Millions Are Preparing for Another "SUMMER IN MAINE"

SEE MAINE THIS SUMMER

All barometers at our disposal are forecasting a summer tourist season which could surpass all previous records. Advanced reservations and inquiries are far greater than they ever have been.

It's a shame that while so many out-of-staters are planning to summer in Maine, many of our own citizens still aren't thoroughly familiar with our State's summer attractions.

To tempt you to "see YOUR Maine" this summer, we've enclosed a selection of summer scenic and activity photos which you should recognize immediately. If one is unfamiliar to you, see it or do it this summer, won't vou?

A calendar of some of the summer activities is also enclosed for your convenience. A more detailed calendar is available from the Maine Publicity Bureau.

FAREWELL AND HELLO

Quite likely you've never seen a Maine Developments issue as elaborate as this one.

In years to come it may become a collector's item, worth many times the cost of subscription, since it is the last issue of Maine Developments which will come off the press - ever.

The DED has published Maine Developments on a more or less monthly basis since December, 1961 as a four-page promotional piece to acquaint out of staters with the golden opportunities for business and industrial profitmaking here, and to entice vacationers to partake of the unequalled recreational advantages offered by Maine. We believe that Mainers, themselves, have gained a better appreciation of their good fortune in living in the blessed state.

The subscription list has reached something over 5000 copies. From 200 to 500 extra copies of some issues have been presented, without cost, to companies whose operations have been featured, for their promotional use.

It well may be that some subscribers will be moan the passing of Maine Developments.

But be ye not dismayed.

For whilst with one hand the DED taketh away, it giveth with the other.

Even as the final issue of Maine Developments goes to press the DED staff labors to bring forth a new and better publication to be called Maine. Just Maine.

In magazine format, *Maine* will consist of 16 pages profusely illustrated, with a liberal use of color, and generously endowed with Maine articles, many of them bylined by well-known practitioners of the arts, sciences, industries, education and historical and recreational fields.

Maine will be published quarterly and it will endeavor to record something of the glories of the four seasons of Maine. The first issue is scheduled for publication in July of this year.

In closing out Maine Developments the editor wishes to express his gratitude, and that of DED, to the many who have so generously contributed information, pictures and suggestions which have made its publication possible. We hope sincerely that Maine may be equally favored.

We hope also that Maine Developments readers, and many others, will demonstrate their interest in Maine by subscribing to Maine. This may be accomplished by merely completing and forwarding the coupon below.

Sincerely. BUD MARTIN, Editor Maine Developments

Department of Economic Development 211 State Office Building Augusta, Maine 04330
Please enter my name upon the mailing list to receive the DED quarter publication <i>Maine</i> . I understand that there is no subscription charge.

PHOTO INDEX

COVER:

Height of land, Rangeley; Small's Falls, Rangeley; Camden Harbor.

PAGE THREE

Picnicking on Maine broilers; Reid State Park; sailing along Maine's 3,478-mile shoreline; Fort Edgecomb; a vacationing youngster; end of an era at Wiscasset.

PAGE FOUR

Windjammer Days at Boothbay Harbor; Fort Popham; beach fun at Sebago Lake; window shopping at one of hundreds of antique shops; canoeing on one of 2,500 lakes and ponds; Old Orchard Beach amusement park.

PAGE FIVE

Deer Isle Bridge; anywhere in Maine; Maine's queens, princesses and goddesses at Seashore Trolley Museum; cruising out of Boothbay Harbor; awaiting the fishing fleet; serenity at Cornville.

PAGE TWELVE

Screw Auger Falls, Newry; the famous fisherman's shack; Rumford Point.

GROUP FILM SHOWINGS PROMOTE MAINE

The Department of Economic Development loaned 13 Maine promotional films to 377 clubs and organizations in 28 states during the 1965 season.

The states included New Mexico, Utah, California, Texas, Kansas, Mississippi, Florida, North and South Dakota, New York and Pennsylvania. Two hundred and eighteen showings were presented in Maine during the year.

Two new films produced by the Department, "The Offshore Islands" and "Vacationing in Maine" have recently been released.

Film lists are available from Mrs. Amy Pierce, DED film librarian. The films are available to Maine and out of state groups without charge, except for return postage.

NATURE NOTE

Anything can happen in Maine, and usually does. In Bath, a man returning home late in the evening saw the shadowy form of the family cat at the front door. Opening the door, he gently pushed the animal into the house with the side of his foot.

