FAMILY-CENTERED CARE OUTCOMES IN A PRESCHOOL SETTING

Does a family-centered care approach
with preschoolers improve occupational therapy outcomes?

Literature Reviewed

Level I: 3 systematic reviews
Level III: 2 cross-sectionals
Level IV: 1 single case design, 1
pilot study, 1 descriptive survey
Qualitative: 2

Conclusion

There is moderate evidence to
suggest that family-centered
care improves outcomes, but
more specific research is
needed.

Recommendations for Sandcastle

- Consideration of parental perceptions
- Parental support or training
- Telehealth for support
