Note: EBCT stopped collecting data in 2014. SELRCT stopped collecting data after the first Quarter of 2015.

Who are BCT Members?

	ABCT	DCT	EBCT	FCCT	SELRCT	S. Boston	To Date
# Families	1351	563	428	1551	296	305	4494
Total Adults	1880	907	676	2508	440	463	6874
Families w/ 1 Adult	892	276	214	747	173	175	2477
More than 1 Adult	459	287	214	804	123	130	2017
Total Children	1861	936	635	2507	434	513	6886
0-5	1474	697	502	1942	344	351	5310
Under >1	672	81	142	878	40	51	1864

Includes data on all families with a membership card. To Date = all families enrolled since 2012.

1459 Children turned 6 since enrollment began.

21% of all children.

905 Families no longer have children under the age of 6

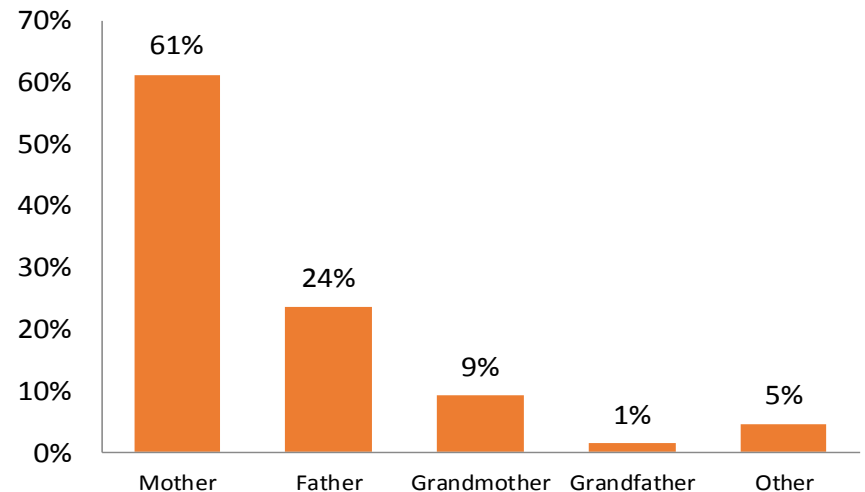

20% of all families.

Note: Birthdates for some children not supplied.

ABCT, FCCT and South Boston continue to enroll families and children at a steady pace. EBCT and SELRCT are no longer enrolling families. DCT is no longer collecting some key data such as income proxy.

Mothers continue to be the largest proportion of enrolled adults.

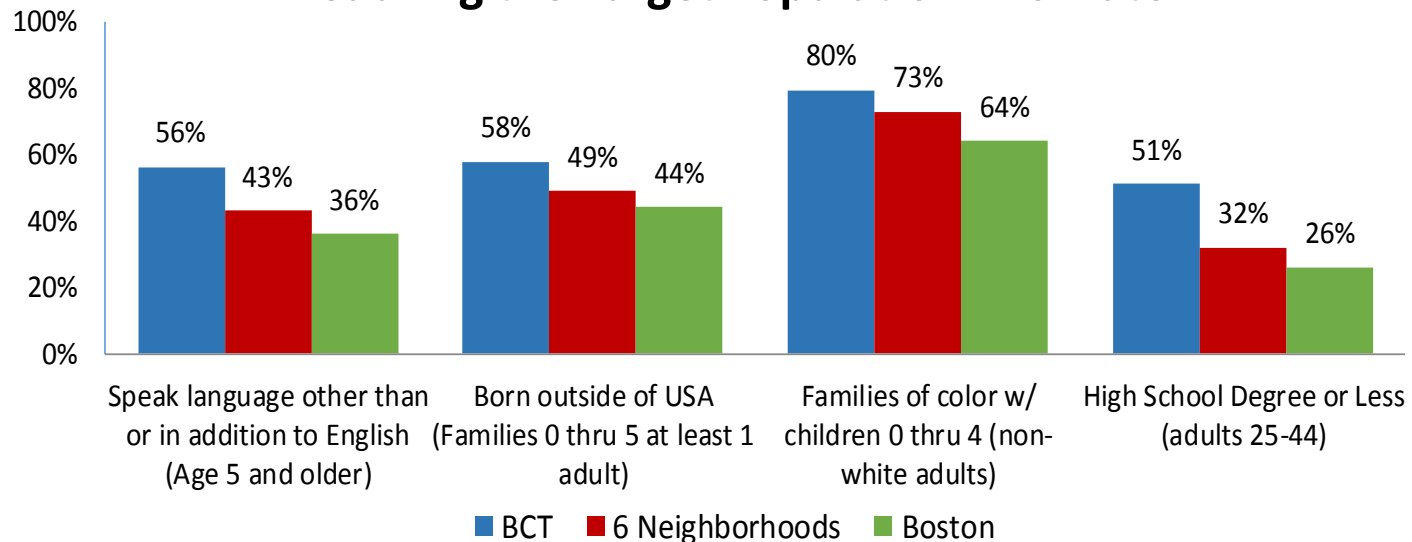

As enrollment has slowed, 20% of families no longer have children under 6 yrs.

BCT Enrolls High Numbers of the Target Population

BCT consistently enrolls a higher number of the target population as compared with the neighborhood average of families who speak another language other than or in addition to English, families with at least one adult born outside of the US, families of color, and educational attainment at a high school degree or less.

Reaching the Target Population - To Date

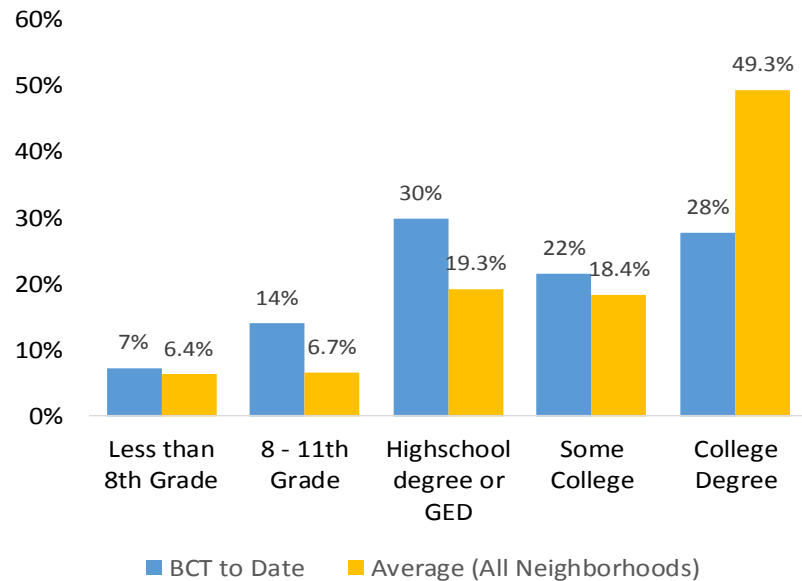

Educational Attainment of Enrolling Adult Compared to the Neighborhood Average

	ABCT	DCT	EBCT	FCCT	SELRCT	S. Boston	Total	Household Data for all BCT Neighborhoods
Less than 8th Grade	10%	5%	20%	5%	2%	3%	7%	6.4% (<i>less than 9th</i>)
8 - 11th Grade	10%	14%	25%	15%	14%	10%	14%	6.7% (<i>9th – 12th</i>)
Highschool degree or GED	21%	36%	28%	34%	40%	24%	30%	19.30%
Some College	16%	25%	13%	24%	30%	26%	22%	14.4% (<i>some college</i>)
College Degree	44%	21%	16%	23%	15%	37%	28%	4.0% (<i>associates</i>)
								49.3%

BCT is enrolling families with lower educational attainment than the combined neighborhood averages. Nearly 50% of residents in these communities have a college degree. Only 28% of enrolling BCT adults have a college degree.

2007-2012 American Community Survey Estimates adults > 25:
 Estimates adults 25-44. Averages exclude families with missing data.
 To Date: = July 2012 to present. Data available for enrolling adult only.

Note: Comparisons are not exact. I.e. neighborhood data is less than 9th grade. BCT data is less than 8th grade.

BCT Enrolls High Numbers of Families whose First Language is Other than English

	ABCT	DCT	EBCT	FCCT	SELRCT	S. Bos	Total	6 Neighborhoods Data from (ACS)
English	57%	85%	36%	71%	75%	93%	68%	52.8% (English Only)
Spanish	30%	28%	79%	18%	25%	17%	29%	17.1%
Portuguese	5%	3%	4%	2%	0%	1%	3%	7.0% (Portuguese + P. Creole)
Cape Verdean Creole	2%	11%	0%	13%	1%	0%	7%	
Russian	4%	0%	1%	0%	0%	0%	1%	0.1%
Chinese Mandarin	3%	0%	0%	0%	10%	1%	2%	0.5%
Chinese Cantonese	2%	0%	0%	0%	15%	1%	2%	
Haitian Creole	0%	2%	0%	4%	3%	1%	3%	9.7% (French + F. Creole)
Vietnamese	2%	0%	0%	20%	0%	0%	9%	8.8%
Arabic	1%	0%	7%	0%	0%	0%	1%	0.0%
Other	12%	4%	1%	2%	2%	2%	4%	3.9%

BCT enrolls a large percentage of Spanish speaking families. To date, 29% of families speak Spanish as compared to the average for the six neighborhoods of 17.1%. There are slightly less families speaking Haitian Creole, 3% compared to the combined neighborhood averages of 9.7% speaking French or French Creole. And there are slightly more Portuguese plus Cape Verdean Creole speakers (10% compared to 7% for the neighborhood averages).

2007-2012 American Community Survey Estimates. Families may speak more than one language. All languages are represented.

BCT Enrolls a High Number of Low Income Families

BCT uses a proxy to measure income since data on income is not tracked at enrollment. Families are considered to be low income, if they receive one or more of the following subsidies: WIC, DTA, SNAP or SSI. Using this formula, 64% of enrolling families are low income.

64% of all enrolled families are living in poverty

66% of all enrolled children 0 through 5 are living in poverty

	ABCT	DCT	EBCT	FCCT	SELRCT	S. Boston	Total	All Six Neighbor- Boston hoods	Category of Measurement	
DTA	13%	18%	4%	18%	18%	11%	15%	5.2%	4.1%	All Households (ACS)
WIC	51%	35%	67%	74%	51%	20%	56%	25.4%		Infants and children (MassChip)
DCF	1%	0%	0%	3%	2%	2%	1%	3.9%		Under 18 (DCF)
SNAP	24%	35%	25%	46%	34%	32%	34%	19.8%	16.6%	Families / child. < 18 (ACS)
Early Intervention	3%	4%	3%	5%	4%	3%	4%	5.5%		# clients (MassChip)
Unemployment	2%	2%	1%	2%	4%	2%	2%	11.0%	10.2%	All Households (ACS)
SSI	2%	7%	1%	4%	6%	8%	4%	9.1%	7.6%	All Households (ACS)
MassHealth	43%	35%	32%	59%	42%	37%	46%			
Fuel Assistance	1%	5%	4%	7%	7%	4%	4%			
Head Start	5%	5%	7%	3%	26%	3%	6%			
Total	100%	100%	100%	100%	100%	100%	100%			
Received > 1 Benefit	58%	62%	74%	85%	82%	53%	71%			
Low Income Families	53%	55%	70%	80%	63%	44%	64%			

The average income for families living in the 6 BCT areas is \$67,143 compared with \$79,538 for the city of Boston

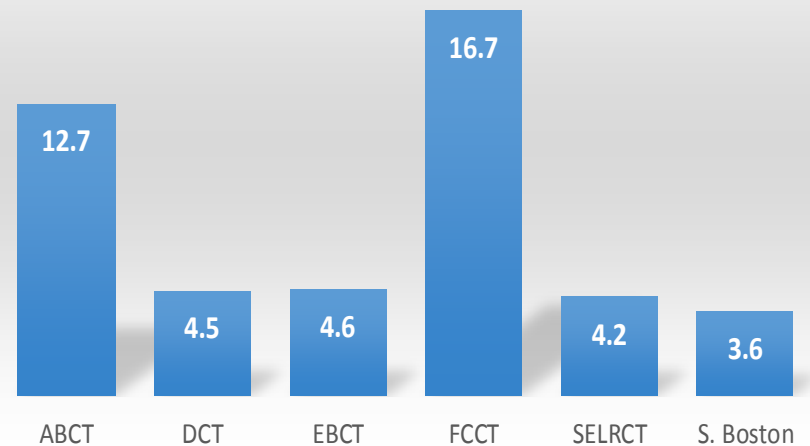

Patterns of BCT Participation

Type of Activity	Total # of Individuals	Unique # families by activity	% families by activity
Children's Educational	1262	269	8%
Community Event	4407	1207	38%
Parent Support Group	296	66	2%
Parent Caregiver Training	2923	381	12%
Play Group	9657	787	25%
Individual Contact	1336	275	9%
Other	324	117	4%
SRR	333	84	3%
Educator Training	74	23	1%
Total:	20612	3209	100%
Total unduplicated # of families for all activities:			2077
% of families with membership cards participating:			46%

Two communities, FCCT and ABCT, account for 82% of all recorded instances of participation. Not surprisingly, these communities also show the greatest average number of instances of participation per family, suggesting deep on-going communication with the families choosing to engage with BCT efforts.

Note: Participation data is cumulative.

Average # of Activities Attended by Families Attending at Least One Activity

	Recorded Attendance	% of Recorded Attendance
ABCT	10169	49%
DCT	2006	10%
EBCT	389	2%
FCCT	6751	33%
SELRCT	462	2%
S. Boston	835	4%
Total	20612	100%

Which Members are Participating in BCT Activities?

Participation Rates of BCT Families

Participation patterns show that roughly half of all enrolling families never actually participate in activities.

Only 23% of enrolling families participate in more than 2 activities suggesting a need for continued and ongoing outreach to BCT members.

Note: Participation data is cumulative.

# Activities Attended	ABCT	DCT	EBCT	FCCT	SELRCT	S. Boston	BCT
0	41%	21%	80%	74%	63%	24%	54%
1-2	21%	58%	13%	10%	21%	50%	23%
3-4	8%	5%	2%	4%	6%	8%	6%
5-8	10%	7%	2%	4%	7%	7%	6%
9-24	11%	7%	3%	3%	2%	10%	6%
More	9%	3%	0%	5%	1%	0%	5%

Which Members are Participating in BCT Activities?

	ABCT	DCT	EBCT	FCCT	SELRCT	South Boston	Total BCT	% Enrolled Families
English	54%	89%	47%	55%	84%	92%	62%	68%
Spanish	29%	30%	64%	5%	23%	18%	19%	29%
Portuguese	1%	2%	9%	1%	0%	0%	2%	3%
Cape Verdean Creol	0%	7%	0%	3%	2%	0%	2%	7%
Russian	3%	0%	1%	0%	0%	1%	1%	1%
Chinese Mandarin	6%	0%	0%	1%	3%	1%	2%	2%
Chinese Cantonese	5%	0%	12%	2%	16%	2%	3%	2%
Haitian Creole	0%	0%	0%	2%	7%	1%	1%	3%
Vietnamese	0%	0%	1%	68%	0%	0%	30%	9%
Arabic	0%	0%	23%	0%	6%	0%	1%	1%
Other	13%	4%	0%	2%	2%	2%	6%	4%

The languages spoken in the families of participating adults show heavy participation by the Vietnamese community, due primarily to FCCT. Spanish speaking families are participating at slightly lower rates than enrolled families speaking Spanish.

