### ACKNOWLEDGEMENTS

Preparation of this report was overseen by an advisory committee consisting of six members of MCBC's Mortgage Lending Committee – Tom Callahan of the Massachusetts Affordable Housing Alliance, Kelly Maloy of the Massachusetts Housing Partnership, Julia Reade of the Federal Reserve Bank of Boston, Esther Schlorholtz of Boston Private Bank & Trust Company, Kathy Schreck of the Massachusetts Mortgage Bankers Association, and Janna Tetreault of the Citizen Housing and Planning Association – plus MCBC manager Kathleen Tullberg. Kelly Maloy also provided, in electronic form, the information from the Massachusetts Housing Partnership's SoftSecond Loan Program database that made this report possible. Eileen Callahan of Eileen Callahan Design prepared the cover and title pages as well as the PDF file for the on-line version of the report. In spite of helpful comments and suggestions received, the ideas and conclusions in this report are the responsibility of the author, and should not be attributed to any of the officers or board members of either the Gastón Institute or the MCBC.

MCBC is grateful for the assistance of Bank of America, Eastern Bank, Sovereign Bank and Wainwright Bank for their help in distributing this report. MCBC depends on the financial support of its bank members to produce reports like *Expanding Homeownership Opportunities*. MCBC thanks the following banks for their 2007 membership:

Avon Co-operative Bank Bank of America Bank of Canton Benjamin Franklin Bank Boston Private Bank & Trust Company Braintree Cooperative Bank Cape Ann Savings Bank Central Bank Chelsea-Provident Co-Operative Bank Citibank, N.A. Citizens Bank of Massachusetts Dedham Institution for Savings Eagle Bank East Cambridge Savings Bank Eastern Bank Everett Co-Operative Bank Fiduciary Trust Company Hudson Savings Bank Hyde Park Co-operative Bank Hyde Park Savings Bank Mt. Washington Bank North Cambridge Co-operative Bank Reading Co-operative Bank Reading Co-operative Bank Sovereign Bank State Street Corporation StonehamBank – A Co-operative Bank TD Banknorth The Bank of New York Mellon Corporation Wainwright Bank

### **EXECUTIVE SUMMARY**

The SoftSecond<sup>™</sup> Loan Program was developed in 1991 by the Massachusetts Bankers Association, the Massachusetts Housing Partnership, and the Massachusetts Affordable Housing Alliance to address community concerns over low levels of mortgage lending to traditionally underserved borrowers and neighborhoods. Launched in Boston, the program was expanded statewide in 1992 and is now available in every city and town in the Commonwealth through numerous participating lenders. The program is funded by the state legislature and administered by the Department of Housing and Community Development and the Massachusetts Housing Partnership.

The SoftSecond program was designed to reduce the substantial down payments and large monthly mortgage bills that often present insurmountable obstacles to lower-income homebuyers. The program requires only a three percent down payment and provides qualified homebuyers with two 30-year fixed-rate mortgage loans: the first for 77 percent of the price of the home, and the "soft second" mortgage for the remaining 20 percent. The second mortgage is interest-only for the first ten years and, in many cases, monthly bills are further reduced by public subsidies of these interest payments. SoftSecond loans have no points, no mortgage insurance fees and, in most cases, below-market interest rates.

This report updates the information presented in *Expanding Homeownership Opportunity: The SoftSecond Loan Program, 1991-1993,* released by the Massachusetts Community & Banking Council in 2004. Based on analysis of SoftSecond loan activity and performance statewide, the report finds:

