans that he had his own Twitter account and has appeared on T-shirts. During the World Series, the Cardinals sold stuffed Rally Squirrels for \$5.

wonderful. I'm proud of my granddaughter, **Jordan Swing**, who is majoring in civil and architectural engineering at S&T."

**Nicholas Tibbs**, GGph, MS GGph'69, PhD GGph'72: "Susan and I stay close to home in Fruitland, Mo. Though retired, I still teach a couple of courses at Southeast Missouri State University. We have a nice crop of grandkids. I have fun and help keep our larder stocked by gardening, hunting and fishing. I have taken up shotgun-shooting sports and I volunteer with the local 4-H shooting program."

### 1967

**Kenneth Bollinger**, ME: "I retired from Bulkmatic Transport in April 2011, after 27 years at Monsanto and 16 years at Bulkmatic. My wife, Fran, just retired as a Georgia teacher, so we look forward to travel and retirement."

**Warren Stanton**, CE: "After 38 years of job satisfaction as a professional civil engineer, I retired from the Kansas Department of Transportation. Following seminary studies, I am a licensed and ordained Baptist minister, and have served as pastor of First Baptist churches for the past five years."

### 1968

**Lawrence H. Luebbert Jr.**, ME: "I am a senior project

engineer at Loparex Inc., the largest silicone-coated release liner manufacturer in the world. My ninth grandchild arrived in August. I plan to retire this year."

### 1969

**Charles W. Foster**, CE, MS CE'70: "Retirement is so close, but seems to be staying ahead of me. Just can't make it happen."

**Thomas R. Voss**, EE, accepted the 2011 Freedom Award on behalf of Ameren Corp. on Sept. 22 in Washington, D.C. He met with U.S. Secretary of Defense Leon Panetta before the awards ceremony.

### 1970

**Gregory Bachmann**, CE, retired in Southern California after a 41-year career. He served in Vietnam with the U.S. Navy and worked for Chevron Oil, Occidental Petroleum and the Federal Aviation Administration, living throughout the world with his wife of 44 years, Diana. They enjoy boating, diving, water skiing, golf, cooking and house remodeling. "No sitting on the front porch in rocking chairs for us — the best is yet to come."

**Timothy P. Corbett**, ME, MS ME'77, retired in July after 41 years with the U.S. Department of Defense. His last assignment was to oversee management of the environmental

compliance program for Air Mobility Command.

**Danny L. Crain**, CE, has been married to Karen since 1974. They have three children, **Jamie (Crain) Sanders**, BSci'98, Tracy (Crain) Sharp, and Wade Crain, and five grandchildren, Laney and Luke Sanders, Carson and Cameron Sharp, and Jeren Crain.

**Kent Florence**, CE, retired in 2001 and has three young grandchildren: Adrienne, Lannon and Camille. He tutors first and third graders at two elementary schools.

**Steve Malcolm**, CE, was inducted into the Oklahoma Hall of Fame in November for leading

Tulsa-based Williams to an era of growth and expansion. His 26-year career with the company included serving as CEO from 2002 until he retired in 2010.

## 1971

**Richard E. Carver**, ME, retired in August after 31 years with Emerson Electric Co. and five years with Twin Rivers Regional Medical Center.

**Larry J. Schall**, CE, formed an expert witness and peer review company called Schall Engineering Consulting LLC. He specializes in civil engineering design and maintenance management for public

and private infrastructure. The company handles both plaintiff and defense cases. Check out his website at: [schallenging.com](http://schallenging.com).

## 1972

**Jim Mulligan**, GGph: "I retired in April after 38 years in the domestic oil and gas industry to pursue unrealized exploration ideas in the Gulf Coast, work on my novel, visit grown children and travel with Gini, my wife of 30 years. Update on my children: Karen is completing her PhD; John is an engineer in Singapore; Robyn works in the Charleston, S.C., mayor's office; Shannon

## HONESTY PAYS

Pictured left to right: UM System President Tim Wolfe, interim Chancellor Warren K. Wray, Michael Kuba and University Police Chief Christine Laughlin.