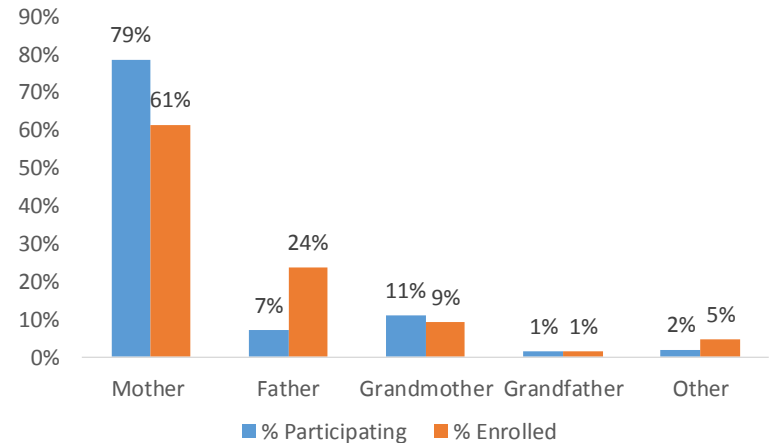

29% Of all participants do not speak English (foreign language only).

Note: Families may speak more than one language. Data includes all languages spoken by the family. Averages exclude families where no information about languages was available.

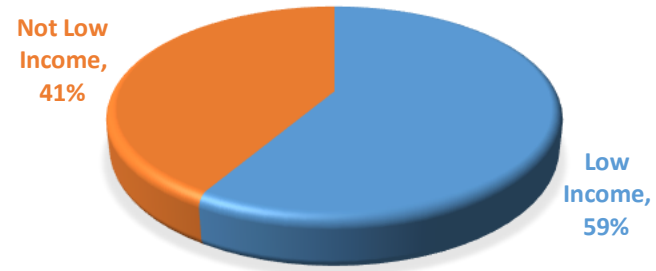

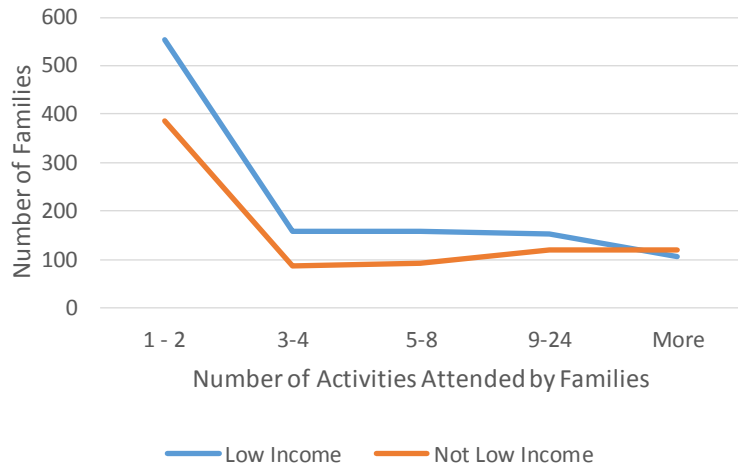

Mothers are participating at greater rates compared with the number of enrolled mothers. And although there are a relatively large number of fathers enrolled, they participate less frequently.

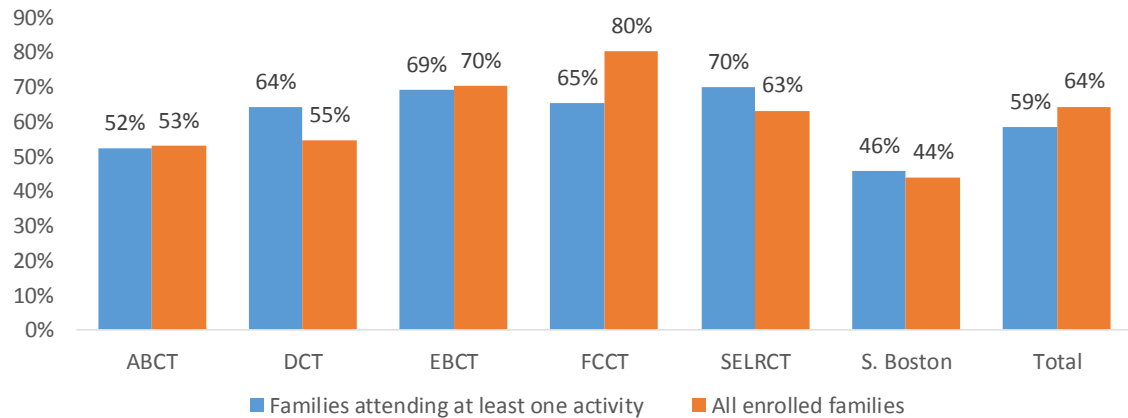

Relationship to Child of Participating Adult Compared to Enrollment Data

Participation Rates by Income

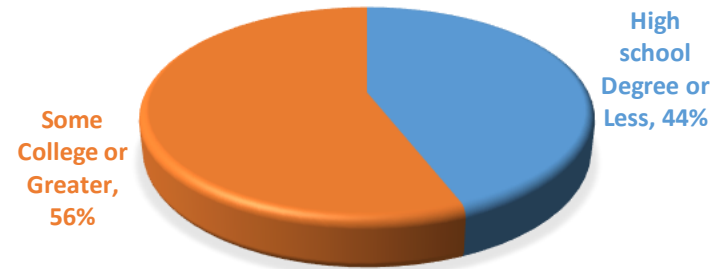

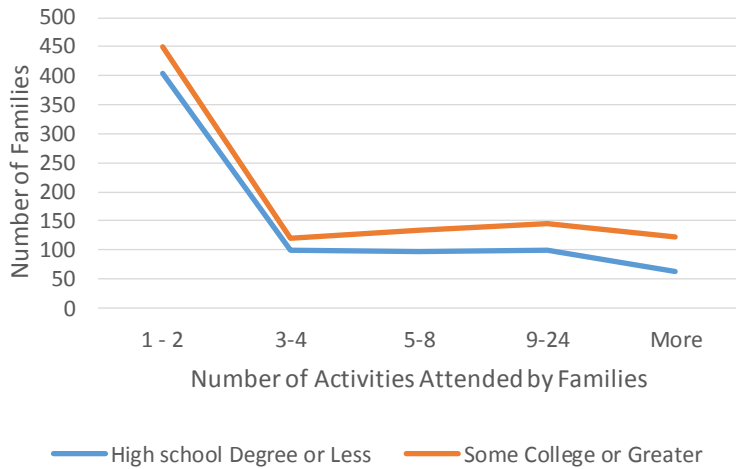

% of Participating Families Who Are Low Income Compared to % of Enrolled Families

Slightly fewer low income BCT families have participated in at least one activity when compared with the number of enrolled families who are low income (59% compared to 64%), primarily attributable to FCCT.

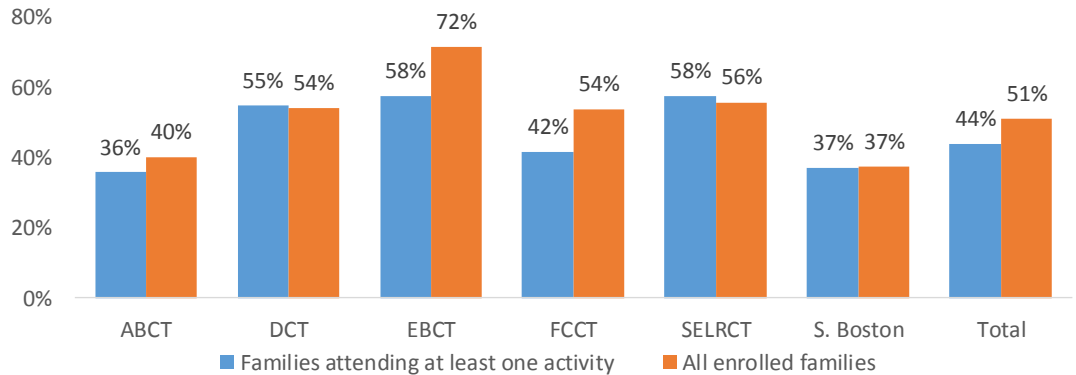

Participation Rates by Education

Participation patterns (# of times participating) of more highly educated families and less educated families are similar.

Families with a high school degree or less participated slightly less frequently when compared with the number of enrolled families with a high school degree or less (44% compared to 51%).

Percent Participating BCT Families Compared to Enrolled Families with High School Degree or Less*

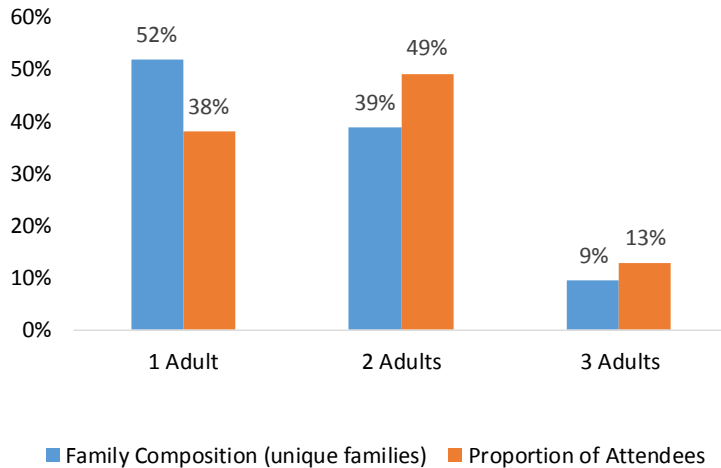

Note: Educational data is available for the enrolling adult only. Data was not available for all participants..

