### SUMMARY

A partial "inventory" of Maine Agriculture in 1925 is herein presented in graphic and tabular form.

The more important items of this inventory are summarized in the following tables. For comparative purposes a summary of the 1910 and 1920 censuses is also given.

<sup>1</sup>The information contained in this bulletin is based upon the Federal Agricultural Census of 1925. It has been the practice of the Bureau of the Census to tabulate the results only by states and their counties. The Division of Markets of the Maine Department of Agriculture, recognizing the importance of having available census material by towns has secured at considerable expense, with some financial assistance from the Federal Land Bank of Springfield, Massachusetts, some of the more important agricultural census items for 1925 tabulated by towns (townships). The Maine Department of Agriculture and the Maine Agricultural Experiment Station have jointly contributed to the cost of publication. The text of this bulletin was prepared by Charles H. Merchant, but the maps are the joint work of the author and John L. Babson, Jr.

## INTRODUCTION

The agricultural census of 1925 was taken in accordance with the Federal Act of March 3, 1919. The Bureau of the Census employed the same methods of enumeration for this agricultural census as it used in decennial censuses; that is, the figures are the results of tabulation of the information secured from farm operators by census enumerators who made a personal canvass of the individual farms.

The agricultural census of 1925 relates to January 1 of that year and the crop year of 1924.

The smallest geographical unit for which tabulations were made by the Bureau of the Census has been the county. For many purposes tabulations by towns are extremely valuable to agricultural workers in directing their efforts in solving agricultural problems.

## PURPOSE

The purpose of this bulletin is to present an "inventory" of the agriculture of Maine in more detail than is possible when the county is used as a unit. Since the tabulation of the census material was secured for only the more important items by towns this "inventory" must necessarily be incomplete. There has been no attempt made to interpret these data, due to their fragmentary nature and to the fact that no other censuses are available by towns for comparative purposes.

It is hoped that the information contained in this publication will be of value to agricultural workers of the state and all others who are interested in the agriculture of Maine.

### USE OF LAND

The 1925 agricultural census classified as farms all areas used for agricultural purposes which contained 3 or more acres of land or which produced at least \$250 worth of farm products.

Figure 4 is a key map of Maine showing the geographical location of the towns in the state. Single cross-hatched areas represent the forest areas not classified as farm land. The use of "land in farms" for the New England states is shown in Figure 5, and "land in farms" for the counties of Maine is shown in Figure 6.

NUMBER AND SIZE OF FARMS

According to the 1925 census there were 50,033 farms in Maine. In Figure 7 is shown the distribution of these farms by towns.

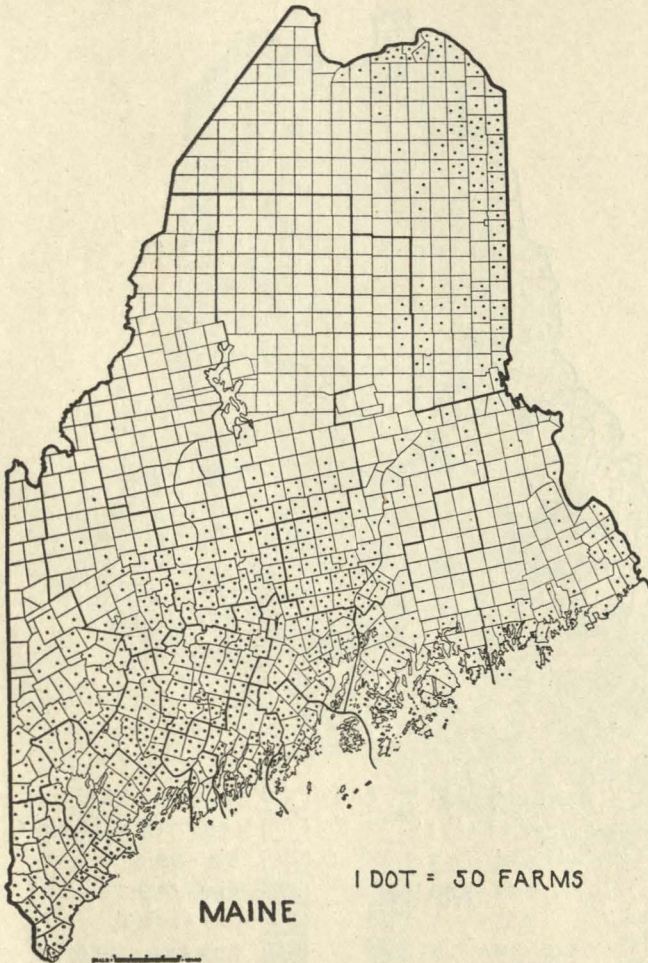

FIG. 7. Distribution of farms in 1925.

In Figure 8 is shown the average number of acres per farm in each town in 1925. The largest farms were found in or near the forest areas of the state. Much of the land in these farms was in woods and pasture.

