

# Imaging of tumor hypoxia with PET

## Citation for published version (APA):

Zegers, C. M. L. (2016). Imaging of tumor hypoxia with PET: a step towards individualized cancer treatment. Maastricht: Maastricht University.

## Document status and date:

Published: 01/01/2016

## Document Version:

Publisher's PDF, also known as Version of record

## Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Propositions belonging to the thesis

**Imaging of tumor hypoxia with PET:  
a step towards individualized cancer treatment**

Karen Zegers  
Maastricht, 9<sup>th</sup> of March 2016

1. A good repeatability of hypoxia PET imaging is essential for its ability to aid hypoxia targeted treatments (*this thesis*)
2. Optimal PET acquisition parameters are necessary to obtain useful imaging data to visualize and quantify tumor hypoxia (*this thesis*)
3. Hypoxia PET imaging gives complimentary information to metabolic FDG imaging (*this thesis*)
4. [<sup>18</sup>F]HX4-PET imaging can monitor changes in hypoxia during treatment (*this thesis*)
5. The use of radiation is essential in state-of-the art healthcare
6. Hypoxia PET uptake is not necessarily inversely related with tumor blood flow (*Iqbal 2015*)
7. Hypoxia PET may be useful to select patient having benefits from nimorazole as radiosensitizer (*Tran et al. 2015*)
8. Hypoxia PET imaging can be used in window-of-opportunity trials to assess the efficacy of new hypoxia targeting drugs and can therefore speed up drug development (*Valorization, Dubois et al. 2015*)
9. All our dreams can come true if we have the courage to pursue them (*Walt Disney*)
10. Be not afraid of going slowly. Be only afraid of standing still (*Chinese proverb*)
11. You have to fight through some bad days to earn the best days of your life