- By the end of 2006, the SoftSecond Loan Program had, through its participating lenders, provided mortgage loans to 9,622 income-qualified borrowers (the 10,000 loan milestone was reached in mid-2007). During the 2004-2006 period that is the main focus of this report, 2,596 households received SoftSecond loans.
- The statewide SoftSecond delinquency rate (2.2% at year-end 2006) has consistently been well below the delinquency rate for all mortgage loans in Massachusetts (4.5% at year-end 2006).
- SoftSecond loans have facilitated home purchases for families in almost two-thirds of the cities and towns in Massachusetts (226 out of 351). In recent years, the city of Boston has received about one-third of total loans, while the rest have been distributed throughout the state.
- Twenty-seven currently operating lenders (twenty-six banks and one credit union) made at least one SoftSecond loan during the 2004-2006 period, although a handful of large banks account for the great majority of loans.
- The median household income of SoftSecond borrowers between 2004 and 2006 was \$45,000. During that period, almost two-thirds (65.0%) of all SoftSecond loans went to borrowers whose household incomes were \$50,000 or less; nearly one out of ten loans (9.7%) went to borrowers with incomes of \$30,000 or less.
- Statewide between 2004 and 2006, 25.6% of SoftSecond loans went to Latinos (who account for just 5.0% of the state's households); 16.8% of loans went to blacks (who account for 4.7% of total households); and 7.3% of loans went to Asians (who account for 3.1% of total households).
- Statewide between 2004 and 2006, an average \$6,210 in public funds leveraged nearly \$210,000 in private mortgage financing per household. Since the program's inception in 1991, \$51 million in public funds have been spent, leveraging over \$1.4 billion in private mortgage financing.

### **INTRODUCTION**

This report provides data on lending by the SoftSecond Loan Program during the most recent three-year period (2004-2006) as well as over the sixteen-year life of the program. The Mortgage Lending Committee of the Massachusetts Community & Banking Council (MCBC) has had a special interest in the SoftSecond program since its inception and has carefully monitored the performance of its loans. The report updates an earlier report prepared for MCBC by the present author in 2004: *Expanding Homeownership Opportunity: The SoftSecond Loan Program, 1991-2003.* Detailed information about the origins and evolution of the program, and about the details of its structure and operation, are available in that report and elsewhere and are therefore not repeated here.<sup>1</sup>

The SoftSecond Loan Program gets its name from the fact that participating homebuyers receive two mortgages rather than one: a first mortgage for 77% of the purchase price and a second mortgage for 20%; the program requires at least a 3% down payment, at least half of which must come from the borrower's own funds. Both mortgages are 30-year fixed-rate loans. In the great majority of cases (including all loans in Boston and all loans by the biggest banks), the interest rate on both mortgages is one-half of a percentage point below the bank's two-point rate, although no points are charged.<sup>2</sup> The second mortgage is "soft" (for the first ten years) in two ways – payments are interest-only (there is no repayment of principal during this period) and payments may be further reduced, for qualifying low- and moderate-income homebuyers, by public subsidies. The state also funds loan loss reserves for each bank equal to three percent of the total value of the second mortgages that the bank has originated. The existence of the reserve fund makes it possible for borrowers to avoid the costs of private mortgage insurance while banks are still protected from credit losses. Affordability is further increased, in Boston and some other communities, by the provision of down payment and other financial assistance from local governments.

The SoftSecond Loan Program's features combine to have a remarkable impact on affordability. For example, the monthly mortgage payment on a \$200,000 home purchased in early September 2007 with a traditional loan from Sovereign Bank would have been \$1,267. The monthly mortgage payment on the same home purchased with a SoftSecond loan from Sovereign would have been \$1,064 for the first ten years for a borrower receiving no interest rate subsidy. The monthly payment would have been only \$885 for the first five years for a borrower receiving the maximum interest rate subsidy (this subsidy would be phased out between the fifth and tenth years). In any case, the monthly payment would rise to \$1,112 in the eleventh and all subsequent years.<sup>3</sup>

<sup>&</sup>lt;sup>1</sup> Expanding Homeownership Opportunity is available in the "Reports" section of MCBC's website: <u>www.masscommunityandbanking.org</u>. See also: James T. Campen and Thomas M. Callahan, "Boston's Soft Second Program: Reaching Low Income and Minority Homebuyers in a Changing Financial Services Environment," a paper presented at the Federal Reserve System's Second Community Affairs Research Conference in Washington D.C., in April 2001 (<u>www.mahahome.org</u> or <u>www.chicagofed.org/cedric/files/cfmacd campen.pdf</u>). A great deal of information about the SoftSecond program is available on the website of the Massachusetts Housing Partnership (MHP), particularly in the "Homebuyer" and "Lender" portions of the "Homeownership" section (<u>www.mhp.net</u>).