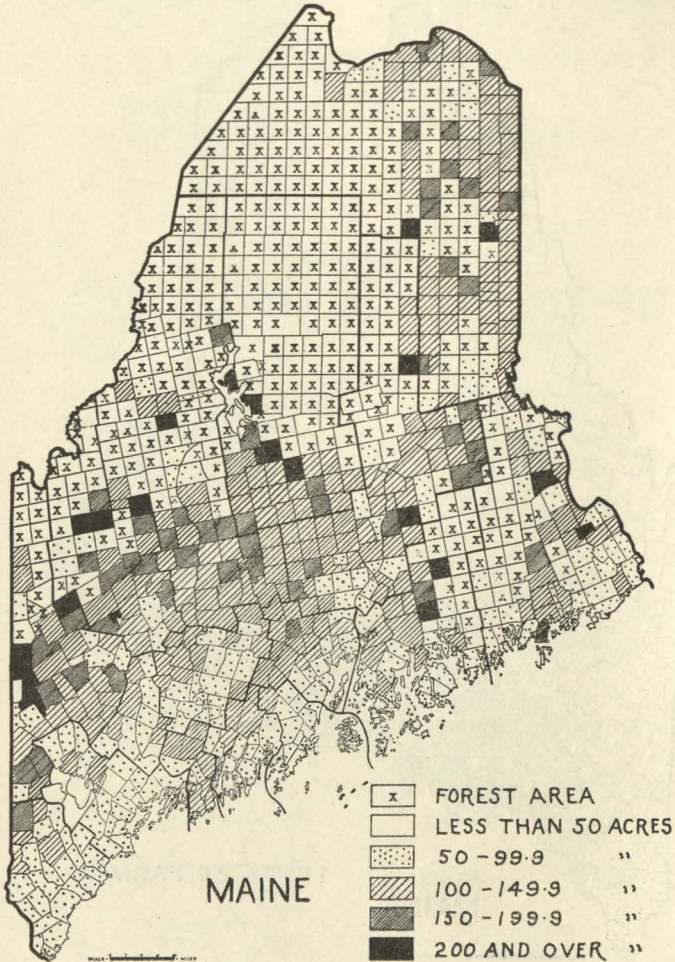

FIG. 8. Average number of acres per farm in 1925.

In Figure 9 it is shown that the largest acreage of crops per farm was found in Aroostook County. The large acreage of crops per farm in the towns of Meddybemps, Washington County, and Summit Plantation, Penobscot County, was due to a few large farms in these towns.

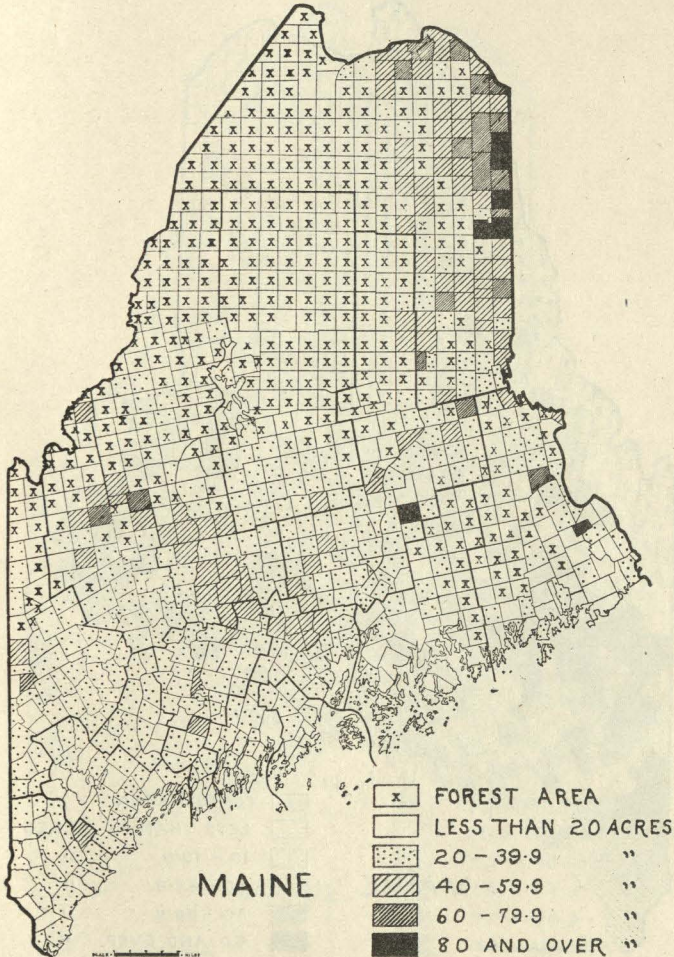

FIG. 9. Average number of acres of crops per farm in 1924.

## VALUE OF LAND AND BUILDINGS ON FARMS

The total value of all farm property on January 1, 1925 as given by the Census was \$245,868,440, or an average value of \$4914 per farm. The value of land and buildings represents 80.2 per cent, implements and machinery, 10 per cent, and livestock on farms, 9.8 per cent, of the total value.

In Figure 12 is shown the average value of land and buildings per farm per farm. Most of the higher priced farms were found in Aroostook County.

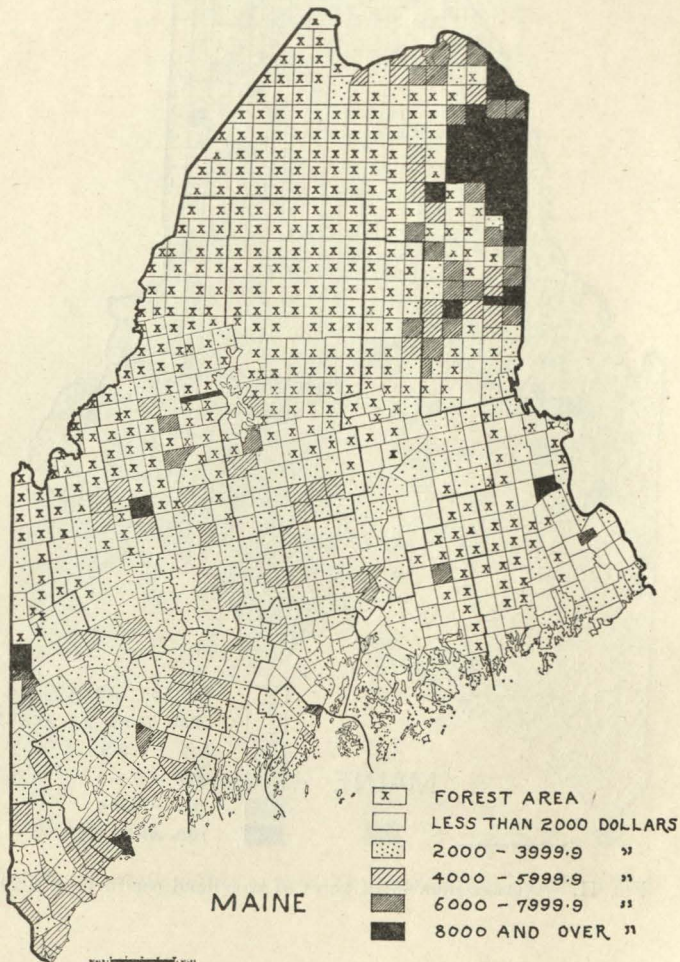

FIG. 12. Average value of land and buildings per farm in 1925.

