WINNIPEG, Man., March 29.—Only two or three officers here can get any reliable information from the seat of war, as the news received here is transmitted to Ottawa, and the government officials now have full control of all the wires. Posters are up in all public places, calling for volunteers, and the indications are that the trouble is more serious than is generally known. Rumor has it that Major Crozier's forces were forced to disband after a skirmish, in which 27 troops were killed. Nothing can be learned regarding this, as the officials will not divulge anything. Norquay's action last night in not vetoing some of the rights bills has caused a great sensation here.

A Church Anniversary.

Saco, March 29 .- One year ago the present month the Free Baptist Society of this city occupied their new church on Cutts avenue, and today Rev. J. W. Parsons, the pastor, preached an anniversary sermon at the mornng service from Acts 28:15. During the year just ended over 200 conversions have occurred, one-half of whom have been added to the church. The average attendance at the even-ing prayer meetings has been over 80, and the Sabbath school connected with the church is among the largest and most flourishing in the

Farmers' Institute. (To the Associated Press.)

FARMINGTON, March 28.—A farmers' institate was held yesterday at New Sharon. There was a large attendance. Addresses were made by Hon. J. W. Butterfield of Phillips, member of the Board of Agriculture for Franklin; subject, "Sheep Husbandry;" Z. A. Gilbert of Greene, secretary of the Board of Agriculture, "Thorough Work;" D. H. Knowlton of Farmington, "Small Fruits on the Farm;" Francis Barnes of Houlton, 'Stay at Home on the Farm." The discussion on sheep husbandry was also participated in by the venerable William Manter of New Sharon, Edward Staples of Farmington, Z. A. Dyer of New Sharon, A. H. Mrs. Fulton estimates the gift as invaluable for its rarity, originality, and antique research.

GRAFTON. Mr. James D. Feeney of Grafton met with a singular death at Gorham, N. H., on last Friday. He was at work splitting wood when he was noticed to suddenly fall. On going to him his friends found that his throat had been cut in some mysterious manner by his axe, severing both vein and artery. Death immediately followed. The remains were brought to Grafton Saturday and the funeral occurred Sunday.

HOULTON. A novel case was tried in Houlton before Tsial Justice Staples a few days ago, says the Aroostock Herald. It was a suit brought by Noah Chandler sgainst Lyman W. Stevens, to recover payment for liquors sold him. The defense urged that the liquors were sold contrary to the provisions of the Maine liquor law, and consequently the sale was not a legitimate transaction. Judgment was rendered for the plaintiff for the amount claimed and costs.

MT. DESERT. A serious coasting accident occurred at Bar Harbor one evening last week. A large party were enjoying the sport until nearly 10 o'clock, when a big "double runner" carring seventeen persons, mostly boys and young men, collided with a sled which had been left in the road near the foot of the hill, and in the effort to avoid the obstacle the whole party were driven into the railing and several thrown off the bridge. All were more or less bruised, and

some seriously injured.

RUSSIA AND ENGLAND.

An Apparent Lull in the Warlike

Several of the Fast Cunard Steamers Chartered by England.

Gunboats Ordered to Prepare for

Immediate Service.

London, March 28.—Advices from Russia say that preparations are being made for war, and that silence has been imposed on the Russian newspapers. The Times learns that the Russian government has ordered that 50,000 troops be massed at Baku on the Caspian Sea, and has instructed the Governor of the Caucasus to go to St. Petersburg for a consultation. The Conservatives are annoyed at the intimation of the Marquis of Hartington that the discussion of the Queen's message be postponed until after Easter, and will probably protest against the postponement, contending that the law provides that if Parliament is not in session when the reserve force of the government is called out, it must assemble within ten days to consider the situation of affairs. The opposition fear that the measure is only a ruse intended to frighten Russia.

Therefore, The Tables of the Parliament of the

an increase of the Afghan army. London, March 28.—Despatches from Gulson and Penjdeh show that the situation on the Afghan frontier is unchanged. The commission under Lumsden has completed the bases for the delimitation of the boundary and is still awaiting the arrival of Gen 25 cinow, the Russian commissioner. Russian subjects the Russian commissioner. Russian subjects of the conquered counties of Central Asia are said to be ripe for a revolt, and are eagerly locking for an Anglo-Russian war, which will enable them to rise in rebellion and attack the Russian army from the rear.

London, March 28.—There is a marked lulle in the war scare. In fact, among the very sober-minded, there is no war scare at all. Some of the most fiery jingoes, even, are beginning to ask themselves what real grounds they have had for causing all the alarm of the past week.

ginning to ask themselves what real grounds they have had for causing all the alarm of the past week.

The first announcement of the Queen's sammons calling out the army reserves and militia almost created a panic. It aroused the national pugnacity thoroughly. It made every fighting Englishman ready to fight right away.

The Army and Navy Gazette blames the minor news agencies for fomenting war rumors. It charges them with having circulated yarns about the alleged hurried calling out of ships, in which stories, very often, ships actually on duty at foreign stations have figured as being ordered to outfit.

"The Russian people are alarmed," telegraphs the Paris correspondent of the London Times, "at the idea of war. They know," he says, "that a war with England would be disastrous to Russia. The Czar needs money in the event of war, and it would be only possible for him to obtain a loan upon ruinous terms. Russians here admit that England cannot recede, while with Russia the whole question is merely one of ambition. All the powers have instructed their ambassadors at St. Petersburg and London to urge the Russian and English governments to moderation and concession. The ambassadors state that both powers are governments to moderation and concession. The ambassadors state that both powers are really anxious for peace."

really anxious for peace."

LONDON, March 29.—The British government has chartered the new Cunard steamer Etruria, and the steamers Oregon and Alaska for service as armed cruisers and transports. They will be fitted with 10 guns each.

The Admiralty has ordered that the men-of-war Iron Duke, Hotspur, Hecats, Conquest and Hyacinthe be prepared for service. It is presumed they will go to the Baltic, the Iron Duke acting as flagship.

The Admiralty has also ordered to active service H. M. S. Inflexible, Devasiation, Cyclops, Rupert, Cordelia, Voluge, Active and Emerald, and that they were to be ready for sea in a few days.

SPORTING.

The Oxfords Win the 'Varsity

Race by Three Lengths.

Hanlan Again Defeated by Beach.