 $<sup>^2</sup>$  A "point" is one percent of the amount of the mortgage loan. Mortgage borrowers generally have the option of reducing their interest rate by paying one or more points when the loan is originated. It is common for payment of two points to reduce the interest rate by one-half of a percentage point. In this case, the interest rate on a SoftSecond loan would be a full percentage point below the bank's zero-point interest rate.

<sup>&</sup>lt;sup>3</sup> This example assumes a five percent down payment for the SoftSecond loan, to correspond to the minimum down payment required for a traditional loan from Sovereign. On September 7, 2007, Sovereign's zero-point interest rate for 30-year fixed-rate loan was 6.375%; its two-point interest rate was 5.875%, and its SoftSecond interest rate was 5.375%. Of the \$203 difference in monthly payment (\$1,267 - \$1,064), \$121 is, essentially, a contribution by the bank to the borrower. (Note that the recipient of a traditional loan would have to pay four points [\$8,000] to receive the interest rate charged to SoftSecond borrowers.) The remaining \$82 in the borrower's monthly savings comes from avoiding the cost of the private mortgage insurance required on a traditional loan. (Information on interest rates and the cost of private mortgage insurance was obtained from Sovereign at its website and by phone.)

To be eligible for the SoftSecond Loan Program, a potential borrower must be a first-time homebuyer, must use the house as his or her primary residence for the life of the loan, must have a household income no greater than the area median income (which depends on family size and the community in which the home is located), and must complete a certified homebuyer education course. The SoftSecond Loan Program has important features designed to make homeownership not only affordable, but also sustainable – that is, to ensure that home*buyers* will be able to remain home*owners*; these include comprehensive post-purchase homeowner education and counseling services. All SoftSecond loan servicers are required to notify the Massachusetts Housing Partnership (MHP) of borrowers whose loan payments become more than 30 days overdue; the MHP then informs a counseling agency in the borrower's area so that it can contact the borrower to offer assistance and provide one-on-one counseling. (The MHP is a quasi-public agency that developed the SoftSecond loan structure and that administers the program in conjunction with the state's Department of Housing and Community Development.)

The body of this report provides information on many dimensions of the SoftSecond Loan Program, with particular focus on the most recent three-year period. These include:

- the total number of loans per year;
- the geographical distribution of loans among eleven regions across the state, among 226 individual communities, and among the major neighborhoods of Boston;
- the lenders participating in the program and the number of loans by each;
- the income levels and race/ethnicity of SoftSecond borrowers;
- the types of properties (condominiums and one-, two-, and three-family homes) purchased;
- the performance of SoftSecond loans as measured by delinquency rates and foreclosures; and
- the costs to the state budget of supporting the Soft Second Loan Program, and the extent to which these costs have leveraged private mortgage funds.<sup>4</sup>

In most cases, data is provided not only for the state as a whole, but also for the eleven program regions defined by the MHP. A map in the "Homeownership" section of the MHP website (<u>www.mhp.net</u>) provides pull-down lists of the communities in each of these regions. These eleven regions are actually called "micro-regions" by the MHP, which groups them into five "macro-regions"; in several of this report's tables, lines indicate the grouping of the eleven micro-regions into the five macro-regions. (The MHP's "Cape Cod and the Islands" region is referred to in this report as the "Cape Cod" region, since none of the communities on Martha's Vineyard or Nantucket had received any SoftSecond loans by the end of 2006.)

<sup>&</sup>lt;sup>4</sup> This report's tables are based on data supplied to the author by the MHP. Most tables report the results of analysis of a database that includes a subset of the fields contained in the MHP's SoftSecond Loan Program database; limited editing by the author corrected some inconsistencies in the data that were supplied. Careful readers may note that the data reported here for the 1991-2003 period sometimes differs slightly from that reported in the original *Expanding Household Opportunities* report of 2004. This reflects changes in the MHP SoftSecond database for those earlier years. Tables 9-11 are based primarily on the December 31, 2006 edition of the quarterly SoftSecond delinquency and foreclosure report prepared by the MHP for the Mortgage Lending Committee of the Massachusetts Community & Banking Council.