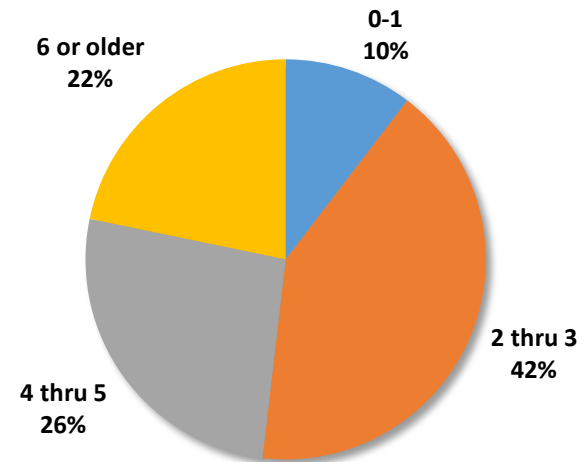

Family Composition of Participating Families

Participation by Family Composition

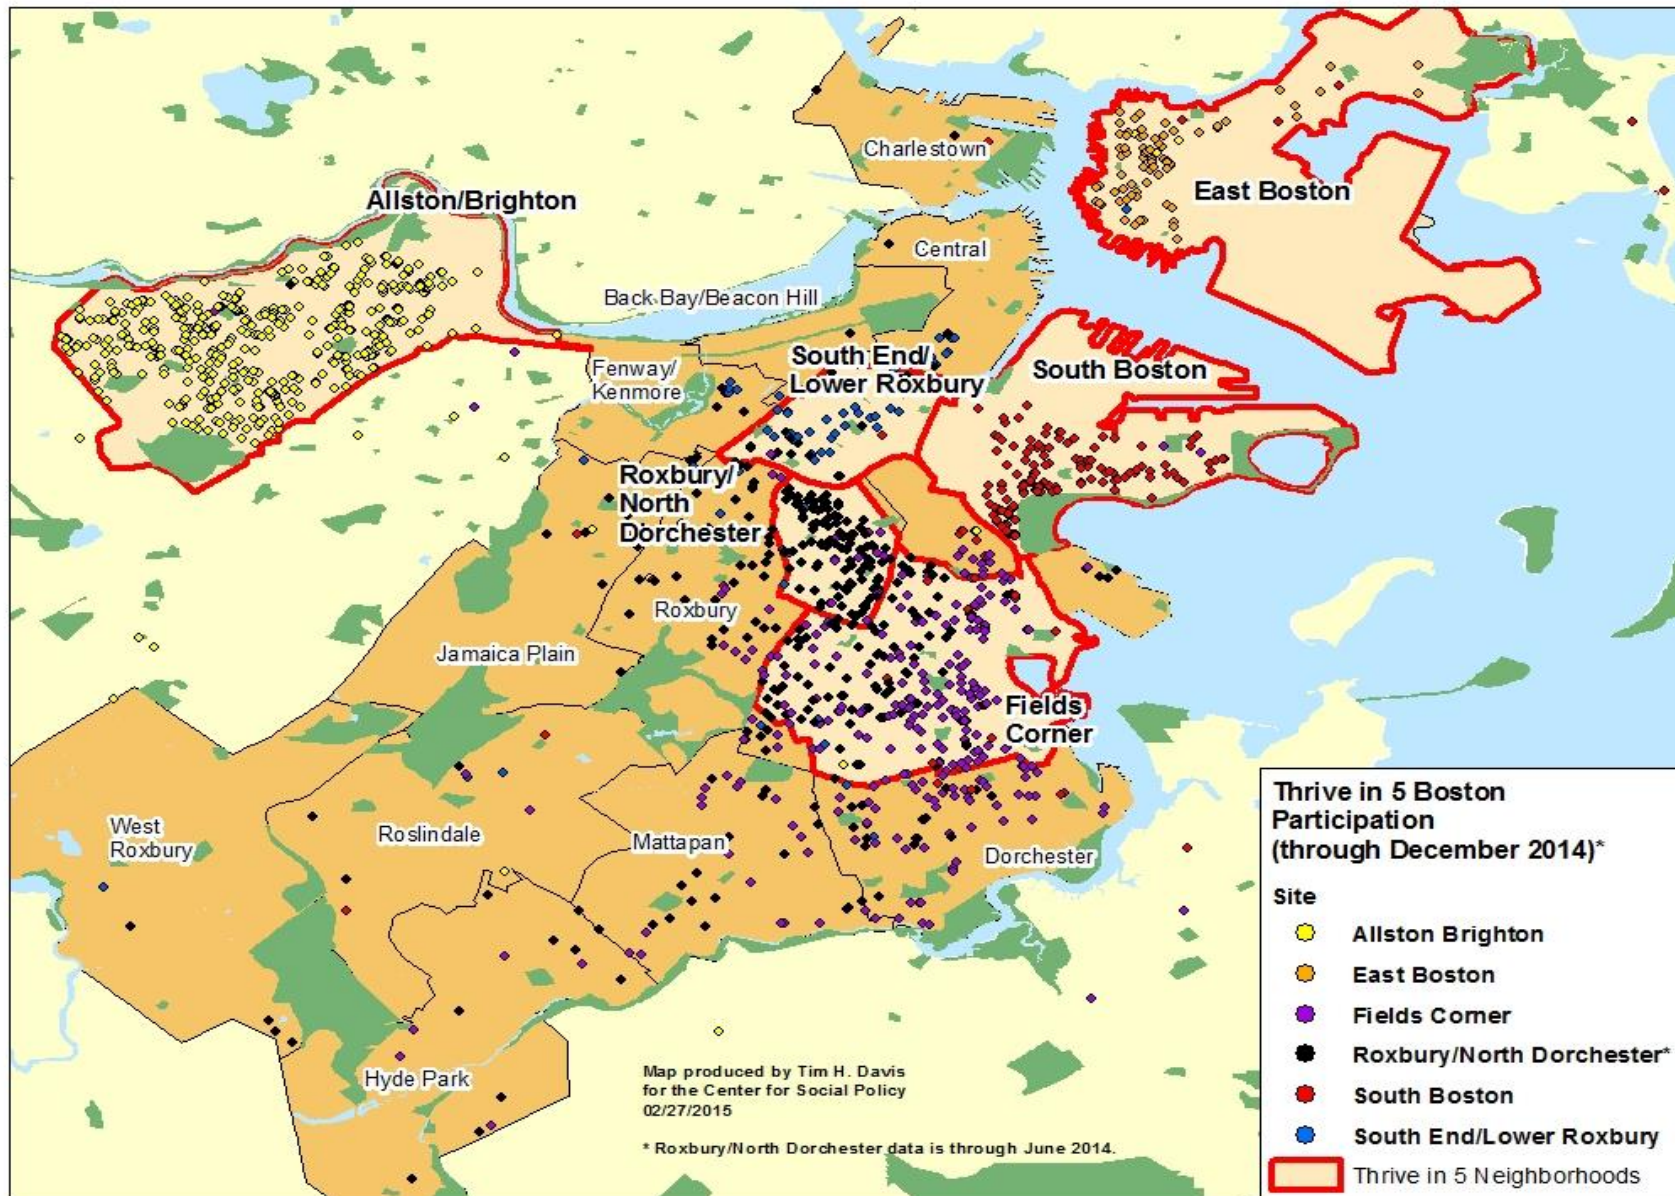

Age of Children in the Family at the Time of the Recorded Activity

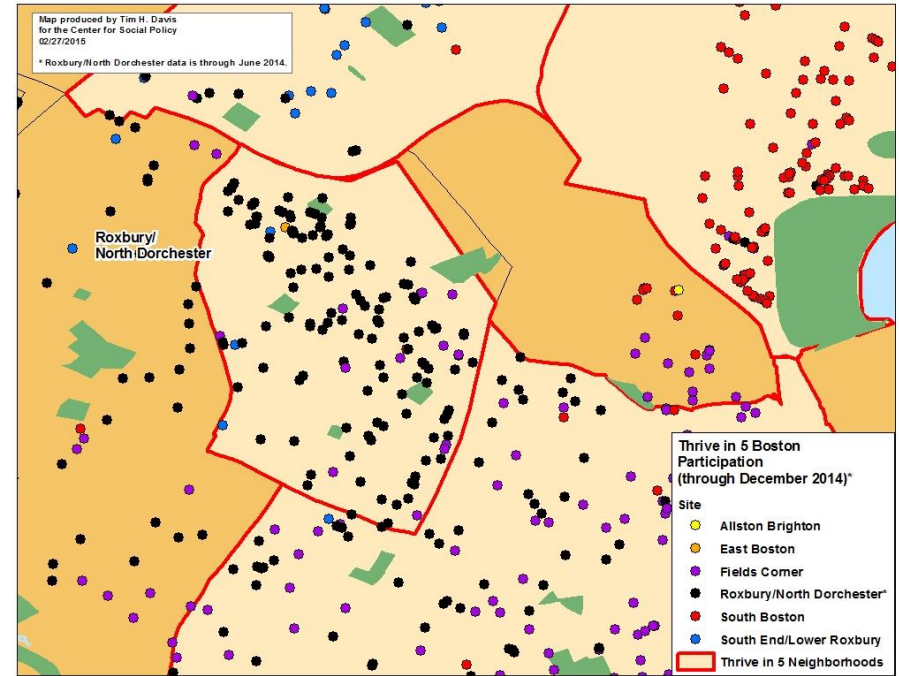

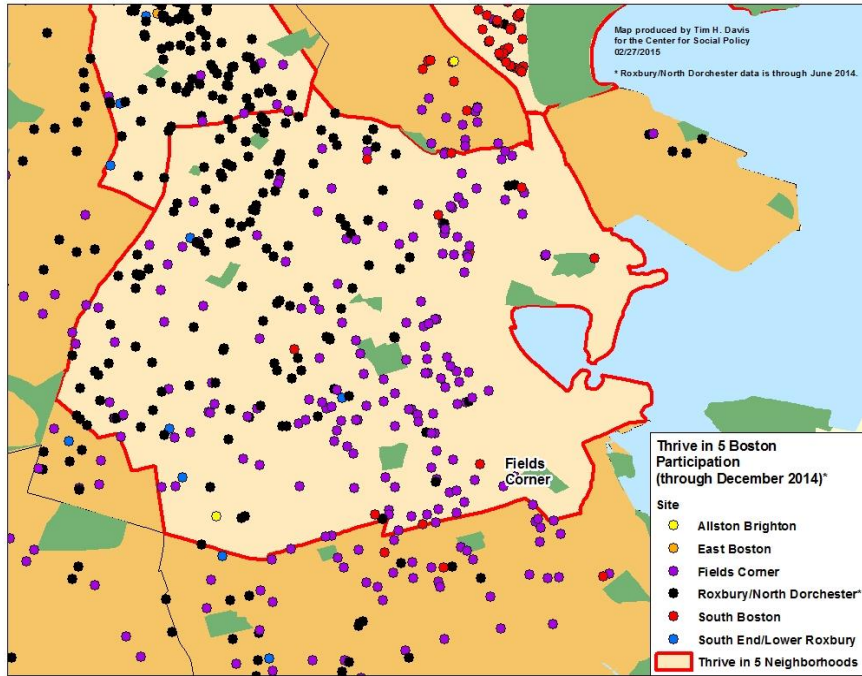

Adults from single-headed households comprised the largest portion of unique families participating in activities. However, these families participated slightly less often, accounting for only 38% of all instances of attendance.

Note: The proportion of all attendees includes all unique attendances by adults. Over a period of time, families may attend multiple events.

Evidence of Hub Hopping

	ABCT	DCT	EBCT	FCCT	SELRCT	South Boston	Total
ABCT							0
DCT			1	3			4
EBCT	2						2
FCCT	5		2				7
SELRCT							0
South Boston							0
Total	7	0	3	3	0	0	13

The maps above and on the preceding page, suggest significant overlap in participation between FCCT and DCT. However, there is little evidence of card holders frequenting or participating in each other's activities (see adjacent chart). This suggests that families may have two or more cards or connection is not primarily determined by geography alone.

Haitian Creole	1	0%	0%
Vietnamese	1	0%	2%
Arabic	22	0%	1%
Other	677	13%	12%
Total:	5715		

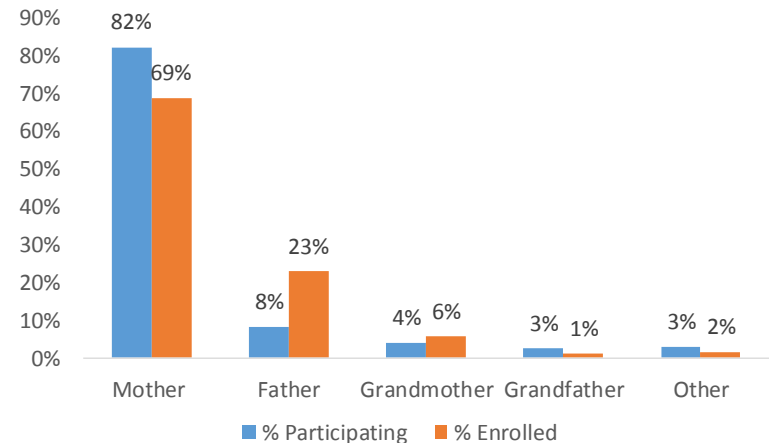

The languages spoken in the families of participating adults roughly mirror languages spoken in the homes of all enrolled families, with lower participation by Portuguese / Cape Verdean speaking families and higher participation by Chinese speaking families.

24% Of all participants do not speak English (foreign language only).

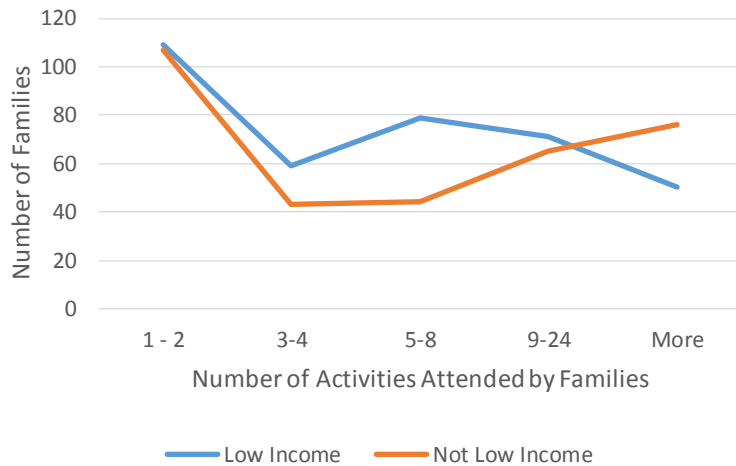

Note: Families may speak more than one language. Data includes all languages spoken by the family. Only 50% of enrolling ABCT families answered information about language possibly skewing results.

Mothers are participating at greater rates compared with the number of enrolled mothers. And although there are a relatively large number of fathers enrolled, they participate less frequently.

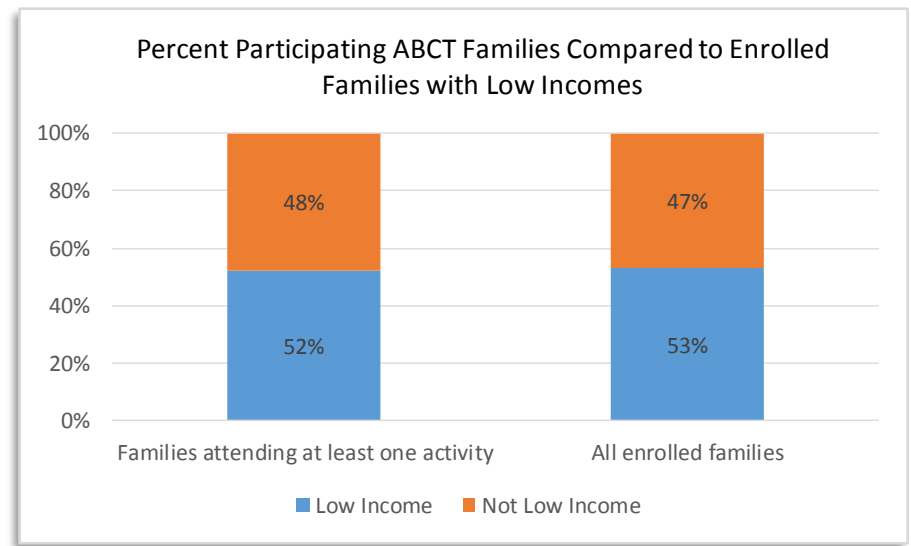

Relationship to Child of Participating Adult Compared to Enrollment Data

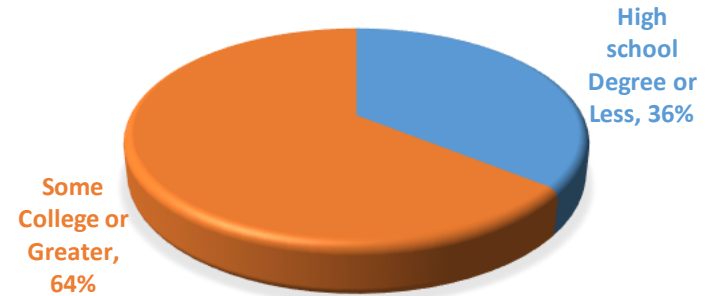

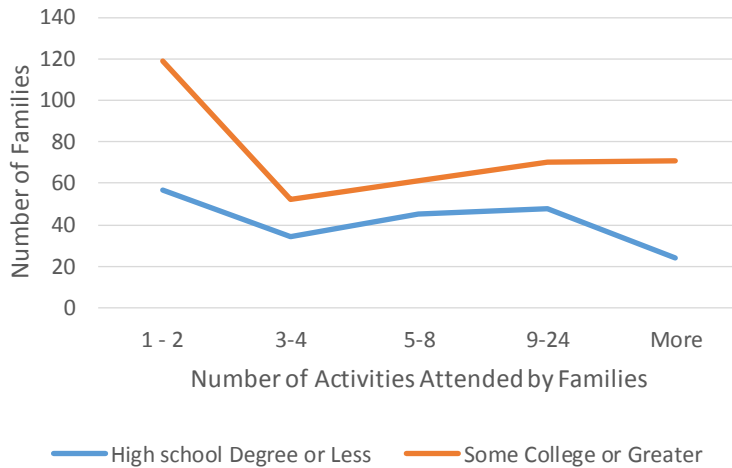

Participation Rates by Income

Low income families are participating at rates consistent with all low income families enrolled in ABCT.

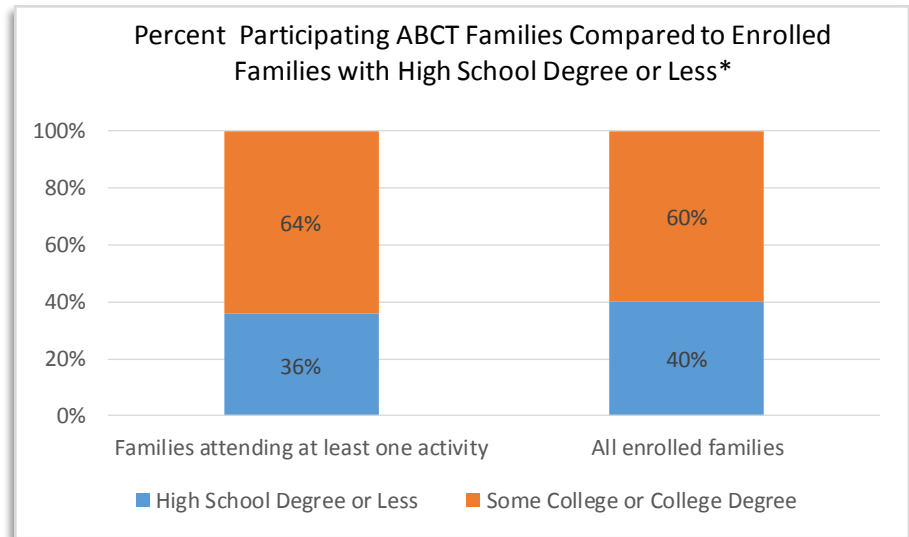

Participation Rates by Education

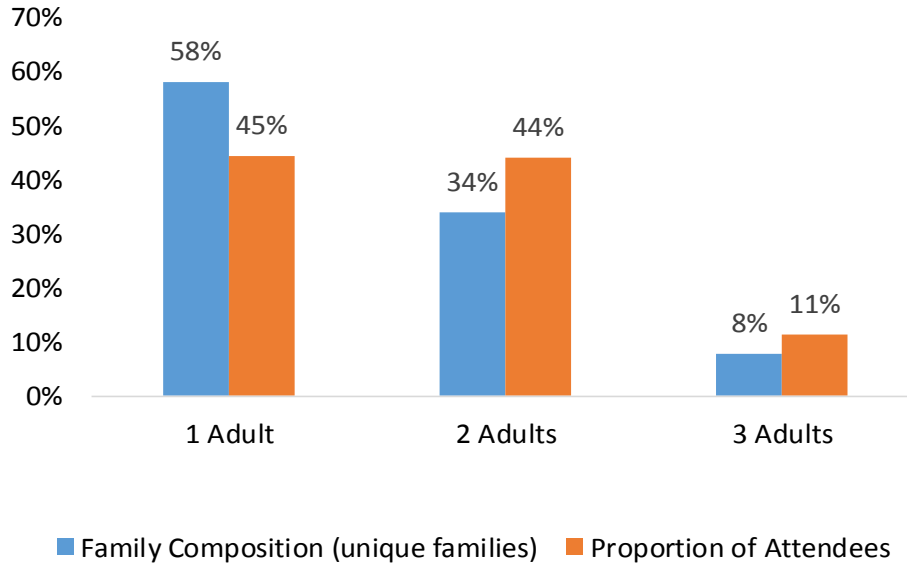

The educational attainment of participating adults roughly mirrors the number of enrolled families. Participation patterns of both groups is fairly consistent (see chart above).

Note: Educational data is available for the enrolling adult only. Data was not available for all participants..