London, March 28 .- The great 'Varsity boat race was rowed this morning, Oxford winning by three lengths. The race was witnessed by large crowds, who lined the river banks at places from which they could obtain a good view. The weather was fine and clear, scarcely a cloud specking the sky, with the wind light and favorable. The water was calus and smooth not a ripule backing its smooth, not a ripple breaking its surface. A more favorable day for a race could not be wished for. These conditions were viewed as very favorable to the Oxford crew, their opponents, it being the general belief, standing a better chance with the weather less propitious. As it was the race was closely contested throughout, and those who predicted a comparative walk-over for the Oxfords were very greatly surprised at the manner in which they were pushed all they way through. The start was made at exactly twenty-six minutes past twelve, both crews taking the water simultaneously and both pulling a steady stroke. The Oxonians pulled the stronger car, and in the first few strokes had just a perceptible lead, which they soon increased to nearly a half-boat's length, but a spurt by the Cantabs just before reaching the quarter-mile woy out down this lead, and at that point both were even. The Oxonians soon took the lead again, their steady, powerful sweep telling on the Cantabe slowly but surely, and gradually increasing their lead. Before Hamnersmith bridge was reached some wild steering on the part of the Cantabe enabled the Oxonians to further increase their lead. the Oxonians to further increese their lead, and at the bridge they had fully a boat's length of clear water between them. The Cantabs spurted repeatedly in an effort to cat down this lead, but to no avail, the Oxonians not only maintaining their advantage, but finishing fully three lengths ahead of the Cantus, amidst the wild and enthusiastic cheering of their admirers. Oxford was the favorite in the betting at heavy odds.

Sydney, March 28,—In the sculling match to-day between Hanlan and Beach, the latter won. The race was rowed over the "Champion's Course," on the Parramatta river. The attendance iwas enormous. The weather was favorable and the water was smooth. Both oarsmen were in excellent condition. Hanlan and Beach, after the start, kept well together for some distance. The race was close and avfor some distance. The race was close and exciting. The scullers approached the winning post almost bow and bow, and the excitement among the spectators was great. When pulling with all their strength for the winning post, Beach overhauled Hanlan and increased his advantage until the very finish amid the wild-

TORONTO, March 28.—The Mail, the government organ, in an article on the trouble in the Northwest, says yesterday's encounter, particularly since it resulted in a victory for the half breeds, is no doubt the beginning of a serious campaign. Grave danger, however is to be feared from the Indians. SUARIM, March 28.—Nearly all the infantry and cavalry escorting the convoy have arrived safely at the zerebs on the Tamai road. The safely at the zereba on the Tamai road. The number of sunstrokes among the troops is daily increasing. The troops are greatly overworked escorting convoys during the day and doing sentry duty at night. The building of the Berber railway has been suspended outside of Snakim, owing to the inability of the army to afford protection along the line beyond the camp. It has been decided that the forces necessary for such protection cannot be shared, at least until after the impending battle at Tamai, which is expected to be decisive, shall have been fought. The laborers engaged for the railway construction will be employed, in the mean time, in the much needed work of improving the wharfage accommodations at Snakim.

Gen. Graham and the army of advance arbe feared from the Indians.

CHICAGO, March 28.—The Daily News' Winnipeg special says: A telegram from Brandon says the mounted police have captured Louis Genville, an emissary of Riel, who had been sent with letters to the Indians and half breeds of Broad View, Oak Lake and Bale St. Paul. The papers were not found. The prisoner says he left Riel six days ago, and that he had then six American cannon and 1,500 men, and that he was being joined by the American Indians. They will take part in the advance on Tamai. It is reported Osman Digna has moved his camp to Tamanieb.

The French in Touquin.

Paris, March 28.—The debate on the government's policy with regard to the compaign in Tonquin was resumed in the Chamber of Deputies to-day, and was characterized by a repetition of the heated and acrimonious meetings that have attended the discussion of this subject whenever brought up. After numerous interpellations with regard to the operations now going on against China, which were either evasively or vaguely answered, Premier Ferry arose and, in quite an extended speech, said he greatly deplored the violent utterances made in the debates on this question, and counselled moderation in dealing with the subject. M. Ferry was frequently applauded, and a motion to vote the order of the day pure and simple was carried by a vote of 273 to 227. The closeness of the vote is looked upon as only a nominal victory for the government, and the opposition claim that a few more disasters, such as Doug Dong, will result in the overthrow of the ministry.

Paris, March 29.

The Chinese forces, gained. The French in Touquin.

The Chinese forces gained a victory over the French at Langson, Friday. They carried the key of the position and sutrenchments and the French troops retreated beyond Dong Dong. They are falling back on Lang Koi. The French loss in men and guns is unknown. The Chinese, it is estimated, are 50,000 strong and they menace the French lines in the south. (Portland Globe.) To any one acquainted with the methods of temperance leaders in this State, the contents of Mr. Munson's letter to Capt. Deering is no surprise. Is it strange, then, that facing this record of contemptible hypocrisy and ingratitude, the man by whose untiring exertions 70,000 votes were polled for the amendment, should tire of the shadow and yearn for the substance? While deeply regretting the course taken by the gentleman, the Globe is forced to admit that there is a great deal of human nature about it.

yearn for the substance? While deeply regreting the course taken by the gentleman, the Globe is forced to admit that there is a great deal of human nature about it.

(Biddeford Journal.)

It has been given out that Rey. Mr. Munson proposed to introduce his new and improved plan for electing Democratic mayors into other cities of the State as soon as he finished his contract in Portland. While there can be no doubt of its success in that city, his letter to Mr. Deering gave his "patent" away so completely that we doubt if his presence will be needed elsewhere. Anybody can do the trick if they can secure the confidence of the people, Reformers, who advertise to save the world by contract, will hear wiching. Reformers, who advertise to save the world by contract, will bear watching.

(Bangor Commercial, Dem.) The matter is interesting as showing the inherent dishonesty which underlies, in one or another way, all the attempts which are made to enforce the prohibitory law. It is also cal-culated to somewhat diminish the sphere of Mr. Munson's usefulness in Portland and else-where, also that of any other Munson who may start up with a migrisp to "extingue the may start up with a mission to "extirpate the liquor traffic" in this or that locality in the State. Prohibition does not prohibit, but it does breed a startling crop of frauds and hypocrites wherever its enforcement is undertaken. The prohibitory law must go.

