

Undergraduate Pathway Roundtable
June 21, 2018

1. What successes and challenges have centers had with the Comprehensive Pathway?
2. How do undergraduate Pathway programs deal with changes to university requirements? Examples could include changes to university courses, placement testing, online courses, etc.
3. How are centers working to lower GPA entry requirements for their pathways? Can they share specific data points and rationales that have been provided to stakeholders?
4. How do centers support their extended undergraduate Pathway students? Do they offer special programming (support courses, advising, required tutoring, etc.) to help these students succeed?
5. Are there any new undergraduate Pathway initiatives that have been wildly successful that a center would like to share? If so, what was the outcome on student success?
