# PULASKI COUNTY

# Executive Summary

## The Pulaski County Report Card highlights how students in area schools are performing.

Our goal is to help parents, school personnel, community members, and policy makers understand how effectively the students in their community are being served.

Pulaski students are demonstrating similar growth in achievement on the ACT Aspire as students in the state overall, but in achievement, graduation rates, and School Quality and Student Success, Pulaski County schools are performing below the state average.

We think the **Growth Score** is the most important measure of school quality. Growth Scores measures how much individual students at the school increase their achievement scores from year to year. Using growth as a measure of school success levels the playing field because all students are evaluated by the extent to which they grow from their own starting point; thus, students facing socioeconomic barriers to achievement have the same opportunity for growth as do their peers from advantaged backgrounds. All students can grow their understanding, and we should expect all schools to foster student growth, regardless of family income, first language, or learning needs. To be in the top 25% of schools in the state, elementary schools need a growth score of 83 or higher, middle level schools need a growth score of 82 or higher, and high schools need a growth score of 81 or higher.

The **Achievement Score** is a familiar measure of student performance that reflects how well students score on the state's annual exams. Schools serving more advantaged students typically receive "good" scores because a high percentage of their students passed, while schools serving a larger percentage of students who lived in poverty, participated in special education, or were learning English often receive lower scores because a higher percentage of their students were unable to pass the test. The clear connection between Achievement Scores and student demographics suggests that point-in-time test scores are not a good measure of how well a school is educating students, but rather a reflection of the wealth of the community being served by the school.

The **School Quality/ Student Success Indicator Score** is a relatively new indicator for schools that includes measures like student attendance, reading at grade level, science achievement, and science growth. High school scores also reflect student enrollment in advanced courses, computer science courses, and community service learning. ACT performance and GPA are also considered. This indicator comprises a relatively small portion of the overall school index, and includes measures not previously reported, which may mean that differences between district scores may reflect differences between how the data are collected and reported.

Schools are assigned **A-F letter grades** to help parents and the public better understand how well a school is performing. This grade is based on an Overall index that is a combination of a Growth score, an Achievement score, and School Quality/ Student Success Indicators.

This report card presents information about these key performance indicators for the districts in Pulaski counties. The Growth, Achievement, School Quality, and Overall scores of the four traditional districts are compared to the average for that group, and the scores of the 13 public charter schools are compared to the average scores of all public schools in Pulaski County.

# Highlights

## Highest Overall:

- LISA Academy: Highest Growth
- Academics Plus: Highest Achievement
- Academics Plus: Highest School Quality Score
- LISA Academy: Highest Graduation Rate

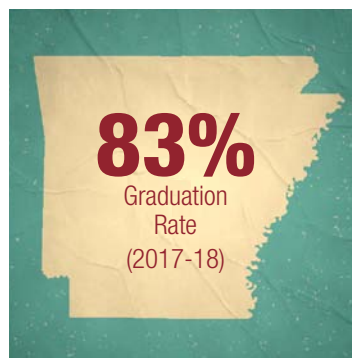

## Highest Traditional School District:

- NLR School District: Highest Growth (but all very similar)
- PCSS School District: Highest Achievement
- PCSS School District: Highest School Quality Score
- PCSS School District: Highest Graduation Rate

## Highest serving high poverty students:

- Little Rock Prep: Highest Growth
- NLR and Little Rock School District: Highest Achievement
- Arkansas Virtual District: Highest School Quality Score
- Jacksonville School District: Highest Graduation Rate

There are many things that contribute to a 'good' school, but we believe **student academic growth is the most meaningful indicator** that districts are doing what's really important: helping all students learn. There is evidence of variation in growth rates between Pulaski County schools, even those within the same districts. We recommend district and school leaders examine where their students are not demonstrating high growth, examine high growth schools to see what those schools are doing differently, and consider how they can further support learning for their students.

# Pulaski County Overall

Enrollment: 57,293 | 112 Schools

● Pulaski County

● State

Each school is assigned a **letter grade (A-F)** based on their overall score.

**Student Characteristics:** Why is this important? Students who participate in Free/Reduced lunch programs, or are identified as Limited English Proficient are At Risk for not meeting proficiency targets or graduating. When comparing district performance, it is important to consider the percentage of At Risk students enrolled.

## Letter Grades, Finance, ACT, & Graduation

Per Pupil Expenditure	\$11,623	\$10,005
ACT Composite Score	19.2	19.9
Graduation Rate	83%	89%

**Student: Teacher Ratio 13 to 1**

## Student Characteristics

The **annual per-pupil expenditure, ACT Composite score,** and percentage of **students who graduated** 4 years after entering high school are additional indicators of school performance.

Based on the grade levels served by a school, the state categorizes each school as **“Elementary”**, **“Middle”**, or **“High”** school level.

## Growth Score

### Growth Score:

This indicates how much the district’s students in grades 3-10 improved over time on state assessments in English language arts and mathematics. This score also includes how well non-native speakers are progressing toward English language proficiency.

Districts serving fewer At Risk students don’t always have higher growth scores. Growth scores are less related to student characteristics than achievement scores.

Growth scores range from 69 to 92.

# Pulaski County Overall

- Pulaski County
- State

**The Achievement Score** indicates how well the district's students in grades 3-10 performed on state assessments in English language arts and mathematics. This achievement score is weighted so schools earn more points for students in higher achievement levels.

Districts serving fewer At Risk students typically have higher achievement scores. Achievement scores are more related to student characteristics than growth scores.

Achievement scores range from 1 to 117.

**The School Quality and Student Success score** combines several measures of student engagement, readiness, completion, and success.

Schools get points for student attendance, reading at grade level, science achievement and science growth. High school scores also reflect student enrollment in advanced courses, computer science courses, and community service learning. ACT performance and GPA are also considered.

School Quality scores range from 1 to 90.

## Achievement Score

## School Quality/ Student Success Indicator

## Overall ESSA Index

This is the **overall score** assigned to schools in the district. The overall score is based on several components: Achievement, Growth, School Quality and Student Success, and Graduation Rate for high schools.

# *Traditional Public Schools* (TPS)

Traditional Public School Districts are systems of free public schools in which students are assigned to schools based on their home address. Students may apply for transfer to another school within their assigned school district, or to a school in a different district. Districts may accept or reject transfer requests.

# *Open-Enrollment Public Charter Schools*

Open-Enrollment Public Charter Schools are free public schools that can draw students from across district boundaries. Students who want to attend an open-enrollment charter school complete an application. Charter schools are prohibited from selecting students based on academic performance, student demographic characteristics, family income, or any other type of information. If more students apply to attend the charter school than there are seats available, the school must hold a public, random lottery to select students.