Jacob Thompson. The Man in Whose Honor Secretary La-

(New York Tribune.) Secretary Lamar's order that the flag over the Interior Department should be hung at half-mast and the officers and clerks of the department receive a holiday with pay in honor of that departed traitor, conspirator and thief, Jacob Thompson, Secretary of the Interior under Buchanan, has naturally revived interest in Thompson's mission in Canada during the Rebellion, and the damnable operations in which he was there engaged in behalf of the

During the spring of 1881 The Tribune published a number of letters from the rebel agents in Canada (Thompson, Clay and Holcombe) fortunately preserved among the Conederate archives, giving an official faccount of their plots against the Union. It so happens that the most striking of these letters was one from Jacob Thompson to Judan P. Benjamin, the rebel Secretary of State, which appeared in The Tribune of April 16, 1881. A more straightforward record of villainy has seldom been put in black and white by the villain imself. It occupied about two columns of The Tribune and is a detailed statement of the operations of Thompson, who made Toronto his headquarters. It begins with an account of the plans of the "Sons of Liberty," by whose aid Thompson hoped that the three great States of Ohio, Illinois and Indiana could "be seized and held." It tells of the peace meatings, for the organization of which Thompson furnished the needful funds; of the partly successful plot to release rebel prisoners on Johnson's Island; of the plan to create a panic in the money market by the exportation of gold; and of the attempts, more or less successful, to burn Northern shipping and Northern citiesespecially New York, where the unsatisfactory results from the use of Greek fire greatly annoyed Thompson, and, he says, confirmed his contempt for that article as an incendiary agent. We omit, in general, those parts of the letter which merely reveal the man whom Secretary Lamar delights to honor as an active and enterprising traitor, and reproduce those parts which brand him as au inhuman mon-

Toronto, C. W., Dec. 3, 1864.

Hon. J. P. Benjamin, Secretary of State:

Sir,—Several times have I attempted to send you communications, but I have no assurance that any of them has been received. I have relaxed no effort to carry out the objects the government have in view in sending me here. I had hoped at different times to have accomplished more, but still I do not think my mission has been altogether fruitless. At all events we have afforded the Northwestern States the amplest opportunity to throw off the galling dynasty at Washington and openly to take ground in favor of State Rights and Civil Liberty.

This postponement was insisted upon on the ground that it was necessary to have a series of public meetings to prepare the public mind, and appointments for public peace meetings were made, one at Peoria, one at Springfield, and one at Chicago, on the 16th. The first one was at Peoria, and to make it a success I agreed that sc much money as was necessary would be furnished by me. It was held, and was a decisive success. The vast multitudes who attended seemed to be swayed by but one leading idea—peace.

Soon after I reached Canada, a Mr. Minor Major visited me and represented himself as an accredited agent from the Confederate States to destroy steamboats on the Mississippi River, and that his operations were suspended for want of means. I advanced to him \$2 000 in Federal curreucy, and soon afterward several boats were burned at St. Louis, involving an immense loss of property to the enemy. He became suspected, as he represented in me, of being the author of this burning, and from that time both he and his men have been hiding, and consequently have done nothing. Money has been advanced to Mr. Churchill of Cincinnati TORONTO, C. W., Dec. 3, 1864.

and consequently have done nothing. Mon has been advanced to Mr. Churchill of Cine nati, to organize a corps for the purpose e incendiarism in that city. I consider him true man, and although as yet he has effecte but little, I am in constant expectation of heav-ing of effectice work in that quarter. Previous to the arrival of Lieutenant Colonel Martin and Lieutenant Headley, bringing an unsigned note from you, all the different places where our prisoners are confined—Camp Douglass, Rock Island, Camp Morton, Camp Chase, Elmi"a—had been thoroughly examined, and the conclusion was forced upon us that all efforts to release them without an outside co-operation would bring disease reside co-operation would bring disaster upon the prisoners and result in no good. All pro-jects of that sort were abandoned, except tha at Camp Douglas, where Captain Hines stil believed he could effect their release. We yielded to his firmness, zeal and persistence, and his plans were plausible, but the and his plans were plausible; but treacher defeated him before his well-laid schem were developed. Having nothing else on han Colonel Martin expressed a wish to organize corps to burn New York city. He was allowed does and a most daying attempt here. corps to burn New York city. He was allowed to doso, and a most daring attempt has been madeto fire that city, but their reliance on the Greek fire has proved a disfortune. It cannot be depend ed on as an agent in such work. I have no faith whatever in it, and no attempt shall here-after be made under my general directions with

after be made under my general directions with such material.

During my stay in Canada a great amount of property has been deetroyed by burning. The information brought to me as to the perpetrators is so conflicting and contradictory that I am satisfied that nothing can be certainly known. Should claims be presented at the War Office for payment for this kind of work, not one dollar should be advanced on any proof adduced until all the parties concerned may have an opportunity for making out and presenting proof. Several parties claim to have done the work at St. Louis, New Orleans, Louisville, Brooklyn, Philadelphis and at Cairo.

For the future, discarding all dependence on the organizations in the Northern States, our efforts, in my judgment, should be directed to inducing those who are conscripted in the North and who utterly refuse to join the army to fight against the Confederate States, to make their way South to join our service. It is believed by many that at least a number

to fight against the Confederate States, to make their way South to join our service. It is believed by many that at least a number sufficient to make up a division may be secured in this way for our service before spring, especially if our army opens up a road to the Ohio. Some are now on their way to Corinth, which at present is the point of rendezvous. Also to operate on their railroads, and force the enemy to keep up a guard on all their roads, which will require a large standing army at home; and to burn whenever it is practicable, and thus make the men of property feel their insecurity, and tire them out with the war. The attempt on New York has produced a great panic, which will not has produced a great panic, which will not subside at their bidding. . . Very respectfully, your obedient servant,

HOW SUGAR IS MADE.

