

Creating Linkable Subject Bibliographies and New Book Lists in Symphony

JoLinda Thompson, MLS, AHIP
Technical Systems Coordinator
Himmelfarb Health Sciences Library
George Washington University

Scope of Presentation

- Creating self renewing bibliographies for Symphony opacs.
- Illustrations from eLibrary, Symphony version 3.2.
- Does not apply to Horizon.

Bibliographies at Himmelfarb

- 14 subject bibliographies + a new acquisitions list.
- Most initiated by reference or library administration.
- Several running since late 90's = migrate well from upgrade to upgrade.

Add Items to Itemlist

Remove Items from Itemlist

Info Desk Policies and the 598 Tag

Finding or Creating an Info Desk Policy for Your Bibliography

Adding the Info Desk Policy in the 598 Tag

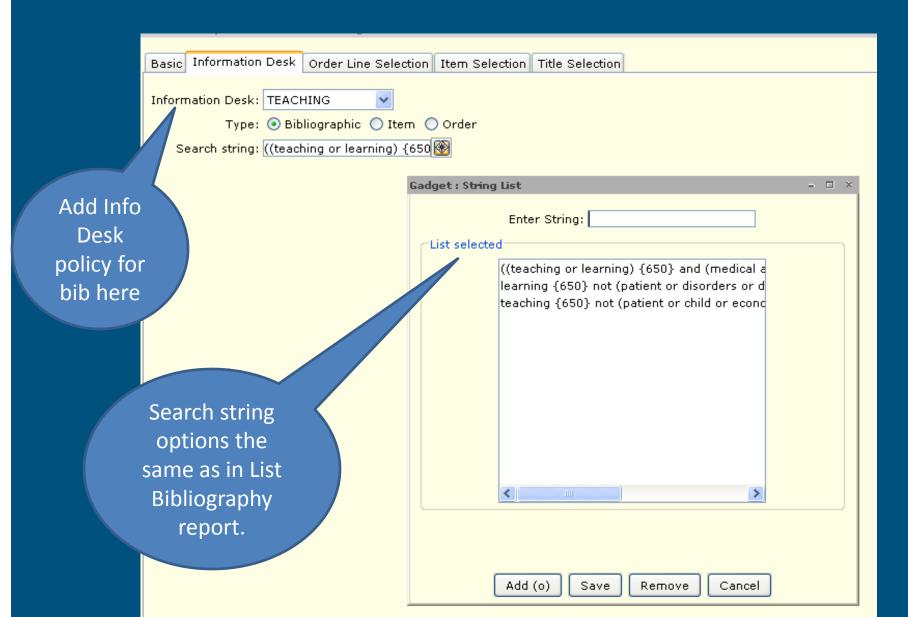

- The Add Items to Item List report adds the 598 tag with the Info Desk policy to your selected group of records.
- The List Bibliography report has similar selections. You can use it to experiment with report logic first.

Sample Selections to Use

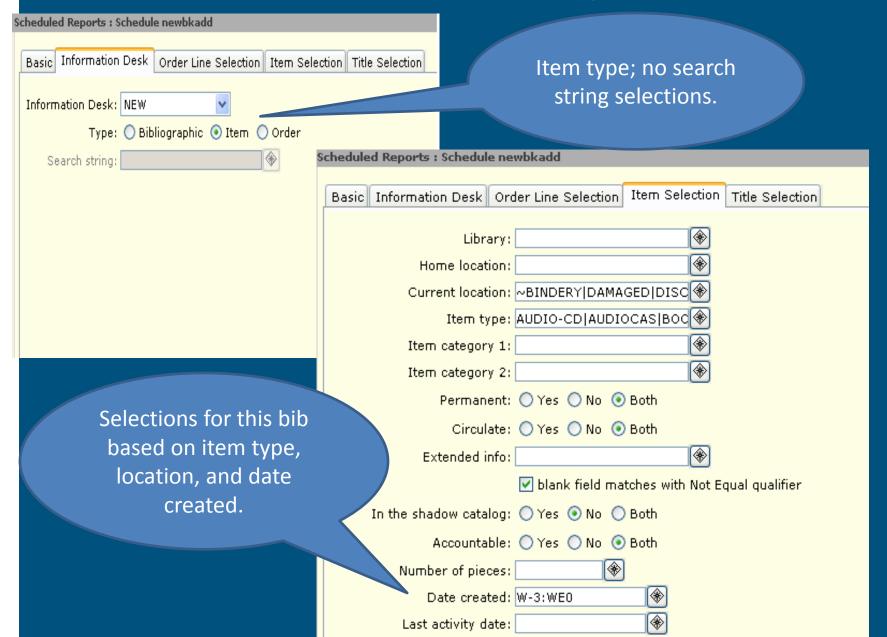

- Selections at title, item, or orderline level.
- For subject bibliographies, use search strings.
- For new acquisitions lists, use date created or cataloged, or location (new book shelf?), or orderline selection.

