DR. OGILBY SPEAKS IN CHAPEL ON DEMOCRACY

The Relation Between Democracy and the Christian Gospel is Theme of Talk

At the Chapel Service Wednesday morning, January 5, Dr. Ogilby spoke on "Democracy and the Christian

"Back in the haze that dims the dawn of civilization, perhaps before the Trojan War, the history of the Mediterranean Sea begins with a series of thrusts and salients from Africa and Asia Minor into Europe with counter-thrusts back across the sea to the South and Southeast," began Dr. Ogilby. "In general the powers pushing to the North were autocratic governments, empires and despotisms, while the forces resisting them were democratic-the citystate of Greece, the maritime nations of the Northwest, and the various racial groups that owe origin to the Germanic tribes. freedom-loving With a few qualifications, the Mediterranean may be considered the frontier between freedom and autoc-

Romans Challenged

"The most potent exception occurred at the beginning of our era. when the civilized world was under the control of a single government, or ginally established in the Italian peninsula under the form of a republic, but later transformed into a world the Southeast until finally its very existence was challenged, not by force but by a spiritual idea. The Empire to forty-two states and 150 colleges. at first tried to exterminate this new force and then determined to try to keep house with it, to its own ultimate destruction. For when Constantine took sides with Athanasius in 323 at the Council of Nicaea, he signed the death-warrant of the Roman Empire.

"It is important to understand this. The controversy between Athanasius and Arius seems to us phrased in terms of another day, quite incomprehensible to us; may we not dismiss it as an ancient academic dispute, with no relation to our lives today? Certainly not; the issues involved in that dispute have come up again and again, and are vital now.

Relation to God

beginning of the fourth century was the nature of Jesus Christ and His relation to His Heavenly Father. Professors Dadourian, Krieble, Athanasius, reading in the Gospel that Jesus said, 'I and the Father are one', asserted that the Son was of the very same substance as the Father, not created by Him but partaking of His Eternity. When therefore God in Christ entered into humanity, all mankind by that Incarnation entered into an organic relationship with God. To Arius, however, God was not so much sovereign truth and goodness as he was arbitrary power, by which He defied Christ. Naturally such a conception fitted well the Imperial idea. As Constantine's decision in favor of Athanasius at Nicaea was obviously a matter of policy rather than of conviction, it followed that the Emperor soon reversed himself, leaving Athanasius contra mundum. For Athanasius was forced by the logic of his theology to deny the fundamental claim of the Emperor, that of exercising

NEW MEMBERS SELECTED BY PI GAMMA MU SOCIETY

Initiates Chosen from Faculty and Students by National Honor Society

At a meeting of Pi Gamma Mu, National Social Science Honor Society, held Wednesday, December 15, Clem Motten was elected president, Frank Haggarty was elected vicepresident, Professor Cuningham was re-elected secretary-treasurer, and Professor Humphrey was elected the executive officer. Professor Taylor and Professor Altmaier of the faculty were elected to the society. Ray Armstrong, John Brennan, Dudley Clapp, Francis Burke, Ben Globman, Carl Hodgdon, and Ed Spring were elected to the honorary fraternity from the senior class, and Frank Barnes from the junior class was also elected.

The society was brought to Trinity last year by Professor Edward F. Humphrey, Head of the History and Government Department, and by Professor Edward L. Troxell of the Geology Department. It was formally inducted into membership as the Connecticut Alpha Chapter of Pi Gamma Mu.

Pi Gamma Mu was founded in 1924 at Southwestern University, Kansas, by Doctor Leroy Allen, the present national secretary. Its purpose is to promote the work being done in the field of the Social Sciences, and TRIN NATATORS SPLASH to do the same things for this field empire on an Oriental model. Roman of learning that Phi Beta Kappa does control was pushed to the South and for the Classical Arts and Sigma Xi for the pure sciences. Since its foundation, Pi Gamma Mu has spread

> Requirements for admission are strict enough to secure a select body that is really interested in the movement. The necessary requirements are: at least twenty semester hours in the Social Sciences with an average of eighty-five or better, outstanding work in that field, and upon the recommendation of a faculty member, a unanimous vote of those present at a meeting.

> Initiation will be held sometime this week at the University Club. The society is hoping to have the national vice-president of Pi Gamma Mu for their speaker.

SABBATICAL LEAVES ARE **GRANTED 3 PROFESSORS**

and Rogers Leave for **Extended Vacations**

Several changes will be noted in the Faculty at the commencement of the Trinity term on February 7. Professor Dadourian of the Mathematics department, Professor Krieble of the Chemistry department, and Professor Rogers, instructor of Engineering, have all been granted a Sabbatical

At the beginning of the new term, Professor Mitchell will be the acting head of the department of Mathematics and Professor Smith will be acting head of the Chemistry department. Henry Wolcott Buck, an engineer in Hartford, will teach Professor Rogers' course in Civil Engineering the same event, besides swimming on for the second term. Mr. Buck was formerly on the Trinity Faculty when Professor Rogers was away on his last leave of absence. The course in in their usual fine performances, all

TRIPOD NOTICE

There will be an important meeting of the executive board of the Tripod on Sunday, January 16, at 8 o'clock, in the office of the paper. All members must be present.