## FARM EXPENDITURES

According to the 1925 census there was a total expenditure of \$11,907,509 for feed reported by 37,257 farmers; \$7,095,555 for fertilizer by 25,437 farmers, and \$6,903,791 for farm labor by 23,641 farmers. The expenditures for these three items give a good indication of the size of the farm businesses.

In Figure 13 it is shown that feed expenditures (37,257 farmers reporting) were highest where dairy and poultry were most important.

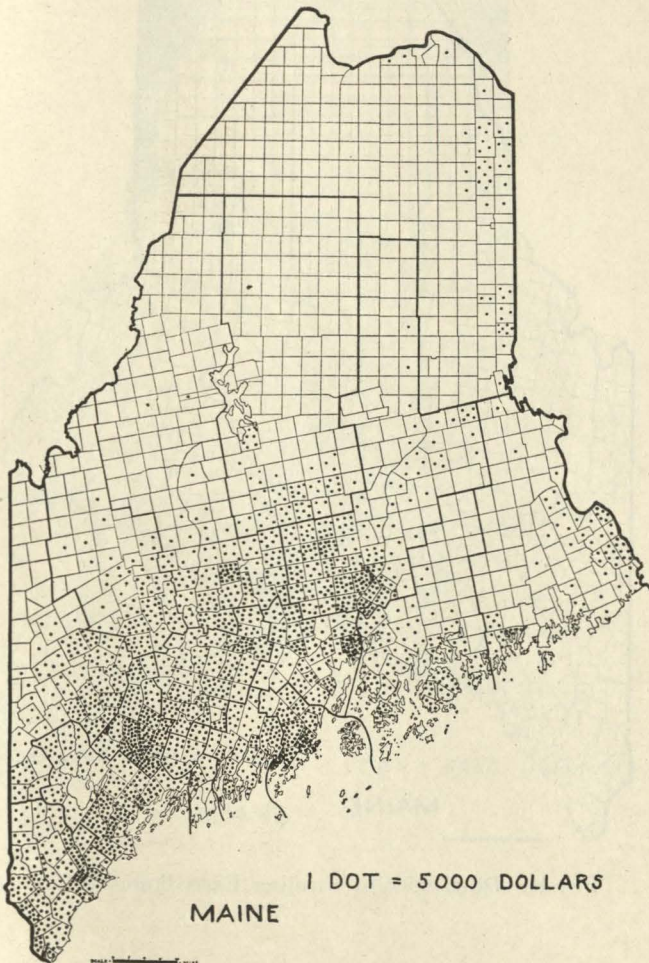

FIG. 13. Distribution of Feed Expenditures in 1924.

In Figure 14 is shown the distribution of fertilizer expenditures (25,437 farmers reporting) for each of the towns in 1924. This map corresponds very closely to the one showing acreage of potatoes.

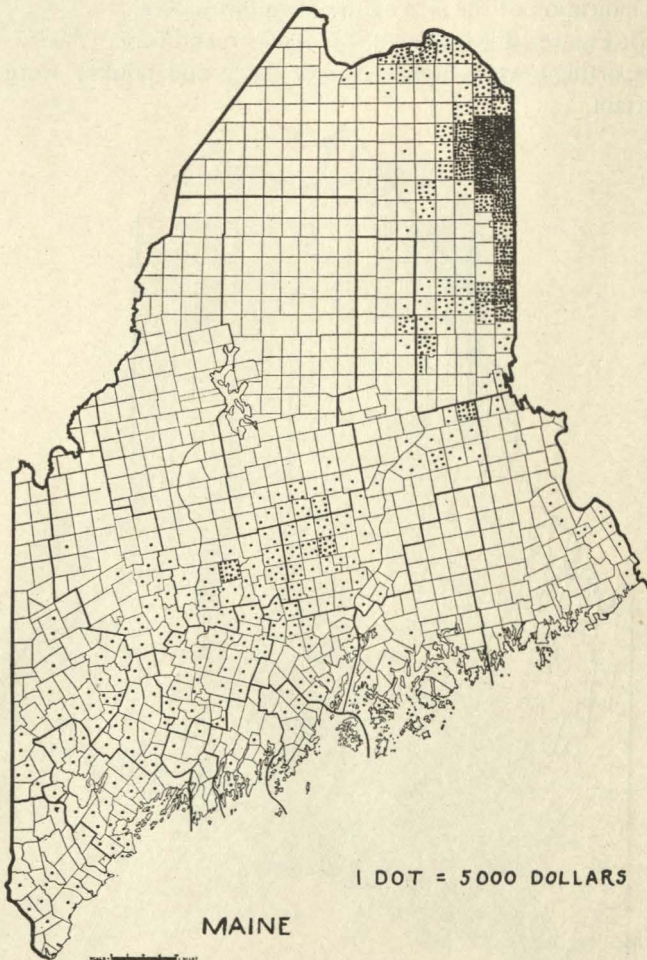

FIG. 14. Distribution of Fertilizer Expenditures in 1924.

In Figure 15 it is shown that the labor expenditures (23,641 farmers reporting) were the highest in the towns of Aroostook County having the largest acreage of potatoes.

