CEREBROVASCULAR RISK FACTORS FOR DEMENTIA

The breakdown of cerebrocortical capillary integrity in Alzheimer's disease,
experimental cerebral hypoperfusion and chronic hypertension

Financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged.

The studies described in this thesis were carried out at the Department of Animal Physiology, University of Groningen, The Netherlands and were financially supported by the Faculty of Mathematics and Natural Sciences, University of Groningen, The Netherlands.

Prof. Dr. K.L. Leenders

Prof. Dr. A.B. Steffens

“Een mythe is individueler en geeft het leven nauwkeuriger
weer dan de wetenschap, die met doorsnee-begrippen werkt.

Deze zijn te algemeen om de subjective veelvormigheid
van een individueel leven recht te doen.”

C. G. Jung

Tanárainnak (aan mijn leermeesters):

Gál Bélának és Fekete Évának

Contents:	page
Chapter 1. General Introduction	9
Chapter 2. Cerebral Hypoperfusion Yields Capillary Damage in the Hippocampal CA1 Area that Correlates with Spatial Memory Impairment	39
Chapter 3. Pathological Features of Cerebral Cortical Capillaries Are Doubled in Alzheimer's Disease and Parkinson's Disease	55
Chapter 4. Similar Ultrastructural Breakdown of Cerebrocortical Capillaries in Alzheimer's Disease, Parkinson's Disease, and Experimental Hypertension. What Is the Functional Link?	75
Chapter 5. Calcium Antagonists Decrease Capillary Wall Damage in Aging Hypertensive Rat Brain	87
Chapter 6. Summary and Conclusion	109
Nederlandse samenvatting (Summary in Dutch)	146
Magyar nyelvű összefoglalás (Summary in Hungarian)	150
Acknowledgements	153
List of Publications	155
Curriculum Vitae	158
