Erratum

Erratum to Contact Dermatitis article *Systematic review of cost-of-illness studies in hand eczema*, 2016 Aug;75(2):67–76.

In this review not all of the amounts that are mentioned in the abstract and body of the text match the amounts in the table (Table 2). The table shows the correct prices.

In abstract and text we erroneously state that the lowest boundary of total costs is €1712. This should be €1311.

In abstract and text we erroneously state that the highest boundary of direct costs is €3829. This should be €3722.

In the text we erroneously state that the highest boundary of medication costs is €904. This should be €943.

This has been the consequence of the merging of two tables in an earlier version of the manuscript. Unfortunately this error was subsequently overlooked.
