Intensive Reading: French, German

June 23 to August 15

Lasting three hours each day during the 8-week summer session, these intensive 12 credit-hour reading programs prepare the student to handle the written text of the foreign language for scholarly purposes. They prescind completely from phonology to concentrate totally on the morphological and syntactical patterns of the language, together with its lexicon, to instill the reading skill. They fulfill undergraduate foreign language requirements at Seattle University, and help the student gain the facility necessary to pass the foreign language reading examination required in graduate schools.

THEOLOGY PROGRAM

Master of Religious Education

The Theology Department of Seattle University will introduce a three-summer, eight-week program leading to the Master of Religious Education degree. This multi-disciplinary course will blend theological knowledge with insights from communication skills, social sciences, psychology and modern trends in catechetics. The specific purpose of this program is the professional training and formation of career catechists: clergy, religious and laity in both parochial and confraternity systems of education.

A current movement in the field of religious education has been to study the basic elements of human communication, to isolate those elements that hinder or facilitate communication between people, and to apply these findings to the development of a more vital way to teach religion. A special course will be offered the first two weeks of each new summer class to deal with the problems of communication. Other courses offered through the three summers will deal not only with the person himself but also with the environment surrounding the individuals, including anthropological trends, sociological currents, philosophical systems and theological developments. In this way, the program will seek to integrate academic information into the wider context of a forming Christian community.

The first course in religious psychology will set the background against which the other courses will be taught: a blend of the psychological profile of the individual with the implications of catechetics in the context of man responding to God in faith through the liturgy. The purpose of this approach is to mesh together in a type of dialog those elements of salvation history we find in man: the Word of God in creation, in His Son, in His Church today and in the people of God on the move.

A more specific course on Modern Catechetics will deal explicitly with faith and its communication and will draw upon the ideas and experiences of the first part of the course. Courses in Sacramental Theology and in Old Testament Scripture will fill out the first year format. The scripture course will outline the process of revelation. The sacramental theology course will explain in depth how man has responded to salvation history in a worshipping community.

Courses through the following summers will develop in detail more of the Good News, articulate the various environments surrounding man (intellectual as in philosophy and theology; societal as in anthropology and sociology) and explain the implications of the mission of the Church in communicating the Word of God. Seminars, chosen by the individual according to needs, will undertake research in problem areas such as morality, liturgy, scripture, religious psychology, church and sacraments.

Admission

Due to the integrated aspect of the degree program only those who register for the three summers will be admitted.

The program is open to anyone in religious education with a Bachelor of Arts degree or equivalent, including 20 quarter (14-16 semester) hours of theology or equivalent and with adequate scholastic standing.

Registration is limited to 75 persons for each subsequent first-year class. The regular tuition fees pertain to this program. A special \$20 workshop fee is required of first-year students.

FINE ARTS PROGRAMS

Symposium in the Fine Arts:

June 24-August 1

This six-week symposium will explore the vital bonds between 20th Century society and its artistic creativity. Experts in drama, music and the visual arts will trace operative forces in and between the various arts, will relate them to broader areas of contemporary culture and history, and will present challenging demonstrations of current art to advance the knowledge, taste and critical powers of participants.

Students who have taken previous Fine Arts Symposia are eligible to participate.