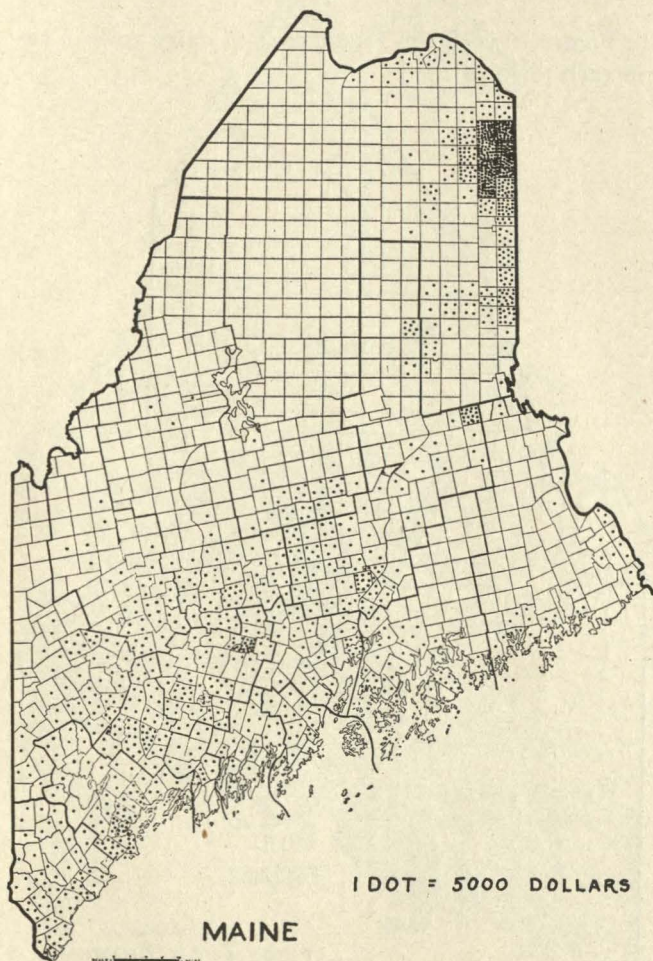

FIG. 15. Distribution of Labor Costs in 1924.

## LIVESTOCK

The number and distribution of the more important classes of livestock were treated separately by use of dot and cross-hatched maps.

## Cows

In Figure 16 is shown the number of dairy cows 2 years and over in each town in 1925.

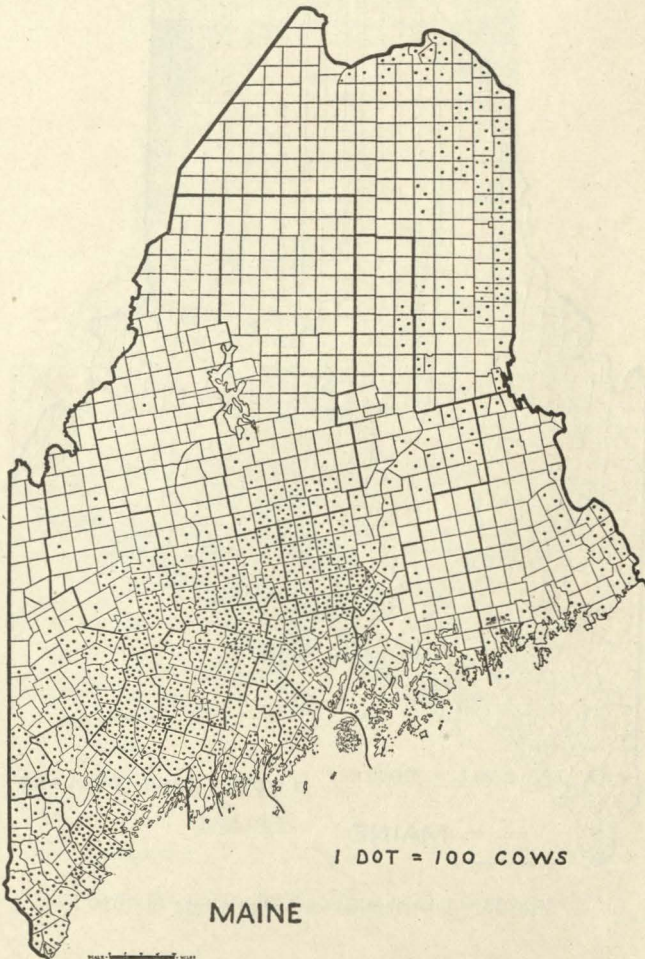

FIG. 16. Distribution of Dairy Cows in 1925.

In Figure 17 it is shown that the largest number of cows per farm was found around cities and in areas of good pasture which were not too distant from market.

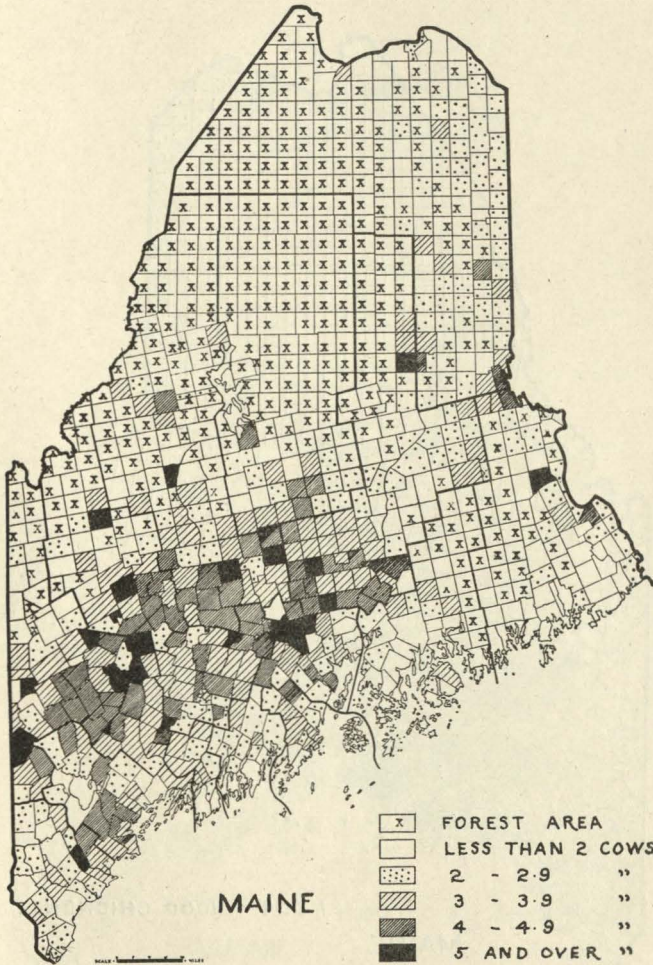

FIG. 17. Average number of Dairy Cows 2 years old and over per farm in 1925.