Metallurgical engineering graduate student **Michael Kuba**, MetE'10, was walking with a friend in a campus parking lot during finals week when he noticed a credit union envelope on the ground. Inside the envelope — \$500 cash.

Kuba turned the envelope in to his department secretary, who contacted University Police. Within 10 minutes, the woman who lost the envelope also contacted University Police and officers verified with the credit union that she was, in fact, its owner.

In January, University Police Chief **Christine Laughlin** honored Kuba with an award for his honesty. It was presented by Laughlin, interim Chancellor **Warren K. Wray**, and **Timothy M. Wolfe**, president of the University of Missouri System.

"This student did something exceptional," Laughlin says. "He reflects the caliber of students on this campus."

Kuba says he knew how he would feel if he'd lost that much money, but doesn't think turning it in is that big of a deal. "I'd like to think anyone in our department would do the same thing — we're a very close-knit group."

### Brian Fuhrmann

ME'03

Fuhrmann recently placed first in Wisconsin's Chequamegon 40 Mountain Bike Race in the tandem division. He is the maintenance manager for Alliant Energy at its Lansing, Iowa, generating station.

## TWO S&T GRADS EARN PRESIDENTIAL HONORS

In September 2011, **Andre Taylor**, ChE'95, and **Jeffrey Book**, Phys'96, were among the 94 researchers selected to receive the Presidential Early Career Awards for Scientists and Engineers. Taylor is an assistant professor of chemical and environmental engineering at Yale University and Book is a principal investigator in the Physical Oceanographic Processes Section at Stennis Space Center in Mississippi.

The awards, established by President Clinton in 1996, are coordinated by the Office of Science and Technology Policy within the Executive Office of the President. Awardees are selected for their pursuit of innovative research at the frontiers of science and technology and their commitment to community service as demonstrated through scientific leadership, public education or community outreach.

## BOEING RECOGNIZES LEADING SCIENTISTS

The Boeing Co. recently announced that two Missouri S&T graduates — **Carl Vorst**, EE'68, and **Talion Edwards**, ME'97 — have received the Boeing Special Invention Award. The award recognizes outstanding contributions to aerospace. Boeing officials said Vorst and Edwards are among the company's leading scientists.

### Greg M. Stowell ME'85, MS ME'87

Stowell had his photography on display at the West Patrons' Gallery at Shawnee Mission West High School in Overland Park, Kan. Check out his website at [frankfrdgallery.net](http://frankfrdgallery.net).

works as a molecular genetic technologist at MD Anderson Cancer Center; Susan is deciding where to complete her studies, and Jason is in his third year studying music composition.”

**Donald E. Rice**, GGph: “Brothers **David**, GeoE'74, **Ken**, GeoE'78, and I hiked the Highline Trail in Glacier National Park this summer. We saw some fine geology and some wild animals up close.”

### 1973

**Frank Sulze**, Psysc, and **Marie (Willy) Sulze**, Psysc, are the proud grandparents of Tanner, born May 9, 2011, to their daughter, **Sara Lewis**, and

her husband, Toby. Sara is a grants and contracts specialist at S&T. (Photo on page 42)

**James “Ken” Thompson**, PetE, was appointed to the board of directors of Pioneer Natural Resources Co.

### 1974

**Alan S. Kornacki**, GGph, is a geochemistry consultant for Weatherford Laboratories in Houston. He supports conventional and unconventional oil and gas projects and retired from Royal Dutch Shell in 2010.

**Michael J. “Boots” Miller**, AE, is heavily engaged in the rebuilding of the

Afghan and Iraqi air forces as executive director of the U.S. Air Force international training squadron.