A Visit to the Forest City Sugar Refinery. (Rambler in the Lewiston Journal.) The fine white sugar that you use on your

table looks more like sawdust than anything else, and very coarse, dark sawdust at that. when it is landed at the refinery in Portland. from Porto Rico, Barbadoes or Martinique. A man has just pushed a car, having on it two or three hogsheads of raw sugar, from the warehouse on the dock into the basement of the Forest City Refinery. Down in the ground, bubbling and hissing at your feet, is an immense vat, with steam issuing from it and sugar and chips boiling in it. This is the meter and here is the first process through which the raw sugar passes, on its way through the refinery. Two stout fellows roll a hogshead to the brink of this vat. It is on end in an instant, and they knock in the head with a crowbar and a sledge. A hundred dollars slips into that vat in just about thirty seconds. The hogshead is scraped out, the men shovel what is spilled on the floor into the abyss, and then the hogshead is steamed, so that every particle of saccharine value is gleaned from the staves. The hogshead is knocked into its original pieces, the shook are packed for shipment back to the sugar islands, and the heops are burned for the sake of getting out the old nails, which fetch sixty cents per hundred

ly and replaced.

Now the sugar is ready for clarification, and this is the most interesting process of all. The clarifying agent is bone black—animal bone, burnt and powdered. It looks exactly like coarse gunpowder and smells worse. This blackness makes the sugar white. The charred bone costs three cents a round and is compared. bone costs three cents a pound and is so valuable that after it has been used in the clarifiers it is dried and reburnt and used over and over again. Some of the most ingenious and ex-

pensive machinery in the refinery is employed in re-burning the bone black, and \$25,000 worth of this sooty substance is in process all the time. The burning of the black is a delicate operation. To procure evenness and prevent waste, the brains of inventors and chemists have been taxed for many years, and the result is a complex arrangement of furnaces, flues, pipes and belts, which roasts the pulverized bone to the exact degree required, draws it off when cooked and carries it to its destination—all automatically, without the aid of a man's hand. Night and day, burnt bone black is dropping from these flues and running off on bucket belts.

The clarifiers are rows of great iron vessels twenty-one feet long. Bone black is put into them and the melted sugar soaks through. The amount of impurities removed by clarification is about 1½ per cent.

The clariners are rows of great fron vessels twenty-one feet long. Bone black is put into them and the melted sugar soaks through. The amount of impurities removed by clarification is about 1½ per cent.

We are now standing in a room in which men and boys are at work with very little clothing on, and in which the heat is almost intolerable. We are standing before a great copper cauldron in which an army of witches might perform their weird ceremonies. It is big enough to swallow a small house. It is called a "vacuum pan" and there is so much pan and so little vacuum to it that it cost \$10,000. The sugar is boiled two and one-half to three hours in this vacuum pan, and when it comes eut is of a light yellow color and pulpy consistency. Next it goes into the "centrifugals."

Out of the centrifugals it comes in warm white crystals—moist sugar Now what is a centrifugal? It is an iron basin of about the size of an ordinary washtub, and inside of it is a metallic basket just enough smaller to revolve in it without chafing. The boiled-down sugar goes into this wire basket, power is lat on, and the basket is whirled around at the rate of 1,400 revolutions a minute. This speed is inconceivable and so great that you cannot see the basket. The "centrifugal" seems motionless and empty, to the eye. The ear only detects the motion. The centrifugal force generated by this speed throws out the liquid through the perforations of the basket. When one of these machines, of which there are a dozen or so, has run fitteen minutes and has stopped, there remains half a bushel of white crystals in the bottom of the "centrifugal." The sugar now needs only to be granulated and sitted. The granulating process is simply a drying and rubbing. It is done automaticaliy. The granulator is a great iron drum twenty feet long and six feet in diameter. To the inner circumfererce of this drum, are attached rows of gutters. The moist white sugar is fed into this revolving drum, and rubs and josiles through the gutters. By attrition and heat it is dr

The storehouses of the company on their The storehouses of the company on their own premises will icontain 2000 hogsheads of sugar. One hundred hogsheads of raw-sugar are redined daily. This quantity makes about 600 barrels of granulated sugar. These figures vary slightly in various seasons. The total annual product of the refinery is forty million pounds of hard sugars. Besides its Maine trade, the Forest City refinery has a large patronage in the West. It loaded 1500 cars, to go out of the State last year. It is a very large and successful enterprise and the quality of its sugars is not beaten by any refinery in the world.

One of its necessary equipments is a laboratory, where a skilled chemist is constantly engaged with filters and polariscope, testing the

"What is the prospect for prices, this summer?" I asked Treasurer Hunt.

"There is a prospect of a large crop and comparatively low prices. Two years ago, we were selling sugar for 8 1-4 cents a pound. Today, we are selling the same sugar for 6 1-4 cents. Sugar is lower than it has been for forty years. The average wholesale price of raw sagar in bond, for forty years ending 1884, was 4 79 cents. To-day it is fully 2 cents less. The cause of this great decline is, of course, the immense product of best sugar in Europe. The surplus of the beet sugar crop of France and Germany, after the home consumption is supplied, is equal to the entire sugar crop of the island of Cuba!"

"Is there any hope of successfully making

"Is there any hope of successfully making "Is there any hope of successfully making beet sugar in this country?"

"We cannot do it because we cannot raise the beets cheaply enough. In 1880, when we were making beet sugar, we demonstrated that good sugar beets can be raised in Maine and good sugar can be made from them, but our farmers cannot afford to raise them until they can hire laborers for a ninepence or so, per day. They cannot pay American prices for labor and compete with the European beet are farmers. With the present prices of refined sugar, we could not pay more than \$3 a tonfor beets.

The despatches on the whole indicate a rather more pacific tone in Europe. Russia finding that England is ready to fight, begins to show a more accommodating disposition. Her financies are in a very bad shape and her credit at a low ebb, while England's ability to raise money is bound-

Signs multiply that Postmaster Pearson of New York is much more likely to be succeeded by a Democrat than by himself. The administration would like to compromise by making him third assistant postmaster-general, but neither Mr. Pearson nor his mugwump backers will consent to such an arrangement as that. The New York Post which has been sanguine all along that Mr. Pearson would be his own successor shows signs of weakening. It says: "If the principle is to prevail that all officers are to be necessarily superseded as soon as their terms expire, than, although much has been secured for civil service reform by the faithful enforcement of existing laws, less has been accomplished than we had hoped for."