## CHICKENS

In Figure 18 is shown the number and distribution of chickens on farms in 1925.

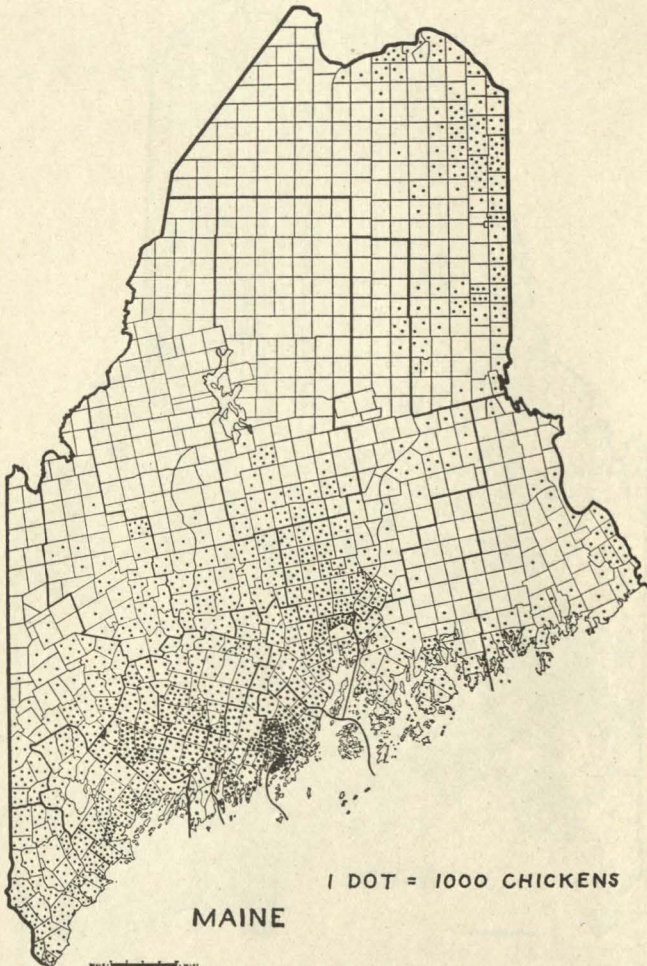

FIG. 18. Distribution of Chickens in 1925.

SHEEP

In Figure 19 it is shown that sheep were most important in Northern Aroostook and in the Central part of the state in 1925.

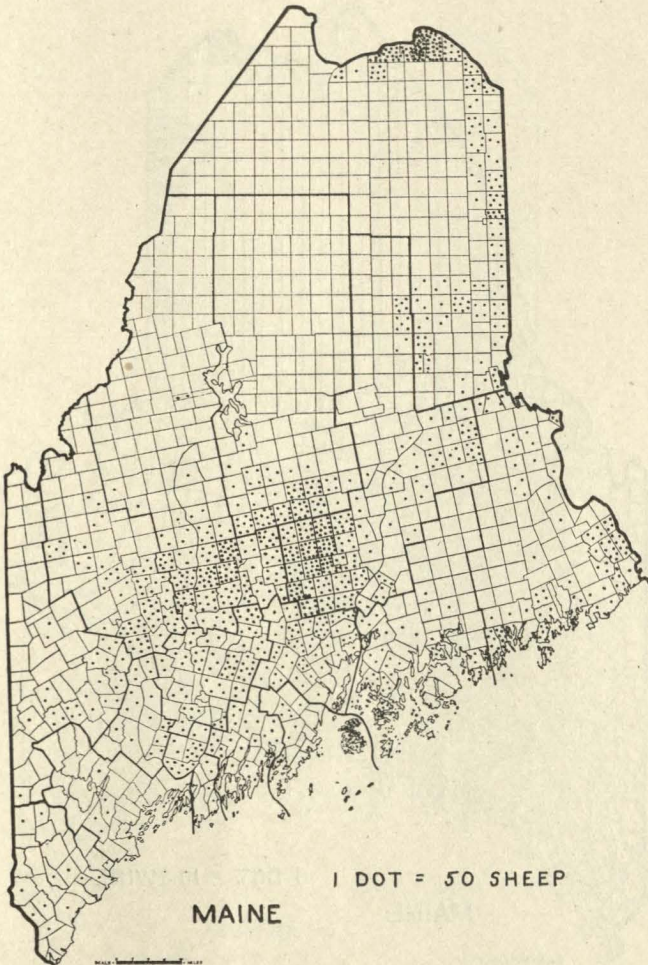

FIG. 19. Distribution of Sheep (Ewes and Rams) in 1925.

## SWINE

In Figure 20 is shown the number and distribution of swine in each town of Maine in 1925.

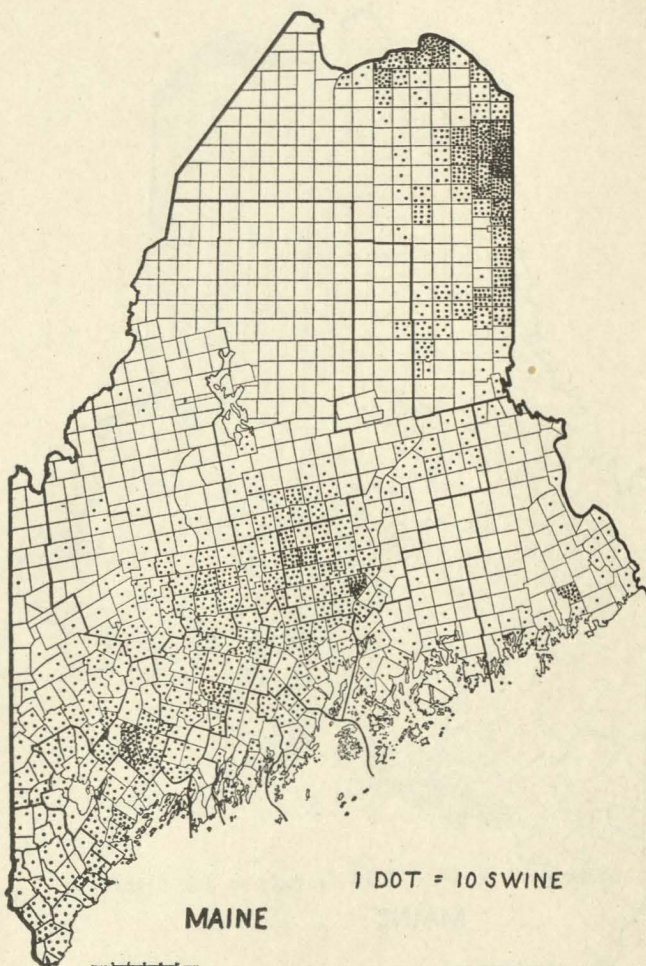

FIG. 20. Distribution of Swine in 1925.