**Jerry Rich**, EE: “I finished my first 24-hour run on Sept. 24. I managed to travel 61.87 miles in the allotted 24 hours. I was on the course for about 16 hours (three hours as a volunteer and five trying to get some sleep). Next? Maybe a 100-mile race ... someday.”

### 1977

**Michael J. Filla**, CE, MS CE'81, is vice president of sales and marketing at Nooter/Eriksen in St. Louis. He earned an MBA from Washington University

in May 2011. His son, **Joe Filla**, CE'06, also earned an MBA in May from Webster University.

**Stephen C. Kienstra**, CE: "Still working for a living, no grandchildren."

**Bruno Stopka**, EE, is a lieutenant colonel in the Missouri Air National Guard and is supervising engineer of the Ellisville Operating Center for Ameren Missouri. He was one of four Ameren employees who nominated their employer for the 2011 Freedom Award.

**Tom Voss**, EE'69, accepted the award on Sept. 22 in Washington, D.C.

**Greg Wessel**, MS GGph: "I'm a geologist with the county building department in Seattle, and I'm working with the state geological survey to map eastern King County. I also write comedy for a group called the 'Church of Great Rain,' and have authored (under a pen name) a book on buried treasures of Vashon Island, Wash., called *Codex Benthos*, available at Amazon.com. My wife, Margaret, is also a geologist (SEMO grad) who attended Rolla's field camp in 1979. We live on Vashon Island with two of her kids and my big dog. My own kids are grown and I'm a proud grandfather of Sophie, 7."

## 1983

**Mark A. Cook**, CE: "This year I have been working on micro-tunneling.

Interesting work. Also took vacation time diving on the wrecks in the Keys and Antigua."

**Tom Riney**, ME: see note under **Suzanne (Cooper) Riney**, 1985.

## 1985

**Eric Metzger**, EE, lives in Garmisch, Germany, with his wife, Sylvia. He is a deputy director in the George C. Marshall European Center for Security Studies. "We've been here two years and have been spending our winters skiing, hiking and traveling throughout Europe. I'm heading to Iraq to become part of the new organization in the U.S. Embassy for a while."

**Suzanne (Cooper) Riney**, CE: "Second son off to college; **Tom (Riney)**, ME'83) and I are poor lonely parents. Michael is in his third year at Auburn and David is a freshman at Alabama — War Eagle, Roll Tide. Both boys are studying engineering."

**Gregory M. Wilson**, ChE, was named director of the National Center for Photovoltaics at the U.S. Department of Energy's National Renewable Energy Laboratory, effective Nov. 28. He also holds a doctorate of science and a master's degree in chemical engineering from Washington University in St. Louis.

# FUTURE MINERS

## K – S

Owens

Riess

Sales

Scott

Sneller

**Steve Owens**, EE'96, and his wife, Adriana, had a boy, Miles Parker, on Feb. 23, 2011.

**Ryan Riess**, CE'06, and **Abigail (Pittroff) Riess**, Hist'05, had a boy, Noah Michael, on Sept. 16, 2011. Grandfather is **Robert A. Riess Sr.**, CE'79, and uncle is **Robert A. Riess Jr.**, CE'04

**Joshua Sales**, GeoE'00, and his wife, Christine, had a boy, Miles Thomas, on Nov. 23, 2011. He joins sister Chloe.

**Ann Marie (Moore) Scott**, MS EMgt'01, and her husband, Phillip, had twin boys, Brandon Christopher and Bradley Alexander, on March 10, 2011. They join brother Logan, 4.

**Joshua Sneller**, ECE'05, and **Erin (Miller) Sneller**, Math'05, had a boy, Zane Iden, on March 10, 2011.

Lewis

FUTURE  
MINERS  
S – Z

Vielhaber

Zahodnik

**Frank Sulze**, Psyc'73, and **Marie (Willy) Sulze**, Psyc'73, are the proud grandparents of Tanner, born May 9, 2011, to their daughter, **Sara Lewis**, and her husband, Toby. Sara is a grants and contracts specialist at S&T.

