### Correction to: Surgical Endoscopy

<https://doi.org/10.1007/s00464-019-06682-5>

In the “Results” section of the Abstract, the sentence:

“The mortality rate was similar, but the percentage of patients who suffered from any complication (41.7% vs 24.4%,  $p < 0.01$ ), the complication rate (65% vs 32.2%,  $p < 0.01$ ), chest tube duration ( $p < 0.01$ ) and the hospitalisation rate ( $p < 0.01$ ) were higher for patients converted.”

should read:

“The mortality rate was similar, but the percentage of patients who suffered from any complication (41.7% vs 24.4%,  $p < 0.01$ ), the complication rate (65% vs 32.2%,  $p < 0.01$ ), chest tube duration ( $p < 0.01$ ) and length of stay ( $p < 0.01$ ) were higher for patients converted.”
