Reproduction, growth and immune function:
novel insights in equatorial tropical birds

The research presented in this thesis was carried out at the Animal Ecology Group, Groningen Institute for Evolutionary Life Sciences (GELIFES) at the University of Groningen, The Netherlands.

The research was financially supported by The Netherlands Fellowship Programme (NFP) of Nuffic, grant No. CF6833/2010 to Prof. Dr. Irene Tieleman (BIT) and this author (HKN), the Netherlands Organization for Scientific Research ((NWO-VIDI to BIT), the Young Academy project grant to BIT and HKN, the University of Groningen to H.K.N., the Schure-Beijerinck-Popping Fonds to BIT and HKN, and Dr. J.L. Dobberke foundation to BIT and HKN National Museums of Kenya (employer) provided support in kind to HKN.

The printing of this thesis was funded by the University of Groningen and the Faculty of Science and Engineering (FSE)

Reproduction, growth and immune function

Novel insights in equatorial tropical birds

Phd thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 14 June 2019 at 11.00 hours

by

Henry Kamau Ndithia

born on 31 December 1971
in NAIVASHA, Kenia

Supervisor

Prof. B.I. Tieleman

Co-supervisor

Dr. M. Muchai

Assessment Committee

Prof. B. Helm

Prof. M.E. Visser

Prof. L. Lens

Contents

Chapter 1	General Introduction and scope of thesis	7
Chapter 2	Year-round breeding equatorial Larks from three climatically-distinct populations do not use rainfall, temperature or invertebrate biomass to time reproduction	19
Chapter 3	Geographical and temporal variation in environmental conditions affects nestling growth but not immune function in a year-round breeding equatorial lark	43
Chapter 4	No downregulation of immune function during breeding in two year-round breeding bird species in an equatorial East African environment	67
Chapter 5	Environment, not reproduction explains variation in immune function in three year-round breeding equatorial lark populations	85
Chapter 6	General discussion and synthesis	107