**Matthew Vielhaber**, ChE'02, and his wife, Julie, had a boy, Ethan, on June 20, 2011.

**Amy (Buttimer) Zahodnik**, ChE'96, and her husband, Jeff, had a girl, Teagan Louise, on Aug. 4, 2011. She joins brother Aidan. ■

## NIXON EARNS ENGINEERING AWARD

**Harvey Nixon**, MS Phys'71, was recently named Product Engineer of the Year by Meritor Inc., a leading global supplier of drivetrain, mobility, braking and aftermarket solutions for commercial and industrial vehicle markets.

Nixon earned the award in the category of "Distinguished Contributions to the Advancement of Bearing Knowledge in the Technical and Non-Technical Organizations." He joined Meritor three years ago after spending more than 38 years with Timken Co.

## 1987

**Lori (Dubin) Bush**, CSci, was elected Town Council at-large representative for Cary, N.C. She has worked for Cisco Systems for 16 years and has served her community for more than a decade on town boards and commissions.

**Jeff Harpring**, CE, was promoted to project review engineer with the Illinois Department of Transportation's Central Bureau of Construction.

**Chris Neaville**, GeoE, joined The Doe Run Co. as asset development director to support the transition of the company's Herculaneum, Mo., lead smelter site into a potential industrial park.

## 1989

**Doug Niermeyer**, CerE, is in charge of site quality assurance for MEMC Electronic Materials Inc. in St. Peters, Mo.

## 1991

**James E. DeVaney Jr.**, AE: "My wife, Halyna, and daughter, Roksolana, and I were blessed with another family member last May. Her name is Isabelle Malva and she already has her daddy wrapped around her little pinky."

## 1993

**Karen (Thenhaus) Hand**, CE, and her husband, Brian, had a boy, Silas Gage, on Sept. 15, 2010. (Photo on page 35)

## 1995

**David A. Ryckman**, GGph, works in uranium for Denison Mines USA Corp. in Denver, while living in Montana. "I hope all Miners are as fortunate as I am. I make a very good living doing what I consider fun and endlessly fascinating. There's plenty of room for others in this field. My daughter, Cambria, is now 13 and lives in Rolla. She and I spent last summer driving throughout the U.S., and spent quality time at my home with my (Canadian) wife, Cheryl. I am profoundly grateful to all the geologists who have mentored me."

## 1996

**Steve Owens**, EE, and his wife, Adriana, had a boy, Miles Parker, on Feb. 23, 2011. (Photo on page 41)

**Amy (Buttimer) Zahodnik**, ChE, and her husband, Jeff, had a girl, Teagan Louise, on Aug. 4, 2011. She joins brother Aidan. (Photo at left)

## 1998

**Jack Dorsey**, NDD, was listed eighth in CNNMoney's 2011 "40 Under 40." He is co-founder and executive chair of Twitter and co-founder and CEO of Square.

**Ryan Elder**, MetE, was promoted to senior director of solar wafer operations for MEMC Electronic Materials Inc.

**Scott Hawley**, PetE, MS CSci'00, and **Jennifer Hawley**, CSci'01, had a girl, Kahlan Elizabeth, on Oct. 1, 2011. (Photo on page 36)

**Mathew David Silver**, CE, and his wife, Marie, had twins, Grant and Rachel, in October 2010. They join brother Christopher, 6.

