company with 15 people but then the staff would increase to 80 thousands of people. By this way Mask wanted to save the population from extinction.

Tesla Motors is an American car company that was established in 2003. Mask joined the company in 2004, investing \$70 billion. Several times the company was on the verge of bankruptcy but Elon made the risky decision: he invested money, took the credits and sold company's shares.

SolarCity is America's first full-service solar provider. They make clean energy available to homeowners, businesses, schools, non-profits and government organizations at a lower cost than people pay for energy generated by burning fossil fuels such as coal, oil and natural gas. They have revolutionized the delivery of clean energy.

## **TIANJIN UNIVERSITY OF SCIENCE AND TECHNOLOGY**

T. Marchenko, *Tianjin University of Science and Technology*

O. R. Gladchenko – *EL Adviser*

I have been studying Economics of Enterprise for 4 years. It fascinates me from year to year more and more. And now I am the student of two universities: Sumy State University and Tianjin University of Science and Technology (TUST) (Tianjin, China).

I have never been to China before so I have known nothing about this country. My first impression was good both about the country and about people with their traditions and customs. What about university. TUST is constructed by the central government of China and the local government of Tianjin, but mainly administered by the latter. It offers disciplines in industry, science, art, economy, management and law. The university offers a whole range of degree programs of different levels, and has long been authorized to accept international students.

The university has two main campuses: the Hexi Campus in the city proper and the TEDA Campus in the Tianjin Economic and Technological Development Area. The university covers an area of about one million square meters, including buildings area of approximately 570,000 square meters. Its teaching equipment is valued at 173 million Yuan while the library covers approximately 26,000 square meters and stores more than 1.6 million books and 3000 professional journals and magazines. There are more than 17,000 registered students at the university.

The university has 1750 full-time faculties, including two hundred and sixty-nine master's and doctoral candidate supervisors. More than 500 faculties hold senior professional technological titles, including members of disciplinary assessment groups of the Academic Degree Committee of the State Council.

The university has undertaken two hundred and twenty-one key projects at the national or provincial level that are supported by the Eleventh Five-year Plan, projects of the “973” and “863” Programs at the state level, Fok Ying Tung Education Fund project, etc. It has won 69 national awards for its scientific and technological progress and the faculty has published more than 10,000 scholarly papers.

TUST adheres to the principle of being an open educational institution. It invites experts and scholars from this country and abroad to present lectures, and conduct research on cooperative projects in science and technology. Furthermore, the university has established academic relations with more than forty colleges and research institutions in the USA, Japan, U.K., France, Russia, Australia, Canada, Germany, Sweden, Ukraine, Finland and Korea.

On the territory of the university there are 2 canteens. One of these has 4 floors, where there are cafes and restaurants on the third and fourth floors. The second one is the Muslim canteen, which also has restaurant on the third floor. The prices for food are acceptable for all students, they depend on the kind of food, which you want to buy, the range of it is 3-12 Yuan per meal.

All Chinese students live in the dormitories, which have from 6 to 11 floors. International students live apart of Chinese in the International Exchange hotel, which consists of the 5 floors, foreign students live only on the 4 and 5th floors, 1-3 floors are for guests.

Also, there are 2 posts offices and police offices, 7 small shops (where you can buy fruits, dried fruits, canned foods, Chinese fast food, household goods, chancellery goods and so on), 1 hairdressing salon, stadiums (both inside and outside) and swimming pool, which is under construction.

So, life here differs from life in Ukraine, I like something of that, something is strange for me, but here I really enjoy my life!