### DIMENSIONS OF THE SOFTSECOND LOAN PROGRAM

### • Number of SoftSecond Loans, By Year and by Region (Table 1)

SoftSecond loan volume was substantially greater in the 2004-2006 period than in earlier years. The 2,596 loans during these three years account for over one-quarter (27.0%) of the 9,622 loans during the sixteen-year history of the SoftSecond program. During the 2004–2006 period, one-third (33/0%) of all SoftSecond loans went to the city of Boston while the rest were distributed throughout the commonwealth. Only two other regions received double-digit loan shares: Western (15.5%) and Metro North (13.3%).<sup>5</sup>

Table 1 SoftSecond Loans By Region, 1991-2006\*

\* Annual data for 1991-1996 are omitted for reasons of space. Total loans for these six years were: 35, 107, 212, 389, 482 & 788.

<sup>&</sup>lt;sup>5</sup> In 2005, the most recent year for which data on total lending are available, SoftSecond loans statewide accounted for 0.9% of all home-purchase loans and the number of SoftSecond loans was equal to 3.8% of the total number of home-purchase loans to low- and moderate-income borrowers. In the city of Boston in the same year, SoftSecond loans accounted for 3.6% of all home-purchase loans and the number of SoftSecond loans was equal to 19.6% of the total number of home-purchase loans to low- and moderate-income borrowers. These percentages are based on data on total first-lien loans for owner-occupied homes in 2005 as reported in the present author's *Changing Patterns XIII: Mortgage Lending to Traditionally Underserved Borrowers and Neighborhoods in Boston, Greater Boston, and Massachusetts, 1990-2005* (Tables 1, 2, 25 & 28; available online at www.masscommunityandbanking.org).

### • SoftSecond Loans in Individual Cities and Towns (Table 2 & Appendix Table 1)

Seven communities received at least fifty SoftSecond loans during the 2004-2006 period: Boston (857 loans), Worcester (141), Springfield (109), Lynn (106), Cambridge (95), Holyoke (66), and Chelsea (54); these seven communities accounted for over half of total SoftSecond loans in the state. Altogether, 226 cities and towns, almost two-thirds of the 351 municipalities in Massachusetts, have received at least one SoftSecond loan during the life of the program, with 176 of these receiving at least one loan during the 2004-2006 period. Table 2 presents data on the 25 communities with the most loans from 2004-2006; Appendix Table 1 provides information on lending in each of the 226 communities that have received at least one SoftSecond loan.

	Total						Total
	Since	1991-	2001-				2004-

 Table 2

 The 25 Cities and Towns with the Most SoftSecond Loans in the Last Three Years

Note: Appendix Table A-1 has data on all 226 cities and towns that have received at least one SoftSecond loan.

During the 2004-2006 period, SoftSecond loans were made in all fifteen of Boston's major neighborhoods as defined by the Boston Redevelopment Authority. The number of loans in individual neighborhoods ranged from 275 loans in Dorchester (32.1% of the city's total) to just 3 loans in Charlestown. East Boston (133 loans) and Roxbury (92 loans) also received double-digit shares of Boston's total loans.

Neighborhood	Loans	% of Total
Allston/Brighton	38	4.4%
Back Bay/Beacon Hill	11	1.3%
Central	41	4.8%
Charlestown	3	0.4%
Dorchester	275	32.1%
East Boston	133	15.5%
Fenway/Kenmore	б	0.7%
Hyde Park	24	2.8%
Jamaica Plain	68	7.9%
Mattapan	45	5.3%
Roslindale	42	4.9%
Roxbury	92	10.7%
South Boston	51	6.0%
South End	13	1.5%
West Roxbury	15	1.8%
Total Boston	857	100.0%

# Table 3 SoftSecond Loans in Boston Neighborhoods\* 2004-2006

\* Neighborhoods are the city's 15 Planning Districts as defined by the Boston Redevelopment Authority.

### • SoftSecond Lenders (Table 4 and Appendix Table 2)

Thirty lenders made at least one SoftSecond loan during the 2004-2006 period, although a few large banks accounted for the great majority of loans. The three biggest lenders – Sovereign, Citizens, and Boston Private – accounted for over half (51.8%) of all loans statewide.<sup>6</sup> The top seven lenders, each with 165 or more loans, accounted for 88.3% of total loans; no other lender had more than 66 loans. For the thirty lenders that made at least one loan during the last three years, Table 4 provides data on lending since the inception of the SoftSecond program as well as during the 2004-2006 period. Appendix Table 2 provides data on the 57 lenders in the MHP database who have made at least one loan since 1991.