The Argus is developing quite a strong affection for the prohibitory law, and in Saturday's issue it vigorously denounced a "paid attorney" because he raised a question of construction in regard to one of its paragraphs. The Bangor Commercial, on the other hand, which illuminates the Democracy in the eastern part of the State, still continues to insist that the prohibitory law must go. However, it is nothing new for the Maine Democracy to support both sides of a question. They have done that in the case of almost every public question that has arisen for the last ten years. A party that can advocate at the same time hard money and soft money, free trade and protection, free rum and prohibition, is a great party-for votes.

In another column we publish a part of a letter written by Jacob Thompson, out of respect to whose memory the Interior department was closed, to the Secretary of State of the Confederacy. In it Thompson admits that he was furnishing money and otherwise assisting a scheme to burn nothern cities during the war. It would have been bad enough to lower the flag and close the doors of the Interior department in honor of a man who was simply a traitor to his country, but to pay such respect to a man who added to treachery participation in such a barbarous scheme as is disclosed in this letter is infinitely worse. It is said too that Secretary Lamar was not alone responsible for this performance, but that all the members of the cabinet and the President besides concurred in it.

It is related of Judge S. S. Phelps, father of the newly appointed minister to England, that a man was brought before him who was claimed as a fugitive slave when fugitives were liable to be returned under State laws, and the counsel for the master presented the ordinary "proofs of ownership," such as identity, bill of sale from former owner, but none seemed satisfactory to the judge, when counsel said, "We have presented to your honor the usual proofs that the man is a slave; will you please indicate what evidence will satisfy the court that the fugitive is legally a slave?' Judge Phelps replied, "A bill of sale from Almighty God." This evidence was not produced and the man was discharged. Notwithstanding his father's noble stand, Minister Phelps himself was a rapid pro-slavery man and went from the old Whig party into the Democratical Phenomena in the control of the from the old Whig party into the Democration of the sympathy into the found sympathy. with his political views.

Exchange. One indication of the Democratic discontent with Mr. Cleveland is the rumor circulated in Washington that a movement is under way, headed by Mr. Watterson, which will demand the withdrawal of Lamar and Garland from the Cabinet and withhold Southern support from the Administration until it is conducted more in accordance with Democratic ideas.

A SHORT HISTORY OF THE MAINE LAW. Boston Journal. The Rev. Mr. Munson of Portland should tell the whole history of Maine law legisla-tion. He told the Democratic Mayor of that city that a Democratic Legislature passed the Maine law and a Democratic Governor signed it. He should have added that a Democratic Legislature (1856) repealed it, and that a Republican Legislature (1858) reenacted a better one.

Boston Advertiser.

There are cases of men whose past offences are so gross that the Senate would be folly justified, in the absence of all evidence of their reform, in rejecting them if nominated. There are certain persons who were responsibly connected with the attempt to reverse fraudulently the action of the people of Maine a few years ago who deserve no favor from honorable men of any party. We have never believed that the President is likely to be imposed upon to the extent of nominating for office any of the leaders in that scheme; but, if he should do it, the Senate would be sustained by the honest men of all parties in rejecting them.

What Constitutes a Pure Baking Powder. OPINION OF EMINENT NEW YORK CHEMISTS.

MISCELLANDOUS

We have analyzed samples of the ROYAL BAKING POWDER and of CLEVELAND'S SUPERIOR BAKING POWDER, bought by ourselves in the open market.

We find in the Royal Baking Powder, Sesqui-Carbonate of Ammonia.

Free Tartaric Acid.

We regard these two ingredients as highly objectionable.

Ammonia, which is a product of decomposition and a refuse of the worn-out tissues, should not be tolerated in any article of food. It is a powerful drug and its use in food is vigorously condemned by all physicians.

Free Tartaric Acid over-accelerates and wastes the leavening action of the baking powder. Both of these ingredients are cheap, inferior and deteriorative substitutes for the more costly and wholesome pure Grape Cream of Tartar and pure Bicarbonate of Soda which we find uncontaminated in CLEVELAND'S BAKING POWDER, and which, with a small amount of flour to preserve the compound, are the only ingredients of this powder.

ment in favor of the Hochelaga Bank of Canada, of about \$6000 and accrued interest against said Montreal, Portland and Boston Railroad Company now owned by said Vermont National Bank, and wholly unsatisfied. The 32 miles of said Road from St. Lambert to West Farnham form a connection on a direct route from Montreal to Hoston, and is a portion of what is known as the "Air Line" between those Cities, and is at present used by the Canada Pacific R. R. Company, as its Eastern outlet.

The whole Road of about 70 miles is well worth \$800,000; the 32 miles is laid with steel rails, is in excellent condition, and the depots and other appurtennances belonging to the Road are first-class. The undersigned receiver of said Vermont National Bank, has up to this time been kept out of possession of the road by legal proceedings in Canada which have been altogether based on technicalities. The cases are now pending; as soon as a decision on the merits is arrived at, the controlling interest now in the receiver's hands, and hereby offered for sale, must obtain the road and property.

Full particulars may be obtained by applying to the receiver of Vermont National Bank, St. Albans, Vermont.

The Property, Bonds, Stocks and Judgment aforesaid will be sold together, and for the same sealed bids are asked for and will be received by the undersigned at St. Albans, Vermont, up to the 6th day of May, 1885, on which day the same will be opened, examined and the sale determined. Bids should be explicit in terms and amount, and the undersigned reserves the right to reject any and all bids that may be made.

Bidders are required to give a bond or deposit a certified check for 10 per cent of their bid as a voucher for their responsibilty, the same to be returned if the bid is not accepted.

Bids with bond or check should be scaled and enclosed in another suvelope and directed to the undersigned at St. Albans, Vermont.

This sale is made under an order of the United States Circuit Court for the district of Vermont.

HOUSE No. 126 Free St., formerly occupied to Dr. Weeks. F. N. DOW, novadtf No. 12 Market Square.

A FACT over 5000 years old. New blood will always make new life. A FACT

that is only 5 years old. Mur-dock's Liquid Food will make blood faster than all foods or preparations known, in health or disease, from infancy to old age.

The staff of the Surgical Mospital at No. 30 Leverett street is in attendance daily from 9 to 10 A. M. except Saturdays and Sundays.

We do this to show the value of raw food, which is the staff of th ur liquid food is, condensed and free from insoluble latter, which enables us to save life when all other loods and treatments fail.