Only it wasn't the cat; it was an indignant skunk. The man's wife also became indignant, and has remained so. They will be able to move back into the house in a few days if all goes well.

END OF THE RAINBOW

Some 400 urban newsboys from 14 states will get a firsthand look at what life is like in the great Maine north woods as guests of the Great Northern Paper Company this sum-

The program, called "End of the Rainbow," was instituted by the paper company last year, when more than 300 newsboys were guests at the company's sporting camps on Rainbow Lake, north of Millinocket, on Katahdin's west side.

The boys, selected by 50 newspapers on a basis of their achievements in new and sustained circulation, were entertained for five days with swimming, fishing, hiking, visits to lumber camps and enormous quantities of woods-cooked food in groups of 18 to 24. Each received a personal letter of greeting from Governor Reed.

The program, with which the Department of Economic Development is assisting, has resulted in numerous articles and feature stories in out of state newspapers and has induced parents and friends of many of the boys to vacation in Maine.

SUMMER

June

- 24 Brunswick Playhouse opens
- **25** Lakewood Theatre opens
- 29 Annual Houlton Potato Feast

July

- The Fort Fairfield Sesquicentennial will be observed throughout the months of July and August
- 1 Boothbay Playhouse opens
- 1- 4 Sesquicentennial of the Town of Brooks
- 2 Wiscasset Strawberry Festival
- 4 Sesquicentennial of the Town of Corinna
- 8 Annual Harpswell Day, Harpswell Center
- 9 Annual Broiler Festival, Belfast
- 9 Miss Maine Scholarship Pageant, Portland
- 9 Annual Lebanon Historical Society Antique and Crafts Show, West Lebanon
- 9-10 Annual Lumberjack Roundup, Ashland
- 13-14 Windjammer Days, Boothbay Harbor
- 15-17 Tall Timber Days, Stratton16 Warren Day, Town of Warren
- Maine State Art Festival, State Office Building, Augusta - will continue thru August 12
- 17-18 Sesquicentennial, Town of Guilford
 - **18** Scarboro Downs opens
- 21 Camden Annual Open House and Garden Day
- 22-23 Open House and Launching, Bath Iron Works
- **22-23** Aroostook County Tennis and Swimming Tournament, Fort Fairfield
- 22-24 Sesquicentennial, Town of Fort Fairfield
- 22-24 Annual Potato Blossom Festival, Fort Fairfield
- 22-24 Sesquicentennial, Town of Moscow
- 23 Yankee Peddler Day, Town of Dresden
- 24 Boat Regatta and Maine Golf Tournament, Town of Fort Fairfield

TEN YEARS OF INDUSTRIAL GROWTH 222 NEW INDUSTRIES - 242 EXPANSIONS

BY RICHARD HEBERT

SPECIAL PROJECTS

This being the season for searching examination as to where we've been and where we may be trending in the Maine industrial development scene, we thought it might be appropriate to delve into the record books and pick out a few highlights of interest.

The Department of Economic Development was set up as a new and expanded State Department in late 1955 and spent most of 1956 in getting organized, especially in its fledgling Industrial Development Division.

Starting in 1957 this division began keeping a ledger record of new industries and expansions in which members of the Industrial staff participated in some manner, or which were reported by local development agencies, or in the news media.

A cursory analysis		1963 23
interesting statistics,	reported here	1964 44
for the first time:		1965 53

industrial growth is contained in the

Morrill Co. canning plant here has been sold to A. L. Stewart & Sons, blueberry canners and freezers of Cherryfield, for an undisclosed sum. It was announced that Stewart will pack some of the items formerly canned by B & M, for private label customers.

NORTH BERWICK - Purchase of the vacant North Berwick Woolen Co. mill by the Auerbach Shoe Co., with intention of operating a shoe plant employing 350-400, was announced by the North Berwick Development Corporation. The company presently employs 500 in the making of women's, misses and juvenile shoes in its Brunswick plant.

RUMFORD - Oxford Paper Company sales reached \$83,814,205 in 1965, an increase of \$14,392,346 over the previous year. Earnings after taxes totalled \$4,696,822. permitting dividends of \$3.57 per share as against \$1.23 a share of common stock in 1964.