## 1999

**Kim Gerke**, GGph, was named director of recruiting for DeyFischer Consulting in Sedalia, Mo.

**Mike Hunter**, Math, and his wife, Sheila, had a girl, Claudia Ilene, on July 23, 2011. She joins sister Miriam Celia. (Photo on page 36)

## 2000

**Karla (Niehaus) Italiano**, EMgt, MS EMgt'02, and her husband, Pasquale,

had twin girls, Clara Jo and Gloria May, on June 1, 2011. They join sister Louisa Grace, 2. (Photo on page 36)

**Chris Kulifay**, ME, and his wife, Mandy, had a girl, Kelsey Noelle, on June 21, 2011. (Photo on page 36)

**Joshua Sales**, GeoE, and his wife, Christine, had a boy, Miles Thomas, on Nov. 23, 2011. He joins sister Chloe. (Photo on page 41)

**Jen Sigman**, EE, CerE: see note under **Tony Clark**, 2001.

## 2001

**Kerri Campbell-Duey**, BSci, Psyc, and her husband, Joe, had a girl, Madelyn Kierra, on June 14, 2011. She joins brother Gavin, 20 months. (Photo on page 35)

**Tony Clark**, ME, and **Jen Sigman**, EE'00, CerE'00, had a boy, Maximillian Anthony Clark, on Aug. 29, 2011. He joins sister Lily, 3. (Photo on page 35)

**Jennifer Hawley**, CSci: see note under **Scott Hawley**, 1998.

**Ann Marie (Moore) Scott**, MS EMgt, and her husband, Phillip, had twin boys, Brandon Christopher and Bradley Alexander, on March 10, 2011. They join brother Logan, 4. (Photo on page 41)

## 2002

**Benjamin Braatz**, AE, MS AE'05, MS SysE'08, and **Emilie (Els) Braatz**, ArchE'08, had a boy, Caleb Robert, on May 17, 2011. He joins sister Anna Louise, born March 18, 2009. (Photo on page 35)

(Continued on next page)

## REAL WORLD EXPERIENCE

S&T's own Nate Stodghill (far right) and his fellow cast members on *The Real World: San Diego* spent three months getting to know each other while living in the San Diego suburb La Jolla, Calif. (Photo courtesy MTV)

For most S&T students, getting out in the "real world" after college means getting that first job. For **Nathan Stodghill**, real-world experience has an entirely different meaning.

Last spring, the former nuclear engineering student tried out for a role on MTV's *Real World* television series. He was picked and spent the summer on the cast of *The Real World: San Diego*. The series began airing last September. Stodghill was also cast as part of the MTV *Real World/Road Rules* spin-off series *The Challenge: Battle of the Exes*, which premiered in January.

The former S&T football player from Grain Valley, Mo., created a website, *The Living Memoir*, to help raise awareness about teen suicide and "as an outlet for people to express how they feel in a time of crisis." Learn more at [thelivingmemoir.com](http://thelivingmemoir.com). You can also follow Stodghill on Twitter at @MTVNate.

### ◀ **Dutro E. "Bruce" Campbell** ChE'92

Campbell was inducted into Leadership 100, a select group of local leaders within the Young Professionals Network. He is a partner in Husch Blackwell LLP's intellectual property litigation group.

### ◀ **Philip Wilson** CE'02

Wilson joined Shafer, Kline & Warren Inc. (SKW) in the firm's Macon, Mo., office.

Lorince – Harvey

# MINER UNIONS

Puzach – Scheibel

Rothermich – Russell

**Erik Lorince**, AE'10, and **Kierstyn Harvey**, CE'09, were married on Oct. 22, 2011, at Nottoway Plantation in White Castle, La. They live in New Orleans.

**Steve Puzach**, CE'09, married **Michelle Scheibel**, ArchE'10, on Oct. 1, 2011.

**Adam Rothermich**, EE'09, and **Rebecca Russell**, ArchE'09, were married on April 24, 2010. They live in Lenexa, Kan. ■

## GRAD INSPIRES NEW POLICIES, INVITED TO WHITE HOUSE

**Trish Gregg**, CGph'00, was recently invited to the White House by First Lady Michelle Obama for the announcement of "New Workplace Flexibility Policies to Support America's Scientists and Their Families."

Gregg was the first postdoctoral fellow at the National Science Foundation to ask for a no-cost extension of her fellowship for maternity leave. This inspired her NSF program director to ask what practices were in place to help early career scientists during these "life moments." Now, these scientists have the right to request extensions for family leave.