TRINITY DEKES WINNERS OF SCHOLARSHIP AWARD

Prize for Chapter Showing Most Improvement Given to Local Group at Convention

The Alpha Chi Chapter of Delta hundred and fifty dollar prize for scholastic improvement at the ninetythird Annual Convention of the fraternity, which was held in Philadelphia during the Christmas vacation. The award, donated by Phillip Morris and Company, Limited, is made annually to that chapter of the fortyseven in the United States and Canada which shows the greatest improvement over its standing of the previous

The award was announced at the banquet of the convention at which Wilmont Gateson, D.D., Trinity, '06, was toastmaster. Those from the local chapter attending included Ray Armstrong, Tom Benson and Newton Mason.

TO VICTORY OVER TECH

Blue and Gold Medley Relay Trio Clip College and Pool Record With 3:15.3 Time

Displaying a wealth of power in all events, Trinity's well-balanced, 1937-38 swimming team last Saturday afternoon served notice to Colgate, Williams, Wesleyan, and other future opponents by trouncing MIT by the lop-sided score of 57-18. Winning all but one of the nine first places and garnering seven seconds and thirds, Joe Clarke's natators also established a new college and pool record in the 300-yard medley relay.

The first event, the 300-yard medley relay, gave the two hundred-odd spectators in Trowbridge Memorial pool the only real thrill of the afternoon. By putting together three of his top-flight aces, "Seal" Slowik, backstroke champion; "Ax" Aksomitas, record holder in the breaststroke; and "Soup" Campbell, star freestyle dashman, Coach Clarke was able to provide the opening meet fans with a stirring race. The old college record of 3:17, set in 1936 by Slowik, Onderdonk, and Fanning, was clipped 1.7 seconds to 3:15.3.

MIT was handicapped by the loss of their ace diver, Paige, who was out with a cold, but even so, the Engineers might have been trounced more decisively, had not Coach Clarke inserted several second-stringers into the events. Gus Heusser, lanky sophomore, swimming his first races in varsity competition, took a second in the 220-yard swim, coming in not far behind Bob Muir, and a third in the 440. Don Smith and Bud Tibbals, two other sophomores, also showed up well, Smith taking a second in the 100-yard dash and Tibbals third in the 400-yard relay team. Captain Clem Motten, Bob Muir, Neil Fanning, and "Swede" Anderson turned

FOUR SCIENCE LECTURES DR. WHITAKER ADDRESSES TO BE OFFERED PUBLIC

'When Molecules Meet" First of Series Offered in Tribute to Late Francis Garvan

Friday, January 14, marks the beginning of a series of four science lectures, which are offered to the public and students as a tribute to the late Francis P. Garvan. The purpose of the lectures is to show by experimental demonstration and illustration the procedure which modern science follows in unraveling the mysteries which confront it. Each Kappa Epsilon was awarded a two lecture will be given by several professors from the particular department which covers the subject to be discussed.

> The first lecture is titled "When Molecules Meet." The speakers will endeavor to demonstrate the action of meeting molecules, by the audible and visible phenomena which they set up, even though the molecules themselves are isible. Those participating in this lecture will be Professors Krieble, Smith. Atkinson, Burwell,

The second lecture, on "Electrical Waves", will be held on Friday, February 11. The speakers, Professors Perkins and Wadlund, and Dr. Doolittle, will show the behavior of electrical waves and explain their significance in high voltage spark discharges, radio, high frequency cur-

The third lecture, to be hald on March 4, will be given by Professor Troxell, and is called "Weird Creatures of an Ancient Day." This lecture will reveal the methods used in building up the past of prehistoric and now extinct animals, whose bones are uncovered continually by paleontologists, or whose record of existence has been left upon fossiliferous

The last of this series of lectures will be Professor Bissonnette's interesting experiments in "Light and the Breeding Time of Animals." He will be assisted by Dr. Burger.

All these lectures will be held in the auditorium of the Chemistry Building, and they will begin at 8.15 p. m. Tickets will be offered free of charge, and may be obtained from the Secretary of the Department of Chemistry.

BLUE AND GOLD QUINTET FACES WORCESTER TECH

Oostingmen to Combat Tallest Five in New England; Tech All-Veteran Team

Tonight the Trinity varsity basketball team will meet the tallest quintet in New England at the Hartford High School gymnasium, namely, Worcester Tech. The smallest man on the Worcester team is the captain, McEvan, whose height is mere 5:10. The rest of the starting five consists of Rushton, who is 6:3; Forkey, 6:4; Wells, 6:41/2; and Raslavsky, who is 6:2. Worcester Tech this year has an allveteran aggregation. Last year they had a record of ten victories and four defeats. Trinity was one of the four teams that were able to conquer them. Not only did the Blue and Gold defeat Tech, but they did it on Worcester's home court to the tune of 38-35.

This year's Worcester five is undefeated in its only two starts. It vanquished Assumption 51-27, and necticut are that there are 116 agen-

POLITICAL SCIENCE CLUB

State Budget Director Discusses Finance and Administration in Connecticut

At a meeting of the Political Science Club in Cook Lounge, January 6, Dudley Clapp, president of the organization, introduced Dr. Benjamin P. Whitaker, Budget Director of the State of Connecticut, who spoke on "The Reorganization of Our State Financial Administration."

Dr. Whitaker stated that during the past few years new agencies have been developing in the executive department of the State until in July, 1935, it was discovered by the Reorganization Committee that 116 permanent agencies had been created in this department. The Reorganization Committee also found out that the expenses of the State of Connecticut are about fifty million per year. and it is expected that this amount will probably increase to sixty-five million during the present year because of increased unemployment. The public agitation, which follows for the creation of a new agency to administrate the bill, is usually aroused by the lobbyist for the bill because he fears that it may be lost in the complexities of government if a new office for the administration of the bill is not created. Some agitation is aroused by men who consider themselves potential candidates for the new offices created.

