

**Interview To
Zamir Dedej**
(Director of Nature Protection Ministry of Environment)

Q: Which is the role of the Environment Ministry in the TWReferenceNET Project?

A: The main role of the Environment Ministry is to coordinate the activities in the environmental field. In the Project TWReferenceNet the Environment Ministry, coordinates the activity in collaboration with the Natural Science Faculty of the University of Tirana and the Institute of Biological Research of the Academy of Science in the project. The support of the ministerial staff to this project is an advantage regarding the involvement of the organs of State in the fulfilment of the objectives of the project and it's also a further guarantee about the achievement of the expected results of the project, considering that Interreg-Cadses programme presents important administrative difficulties.