The friends of Mrs. O., having for six weeks vainly endeavored to procure her admittance to some one of our city hospitals, apolied to us to get her admitted here if possible. She came to us on Dec. 11. Reports herself as having suffered since the birth of her last child, twenty-one years ago, from extreme protapsus uteri, with very badly lacerated cervix and perineum. She was not able to sit up, and was, of course, much prostrated nervously. It was hoped that in three to four weeks we might put her in condition to be operated upon.

She commenced at once with four tablespoonfuls of Murdock's Liquid Food daily, and in twelve days the first operation was performed by a surgeon connected with two of the leading hospitals of the city, the operation lasting nearly two hours and a half. From that she made a rapid recovery, and on Jan. 23, the second operation was performed, which occupied two hours, and she again made a good and rapid convalescence, which, foa a woman of sixy-three, who had suffered agonies so many years, we think speaks well for the value of Murdock's Liquid Food as an aid in surgery, having her in our home only nine weeks.

We offer the following, being one of the CREAM BAIND CATAL SURES COLOR OF THE ANALYTEVER OF THE ANALYTE OF THE ANALYTEVER OF

We offer the following, being one of the many unsolicited testimonials, to show that other institutions do obtain the same results with our Liquid Food that we do. MOUNT HOPE HOME FOR CHILDREN, BOSTON, Feb, 5, 1885.

Gents:—
We have been using your Liquid Food at the Home for three years past, and we must say that your Liquid Food has saved one-half their lives. We have 32 children, and have lost only one during the time. What other institution can show such results? We consider it of great value in cases of exhaustion, also where children are brought in a half-starved condition, as it relieves exhaustion quicker than stimulants, and in cases of starvation it will relieve the sufferer in the shortest time of anything known. I am able to testify from experience, having been in this work nearly five years, and I consider it a duty to say that Murdock's Liquid Food is indispensable in a family of children.

Every spring we feel the necessity of cleansing the blood, and to accomplish the same we take one or more preparations for 30 or 60 days.

WHEREAS THOSE THAT KNOW THE VALUE OF MINIOCK'S Liquid Food take it for thirty days, knowing that it will make 10 pounds of new blood if a table-spoonful is taken 4 times a day before meals; frequently it is only necessarg to take for one week, confirming its value over all preparations, as the system contains from 26 to 28 pounds of blood.

Advice to Mothers. Mrs. Winslow's Soothing Syrup should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays the pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhea, whether arising from teething or other causes. Municipal Court.

BEFORE JUDGE GOULD.
FRIDAY.—In the Municipal Court, Thomas Miller was brought up on a search and seizure complaint. Mesers. Rand and Lunt appeared as his counsel. This seizure and arrest was made without a warrant, and was made and the warrant subsequently issued by virtue of the last part of sec. 39, of chap. 27 of the Revised Statutes, which is as follows: "And in all cases where an officer may seize intoxicating liquors or the vessels containing them, upon a warrant, he may seize the same without a warrant and keep them in some safe place for a reasonable time, until he can procure such warrant." Sec. able time, until he can procure such warrant." Sec. 40 defines the necessary steps to be taken to prosure a warrant and to arrest the offenders under the search and seizure process.

Counsel for respondent raised the point that the respondent could not be arrested until after the issue of the warrant, for the reason that the Legislature having enacted a method of procedure, that method must be strictly pursued; that this special enactment of procedure excludes the right to proceed under the general law as to the arrest of persons found violating the law, as had been done in this case.

this case.

The Supreme Court has said as regards sec. 39:
"The power given by this statute to an officer to seize property at pleasure, without a warrant, is an extraordinary one, and can only be justified on the ground that the public good and the prevention of crime require it. The statute should be construed strictly."

Arrichty. The statute should be construed stricity. Mr. Rand claimed that the respondent had been illegally arrested, and moved that he be discharged. The case was continued to Saturday morning, when the court overruled the motion and ordered the respondent to be arraigned. Judge Gould said that he thought the point more or less well taken, but that in a court of a limited jurisdiction he did not feel like making a decision to that effect. It should be taken to a higher court.

The case was finally continued until Tuesday morning. The counsel for the prisoner immediately applied to Judge Haskell for a writ of habeas corpus. At a hearing of the question Saturday afternoon, Judge Haskell denied the writ with prejudice.

A Pleasant Occasion. Mr. F. H. Morton of this city, who has occupied a position in the freight office of the Maine Central railroad, has resigned his position here to accept a place in the freight office of the same road in Augusta. Saturday evening about twenty of Mr. Morton's friends called upon him at his residence and presented him with an elegant smoking set as a token of their esteem and wishes for his future success. The evening was most pleasantly spent, the company beguiling the hours with games and songs and departing with a general expression of their hearty good will toward Mr. Morton.

The Almshouse. At a meeting Saturday of the board of overseers of the poor, Mr. and Mrs. Thomas H. Randall were elected keeper and matron, respectively, of the almshouse. Mr. Randall has for several years past been the proprietor of the Eagle Hotel, which he has made a firstrate house and a financial success; and his success in the new position is assured. Rev. W. T. THE LAW AND ORDER LEAGUE. Meeting Last Night at the Congress Street Methodist Church.

The Congress street Methodist church was well filled last evening. Rev. E. T. Adams presided at the meeting of the league, and in opening made some interesting and stirring remarks on the duties of the members of the Law and Order League. After his short speech he introduced Mrs. Crocker, of the Woman's Christian Temperance Union. Mrs. Crocker, who for a long time has been an arduous worker for the temperance cause, spoke hopefully of the future, and thought that the cause had been set many years shead instead of back, as many people had seemed to her to think. She spoke of the great amount of temperance legislation during the past winter, and thought that this was most decidedly a good indication for the future.