BUCKSPORT - The St. Regis Paper Company in 1965 established new highs in net sales, net earnings, export sales and capital expenditures. Improvement projects for the year cost \$51,500,000; net earnings totalled \$35,866,000 compared with \$26,903,000 for 1964.

WESTBROOK - The S. D. Warren Co. ended 1965 with a backlog of orders for fine paper 80 per cent greater than the year before, and with profits increased by 31 per cent, according to the company's annual report.

Central Maine Power Company's record of kilowatt-hour sales to industrial customers. In 1955 and 1965 tabulations reported in the recent annual report of the power firm, the following gains by category of industrial customers are abstracted for the 10-year period:

Boots and Shoes Food Processing Shipbuilding Pulp and Paper Chemicals Lumber and Wood Metal Trades Textiles

Total gain, all i

SIGNS OF THE TIMES

	84.6
	64.8
	46.2
lworking	32.7
	32.1
	6.3
ndustrial	55.5

SOUTH PARIS - The Burnham & PORTLAND - Consolidated Rendering Co. of Boston and Tewksbury, Mass. has purchased the Maine properties and inventories of Summers Festilizers, Inc., for an undisclosed amount. Consolidated President Arthur R. Bethke said his company now is the largest New England based fertilizer producer.

The Summers company's Maine facilities included fertilizer plants in Sandy Point, Houlton, Mars Hill, Presque Isle and property in Winterport.

BANGOR - Joseph R. Coupal, Bangor city manager, was elected president of the International City Managers Association at its annual meeting in Montreal. At 42, he's the youngest man ever to head the 4,000-member group. Auburn City Manager Woodbury E. Brackett is the only other Mainer to achieve this honor. He was elected in 1960.

Coupal, a Harvard graduate and former instructor in government at the University of New Hampshire, has held his Bangor post for 12 years.

- JAY International Paper Company sales for the first quarter of 1966 totalled \$352,422,163, an increase of approximately \$40 million over the similar 1965 period. Income rose from \$20,390,119 to \$24,188,-612. Company President Edward B. Hinman said the company's plants and mills are operating at near capacity and pedicted increased earnings for 1966.
- PITTSFIELD Ground has been broken for construction of a new \$750,000 plant for Northeast Shoe Co., Inc., scheduled for completion this year.

The company manufactures quality sport and casual footwear. It is a subsidiary of the Penobscot Shoe Company of Old Town and has operated in Pittsfield for about 15 years. With expanded facilities it is estimated that present employment of 500 will be increased to 700.

WATERVILLE - Keyes Fibre Company net sales rose 15 per cent in 1965 to a record \$29,871,227 as compared with \$25,972,332 in 1964. It was the 13th consecutive year of sales growth. Net income was \$2,274,275, compared with \$1,876,309 in 1964.

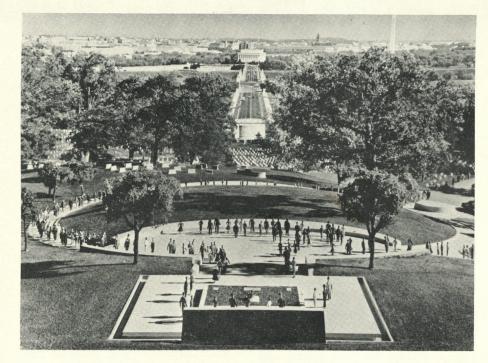

A CANDID LOOK AT

Maine Granite Is Being Used In J. F. Kennedy Washington Memorial

BY BUD MARTIN

Stone from an island of the sea he loved to sail upon is being cut for use in the gravesite of the late President John F. Kennedy at Arlington National Cemetery.

The granite, some 20,000 cubic feet of it, is being taken from the Crotch Island, Maine quarries of the Deer Island Granite Co., Inc., under a halfmillion dollar subcontract; cut to size and shape in the company's Stonington sheds, and delivered by barge to the site in Virginia.

Kennedy Memorial

The project is being constructed under the direction of the U. S. Engineer District, Virginia, and is scheduled for completion in September. Black granite and white marble will be used, as well as the Maine granite.

The Maine granite was selected by members of the Kennedy family from among specimens from several areas. It is described as a biotite granite with a medium grayish, pinkish tint. Specimens were viewed three times daily to observe the effects of morning, noon and afternoon light and shadows.

Several thousand cut granite stones, some of them more than 18 feet long and weighing 45 tons, will be incorporated in the elliptical overlook and the circular approach walks.