**Jason Jeffries**, CE, MS CE'04, and **Shannon (Foil) Jeffries**, CE, MS CE'03, had a girl, Harper Rene', on Jan. 29, 2011. She joins brother Jack. Grandpa is **Jim Foil**, CE'74, MS CE'75. (Photo on page 36)

**Matthew Vielhaber**, ChE, and his wife, Julie, had a boy, Ethan, on June 20, 2011. (Photo on page 42)

### 2004

**Rachel Mudd**, CE, MS CE'06, married Chris Garrett on March 26, 2011, in Birmingham, Ala.

### 2005

**Abigail (Pittroff) Riess**, Hist: see note under **Ryan Riess**, 2006.

**Joshua Sneller**, ECE, and **Erin (Miller) Sneller**, Math, had a boy, Zane Iden, on March 10, 2011. (Photo on page 41)

### 2006

**Joe Filla**, CE, earned an MBA in May from Webster University.

**Ryan Riess**, CE, and **Abigail (Pittroff) Riess**, Hist'05, had a boy, Noah Michael, on Sept. 16, 2011. (Photo on page 41)

### 2008

**Emilie (Els) Braatz**, ArchE: see note under **Benjamin Braatz**, 2002.

**William Wiggins**, Bus, was appointed Phelps County assessor by Missouri Gov. Jay Nixon.

### 2009

**Dan Andrews**, MS SysE, and his wife, Ella, had a boy, Ere Noah, on Sept. 20, 2011. (Photo on page 35)

**Kierstyn Harvey**, CE: see note under **Erik Lorince**, 2010.

**Steve Puzach**, CE, married **Michelle Scheibel**, ArchE'10, on Oct. 1, 2011. (Photo at left)

**Adam Rothermich**, EE, and **Rebecca Russell**, ArchE'09, were married on April 24, 2010. They live in Lenexa, Kan. (Photo at left)

### 2010

**Erik Lorince**, AE, and **Kierstyn Harvey**, CE'09, were married on Oct. 22, 2011, at Nottoway Plantation in White Castle, La. They live in New Orleans. (Photo at left)

**Michelle Scheibel**, ArchE: see note under **Steve Puzach**, 2009.

### 2011

**Adam Miller**, ME, joined The Doe Run Co.'s Buick Resource Recycling Division in Boss, Mo., as an environmental engineer. ■

## MINERS REMEMBERED

Missouri S&T Magazine will announce deaths when information is submitted by an immediate family member or published in a newspaper obituary. Notification of deaths that have occurred more than two years before the date of publication will not be published unless a special request is made by a family member. Yearbook photos, if available, will be included for alumni when families submit obituary information.

Obituary information on alumni spouses will be printed only if the alumnus/alumna specifically requests that we print it.

### Harold A. "Stubby" Krueger ▶

MinE'42

Mr. Krueger was a member of Pi Kappa Alpha fraternity and was inducted into the Miner Sports Hall of Fame for football. He signed a contract to play baseball for the St. Louis Browns. He retired as vice president for underground mining from Kennecott Corp. in 1985 and enjoyed golf, hunting and deep sea fishing.  
(Aug. 26, 2011)

### John W. Nevin ▶

MetE'42

Mr. Nevin was on the basketball and golf teams. He retired from Bethlehem Steel in 1991. (Oct. 8, 2011)

### Charles Lenzini ▶

MetE'48

Mr. Lenzini retired from Missouri Pacific Railroad.  
(Jan. 9, 2009)

### W. Decker "Deck" Humphrey ▶

MinE'50

Mr. Humphrey served 23 years in the U.S. Marine Corps and received two silver stars for service in the Pacific during World War II. He worked for the P&M Coal Mining Co., Bucyrus Erie, Utah Development and Peabody Coal, before returning to and retiring from P&M as vice president of engineering in 1992. (June 7, 2011)