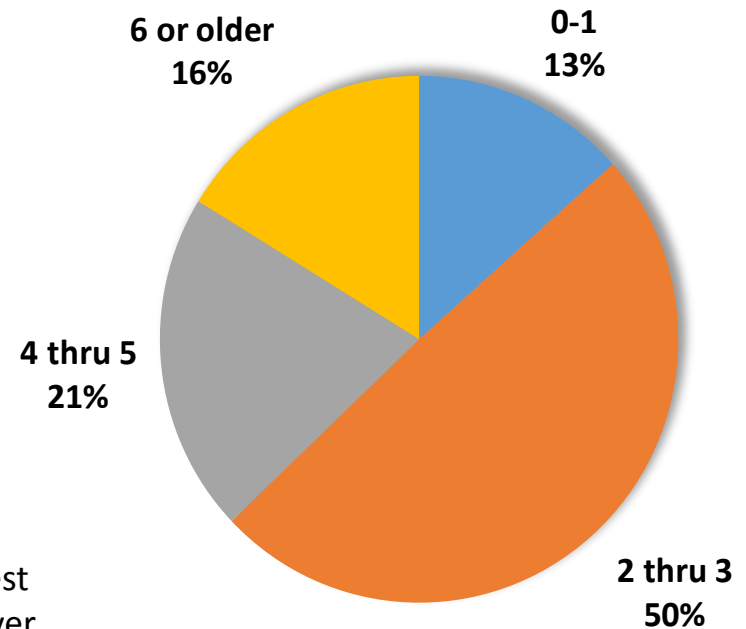

Family Composition of Participating Families

Participation by Family Composition

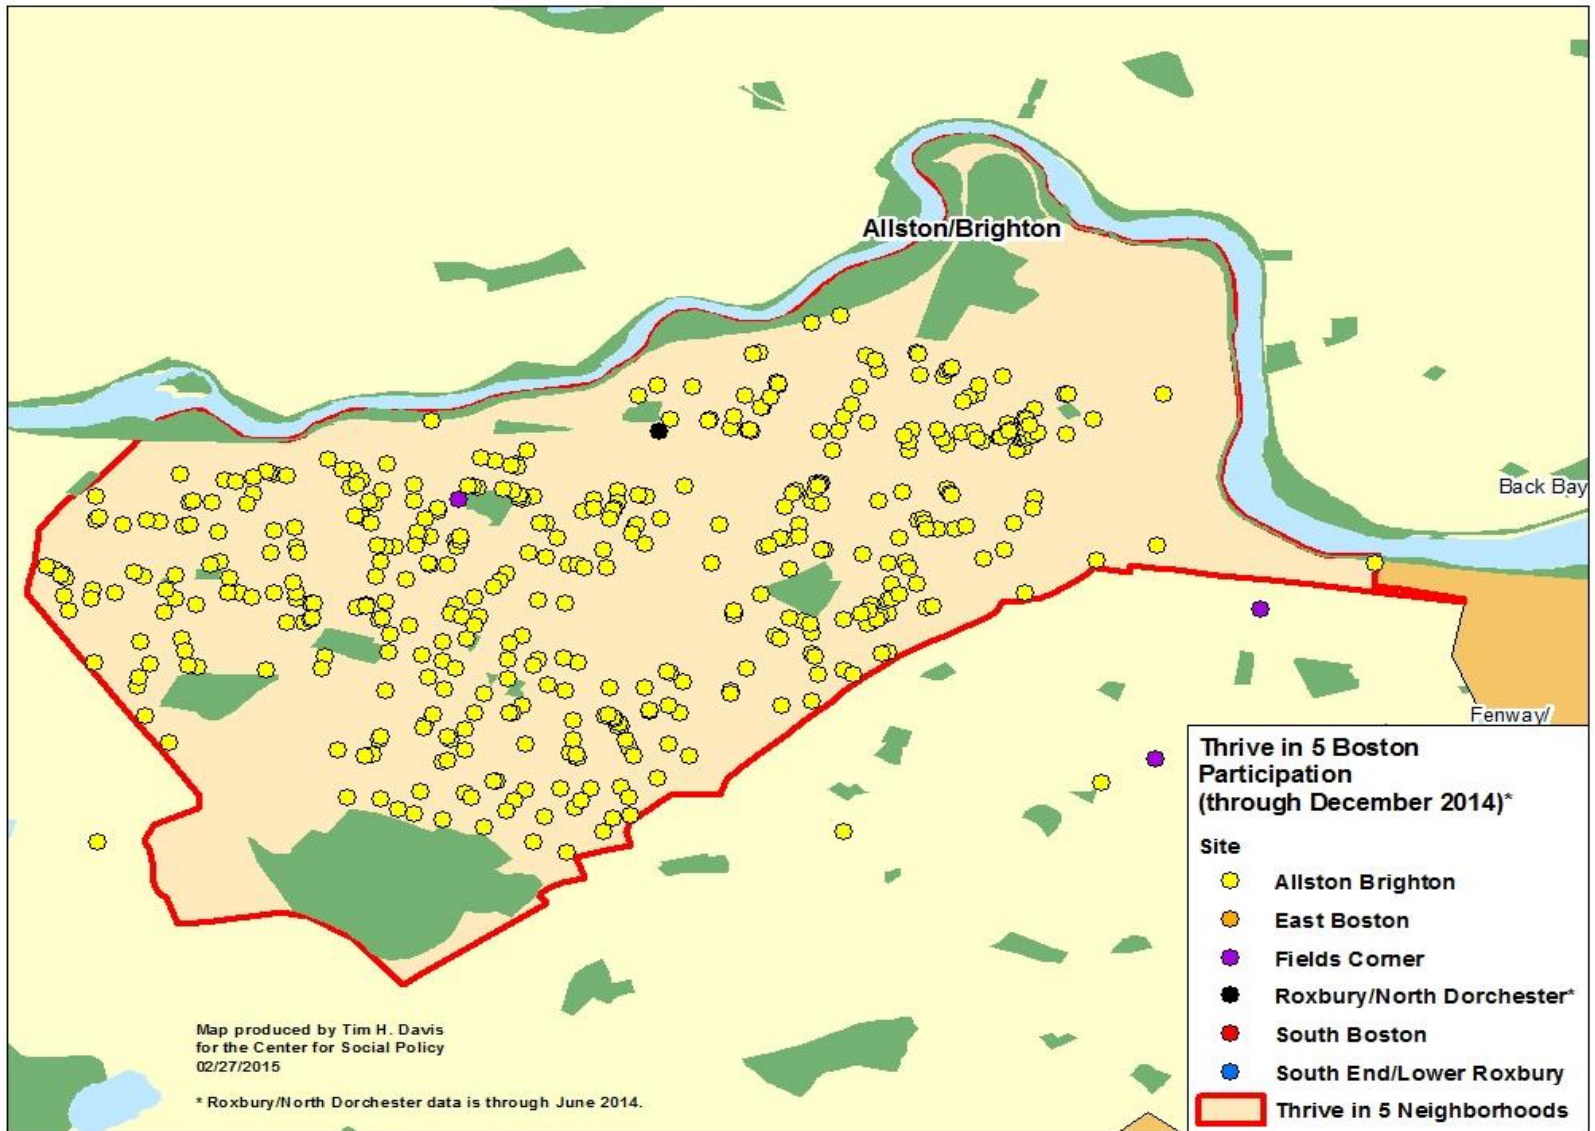

Age of Children in the Family at the Time of the Recorded Activity

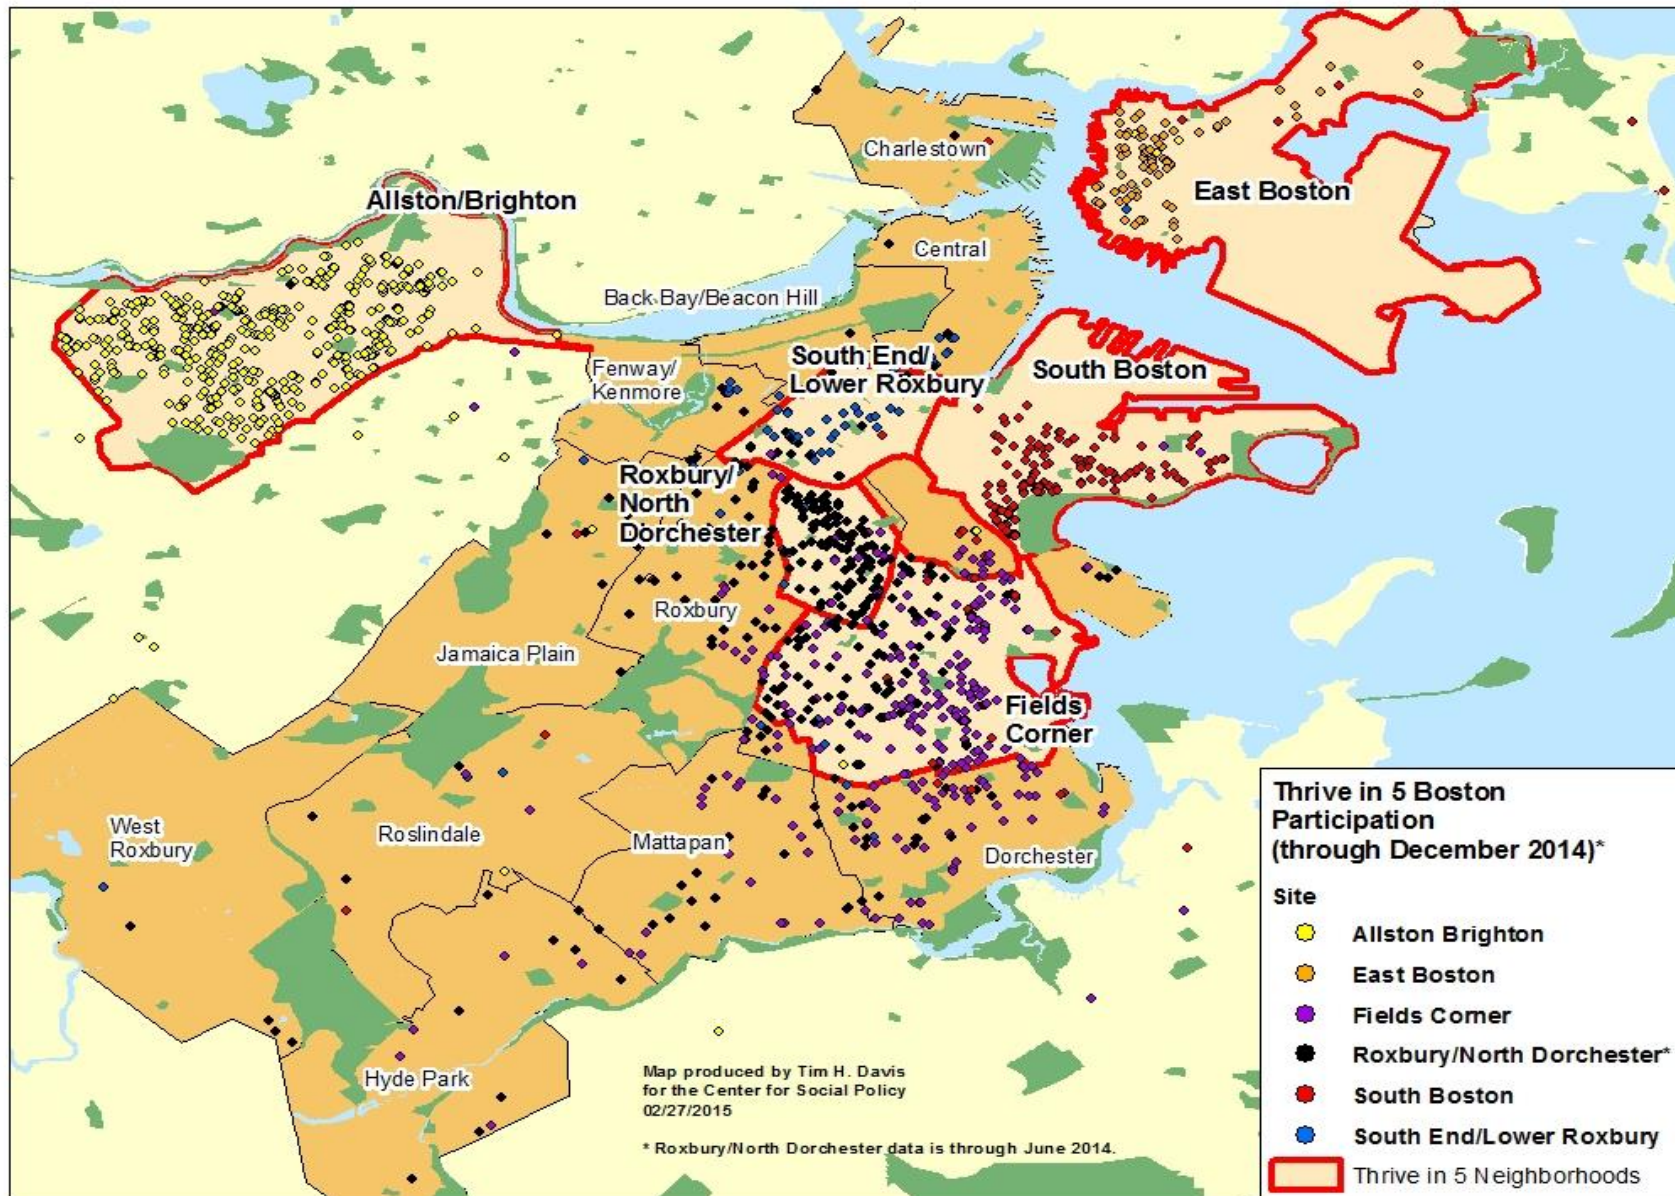

Adults from single-headed households comprised the largest portion of unique families participating in activities. However, these families participated slightly less often, accounting for only 45% of all instances of attendance.

Note: The proportion of all attendees includes all unique attendances by adults. Over a period of time, families may attend multiple events.

Participating ABCT families live primarily within the target neighborhood with limited overlap with other BCT neighborhoods.

Total Children	23	0	0	0	23	936
Children 0-5	19	0	0	0	19	697
Under >1	3	0	0	0	3	81

Includes data on all families with a membership card. To Date = all families enrolled since 2012.

350 Children turned 6 since enrollment began.

37% Of all children.

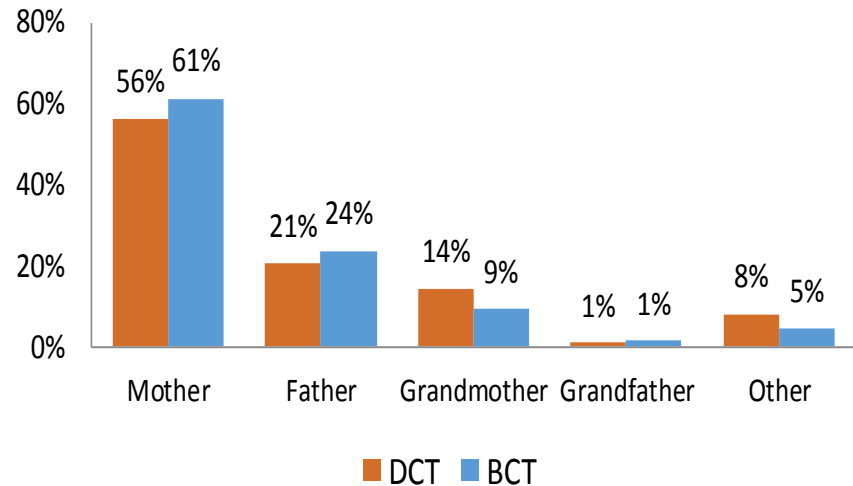

253 Families no longer have children under the age of 6

45% Of all families.

Note: Birthdates for some children not supplied.

DCT enrolled a limited number of families in 2015. Enrollment is expected to increase when the DCT data system is fully operational.

