From the Editors

FROM THE EDITORS:

Greetings and welcome to the seventh issue of the Journal of Cybersecurity Education, Research and Practice (JCERP). In Volume 2019, Issue 1, we are pleased to share the following articles:

- Wasim Alhamdani's article "Adopting the Cybersecurity Curriculum Guidelines to Develop a Secondary and Primary Academic Discipline in Cybersecurity Postsecondary Education" examines the role of ACM guidelines and the NSA/DHS CAE in Cyber Ops program on secondary Cybersecurity education.
- Scott Belshaw's article "Next Generation of Evidence Collecting: The Need for Digital Forensics in Criminal Justice Education" examines the results of a survey of police agencies as foundational support and knowledge for the development of a Digital Forensics program in Criminal Justice.
- Lucy Tsado's article "Cybersecurity Education: The need for a top-driven, multidisciplinary, school-wide approach" examines the need for and support of non-CAE institutions to develop programs to assist in meeting the national need for cybersecurity professionals.
- Bryson R. Payne's article "Car Hacking: Accessing and Exploiting the CAN Bus Protocol" examines a vulnerability in smart cars along with the history of "car hacking", which can provide a learning opportunity for academic institutions.
- Charles J. Lesko Jr.'s article "A Design Case: Assessing the Functional Needs for a Multi-Faceted Cybersecurity Learning Space" examines the lessons learned in the development of physical space to support cybersecurity center, along with its activities.

Effective August, 2019, the Journal, along with all Center for Information Security Education associated functions, will be transitioned into the KSU Institute for Cybersecurity Workforce Development, as Dr. Whitman assumes the position of the Executive Director. This will not negatively affect any of the efforts formerly performed by the CISE, and in fact is expected to improve our efforts and increase the visibility and service we are able to provide to our constituencies.

We would also like to take this opportunity to thank Dr. Carole Hollingsworth for her assistance and support of the Journal for the past two years. Due to the reorganization of the CISE, we will be transitioning a number of roles to new personnel. Dr. Hollingsworth's efforts in the journal have provided a great deal of assistance and we thank her for her contribution.

Vol. 2019, Issue 1 is one of the largest issues of the Journal to date, and we are enthused about the increase in interest. We encourage you to submit a paper for consideration for publication.

On behalf of the editorial team:

Dr. Mike Whitman

Dr. Herb Mattord

Dr. Carole Hollingsworth
