News Release

UD TO OFFER SUMMER PHYSICS COURSE

DAYTON, Ohio, December 18, 1981 -- The University of Dayton Department of Physics will again conduct an intensive summer program for students wishing to complete a one-year college physics course in seven weeks. The course will begin June 21, 1982 and will end on August 6, 1982. Classes will meet all day on weekdays and until noon on Saturdays.

The course, which last year enrolled students on summer break from Wright State, Washington University, Ohio State, Ohio Dominican, University of Oklahoma, Northern Arizona, Miami, and Georgetown College, as well as from UD, is run in a summer institute style with formal lectures interspersed with times set aside for problem solving, tutorial assistance, and instructor conferences.

This physics lecture and laboratory course is normally taken by premedical and other life science students. The course also meets physics requirements for virtually all college majors, except those in the physical sciences and engineering. Specially-designed laboratory work is sensitive to the needs of premedical students by its choice of experiments used to illustrate basic physical principles. Modern electronic instrumentation is used.

Dr. Joseph J. Kepes, UD professor of physics, is the course instructor again this year.

Registration is limited, and interested students are encouraged to plan now so that their spring coursework can anticipate this summer program. Students attending other colleges and universities, who plan to return to the Dayton area

for the summer, are encouraged to apply. Optional housing arrangements in the UD garden apartments are also available.

Additional information and application forms can be obtained from the Department of Physics, Sherman Hall 103, University of Dayton, Dayton, Ohio 45469. Telephone (513) 229-2311.