The Crotch Island quarry has been

in operation since the 1880's, was acquired by the Deer Island Granite Co., Inc. in 1923. The granite has been used in several large projects, including the State Office Building in Augusta, Maine, the George Washington and the Triborough Bridges and Rockefeller Center in New York.

The company is completing a \$750,000 cutting shed in the Oceanville section of Stonington with, in part, Area Redevelopment Administration funds. A work force of 150, in two shifts, will be employed this summer. MAINE INCOMES UP

Most Maine families have been moving into higher income brackets, a copyrighted study by *Sales Management Magazine* shows.

More than half Maine households (55.8%) had disposable cash incomes of \$4,000 or more after taxes, compared with 48 per cent in 1962, when a similar survey was made.

According to the survey 14 per cent of Maine households are in the \$7,000 to \$10,000 bracket; 30 per cent net \$4,000 to \$7,000; 25 per cent have incomes of \$2,500 to \$4,000.

DYNAMIC DOWNTOWNS

Approximately \$20 million in federal funds have been earmarked for urban renewal projects in Maine, according to "Dynamic Downtowns," a report on urban renewal in Maine published by the Maine Department of Economic Development.

The report was prepared by Richard F. Cahill, urban renewal consultant in the DED Division of Research and Planning.

"The contribution of the urban renewal program in Maine to the state's economy is a substantial one," Commissioner Standish K. Bachman said in a foreword to the report.

"The program is an important part of this Department's function, in that it helps to revitalize municipalities by ridding them of blight and adverse conditions and making them much more attractive to the industrialist and developer."

Nineteen Maine municipalities have created urban renewal authorities and 17 projects have been completed, are under way or are being planned.

In his introduction Cahill said: "Since nation-wide experience indicates that some \$5 or \$6 in private expenditures is generated for every \$1 of government funds expended for urban renewal, such activity now contemplated or in effect in Maine could generate 100 or 120 million dollars in private investment within the state."

The 56-page report contains maps, pictures and descriptions of urban renewal projects in Maine and a glossary of terms.

PROGRESS ON MANY FRONTS

MAINE PIONEERS NEW LOBSTER WORKBOAT

What may turn out to be a prototype for inshore lobster workboats was launched by the Thomaston Steel Works in mid-May.

Built to the order of Merritt Post, proprietor of Post's Lobster Pound, Friendship who said he wanted an economical lobster boat with plenty of speed, light in draft and as maintenance free and operationally economical as possible, the boat on her trial run indicated that she would fulfill these requirements.

The 22x7-foot noncorrosive aluminum craft, powered by a 60 horsepower diesel, made in England, with a MerCruiser outboard drive, is believed to be capable of a speed of 30 miles per hour. The inboard-outboard feature permits operation in shallow water and provides more usable room aboard, because lobster traps can be piled on the engine box.

Geerd H. Hendel, Camden marine architect who has designed many larger aluminum workboats, as well as Post's craft, said he believes the little lobsterboat will prove efficient for in-shore summer fishing.

Post, the owner, expressed the hope that many Maine lobstermen would adopt the model. "They'd escape the enormous chores of painting and caulking, and could fish the ledges which boats with fixed propellers must avoid."

Post recently had another unusual craft built by the Thomaston Steel Works. She's the 38-foot steel tugboat, "Seasmoke," designed especially for breaking ice in Lobster Gut, where his pound is located, in Friendship Harbor. The vessel also can

break the ice in the pound and force it out through a gate by the propeller's thrust.

Eugene Benner, Thomaston Steel Works manager, declared that the Post boats are the first to be built by his firm, which specializes in all kinds of metal fabrication and construction. "We had such good luck with these boats, we'll be glad to try our hands at building others to special order," he said.

THANKS, MR. DAVIS

"... I would like all of you to know how much I have enjoyed working with you and living in Maine. In fact, Maine is such a part of my life that I intend to retire here..." Richard J. Davis told former associates in an issue of *Maine Lines*, New England Telephone employe publication, upon his retirement as assistant vice president and Maine general manager.

JOB OPPORTUNITIES INCREASE

Maine business firms provide employment for 209,143 persons within the scope of the social security program, according to a joint U. S. Census Bureau and Social Security Administration survey.

Taxable payrolls in covered employment in Maine rose 24.9 per cent, to \$862,072,000, between 1959 and 1965.