Excessive Agencies

From the time of Governor Roberts in 1905, Dr. Whitaker said that enough agencies had been created. And ever since Roberts' administration the governors of Connecticut have maintained that there were too many agencies to carry on the business of State government effectively.

In 1920 the General Assembly was assigned the business of reorganization of the State government. Dr. Whitaker said: "My opinion is that these gentlemen went home and forgot all about their assignments, except for an old bewhiskered gentleman from Fairfield, who spent quite a bit of time studying other State reorganizations before he drew up a program. When the assembly reconvened, his program was adopted with little discussion."

Since the departments in Connectiminority interests, they were not created in any specific order or with any unique duties. As a result, squabbles were continually arising as to which department various duties belong. For instance, Dr. Whitaker mentioned the recent squabble as to whether the Department of Labor or the Department of Health should have jurisdiction over the control of occupational diseases.

Committee Functions

Dr. Whitaker explained that the program of the Reorganization Committee is divided into two parts. First of all, the Overhead Functions were to be administered by the Department of Finance and Control, and in the second place the Service Functions were to be allotted to eighteen unique departments which would take the place of the 116 former overlapping

At present, therefore, the problems of reorganization in the State of Con-

WHY?

In this, the next to the last issue while we are at the helm, we wish to tackle a problem that is well nigh universal—politics in college life. It has often been argued that politics are a necessary evil in any part of our civilization, that the world could not get along without them. We fail to see, however, why they need to be an integral part of college life.

They seem to enter into every phase of undergraduate activity —whether it be in elections or selections and appointments. There is only one body that we are familiar with which is in no sense political in its actions. We refer to the college Senate. Those who are unfamiliar with it are inclined to think that everything that goes through it is tinged with fraternity politics, since the fraternity men are in the majority. It is with the greatest of pleasure that we can state that this important body is probably the most impartial group on the campus.

Politics do, however, enter into practically everything elseeven to the realm of sport. It seems strange that the best man for a job must be passed up in order to satisfy the wants of some selfish group. Think of the evils that result. Consider the benefits that are thrown away.

Party rule has been in effect in class elections, probably since the college was founded. Often the right men were elected anyway, just because they belong to the proper group. Just as often, the result was the opposite. Consider what has happened. The class office has descended in importance until now it means nothing more than an additional honor. There are practically no duties attached, and class spirit has reached a new low. Class officials may not mean much while in college, but they do and should in after life. It takes the proper men to keep a class united after graduation, to get men back for reunions, etc. Consequently, we now find some classes much stronger than others in the support of drives and interest in the college. It seems a shame that all cannot be equally strong.

It seems hardly necessary to comment on what happens when politics enter the field of sport. The results are too apparent. It is sufficient to say that politics have entered in the past and will undoubtedly in the future.

Other than these specific examples, politics lead to a great deal of internal strife in the college. Fraternity is pitted against fraternity; neutrals against fraternity men, etc. Double-crossing and bribing are rampant. Why must we have them? They seem to be necessay in larger bodies, where a great many of the voters are not "intellectual". College students as a whole are smart enough to see the evils and defects resulting. Why can't they subdue their selfish instincts to the mutual benefit of the whole?

HERE AND THERE

Upon the outside wall of a furniture store in Libertyville, Ill., is a sign urging, "Ask your dealer to explain to you our new method of reproduction". This should cause no alarm, however, a phonograph company is the father of the ad.

Here lies a tale which we hadn't heard before and we pass it on to you hoping that it's new to you. It seems that there was a colored mammy who had given birth to quadruplets. Their names were Eeny, Meeny, Miny, and Albert ... the No. 4 variation because, she said. "I don't want no Moe".

We finally found the statement that gives an exact description of how we feel when writing this column. "Trying to be original is like going after the last drink in the bottle; it seems someone has always beaten you to it."

Politics in College

"Sure I'm a Republican. All that the Democrats are doing is spending the poor taxpayers' money. What did I do during the vacation? Worked in the post office and made darn good money."

Speaking of graft reminds us of the story about the man who was a street car conductor for thirty years, owned two apartment houses and was known as Honest John. The reason they called him that was that he brought the car back to the barn every night.

Hot Dogs!

The latest thing in winter nightwear for coeds is not sophisticated satin and lace, but pajamas of outing flannel that have hoods and feet attached. Woolly snuggle puppies give the girls something to cuddle up to on cold winter nights.

Keep your snuggle puppies away from here! We'll do our own snuggling, thank you.

During the vacation we took time out for almost everything in the entertainment line, but the best thing we ran across was that art called skijoring. Have you ever sat on an emery wheel that has been frozen solid? If not, you ought to try it before wearing out your ski suit in this gentle art. From now on there is nothing like a big open fire with lots of reading material around to while away the winter hours.

We talked to a fellow from Duke this Christmas, and we asked him how the Big Apple was doing down now they are all doing the Little the Southern guys and gals. Hurray!

CAMPUS OPINION

The Question: "Do you think that we should boycott Japanese goods?"