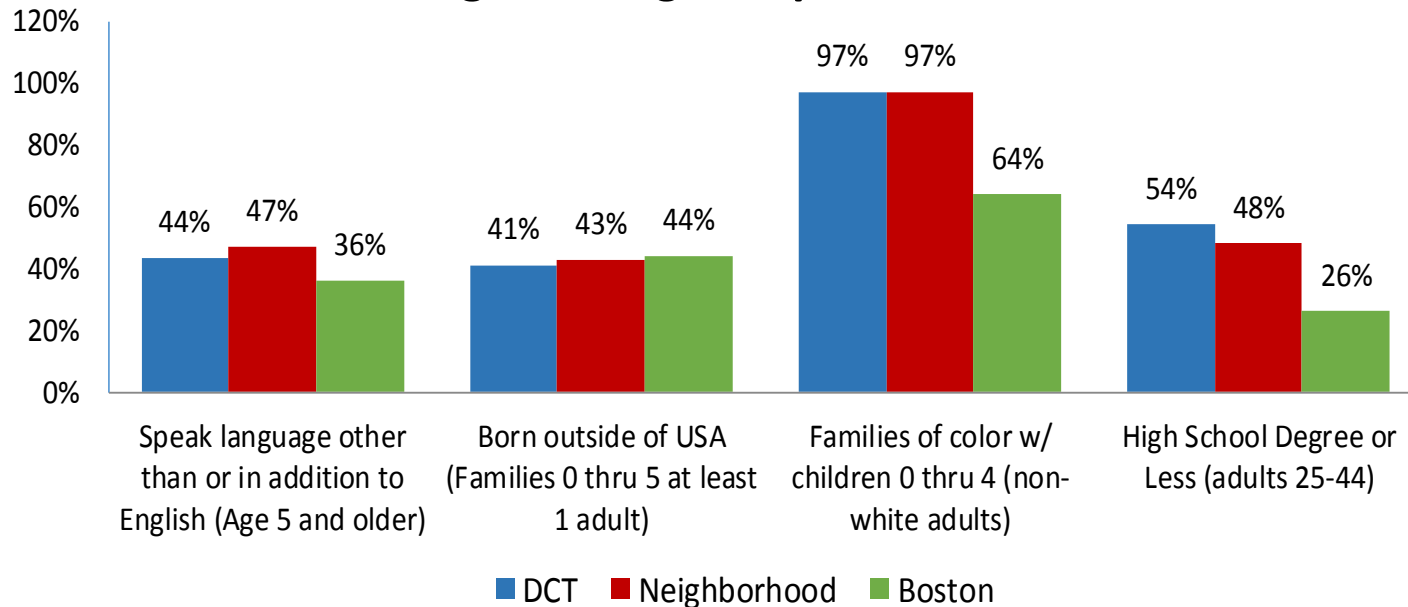

DCT has enrolled a large number of grandmothers compared with the BCT average.

DCT Enrolls High Numbers of the Target Population

DCT has enrolled a consistent number of the target population when compared with the neighborhood average of families who speak another language other than or in addition to English, families with at least one adult born outside of the US, and families of color. In educational attainment, DCT enrolled a higher number of adults at a high school degree or less when compared to the neighborhood average.

Reaching the Target Population - To Date

Educational Attainment of Enrolling Adult Compared to the Neighborhood Average

	Q1	Q2	Q3	Q4	Year	To Date	Neighborhood Household Data
Less than 8th Grade	0%				0%	5%	7.0% (<i>less than 9th</i>)

Vietnamese	0%				0%	0%	0.8%
Arabic	0%				0%	0%	0.2%
Other	0%				8%	4%	4.4%

DCT enrolled a large percentage of Cape Verdean Creole speaking families. To date, 14% of DCT families speak either Portuguese or Cape Verdean Creole as compared to the neighborhood average of 8.2%. DCT has also enrolled a high number of Spanish speaking families, 28% compared to the neighborhood average of 23.8%. However, there are fewer Haitian Creole speakers (2%) when compared to the neighborhood average of 8.6% French and French Creole speakers.

2007-2012 American Community Survey Estimates. Families may speak more than one language. All languages are represented.

DCT Enrolls a High Number of Low Income Families

BCT uses a proxy to measure income since data on income is not tracked at enrollment. Families are considered to be low income, if they receive one or more of the following subsidies: WIC, DTA, SNAP or SSI. Using this formula, 58% of enrolling families are low income. (DCT no longer collects information on income proxy. Information on income is not available for new enrolling families.)

55% of all enrolled families are living in poverty

59% of all enrolled children 0 through 5 are living in poverty

Total:	2597		

Spanish speaking families are participating at higher rates than enrolled families speaking Spanish and Cape Verdean Creole speaking families are participating at slightly lower rates.

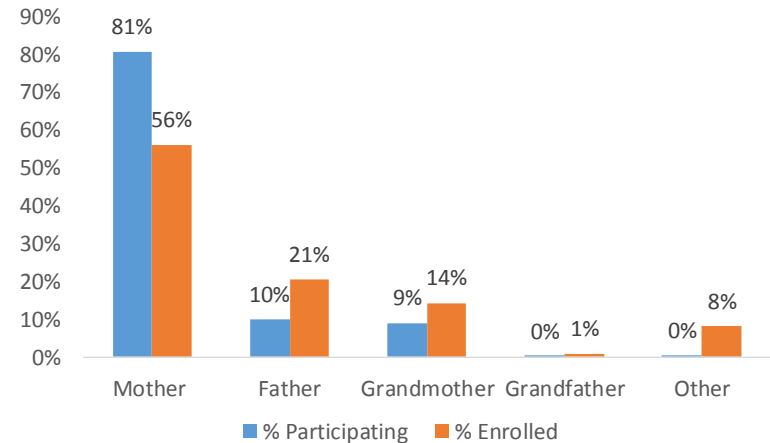

11% Of all participants do not speak English (foreign language only).

Note: Families may speak more than one language. Data includes all languages spoken by the family.

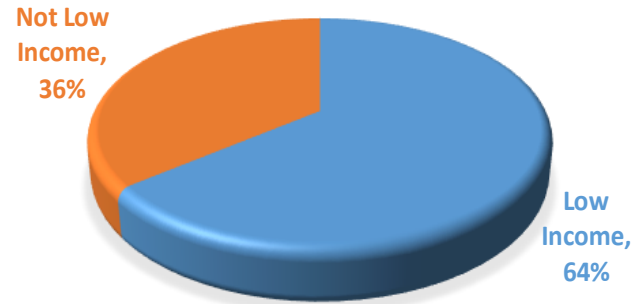

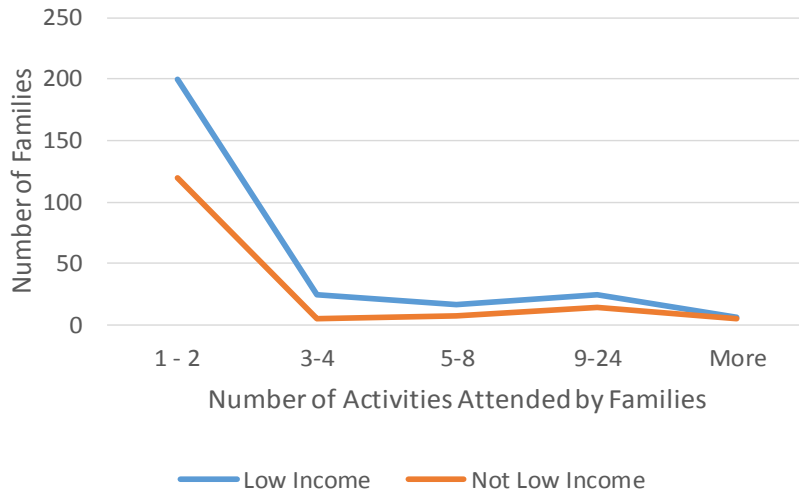

Mothers are participating at greater rates compared with enrolled mothers. And although there are a relatively large number of fathers and grandmothers enrolled, they participate less frequently.

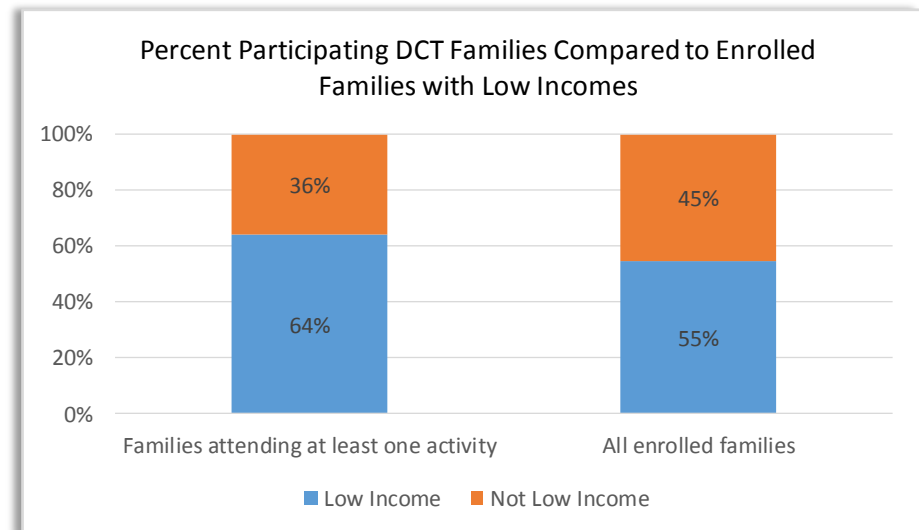

Relationship to Child of Participating Adult Compared to Enrollment Data

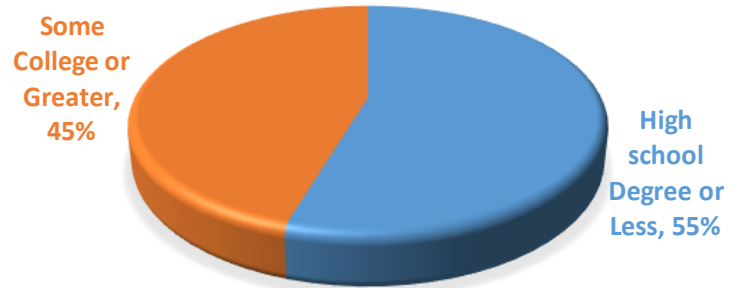

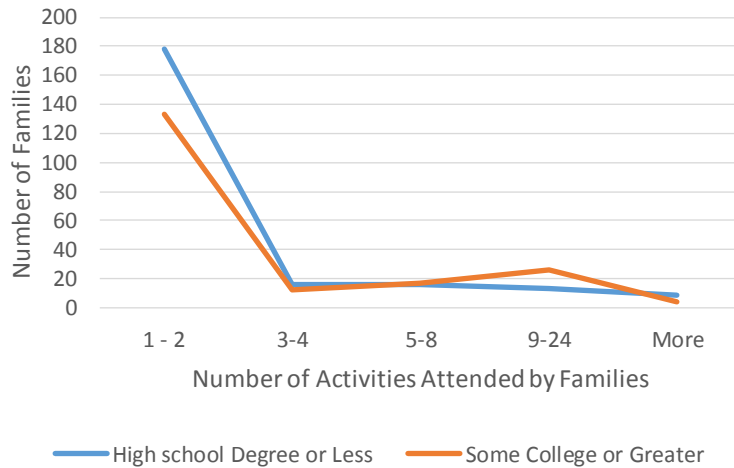

Participation Rates by Income

Low income families are participating at slightly higher rates than all low income families enrolled in DCT. (DCT no longer tracks income proxies. Therefore data is not included for new enrolling families)

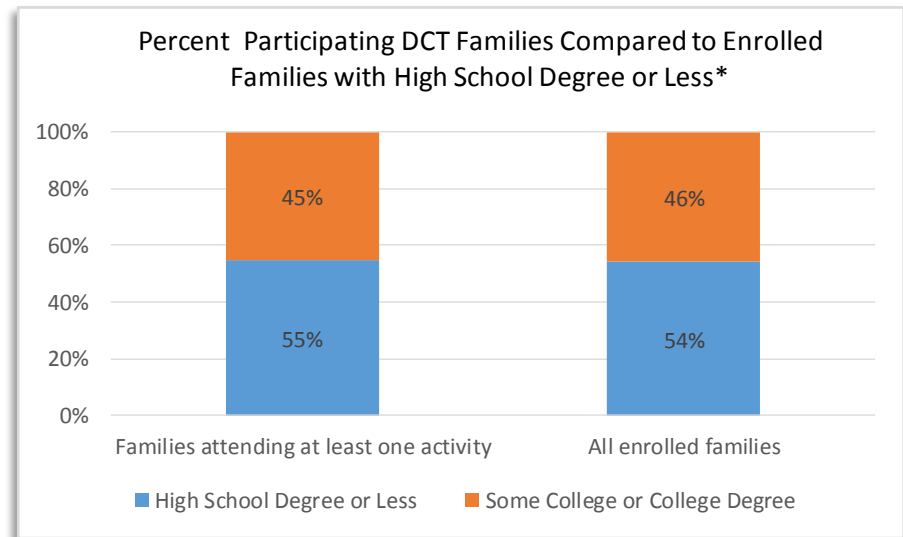

Participation Rates by Education

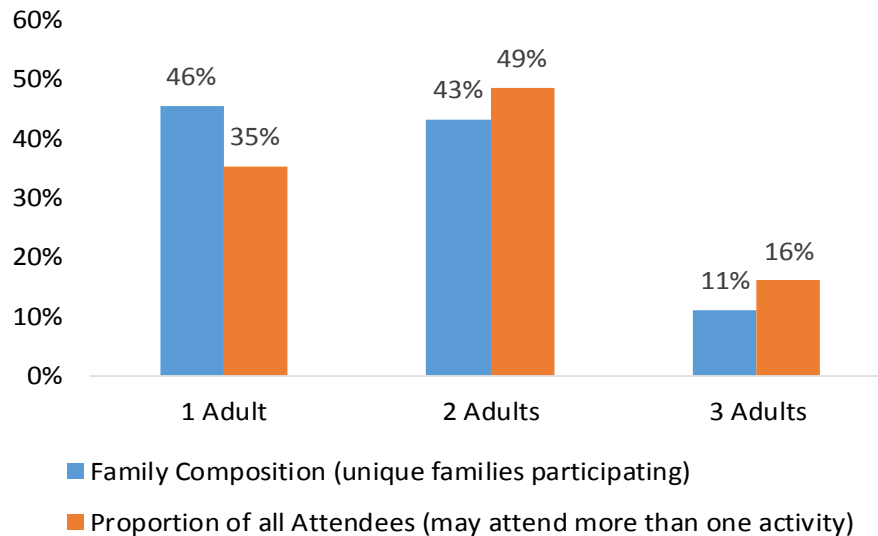

The educational attainment of participating DCT families mirrors the educational attainment of enrolled families.

Note: Educational data is available for the enrolling adult only. Data was not available for all participants..