Mrs. Cox followed Mrs. Crocker, and spoke further of woman's duties and woman's work. She had much to say of the bad reading of the young, and thought that it was a part of the duty of the Woman's Union to do all possible to suppress the degrading literature that is being circulated to such an extent among the

Rev. Mr. Adams next introduced Rev. Mr. Crosley, who made the closing remarks of the evening. He dwelt somewhat at length on the necessity of getting the entire public sentiment in favor of the enforcement of the law. Having been in other countries and having made observations there with special reference to temperance, he said he had reason to be thankful for our laws; but at the same time he thought if such laws existed in other countries -England, for instance-they would be far better enforced. With Mr. Crosley's remarks the meeting closed.

much talked of and long waited for Cadets' ball, which will take place at City Hall, Tues day evening, April 14th. The programme embraces a concert by Chandler's full military band, from 7.30 to 8.30, drill by the company, and a well selected order of dances. This is the fifteenth annual reception tendered the cit-izens of Portland by the Cadets, and they can rest assured that it will be carried out in every detail, with the strictest regard for the pleasure of the participants. If any doubt exists as to the success of this reception, we refer, by permission, to the hundreds of young ladies who have attended the previous fourteen. The management is in the hands of one of the Cadets' most efficient committees, which ensures a grand success. Invitations have been sent to the Governor and Staff, the line officers of the First and Second Regiments, and the officers of the various military companies in the city. Chandler has prepared an excellent band concert, which will include some of the most popular music of the day. The orchestra will consist of fifteen pieces. We predict for the Cadets their usual success, and are confident that those who attend this event will be as

well pleased as in former years. Gilbert's Juvenile Ball. Saturday afternoon the little folks who have been learning the intricacies of the terpsichorean art under the excellent instruction of Mr. M. B. Gilbert, gave their annual ball at City Hall. The affair was most successful, and the dancers were watched by a large and interest ed audience. In the grand entree, thirty-eight couples marched into the hall, headed by the Professor in person, the leading couple being Master Harry Clark and Miss Mabel Wood, A programme of twelve dances had been prepared, the first dance after intermission being the military German, which was led by Master Frank Bradley and Miss Lottie Bruce. The children were all in fine feather, and presented a very pretty sight, some of the costumes worn by the little misses being quite elaborate. Miss Alice W. Lamb received the first prize for selling the largest number of tickets, an elegant cabinet picture of Prof. Gilbert, encased in a handsome plush frame. The second prize,

an autograph album, bound in alligator, was awarded to Miss Annie Rich. Death of a Former Maine Man. News has just been received by the relatives of the deceased, of the death, March 5th, 1885, of Alvin M. Higgins of Logansport, Indiana. Mr. Higgins was born in Westbrook, now Deering, December 16, 1803, and spent his childhood in that town. He was the last survivor of a family of eight children-two daughters and six sons. The elder sister, Olive Ilsley, married Elijah Allen of Cumberland, and Clarissa married Hiram Jones of Lewiston. Five of the brothers, led by ambition, sought homes in the West, where they lived honored and influential lives, "steadfast in the strength of God." The youngest son, Simeon H., well remembered by the elderly citizens of Portland as an honored and exemplary man, remained at home, caring for his aged mother, who passed away in the 93d year of her age.

The managers of the base ball interests of the several colleges in the State met at Colby Saturday and made out the following schedule of games. Each nine, as will be seen by examining the schedule, will play three games with each of the other nines, the third game in each case to be played on neutral ground. Four of the eighteen games will be played in Lewiston, five in Waterville, three in Orono, four in Brunswick and two in Bangor.

Notes.

F. S. Bettwhistle of Troy has signed as pitch er with the Haverhill club. The team will be made up as follows: Bertwhistle and Robinson, battery; Prince, ib.; Duvall, 2b.; Bell, 3d; Bradley, s. s.; Twombly, l. f.; Titcomb, c.; with one of the change battery in right field.

The Lawrences have signed Vadebonceur as catcher, formerly of the Philadelphias and the Yorks of York, Pa., and Burns of last year's Jersey Citys. Kirmes of Melrose will probably be one of the team. He is a good fielder and base runner and a fair batter. All the troubles relative to the team and the grounds have been satisfactorily adjusted, and a successful season is expected.

McDonald of the Domestics of New York of last season is likely to get himself into trouble. He is a splendid player, and was offered a position in the Lawrences. He accepted the terms by postal card, and afterward telegraphed that he had signed with the Jersey Citys. Manager Burnham proposes to make this a test case, as the Eastern New England clubs are members of the national agreement.

as the Eastern New England clubs are members of the national agreement.

The Boston Unions have arranged the following games: The Boston league club on the South end grounds, April 4, 6, 7, 8; Waterbury, Conn., 16th; Amherst College at Amherst, 20th; Providence league team 24th; Portland, 25th; to be followed by a week's trip among the Langestiant, clubs.

20th; Providence league team 24th; Portland, 25th; to be followed by a week's trip among the Connecticat clubs.

Manager McGunnigle of the Brocktons has signed Kent Howard as left fielder, Walter M. Eldridge as second baseman, and is in correspondence with Cudworth of Providence, Turbidy of Webster and Bignell of Taunton.

The Eastern New England Base Ball Association allows no club to pay a salary of more than \$75 a month to any player.

The Brockton Base Balliclub will play on the grounds of G. W. Kingman, which are about 300 x 450 feet. Manager McGunnigle will give band concerts and firework displays in the summer evenings.

The Portland High School pupils formed a base ball association on Saturday and appointed a committee to complete the arrangements and report next Saturday.

The Pine Tree Base Ball Association at Kent's Hill Seminary met Friday and elected the following officers: Geo. Tompson, president; S. Fogg, Manager; L. Norton, secretary; G. Sisson, treasurer; Merrill, Prebble and Carver, directors. Nearly all the members who composed last year's team are in daily practice and promise to make a strong nine. Games will be arranged with Colby, Bowdoin and Bates if possible.

THE STRENGTH OF JUDAISM. Rev. Mr. Blanchard's Lecture in the Congress Square Church Last Eve-

Congress Square church held a large and interested audience last night when the Rev. Mr. Blanchard lectured on the strength of Judaism. The services which preceded the lecture were appropriate and impressive, and the closest attention was given Mr. Blanchard during his remarks.

The lecturer said that it had been his purpose in this course to do justice to all religions and to show the superiority and strength of Christianity. In the religion of China the exstence of a God is neither affirmed nor denied but the goodness of man is made the chief element. In Brahminism the dogma found, is that nothing exists save spirit. Buddhism, a protest to Brahminism affirms that man is the greatest of all creations. The religion of Zorcaster is a belief in a struggle between good and evil. It has been shown in these ectures how the religions of Greece and Rome were unfit to survive and so were allowed to perish. The belief of the ancient Scandinavians has been described and the limitations and power of the religion of Mohammed have been discussed. The last

lecture treated of the religion and religious ceremonies of the Ancient Mexicans. The strength of Judaism arises from three great causes which are a belief in the unity and spirituality of the Deity, an appreciation

and spirituality of the Deity, an appreciation of the fact that salvation comes only through righteousness, and the firm belief of the Jews in the dominion of Israel.