<sup>&</sup>lt;sup>6</sup> If the loans made by Fleet were attributed to Bank of America (which absorbed Fleet in mid-2005), Bank of America would have been the largest single lender during the three-year period, with a total of 576 loans. In the MHP SoftSecond database, and in this report, the loans made by a bank which was later merged into another bank are shown as having been made by the bank that actually made the loan, rather than by the acquiring/surviving bank. (The MHP database adopted this practice in 1999; before that date such loans were attributed to the surviving bank.)

Table 4
SoftSecond Loans by Lender and Year, 2004-2006
(All 30 lenders with at least one loan during this period)

\* indicates banks that no longer exist as a result of bank mergers. Fleet was merged into Bank of America in 2005, Compass was merged into Sovereign in 2004, and Boston Federal was merged into TD Banknorth in 2005.

Note: Appendix Table 2 provides data on all lenders for the entire 1991-2006 period.

### • The Biggest SoftSecond Lenders in Each Region (Table 5)

The state's five biggest retail banks have all been active in SoftSecond lending across the state, with Bank of America, Citizens, Sovereign, and Eastern each making loans in all eleven regions during the 2004-2006 period and TD Banknorth lending in ten of the eleven regions. Sovereign ranked first in four regions and second in five others, while Citizens ranked first in two regions and second in three others. TD Banknorth's lending was very geographically focused, with 165 of its 206 loans in the Western region. Boston Private, which ranks tenth in retail bank deposits, was the largest single lender in the city of Boston as well in the Metro South and Metro West regions.

	-											
		Boston	Metro	Metro	Metro	North	Merr.	South	South-	Cape

 Table 5

 SoftSecond Loans by Biggest Lenders\* in Program, by Region, 2004-2006

\* Includes all lenders that were among the top 3 lenders in any region.

Only two lenders with more than 20 loans are not in this table: Mt. Washington SB (21 loans) and Wainwright Bank (66 loans). Note: The biggest lender in each region is indicated by numbers in **boldface**; the second biggest lender by numbers in *italics*.

### • Income Levels of SoftSecond Borrowers (Table 6)

The median household income of SoftSecond borrowers during the 2004-2006 period was exactly 45,000. Almost one-tenth (9.6%) of loans went to borrowers with incomes of 30,000 or less; over one-third (34.7%) went to borrowers with incomes of 40,000 or less; almost two-thirds (65.0%) went to borrowers with incomes of 50,000 or less; and only 2.8% of all loans went to borrowers with incomes greater than 75,000.

<sup>&</sup>lt;sup>7</sup> To be eligible to receive a SoftSecond loan, a prospective borrower's income must be below the maximum income level specified by the MHP for the community in which the home is located. This income limit depends on area median income in the HUD-defined income-limit area containing the community and on the number of people in the borrower's household (the base income limit is for a household of four persons; for each person greater than four, the income limit is eight percent greater while for each person less than four, the income limit is ten percent smaller). Beginning in November 2006, the income limit in all communities is 100% of the area median income; before that date, this was the limit only in designated high-housing cost communities; in all other communities, the limit was 80% of the area median income. In 2006, the income limits for four-person households ranged from \$57,350 to \$84,100. The latter limit applied in five of the 25 communities that received the most SoftSecond loans in the 2004-2006 period: Boston, Cambridge, Malden, Somerville, and Brookline. Income limits for all communities, which are reset in the spring of each year, are listed in tables prepared annually by the MHP.

Household Income	Loans	% of Total
\$30,000 or less	249	9.6%
\$30,001 - \$40,000	651	25.1%
\$40,001 - \$50,000	787	30.3%
\$50,001 - \$60,000	542	20.9%
\$60,001 - \$75,000	295	11.4%
more than \$75,000	72	2.8%
All Income Levels	2,596	100.0%

# Table 6SoftSecond Loans to BorrowersAt Various Income Levels, 2004-2006

Note: Median borrower income was \$45,000.