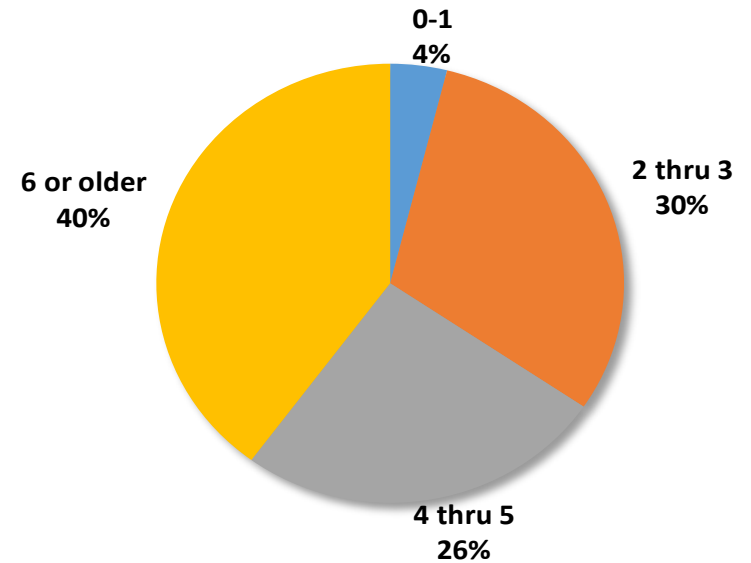

Family Composition of Participating Families

Participation by Family Composition

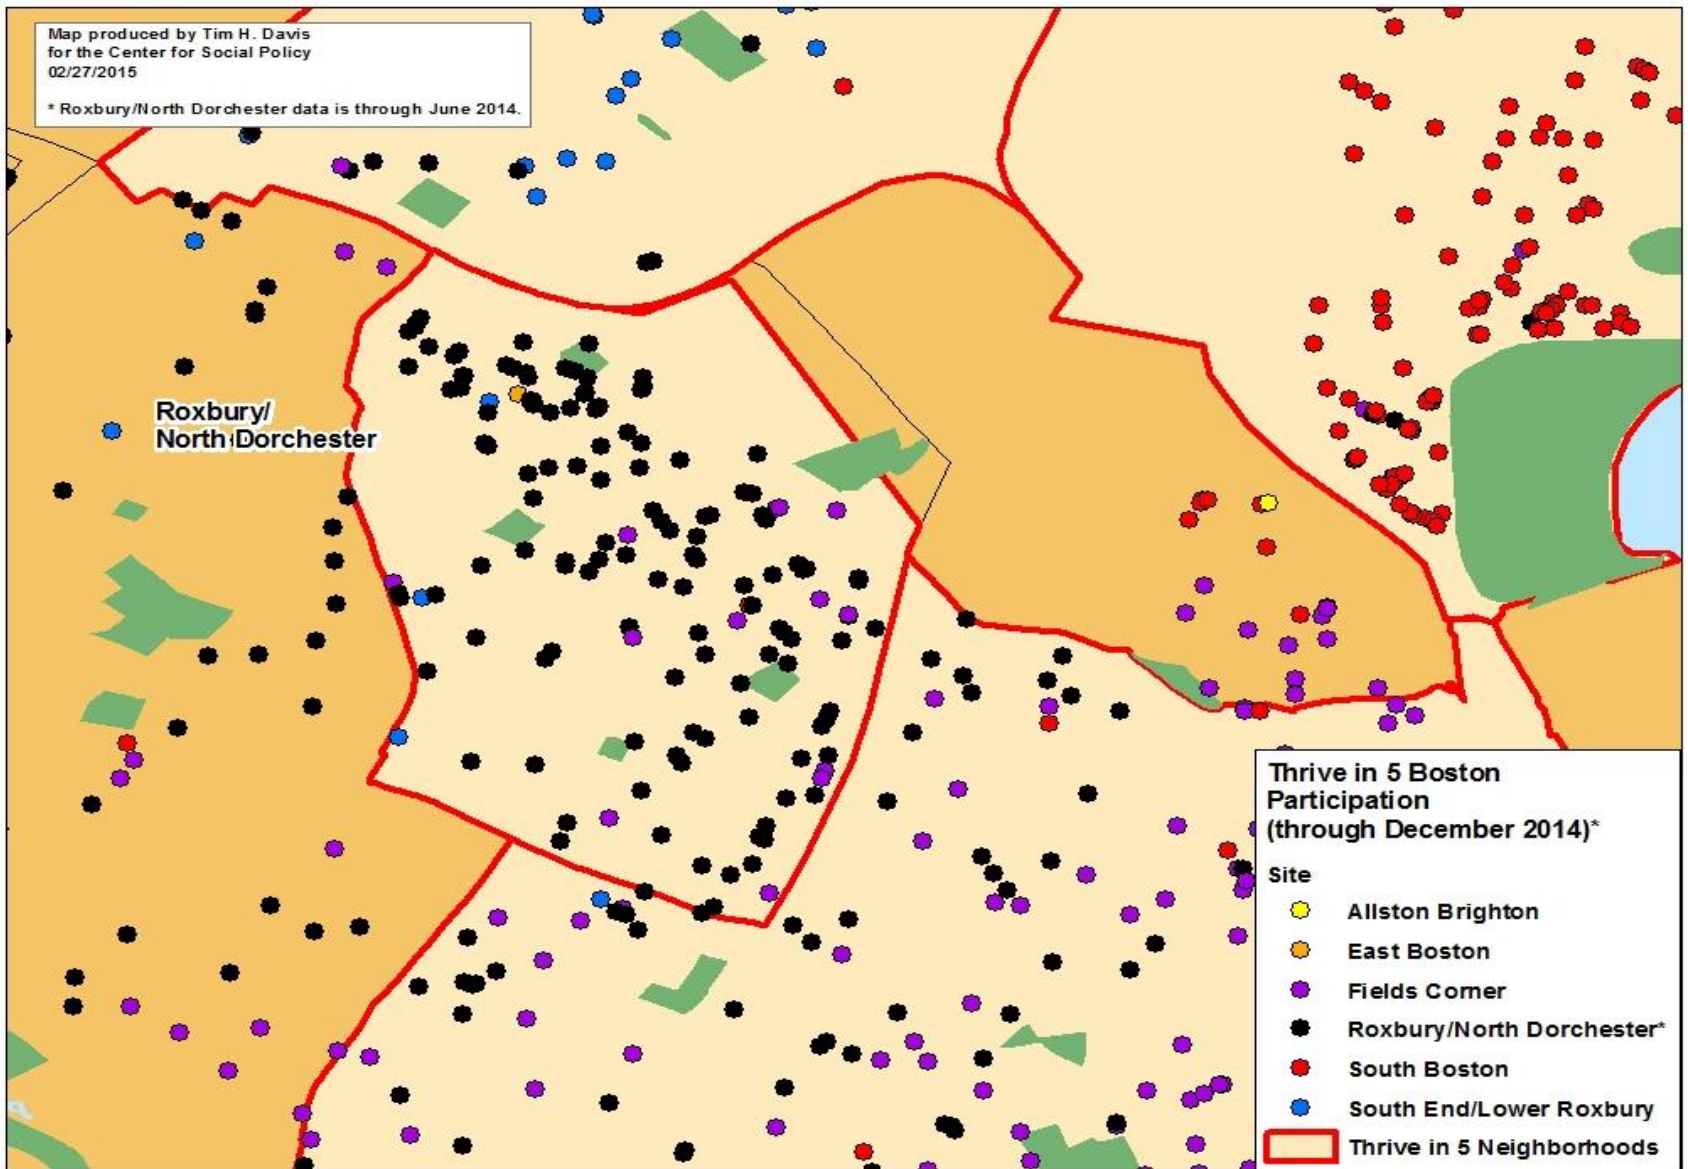

Age of Children in the Family at the Time of the Recorded Activity

Adults from single-headed households comprised the largest portion of unique families participating in activities. However, these families participated slightly less often, accounting for only 35% of all instances of attendance.

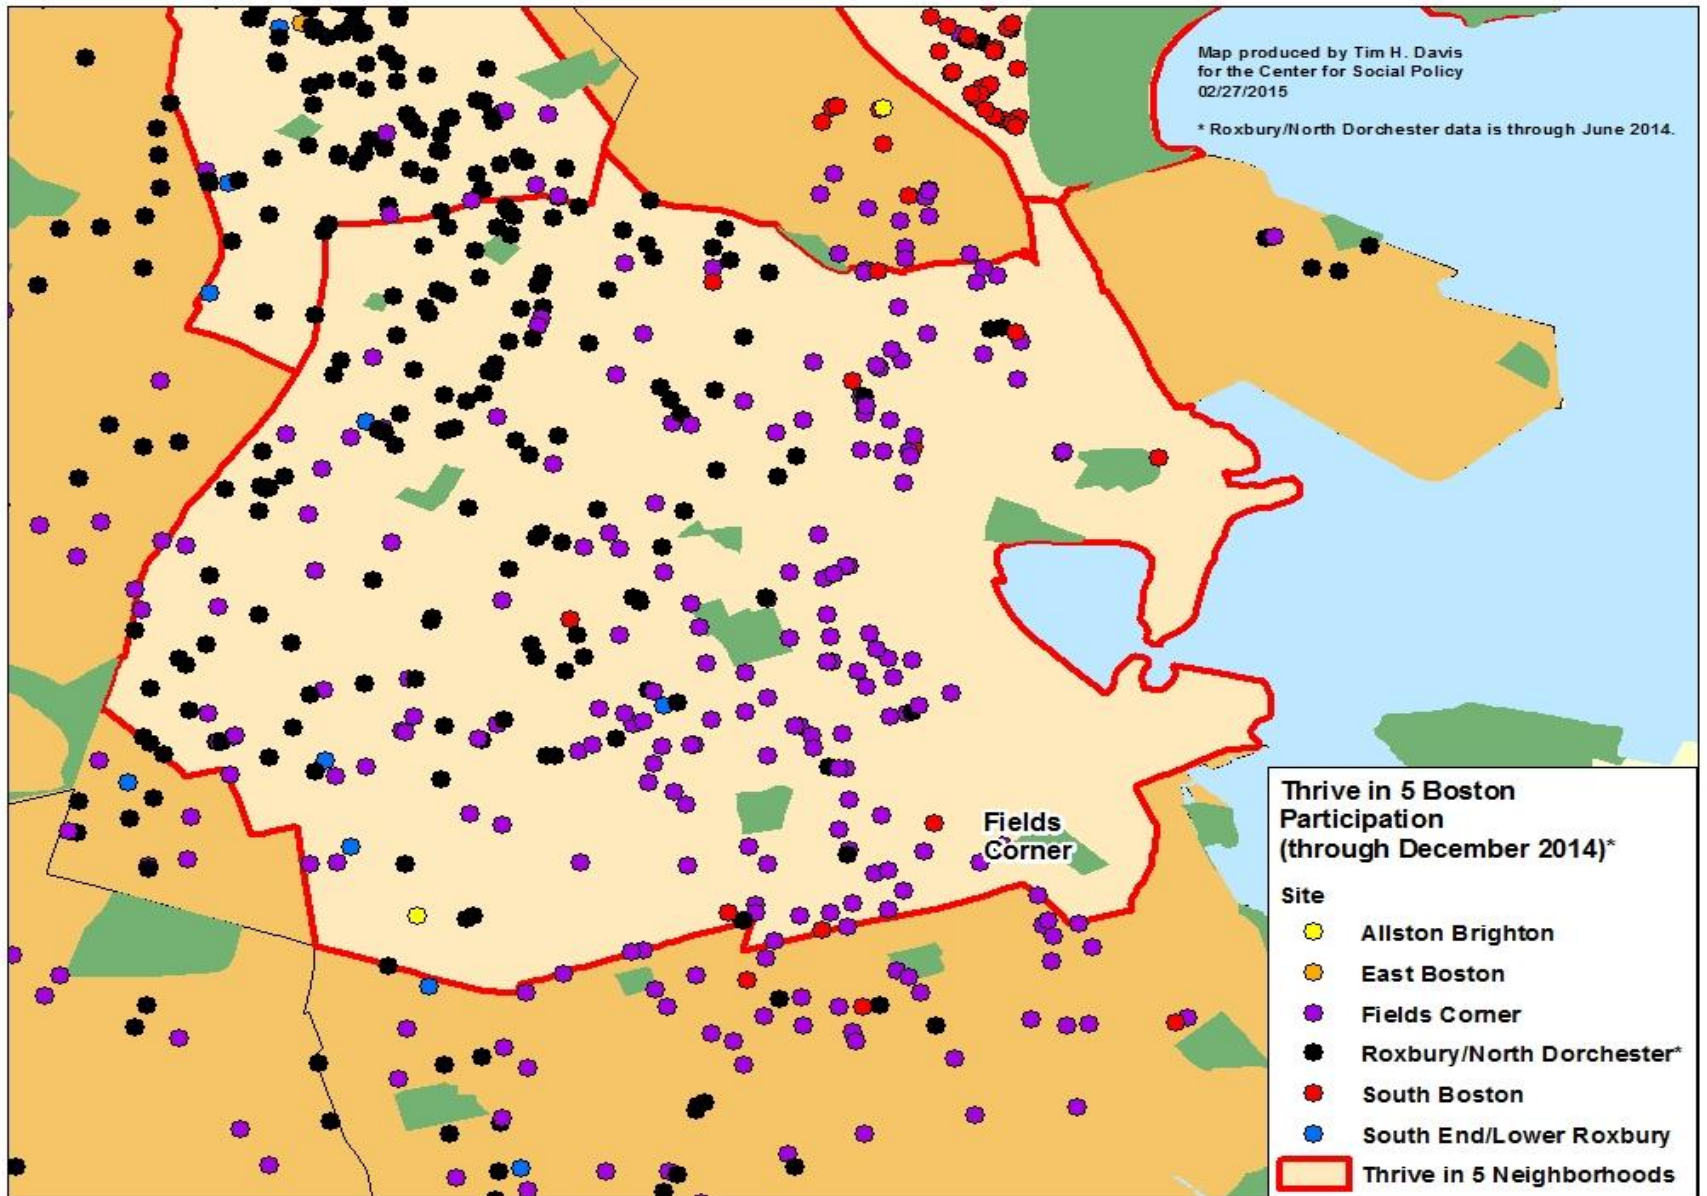

Note: The proportion of all attendees includes all unique attendances by adults. Over a period of time, families may attend multiple events.