The Answers:

Greg Gaboury, '39:

"Yes, emphatically, we should! This answer is based upon the hypothesis that war is obnoxious. Japanese policy is one which does threaten us eventually in that it is keenly opposed to democratic government. Should this type of political theory gain a strong foothold, nations such as the United States would be an ultimate object of their aggression. By boycotting Japanese goods we, meaning nations opposed to Japan's policy, would economically force them to their knees. Granted that this is a painful operation; so is war. Boycott is, therefore, the lesser of two evils. Absolute neutrality is an impossibility. Mere trading with a nation is, in this case, helping their cause. Their motif is one with which we are not in sympathy; therefore we should boycott Japanese goods."

Lou Walker, '38:

"I don't think we should boycott Japanese goods. At the present time we are not threatened with any war with Japan; but, by boycotting their goods, we would openly antagonize them and needlessly aggravate already strained relations resulting from the recent Panay situation. Boycotting silk goods would harm our own industry as a great percentage of them are manufactured in the United States out of raw materials imported from Japan."

Bob Randall, '40:

"No, I am not in favor of a boycott on Japanese goods. Japan can make certain goods cheaper than we can, and, therefore, the American public should be allowed to take advantage of these low prices during the presbusiness recession. American store owners have Japanese goods on their shelves now, and if they are forced to hold these goods for the extent of the boycott, conditions will be worse than they are now. If we don't boycott them, trade relations between Japan and the United States will become stronger. It took so many years to develop the trade between the two countries that it would be foolish to ruin it by an open boycott."

Josias J. Cromwell, '39:

"In my opinion, I do not deem it wise to boycott Japanese goods, or the goods of any country with whom we are not engaged in actual warfare. Trade, the backbone of industry, is absolutely necessary to the welfare of every nation. Most countries are far from being self-sustaining, and yonder. He replied that it was passe; a boycott on trade would force their Apple. It seems that our interpreta- At the present time world peace is tions of the Big Apple ruined it for strongly sought after, and only through the breaking down of all trade barriers, such as boycotts and B. U. D., Ltd. import duties, can this be obtained."

SPORTS SIDELIGHTS

Another year has passed away into history's archives and your experts and selectors nearly with it, too, despite our special patented crystal ball, two-headed coin, and headache pills. However, our warriors bold in Blue and Gold did their little bit in helping the experts lead a more serene and smoother existence by winning a majority of their contests. In addition, every one of Trinity's major teams won a majority of their games, the nineteen thirty-seven edition of the Blue and Gold football juggernaut coming the closest to the .500 percent mark, winning four and dropping three decisions. The highlights of a successful season in the various sports were:

Basketball—The "Mighty Mickey" Kobrosky pacing the hoopmen with thirteen points as the Oosting charges nipped the Cardinal's nine-game winning streak at the Hopkins Street gym by a 37 to 34 count after previously absorbing a lacing at the Wesmen's hands down in Middletown during the early part of the campaign.

Swimming-The Wesleyan meet at Middletown when the Blue and Gold seals, really "hot", nipped in for those decisive second and third-place points to snatch the first Trin victory over the Cardinals in the sport by a 42 to 35 tally in the windup meet of a triumphant season.

Baseball-The epic win over the Elimen with Captain Ray Patton tossing them up for the Hilltoppers against the Yale's star portsider, Lefty Jubitz, down in Eliville after the heavens opened up and washed out the two previous contests at Hartford, thus permitting the Trin appleknockers to whitewash the Blue by an 11 to 5 score.

Track-The best track squad ever to vie for fame 'neath the Blue and Gold banners, winner in four of their dual meets and beaten only by the Wesleyan trackmen in a dual meet on the home grounds, trekked northward to the wilds of Vermont to prove their mettle in the Eastern Intercollegiates by grabbing second place, and beating the Connecticut State Nutmeggers by a sixth of a point.

Football—Kelley's great one-handed tumbling catch of Robert the Red's pass in the end zone that proved to be the turning point in the Hobart game. . . . That breath-taking and heart-breaking Wesleyan game when the Hilltop machine was stopped twice by great goal-line stands on the "Big Reds" part and as Mim Daddario snatched that fatal interception on Wes's forty-yard marker midway in the third period. . . . And that smashing, crashing Connecticut State game—need we say more?

However, facing the future's bright prospects doesn't particularly appeal to your correspondent. The most recent and cruelest blow delivered to Trin's hopes was the illness of Capbacks to the wall and promote war. tain Steve Truex, the one-man track squad, whose 100 points last year the difference between a mediocre and a successful season. It's very doubtful if Steve will be out there on the track this spring turning in his 10-second hundreds and showing his prowess in the javelin and shot. for in addition to his leg injury sustained in the Connecticut State football game, ulcers of the stomach have forced him to remain in the hospital for several weeks.

The baseball outlook, although not downright gloomy, is not too good as the Jesseemen have lost four regulars via the diploma route in Kobrosky, Patton, Parker, and Lindell, who must be entirely replaced by last year's substitutes as the freshman ruling will cut the chances of receiving any new material.

The swimming and basketball outlooks are, however, more on the brighter side. Ray Oosting's hoopermen should be able to nose in about or over the .500 percent mark, making a comeback down in Philadelphia by routing Haverford after a firstyear Colby team had taken the boys

(Continued on page 6.)

READING PERIOD?