The survey disclosed that 19,518 business concerns operated in Maine in 1965, about 90 per cent of which were listed as small businesses with less than 20 employees each.

ARTS and HUMANITIES

Stimulation of cultural progress in Maine became the law of the land when a new Maine Commission on the Arts and Humanities created by the 102nd Maine Legislature was organized in May.

The commission succeeds the former Governor's Council on the Arts and Culture, established by Governor Reed about a year ago.

Edward Y. Blewett, Westbrook Junior College president, was named chairman of the new commission. Gordon W. Clapp, *Bangor Daily News* promotion manager, was appointed vice chairman. The commission is authorized to have 15 to 21 members. The Governor had appointed a total of 18 early in May.

The commission has expanded responsibilities and authority to encourage interest and participation in the cultural offerings of Maine, its history, art, music, drama and literature.

MINING'S COSTLY

Dolsan Mines Ltd., the Canadian company doing exploration work at Pembroke, Maine, reported that it had spent \$535,584 on exploration and development as of Dec. 31, 1965, and \$129,701 on general and administration expenses. The cost of diamond drilling, alone, totalled \$287,-522.

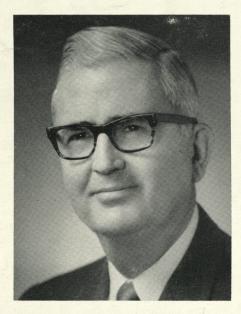

NEW DED DEPUTY

Appointment of an additional deputy commissioner for the Department of Economic Development was announced by Commissioner Standish K. Bachman.

Lewis R. Doering, Hallowell, who joined the DED as director of Industrial Promotion Division in May, 1964, will continue in that capacity and in addition will have general supervision over the Research and Planning and the Geological Survey Divisions.

Philip J. Macy, Manchester, who has served as a deputy commissioner since 1962, with supervision over all divisions, will continue as a deputy with supervision over the Vacation Travel Promotion and the Publicity and Public Relations Divisions, and will continue to assist the commissioner with fiscal and administrative matters.

Increase in the departmental work load necessitated creation of another deputy commissioner post, Bachman said.

LEWIS R. DOERING

Doering holds a degree of Business Administration from Boston University. He was sales manager for the Rust Craft Publishers of Dedham, Mass. before joining the DED. Prior activity in sales, sales management and advertising involved extensive travelling in the northeast, during which he made many business and industrial contacts. His mother was a native of this state and he was a summer resident for a number of years before establishing permanent residence in Maine.

CLEANEST CITY

Gardiner, Maine is one of the 41 cleanest cities in the United States, and it has a Distinguished Achievement Award from the National Clean-up, Paint-up, Fix-up Bureau in Washington, to prove it.

The award, first of its kind to be won by a Maine community, was presented as the result of Gardiner's achievements in a Clean-up Week project last spring. Chairman of the project committee was Richard C. Cahill, DED urban renewal consultant, a Gardiner resident. Cahill offered this advise to communities sponsoring Clean-up Week projects this year:

"Plan ahead early; hold an organizational meeting; involve the entire municipality - - schools, churches, city government, business and industry, neighborhood committees and service clubs; enlist the support of news media; and above all provide for a good central coordinating committee."

MINE LEGALIZED

A Supreme Judicial Court ruling and a legislative enactment were required to pave the way for operation of a new copper and zinc mine in Hancock County.

The court over-ruled objections of land owners to a petition by the Callahan Mining Corporation of New York for authority to dam an estuary and pump the water from Goose Falls Pond, Brooksville, in order to operate an open pit mine. Whereupon, the 102nd Maine Legislature, in its recent special session, passed enabling legislation.

In a letter to Governor John H. Reed the mining company president, Joseph T. Hall, declared that preliminary work will begin when the law becomes effective, ninety days after adjournment of the legislature.

The mine expects to be in operation in 1967, when some 70 residents of the Brooksville area will be hired at an annual payroll of \$500,000. It was estimated that sufficient ore was present to warrant operation of the mine for from six to ten years, perhaps longer.

ANOTHER "E" FOR MAINE

The Maine World Trade Council has received the President's "E" award for its vigorous promotional work to encourage more Maine businessmen to engage in international trade. This is the second such Commerce Department award to Maine. Nichols, Inc. of Brunswick received the "E" award in 1964.