◀ **George P. Bollwerk Jr.**  
MetE'51

Mr. Bollwerk was a member of Tau Kappa Epsilon fraternity and Army ROTC. He served in the U.S. Army in Germany during the Korean War and retired from Big River Zink Corp. in 1992. (Oct. 7, 2011)

◀ **William J. Barlow**  
EE'57

Mr. Barlow was a member of Theta Xi fraternity, Blue Key, Wesley and Army ROTC. He earned his doctorate in mathematics from the University of Illinois at Urbana - Champaign, and taught at Purdue University - Calumet campus, for 17 years, retiring in 1987 due to health problems. During retirement, he pursued his love of computers, both hardware and software. (July 1, 2011)

◀ **Robert G. Bakula Jr.**  
ME'66

Mr. Bakula was a member of Sigma Phi Epsilon fraternity. He served in the Vietnam War and earned his MBA from St. Ambrose University. He retired from John Deere and enjoyed numerous hobbies, including building ship models, flying and blacksmithing. (July 31, 2011)

◀ **Ronald Greeley**  
PhD GGph'66

Mr. Greeley served on the S&T Geology and Geophysics Advisory Board and taught at Arizona State University. He was a pioneer in the field of planetary geology, serving as director of the NASA-ASU Regional Planetary Image Facility, and was involved in nearly all major space probe missions flown since the Apollo Moon landing. (Oct. 27, 2011)

◀ **Perry B. McCormack**  
ME'69

Mr. McCormack was a member of Pi Kappa Alpha fraternity and served in the U.S. Air Force. He worked for General Motors Co., McDonnell Douglas and The Boeing Co. in St. Louis. He and his wife moved to Lake Ozark, Mo., when he retired in 2004, where he enjoyed fishing, scuba diving, golf and hunting. (Oct. 8, 2011)

## Lori Marie Gray Engl'06

Ms. Gray passed away Sept. 29, 2011, in Columbia, Mo. She was 31. She was active in Relay for Life, was a proud member of Alcoholics Anonymous, and helped those who experienced domestic violence. Memorials are suggested to Relay for Life.

## Matthew J. Powderly

Mr. Powderly passed away suddenly on Dec. 12, 2011. A graduate of the Saint Louis Priory School, he was a sophomore in undergraduate studies at Missouri S&T. Donations may be made to the Saint Louis Priory School.

## FRIENDS

**Betty R. Anderson**, wife of the late James M. Anderson (Oct. 15, 2011)

**Donald P. Bennett** (Sept. 7, 2011)

**Mark A. Boyer** (Sept. 23, 2010)

**Virginia M. Buckner**, wife of H. Warren Buckner, ME'42 (July 31, 2011)

**Shirley M. Carr**, wife of Robert J. Carr, ME'57. She was the St. Pat's Queen of Love and Beauty in 1955. (April 11, 2011)