### • Race/Ethnicity of SoftSecond Borrowers (Table 7)

Statewide, during the 2004-2006 period, the shares of total SoftSecond loans that were received by black, Latino, and Asian borrowers exceeded these groups' shares of total households in the state.<sup>8</sup> Latinos, who accounted for 5.0% of the state's households, received 25.6% of the SoftSecond loans; Blacks, who accounted for 4.7% of the state's households, received 16.8% of the SoftSecond loans; and Asians, who accounted for 3.1% of households, received 7.3% of the SoftSecond loans. White borrowers received almost one-half (48.1%) of total loans, although this loan share was substantially lower than their 86.0% share of total households.

The loan shares of these four racial/ethnic groups varied considerably among the eleven regions. The black loan share was highest (at 33.2%) in the city of Boston, the Latino loan share was highest (at 38.5%) in the Central region; the Asian loan share was highest (at 13.7%) in the Metro West region; and the white loan share was highest (at 91.8%) in the Cape Cod region.

<sup>&</sup>lt;sup>8</sup> In this report, the terms "Asian," "black," and "white," are used as shorthand for "non-Latino Asian," "non-Latino black," and "non-Latino white." Loan shares here are defined as shares of only those loans for which data on borrower race/ethnicity were available.

		Nun	nber of Lo	ans		Per

 Table 7

 SoftSecond Loans by Race/Ethnicity of Borrower, 2004-2006

\* Total excludes the 236 loans (9.1% of all loans) for which information on race/ethnicity was not reported.

Total includes 53 loans (2.2% all loans with race/ethnicity information) to borrowers in catergories not shown in the table:

"American Indian or Alaskan Native," "Native Hawaiian or Pacific Islander," or "Other."

# Percent of households is from the 2000 Census.

### • Types of Properties Purchased with SoftSecond Loans (Table 8)

Statewide, during the 2004-2006 period, almost half (48.6%) of SoftSecond borrowers purchased condominiums, another 26.3% purchased single-family homes, and the remaining 25.2% purchased twoor three-family homes. These percentages varied widely among regions, with the share of single-family homes ranging from 64.7% on Cape Cod to 7.3% in the Metro North region; the share of condominiums ranging from 86.0% in the Metro West region to 18.2% in the Western region; and the share of two- and three-family houses ranging from 41.7% in the Central region to 0.0% in the South Shore and Cape Cod regions. The percentages of different types of properties have changed dramatically in recent years; for example, the statewide share of condominiums was only 20.1% during in the first 13 years of the program. (This percentage is not shown directly in Table 8, but is calculated from data in that table.)

\* Total in Panel B includes two loans for which property type was not reported.

### • SoftSecond Loan Repayments and Foreclosures (Table 9)

Of the nearly ten thousand SoftSecond loans made during the sixteen year history of the program, almost two-thirds (65.0%) were still active at the end of 2006. Almost all of the other borrowers (34.6% of the total) repaid their loans early. There are three major reasons for repaying a mortgage loan early: refinancing with a different mortgage loan (or loans); selling the home for a reason unrelated to the mortgage loan (e.g., moving for family or job-related reasons); or selling the home because of inability to continue making payments on the mortgage loan (which can only be done when the value of the home is greater than the value of the amount owed on the mortgage).

The MHP database does not contain information on why early repayments were made, but an examination of the annual repayment data in Table 9 strongly suggests that most early repayments were in connection with refinancing in order to take advantage of the historically low mortgage interest rates in the early years of the current decade.<sup>9</sup> The 1,417 loans repaid in 2003 – the initial year of the three-year period with the lowest interest rates – were equal to more than one-quarter (27.6%) of the loans active at

<sup>&</sup>lt;sup>9</sup> For example, the annual mortgage interest rate data available from the Federal Reserve indicates that interest rates were more than two full percentage points lower in 2003-2005 (5.82%, 5.84% & 5.86%) than they were in 1994-1996 (8.35%, 7.95% & 7.80%). [www.federalreserve.gov/releases/h15/data/Annual/H15 MORTG NA.txt]. While these low interest rates meant that SoftSecond borrowers could clearly benefit from refinancing with a responsible lender, it should be noted that the years of peak refinancing activity were years with a large amount of predatory lending by irresponsible lenders; it is therefore likely that some SoftSecond borrowers were made worse off as a result of refinancing their loans.

the beginning of the year. In contrast, the 299 loans repaid during the relatively high-interest rate years of 1991-2000 were equal to only 5.9% of the loans made during those ten years.