When it was inaugurated last January, the reading period was greeted with enthusiasm on the part of the student body. Here was the time to do that necessary reviewing before exams. Those papers that had been put off could be completed. In general, students could enter their exams with a great deal more peace

Since its inauguration, the period has been gradually shortened, until this year it only extends for two days. We understand that it was planned to be longer, but that the faculty shortened it for some reason or other. After the last exam has been held, there is a period of five days in which no activities are scheduled. Certainly all this time is not necessary for the correction of examinations. Many colleges allow much less. Unquestionably, the students will profit from the two days allotted them for review, but is it not probable that everyone would be better off if some of the time after exams are over were utilized for them and the reading period were extended?

The Commons Club, Founded in 1931, Has **Grown into Large Campus Organization**

On the seventh of October, 1931, a | it was decided to collect a regular supper in the old Commons, appointed a committee to draw up plans for an organization of the members regularly eating there. The committee reported back the following week with a few vague suggestions, but were some form of organization should be unity in the neutral body, showing zation. that many men even eating together at the Commons did not know each They deplored the lack of social activity on the part of the neutrals and insisted that such a large stagnant body formed a serious handicap to the college as a whole.

The group to which the committee reported agreed with them and, as a first step, enrolled the names of those present as charter members of the yet unnamed society. Committees to select a name and to decide on a purpose for the club were nominated and the meeting broke up with a social

All during that winter the club met regularly on Wednesday evenings. There were business meetings, talks by various members of the faculty, dinners, theater parties, and game Gradually those charter nights. members and a few new men taken in began to find themselves banding together, forming closer friendships, and getting more out of college life. Continually, they worked away at making the organization they had founded more permanent. Various names for the group were suggested, but the Trinity Commons Club was the one finally settled upon. It was decided that the club should be open to all members of the neutral body, but certain membership restrictions and regulations were established in order that the club should not become A purpose was agreed upon, and despite the many changes that have taken place in the club since its inauguration, the purpose has never been changed. The constitution reads:

"The purpose of the organization shall be to foster a closer relationship among the members of the neutral body of Trinity College and to promote general social activities, always putting loyalty to the best interest of the institution above loyalty to any social group within it."

Further activities of the first year included participation in intramural sports and the selection of a pin, diamond shape with a black TCC monogrammed on gold, and a small chain connecting with a round, gold Trinity With the exception of the present practice of initialing the back of the pins, they likewise have club's history.

TRUEX TO RETIRE FROM

ALL SPORTS ACTIVITIES

Captain-Elect of this Season's Track Team III With

Stomach Ailment

Steve Truex, one of Trinity's most

prominent athletes, has been forced

to withdraw from all future athletic

activities on the Hilltop because of a

stomach ailment. Truex, who for

three years was an outstanding member of the football and track teams

team, has been at the Hartford Hos-

group of Trinity College students series of dues. Permission was gathered together informally after granted to the club to have its own teams in intramural competition and donations were made to the Hartford Community Chest and to the Mother's Window in the new Chapel. club's gift to the Chapel was in memory of Mrs. Martha Madourin, matron unanimous in their expression that of the Commons at the time of the club's inception and always a loyal formed. They pointed to the lack of friend to the members of the organi-

President Ogilby was invited to speak to the club this year and thus began a tradition which has been annually renewed. Once each year Prexy" comes for dinner with the club, in a short address informs the members of "the state" of the college, and then in an informal discussion points out ways in which he thinks the Commons Club can better help to promote the welfare of the college in respect to the student body.

In this year the club began to extend its purpose a little farther. The opinion was voiced by many that there did not seem to be a close enough relationship between student and professor. In an effort to build up this rapport which naturally would lead to a better understanding on the part of both sides, a faculty tea was The ladies were also invited and have been present every year since when the club has held its annual affair the Sunday following the Sophomore Hop week-end.

After long discussion, some wrang ling, and much petitioning the club was finally granted full intramural status and the two cups that it had won in the competition were deposited in the new Cook Lounge, the regular meeting place of the club.

The third year was a year of consolidation. Regular meeting procedure, a constitution, and a pledging program were decided upon and the club for the first time found itself upon a firm financial basis with a fully organized and working budget.

In the fourth year of its existence the club moved forward noticeably on the social side of its purpose. Membership requirements were tightened up, a tea dance was held, and the club cooperated with the student Senate in the staging of two other dances. A committee was appointed to send flowers or books to members of the club who were sick at any time during the school year, all members met together in the cafeteria Wednesday evenings for a club dinner; and the annual banquet in June was inaugurated as another yearly

The fifth year the club returned to find that its newly elected vice-president, Theodore Woodbury, had been remained the same throughout the killed during the summer. As he was the first member of the club to The newly formed club went into die, it was decided to establish a regits second year still on a shaky basis, ular chapel service to be held each and rapidly became more shaky when year in his memory. are held in the crypt early in the morning of the anniversary of his birthday. A special memorial service was held during the fall at which many members of the student body gathered to pay tribute.

In the sixth year of its existence the club took the greatest strides forward in its history. A greater unity was achieved between members than was formerly deemed possible in a non-secret social organization. A new constitution and series of by-laws were formally instituted and a design for a club flag was approved in order that the Commons Club might be represented in the Chapel of Perfect Friendship. At a short chapel service the flag was formally presented and hung in the north chapel.

A bowling team was formed by various members and informal matches were rolled with members of the Physical Education Department. The season was officially closed with a dinner dance and evening entertainment at which the new officers of the club were formally inducted.