APPLE INDUSTRY

In Figure 21 it is shown that the bearing apple trees were concentrated in a few towns in 1925.

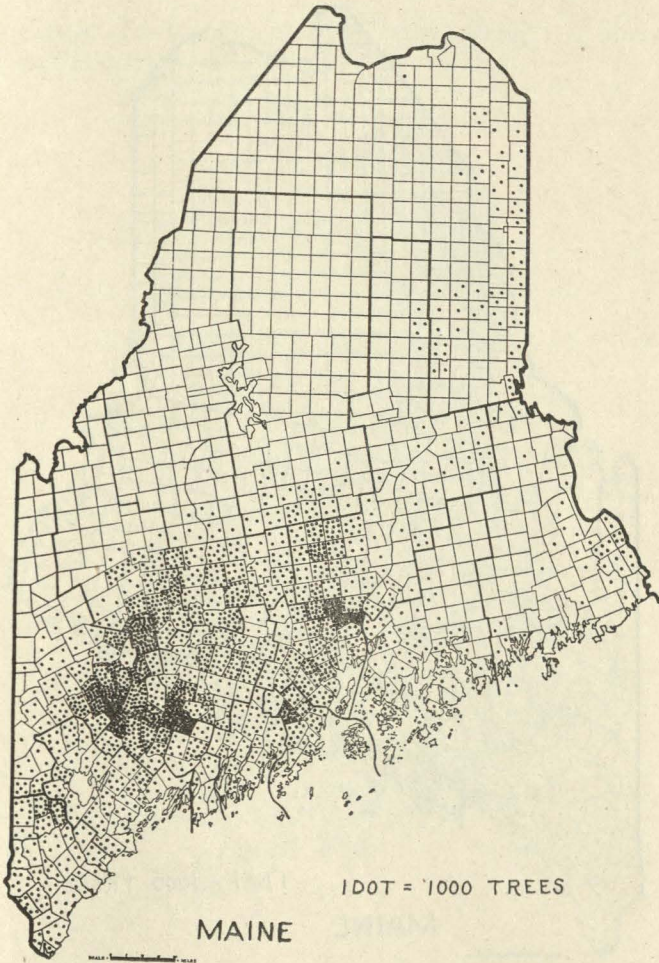

FIG. 21. Distribution of Bearing Apple Trees in 1925.

The town of Winterport, in Waldo County, had the largest number of non-bearing trees in 1925, as shown by Figure 22.

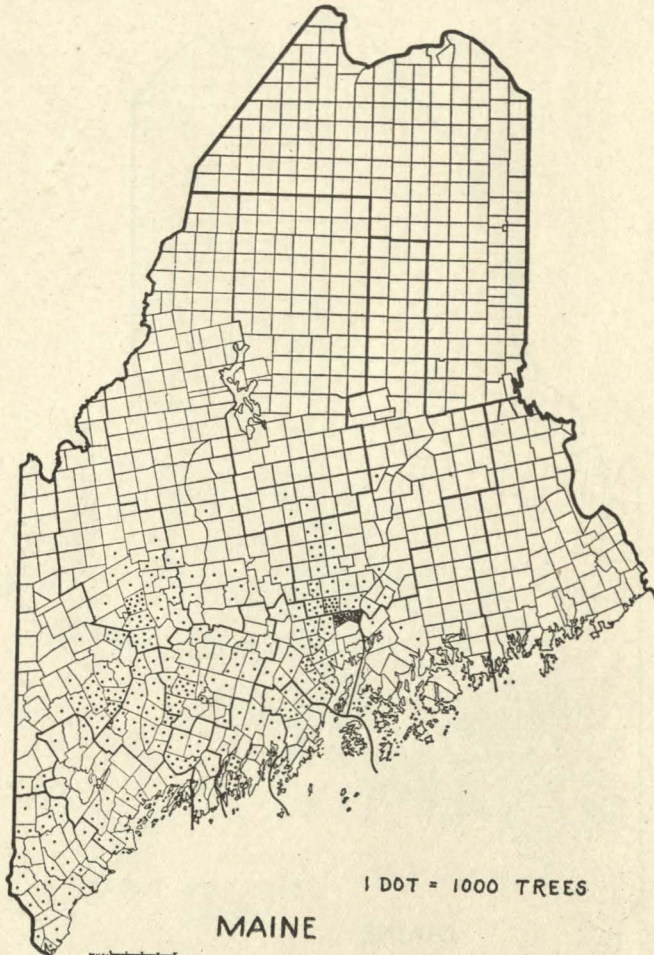

FIG. 22. Distribution of Non-bearing Apple Trees in 1925.

FIELD CROPS

The distribution of the more important field crops was treated individually by use of dot maps.

POTATOES

In Figure 23 it is shown that the largest acreages of potatoes were found in certain towns of Aroostook County.