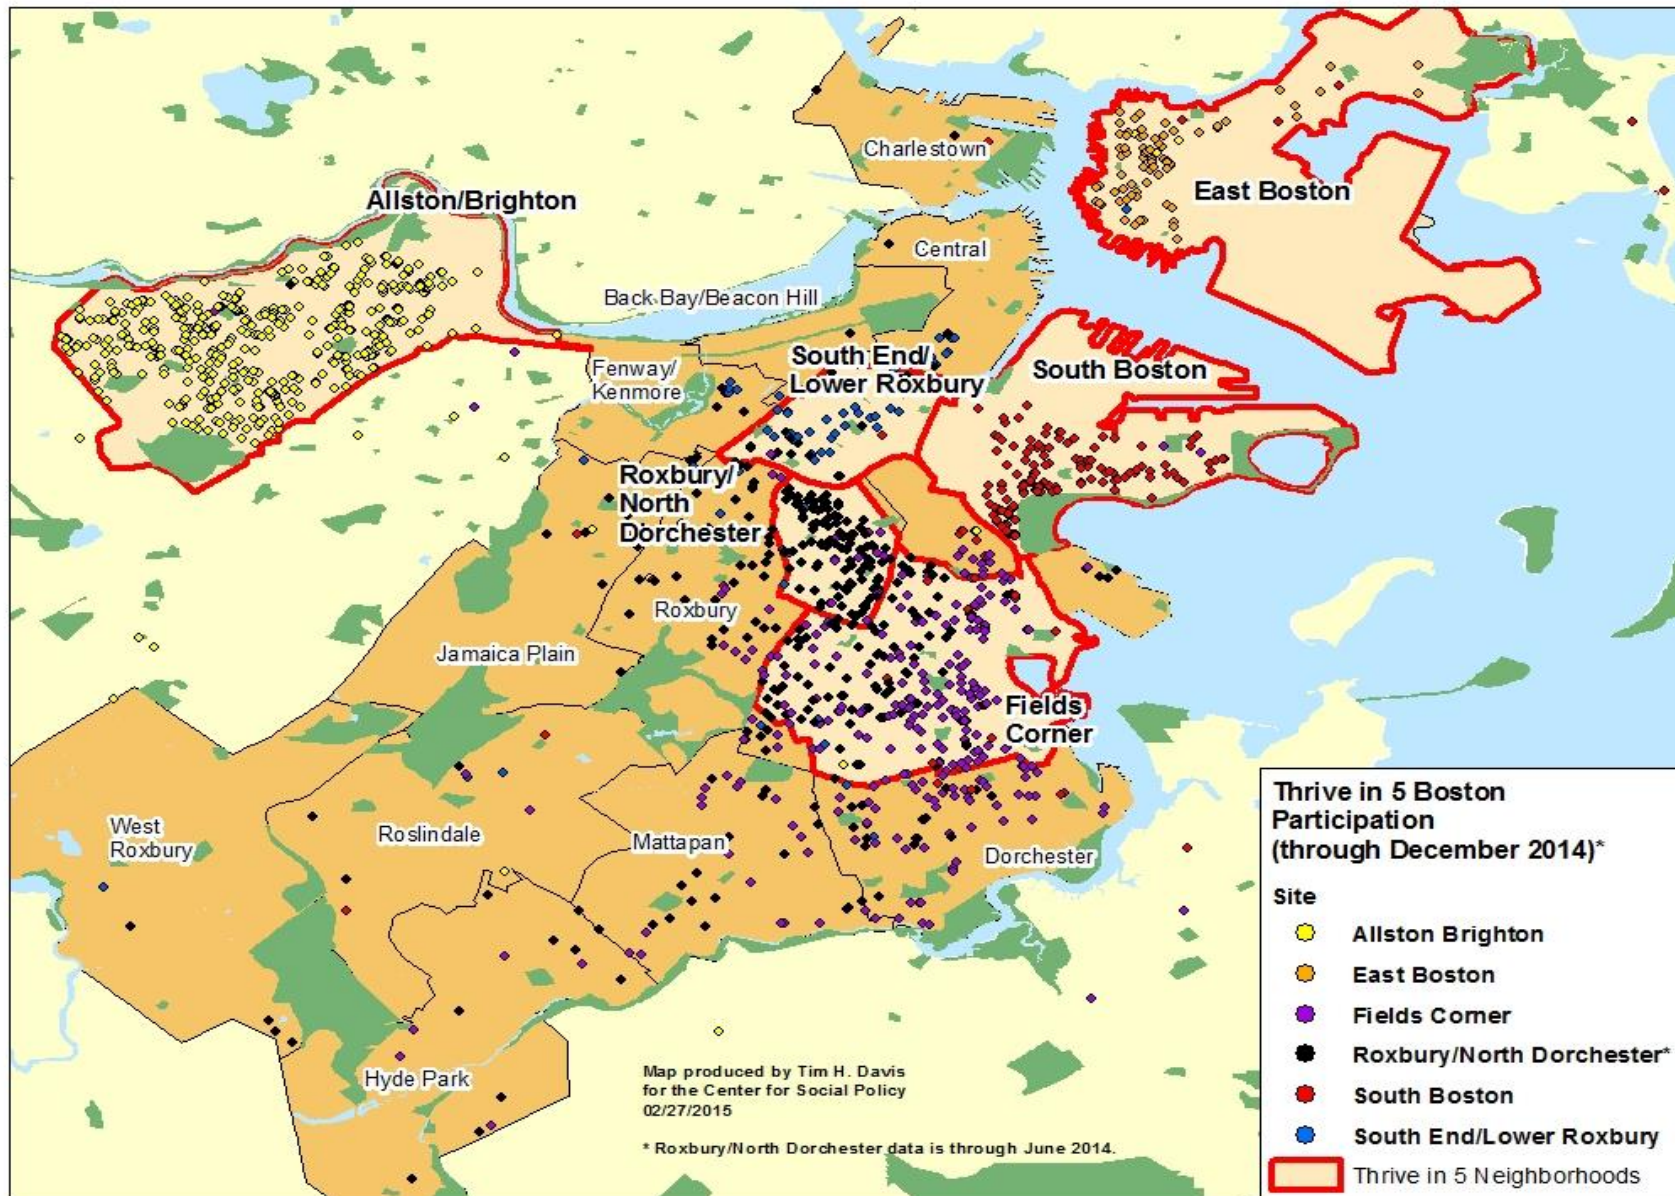

Participating DCT families are not confined to the Dudley neighborhood, demonstrating particular overlap with Fields Corner.

Total:	9165		

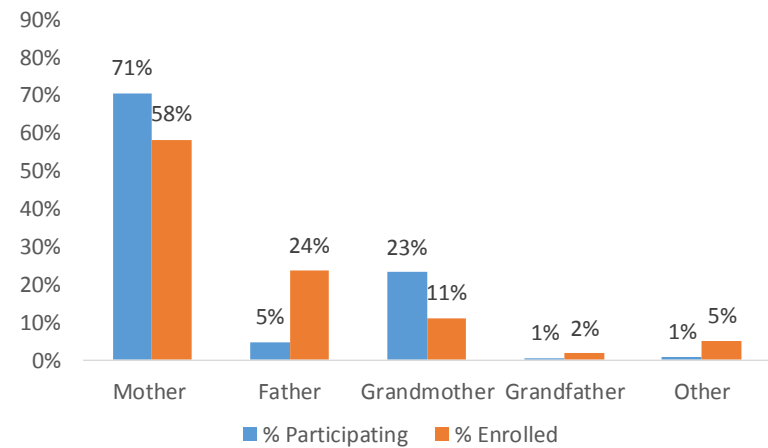

Spanish speaking families are participating at lower rates than enrollment, while Vietnamese families are participating at very high rates.

45% Of all participants do not speak English (foreign language only).

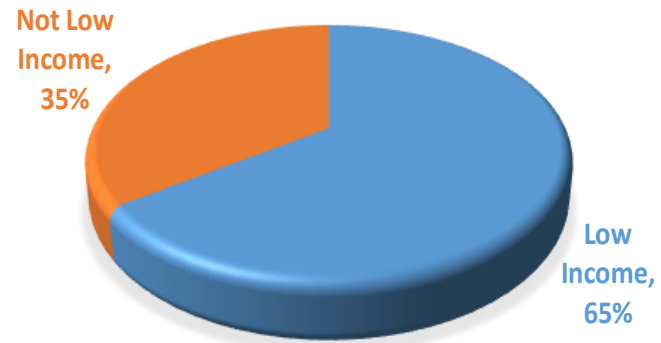

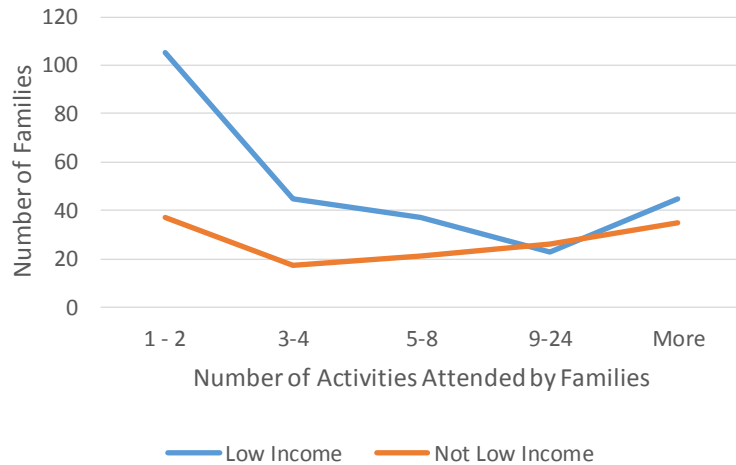

Note: Families may speak more than one language. Data includes all languages spoken by the family. (Only 50% of enrolling FCCT families answered information about language possibly skewing results)

Mothers are participating at greater rates compared with enrollment. And although there are a relatively large number of fathers enrolled, they participate less frequently. Grandmothers, on the other hand, are participating at double the enrolled numbers.

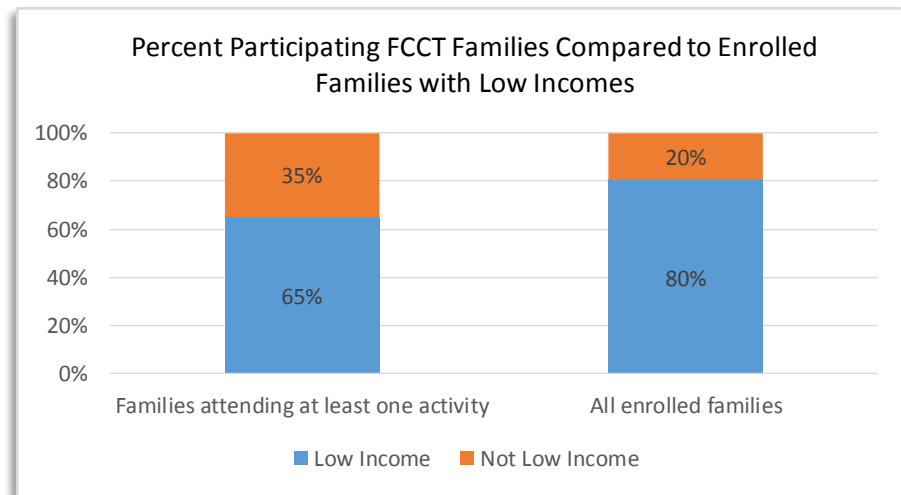

Relationship to Child of Participating Adult Compared to Enrollment Data

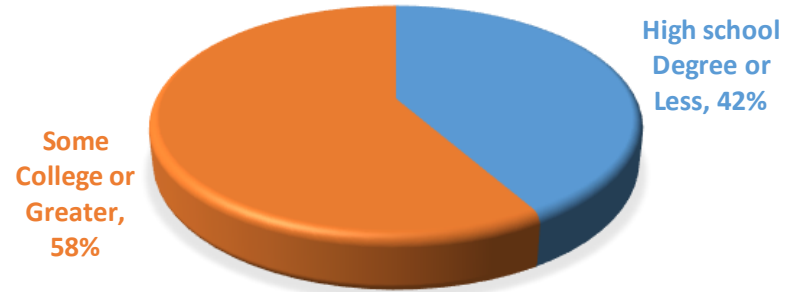

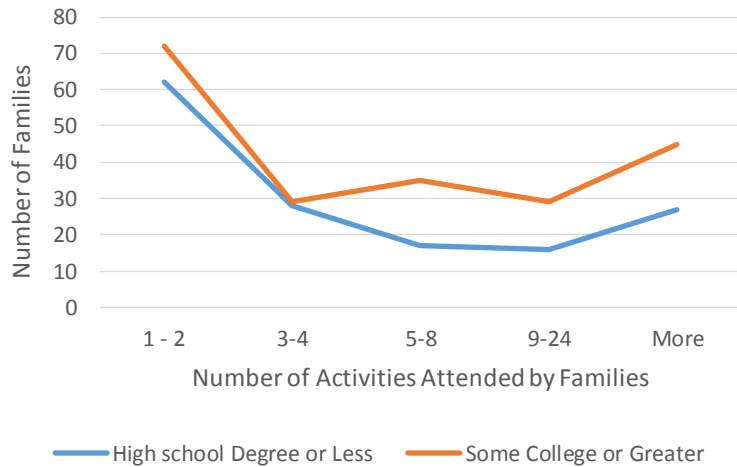

Participation Rates by Income

Low income families are participating at lower rates than all low income families enrolled in FCCT. Only 65% of families participating in activities are low income compared to 80% of enrolling families.

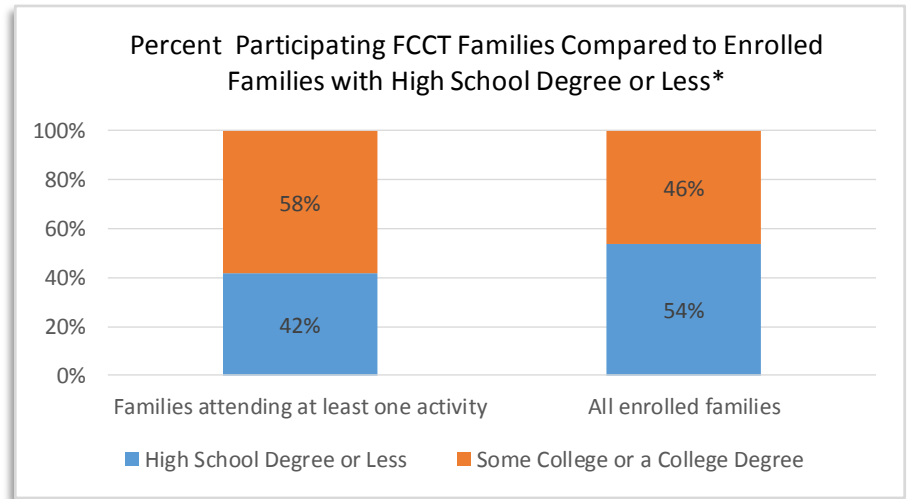

Participation Rates by Education

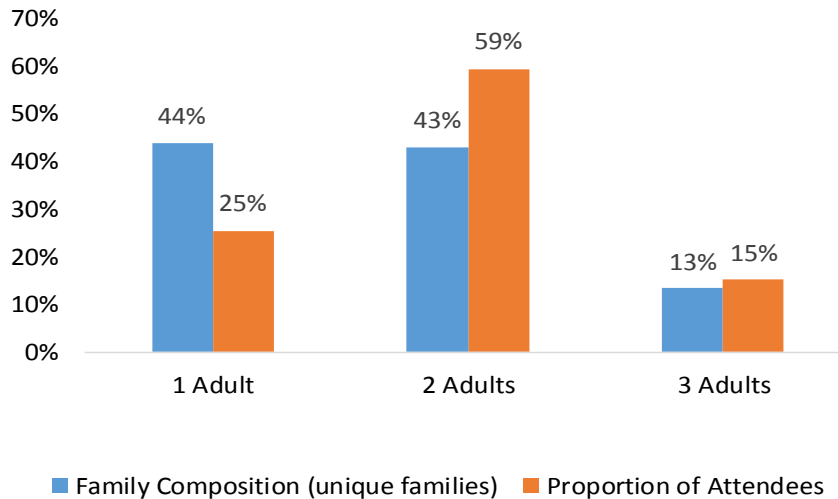

Participating families have a higher educational attainment than the educational attainment of enrolled families.

Note: Educational data is available for the enrolling adult only. Data was not available for all participants..

Family Composition of Participating Families

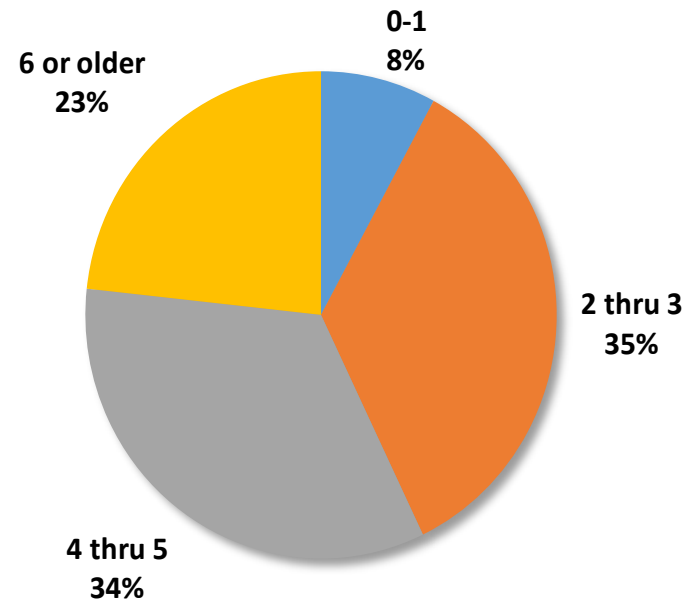

Participation by Family Composition

Adults from single-headed households and households with two adults comprised an equal number of the unique families that participated in at least one activity. However single headed families tended to participate less frequently than families with two adults (25% of all instances of attendance compared with 59%).

Note: The proportion of all attendees includes all unique attendances by adults. Over a period of time, families may attend multiple events.

2007-2012 American Community Survey Estimates. Families may speak more than one language. All languages are represented.

South Boston Enrolls a High Number of Low Income Families

BCT uses a proxy to measure income since data on income is not tracked at enrollment. Families are considered to be low income, if they receive one or more of the following subsidies: WIC, DTA, SNAP or SSI. Using this formula, 45% of enrolling families are low income.