The club, now in its seventh year, finds itself at the height of its prosperity. Its membership, including pledges, numbers 35, the maximum number allowed it by the by-In spite of its rapid physical growth, however, the club has not lost sight of its original purpose. It has not turned into an eating club; since the members eat together formally but once a week, preceding the regular Wednesday night meeting. It has not degenerated into a series of loose groups, but rather has tightened together into one more closely bound circle. And it has preserved its neutral attitude. Composed entirely of members of the neutral body, both on and off campus, who for one reason or another have not affiliated with any fraternity, the club expresses no desire to become a fraternity

It prefers, rather, to continue the work which it is carrying on in the neutral body, thus adding to Trinity College one more strong unit of sup-It will continue to carry out this program along the lines of its activity for the seven years of its history. It will attempt not only to give a social program for members of the neutral body who are fraternally inclined, but will endeavor to continue to foster a better understanding between students and faculty through its annual tea, and through its many invitations to professors to come to dinner with the club, to give informal talks, and to meet the students on a relaxed and social basis.

TRINITY MERMEN READY FOR UNION AND COLGATE

Blue and Gold Engage Rivals on Successive Days; Good Showing Against M.I.T. Bolsters Hopes

The Trinity tank team will continue the natatory wars when they engage Union, and Colgate on Friday and Saturday of this week. The Blue and Gold will attempt to continue the winning ways that they inaugurated in swamping M. I. T. in the first meet of the season here last The team will travel to Schenectady on Friday where they will meet Union at 7.30 and then spend the night at the Van Curler Hotel in that city. On Saturday they will entrain for Hamilton, N. Y. where they will engage Colgate at three o'clock in the afternoon and will return to college that evening.

In the opening ercounter against M. I. T., the Trinity mermen looked to be in good form even for so early in the season. The team is made up almost completely of veterans with only Onderdonk, Little, Manice, and Lathrop missing from the strong 1937 squad. In swamping the M. I. T. team, Trinity hung up a new college and pool record for the 300-yard medley. Slowik in the backstroke, Aksomitas in the breaststroke, and Campbell in the freestyle splashed to the finish line in 3:15.3 to better the former college record of 3:17 made by Slowik, Onderdonk, and Fanning in 1936. The Blue and Gold captured every first but one.

Joe Clarke is optimistic about the The New chances against Union. Yorkers have never taken a meet from Trinity in the years that the two colleges have been competing in swimming. Last year Union was not impressive and there is little reason to expect that they will be much better in the coming campaign.

Colgate is a newcomer on the schedule this season. Consequently, there is little material for comparison or forecasting of their strength. Last year their record was impressive against competition of a rather more difficult caliber than that faced by Trinity. Colgate also had a strong Freshman squad from which to draw recruits to replace any man lost through graduation. Outstanding men on the Colgate squad are Alderich, Ferguson, and Albie Burke, a diver worthy of note who is a football man and hails from Waterbury. Little can be predicted as to the outcome of this meet, but Trinity is conceded somewhat less than an even

AGONY COLUMN

By Wozzenheim.

The thing that has been wrong with all the Tripod columnists in the past is the fact that they have been too radical. They have continually made slighting remarks about dear old alma mater, and have given vent to ideas that threaten the home, Church, and state. Why, the author of Here and There is probably a lean, dark man who spends all his time in Jarvis Lab concocting bombs.

With these facts in mind we approached the Editor and said, "The duration of your editorship, Sir, has been marked by a series of vicious attacks, both on the part of yourself and your colleagues, against some of those very institutions which constitute one of the finest elements of life at Trinity...."

"Why do the heathen so furiously rage together?" he answered brokenly, creasing his brow.

"Yes," I continued, "for the amusement of the college as a whole, let the Editor be delivered of his radical invectives,-and therefore, Sir, I have decided to edit a column to boost Trinity...."

"Go ahead," he answered with a sabotagic leer, "and may you smother in the process."

So now we begin our column. We shall tell only nice things about Trinity. We shall leave destructive criticism to the scofflaw who writes Here and There. Now for the column:

Trinity is a wonderful college, the best small college in the East. The students are all he-men. The professors are all regular fellows and smoke pipes. The President smokes a pipe. The Dean smokes a pipe with a bowl as big as Og, King of Bashan. The janitors also smoke pipes, but they are beside the point. Trinity men have always been noted for prowess on the athletic field. In 1869 a Trinity baseball team made thirty runs against Yale (P.S. Yale made forty). In 1900 a Trinity football team beat C. C. N. Y. 99-0.

Trinity built the most beautiful chapel in the country. It made Yale and Princeton green with envy. In it the seats face the center, after an old English custom, thus forcing the students to exercise their necks if they want to see the speakers. In this way spiritual and physical exercise are combined, and it won't be necessary to build a new gym.

All the students go to chapel with great avidity. No one ever reads newspapers in chapel as they do in other colleges. No one ever studies text-books in chapel. The faculty members never come to chapel, because there is no room. They want to give the students a chance to get religion.

Bolshevists are not condoned at Trinity, they are kicked.

Trinity had a chem lab. as sweetsmelling as the new mown hay. It was called Jarvis Lab., and malicious persons make remarks about it. It Give my love to all, with a large poris untrue that acids dripped through tion to yourselfthe floor of the chem. lab. onto the heads of the physics students below. It is untrue that baldness increased in the physics classes. But we have a new lab. anyway.

The Trinity library is well ventilated and has soft-voluptuous seats.