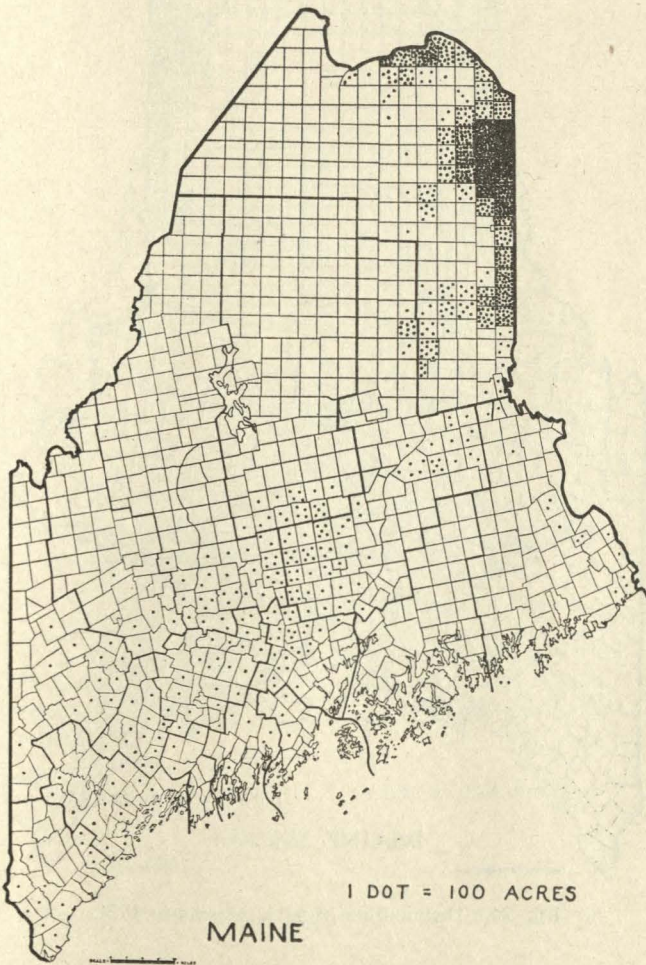

FIG. 23. Distribution of Potato acreage in 1924.

In Figure 24 it is shown that there was a comparatively heavy concentration of acres of oats in certain towns of Aroostook County. This map is very similar to the one showing acreage of potatoes.

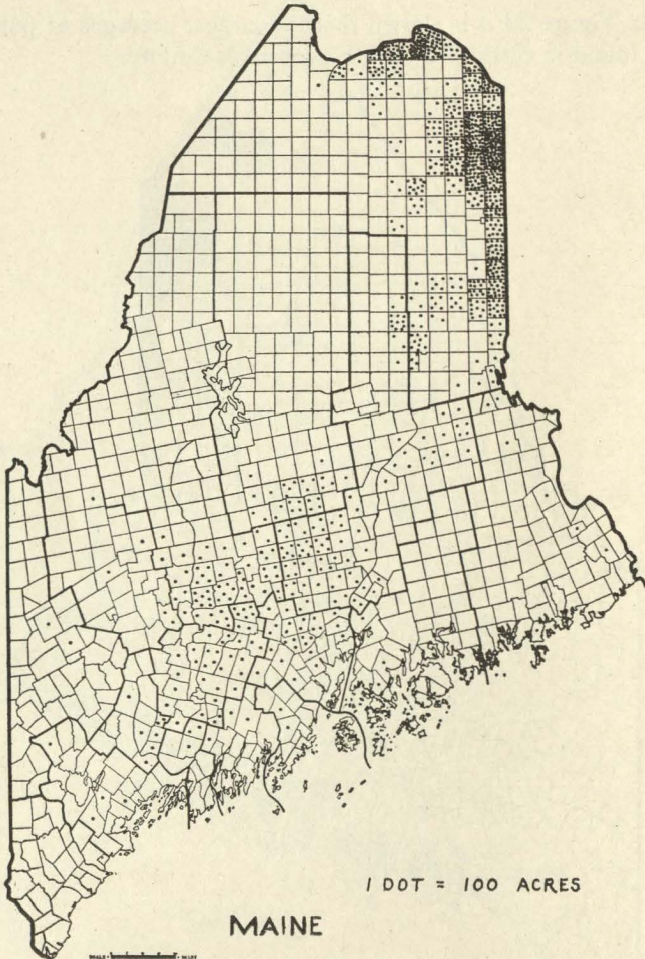

FIG. 24. Distribution of acres of oats in 1924.

In Figure 25 is shown the total production of all hays (tons) in each town in 1924.

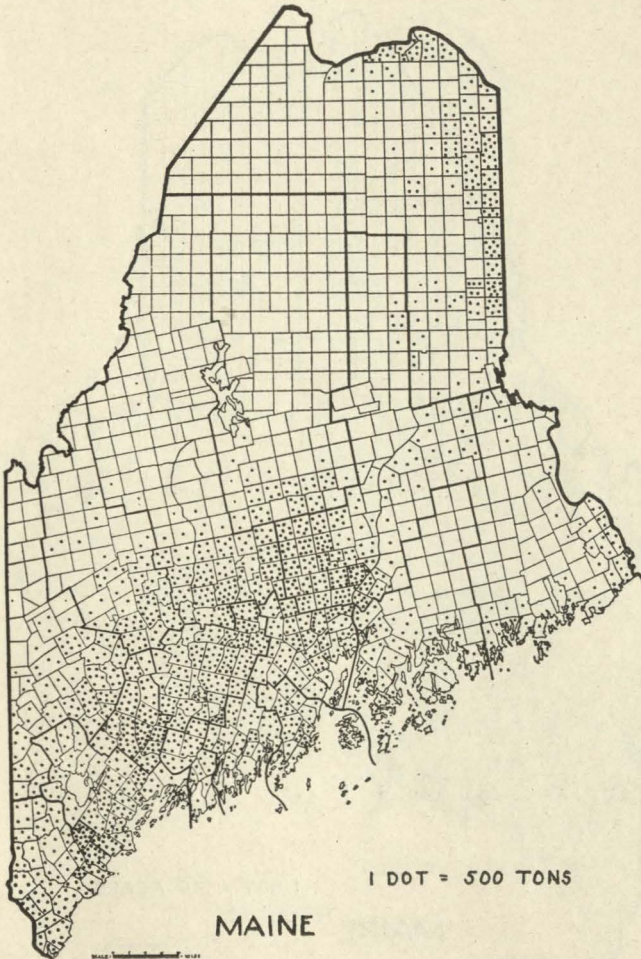

FIG. 25. Distribution of hay production (tons) in 1924.