**Linda J. Clift**, wife of Don L. Clift (Aug. 2, 2011)

**Judith E. "Judi" Crutcher**, wife of Thomas D. Crutcher, GGph'54 (July 3, 2011)

**Sally Trayer DeGan**, wife of the late James J. DeGan, EE'52 (Aug. 9, 2011)

**Esther Frye**, wife of the late Laurel B. Frye, ME'40 (July 11, 2011)

**June (Stewart) Harper** (Aug. 6, 2011)

**William D. "Jim" Hunter**, father of Mary Helen (Hunter) Stoltz, Engl'95 (Sept. 14, 2011)

**Lillian P. Jackson** (Aug. 15, 2011)

**Dorothy Kasten**, wife of the late Raymond O. Kasten, CE'43 (March 19, 2011)

**Betty Jane Kinyon**, wife of Peter C. Kinyon (Aug. 1, 2011)

**Edith (Helstrom) Lutzen** (Oct. 15, 2011)

**John Maben** (Aug. 30, 2011)

**Artiss V. Martin** (July 28, 2011)

**Isabel L. McCormack**, wife of the late George E. McCormack, MinE'48 (Aug. 14, 2011)

**Harriett Ann Melton** (Feb. 7, 2011)

**Pauline Musselman** (Dec. 30, 2010)

**Harold L. O'Haver** (Aug. 11, 2011)

**Thomas Pasley** (Oct. 4, 2011)

**Dolores M. Pulford**, wife of the late William M. Pulford, EE'52 (May 3, 2011)

**Willie Reavis** (Oct. 20, 2011)

**George Schacher**, husband of Suzanne (Hook) Schacher (Oct. 6, 2011)

**David S. Severson** (July 21, 2011)

**Edith E. Skitek**, wife of the late Gabriel "Gabe" Skitek, professor emeritus of electrical engineering (Aug. 12, 2011)

**John E. Smith** (Sept. 3, 2011)

**Helen G. Soderberg** (Feb. 1, 2011)

**Virginia B. Sphar**, wife of the late Curtis W. Sphar, MinE'48 (Aug. 19, 2011)

**Stephen Taylor**, husband of Therese C. Taylor (Sept. 3, 2011)

**Jeanette R. Unsell**, wife of the late Vester B. Unsell, CE'50 (Feb. 16, 2011)

**Dorothy Warren** (Aug. 8, 2011)

**Donald B. Wyatt** (Sept. 11, 2011)

# SOLID CONNECTIONS

Nathan (left) and Aaron Rues. (Photo by S.B. Atkins Photography)

**Why support S&T?:** “I got a lot out of being on the Solar Car Team, including two trips to Australia, so I want to repay some of it,” says **Nathan Rues**, ME’02. His brother, **Aaron Rues**, EE’01, agrees. “I can’t tell you how many weekends I spent at the design center working on the solar car. I give back to stay connected to S&T.”

**Growing the team:** The first to join the team in 1997, Nathan recruited Aaron and many of his own Phi Kappa Theta fraternity brothers in 1998. Both remained on the team until graduation.

**Is this corner taken?:** “It was more difficult back then for design teams, there was no space for us,” says Nathan. “I remember pushing the 1995 and 1997 vehicles from the old bread company (now the Kummer Student Design Center) to a corner of a room in the Bureau of Mines Building to claim the space. Before this, we had a mish-mash of stuff all over campus.” By the time Aaron joined the team, they had moved to the metal garage that was home until the new facility opened in 2011.

**Life lessons:** “We dealt a lot with worn out components on the road and spent a lot of time inspecting the vehicle,” says Aaron, now an engineer with Allison Transmission Inc. in Indianapolis. “I learned the importance of making things durable. Now I make reliable products, not throwaway components.”

“It’s not always the best design that wins — but the design that is known best,” says Nathan, now a hybrid/electric powertrain engineer with General Motors, also in Indianapolis. “Through testing, we knew exactly what our cars could do on the race ... and did it.”

**Why students should join design teams:** “Engineering studies only take you so far; everyone else is taking the same courses,” says Aaron. “On a design team, you learn to apply knowledge to real-world problems.”

“The competitions offer real-world restraints with high pressure — you learn to think fast. Many problems are too big for you to fix on your own, so you learn to work with others,” says Nathan. “These conditions are hard to simulate outside of a competition.” ■

INTRODUCING  
**CHERYL B. SCHRADER**  
MISSOURI S&T'S NEXT CHANCELLOR

Following a national search, Cheryl B. Schrader becomes Missouri S&T's chancellor on April 2. Introduced to the campus in January, Schrader is one of few female engineers to ascend to a top leadership position of a U.S. college or university. Previously, Schrader held positions with Boise State University as associate vice president for strategic research initiatives and dean of the university's College of Engineering.

Learn more about Schrader in upcoming issues of the magazine.