Foreclosures on SoftSecond borrowers have been very rare. Just 35 borrowers – less than onehalf of one percent of the total – have lost their homes to foreclosure during the sixteen-year history of the program.

\* The foreclosure rate is the number of loans foreclosed during the year as a percentage of the number of active loans at the end of the year. This rate is not directly comparable to other reported foreclosure rates. For example, the Mortgage Bankers Association reports two foreclosure rates: the number of loans in the foreclosure process as a percentage of outstanding loans (1.19% for the fourth quarter of 2006) and the number of loans entering the foreclosure process during the quarter (0.54% for the fourth quarter of 2006). Many more loans enter the foreclosure process than end up as foreclosures; but a year is four times longer than a quarter. The MBA press release for fourth quarter 2006 delinquency and foreclosure rates is at: www.mbaa.org/NewsandMedia/PressCenter/50974.htm ).

### • **Delinquency Rates on SoftSecond Loans** (Tables 10 and 11)

The MHP carefully tracks the delinquency status of outstanding SoftSecond loans and reports the results to MCBC's Mortgage Lending Committee on a quarterly basis. Tables 10 and 11 present summary information on delinquency rates during the 2004-2006 period from MHP's delinquency report for December 31, 2006. As of that date, 2.2% of the outstanding SoftSecond loans statewide were delinquent for thirty days or longer, less than one-half of the 4.5% delinquency rate for all mortgage loans

in Massachusetts, as estimated by the Mortgage Bankers Association of America (MBAA); the MBAA delinquency rate for conventional loans only was 2.8% on that date.

SoftSecond delinquency rates vary among the five MHP-defined "macro-regions" (each consisting of one, two, or three of the eleven [micro-]regions used in the previous tables). The rates have been consistently lowest in the Boston Metro region (which excludes the city of Boston itself) and highest in the Central/Western region. Table 11 provides information on statewide SoftSecond delinquency rates for different types of property, showing that delinquencies tend to be highest for single-family houses and lowest for condominiums and three-family houses.

### • Funding the SoftSecond Loan Program: State Costs and Private Mortgages (Table 12)

The SoftSecond Loan Program involves two types of direct state funding. For every loan, the state contributes an amount equal to three percent of the second mortgage to a loan loss reserve fund that protects the lender from possible credit losses in the event that the loan is not fully repaid by the borrower. In addition, the state subsidizes second-mortgage interest payments for the first nine years for low- and moderate-income borrowers (those with incomes no greater than 80% of the area median income) if their monthly payments for principal, interest, insurance, condo fees, and property taxes would otherwise exceed 28% of their monthly household income (25% in the case of three-family properties). During the 2004-2006 period, public funds were used to provide such interest subsidies to 48.3% of SoftSecond borrowers.

During the 2004-2006 period, the average amount of mortgage loans per SoftSecond borrower (first and second mortgages combined) was \$209,618 and the average state costs were \$6,210. For all SoftSecond borrowers combined, state costs of \$16.1 million leveraged \$544.2 million in private mortgage lending. Table 12 provides information on state costs and private mortgage amounts during this period in each region as well as statewide. Calculations not reported in that table indicate that over the entire lifetime of the SoftSecond Loan Program, \$51 million in state funds have leveraged \$1.4 billion in private mortgage financing.

Note: Loans of banks that disappeared through mergers before 1999 are shown as loans by the acquiring banks. Loans by the 18 banks that disappeared through mergers after that date are shown as loans by the originating bank. Among the banks not shown above is Shawmut, which was the largest single lender in the early years of the program.

^: merged into Fleet; #: merged into Citizens; @: merged into Banknorth; ": merged into Bank of America; \*: merged into Sovereign &: other mergers -- Falmouth Co-op into Rockland Trust; Ipswich Co-op into Inst for Sav of Newburyport; Sandwich Co-op into Compass Bank; Hibernia SB into Eastern Bank
