KEYWORDS: statistics, anxiety, perceptions

ABSTRACT

Students come in with either apprehension or a negative attitude towards statistics. Those who completed Year 12 tell us they already 'know' statistics. Many display varied degrees of maths anxiety. Irrespective of background, the majority struggle when faced with conducting analyses and interpreting results. What do the students really know and understand about statistics?

Proceedings of the Australian Conference on Science and Mathematics Education, Australian National University, Sept 19th to Sept 21st, 2013, page 75, ISBN Number 978-0-9871834-2-2.