45% of all enrolled families are living in poverty

44% of all enrolled children 0 though 5 are living in poverty

	Q1	Q2	Q3	Q4	Year	To Date	S. Boston Neighbor	Boston	Category of Measurement

The languages spoken in the families of participating adults roughly mirror languages spoken in the homes of all enrolled families.

24% Of all participants do not speak English (foreign language only).

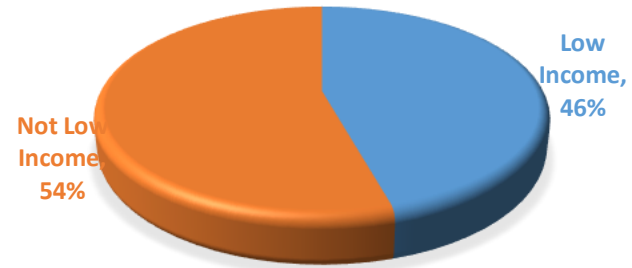

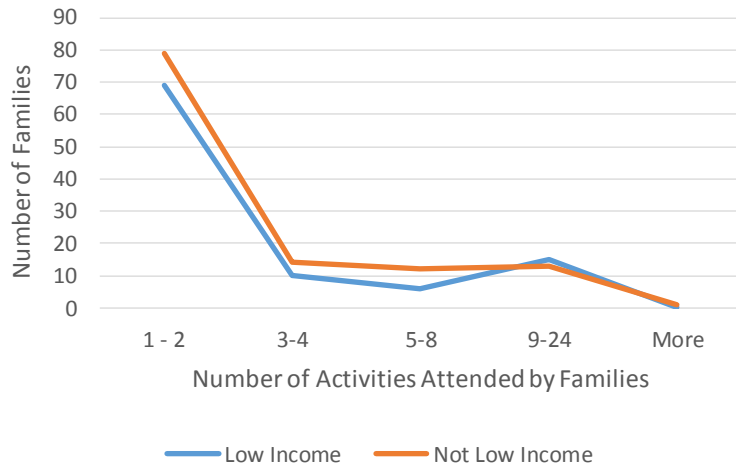

Note: Families may speak more than one language. Data includes all languages spoken by the family.

Mothers are participating at greater rates compared with the number of enrolled mothers. And although there are a relatively large number of fathers enrolled, they participate less frequently.

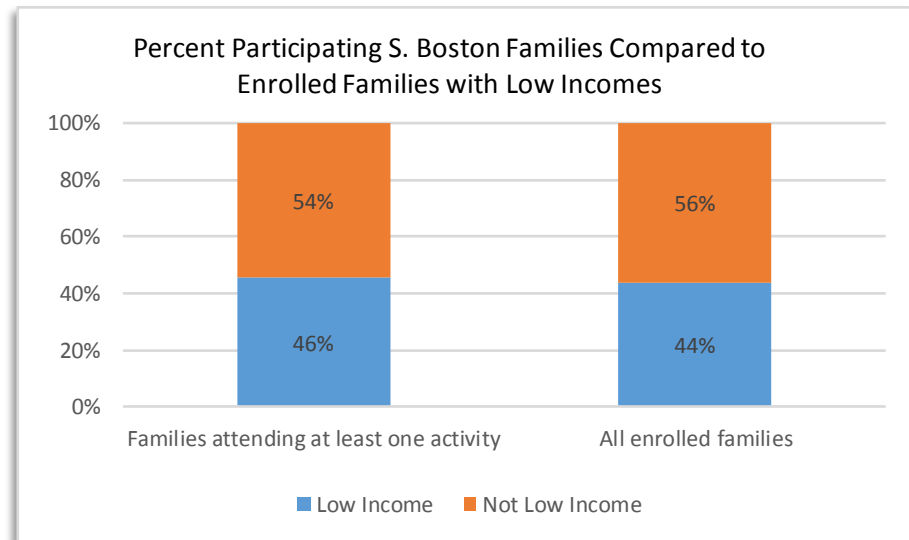

Relationship to Child of Participating Adult Compared to Enrollment Data

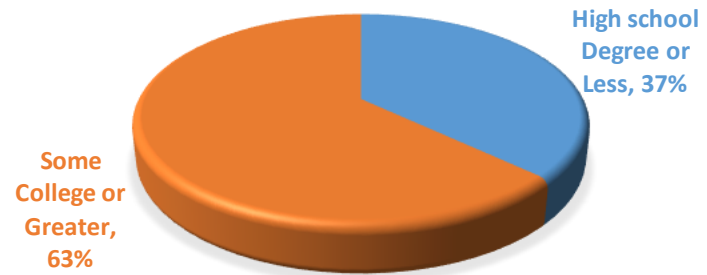

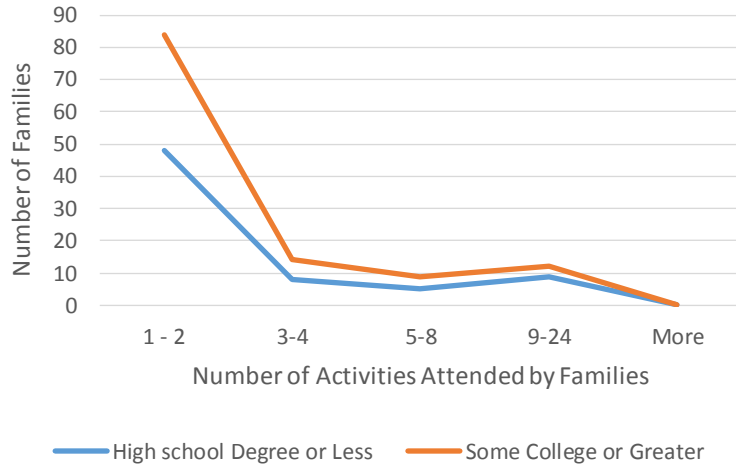

Participation Rates by Income

Low income families are participating at roughly the same rates as enrolled families who are low income (46% compared with 44%).

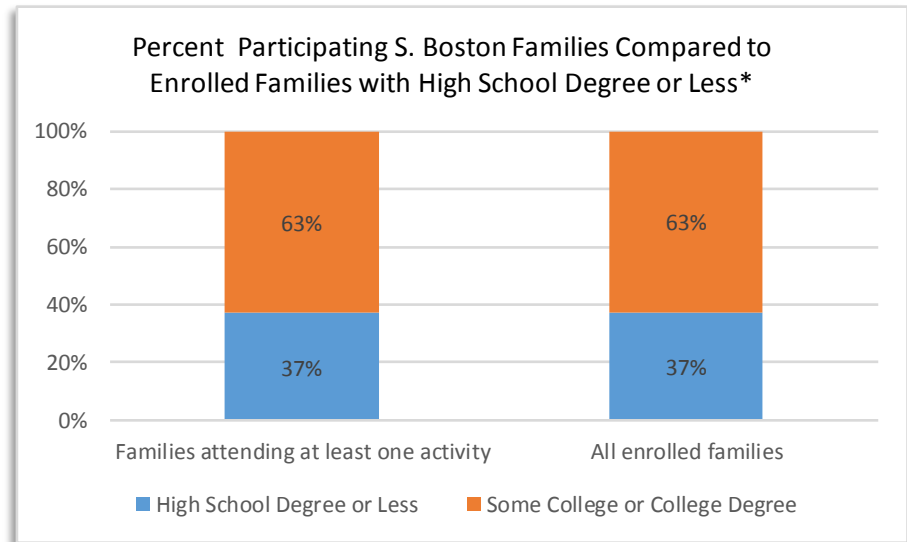

Participation Rates by Education

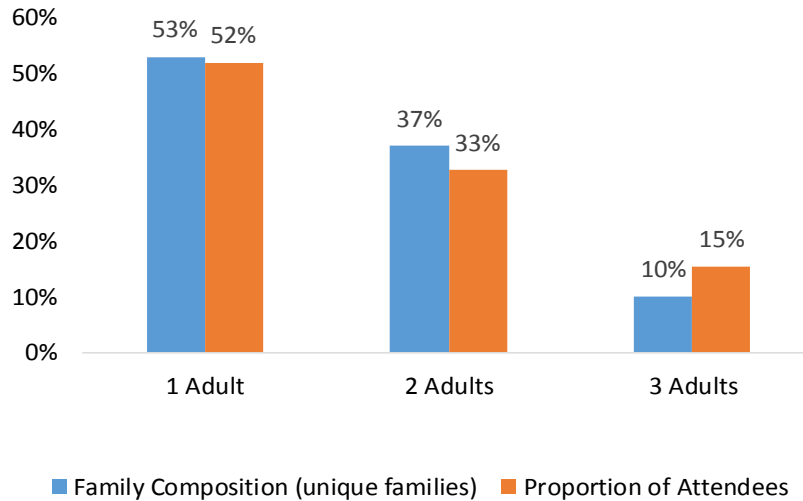

The educational attainment of the enrolling families mirrors the educational attainment of participating families.

Note: Educational data is available for the enrolling adult only. Data was not available for all participants..

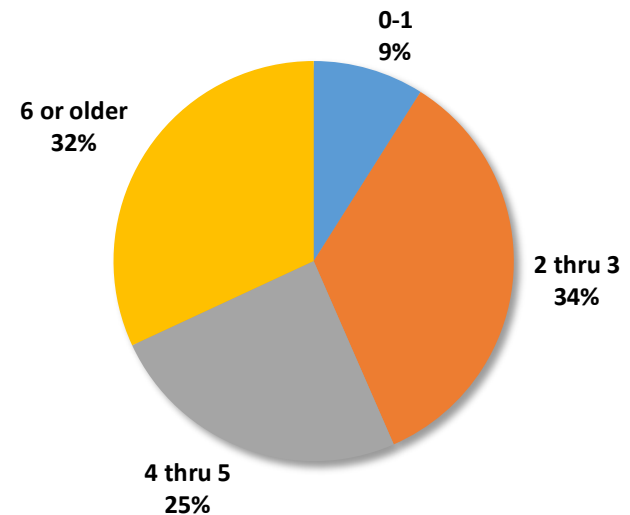

Family Composition of Participating Families

Participation by Family Composition

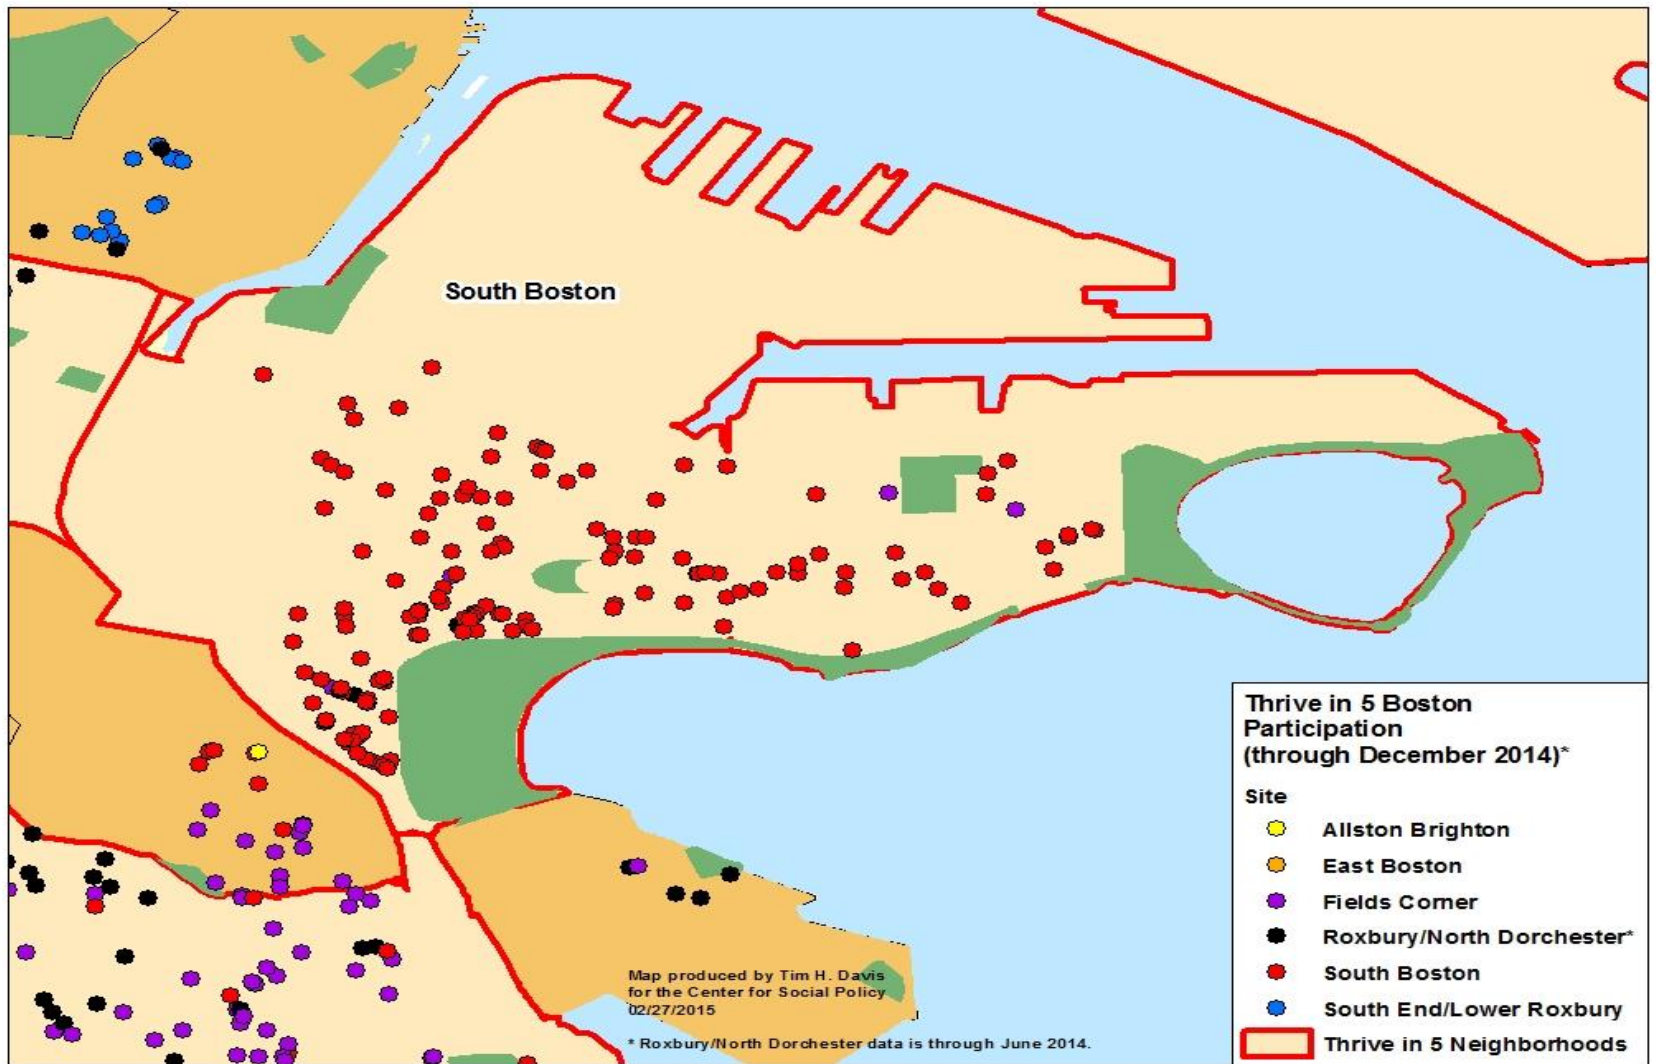

Age of Children in the Family at the Time of the Recorded Activity

Adults from single-headed households comprised the largest portion of unique families participating in activities mirroring the number of enrolled families with single-headed households.

Note: The proportion of all attendees includes all unique attendances by adults. Over a period of time, families may attend multiple events.

Participating South Boston families live primarily within the target neighborhood with limited overlap with other BCT neighborhoods.