Radios are squelched. Musical instruments are prohibited after 8 p. m. Rudy Vallee comes on at 8 p. m. Few other colleges can boast of such a defense against crooners.

A smart Trinity man once conceived a mighty plan-however, that's another story.

Authentic Letters of a Freshman of Seventy-Five Years Ago

Hartford, Sept. 13th, 1863. (This is the first of a series of authentic letters written by a member of the Class of 1867. Others will follow in subsequent issues. — The Editors.)

My Dear Mother:

It is now half past five, and, as that is half an hour before supper, I shall have time to begin, if not to finish a letter. I have got my books that I sent for. They cost, together, five dollars and twenty cents (\$5.20) Books cost abominably now. Prof. Russell had the three upper classes today for the first time. He gave us a short lecture and declaimed several pieces, to show the different tones of the voice. One piece, from Poe's poems "The Bells" was splendid. It describes the tones of different kinds of bells viz: the Silver, Gold, Brazen, and Iron bells. He then declaimed an extract from Patrick Henry's speech, beginning, "Mr. President; It is natural for man to indulge in the illusion of hope etc." He first declaimed it as it should be, and then two different ways that he had heard it (improperly spoken). It set us all to laughing. He yelled it at the top of his voice, and it seemed as if he was going to take the roof off. The Juniors are beginning to look up in the world. One new Junior entered at the beginning of the term, Stevens by name. He was from Rochester University. And today there were two from Harvard, examined for that class. But the Freshman class is really an object of pity, for they number only six, and of those one is a university student and one is a dummy. * * have heard of several more of the students that were drafted. There was Moore, Coggeshall, Delano, Husband and Munro. Moore and Munro are not back yet. Husband got off because he was an alien, being of English birth (born in England). I had just as lief Munro would have to go as not, for he was a strong Black Republican. Edgar B. Lewis, * a member of the Junior class died a few days ago in one of the hospitals. * That makes three students that have been killed (by the war, some way or other).

My geranium is doing nicely. don't wonder that John tore my carpet when he took it up. I spoke to him about it and told him that he made horrid work taking it up etc. and asked him if he tore it up. He said he had not time to take it up by taking out the tacks with a tack hammer and so he said, he lifted one corner and then shoved a spade along under-a fine way take up a carpet. I told him that I should take it up myself next year, for it would ruin my carpet to have it taken up so every year. *

I am sorry that Josephine is sick. and I hope that she will get well soon.

Your aff. son,

FROSH TANKERS SUCCUMB TO HARTFORD HIGH TEAM

Conway Takes Only First When Freshmen Bow by Score of 54 to 21

The newly formed freshman swimming team dropped its first meet of the year to the Hartford High natators by a 54-21 score last Friday afternoon, January 7.

Although the H. P. H. S. outfit was not so powerful as it has been in recent years, it still possessed sufficient manpower and balance to swamp the Trinity yearlings with ease. Johnny Tyler, younger brother of the renowned Dave Tyler, who is only a sophomore at Hartford High, turned in an excellent performance in the 220-yard dash with a 2:26.8 time.

The star performer for Trinity was Conway, former Hartford High ace, who swam the 100-yard backstroke in the unusually fast time of 1:04.7. This feat surpassed any similar one ever turned in by any Blue and Gold Jayvee since the inception of swimming here at Trinity.

The results:

50-yard dash - Won by Thomas (H. P. H. S.); second, Madrak (H. P. H. S.); third, Broatch (T).

100-yard breaststroke - Won by Biedryzchi (H. P. H. S.); second, Mullady (H. P. H. S.); third, Smith (T). Time 1:13.3.

220-yard freestyle-Won by Tyler (H. P. H. S.); second, Czhahowski (H. P. H. S.); third, Adams (T). Time 2:26.8.

100-yard backstroke-Won by Conway (T); second, Morhardt (H. P. H. S.); third, Coffey (H. P. H. S.). Time 1:04.7.

100-yard free style-Won by Bonee (H. P. H. S.); second, Randall (T); third, Amsden (H. P. H. S.). Time

Diving-Won by Biedryzchi (H. P. H. S.); second, Broatch (T); third, Tevialdi (H. P. H. S.). Score 81.1.

150-yard medley relay - Won by Hartford High (Morhardt, Mullady, Bonee). Time 1:35.1.

200-yard relay-Won by Hartford High (Czhahowski, Madrak, Thomas, Tyler). Time 1:45.1.

WHITAKER SPEAKS

(Continued from page 1.) cies doing the work which should be done by eighteen, and that, whereas any one of the eighteen can operate without the help of any one of the others, still every one of them must draw funds from a single source. It is necessary, explained Dr. Whitaker, that a single individual or a group of persons assume the responsibility of allotting the money. In the past there has been no one who would assume the responsibility and social dangers of appropriating the finances to the various departments. What must be done is to give one individual the power of dividing the money. It must be a person who will assume the responsibilities and be accountable to the public for his actions.

Dr. Whitaker concluded: "We must solve our problems by constant experimentation."

PROFESSORS LEAVE

(Continued from page 1.)

Astronomy will be taught by Dr. Buell.