In Figure 26 it is shown that sweet corn growing was centered about certain favorable areas.

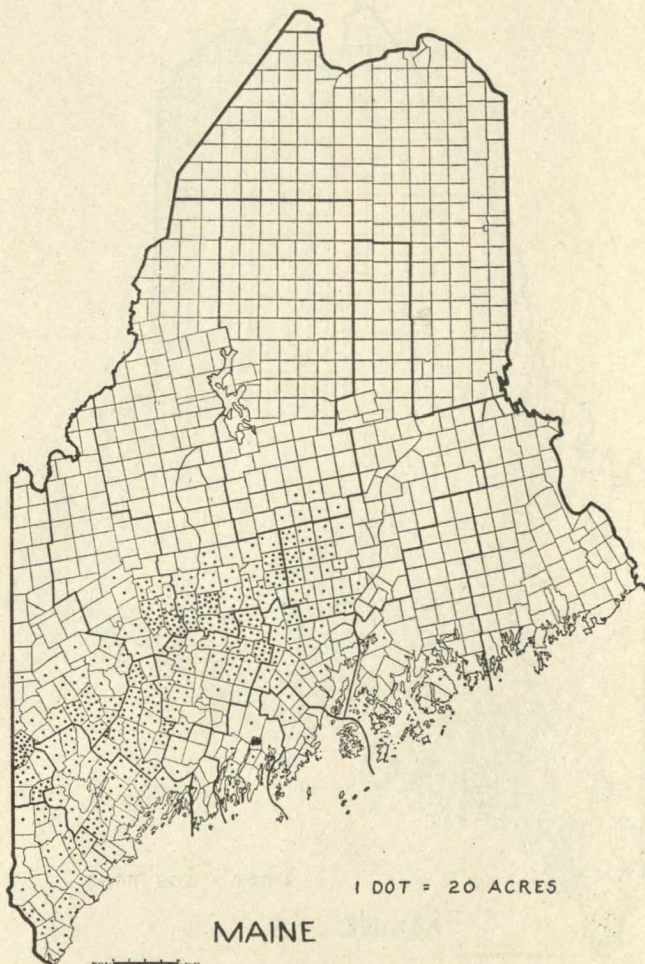

FIG. 26. Distribution of sweet corn acreage in 1924.

In Figure 27 is shown the distribution of silage corn acreage in each town in Maine in 1924.

## DEFINITIONS

The following definitions are taken from the report of the Bureau of the Census. These definitions will serve as an aid in the interpretation of the following tables.

## DEFINITIONS FOR TABLE 1

*The farm*—The farm is all land which is directly farmed by one person either by his own labor alone, or with the assistance of members of his household or hired employees. The farm, according to the census, also must have the following characteristics: (1) A tract of land containing 3 or more acres used for agricultural purposes. (2) Or if it contains less than three acres must have produced at least \$250 worth of farm products in 1924.

*Farm land*—All land in farms includes considerable acres of land not actually under cultivation and some not even used for pasture, since each farmer was asked to report as a unit all the land under his control which he thought of as part of his farm: Isolated tracts of timber-land and other areas not connected with the farm were not included.

*Land in crops harvested in 1924*—Land in crops harvested comprises all land from which cultivated crops were harvested, all land from which hay was cut including wild hay, and all land in gardens, orchards, and vineyards. A given acreage was counted but once, even though two or more crops were harvested from it in 1924.

*Idle or fallow land*—Idle or fallow land comprises land which was lying idle all of 1924 or which was in cultivated summer fallow.

*Plowable pasture*—Plowable pasture comprises land used only for pasture in 1924 which could be plowed and used for crops without clearing or draining.

*Woodland pasture*—Woodland pasture comprises woodland used for pasture at any time during 1924.

*Woodland not used for pasture*—Woodland not used for pasture comprises all farm wood lots, natural or planted, and cut over land with no growth. It excludes land covered with woody shrubs.

*Total value of land and buildings*—Total value of land and buildings comprises the amount the farm would sell for under

normal conditions not at forced sale. "The value of land and buildings" represents the total value of farm real estate.

*The value of land*—The value of land was obtained by subtracting the value of buildings from the value of land and buildings together.

*Value of implements and machinery*—The value of implements and machinery comprises the amount for which farm implements and machinery would sell for under normal conditions, not at forced sale.

#### DEFINITIONS FOR TABLE 2

*Dairy cows 2 years old and over*—Dairy cows 2 years old and over includes all cows and heifers 2 years old and over.

*Number of cows milked*—The number of cows milked includes the number of cows milked during all or part of the year 1924. (A few beef cows milked were doubtless included.)

*Milk produced*—The milk produced represents the total production of milk, including estimates for the incomplete reports.

*Wool produced*—Figures for wool production represent the total production including estimates for the incomplete reports.

#### DEFINITIONS FOR TABLE 3

*Total acres of corn*—Total acres of corn comprises the total acreage of corn for all purposes exclusive of sweet corn acreage.

#### DEFINITIONS FOR TABLE 4

*Kind of road*—Under this heading the farms are classified according to the answer to the following question: "What kind of road adjoins the farm?"

*Cooperative marketing*—Two items are shown under this heading; namely, the value of farm products sold to or through farmers' marketing organizations in 1924, and the value of all farm supplies purchased from or through farmers' organizations in 1924.

## DEFINITIONS FOR TABLE 5

*Farm expenditures*—Farm expenditures comprise amounts expended by farmers during the year 1924.

*Feed*: Such as hay, grain, mill feed, and other products as feed for domestic animals and poultry.

*Fertilizer*: Includes commercial fertilizers of all analyses, manure, lime, and limestone.

*Farm labor*: Includes expenditures for money wages paid for all farm labor exclusive of house work and value of rent and board furnished.

*Lumber*: Comprises all expenditures for timber, wooden posts, poles, and firewood for farm use.