In all the religions we have studied was the recognition of the one unnamable ruler of the universe. But in all these beliefs polytheism was present and many gods received the homage due to one. This was their weakness, and the strength of Judaism lies in its vivid perception of the one God who rules over all things. The doctrine of the unity of God was taught by both Abraham and Moses. As we follow the story down, and look into the psalms and read the words of the prophets, we see the constant effort to rise from the seen to the unseen. And in this lay much of the strength of the religion. Other religions have died because they could not adapt themselves to the rules of reience. Judaism survivos because science can only reinforce its doctrine.

Mr. Blanchard called attention to the fact, as before mentioned, that science was of great aid to religion.

as before mentioned, that science was of great aid to religion.

The belief that righteousness is salvation is the second source of strength in Judaism. In other religions we find the idea that man may expiate crime by some great work and to this dogma the religious have succumbed. In Judaism we see that right-doing is what God desires, and that he will not accept wrong doing even if accompanied by expiatory works. The history of the people shows that there were many times in which men lost sight of this element of strength and believed that by were many times in which men lost sight of this element of strength and believed that by certain acts such as reading through the scrip-tures, the punishment of evil might be avert-ed. It was in these periods that the prophets appeared with their cry of "cease to do evil: learn to do right!"

Ledging prevails to day because of this be-

trodden blacks. As we study the history of the Jews in the past 1800 years we see the greatness of the down trodden race and the wickedness of the dominant people.

The third element of strength in this religion of the Jews is their belief that to them will be given the dominion of the earth. The speaker said he believed that this is true, not, however, as the Jews believe in their literal reign, but in the coming deference of the world to the highest form of Judaism, which is Christianity.

world to the highest form of Judaism, which is Christianity.

Many have a belief in the coming power of this race. Many believe in the fival expulsion of the hate! Mohammedans from the land of the Jews. Study this people and their country and see what they have been and are. In the middle ages, they were the teachers, and today they occupy great and high positions. In music you have Mendelssohn, in science Spincza. But whether or not outward power is given these people, they shall finally have dominion in the sway of their belief. Do we forget that Jesus Christ was a Jew, born of Jewish parents, taught by Jewish methods? The strength of Judaism is the strength of Ohristianity.

Christianity.

The speaker dwelt on the importance of a study of the history of the Jews, their literature and customs. Success in the present is earned by a study of the past. To the Jewish people was given the mission of teaching God and his spirituality, and to Israel therefore is given the dominion of the earth.

The next lecture on the Strength of Christianity with a strength of the strengt tianity, will be given on the last Sunday even-

ing in April, and will be the closing lecture in Mr. Blanchard's instructive course.

PULPIT AND PLATFORM.

FIRST BAPTIST. At the First Baptist Church, in the morning Rsv. Dr. Small preached from the text in Acts 20:28-"Do thyself no harm." The preacher referred to the fact that our world gives on every hand evidence of injury, wrong, suffering and misery of every degree, resulting from various causes. These classes of ills, their degrees of importance-physical, mental and moral,—and their sources were considered; and the conclusion was reached that of all the injuries suffered by men, those inflicted by the sufferers themselves are the most fearful and irremediable; and the crowning injury of all that an individual can inflict upon himself is the voluntary and persistent neglect of the offers of salvation through our Redeemer. Redeemer.

In the evening, Dr. Small gave the closing lecture in the series on the character of Daniel. The special subject of the evening was "Daniel approved, or the crown of the result of the property of the series of Daniel. The special subject of the evening was "Daniel approved, or the crown of the principles brought out in the course of the principles brought out in the course of the principles brought out in the course of these lectures. The first stated was that the primal foundation stone of true greatness is the conviction of our seconntability to God and the determination to obey him at all cost; and the acquisition of this convict of the most triumphant vindication. Daniel was honored and revered by the kings and princes of the earth; but greater honor than this came to him. He had stood firm in all the trials brought upon him and had been advanced to high honor; but his heart was sad over the misfortunes of his people and his soul went out in perpetual prayer for the retoration and prespectly of Zion. And now God was about to bestow upon him infinitely greater honor; for the Angel Jehovah gave him ag limpse of the divine glory and revealed to him the solemn scenes of the world to come. It was made known to him that the most honored in he future world are those who turn many to righteouness in this life; and we see in the narrative of the highest cown of true greatness—not the world to come. It was made known to him that the most honored in the future world are those who lutter world are the being sorred word, that to Daniel came the highest cown of true greatness—not the early present means and at whatever cost. The lectures have been deeply interesting and cannot fail to be productive of good to those who have enjoyed the privilege of listening to them. Prepared at the request of a society composed mainly of the younger members of the congregation, these lectures have given an opportunity to present most effectively the foundation principles of real greatness not only in youthful character, but a

Hall yestererday afternoon and there were several reterday afternoon and there were several requests for prayers. The boys were addressed by Rev. Dr. Bashford and Messrs W. S. Corey, Edgar R. Payson and A. B. Merrill.

At the meeting for adults in the evening, conducted by Mr. V. R. Foss, there were eight requests for prayer. Among those who assisted in the service were Mr. Snow of the Cambridge Y. M. C. A. and Rev. Donald McDongail of New York city. The hall was crowded. The fine singing of the congregation was made additionally attractive by the presence of a quartette choir composed of the Misses Aagerson and Messrs. A. B. Merrill and George F. French.

That Tired Feeling

The warm weather has a debilitating effect, especially upon those who are within doors most of the time. The peculiar, yet common, complaint known as "that tired feeling," is the result. This feeling can be entirely overcome by taking Hood's Sarsaparilla, which gives new life and strength to all the functions of the body.

"I could not sleep; had no appetite. I took Hood's Sarsaparilla and soon began to sleep soundly; could get up without that tired and languid feeling; and my appetite improved." R. A. SANFORD, Kent, Ohio. Strengthen the System

Hood's Sarsaparilla is characterized by fire peculiarities: 1st, the combination of remedial agents; 2d, the proportion, 3d, the process of securing the active medicinal qualities.
