Retraction of:

Talukdar, T and Talukdar, D. 2016. RAPD-based DNA fingerprinting in *Lantana camara* L. ecotypes and development of a digital database platform ‘LANRAD’. *Plant Science Today* 3(2): 72-87. <http://dx.doi.org/10.14719/pst.2016.3.2.177>

Reason for retraction:

RAPD gel images given in the paper seems manipulated. According to the authors, the images were provided by a service provider. The authors failed to provide the original/raw images to prove their innocence. Since the paper is centred around these gel images, the publisher has no other way than to retract the article. The corresponding author had agreed for the retraction.
