Report 1991-06a: An Addendum to The Math Placement Tests: Relationships to Mathematics Course Performance, Mathematics Course Selection, and Other Predictors of Academic Achievement.

This report analyzed the scores students had on the Basic Algebra version of the Math Placement Tests and is an addendum to Report 1991-06, which studied the Intermediate and Advanced versions. The report found that cut-off scores for the Basic were too low for Math 102, but fine for Math 151.

Beginning in 1993, however, the Basic version of the Math Placement Tests was dropped for use at Western.