Professor Dadourian and Professor Rogers have as yet no definite plans on where they will spend their wellearned vacations. Professor Krieble plans to take a motor trip down to Florida and proceed from there westward along the Gulf of Mexico up into Texas and thence to California. The trip will come to a halt in Pasadena, California, where Professor Krieble plans to spend three or four months in writing up some important papers which he had intended to do a year or so ago, but which were delayed due to his work on the plans of the newlycompleted Chemistry building. After finishing his work in California, he will proceed home to take up his courses at the College for the fall

BASKETBALL

(Continued from page 1.)

triumphed over Colby 51-31. The Trinity record is not as impressive as this, the Blue and Gold having lost to the Colby five 34-31. This is the only defeat in three starts for the Oostingmen. Their record includes wins over Bard, and Haverford.

The Trinity starting five will probably be composed of Carey and Randall at the forward posts, Ferguson at center, and Mountford and Captain Kenney holding down the guard positions. O'Malley, Lindner, and Morris will be in reserve.

In the preliminary game, starting at 7.30, the Trinity Freshmen will clash with the Worcester Tech Junior Varsity.

absolute lordship over men. The inherent possibility of the Incarnation, the fact that the Son of God could be born of the daughters of men, gave good." to all mankind the potentiality of being divine, so that a thinking Christian could not possibly cast a few grains of incense upon the altar fire in tribute to the Emperor. The He has the same idea as the American Christian Gospel is absolutely at variance with the imperial tradition.

groups of individuals are asserting propaganda." their sway not only over the persons but even over the ideas of masses of people, the issues of Nicaea which to the buoyant, easy-going spirit of divided the Christian world once more America....democracy cannot afford appear. Mere democracy is not suf-ficient to oppose autocracy—it must Dixon Ryan Fox of Union College appear. Mere democracy is not sufbe an enlightened democracy. Enthroned despotism may support itself for a time by force, or, what is more subtle, by benevolence real or simply asserted. But the history of our civilization should tell us that the manger of Bethlehem is the real shrine of liberty.'

SWIM PREVIEWS

(Continued from page 2.)

on the home floor. Swimming seems to be the one big bright spot on the horizon as Joe Clarke's men showed their strength before the home crowd last Saturday when they routed the Massachusetts Techmen in an easy meet. Joe called Bob Muir out of the stands and entered him in the 220 freestyle, Robert romping home in style. We also noticed that Joe pulled his punches in several spots along the line by keeping "Ax" Aksomitas, "Seal" Slowik, Bob Muir, and "Soup" Campbell out of various of their accustomed events. The Williams, Wesleyan, and Colgate meets should prove the Hilltoppers' toughest. The real test of the team will come this Friday and Saturday when the Blue and Gold Tankers meet the Union team on Friday afternoon in Schenectady and travel to Hamilton, New York, for a meet the following night with Colgate. Keep your fingers crossed, lads, and your feet thrashing.

ON OTHER FRONTS

"No mere cleverness can take the place of the painful processes of hard and unremitting work." Ralph H. Tapscott, president of the Consolidated Edison Company of New York, returns to his Alma Mater to further depress the newest crop of freshmen.

Cabbage, the dishmate of corned beef, was held in high esteem as a medicinal cure-all by the doctors of ancient Rome.

Citing the work of Pliny, Roman writer, Dr. Thomas W. Dickson of Syracuse University told members of that institution's Classical Club:

"It would be too lengthy to enumerate all the medicinal virtues of cabbage. Pliny discussed 1,708 cures from garden plants.

"Cucumbers could accomplish 30; parsley, 31; leeks, 71, and cabbage, 87. It was said to be used in cures for ailments of the eyes, ears, spleen, stomach and for bad dreams, insomnia and drunkenness."

Many business men and industrialists prefer college trained men in their organizations, but rarely does any occupation exclude entirely employees who have not attended college. In Washington, however, there is one business which employs college

The National Escort Bureau, which furnishes-for a price-personable young men to escort date-less women to the Capital's night spots, will not consider any applicant who does not have a college background.

So, if any young college man looks forward to picking up a little extra money by serving as a professional escort, he may well appreciate his opportunity for college training.

Incidentally, the National Escort Bureau is strictly business and no monkey-shines. The escorts must meet rigid requirements and are strictly prohibited from putting their professional engagements on a per-

TRINITY SQUASH TEAM OVERWHELMED BY YALE

Completely outclassed by an unusually strong Yale aggregation, Trinity's Squash team was handed a 5-0 shutout last Saturday. Jackson was the only Trinity man able to get as many as eleven points in a game. However, in view of the fact that most of the men from New Haven have national rankings, the Blue and Gold showing was not bad. Coach Dan Jessee feels that his boys will improve and the opposition will not be quite so overpowering.

The results:

Cookman (Y) defeated Jackson (T) 15-4, 15-9, 15-11; Stillman (Y) defeated Benson (T) 15-10, 15-6, 15-6; Auchincloss (Y) defeated Leon (T) 15-3, 15-2, 15-2; Hauky (Y) defeated Bates (T) 15-3, 15-8, 15-7, and Harding (Y) defeated Widdifield (T) 15-2, 15-0, 15-3.

GOI EVERTIHING, my new RKO-Radio picture," says Ann Sothern, "there's a scene where the girl gets married on a jolting truck, and it turned out to be a knockout! ...But for me, as an actress ...

4. "NOW AS REGARDS TOBACCO... Luckies' flavor has always appealed to me very much. So I was interested to read recently that Luckies are the favorite cigarette among the tobacco experts themselves.'

A KNOCKOUI in a different sense! Imagine shouting your 'I do's' above the noise of a truck... and imagine doing it 30 times! Yet, even after this throat strain, I still enjoyed Luckies! They're always...