Add Items to Item List Report for Subject Bib

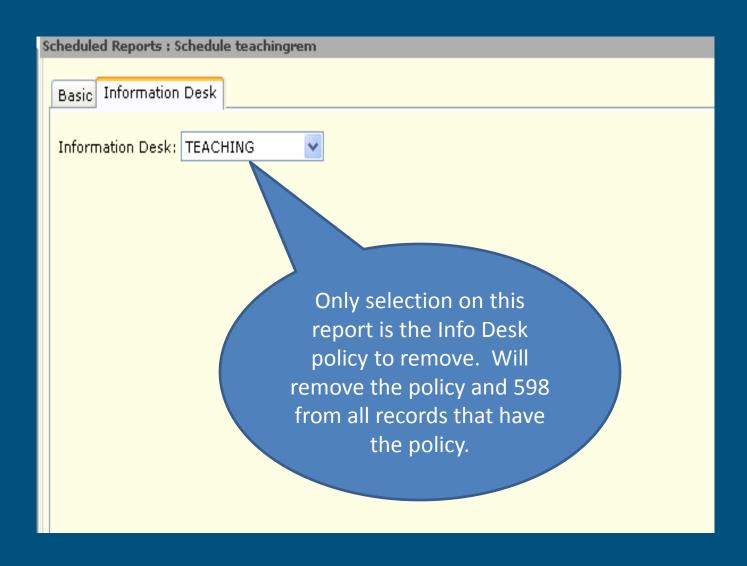

Add Items for New Acquisitions

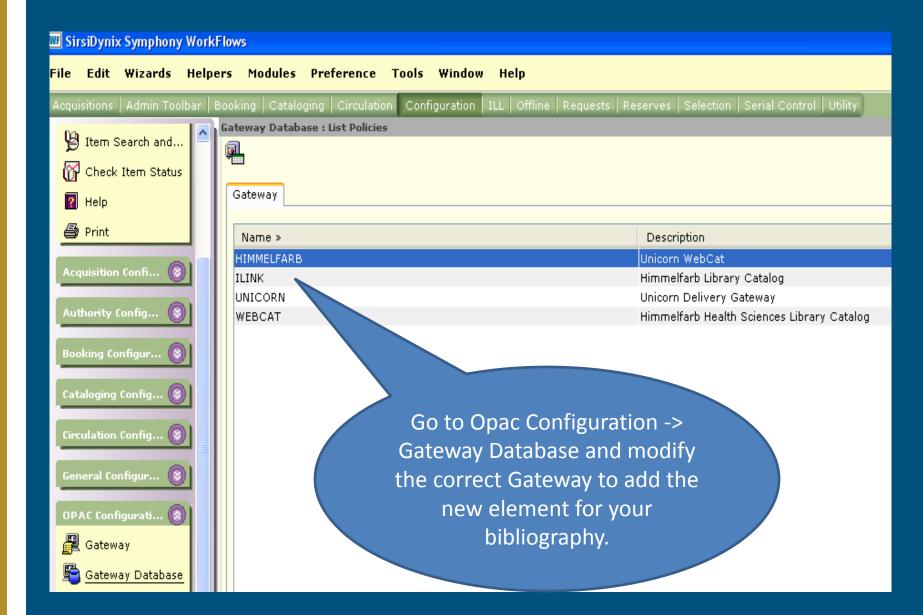

Listing Records with the 598 + Info Desk Policy

- Run adutext first to make entry searchable.
- Run a List Entries from Catalog report from the Bibliographic reports group.
- Selections are:
 - Entry IDs: 598
 - Search String: your Info Desk policy label (e.g. "TEACHING")

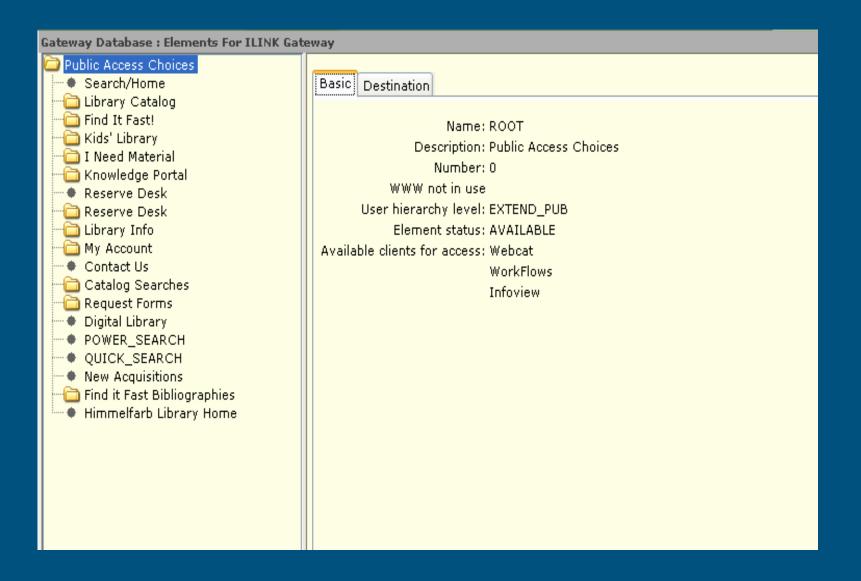

Remove Items from Item List Report

New and Recently Added Public Health Titles

http://opac.medlib.gwumc.edu/uhtbin/cgisirsi/vdi90I/RcM/0/248510019/28/1203/X

Making a Permanent URL

 The underlined portions of the URL are dynamic:

http://opac.medlib.gwumc.edu/uhtbin/cgisirsi/vdi9OIRcm/0/248510019/28/1203/X

 Substitute 0 for the dynamic portions:
 http://opac.medlib.gwumc.edu/uhtbin/cgisirsi/0/0/0/28/1 203/X

Bibliography Maintenance

- Once a year check report logic, especially for those with dated selections.
- Update whenever there are changes in location or material type on the system.
- Usually migrate to new versions without needing any intervention.
